OLEUM CED'RINUM, *Essentia de cedro*, (F.) *Huile de cédrat*. The oil of the peel of citrons,

obtained in Italy in a particular manner, without distillation.

OLEUM CHABERTI, *O. animale empyreumaticum* Chaberti—*o. Chenopodii*, see *Chenopodium anthelminticum*—*o. Cicinum*, see *Ricinus communis*—*o. Cinnamomi*, see *Laurus cinnamomum*—*o. Contra Tæniam Chaberti*, *Oleum animale empyreumaticum* Chaberti.

OLEUM COPA'IBÆ, *Oil of Copa'iba*. (*Copaib. flij*; *Aquæ*, cong. iv. Distil three gallons; separate the oil; return the water to the copaiba, and again distil three gallons. Separate the oil, and add it to the other. Ph. U. S.) Dose, grt. x to xxx.

OLEUM CORNU CERVI, *O. animale Dippelii*—*o. Cubebæ*, see *Piper cubebæ*—*o. Euphorbiæ lathyridis*, see *Euphorbia lathyris*—*o. Fixum nucem cocsis butyraceæ*, see *Cocos butyraceæ*—*o. Fœniculi*, see *Anethum*—*o. Gabianum*, *Petroleum*—*o. Gallinæ*, *Alkale*—*o. Gaultheriæ*, see *Gaultheria*—*o. Hedeomæ*, see *Hedeoma pulegioides*—*o. Hyperici*, see *Hypericum perforatum*—*o. Infernale*, *Jatropha curcas* (oil).

OLEUM GRAM'INIS IS'DICI, *Grass-oil of Nemaur*, *Gingergrass oil*, called, by the perfumers, *oil of geranium*, and *oil of rose geranium*, and occasionally sold as *oil of epikenard*, is obtained from *Andropogon calamus aromaticus* of India. It is used as a perfume, and like the essential oils in general.

OLEUM JEC'ORIS ASELI, *O. Mor'rhuæ* seu *Jec'oris Morrhuæ* seu *Jecin'oris Aselli*, *Acun'gia Ga'di*, *A. Pisc'ina mari'na*, *Codliver oil*, *Cod oil*, (*F.*) *Huile de morue* ou *de Foie de morue*. The animal oil, which appears under this name in commerce, is obtained from several of the species belonging to the genus *Gadus*. The *Cod*, *Gadus mor'rhuæ*; the *Dorse* or *Dorsch*, *Gadus Calla'rias*, *Morrhua America'na*; the *Coalfish*, *Gadus carbona'rius*; the *Burbot*, *Gadus lota*, *Lota vulga'ris*; the *Pollock*, *Gadus polla'chius*; the *Ling*, *Lota molva*; the *Torsk*, *Bros'mius vulga'ris*. There is reason also to believe, that on the American coast it is obtained, also, from the *Hake*, *Gadus merlu'cius*, and the *Haddock*, *Gadus æglif'nius*. The clearest sorts are generally used. An excellent eutrophic, in tuberculous and strumous affections, rheumatism, chronic cutaneous diseases, and tumours of the mammæ, &c. The dose for an adult is from fʒij to fʒiiss.

Cod liver olein, prepared by subjecting codliver oil to a low temperature and separating the olein by pressure, has been used in the same cases as the oil.

Skate liver oil, *O'leum ra'ia*, obtained from *Ra'ia batis* and *R. clava'ta*, is used in the same cases and doses.

OLEUM JECORIS MORRHUÆ, *Oleum jecoris aselli*—*o. Juniperi*, see *Juniperis communis*—*o. Juniperi empyreumaticum*, see *Juniperis oxycedrus*—*o. de Kervâ*, see *Ricinus communis*—*o. Kervinum*, see *Ricinus communis*.

OLEUM LAURI'NUM, *O. lauri*, *Oil of bays*. An oil obtained from bayberries, and sometimes used in sprains and bruises, unattended with inflammation.

OLEUM LAURINUM, *Daphnelæon*, *Unguentum L.*—*o. Lavandulæ*, see *Lavandula*—*o. Lentiscinum*, *Schinelæon*—*o. Limonis*, see *Citrus medica*—*o. Lini*, see *Linum usitatissimum*—*o. Lini cum calce*, *Linimentum aquæ calcis*.

OLEUM LU'CI PISCIS, *Oil of Pike*. From the liver of the *Esox lucius* an oil is spontaneously separated, which is used in some countries to destroy specks on the cornea.

OLEUM MACIDIS, see *Myristica*.

OLEUM MALABATHRI, see *Malabathrum*—*o. Mariæ*, see *Fagara octandra*—*o. Mastichinum*, see *Pistacia lentiscus*—*o. Melaleucæ leucodendri*,

Caleput (oil)—*o. Menthæ piperitæ*, see *Mentha piperita*—*o. Menthæ viridis*, *Mentha viridis*—*o. Monardæ*, *Monarda punctata*—*o. Morrhuæ*, *O. jecoris aselli*.

OLEUM E MUCILAG'INIBUS, *Oil of Mucilages*. (*Rad. althææ* rec. fʒss; *sem. lini*, *sem. fœnugræci*, āā ʒij; *aquæ*, Oij. Boil for half an hour; add *ol. oliv. Oiv*; continue the boiling till the water is nearly consumed, and pour off the oil.) Emollient.

OLEUM MYRISTICÆ, see *Myristica moschata*—*o. Myristicæ expressum*, see *Myristica*—*o. Neroli*, see *Citrus aurantium*—*o. Nucistæ*, see *Myristica*—*o. Nucistæ æthereum*, see *Myristica*.

OLEUM OLIVÆ, *O. oliværum*, *Olive* or *Salad oil*. An inodorous, insipid, and transparent oil; obtained by expression from the olive, when ripe. It is demulcent and emollient,—possessing the qualities of the fixed oils in general.

An inferior kind, obtained by boiling olives in water, and skimming the oil from the surface, is also used in Pharmacy. See *Olea Europæa*.

OLEUM OMPHACINUM, *Omotribes*—*o. Origanum*, see *Origanum*—*o. Oxydi cupri viride*, *Balsam*, green, of Metz—*o. de Palmâ Christi*, see *Ricinus communis*—*o. Palmæ*, see *Cocos butyraceæ*—*o. Palmæ liquidum*, see *Ricinus communis*—*o. Petrææ*, *Petroleum*—*o. Petrææ album*, *Naphtha*—*o. Picinum*, *Brutia*, *Pisselleum*—*o. Pimentæ*, see *Myrtus pimentæ*—*o. Pini purissimum*, *O. terebinthinæ rectificatum*—*o. Pulegii*, see *Mentha pulegium*—*o. Pyro-animale*, *O. animale Dippelii*—*o. Raia*, see *Oleum jecoris aselli*—*o. Ricini*, see *Ricinus communis*—*o. Rosæ*, see *Rosa centifolia*—*o. Rosarum*, *Rhodelæon*—*o. Rosmarini*, see *Rosmarinus*—*o. Rutæ*, *Peganelæon*—*o. Rutæ*, see *Ruta*—*o. Sabinæ*, see *Juniperus Sabina*—*o. Sassafras*, see *Laurus sassafras*—*o. Sesami*, see *Sesamum orientale*—*o. Sinapis*, see *Sinapis*—*o. Spicæ*, see *Lavandula spica*—*o. Spicæ vulgaris*, *O. terebinthinæ*—*o. Succini*, see *Succinum*—*o. Succini rectificatum*, see *Succinum*.

OLEUM SULPHURATUM, *Bal'samum sulph'uris simplex*, *Sulph'urated oil*. (*Sulphur. lot. ʒij*; *olivæ olei*, fʒj. Heat the oil in a large iron pot, and throw in the sulphur by degrees; stirring the mixture after each addition till they unite.) It is stimulating, and was formerly much used in coughs, asthma, &c., and, externally, to foul ulcers.

OLEUM TAB'ACI, *Oil of Tobacco*. An empyreumatic oil, obtained from coarsely-powdered tobacco by heating the retort to dull redness.—Ph. U. S.

OLEUM TARTARI PER DELIQUITUM, *Liquor potassæ subcarbonatis*—*o. Templinum*, see *Pinus mughos*.

OLEUM TEREBIN'THINÆ, *Oil of Turpentine*. The volatile oil of the juice of *pinus palustris*, and other species of *pinus*.

OLEUM TEREBIN'THINÆ RECTIFICATUM, *O. pini purissimum* *O. T. purificatum* seu *terebinthinæ æthereum*, *Rectified oil of turpentine*, *Sp. of turpentine*. *Common oil of turpentine* is also called *Common oil of Spike*, *Oleum spicæ vulgæræ*. (*Olei terebinth. Oj*; *aquæ*, Oiv. Distil over the oil.) It is stimulant, diuretic, antelmintic, and rubefacient. Dose, grt. x to fʒj.

Guestonian Embrocation for rheumatism consists of *ol. terebinth.*, *ol. oliv.* āā fʒiiss; *acid sulph. dil.* fʒij.

OLEUM THEOBROMÆ CACAO EXPRESSUM, *Butter of cacao*—*o. Tiglii*, see *Croton tiglium*.

OLEUM VALERIA'NÆ, *Oil of Valerian*. The distilled oil of the root of *Valeriana officinalis*.—Ph. U. S. Dose, four or five drops.

OLEUM VINI, *O. æthereum*—*o. Vitrioli*, *Sulphuric acid*—*o. Vitrioli dulce*, *Æther sulphuricus*.
OLFACTIF, *Olfactory*.

OLFACTION, *Olfactus*, from *olfacere*, *olfac-tum*, (*olere*, 'to smell,' and *facere*, 'to make,') 'to smell;' *Osphe're'sis*, *Osphe'ra'sia*, *Osphe're'sia*, *Osm'e-sis*, *Odora'tio*, *Odora'tus*, *Sensus osmomet'ricus*, *Sense of smell*, *Smelling*, (F.) *Odorati*. The sense by which we perceive the impressions made on the olfactory nerves by the odorous particles suspended in the atmosphere. The olfactory nerve or first pair has usually been considered the great nerve of smell; and it is probably the nerve of special sensibility, general sensibility being communicated by the branches of the fifth pair, distributed on the pituitary membrane of the nose and sinuses.

OLFACTIVE, Olfactory.

OLFACTORY, *Olfactive*, *Olfacti'vus*, *Olfacto'rius*, *Osphe'ra'ticus*, *Osphe'ra'ticus*, *Osphe're'ticus*, (F.) *Olfactif*. Same etymon. That which belongs or relates to the sense of smell.

OLFACTORY BULB, see Olfactory nerves.

OLFACTORY FORAM'INA, (F.) *Troux olfactifs*, are the holes in the cribriform plate of the ethmoid bone, through which the olfactory nerve passes.

OLFACTORY LOBE, see Olfactory nerves.

OLFACTORY NERVES, *Ethmoid'al nerves*, *Primum Nervorum cerebri*, *Nervi odorato'rii*, *Processus mamillares seu papillares seu mamillares cerebri ad nases seu papillares, Caruncula mamillares*,—the first pair of encephalic nerves. This nerve, which probably arises from the medulla oblongata, is observed to leave the brain, opposite the inner part of the fissure of Sylvius, by three roots; which, by their union, form a triangular knot or expansion. When it reaches the ethmoid fossa it expands and forms a triangular ganglion, or grayish, soft bulb,—*Bulbus olfacto'rius*, *Olfactory bulb*, *tubercle*, or *lobe*,—which furnishes, from its inferior surface, the branches that have to be distributed to the nasal fossæ. These filaments are very numerous; they pass through the foramina in the cribriform plate and enter the nasal fossæ. They are distinguished into the *internal*, *external*, and *middle*. The former are distributed over the mucous membrane, covering the outer paries of the nasal fossæ; the second descend upon the septum, and the third are lost, almost immediately, on the portion of the pituitary membrane that lines the vault of the fossæ.

OLFACTORY TUBERCLE, see Olfactory nerves.

OLFACTUS, Olfaction—o. Acutus, Hyperosphresia—o. Amissio, Anosmia—o. Deficiens, Anosmia—o. Depravatus, Parosmia.

OLIBANUM, see *Juniperus lycia*—o. *Sylvestre*, see *Pinus abies*—o. *Vulgare*, see *Pinus abies*.

OLIGÆMIA, *Anæmia*, *Hæmaphoria*, *Hypæmia*.

OLIGIDRIA, *Ischidrosis*.

OLIGO, from *oligos*, 'few, little:' in composition has these significations.

OLIGOBLÉN'NIA, from *oligo*, and *βλεμμα*, 'mucus.' A deficiency of mucus.

OLIGOCHOL'IA, from *oligo*, and *χολη*, 'bile.' Paucity of bile.

OLIGOC'H'YLUS, from *oligo*, and *χυλος*, 'juice,' 'chyle.' An epithet for food which is but little nutritive; which furnishes little chyle.

OLIGOCOP'RIA, from *oligos*, 'few,' and *κοπρος*, 'excrement.' Scantiness of alvine evacuations.

OLIGOCYTHÆ'MIA, from *oligo*, *κυτος*, 'a cell,' and *αιμα*, 'blood.' A condition of the blood in which there is paucity of red corpuscles.

OLIGODAC'RYA, from *oligo*, and *δακρυ*, 'a tear.' Paucity of lachrymal secretion.

OLIGOGALACTIA, *Agalactia*.

OLIGOGALIA, *Agalactia*.

OLIGOHÆMIA, *Anæmia*, *Hæmaphoria*, *Hypæmia*.

OLIGOPO'SIA, from *oligo*, and *ποσις*, 'drink.' Diminution in the quantity of drinks.

OLIGOPSYCHIA, Imbecility.

OLIGOSIA'LIA, from *oligo*, and *σαλον*, 'saliva.' Paucity of saliva.

OLIGOSPER'MIA, from *oligo*, and *σπερμα*, 'sperm.' Paucity of spermatic secretion.

OLIGOSPOND'YLUS, from *oligo*, 'small,' and *σπονδυλος*, 'a vertebra.' A monster with defective vertebrae.—Gurlt.

OLIGOTRICH'IA, from *oligo*, and *τριξ*, 'hair.' Want of hair. Paucity of hair.

OLIGOTROPH'IA, *Par'etior nutrit'io*, from *oligo*, and *τροφω*, 'I nourish.' Deficient nourishment.

OLIGURE'SIA, *Oligure'sis*, *Oligoure'sis*, *Oligoure'sia*, from *oligo*, and *ουρω*, 'I pass urine.' Morbidly diminished urinary secretion.

OLISTHEMA, Luxation.

OLIVA, *Olea Europæa*.

OLIVÆ, *Corpora olivaria*.

OLIVAIKË, Olive-shaped.

Cautère Oliveaire, of the French surgeons, is a cautery whose extremity is terminated by a button having the shape of an olive.

OLIVARIS, Olive-shaped.

OLIVARY, Olive-shaped—o. Bodies, *Corpora olivaria*.

OLIVARY PROC'ESS, *Processus Olivaris*, is a small ridge, running transversely between, and a little behind, the roots of the anterior clinoid processes of the sphenoid bone, and by some considered as the fourth clinoid process.

OLIVE, see *Olea Europæa*—o. Tree, *Olea Europæa*.

OLIVE-SHAPED, *Olivaris*, *Oliviformis*, *Olivary*, (F.) *Oliveaire*. Resembling an olive. See *Corpora olivaria*.

OLIVES, PICKLED, *Colymbades*.

OLIVIER, *Olea Europæa*—o. *de Bohême*, *Ledum palustre*.

OLIVIFORMIS, Olive-shaped.

OLIVINA, see *Olea Europæa*.

OLLA CAPITIS, Cranium.

OLMITELLO, MINERAL WATERS OF. A thermal spring in the isle of Ischia. Temperature, 100° Fahrenheit.

OLOPHLYCTIDE, Herpes.

OLOPHON'IA, from *ολλω*, *ολλωω*, 'I lose,' and *φωνη*, 'voice.' Congenital misconstruction of the vocal organs.—Good.

OLOPHONIA LABI LOBATA, *Harelip*—o. *Lingux frænata*, see *Ankyloglossum*.

OLSNITUM, *Peucedanum palustre*.

OLUS, *Lachanon*.

OLYMPIAN SPRINGS, see Kentucky, mineral waters of.

OMA, *ωμα*, in the termination of many words, is perhaps derived from *ωμος*, 'crude, wild, imperfect,' as in *sarcoma*, *atheroma*, &c.

OMACEPH'ALUS, (F.) *Omacéphale*, from *ωμος*, 'the shoulder,' and *ακεφαλος*, 'devoid of head.' A genus of paracephalous monsters, without any neck—a slight depression indicating the limits of the head and body.—I. G. St. Hilaire.

OM'AGRA, *Hom'agra*, from *ωμος*, 'the shoulder,' and *αγρα*, 'a seizure.' Gout in the shoulder.

OMAL'GIA, from *ωμος*, 'the shoulder,' and *αλγος*, 'pain.' Pain in the shoulder.

OMARTHRI'TIS, from *ωμος*, 'the shoulder,' *αρθρον*, 'a joint,' and *ιτις*, denoting inflammation. Inflammation of the shoulder-joint.

OMARTHROC'ACÉ, from *ωμος*, 'shoulder,' *αρθρον*, 'a joint,' and *κακος*, 'bad.' Arthroceae of the shoulder-joint. Caries or suppuration of the shoulder-joint.

OMA'SUM, *Omasus*, *Manyplices*, (Sc.) *Monyplices*, *Monyplices*, (F.) *Feuillet*, *Millefeuillet*,

Livret, Psautier. The third stomach of ruminant animals.

OMBILIC, Umbilicus.

OMBILICAL, Umbilical.

OMBRAGE, Nebula.

OMENTA, Meninges.

OMENTESIS, Epiplöitis.

OMENTITIS, Epiplöitis.

OMENTULA, Appendiculæ pinguedinosæ.

OMENTUM, Epiplöon—o. Colicum, Epiplöon, colic—o. Gastro-colicum, Epiplöon, gastro-colic

—o. Gastro-splenic, Epiplöon, gastro-splenic—o. Great, Epiplöon, gastro-colic—o. Hepato-gastricum, Epiplöon, gastro-hepatic—o. Lesser, Epiplöon, gastro-hepatic—o. Majus, Epiplöon, gastro-colic—o. Minus, Epiplöon, gastro-hepatic—o. Ossium, Periosteum—o. Sac of the, see Epiplöon, gastro-hepatic—o. Third, Epiplöon, colic.

OMICHEMIS, Micturition.

OMICHEMA, Urine.

OMITIS, from *ωμος*, 'the shoulder,' and *itis*, denoting inflammation. Inflammation in or about the shoulder-joint.

OMMA, Eye, Vision.

OMNIPHAGUS, Omnivorous.

OMNIVORE, Omnivorous.

OMNIVOROUS, *Omniv'orus*, *Omniph'agus*, *Pantoph'agus*, (F.) *Omnivore*, from *omnis*, 'all,' and *voro*, 'I eat.' An epithet for animals—*Pantoph'agists*—which eat every kind of food, animal or vegetable.

OMO. In the composition of anatomical terms, an abridgment of *omos* or *omus*, the humerus.

OMO-CLAVICULAR, see Coraco-clavicular.

OMOCOTYLE, see Glene.

OMO-HYOÏDEUS, *Cor'aco-hyoïdeus*, *Hyoïdis Quartus Mus'culus*, (F.) *Scapulo-hyoïdien*, *Omo-hyoïdien*, *Omoplat-hyoïdien*. This muscle is situate obliquely at the sides and front of the neck. It is slender, long, and flat. It arises from the superior costa of the scapula, near the semi-lunar notch, and from the ligament that runs across it, and is inserted at the sides of the inferior margin of the body of the os hyoides. It consists of two fasciculi, united by a common tendon, and is a true digastric muscle. It depresses the os hyoides, carrying it a little backwards, and to one side, except when it acts with its fellow, when the bone is depressed, and drawn obliquely backwards.

OMOPHAG'IA, *Omosit'ia*, from *ωμος*, 'raw,' and *φαγω*, 'I eat.' Fondness for raw food. Eating of raw food.

OMOPLATE, Scapula—o. *Col de l'*, *Collum scapulæ*.

OMOPLAT-HYOÏDIEN, *Omo-hyoïdeus*.

OMOS, Crude, Humerus.

OMOSITIA, Omophagia.

OMOTAR'ICHOS, from *ωμος*, 'the shoulder,' and *ταριχος*, 'pickled.' *Salsamentum crudum*; *Salted Tunny Fish*, in particular. Properly, the neck or shoulder-piece of a salted animal. Once much recommended against the bites of vipers, and in hydrophobia.

OMOTES, Crudity.

OMOTOCIA, Abortion.

OMOT'RIBES, *Omphac'ium O'leum*, from *ωμος*, 'crude,' and *τριβω*, 'I bruise.' Oil expressed from unripe olives.

OMPHA'CION, *ομφακιον*, from *ομφακος*, 'an unripe grape;'—*Succus uvæ acer' bæ*, *Omphac'ium*. The juice of unripe grapes. Also, *Verjuice*.

OMPHACI'TES (VINUM). A name given to wine prepared from the unripe grape. *Omphacit'is* is the name of a small gall.—*Dioscorides*.

OMPHACIUM, *Verjuice*.

OMPHACOM'ELL, from *ομφακος*, 'an unripe

grape,' and *μελι*, 'honey.' A sort of oxymel, made of the juice of unripe grapes and honey.

OMPHALELCO'SIS, from *ομφαλος*, 'the navel,' and *ελκος*, 'an ulcer.' Ulceration of the navel.

OMPHALEXOCHE, Exomphalus.

OMPHALOCARPUS, *Gallum aparine*.

OMPHALOCELE, Exomphalos.

OM'PHALO-CRA'NIODID'YMUS, from *ομφαλος*, 'the navel,' *κρανιον*, 'the cranium,' and *ιδυμος*, 'a twin.' A double monster, in which the umbilical cord or the rudiment of one fœtus is rooted in the cranium of another.

OMPHALOMANT'IA, *Omphalomancy*, from *ομφαλος*, 'the navel,' and *μαντεια*, 'prophecy.' A species of divination, practised by credulous matrons, who pretend to be able to know the number of children a female will have, by the number of knots in the navel-string of the child.

OM'PHALO-MESETER'IC, *Omphalo-mesenter'icus*, *Om'phalo-mesara'icus*; from *ομφαλος*, 'the navel,' and *mesenterium*, 'the mesentery.'

OMPHALO-MESENTERIC VESSELS, *Vitel'lo-mesenter'ic*, *Vit'elline vessels*. Haller gave this name to two very fine vessels, which spread their ramifications on the parietes of the umbilical vesicle. There is an *omphalo-mesenteric artery* and *vein*. The *omphalo-mesenteric artery* is a branch of the superior mesenteric;—the vein empties itself into the trunk, or into one of the branches of the superior mesenteric. Velpeau affirms, that they inosculate with a branch of the second or third order of those great vessels, with those in particular that are distributed to the cæcum, and he regards them to be the vessels of nutrition of the umbilical vesicle. They are occasionally met with in the fœtus, at the full period, under the form of whitish filaments, which extend from the mesenteric vessels to the umbilicus.

OMPHALO-MESERIC, *Omphalo-mesenteric*.

OMPHALONCUS, *Omphalophyma*.

OMPHALONEURORRHESIS, *Omphalorrhæxis*.

OMPHALOPHLEBITIS, from *ομφαλος*, 'the umbilicus,' and *phlebitis*, 'inflammation of a vein.' Inflammation of the umbilical vein.

OMPHALOPHY'MA, *Omphalon'cus*, from *ομφαλος*, 'the navel,' and *φυμα*, 'tumour.' A tumefaction of the navel.

OMPHALOPROPTOSIS, Exomphalus.

OMPHALORRHAG'IA, *Omphalor'rhagê*, from *ομφαλος*, 'the umbilicus,' and *ρηγνμι*, 'I break out.' Hemorrhage from the umbilicus, in the new-born in particular.

OMPHALORRHEX'IS, from *ομφαλος*, 'navel,' and *ρηξις*, 'rupture.' *Omphaloneurorrhæx'is*. Rupture of the navel string.

OMPHALOS, Umbilicus.

OMPHALOSITE, from *ομφαλος*, 'the navel,' and *ειτος*, 'nourishment.' A monster that possesses an imperfect kind of life, which ceases when the umbilical cord is divided.

OMPHALOT'OMY, *Omphalotom'ia*, from *ομφαλος*, 'the umbilicus,' and *τεμνω*, 'I cut.' The division of the navel string.

OMPHALUS, Umbilicus.

OMUS, Crude, Humerus.

ONAGRA, *Œnothera biennis*.

ONANIA, Masturbation.

ONANISM, Masturbation.

ON-COME. A Scotch term, according to Sir Walter Scott, for "mysterious diseases, which baffle the regular physician."

ONCOS, Tumour.

ONCO'SES, from *ογκος*, 'a tumour.' Tumours, as diseases.

ONCOSIS, Intumescence.

ONCOT'OMY, *Oncotom'ia*, *Onkotomy*, from *ογκος*, 'a tumour,' and *τομη*, 'incision.' The open-

ing of an abscess with a cutting instrument, or the excision of a tumour.

ONCTION, Inunction.

ONCUS, Swelling, Tumour.

ONDULATION, Fluctuation.

ONEBERRY, Paris.

ONEIROCRITICUS, *Oneirocrites*, from *oneiros*, 'a dream,' and *κρισις*, 'judgment.' One who judges according to dreams.

ONEIRODYN'IA, from *oneiros*, and *δύνη*, 'pain.' Painful dreams. *Incubus* and *Somnambulism* are oneirodynia.

ONEIRODYNIA ACTIVA, Paroniria, Somnambulism—*o.* Gravans, Incubus.

ONEIRODYNIE GRAVATIVE, Incubus.

ONEIROG'MUS, *Oneirog'ynē*, *Oneiropol'esis*, from *oneiros*, 'a dream.' A lascivious dream; pollution; nocturnal pollution.

ONEIROGONORRHŒA, Pollution, nocturnal.

ONEIROGONOS, Pollution.

ONEIROLOG'Y, *Oneirolog'ia*, from *oneiros*, 'a dream,' and *λογος*, 'a description.' The doctrine of dreams.

ONEIROMANT'IA, from *oneiros*, 'a dream,' and *μαντεία*, 'divination.' The art of divining by dreams; or of interpreting dreams.

ONEIROG'OSUS, from *oneiros*, and *νοσος*, 'a disease.' *Somnia'tio morbo'sa*. Morbid, uneasy dreaming.

ONEIROPOLESIS, Oneirogmus.

ONERA ALVI, Excrement.

ONGLADE, Paronychia.

ONGLE, Nail—*o.* *Incarné*, Onychogryphosis.

ONGLÉE (F.), *Digit'orum stupor à gelu*. Painful numbness at the extremities of the fingers, caused by cold.

ONGLET, Pterygion.

ONGUENT, Unguentum—*o.* *d'Althéa*, Unguentum de Althæâ—*o.* *Blanc*, Ceratum cetacei—*o.* *de Blanc de baleine*, Unguentum cetacei—*o.* *Blanc de Rhazes*, Unguentum plumbi subcarbonatis—*o.* *de Céruse*, Unguentum plumbi subcarbonatis—*o.* *Citrin contre la gale*, Unguentum hydrargyri nitras—*o.* *Digestif simple*, Unguentum digestivum simplex—*o.* *Gris*, Unguentum oxidi hydrargyri cinereum—*o.* *de Guimaure*, Unguentum de althæâ—*o.* *de Laurier*, Unguentum laurinum—*o.* *Mercuriel*, Unguentum hydrargyri—*o.* *Napolitain*, Unguentum hydrargyri—*o.* *de Nitrate de mercure*, Unguentum hydrargyri nitratis—*o.* *de Poix et de cire*, Basileon—*o.* *de Soldat*, Martiatum unguentum—*o.* *de Sureau*, Unguentum sambuci—*o.* *de Tornamira*, Unguentum plumbi subcarbonatis.

ONION, COMMON, Allium cepa—*o.* Sea, Scilla.

ONIS'CUS, *Asell'us*, *Cu'tio*, *Porcel'lio*, *Porcel'lus*, *Por'culus*, diminutive of *ovos*, 'a small ass.' A genus of insects, *Class*, Crustacea, very common in cellars and dark and moist places.

ONISCI ASELLI, *Millep'edes*, *Aselli*, *Millep'edæ*, *Fabæ*, *Wood-lice*, *Slaters*, *Hog-lice*, (F.) *Cloportes ordinaires*, had, at one time, a place in the pharmacopœias. They were considered stimulant and diuretic, and useful in jaundice.

ONITIS, Origanum dictamnus.

ONKOTOMY, Oncotomy.

ONOLOSAT, Obolus.

ONOMATOCLESIS, Nomenclature

ONOMATOLOGIA, Nomenclature.

ONONIS ANTIQUORUM, *O. spinosa*.

ONO'SIS ARVEN'SIS, (F.) *Bugrane des champs*, has properties like the next.

ONONIS SPINO'SA, *Ano'nis*, *Resta* seu *Arres'tu bovis*, *Rem'ora Ara'tri*, *Ononis antiquo'rum*, *Rest harrow*, (F.) *Arrête-bœuf*, *Bugrande épineuse*, *Bugrane*, *Nat. Ord.* Leguminosæ. *Ser. Syst.* Diadelphia Decandria. The root of this plant was once used as a diuretic.

ONOPORDON ACAN'THIUM, *Onopordum acan'thium*, *Car'duus toment'osa*, *Acan'thium*, *Acan'thos*, *A. spina*, *Spina alba*, *Cotton Thistle*, (F.) *Chardon aux Ânes*. *Ord.* Compositæ. *Ser. Syst.* Syngenesia Polygamia equalis. The expressed juice has been recommended as a cure for cancer, applied externally.

ONOPORDUM ACANTHIUM, Onopordon acanthium.

ONTHUS, Fimus.

ONYCHATROPH'IA, *Atroph'ia un'guium*, from *onyx*, *onychos*, 'a nail,' and *atrophia*, 'want of nourishment.' Atrophy of the nails.

ONYCHAUX'E, *Hypertroph'ia un'guium*, from *onyx*, *onychos*, 'a nail,' and *αύξη*, 'increase.' Unusual increase of the size and thickness of the nails.

ONYCHEXALLAX'IS, from *onyx*, *onychos*, 'a nail,' and *ελλάξις*, 'change.' A morbid condition of the nails.

ONYCHIA, Paronychia.

ONYCHIT'IS, from *onyx*, *onychos*, 'a nail,' and *itis*, denoting inflammation. Inflammation of a nail. See Paronychia.

ONYCHOC'LASIS, from *onyx*, *onychos*, 'a nail,' and *κλασις*, 'fracture.' Fracture of a nail.

ONYCHOCRYPTOSIS, Onychogryphosis.

ONYCHOGRYPHO'SIS, *Onychogryppo'sis*, *Onychogrypto'sis*, *Onychocrypto'sis*, *Grip'h'o'sis*, *Gryph'o'sis*, *Onyx'e'sis*, from *onyx*, *onychos*, 'a nail,' and *gryphosis*, 'crookedness.' Curvature of the nails; such as occurs in hectic individuals. Also, growing in of the nails; *Incarnatio* seu *Adunca'tio* seu *Arctu'ra un'guium*, (F.) *Ongle incarné*.

ONYCHON'OSI, *Onychon'osi*, from *onyx*, *onychos*, 'a nail,' and *νοσος*, 'a disease.' Disease of the nails.

ONYCHOPH'THORA, *Onychophtho'ria*, *Ony-coph'th'ora*, *Onycephtho'ria*, from *onyx*, *onychos*, 'the nail,' and *φθορα*, 'degeneration.' A degenerate condition or destruction of the nails.

ONYCHOPHY'MA, from *onyx*, *onychos*, 'the nail,' and *φυμα*, 'a tumour.' A painful degeneration of the nails, which become thick, rough, and crooked. It occurs as a symptom of syphilis and of lepra.

ONYCHOPTO'SIS, *Piptyony'e'chia*, *Diã'resia Un'gulæ*, from *onyx*, *onychos*, 'a nail,' and *πτωσις*, 'falling.' The falling off of the nails.

ONYCOPHTHORA, Onychophthora.

ONYX, Hook (blunt), Nail, Pterygion. Also, a collection of purulent matter between the laminae of the cornea, having the shape of a nail. Unguis Lunula.

ONYXIS, Onychogryphosis.

ONYXITIS, see Paronychia.

OOCYESIS, Pregnancy, ovarian.

OODOCELE, see Hernia (foraminis ovalis.)

OODES, Aqueous humour, Oval.

OÏG'ALA, *OÏg'la*, *Ogla*, *Puls ex Ovis et Lactë*. Milk of eggs, from *ovv*, 'an egg,' and *γαλα*, 'milk.' A preparation of eggs and milk.

OOGLA, Oogala.

OÏDES, Aqueous humour, Oval.

OOLEMMA PELLUCIDUM, Zona pellucida.

OÏLOG'IA, *Ovolog'ia*, *Ovolog'gy*, from *ovv*, 'an ovum or egg,' and *λογος*, 'a discourse,' 'a description.' A description of the ovum.

OON, Ovum.

OONINE, Albumen.

OÏPH'AGOUS, *OÏph'agus*, from *ovv*, 'an egg,' and *φαγω*, 'I eat.' Feeding on eggs.

OÏPHORAUXE, Oarioparectama.

OÏPHORITIS, Oaritis.

OÏPHORON, Ovary.

OÏRITIS, Oaritis.

OPAC'ITY, *Opac'itas*, *Opakeness*; from *opacare*, 'to obscure.' Quality of that which is

opaque. The property possessed by some bodies is of not allowing the light to traverse them. It is opposed to transparency. *Opacity of the cornea* constitutes *albugo* or *leucoma*; — opacity of the crystalline causes cataract.

OPAKE', *Opa'cus, Opa'cus*. Same etymon. An epithet given to bodies, which do not permit the passage of rays of light. The *opaque cornea* is the sclerotic, in contradistinction to the *transparent* cornea or true cornea.

OPAKENESS, Opacity.

OP'ALINE. That which resembles the opal. A fluid is said to be opaline, when milky, and when it presents an appearance more or less like that of the opal.

OPEOCELE, see Hernia.

OPERATIO, Action, Operation — o. Chirurgica, see Operation — o. Chymica seu pharmaceutica, Operation, chymical, &c. — o. Simplex, Haplotomia.

OPERATION, *Opera'tio*, from *opus, operis*, 'work.' The application of instruments to the human body with the view of curing disease. The object of an operation, *opera'tio chirur'gica*, is generally to divide or reunite parts, to extract extraneous or noxious bodies, and to replace organs that are wanting, by different instruments or artificial means. The principal operative methods have been called *Synthesis, Diæresis, Excæresis*, and *Prothesis*. Frequently, the most difficult subject connected with an operation is to decide when it is absolutely called for or advisable, and when improper.

OPÉRATION À LAMBEAU, see Flap.

OPERATION, BILATERAL, see Lithotomy — o. *Cæsarienne*, Cæsarean section.

OPERATION, CHYMICAL or PHARMACEUTICAL, *Opera'tio chym'ica* seu *pharmaceutica*, is any process whose object is the preparation of medicines; their combinations with each other, analysis, and decomposition; — such are, *solutio, distillation, sublimatio, evaporatio, digestio, maceratio, infusio, decoctio, calcinatio, &c.* Some of these operations are mechanical; others, really chymical.

OPERATION, HIGH, see Lithotomy — o. Lateral, see Lithotomy — o. Sigalutian, Symphyseotomy.

OPERATOR. Same etymon. A surgeon who is in the habit of practising the greater operations. One who performs any operation. To be a good operator, the surgeon must be well acquainted with anatomy, and be possessed of strong nerve. See Surgeon.

OPER'CULUM, *Operto'rium, Operimen'tum*, from *operire*, 'to cover.' A cover or lid. In fishes, the gill cover.

OPERCULUM ASPERÆ ARTERIÆ, Larynx — o. Cutis, Epidermis — o. Hei, Bauhin, valve of — o. Laryngis, Epiglottis — o. Oculi, Palpebra.

OPERCULUM PAPILLARUM. A shield for the nipple.

OPERIMENTUM, Operculum — o. Intestinorum, Epiploon — o. Prætensum abdominis, Peritonæum.

OPERTORIUM, Operculum.

OPHELIA CHRATA, Gentiana chirayta.

OPHIASIS, Calvities, Porrigo decalvans.

OPHIOSGLOSSUM VULGATUM, *O. oea'tum* seu *echinosglossum*, (*ophis*, 'a serpent,' and *γλῶσσα*, 'a tongue,') *Lingua serpentina*, *Adder's Tongue*, (F.) *Langue de Serpent*. Ord. Filices. *Sex. Syst.* Cryptogamia. This plant was formerly considered to be vulnerary.

OPHIOPH'AGOUS, *Ophioph'agus*, from *ophis*, 'a serpent,' and *φαγω*, 'I eat.' An epithet for animals which feed on serpents. Pliny has called certain African tribes by this name.

OPHIORRHIZA, *O. mungos*, from *ophis*, 'a serpent,' and *ρίζα*, 'root.' *Family*, Gentianaceæ.

Sex. Syst. Pentandria Digynia. The name of the plant whose root has been called *Radix Serpentum*, *Mungos Radix*. The bitter root is much esteemed in Java, Sumatra, &c., for preventing the effects that usually follow the bite of the *naja*, a venomous serpent; with which view it is eaten by the natives. It is, also, a reputed antelmintic.

OPHIOXYLON, Ophioxylum.

OPHIOXYLUM, from *ophis*, 'a serpent,' and *ξύλον*, 'wood.' *Ophioxylum* seu *Ophioxylon serpentinum* seu *trifoliatum*, *Acane'ria*, *Lignum serpentum*, Ord. Apocynaceæ, has been recommended in the bites of serpents, and in intermit-tents. It is said to be very bitter.

OPHIS, Serpent.

OPHITES, from *ophis*, 'a serpent.' *Serpenti-nus, Serpentine* or *Black Porphyry*. This rock was formerly worn as an amulet, to cure diseases of the head.

OPHROSTAPHYLON, Bryonia alba.

OPHRY, Supercilium.

OPHTHALMAL'GIA, from *οφθαλμος*, 'the eye,' and *αλγος*, 'pain.' Pain in the eye. Neuralgia of the eye.

OPHTHALMEMPASMA, Collyrium siccum.

OPHTHALMIA, *Ophthalmi'tis*, from *οφθαλμος*, 'the eye.' *Oculo'runt inflammatione, Canma ophthalmi'tis, Ophthalmopo'nia, Inflammation of the Eye, Ophthal'my*, (F.) *Ophthalmie, Ophthalmite, Inflammation de l'œil, Catarrhe oculaire*. Three great varieties of ophthalmia, independently of the acute and chronic (which conditions occur in all inflammations,) may be reckoned:—the *Ophthalmia membranarum, O. purulenta*, and *O. tarsi*. The first is characterized by the general symptoms of ophthalmia; — pain and redness of the eye or its appendages; with intolerance of light, and unusual flow of tears; the inflammation being seated chiefly in the coats of the eyeball. It is the *Hymenophthalmia, Ophthalmia tarax'is* seu *lu'mida* seu vera seu *chemo'sis, Conjunctivi'tis, Inflammatio conjunctivæ, Symphymeni'tis, Syndesmi'tis, Catarrhal ophthalmia, Ophthalmo-conjunctivi'tis, Epiph'ora* (Galen), *Conjunctival* or *Lachrymose Ophthalmia, Tarax'is* (Paulus of Ægina), *Chemo'sis* (Aëtius), (F.) *Conjunctivite, Inflammation de la conjonctive*. In the second, — *Ophthalmia purulenta seu puriform'is, Blephnophthalmia, Bleph'aroblenorrhœ'a, Ophthalmoblennorrhœ'a, Blephorrhœa oculi* — the internal surface of the palpebræ associates in the inflammation of the eye-ball; and there is a copious secretion of a purulent fluid. An epidemic and contagious [?] variety of this is the *Egyptian Ophthalmia, O. epidem'ica* seu *purulenta epidem'ica* seu *contagio'sa* seu *catarrhalis bel'lica* seu *bel'lica* seu *Asiat'ica* seu *purulenta contagio'sa, Blephorrhœ'a Oculi Ægyptiaca, Læmophthalmia, Conjunctivi'tis puro-muco'sa contagio'sa* seu *Ægyptiaca, Blepharostis glandularis contagio'sa, Adeni'tis palpebrarum contagiosa, Sup'purative ophthalmia, Epidemic contagious ophthalmia* — called *Egyptian*, from its prevalence in Egypt during the British Expedition under Sir Ralph Abercrombie. The inflammation is rapid and destructive; granulations shoot from the tunica conjunctiva, and occasionally there is intolerable pain, often succeeded by delirium. In new-born children, a species of purulent ophthalmia, *O. purulenta infantum* seu *neonatorum, Blepharophthalmia* seu *Lippiti'do* seu *Blephorrhœ'a Oculi* seu *Ophthal'mo-blephorrhœ'a* seu *Blepharo-blephorrhœ'a* seu *Blepharo-pyorrhœ'a* seu *Pyophthalmia, Psorophthalmia neonatorum, Adenosynchitoni'tis*, (F.) *Ophthalmie puriforme des nouveau-nés*, in which the palpebræ are florid and peculiarly tumid, is by no means uncommon. It seems to be caused by acrid discharges from the mother, applied to

the eye of the infant during its exit; or to the stimulus of the light, when the child first opens its eyes. A severe form of purulent ophthalmia — *Hyperconjectivite* (Piorry) — is produced by the application of gonorrhœal matter to the eye. It is the *Ophthalmia gonorrhœica*, *Blenorrhœa oculi gonorrhœica*, *Gonorrhoblepharrhœa*, *Conjunctivitis blenorrhag'ica* seu *gonorrhœica*, *Gonorrhœal Ophthalmia*, (F.) *Ophthalmie blenorrhagique*, *Conjunctivite blenorrhagique*.

Ophthalmia is likewise modified by the condition of the constitution, and hence we have *stru-*

mous, variolous, and other inflammations of the conjunctiva.

The third variety — the *Ophthalmia Tarsi* seu *glutinosæ*, *Blepharophthal'mia*, *Blepharotis*, *Blepharotit'is*, *Blepharitis*, *Blepharadenit'is*, *Psorophthal'mia*, *Oculi palpebrarum scab'ies pruriginosæ*, *Adenophthalmia* — is seated chiefly in the tarsus; the sebaceous crypts secreting a viscid and acrid fluid, that glues and ulcerates its edges, and irritates the eye.

The different forms of inflammation of the conjunctiva are thus classed by M. Desmarres :

Conjunctivitis.....	{	1. Pure or phlegmonous.	{	Contagious.	{	Erysipelatous.	
		2. Pustular.		Non-contagious.			Variolous.
		3. Granular or catarrhal.		Miasmatic.			
				4. Purulent			{
{	Of new-born infants.	{					
	{		Gonorrhœal.	{			
{		Egyptian.	{				

Conjunctivitis, when slight, requires little treatment: the antiphlogistic regimen — and, particularly, avoiding exposure to light, — being all that is necessary. When more severe, along with this, general and local blood-letting, especially by leeches to the side of the septum narium, must be employed so as to make a decided impression on the system; with nauseating doses of antimony, purgatives, blisters (at some distance from the organ), refrigerants; and astringents, cold or warm, according to circumstances, to the eye. In *Purulent Ophthalmia*, these measures must be still more actively employed, otherwise disorganization will speedily follow: — the granulations, which form on the adnata of the eyelids may be removed with the scissors, and the sore be touched with a solution of alum. *Ophthalmia Tarsi* must be treated on general principles, when severe. It usually, however, requires merely the antiphlogistic regimen, with the occasional use, especially at night, of a slightly stimulating ointment, such as the unguentum hydrargyri nitrico-oxydi, considerably reduced with lard. The ointment prevents the eyelids from being glued together during the night, and thus obviates the irritation caused by attempts at separating them.

OPHTHALMIA, *ÆGYPTIAN*, see Ophthalmia — o. Asiatica, see Ophthalmia — o. Bellica, see Ophthalmia — o. Biliosa, Ophthalmocholosis — o. Catarrhal, see Ophthalmia — o. Catarrhalis bellica, see Ophthalmia — o. Chronica, Lippitudo — o. Conjunctival, see Ophthalmia — o. Contagiosa, see Ophthalmia — o. Epidemica, see Ophthalmia — o. Glutinosa, see Ophthalmia — o. Gonorrhœica, see Ophthalmia — o. Gonorrhœal, see Ophthalmia — o. Humida, see Ophthalmia — o. Lachrymose, see Ophthalmia — o. Membranarum, see Ophthalmia — o. Neonatorum, see Ophthalmia — o. Phlyctenular, see Ophthalmia — o. Puriformis, see Ophthalmia — o. Purulenta, see Ophthalmia — o. Purulenta contagiosa, see Ophthalmia — o. Purulenta epidemica, see Ophthalmia — o. Purulenta infantum, see Ophthalmia — o. Rheumatic, Sclerotitis — o. Sicca, Xerophthalmia — o. Suppurative, see Ophthalmia — o. Taraxis, see Ophthalmia — o. Tarsi, see Ophthalmia — o. Ulcerosa, Helcophthalmia — o. Varicose, Cirsophthalmia — o. Vera, see Ophthalmia.

OPHTHALMIATER, Oculist.

OPHTHALMIATR'IA, *Ophthalmiatrotechnica*, *Ophthalmotherapi'a*, (F.) *Oculistique*; from

ophthalmos, and *iarpos*, 'a physician.' The art of the oculist. Treatment of diseases of the eye.

OPHTHALMIATROTECHNICA, Ophthalmiatria.

OPHTHAL'MIC, *Ophthalm'icus*, from *ophthalmos*. That which relates or belongs to the eye.

OPHTHALMIC ARTERY, *A. orbitaire*, (Ch.) arises from the internal carotid, and issues from the cranium by the foramen opticum. At first, it is situate at the outer and lower side of the optic nerve, but ascends above this nerve, and passes towards the inner angle of the orbit. It furnishes, in its course, the *lachrymal, centralis retinae, infra-orbitaris, ciliarys, anterior ciliarys, inferior and superior musculars, anterior and posterior ethmoidals, and superior and inferior palpebrals*. After having given off these, it divides into two branches — the *frontal* and *nasal*, which furnish a number of ramifications, — some superficial, others deep-seated.

OPHTHALMIC GANG'LION, *Lenticular* or *Ciliary ganglion*, *Ganglion ophthalmicum* seu *semilunare seu ciliare, G. orbitaire* (Ch.), is one of the smallest ganglions of the body, and formed by the 5th and 3d pairs of encephalic nerves. It is situate at the outer side of the optic nerve near the bottom of the orbit; is irregularly quadrilateral and flat; its colour of a reddish gray. Behind, it communicates by its posterior angles — by means of nervous filaments — with the nasal nerve of the ophthalmic, the motor oculi, and offsets from the sympathetic. Each of its anterior angles furnishes a fasciculus of small nerves. These are the ciliary nerves.

OPHTHALMIC NERVE, *Ophthalmic Nerve* of Willis, *Orbito-frontal*, (Ch.) is the smallest and first of the three branches given off by the 5th pair. It proceeds along the external paries of the cavernous sinus, and enters the orbit by the sphenoidal fissure. It divides into three branches, one, *external* — the lachrymal nerve; another, *superior* — frontal nerve; and the last, *internal* — the nasal nerve. See Lachrymal, Frontal, Nasal.

OPHTHALMIC OR OPTIC REMEDY, *Ophthalm'icum* seu *Opt'icum*, (F.) *Topique ophthalmique*, is a medicine employed in ophthalmia.

OPHTHALMIC SINUS, see Cavernous Sinus.

OPHTHALMIC VEIN has the same arrangement as the artery, which it accompanies in all its divisions. It issues from the orbit at the inner

part of the sphenoidal fissure, and discharges its blood into the cavernous sinus.

The name *Facial Ophthalmic* has been given to the branch by which the facial vein communicates with the ophthalmic.

OPHTHALMICA, Euphrasia officinalis.

OPHTHALMICI EXTERNI, Motores oculorum.

OPHTHALMICUM, Ophthalmic remedy.

OPHTHALMIDIUM, Microphthalmus.

OPHTHALMIE PURIFORME DES NOUVEAU-NÉS, see Ophthalmia—o. *Blennorrhagique*, see Ophthalmia.

OPHTHALMITE, Ophthalmia.

OPHTHALMITIS, Ophthalmia. This term is occasionally restricted to inflammation of the globe of the eye, in which, both the external and internal structures are involved.

OPHTHALMIUM, Microphthalmus.

OPHTHALMO-BLENNORRHŒA, Ophthalmia (purulent)—o. b. Neonatorum, see Ophthalmia (purulenta infantum).

OPHTHALMO-CARCINOMA, from *ophthalmos*, and *καρκινωμα*, 'cancer.' Cancer of the eye.

OPHTHALMOCELE, Exophthalmia.

OPHTHALMOCHOLOSIS, from *ophthalmos*, and *χολη*, 'bile;' *Ophthalmia biliosa*. Ophthalmia from biliary excitement.

OPHTHALMOCHROÏTES, see Choroidea tunica.

OPHTHALMO-CONJUNCTIVITIS, see Ophthalmia.

OPHTHALMOCOPIA, Copyopia.

OPHTHALMODULIA, from *ophthalmus*, and *δουλεια*, 'servitude.' Eye-service. The title of a book by Bartsch on diseases of the eye.

OPHTHALMODYNIA, from *ophthalmos*, and *δύνη*, 'pain,' especially rheumatic pain of the eye. Plenck has given this name to neuralgia of the frontal nerve, in which the pain radiates particularly towards the bottom of the orbit. See Neuralgia, frontal.

OPHTHALMODYNIA PERIODICA, Neuralgia, facial.

OPHTHALMŒDEMA, from *ophthalmos*, and *οἴδημα*, 'œdema.' Œdema of the conjunctiva.

OPHTHALMOGRAPHY, from *ophthalmos*, and *γραφη*, 'a description.' The part of anatomy which gives a description of the eye. An anatomical description of the eye.

OPHTHALMOLOGY, *Ophthalmologia*, from *ophthalmos*, and *λογος*, 'a discourse.' The part of anatomy which treats of the eye. An anatomical treatise on the eye. A description of the eye in health and disease.

OPHTHALMOMETER, from *ophthalmos*, and *μετρον*, 'measure.' An instrument of the nature of compasses, invented by F. Petit, for measuring the capacity of the anterior and posterior chambers of the eye in anatomical experiments.

OPHTHALMOMYI'TIS, *Ophthalmomyositis*, from *ophthalmos*, *μυς*, 'a muscle,' and *itis*, denoting inflammation. Inflammation of the muscles of the eye.

OPHTHALMOPARALYSIS, Ophthalmoplegia.

OPHTHALMOPHLEBOTOMIA, from *ophthalmos*, *φλεβ*, 'a vein,' and *τομη*, 'incision.' Bleeding from the vessels of the conjunctiva.

OPHTHALMOPHTHARISIS, *Ophthalmophthisis*, from *ophthalmos*, and *φθαρσις*, 'corruption.' Destruction of the eyeball.

OPHTHALMOPHTHISIS, Ophthalmophtharisis.

OPHTHALMOPLEGIA, *Ophthalmoparalysis*, from *ophthalmos*, and *πλησσω*, 'I strike.' Paralysis of one or more of the muscles of the eye.

OPHTHALMOPONIA, Ophthalmia.

OPHTHALMOPTOSIS, from *ophthalmos*, and *πτωσις*, 'a prolapse.' A word employed by some authors in the sense of exophthalmia; by others, in that of hydrophthalmia.

OPHTHALMORRHAGIA, from *ophthalmos*, and *ρρηγμα*, 'I break forth.' Hemorrhage from the tunica conjunctiva. It is rare.

OPHTHALMOS, Eye.

OPHTHALMOSCOPE, see Ophthalmoscopy.

OPHTHALMOSCOPIA, *Ophthalmoscopy*, from *ophthalmos*, and *σκοπεω*, 'I regard attentively.' The art of judging of the temper, &c., of a person by examining his eyes. The art of judging of health or disease by inspection of the eyes. Exploration of the eyes in order to a diagnosis.

An *Ophthalmoscope*, *ophthalmoscopium*, *ophthalmoscopum*, has been invented, which by reflecting the light on the retina enables the condition of the interior of the eye to be appreciated. To a form of the ophthalmoscope the name *Anagnostakis* has been given, after a young Greek physician, who, it was thought, invented it.

OPHTHALMOSTATUM, (F.) *Ophthalmostat*, from *ophthalmos*, and *στασις*, 'station;' *Speculum Oculi*. An instrument for fixing the eye.

OPHTHALMOTHERAPIA, Ophthalmiatria.

OPHTHALMOTOLOGY, Ophthalmology.

OPHTHALMOTOMY, *Ophthalmotomia*, from *ophthalmos* and *τομη*, 'I cut.' The part of anatomy which treats of the dissection of the eye. It has, also, been applied to extirpation of the eye.

OPHTHALMÖXEROSIS, Xerophthalmia.

OPHTHALMOXYSIS, from *ophthalmos*, and *ξυω*, 'I scrape.' A name given to the scarification sometimes practised on the conjunctiva, in cases of ophthalmia.

OPHTHALMOXYSTRUM, *Ophthalmoxyster*, *Ophthalmocystarium*, *Xystrum ophthalmicum*. Same etymon. An instrument for scraping the eye. Name given to a small brush, with barbs like an ear of barley or rye, intended to scarify the eyelids in certain cases of ophthalmia.

OPHTHALMUS, Eye.

OPHTHALMYMENITIS, *Ophthalmomyenitis*, from *ophthalmos*, *μηνη*, 'membrane,' and *itis*, denoting inflammation. Inflammation of one or more of the membranes of the eye.

OPIACÉ, Opiate.

OPIACUM, Opiatum.

OPIANE, Narcotine.

O'PIANINE, *Opiania*, *Opiania*; from *opium*.

An alkaloid discovered in opium, which resembles morphia in its properties, and doses.

OPIANUM, Narcotine.

OPIAT, Opiate—o. *Dentifrice*, *Dentifrice*.

OPIATE, *Opiatum*, *Opiacum*, *Papaveraceum*, *Mecconicum*, (F.) *Opiat*, *Opiacée*, from *οπιον*, (*οπος*, 'juice,') 'opium.' A medicine containing opium. A medicine that procures sleep. An *electuary*;—formerly, an electuary which contained opium.

O'PIATED, *Opiatus*. Impregnated with opium. Affected by opium.

OPIATUM FEBRIFUGUM, *Electuarium de Kina Kina*; *Electuary of Cinchona*. (*Pulv. cinch.* ℞viiij, *ammon. muriat.* ℥j, *mellis, syrúp. absinth.* aa ℥ij. Make into an electuary. *Ph. P.*) Given, when cinchona is indicated.

OPIATUM MESENTERICUM, *Electuarium de Aloë, Muriatè Hydraggyri, et Ferro*. (*Gum. ammon.* ℥ss, *sennæ* ℥vj, *hydrargyri submuriat.* rad. *ari.*, *aloës socotrin.* aa ℥ij, *pulv. scammon.* comp. (*vulg. de tribus*.) *rhej. rad.* aa ℥iij, *ferrilimatur. porphyrisat.* ℥ss. Bruise and mix together, add of compound *syrup of apples* double the weight of the other matters, and make into an electuary. *Ph. P.*) Dose, ℥ss to ℥ij, in obstructions of the liver, mesentery, &c.

OPIATUS, Opiated.

OPION, Opium.
 OPISMA, Succus.
 OPIS'THENAR, *Dorsum manûs*, from $\sigma\iota\sigma\theta\epsilon$, 'backwards,' and $\theta\epsilon\nu\alpha\rho$, 'the flat of the hand.' The back of the hand.
 OPISTHOCEPHALON, Occiput.
 OPISTHOCRANIUM, Occiput.
 OPISTHOCYPHOSIS, Cyphoma.
 OPISTHOLQB'IUM, *Opisthol'ium*, from $\sigma\iota\sigma\theta\epsilon$, 'behind,' and $\lambda\omicron\beta\iota\omega$, 'the lobe of the ear.' Any agent applied behind the ear.
 OPISTHOTIUM, Opisthobolium.
 OPISTHOT'ONOS, *Raptus posterga'neus*, *Tet'anus dors'al'is seu post'icus seu posterga'neus*, from $\sigma\iota\sigma\theta\epsilon$, 'backwards,' and $\tau\epsilon\iota\nu\omega$, 'I stretch.' A species of tetanus, in which the body is bent backwards.
 OPIUM, see Papaver—o. Colatum, Extractum opii—o. Depuratum, Extractum opii.
 OPIUM EATERS, Theriaki.
 OPIUM, LETTUCE, see Lactuca.
 OPOBALSAMUM, see Amyris opobalsamum.
 OPOCARPASUM, Carpasium (juice.)
 OPOCEPH'ALUS, (F.) *Opocephale*. A genus of monsters having the two ears approximated or united under the head; the jaws approxied; and no mouth or nose.—I. G. St. Hilaire.
 OPODELDOC, Opodeldoch.
 OPODEL'DOCH, *Opodel'toch*, *Opodeldoc*. An unmeaning term, frequently used by Paracelsus. Formerly, it signified a plaster for all external injuries; now, it is applied to the Linimentum Saponis Compositum.
 OPODELDOCH, STEER'S. A liniment, called after the inventor. There are many formulæ for its preparation. The following is one. *Sap. alb. lbj, camphor. ʒij, ol. rorismarini fʒiv, spiritus vini rectificati Oij*. See Linimentum Saponis Compositum.
 OPODEOCELE, see Hernia.
 OPODYMUS, Diprosopus.
 OPOÏDIA GALBANIFERA, see Bubon Galbanum.
 OPOLEË, Succus.
 OPOLIDE, Succus.
 OPOPIOS, Optic.
 OPOPONACUM, Pastinaca opoponax.
 OPOPONAX, see Pastinaca opoponax — o. Chironium, Pastinaca opoponax.
 OPOPONAXWORT, Pastinaca opoponax.
 OPO'RICE, from $\sigma\omega\rho\alpha$, 'autumnal fruits.' A medicine, composed of several autumnal fruits, particularly of quinces, pomegranates, &c., and wine. It was formerly administered in dysentery, diseases of the stomach, &c.
 OPOS, Succus expressus — o. Silphion, Laserpitium.
 OPPIDULUM, Vulva.
 OPPILATIO, Emphraxis—o. Telæ Cellulosæ, Induration of the cellular tissue.
 OPPILATIVUS, Obstruens.
 OPO'NENS, (F.) *Opposant*, from *ob*, and *ponere*, 'to place.' That which faces or is put in opposition to something. The name has been given to two muscles of the hand.
 OPPONENS MIN'IMI DIG'ITI, (F.) *Opposant du petit doigt*, *Carpo-métacarpien du petit doigt* (Ch.), *Métacarpien du petit doigt*. This muscle has the same shape and arrangement as the preceding, but is of less size. It is situate in the hypothenar eminence. Its fibres are inserted into the anterior annular ligament of the carpus, and terminate on the whole length of the inner edge of the 5th metacarpal bone. This muscle carries the 5th metacarpal bone forwards and outwards, and thus augments the concavity of the palm of the hand.

OPPONENS POL'LICIS, *Flexor ossis metacar'p'i pollicis*, *F. primi interno'dii* (Douglass), *Opponens pollicis manûs*, *Antith'enar sive semi-interosseus pollicis*, (F.) *Carpo-métacarpien du pouce* (Ch.), *Métacarpien du pouce*, *Opposant du Pouce*. A small, flat, triangular muscle, situate in the substance of the thenar eminence. It is attached, on the one hand, to the anterior annular ligament of the carpus and to the trapezium; and, on the other, to the whole of the outer margin of the first metacarpal bone. This muscle impresses on the first bone of the metacarpus a movement of rotation, which opposes the thumb to the other fingers.
 OPPOSANT, Opponens — o. *du Petit doigt*, *Opponens minimi digiti*—o. *du Pouce*, *Opponens pollicis*.
 OPRESSIO, Catalepsy, Oppression—o. *Nocturna*, *Incubus*.
 OPRESSION, *Oppressio*, *Thlipsis*, *Cata-thlipsis*, from *opprimere* (*ob*, and *premere*, *pressum*), 'to press against.' A state, in which the patient experiences a sensation of weight in the part affected. When employed abstractedly, it means, particularly, *Oppression of the chest*—*Oppressio Pec'toris*, (F.) *O. de Poitrine*.
 OPRESSION, *Oppressio vir'ium*, (F.) *Oppression des forces*, is, also, used for that condition, at the commencement of fevers, &c., in which the system is oppressed rather than debilitated, and where the vascular action rises, as the obstruction to free circulation is relieved by bleeding, purging, &c.
 OPS, Eye.
 OPSEONUSI, Opsionusi.
 OPSIALGIA, Neuralgia, facial.
 OPSIONU'SI, *Opsionu'si*, from $\omicron\psi\iota\varsigma$, 'vision,' and $\nu\omicron\sigma\omicron\varsigma$, 'a disease;' *Morbi visûs*. Diseases of vision.
 OPSIOTOC'IA, from $\omicron\psi\epsilon$, 'too late,' and $\tau\omicron\kappa\omicron\varsigma$, 'birth;' *Partus sero'tinus*. Parturition after the usual period. See Pregnancy.
 OPSIS, Pupil. Vision.
 OPSOMA'NIAC, *Opsom'anes*, (F.) *Opsomane*, from $\omicron\psi\omicron\rho$, 'aliment,' and $\mu\alpha\iota\alpha$. One who loves some particular aliment to madness.
 OPTESIS, Assatio.
 OPTIC, *Opticus*, *Opo'p'ios*, (F.) *Optique*, from $\omicron\pi\tau\omicron\mu\alpha\iota$. 'I see.' That which relates to vision.
 OPTIC CENTRE, *Centrum opt'icum*. The optic centre of the crystalline is the point at which the various rays proceeding from an object cross in their way to the retina.
 OPTIC COMMISSURE, see Chiasmus.
 OPTIC FORAMEN, *Fora'men opt'icum*, (F.) *Trou optique*. A round opening in the sphenoid bone, near the base of its lesser ala, through which the optic nerve passes.
 OPTIC GANGLIA, *Quadrigenina tubercula*.
 OPTIC GROOVE. A transverse groove on the superior surface of the sphenoid bone, on which the commissure of the optic nerve rests, and which is continuous on each side with the optic foramen.
 OPTIC LOBES, *Quadrigenina tubercula*.
 OPTIC NERVE, *Nervus opt'icus seu vis'ivus seu vis'o'rius*, *Par secundum seu opt'icum seu vis'o'rium*, *Nerve of the 2d pair*, *Ocular nerve of Chaussier*. The optic nerves are remarkable for their size; for their running a longer course within than without, the cranium; and for their furnishing no branch from their origin to their termination. They do not seem to arise, as was long supposed, from the optic thalami, but from the tubercula quadrigenina. Immediately after their origin, the *optic tracts*, *Tractus opt'ici*, proceed forwards; are, at first, broad and flat; but afterwards become narrower and round. In front of the fossa pituitaria, they unite and decussate, each nerve proceeding through the optic foramen

of the sphenoid bone with the ophthalmic artery, and through the *Foramen opticum chorioidæ*, to form the retina. The nerve passes to the back part of the globe of the eye, becomes narrower, and enters that organ at a flattened circular papilla—*Colliculus* seu *Papilla nervi optici*—to give rise to the nervous expansion called the retina. Between the colliculus and the yellow spot of Sömmering, a small projection or fold of the retina passes—*plicia centralis retinæ*. Besides its neurilemma, the optic nerve is surrounded by a sheath, furnished by the dura mater. This accompanies it as far as the eye.

The optic nerve is the nerve of special sensibility of the eye. In the centre of the nerve, there is a *punctum cæcum*, *macula nigra*, where the central artery enters the eye, and the corresponding vein passes out. If a ray of light falls on this spot it is not appreciated.

OPTIC REMEDY, see Ophthalmic remedy—o. Thalami, Thalami nervorum opticorum—o. Tracts, see Optic nerve.

OPTICO-TROCHLÉI-SCLÉROTICIEN, Oblique, superior of the eye.

OPTICUM, Ophthalmic remedy.

OPTILOS, Eye.

OPOTM'ETER, from *οπτομαι*, 'I see,' and *μετρον*, 'a measure.' An instrument for measuring the distance of distinct vision.

OPUNTIA, Cactus opuntia—o. Vulgaris, Cactus opuntia.

OR, Gold—o. Blanc, Platinum—o. Cyanure d', see Gold—o. *Divisé*, see Gold—o. *Hydrochlorate d'*, see Gold—o. *Iodure d'*, see Gold—o. *Métallique*, see Gold—o. *Nitromuriate d'*, see Gold—o. *Oxide d'*, see Gold—o. *et de Sodium chlorure d'*, see Gold—o. *et de Soude, Hydrochlorate d'*, see Gold—o. *et de Soude, Muriate d'*, see Gold.

ORA SERRATA, see Ciliary (Body.)

ORACHE, SPREADING, *Atriplex patula*—o. Stinking, *Chenopodium vulvaria*.

ORAL, *Vocal*, (F.) *Oral*, from *os*, *oris*, 'a mouth.' Relating to the mouth or to speech.

ORANGE, *Citrus aurantium*—o. Bitter, see *Citrus aurantium*—o. Flowers of the, see *Citrus aurantium*.

ORANGE GRASS, *Hypericum sarothra*—o. Root, *Hydrastis Canadensis*—o. Tree, *Citrus aurantium*.

ORANGEADE. A drink, made with orange juice diluted with water. It is antiphlogistic, and often recommended in acute diseases.

ORANGES, see *Citrus aurantium*—o. *Curassoa*, *Aurantia curassaventia*.

ORBES CARTILAGINOSI TRACHEÆ, see Trachea.

ORBICULAIRE DES LÈVRES, *Orbicularis oris*—o. *des Paupières*, *Orbicularis palpebrarum*. ORBICULAR, *Orbicularis*, (F.) *Orbulaire*, from *orbis*, 'a circle.' Spherical, circular.

ORBICULAR BONE, *Os orbicularè* seu *lenticula-rè* seu *Syllii* seu *orbicularè* *Syllii*, *Globulus stapèdis ossis*, *Epiph'ysis cruris longioris incudis*, *Ossiculum orbicularè* seu *squamosum* seu *cochlearè* seu *quartum*, is the smallest of the four bones of the ear. It is scarcely perceptible, round, convex on two surfaces, and situate between the long ramus of the incus and the head of the stapes.

ORBICULAR MUSCLES are muscles with circular fibres surrounding some natural opening of the body. 1. *Orbicularis* seu *Constrictor Oris*, *Sphincter Labiorum*, *Semi seu Demi-orbicularis*, *Supra-semi-orbicularis*, *Labialis*, *Osculato-rius*, *Basia-tor*, (F.) *Labial*, *Orbulaire des lèvres*. A muscle situate in the substance of the lips, and extending from one commissure to the other. It is formed of two very distinct portions, of a semi-oval shape; one belonging to the upper lip,

the other to the lower. Their extremities cross at the commissures, and are confounded with the other muscles of the parts. The use of this fleshy muscle is to bring the lips together, and to close the aperture of the mouth, by making it represent a sort of *bouffret* with radiated wrinkles. It is an antagonist to every other muscle of the lips. 2. *Orbicularis Palpebrarum* seu *oculi* seu *palpebrarum ciliaris*, *Palpebrarum duo musculi*, *Palpebralis*, *Constrictor* seu *Sphincter Palpebrarum* seu *Oculi*, (F.) *Naso-palpebral* (Ch.), *Maxillo-palpebral*, *Palpebral*, *Orbulaire des paupières*. A muscle common to both the eyelids, and seated in their substance. It is broad, thin, transversely oval, and cleft in its great diameter. It is attached to the nasal process of the superior maxillary bone; to the internal angular process of the frontal bone, and to the orbital process of the superior maxillary bone. From these origins the muscle passes outwards, under the skin of the eyelids, surrounding the orbit in a circular manner, extending somewhat beyond it, and covering the upper part of the cheek. It is inserted into the skin of the eyelids, its upper and inner edge being intimately connected with the frontal and corrugator muscles. Its use is to close the eye, by bringing the eyelids together. The part of the orbicularis which covers the cartilages of the eyelids, and which is remarkably thin, is the *Musculus Ciliaris* of some authors.

ORBICULARIS OCULI, *Orbicularis palpebrarum*, see *Orbicularis palpebrarum*—o. *Oris*, see *Orbicularis palpebrarum*—o. *Palpebrarum*, see *Orbicularis palpebrarum*—o. *Palpebrarum ciliaris*, see *Orbicularis palpebrarum*—o. *Recti*, *Sphincter ani externus*.

ORBICULARIS CILIARIS, Ciliary ligament, Ciliary zone.

ORBIS GENU, Patella.

ORBIT, *Orbita*, *O. oculi*, *Troch'ia*, *Conchus* seu *Cavitas* seu *Fovea* seu *Pelvicula oculi*, (F.) *Orbite*, from *orbis*, 'a circle.' The circular cavities are so called, which lodge the organs of sight. The *orbis* or *orbital fossæ* or *cavities*, *conchi*, *κογχου*, are situate at the upper part of the face, and are composed of seven bones, viz.:—the *frontal*, above; the *palate* and *superior maxillary*, below; the *sphenoid* and *malar*, externally; and the *ethmoid* and *lachrymal*, internally. The orbit is filled by the globe of the eye, with its different accessory parts—muscles, nerves, vessels, the lachrymal gland, &c. Its margin is termed *margo orbitalis*.

ORBITA, Orbit—o. *Oculi*, Orbit.

ORBITAL, Orbitar—o. Fissure, inferior, Sphenoidal fissure—o. Fissure, superior, Maxillary fissure.

ORBITAR, *Orbitarius*, *Orbitalis*, *Orbital*, (F.) *Orbitaire*. Same etymon. Relating or belonging to the orbit.

ORBITAR APOPH'YSES or PROC'ESSES terminate the two extremities of the orbital arch. The *external* is much more prominent, and is articulated with the cheek-bone; the *internal* is thinner, and joins the os unguis.

ORBITAR ARCH, (F.) *Arcade orbitaire*, is the projecting, round margin, which separates the *frontal* and *orbital* surfaces of the os frontis, and forms a part of the circumference of the orbit.

ORBITAR FISSURES, (F.) *Fentes orbitaires*. These are situate in the orbit. They are two in number: one *superior*, the Sphenoidal; the other *inferior*, the Spheno-maxillary.

ORBITAR FORAM'INA. Of these there are several:—1. The *Foramen orbitarium superius*, (F.) *Trou orbitaire supérieur*, which is situate at the junction of the inner third of the orbital arch with its two outer thirds, and gives passage to the frontal nerve. 2. The *Foramina orbitaria interiora* seu *inter'na*, *Foramina Ethmoidæ*.

These are situate at the upper part of the internal paries of the orbit, are formed by the union of two notches of the os frontis with two similar ones of the ethmoid; and are distinguished into *anterior* and *posterior*. The former gives passage to the ethmoidal filament of the nasal nerve and to a small artery.

ORBITAR NERVE, *Nervus orbitalis* seu *orbitarius* seu *subcutaneus malar*, is a branch given off from the superior maxillary. It enters the orbit by the spheno-maxillary fissure, and divides into two filaments; the one—*malar*—which passes over the cheek-bone, is distributed to the orbicularis palpebrarum, and anastomoses with the facial nerve; the other—*temporal*—which passes to the temporal fossæ, and anastomoses with the inferior maxillary and facial, to become afterwards subcutaneous.

ORBITAR SURFACE, see Maxillary bone (superior).

ORBITO-EXTUS-SCLÉROTICIEN, Rectus externus oculi—*o. Intus-Scléroticien*, Rectus internus oculi—*o. Maxillo-labialis*, Levator labii superioris proprius—*o. Palpébral*, Levator palpebræ superioris—*o. Sus-palpébral*, Levator palpebræ superioris.

ORCANETTE, *Achusa officinalis*.

ORCHALGIA, Orchidalgia.

ORCHAS, Scrotum.

ORCHEITIS, *Osch'i'tis*, *Oschel'tis*, *Inflammatio scroti*, from *orchis*, from *ορχης*, 'the scrotum,' and *itis*, denoting inflammation. Inflammation of the scrotum.

ORCHEITIS, Hernia humoralis.

ORCHEOCATABASIS, Orchidocatabasis.

ORCHEOCELE, Orchiocele.

ORCHEOTOMY, Castration.

ORCHESTROMANIA, Chorea.

ORCHIDAL'GIA, *Orchal'gia*, *Orchidodyn'ia*, from *ορχης*, *ορχιδος*, 'a testicle,' and *αλγος*, 'pain,' Pain of the testicle. Neuralgia of the testicle. Irritable testicle. A form of neuralgia.

ORCHIDATROPH'IA, *Atroph'ia testic'uli*, from *ορχης*, *ορχιδος*, 'a testicle,' and *atroph'ia*, 'atrophy.' Atrophy or wasting of the testicle.

ORCHIDITIS, Hernia humoralis.

ORCHIDOCARPUM ARETINUM, see *Carica papaya*.

ORCHIDOCATAB'ASIS, *Orcheocatab'asis*, *Descensus testiculo'rum*, from *ορχης*, *ορχιδος*, 'the testis,' and *καταβασις*, 'descent.' The descent of the testes into the scrotum.

ORCHIDOCELE, Hernia humoralis.

ORCHIDODYN'IA, Orchidalgia.

ORCHIDONCUS, Hernia humoralis.

ORCHIDOTOMY, Castration.

ORCHILL, Lichen rocella.

ORCHIOCE'LE, *Orcheocel'le*, from *ορχης*, *ορχιδος*, 'the testicle,' and *κηλη*, 'a rupture.' A tumour of the testicle. Scrotal hernia. Hernia humoralis. A name given to several diseases of the testicle and its envelopes, essentially differing from each other.

ORCHIOCE'LE SCIRRHOS'A, *Scirrhocel'le*. A malignant tumour of the testis.

ORCHIS, Testicle—*o. Butterfly*, *Orchis bifolia*.

ORCHIS MAS'CLA, *Saty'r'ion*, *Testic'ulus caninus*, *Cynosor'chis*, *Dogs' stones*, *Male orchis*, *Ballock-grass*, *Male Fools' stones*, *Twinroot*. *Ord.* Orchidaceæ. This root had a place in some pharmacopœias, on account of the glutinous, slimy juice it contains. The root of the *Orchis bifolia* or *Butterfly orchis*, has likewise been collected. It has been used as a demulcent. Its fancied aphrodisiac virtues seem to be owing to its resemblance to *ορχης*, 'a testicle,' whence its name.

Salep is obtained from this variety of the orchis;—and from the *Orchis morio*, &c. See *Salep*.

ORCHIS, ROUND-LEAVED, LARGE, *Platanthera orbiculata*.

ORCHITE, Hernia humoralis.

ORCHITIS, Hernia humoralis.

ORCHOI, see *Tarsus*.

ORCHOTOMIA, Castration. Also, removal of the tarsi.

ORDEAL NUT—called *Esère* by the natives of Calabar—of the natural family Leguminosæ, and closely resembling a *Dolichos*, is possessed of virulent acro-narcotic properties.

ORDEOLUM, Hordeolum.

ORDEUM, Hordeum.

ORDINAIRES, Menses.

ORDO MEDICINALIS, Police, medical.

ORDONNANCE, Formula, Prescription.

OREILLE D'ÂNE, Symphytum—*o. d'Homme*, *Asarum*—*o. de Souris*, *Hieracium pilosella*—*o. d'Ours*, *Primula veris*.

OREILLETTE, *Asarum*, Auricle of the heart.

OREILLONS, Parotis, Cynanche parotidæa.

ORELIA GRANDIFLORA, Allamanda.

ORELLANA, see *Terra Orleana*.

OREOSELINUM, *Athamanta aureoselinum*—*o. Africanum*, *Bubon galbanum*—*o. Legitimum*, *Athamanta aureoselinum*—*o. Nigrum*, *Athamanta aureoselinum*.

OREXIS, Appetite, Pyrosis—*o. Cynodes*, *Boulimia*.

ORGAN, *Or'ganum*, *Or'ganon*. From *εργον*, 'work.' 'An instrument.' Part of an organized being, destined to exercise some particular function. Thus—the eyes are organs of sight; the muscles are organs of motion, &c. The collection of organs, which concur in any function, is called *apparatus*.

ORGAN, *Mentha pulegium*.

ORGANA GENERATIONI INSERVIENTIA, Genital organs—*o. Genitalia*, Genital organs—*Sexualia*, Genital organs—*o. Sudoripara*, see *Perspiration*—*o. Urogenitalia*, *Urogenital organs*.

ORGANES GÉNITAUX, Genital organs.

ORGANIC, *Organ'icus*, (F.) *Organique*. Relating to an organ or organs, and to beings possessed of organs. Hence, **ORGANIC FUNCTIONS** are those possessed by both animals and vegetables. It is also used synonymously with *vital*, in contradistinction to *physical*.

ORGANIC CHEMISTRY, see *Chymistry*.

ORGANIC DISEASES or **LESIONS** are such as concern the organ itself, in contradistinction to *functional*, *rati'onal*, or *dynam'ic*, which merely concern the function. Of course, *organic* diseases of a part are always more serious than *functional*.

ORGANIC NERVOUS SYSTEM, see *Trisplanchnic nerve*.

OR'GANICISM, *Organic'ism'us*, from *οργανον*, 'an organ.' The doctrine of the localization of disease, or which refers it always to a material lesion of an organ. A modern term, but not much used.

ORGANISATIO, Organization.

ORGANISATUS, Organized.

OR'GANISM. Same etymon as organ. The living economy. Many physiologists have used this word synonymously with organization; but more especially to designate the aggregate of vital actions in organized beings, animals as well as vegetables. The collection of parts composing an organized body, and the laws which govern it.

ORGANIZABIL'ITY, from *organisatio*, and *habilis*, 'suitable.' Capability of organization or of being formed into living tissue. Substances possessed of such capability—as fibrin—are said to be organizable.

ORGANIZABLE, see *Organizability*.

ORGANIZATION, *Organisa'tio*, from *opyavov*, 'an organ.' The manner of structure proper to different beings. It is also employed in the sense of the structure of a part; as, the *organization of the heart*, &c.

ORGANIZATION, COMPOUNDS OF, Principles, immediate.

OR'GANIZED, *Or'ganis instructus*, *Organisatus*, (F.) *Organisé*. That which is composed of organs.

ORGANIZED BODIES, (F.) *Corps organisés*, are those endowed with life; i. e. animals and vegetables: in contradistinction to *inorganic* bodies, which comprise the mineral kingdom. See *Corpus*.

ORGANOCHEMIA, Chymistry, organic.

ORGANOGEN'ENY, *Organogen'ia*, *Organogen'esis*, from *opyavov*, 'an organ,' and *γενεσις*, 'generation.' The doctrine of the formation of different organs.

ORGANOGNOS'IA, from *opyavov*, and *γνωσις*, 'knowledge.' The knowledge and discrimination of organized bodies.

ORGANOGRAPHY, *Organograph'ia*, from *opyavov*, and *γραφη*, 'a description.' A description of the organs of a living body.

ORGANOLEPTIC, Plastic.

ORGANOLOGY, Anatomy, Craniology.

ORGANON OLFACTÛS, Nasus.

ORGANONOM'IA, from *opyavov*, and *νομος*, 'a law.' The doctrine of the laws of organic life.

ORGANOZOONOMIA, Zoonomia.

ORGANUM, Instrument.

ORGASM, *Orgas'mus*, *Orgo'sis*, from *opyawo*, 'I desire ardently,' 'I am excited.' *Æstruation*. A strong impulse or desire for something. State of excitement and turgescence of any organ whatever. Erethism. Applied particularly to the height of venereal excitement in sexual intercourse.

ORGASMUS, Turgescence.

ORGAS'TICA. Same etymon. The second order of the class *Genetica* of Good. Defined: diseases affecting the orgasm; organic or constitutional infirmity disordering the power or the desire of procreating.

ORGE, Rage.

ORGE, Hordeum—o. *Perlé*, see Hordeum.

ORGEAT, Syrupus amygdalæ.

ORGELET, Hordeolum.

ORGEOLET, Hordeolum.

ORGOSIS, Orgasm.

ORICHALCUM, Brass.

ORICULAR, Auricular.

ORICULE, Auricle, Pavilion of the ear.

ORIFICIUM, Mouth—o. *Dextrum Ventriculi*, Pylorus—o. *Uteri*, *Os uteri*—o. *Uterinum*, see *Uterus*—o. *Vaginale*, see *Uterus*—o. *Ventriculi Sinistrum*, *Cardia*.

ORIG'ANUM, *O. vulgare* seu *heracleoticum*, (*OPYAVOV*, from *opos*, 'a mountain,' and *yavos*, 'delight.') *Cuni'la bu'bula*, *Majora'na mancura'na*, *Zazarhen'di herba*, *Wild or Common marjoram*, *Mancura'na*, (F.) *Pied de lit*. Ord. Labiate. *Sec. Syst.* Didynamia Gymnospermia. This plant resembles marjoram in smell; and has a pungent taste, much like thyme. It is aromatic and stimulant; and its oil possesses the properties of the essential oils in general. The oil, *Oleum origani* (Ph. U. S.), is very pungent, and is rarely given internally. It is used in toothache.

ORIGANUM AQUATICUM, *Eupatorium cannabinum*—o. *Creticum*, *O. dictamnus*.

ORIGANUM DICTAM'NUS, *O. Cret'icum*, *Dictam'nus Cret'icus*, *Amar'acus toment'ous*, *Ou'tis*, *Dit'an'y of Crete*, (F.) *Dictamne de Crète*. The leaves of this plant were once recommended as emmenagogue and alexipharmic.

ORIGANUM HERACLEOTICUM, *Origanum*.

ORIGANUM MAJORA'NA, *O. majoranoides*, *Majorana*, *M. horten'sis*, *Sweet mar'joram*, *Samp'sucus*, *Agriorg'anum*, *Amar'acus*, (F.) *Morjolaine*. Its odour is strong and fragrant; taste aromatic and bitterish. Its properties are those of a stomachic and erbine. It is chiefly used, however, for culinary purposes, and as a snuff in headache.

ORIGANUM SYRIACUM, *Teucrium marum*.

ORIGINAIRE (F.), from *origo*, *originis*, 'origin.' This term has been used, by French writers, in the same sense as *congenital*. It is particularly applied to affections depending upon faulty conformation, or to faulty conformation itself.

ORIGO, Arche.

ORISMOLOGY, Terminology.

ORLEANA, see *Terra Orleana*.

ORME, Appetite.

ORME, Ulmus—o. *Champêtre*, *Ulmus*—o. *Pyramidale*, *Ulmus*.

ORMEAU, Ulmus.

ORMSKIRK MED'ICINE. A celebrated antilyssic remedy, supposed to consist of *Pulv. Cretae*, $\frac{3}{8}$ ss; *Bol. Armen.* $\frac{3}{8}$ ij; *Alumin.* gr. x; *Pulv. Inulae*, $\frac{3}{4}$; *Ol. Anisi*, qtt. vj.

This is taken for a dose every morning for six times, in a glass of water, with a small proportion of fresh milk.

ORNAMENTUM FOLIACEUM, see *Tube*, *Fallopiam*.

ORNITHOG'ALUM ALTIS'SIMUM. (*Orni-thogalon*, a fanciful name, from *ornis*, *ornithos*, 'a bird,' and *gala*, 'milk.') A South African plant, *Nat. Ord.* Asphodeleæ, the fleshy bulb of which is diuretic. An oxymel is prepared of it, which is given in catarrh, asthma, phthisis, and hydrothorax. It resembles squill in its medical properties.

ORNITHOGALUM MARITIMUM, *Scilla*—o. *Squilla*, *Scilla*.

ORNITHOGLOSSA, see *Fraxinus excelsior*.

ORNUS EUROPEÆ, see *Fraxinus ornus*—o. *Mannifera*, *Fraxinus ornus*—o. *Rotundifolia*, *Fraxinus ornus*—o. *Sylvestris*, *Fraxinus excelsior*.

OROBAN'CHĒ VIRGINIA'NA, (*οροβαρχη*, from *οροβος*, 'the orobus,' and *αρχω*, 'I strangle.') *Epiphe'gus seu Epifa'gus America'nis seu Virginia'nis*, *Virgin'ia broom-rape*, *Beech-drops*, *Cancer-root*. *Family*, *Orobanchoidææ*. This parasitic plant is astringent, and a peculiar and extremely nauseous bitter. It is most powerful when fresh. It has been used in dysentery; and, externally, to obstinate ulcers.

OROBAN'CHĒ AMERICA'NA, and *O. UNIFLO'RA*, have the same properties, and are, likewise, called *Cancer-root*, *Earth-club*, and *Clapnoort*.

OROBĒ, *Ervum ervilia*.

OROBION, see *Ervum ervilia*.

OROBOI'DES, from *οροβος*, 'the orobus,' and *ειδος*, 'form.' *Orobo'des*. Having the shape of the orobus. A name given to urine, *Urina orobodes seu orobo'i'des*, when depositing a substance of a fawn colour, like the meal of the orobus.

OROBUS, *Ervum ervilia*—o. *Faba*, *Vicia faba*.

ORONGE, see *Agaric*.

OROPHALL'US, from *opos*, or *oppos*, 'the rump,' and *φαλλος*, 'the male organ.' A monster having a second male organ originating from the rump.—*Gurlt*.

OROS, *Croupion*, *Serum*.

ORPIMENT, *Auripigmentum*, *Orpin*, *Risigallum*, *Risigallum*, *Cloanz*, *Elomē*, *Sira*, *Lempnis*, *Spec'ulum citrinum*, *Yrides*, *Yride*. The native yellow sulphuret of arsenic. It is poisonous, but less so than the oxide. It is, also, called *Adarigo*, *Adarneck*, *Ahusal*, *Althanacha*, *Azarnet*.

The Turks prepare a depilatory with it, which they call *Rusma*.

ORPIN, Orpiment—*o. Brûlant*, Sedum—*o. Grand*, Sedum telephium—*o. Reprise*, Sedum telephium.

ORPINE, Sedum telephium.

ORRHOCHEZIA, Diarrhœa, serous.

ORRHOCYST'IS, from *oppos*, 'serum,' and *κυστις*, 'a bladder.' An encysted tumour containing a serous fluid.

ORRHOHYMENTIS, Hydrohymenitis.

ORRHOPYG'ION. The inferior extremity of the vertebral column; from *opos*, 'extremity,' and *πυγη*, 'the nates.' The os coccygis. Also, the raphe, extending from the penis to the anus, and separating the scrotum into two parts.

ORRHORRHE'A, from *oppos*, 'serum,' and *ρρω*, 'I flow.' A morbidly increased secretion of a serous fluid.

ORRHOS, *Croupion*, Serum.

ORRIS, Iris Florentina—*o. Common*, Iris Germanica.

ORSELLE, Lichen roccella.

ORTEIL, Digitus pedis.

ORTHOC'LUM, from *orthos*, 'straight,' and *κωλον*, 'limb.' Stiffness of the limb, so that it is kept quite straight.

ORTHODON'TIA, from *orthos*, 'straight, right,' and *odontos*, *odontos*, 'a tooth.' The part of dentistry which is concerned in the treatment of irregularity of the teeth.

ORTHODON'ON. A measure with the Greeks, equal to eleven finger-breadths.

ORTHOG'NATHOUS, from *orthos*, 'right, straight,' and *γναθος*, 'jaw.' Having a vertical jaw. A term applied to the form of head in which the facial angle approaches the right angle.

ORTHOMORPHIA, Orthopædia.

ORTHOMORPHOSIS, Orthopædia.

ORTHONTROPIA, Orthopædia.

ORTHOPÆDI'A, *Orthopæ'dicē*, *Orthomor'phia*, *Orthomorphosis*, *Orthotrop'ia*, *Orthop'edies*, from *orthos*, 'right,' and *παις*, *παῖδος*, 'a child.' The part of medicine whose object is to prevent and correct deformity in the bodies of children. Often used, however, with a more extensive signification, to embrace the correction or prevention of deformities at all ages. *Orthosomat'ies*, *Orthosomat'icē*, from *orthos*, 'right,' and *σωμα*, 'body,' has been proposed as a preferable term.

ORTHOPE'DIC, *Orthopæ'dicus*; same etymon. Relating to orthopædia,—as *Orthopædic Institution*, *Institutum orthopæ'dicum* seu *orthopæ'dium*: an institution for the correction or prevention of deformities in children.

ORTHOPE'DICS, Orthopædia.

ORTHOPE'DIST, *Ortho'ter*, *Orthopæ'dicus*. Same etymon. One who practises orthopædia.

ORTHOPHON'IA, from *orthos*, 'right,' and *φωνη*, 'voice.' A good pronunciation.

ORTHOPHREN'IC, *Orthophren'icus*, from *orthos*, 'right,' and *φρων*, 'mind.' Relating to sound mind, and to the care of insanity.

ORTHOPNE'A, *Suffocatio*, *Strangulatio*, *Præfocatio*, *Pnix*, *Pnignus*, *Euthypp'noē*, *Euthypp'nea*, *Angor*, *Apnœa*, from *orthos*, 'right,' 'straight,' and *πνεω*, 'I respire.' Impracticability of breathing in the horizontal posture. Necessity of being in the erect posture, in order to respire.

ORTHOPNEA CARDIACA, Angina Pectoris—*o. Convulsiva*, Asthma—*o. Cynanchica*, Cynanche trachealis—*o. Hydrothoracica*, Hydrothorax—*o. Hysterica*, Angone—*o. Pituitosa*, Mycorthopneæa—*o. Tussicilosa*, Pertussis.

ORTHOSOMATICE, Orthopædia.

ORTHOSOMATIQUE, Orthopædia.

ORTHOTER, Orthopedist.

ORTHYSTEROPTOMA, Prolapsus uteri.

ORTHYSTEROPTOSIS, Prolapsus uteri.

ORTIE, Urtica—*o. Blanche*, Lamium album—*o. Brûlante*, Urtica urens—*o. Morte*, Lamium album—*o. Morte des Bois*, Galeopsis—*o. Romaine*, Urtica pilulifera.

ORTYX, Tetrao coturnix.

ORUS, *Croupion*, Serum.

ORVALE, Salvia sclarea.

ORVIETA'NUM. From the Italian *Orvietano*. An electuary regarded as an invaluable antidote, and composed of *Old theriac*, *Dried vipers*, *Scorzonera*, *Carlina*, *Imperatorium*, *Angelica*, *Bistort*, *Rosemary*, *Juniper*, *Cinnamon*, *Cloves*, *Mace*, *Honey*, and a crowd of other substances. Its medical properties resembled, in some respects, those of the theriac. It was so called, according to some, because invented by Orvietano, a celebrated charlatan; or, according to others, from Orvieto, a town in Italy.

ORYZA, *Orp'za*, *Ory'za sativa*, *Rice*, (F.) *Riz*, *Family*, Graminæa. *See Syst.* Hexandria Monogynia. A plant, almost aquatic, and indigenous in China, one of the richest productions of Egypt, and which prospers in the warmer regions of the four quarters of the globe. The grain inclosed in the husk is called by the Malays *Paddy*, *Padi*, or *Paddie*; when deprived of the husk, *Bras*, and when boiled, *Nasi*. Its amylaceous seeds, *Ory'za*, *Ory'zum*, *Hordeum galacticum*, nourish more men than those of wheat and rye together. Besides being alimentary, they are demulcent and emollient. *Gardiner's alimentary preparation* is very finely ground rice-meal.

Mucilage of Rice, *Rice water*, may be formed by taking one ounce of rice, and, having washed it, macerating it for three hours in a quart of tepid soft water, in a pan placed upon a stove; then boiling the whole slowly for another hour, and straining through a sieve.

It may be sweetened and acidulated, or be prepared with milk, like arrow-root, and be used as a demulcent.

Rice Jelly is made by macerating a sufficient quantity of clean rice in as much water as will cover it; boiling slowly, adding water as it evaporates, until the rice is reduced to a pap, sweetening and flavouring with lemon-juice or vanilla, and passing through a fine sieve into a form or mould. It may be eaten alone or with milk; and is a good dietetic preparation for those of weak digestive powers.

Ground rice. Take a tablespoonful of ground rice, a pint and a half of milk, and half an ounce of candied lemon-peel. Rub the rice smooth with the milk; then add the lemon-peel cut into small pieces; boil for half an hour, and strain whilst the milk is hot. It is used in the same cases as rice jelly.

OS, Bone, Mouth, see Ossiculum—*o. Acromii*, Acromion—*o. Adjutorium*, Humeri os—*o. Alæforme*, Sphenoid—*o. Alagas*, Coccyx, Sacrum—*o. Alatum*, Sphenoid bone—*o. Amphideon*, Os uteri—*o. OS UTERI EXTERNUM, see Uterus — o. Uteri internum, see Uterus — o. Varium, Cuboid — o. Vesipiforme, Sphenoid — o. Vomeris, Vomer — o. *Wormiens*, Wormiana ossa — o. Xiphoides, Sternum — o. Ypseloides, Hyoides os — o. Zygomaticum, Malæ os.

OSCEDO, Yawning.

OSCHÆMATÆDE'MA, *Oschæmæde'ma*, *Œde'ma scroti cruentum*; from *οσχεον*, 'scrotum,' 'aipa,' 'blood,' and *οίδημα*, 'œdema.' Effusion of blood into the scrotum.

OSCHÆMÆDEMA, Oschæmatœdema.

OSCHE, Scrotum.

OSCHEITIS, Orcheitis, Oschitis.

OSCHEIOCARCINOMA, Cancer, chimney-sweepers'.

OSCHEOCELE, *Oschocele*, *Scrotocele*, from *οσχεον*, 'the scrotum,' and *κηλη*, 'tumour;' *Scrotal hernia*, see Bubonocele. Sauvages uses *oschocele* in the sense of *Dropsy of the scrotum*, see Hydrocele.

OSCHEOCELE AQUOSA, Hydrooschocele — o. Flatulenta, Physocœle — o. Hydatidosa, Hydatidocœle — o. Œdematosa, Œdematoschocele — o. Seminalis, Spermatocele — o. Urinalis, Urocele — o. Varicosa, Varicocele.

OSCHÉOCHALASIE, from *οσχεον*, 'the scrotum,' and *χαλασις*, 'relaxation.' A tumour resulting from hypertrophy of the areolar tissue of the scrotum, and the excessive extension of the skin of the part, — an affection which has been confounded with sarcocele. — Alibert.

OSCHEON, Scrotum, Os uteri.

OSCHEON'CUS, *Oschon'cus*, *Oscheophy'ma*, *Oschophy'ma*, from *oscheon*, and *oynos*, 'a tumour.' A preternatural swelling of the scrotum.

OSCHEOPHYMA, Oscheoncus.

OSCHEOPLAS'TIC, *Oscheoplasticus*, from *oscheon*, and *πλασσω*, 'I form.' An epithet given to the operation for restoring the scrotum when lost. *Os'cheoplasty*.

OSCHEOPYŒDE'MA, *Oschoopyæde'ma*, *Œde'ma scroti purulentum*. Purulent tumefaction of the scrotum.

OSCHEUS, Scrotum.

OS'CHION. The raised margin of the os uteri. According to some, an excrescence from the os uteri.

OSCHI'TIS, *Orcheitis*, *Oscheitis*, *Inflammatio scroti*, from *oscheon*, and *itis*, 'inflammation.' Inflammation of the scrotum.

OSCHIOCARCINOMA, Cancer, chimney-sweepers'.

OSCHOCELE, Oschocele, Scrotocele.

OSCHONCUS, Oscheoncus.

OSCHOPHYMA, Oscheonus.

OSCHOPYŒDEMA, Oscheopyœdema.

OSCHURŒDE'MA; from *oscheou*, *οσχοῦ*, 'urine,' and *οἴδημα*, 'œdema.' Œdema from effusion of urine into the scrotum.

OSCHUS, Scrotum.

OSCHYDRŒDE'MA, from *oscheon*, 'ὕδωρ,' 'water,' and *οἴδημα*, 'œdema.' *Œdema scroti aquosum*. Watery œdema of the scrotum.

OSCILLA'TIO, Irritability, Oscillation.

OSCILLA'TION, *Oscilla'tio*; from *oscillum*, 'an image, perhaps of Bacchus, hung on ropes, and swung up and down in the air.' Vibration, *Vibra'men*, *Vibra'tio*, *Vibra'tus*. Also, a partial rotatory movement of the eyeball to and from its anterior-posterior axis.

OS'CITANT (FEVER), *Febris os'citans*, (F.) *Fibvre oscitante*, from *oscitare*, 'to yawn.' A fever, in which the patient is continually yawning.

OSCITATIO, Yawning.

OSCOLATORIUS, Orbicularis oris.

OSCOLUM UTERI, Os uteri.

OSCUS, Scrotum.

OSEILLE, *Rumex acetosus*—*o. Boucher*, *Rumex scutatus*—*o. Petite*, *Rumex scutatus*—*o. Ronde*, *Rumex scutatus*—*o. Rouge*, *Rumex sanguineus*.

OSIER, *Salix alba*—*o. red*, *Cornus serica*.

OS'MAZOME, *Os'mozome*, *Osmazo'ma*, *Osmozo'ma*, *Os'mazone*, *Zomod'mum*, (F.) *Matière extractive du Bouillon*, *Extrait de viande*; *Extractive* or *Saponaceous extract of meat*; from *οσμη*, 'smell,' and *ζωμος*, 'soup.' M. Thénard gave this name to an extractive matter, contained in muscular flesh and in the blood of animals, which he considers of a peculiar nature. It has an agreeable smell and taste, and is found in *Bouillons* of meat, in the proportion of one part to seven of gelatin. Vauquelin discovered in it some fungi. It is the substance which gives the flavour of meat to soups, and hence its name. It is a mixture of different crystallizable and uncrystallizable principles with empyreumatic products.

Osmazome has been prescribed in the dose of ʒss to ʒj, in broth or in powder, with aromatics, as a stimulant to the digestive actions and a restorer of appetite in convalescence. An *Osmazome chocolate*, *Chocola'ta cum osmazo'ma*, has been introduced as an analeptic article of diet. It consists of *chocolate* ʒij to *osmazome* ʒj.

OSME, Odour.

OSMESIS, Olfaction.

OSMIDRO'SIS, from *οσμη*, 'odour,' and 'ὀδρωσ,' 'sweat.' Perspiration of an unusual odour.

OSMITOPS'IS ASTERISCOÏ'DES, *Bellis*.

A plant, of the Cape of Good Hope, which, from its smell and taste, seems to contain camphor; hence its antispasmodic virtues. In infusion, it is often beneficially employed in cough, hoarseness, and diseases of the chest generally, and is said to be serviceable in flatulent colic. Infused in spirit, *spir'itus bell'idis*, it has been used successfully as an external remedy in paralysis.

OSMOMETRICUS SENSUS, Olfaction.

OSMON'OSI, *Osmon'osi*, *Morbi olfac'tus*, from *οσμη*, 'odour,' and *νοσος*, 'a disease.' Diseases of olfaction.

OSMONOSOLOG'IA, from *οσμη*, 'odour,' *νοσος*, 'disease,' and *λογος*, 'description.' The doctrine of, or a treatise on, the diseases of the sense of smell.

OSMORRHIZA LONGIS'TYLIS, (*οσμη*, 'a scent,' and *ρίζα*, 'a root.') *Sweet Cic'ely*. An indigenous plant, *Order*, Umbelliferæ, which flowers in May and June. It is an agreeable aromatic, having much of the flavour of anise.

OSMOSE, *Osmo'sis*; from *ωσμος*, 'impulse.' The action by which fluids are impelled through

moist membrane and other porous septa, in endosmotic and exosmotic experiments.

OSMOTIC, *Osmot'icus*, same etymon. Relating or belonging to osmose: as "osmotic force," the force which induces osmose.

OSMOZOME, *Osmazome*.

OSMUND, ROYAL, *Osmunda regalis*.

OSMUN'DA CINNAM'OMEA, *Cinnamou Fern*. Indigenous; *Order*, Filices; is regarded to be demulcent, subastringent, and tonic. Boiled in milk, it yields a fine mucilage, which is useful in diarrhœa.

OSMUN'DA REGA'LIS, *O. spectabilis*, *Filix Flor'ida*, *Flow'ering Fern*, *Osmund-royal*. This plant was once thought to possess astringent and emmenagogue virtues.

OSMUN'DA SPECTABILIS, *O. regalis*.

OSORON, Opium.

OSPHRANTERICUS, Olfactory.

OSPHRANTICOS, Olfactory

OSPHRASIA, Olfaction.

OSPHRESIOLOGY, *Osphresiology'ia*, from *οσφρησις*, 'olfaction,' and *λογος*, 'a discourse.' A treatise on olfaction and odours.

OSPHRESIS, Olfaction.

OSPHRETICUS, Olfactory.

OSPHRIS'TICE, from *οσφρησις*, 'olfaction.' The doctrine of the phenomena of odours.

OSPHYALGEMA, Coxalgia.

OSPHYALGIA, Coxalgia.

OSPHYARTHROITIS, Osphyitis.

OSPHYARTHROCEAE, *Coxarum morbus*.

OSPHY'TIS, *Osphy'tis*, *Osphyarthri'tis*, *Inflamma'tio coxæ*, from *οσφυς*, 'the hip,' and *itis*, denoting inflammation. Inflammation of the parts about the hip.

OSPHYRRHEUMA, Lumbago.

OSPHYS, Haunch, Lumbi.

OSPHYTIS, Osphyitis.

OSSA BREGMATIS, Parietal bones—*o. Convoluta inferiora*, Turbinated bones, inferior—*o. Digitorum manus*, Phalanges of the fingers—*o. Digitorum pedis*, Phalanges of the toes—*o. Epactalia*, Wormiana ossa—*o. Maxillæ superioris quarta seu quinta seu secunda*, Nasal bones—*o. Nasalia*, Nasal bones—*o. Nasi*, Nasal bones—*o. Nervalia*, Parietal bones—*o. Pisiformia lingualia*, see Hyoides, os—*o. Raphogeminantia*, Wormiana ossa—*o. Sesamoides*, Sesamoid bones—*o. Sincipitis*, Parietal bones—*o. Spongiosa*, Turbinated bones—*o. Sutararum*, Wormiana ossa—*o. Tertia maxillæ superioris*, Turbinated bones—*o. Tetragona*, Parietal bones—*o. Triangularia*, Sphenoidal cornua—*o. Triangularia Blasii*, Wormiana ossa—*o. Triquetra*, Wormiana ossa—*o. Triticea*, see Hyoides, os—*o. Turbinata*, Turbinated bones—*o. Verticalia*, Parietal bones.

OSSEINE, Osteine.

OSSELETS DE BERTIN, Sphenoidal cornua—*o. de l'Oreille*, Ossicula auditûs—*o. de l'Ouie*, Ossicula auditûs—*o. du Tympan*, Ossicula auditûs.

OSSEOUS, *Os'seus*, *Osto'des*, *Ostov'des*, *Ostoid*, (F.) *Osseux*; from os, 'a bone.' Bony. Resembling bone.

OSSICLES, Ossicula, see Ossiculum.

OSSICULA, see Ossiculum.

OSSICULA AUDITÛS, *O. Auris*, (F.) *Ossclets de l'oreille ou de l'ouie ou du tympan*. The small bones or ossicles situate in the cavity of the tympanum, and forming an uninterrupted chain from the membrane of the tympanum to that of the fenestra ovalis. They are four in number; and their series, from without to within, is as follows: *Malleus*, *Incus*, *Os orbiculare*, *Stapes*.

OSSICULA BERTINI, Sphenoidal cornua—*o. Innominata*, Innominata minora ossa—*o. Nasi*, Nasal bones—*o. Sesamoides*, Sesamoid bones—*o. Triticea*, see Hyoides, os.

OSSIC'ULUM, (plural *Ossic'ula*.) *Osta'riön*, *Os'sicle*. Diminutive of *os*, *ossis*, 'a bone.' A small bone. See *Os*.

OSSICULUM COCHLEARE, Orbicular bone—o. Ineudi Comparatum, Incus—o. Malleolo assimilatum. Malleus—o. Molari denti comparatum, Incus—o. Orbiculare, Orbicular bone—o. Quartum, Orbicular bone—o. Squamosum, Orbicular bone.

OSSIFICA'TION, *Ossifica'tio*, *Ossifac'tio*, from *os*, 'a bone,' and *facere*, 'to make.' *Osteogen'ia*, *Osteogen'esis*, *Osteo'sis*, *Osto'sis*. Formation of bone. Development or increase of the osseous system. Ossification takes place in the same manner as the nutrition of other organs. The bones are, at first, mucous, and afterwards cartilaginous; the cartilage, at length, receives the phosphate of lime, and is, at the same time, replaced by a gelatinous parenchyma, when the bone has acquired the whole of its development.

OSSIFICATION, POINTS OF, *Puncta seu Nu'clei ossificatio'nis*, *Nu'clei ossi*, are the points where the ossification of a bone commences, whence it extends to other parts. Almost all the bones present a greater or less number of points of ossification. Besides the natural ossification, which we observe in the foetus and in the first periods of life, there are also *accidental ossifications*, such as those frequently remarked after the inflammation of serous membranes, in the parietes of arteries, and to which the terms *Osthe'ia*, *Incrustation* and *Petrifaction* have, sometimes, been applied.

OSSIFRAGA, *Osteocolla*.

OSSI SACRI ACUMEN, Coccyx.

OSSISANA, *Osteocolla*.

OSSIV'OROUS, from *os*, *ossis*, 'a bone,' and *vorö*, 'I devour.' A species of tumour, mentioned by Ruysch, which destroys bone.

OST'AGRA, *Ost'agra*, from *osteon*, 'a bone,' and *αγορ*, 'seizure.' A forceps to cut or remove portions of bone.

OSTALGIA, *Osteocopus*.

OSTARIUM, *Ossiculum*.

OSTARTHITIS, *Arthrophlogosis*.

OSTARTHROFACE, *Spina ventosa*.

OSTEAGRA, *Ostagra*.

OSTEALGIA, *Osteocopus*.

OSTÉIDE, *Osteoid*.

OSTEINE, *Osseine*, from *osteon*, 'a bone.' The animal matter of bone.

OSTEITES, *Osteocolla*.

OSTEY'TIS, *Osti'tis*, from *osteon*, 'a bone,' and *itis*. *Inflammat'io Ossis*. Inflammation of bone; characterized by violent shooting and lancinating pains in a bone.

OSTEMPY'E'SIS, *Osteömpye'sis*, *Ostempyo'sis*, from *osteon*, 'a bone,' and *εμπυση*, (*ev*, and *πυον*), 'effusion of pus.' An abscess in the interior of a bone.

OSTEMPYOSIS, *Ostempyesis*.

OSTEOANABROSIS, *Osteonabrosis*.

OSTEOCE'LE, from *osteon*, 'a bone,' and *κηλη*, 'a tumour.' A hernia in which the sac is cartilaginous and bony:—a rare case. Also, osseous induration of one or both testicles.

OSTEOCLASIS, *Fracture*.

OSTEOCOL'LA, from *osteon*, 'a bone,' and *κόλλα*, 'glue.' *Glue-bone*, *Stone* or *Bone binder*; *Ossif'raga*, *Holos'teus*, *Ossisa'na*, *Ostri'tes*, *Ostei'tes*, *Amos'teus*, *Osteol'ithos*, *Stelochi'tes*. A name given to petrified carbonate of lime, found in some parts of Germany and other portions of the globe; so called, because it has been supposed to possess the power of favouring the formation of *callus* in fractures. It is the *Chaux carbonatée concretionnée incrustante* of Haüy. Not used.

OSTEOC'OPUS, *Osteal'gia*, *Ostal'gia*, *Osteo-*

dyn'ia, from *osteon*, 'a bone,' and *κοπος*, 'fatigue.' *Boneach*, *Bone-ague*. Pain in the bones,—as in syphilis.

OSTEOCYST'OID, *Osteocystoï'des*, from *osteon*, 'a bone,' *κύστις*, 'a sack or cyst,' and *εἶδος*, 'appearance.' A morbid growth in bone, consisting of the formation of cysts filled with puriform or other fluid.

OSTEODENTINE, see *Tooth*.

OSTEODYNIA, *Osteocopus*.

OSTEOANGRÆNA, *Necrosis*.

OSTEOGENIA, *Ossification*.

OSTEOG'RAPHY, *Osteogra'phia*, from *osteon*, 'a bone,' and *γραφειν*, 'to describe.' Description of the bones. The part of anatomy which describes the bones.

OSTEOHELICOSIS, *Caries*.

OSTEOID, *Osteoï'des*, (F.) *Ostéide*, from *osteon*, 'bone,' and *εἶδος*, 'appearance.' An accidental bony production, or more frequently a morbid production, which is a calcareous incrustation of the normal tissue or of fibrous tumours.

OSTEOLITHOS, *Osteocolla*.

OSTEOL'OGY, *Osteolog'ia*, from *osteon*, 'a bone,' and *λογος*, 'a discourse.' The part of anatomy which treats of bones.

OSTEOLY'O'SIS, from *osteon*, 'a bone,' and *λυω*, 'I dissolve.' *Necrosis* or death of the bone, as in hospital gangrene, in which the dead parts are of soft consistence.

OSTEOMA, *Exostosis*.

OSTEOMALACIA, *Mollities ossium*—o. *Infantum*, *Rachitis*.

OSTEOMALACOSIS, *Mollities ossium*.

OSTEOMYELITIS, *Medullitis*.

OSTEON, Bone—o. *Hieron*, *Sacrum*.

OSTEONABRO'SIS, *Osteonabro'sis*, from *osteon*, 'a bone,' a priv., and *βρωσις*, 'nutriment.' Atrophy of the osseous texture marked by diminution of volume.

OSTEON'CUS, from *osteon*, 'a bone,' and *ογκος*, 'a tumour.' A bony tumour.

OSTEONECROSIS, *Necrosis*.

OSTEON'OSI, *Osteonu'isi*, from *osteon*, 'a bone,' and *νοσος*, 'a disease.' *Mor'bi os'sium*. Diseases of the bones.

OSTEOPÆDION, *Lithopædion*.

OSTEOPALIN'CLASIS, from *osteon*, 'a bone,' *παλιν*, 'again,' and *κλάσις*, 'fracture.' The breaking again of a bone which has united unfavourably.

OSTEOPHY'MA, *Osteoncus*. Sometimes used in the sense of *Exostosis*. By Lobstein applied to bony productions originating in the deep-seated layers of the periosteum, in the vicinity of a carious bone, and which seem to be intended to obviate the weakness resulting from the destruction of the bone.

OSTEOPHYTE, *Exostosis*.

OSTEOPHY'TON, *Osteophyte*, from *osteon*, 'a bone,' and *φυω*, 'I grow.' Under this name, Rokitansky describes a deposition of bony matter, found by him on the inner surface of the parietes of the skull of pregnant women.

OS'TEOPLASTY, (F.) *Ostéoplastie*, from *osteon*, 'a bone,' and *πλασσειν*, 'to form.' An operation by which the total or partial loss of a bone is remedied.

OSTEOPLEU'RA, *Pleurosto'sis*, from *osteon*, 'a bone,' and *πλευρον*, 'a rib.' Ossification of the cartilages of the ribs.

OSTEOPORO'SIS, *Osteosclero'sis*, from *osteon*, 'a bone,' and *πρωσις*, 'induration.' Induration of a bone, from the deposition of too much bony matter. Also, a bony degeneration, which consists in too great porosity with hardening. [?]

OSTEOPSATHYROSIS, *Fragilitas ossium*.

OSTEO-SARCO'MA, *Osteo-sarco'sis*, *Sarcosto'sis*, *Hæmatexosto'sis*, from *osteon*, 'bone,' and *σαρξ*,

σαρκος, 'flesh.' Disease of the bony tissue, which consists in softening of its laminae, and their transformation into a fleshy substance, analogous to that of cancer; accompanied with general symptoms of cancerous affection. The word has often, also, been used synonymously with *spina ventosa*.

OSTEOSARCOSIS, Osteosarcoma.

OSTEOSCLEROSIS, Osteoporosis.

OSTEOSIS, Ossification.

OSTEO-STEATO'MA, *Exosto'sis steatomato'-des*, from *οστέον*, 'a bone,' and *στέαρ*, *στεατος*, 'suet or fat.' A name given to bony tumours or degenerations, which sometimes belong to osteo-sarcoma; at others, to *spina ventosa*, *exostosis*, &c.

OSTÉOTOME; same etymon as Osteotomy. A bone saw, which has the form of a chain.—Nysten.

OSTEOT'OMIST, *Osteotomis'ta*. Same etymon as the next. An instrument, invented by Dr. D. Davis, for cutting the bones of the fetal cranium, where it becomes necessary to greatly reduce the size of the head in parturition.

OSTEOT'OMY, *Osteotom'ia*, from *οστέον*, 'a bone,' and *τεμνειν*, 'to cut,' (*τομή*, 'an incision.') The part of practical anatomy whose object is the dissection of bones.

OSTEOTOPHUS, Tophus.

OSTEOTYLUS, Callus.

OSTEULCUM, Bone-nippers.

OSTEUM, Bone.

OSTHAXIA, see Ossification.

OSTIARIUS, Pylorus.

OSTIOLUM, diminutive of *οστέον*, 'a mouth or opening.' A small door or gate.

OSTIOLA CORDIS, *Vai'vulæ cordis*, *Pellie'ulæ cordis*. The valves of the heart.

OSTITIS, Osteitis.

OSTIUM, *οστέον*, *Orific'ium*, a door or gate,—of the heart, for example. The opening—*Ostium atrioventriculæ'rè* seu *ventriculi veno'sum*—between the auricle and ventricle of each side. *Ostium ventriculi arterio'sum*, is the opening at the origin of the pulmonary artery and aorta.

OSTIUM ABDOMINALE, see Tube, Fallopiam—o. Arteriosum, see Ostium—o. Atrioventriculare, see Ostium—o. Duodenale ventriculi, Pylorus—o. Internum, see Ostium uteri—o. Esophageum, Cardia.

OSTIUM UTERI. The vulva; the vagina. The term *Ostium internum* has been applied to the inferior opening of the uterus, which establishes a free communication between the cavities of the body and neck, and which is often obliterated in old women.—Cruveilhier. The neck of the uterus; the mouth of the uterus. See Uterus.

OSTIUM UTERINUM, see Tube, Fallopiam—o. Venosum, see Ostium—o. Ventriculi Duodenale seu Pyloricum seu Dextrum seu Inferius, Pylorus.

OSTODES, Osseus.

OSTOIDEA SUBSTANTIA, see Tooth.

OSTOID, Osseous.

OSTOMA, Exostosis.

OSTOSIS, Ossification.

OSTREA, *Ostreum*, *οστρέον*, *οστρεϊον*, *Ostrea edulis*, (F.) *Huître*. Class, Cephalia. The oyster. The oyster is a wholesome article of diet, often advised as analeptic and easy of digestion.

The shells, *Testæ Ostreae*, *Testa* (Ph. U. S.), (F.) *Écailles d'huîtres*, have been received into the Pharmacopœias, and used medicinally. Their virtues are similar to those of the carbonate of lime. See Creta.

OSTREUM, Ostrea.

OSTRITES, Osteocolla.

OSTRUTHIUM, Imperatoria.

OSWEGO TEA, *Monarda coccinea*.

OSYRIS, *Antirrhinum linaria*.

OTACOUS'TIC, *Otacus'ticus*, from *οὐς*, *ωτός*,

'the ear,' and *ακουω*, 'I listen.' Any instrument is so called which improves the sense of hearing,—as the different species of trumpets.

OTAGRA, Otaglia.

OTAL'GIA, *Ot'agra*, *Otod'ynē*, *Otol'gy*, (F.) *Otaglie*, from *οὐς*, *ωτός*, 'the ear,' and *αλγος*, 'pain.' Pain in the ear; *Dolor aurium*, *Spas'mus aurium*, *Ear-ache*. See Otitis.

OTAL'GIC, *Otal'gicus*, (F.) *Otagique*. An epithet for remedies used in otalgia.

OTECBUS, Tinnitus aurium.

OTEMPLAS'TRUM, *Otoplas'ta*, *Otoplas'trum*, from *οὐς*, *ωτός*, and *εμπλαστρον*, 'a plaster. A plaster put behind the ears.

OTEN'CHYTES, *Oten'chyta*, from *οὐς*, *ωτός*, *εν*, 'into,' and *χωω*, 'I pour.' *Sipho auricula'ris*. A species of syringe, used for injecting the ear.

OTHELCO'SIS, from *οὐς*, *ωτός*, and *ελκωσις*, 'ulceration.' Ulceration or suppuration of the ear.

OTHONE, Linteam.

OTHONION, Linteam.

OTHYGROTES, Otitrhœa.

OTIATER, Aurist.

OTIATR'IA, *Otiat'rice*, from *οὐς*, *ωτός*, and *ιατρεια*, 'medicine.' The business of the aurist. The management of diseases of the ear; *Aural Medicine and Surgery*, *Ear Surgery*.

OTIATRICE, Otiatri.

OTIATRUS, Aurist.

O'TIC, *O'ticus*, (F.) *Otique*, from *οὐς*, *ωτός*. Belonging or relating to the ear. A medicine employed in diseases of the ear.

OTIC GANGLION, *Otogang'gium*, *Gang'lion auricula'rè* seu *oticum*, *Auric'ular ganglion*, *Ganglion of Arnold*, (F.) *Ganglion maxillo-tympanique*. This is a small ganglion, although more than double the size of the ophthalmic, ash-coloured and pulpy like the ganglions of the sympathetic. It is situate in advance of the ganglion of Gasser, on the lower surface of the inferior maxillary nerve, at the inner margin of the foramen ovale of the sphenoid bone. See Petrous ganglion.

OTIRRHŒ'A, *Otorrhœ'a*, *Othy'gotes*, *Blennotorrhœ'a*, (F.) *Catarrhe de l'Oreille*, from *οὐς*, *ωτός*, and *ρῶω*, 'I flow.' Discharge of a purulent or puriform liquid, from the meatus auditorius externus, *Pyorrhœ'a aurium*, *Otopyorrhœ'a*, *Pyatorrhœ'a*, *Otorrhœ'a purulen'ta*. It is a symptom of chronic otitis. Some authors, have, indeed, used the term synonymously with chronic otitis. When it extends to the brain, it is termed *cerebral otorrhœ'a*; and when from the middle or internal ear, it is termed *internal otorrhœ'a*, *Otorrhœ'a interna*, and *Entororrhœ'a*.

OTIRRHŒA CEREBRAL, see Otitrhœa.

OTITES, see Digitus.

OTI'TIS, *Otophleg'monē*, *Empres'ma otitis*, *Inflammat'io auris*, *Inflammation of the ear*, (F.) *Otite*, *Inflammation de l'oreille*, from *οὐς*, *ωτός*, and *itis*, denoting inflammation. Inflammation of the mucous membrane of the ear, characterized by excruciating pain; intolerable humming in the ear, with a discharge of mucus generally from the meatus externus or from the Eustachian tube. When the inflammation is restricted to the lining membrane of the meatus, it is termed *otitis catarrhalis*. Otitis is divided into *external* and *internal*, according as it affects the meatus auditorius, or the cavity of the tympanum or internal ear. It may be *acute* or *chronic*. *Acute otitis* commonly terminates in a few days in a favourable manner, with the aid of antiphlogistics. *Chronic otitis*, *otirrœ'a*, is almost always accompanied by a purulent discharge from the meatus auditorius. It is often incurable, and may ultimately give occasion to disease of the internal ear, and even of the brain.

OTITIS CATARRHALIS, see Otitis.

O'TIUM, *Ota'rium*, from *ous*, *otos*. A small ear. The auricle or pavilion of the ear.

OTOCEPH'ALUS, *Monot'ia*, from *ous*, *otos*, and *κεφαλη*, 'head.' A monster, whose ears are in contact, or united into one.

OTOCONIES, see *Otolithi*.

OTODYNE, *Otalgia*.

OTOGLYPHIS, *Earpick*.

OTOGLYPHUM, *Earpick*.

OTOG'RAPHY, *Otogra'phia*, from *ous*, *otos*, and *γραφη*, 'a description.' The part of anatomy which describes the ear.

OT'OLITHS, *Otol'ithi*, *O'tolites*, (F.) *Otolithes*, from *ous*, *otos*, and *λιθος*, 'a stone.' White calcareous substances contained in the membranous vestibule, and seeming to be suspended in the fluid of the vestibule by means of a number of nervous filaments proceeding from the auditory nerve. Their universal presence in the ear of the mammalia would seem to show that they are inservient to audition. When of a looser consistency, they are called *Otocon'ia*, (F.) *Otoconies*, from *ous*, *ωτος*, 'the ear,' and *κονια*, 'dust.'

OTOL'OGY, *Otolog'ia*, from *ous*, *otos*, and *λογος*, 'a discourse.' The part of anatomy which treats of the ear. An anatomical treatise on the ear.

OTOPATHEMA, *Otopathy*.

OTOP'ATHY, *Otopath'ia*, *Otopathe'ma*, from *ous*, *otos*, and *παθος*, 'a disease.' A diseased condition of the ear.

OTOPHLEGMONE, *Otitis*.

OTOPLASTA, *Otemplastrum*.

OTOPLASTICE, *O'toplasty*, from *ous*, *otos*, and *πλαστικός*, 'forming.' The operation for restoring a lost ear.

OTOPLASTRUM, *Otemplastrum*.

OTOPYORRHEA, *Otirrheea*.

OTORRHAG'IA, from *ous*, *otos*, and *ραγη*, 'rupture.' Bleeding from the ear or ears.

OTORRHEUMATIS'MUS, from *ous*, *otos*, and *ρευματισμος*, 'rheumatism;' *Otal'gia rheumatica*. Rheumatic ear-ache.

OTORRHEA, *Otirrheea*—o. Cerebral, see *Otirrheea*—o. Interna, see *Otirrheea*—o. Purulenta, *Otirrheea*.

O'TOSCOPE, *Otoscop'ium*, from *ous*, *otos*, and *σκοπη*, 'examination.' An instrument for examining the condition of the ear. An elastic stethoscope, the ends of which are tipped with ivory—one to be inserted into the meatus of the patient, and the other applied to the ear of the examiner.

OTOT'OMY, *Ototom'ia*, from *ous*, *otos*, and *τεμνειν*, 'to cut.' The part of practical anatomy which teaches the mode of dissecting and preparing the ear.

OTTO OF ROSES, see *Rosa centifolia*.

OUACHITA SPRINGS, see *Arkansas*, mineral waters of.

OUIE, *Audition*.

OULA, *Gingivæ*.

OULE, *Cicatrix*.

OULITIS, *Ulitis*.

OULORRHAGIA, *Ulorrhagia*.

OUNCE, *Un'cia*. A weight equal to the 16th part of a pound avoirdupois, the 12th of a pound troy. It is composed of 8 drachms. See *Weights and Measures*.

OURAQUE, *Urachus*.

OURARI, *Curare*.

UREMA, *Urine*.

URLES, *Parotis*, *Cynanche parotidæa*.

OURON, *Urine*.

OUS, genitive *otos*, *ous*, *ωτος*, *Ear*.

OUTHAR, *Mamma*, *Uterus*.

OUTRE-MER, *Lapis lazuli*.

OUVERTURE CADAVERIQUE, *Autopsia cadaverica*.

OVA GRAAFIANA, *Folliculi Graafiani*—o. *Nabothi*, *Nabothi glandulæ*.

OVAIRE, *Ovarium*.

OVAL, *Ova'lis*, *Ob'des*, *Ov'des*, *Ova'tus*, (F.) *Ovale*, from *ovum*, *ovum*, 'an egg.' Egg-shaped; elliptic. That which is round and oblong like an egg.

OVALÈ FORA'MEN, *Foramen oï'des*, (F.) *Trou ovale*. The foramen obturatorium; also, the foramen in the inner paries of the middle ear, which opens into the vestibule; the foramen in the sphenoid bone, through which the third branch of the fifth pair issues from the cranium; and the aperture, in the fetus, between the auricles of the heart. See *Botal Foramen*.

OVALIS FOSSA, *Fovea ova'lis*, *Val'vula seu Vestig'ium Foram'nis ovalis*, is a depression observed in the right auricle of the heart, in the septum, which separates it from the left auricle. It has thick and strong edges, at its upper and fore part, called *Colum'næ foram'nis ova'lis*, *Isthmus seu An'nulus Vieussè'nii*, *An'nulus seu Limbus fossæ ovalis*: in the fetus called *An'nulus foram'nis seu fossæ ova'lis*. The fossa ovalis, in the adult, replaces the inter-auricular aperture in the septum auricularum of the fetus.

OVALBUMEN, *Albumen ovi*.

OVARIAN, *Ova'ria*, *Ovarianus*, (F.) *Ovarien*, *Ovarique*; from *ovarium*, *ωαριον*, 'the ovary.' Relating or belonging to the ovary—as *Ovarian pregnancy*.

OVARIAN ARTERY, *Spermatic artery*—o. *Nerves*, *Spermatic plexus of nerves*—o. *Pregnancy*, see *Pregnancy*, *ovarian*—o. *Veins*, *Spermatic veins*—o. *Vesicles*, *Folliculi Graafiani*.

OVARIOTOMY, *Oariotomy*.

OVARISTES, *Ovists*. Same etymon as *Ovarian*. Those physiologists who think that the phenomena of generation, in the human species and in every species of animal, result from the development of the ova or ovula of the female, merely incited by the male. Not many of the physiologists of the present day can be classed among the ovarists.

OVARITIS, *Oaritis*.

OVARIIUM. Diminutive of *ovum*, *orum*, 'an egg.' The *Ovary*, (Sc.) *Eggbed*; *Testis muliebris seu femineus*, *Oa'ricum*, *Ooph'oron*, *Gynoa'rium*, *Vesica'rium*, (F.) *Ovaire*. The ovaries are the organs in which the ova are formed in oviparous animals. By analogy, the name has been given to the organs which the ancients called the *testicles* of the female. They are two ovoid bodies, almost as large as the testicles in men, placed on each side of the uterus, between the Fallopian tube and round ligament, and in the substance of the broad ligament. Their outer extremity gives attachment to one of the projections of the fimbriated extremity of the Fallopian tube; and the internal is fixed to the uterus by a small ligamentous cord, called *Ligamentum rotundum ova'rii*, *Ligament of the Ovary*. The ovaries are composed of a very close, spongy texture—*stroma*,—and of small vesicles—*Folliculi Graafiani*,—filled with a clear fluid: these vesicles contain ovules, which detach themselves from the ovarium before and after fecundation, and are carried into the cavity of the uterus by the Fallopian tube.

OVARIUM TUMDUM, *Oarioncus*—o. *Nabothi*, *Nabothi glandulæ*.

OVATUS, *Oval*.

OVER-EATING, *COLIC FROM*, *Colica crampulosa*.

OVERO BUTUA, *Pareira brava*.

OVICAPSULE, see *Folliculi Graafiani*.

OVIDUCT, *Tube*, *Fallopian*.

OVIDUCTUS MULIEBRIS, *Tuba Fallopiana*.

OVIG'EROUS, *Oviger*, *Ovig'erus*; from

ovum, 'an egg,' and *gero*, 'I bear.' Containing or producing ova or eggs.

OVIPARITÉ, see Oviparous.

OVIP'AROUS, *Ovip'arus*, (F.) *Ovipare*; from *ovum*, 'an egg,' and *pario*, 'I bring forth.' An epithet applied to animals which are hatched from eggs outside of the body. The condition may be termed *Ovip'arousness*, (F.) *Oviparité*. See Generation.

OVIPAROUSNESS, see Oviparous.

OVISAC, see Folliculi Graafiani — o. Tunic of the, see Folliculi Graafiani.

OVISTS, Ovarists.

OVOLOGY, Oologia.

OVO-VIVIP'AROUS, (F.) *Ovo-vivipare*, from *ovum*, 'an egg,' *vivus*, 'living,' and *pario*, 'I bring forth.' Oviparous animals, whose ova are hatched within the mother,—vipers, for example. See Generation.

OVULA GRAAFIANA, Folliculi Graafiani — o. Nabothi, Nabothi glandulæ.

O'VULAR, *Ovula'ris*; from *ovulum*, 'an ovule.' Relating or belonging to the ovule.

OVULA'TION; from *ovulum*, diminutive of *ovum*, 'an egg.' The formation of ova in the ovary, and the discharge of the same. Also, the development of the embryo from the egg.

SPONTANEOUS OVULATION, (F.) *Ovulation spontanéè*, is the spontaneous formation and discharge of ova which takes place in the female of the mammalia. See Heat.

OVULE, Ovulum.

OVULINE, *Decidua reflexa*.

O'VULUM, *O'vule*; diminutive of *ovum*, 'an egg.' A small egg. That which has the appearance of a small egg. See Ovum.

OVUM, *ovv*, *Ovū*, an egg. The eggs of poultry are chiefly used as food. The different parts are, likewise, employed in medicine. The shell, *Aurancum*, *Aurantum*, (F.) *Coque* ou *Coquille d'œuf*, calcined, is esteemed an absorbent. The *Oil of the egg* is emollient, and is used, externally, to burns and chaps. The *Yolk or Yelk of the egg* — *Vitel'lum* seu *Vitel'lus ovi*, *Lec'ithos* — renders oils, &c., miscible with water. Eggs, when light boiled, are easy of digestion; but, when very hard-boiled or fried, they are more rebellious.

Egg Brandy is made by taking of *Brandy* f $\frac{3}{4}$ iv; *Cinnamon water*, f $\frac{3}{4}$ iv; the yolks of two eggs; *Sugar*, $\frac{3}{4}$ ss; and *Oil of cinnamon*, gtt. ij. Mix the yolks of the eggs first with the water, the oil and the sugar, stirring constantly. Then add the brandy little and little, until a smooth fluid is formed. It is an agreeable mode of giving brandy in adynamic states.

In *Pharmacy*, *white of egg*, which consists chiefly of albumen, is used for clarifying syrups, &c. *Yolk of egg*, (F.) *Jaune d'œuf*, beaten up with warm water and sugar, and aromatized with orange-flower water, forms an emulsion, which is emollient, and known under the name *Lait de poule* or *chicken's milk*.

Anatomists give the name *Ova*, *O'vula*, *O'vules*, (F.) *œufs*, to round vesicles, containing a humour similar to the yolk of egg, which are situate in the ovaries of the female, and, when fecundated, constitute the rudiments of the foetus. During gestation, the embryo and its enveloping membranes retain the name *Ovum*, (F.) *œuf*. The changes induced in the mammalia after impregnation greatly resemble those in the bird.

OVUM, Testicle — o. Hystericum, see *Clavus hystericus*.

OXALAS SUBPOTASSICUS, Potass, oxalate of.

OXALAT'IC, *Oxalat'icus*. Relating to oxalates: hence *Oxalat'ic* or *Oxalic acid Diath'esis*

is the habit of body which favours the formation and deposition of oxalates from the urine.

OXAL'IC ACID, *Acidum oxali'num* seu *sacchari'num* seu *hydro-carboni'cum* seu *acetosel'la*, seu *oxal'icum* seu *sac'chari*, *Acid of sugar or of sorrel*, *Car'bonous acid*, from *ὄζαλις*, 'sorrel.' An acid found in sorrel. It crystallizes in long, colourless, quadrangular prisms, and is generally found, in nature, united with lime or potassa. It has been proposed, in a diluted state, as a refrigerant, but it is unnecessary; and, besides, in quantity, it is a virulently acrid poison. It is largely employed for cleaning boot-tops; and, as it strongly resembles the sulphate of magnesia, has often been taken for it. Several fatal cases are, indeed, on record. For its antidotes, &c., see Poison.

OXALIC ACID DIATHESIS, see Oxalatic.

OXALIDE, *Oxalis acetosella*.

OXALIS ACETOSA, *Rumex acetosus*.

OX'ALIS ACETOSEL'LA, *O. Americana*, *Oxys alba*, called from *ὄζυς*, 'acid,' owing to the sharpness of its juice. This systematic name of the *Woodsorrel*, *Cuckoobread*, *Sour Trefoil*, *White sorrel*, *Mountain Sorrel*, *Trifo'lium acetosum*, *Oxitriphy'llum*, *Lujula*, *Allelu'ja*, *Acetosel'la*, *Oxyphy'llon*, *Oxytriphy'llon*, *Panis cu'culi*, (F.) *Suelle*, *Oxalide*, *Pain a Coucou*, *Alleluia*. Ord. Oxalidacææ. Ser. Syst. Decandria Decagynia. This plant has a gratefully acid taste, and is used in salads. It has been esteemed refrigerant, antiscorbatic, and diuretic.

OXALIS AMERICANA, *O. acetosella*.

OXALIS STRICTA, *Yellow wood sorrel*; indigestion, has similar virtues.

OXALIS TUBEROSA, *Oca*. A tuberous plant, whose oval-shaped root is used as food by the Peruvians. It is watery, has a sweetish taste, and is much liked.

OXALIUM, Potass, oxalate of.

OXAL'MĒ, from *ὄζυς*, 'acid,' and *ἄλις*, 'salt.' A mixture of vinegar and salt.

OXALU'RIA, Urine, oxalic.

OXELĒ'ON, from *ὄζυς*, 'acid,' and *ελαιον*, 'oil.' A mixture of vinegar and oil, used as a condiment.

OX EYE, *Helenium autumnale* — o. Gall, Bile of the ox.

OXĒOLĒ, *Acétolé*.

OXICĒDRE, *Juniperus oxycedrus*.

OXID, Oxyd.

OXIDATION, Oxydation.

OXIDE, Oxyd.

OXIDUM, Oxyd, see Oxydum.

OXI'NES, *ὄζινος*, (*ovinos*), (F.) from *ὄζυς*, 'acid.' Wine already sour, but not yet vinegar.

OXITRIPHYLLUM, *Oxalis acetosella*.

OXODE, Oxyd.

OXODES, Acidulous.

OXOIDES, Acidulous.

OXOS, *Aceticum acidum*, Acetum.

OXTER, Axilla.

OXURE, Oxyd.

OXYA, *Fagus sylvatica*.

OXYACANTHA, *Mespilus oxyacantha*.

OXYACANTHA GALE'NI, *Berberis*, *B. vulgaris*, *Spina ac'ida*, *Crespinus*, (F.) *Épine vinette*, *Vinettier*. Family, Berberideæ. Ser. Syst. Hexandria Monogynia. The *Barberry*. The fruit of the berries, *Berberries*, is gratefully acid, and moderately astringent. By preparing an alcoholic extract of the root and adding water to it, a pulverulent brown substance is thrown down, which, when dissolved in alcohol and evaporated, yields the bitter principle, *Berberin*, which is an excellent stomachic in the dose of 2, 5, or 10 grains.

The American Barberry, *Berberis Canaden'*

sis, Piperidge Bush, Sowberry, differs slightly from the European. It flourishes on mountains and hilly districts from Canada to Virginia.

OXYÆSTHESIA, Hyperæsthesis.

OXYAPHE, Hyperaphia.

OXYAPHIA, Hyperaphia.

OXYBAPHION, see Acetabulum.

OXYBOL'IA, from *ὄξυς*, 'quick,' and *βολή*, 'ejection.' Too rapid emission of sperm.

OXYCEDRE, Juniperus oxycedrus.

OXYCEPHA'LIA, 'Sugar-loaf head,' from *ὄξυς*, 'sharp,' and *κεφαλή*, 'head.' Monstrosity in which the head is peaked like a sugar-loaf.

OXYCOCCOS, Vaccinium oxycoccos — o. Palustris, Vaccinium oxycoccos.

OXYCRATE, *Oxyeratium*, from *ὄξυς*, 'acid,' and *κράω*, 'I mix;' *Posca, Phusca*. A mixture of vinegar and water; frequently used in medicine as a refrigerant and antiseptic.

OXYCLO'CEUM EMPLASTRUM, from *ὄξυς*, 'acid,' and *κροκος*, 'saffron.' A plaster, composed of saffron, pitch, colophony, yellow wax, turpentine, galbanum, gum ammoniac, myrrh, olibanum, and mastic. It was employed as a strengthening plaster.

OXYCUM, Oxygen.

OXYD, *Oxid, Oxide, Oxyde, Ox'ydum, Ox'idum*, (F.) *Oxyde, Oxide, Oxure*, from *ὄξυς*, 'acid.' A combination, not acid, of a simple body with oxygen.

OXYD, CALCULOUS, Oxyd, cystic — o. Vesical, Oxyd, cystic.

OXYD, CYSTIC, *Cal'culous* or *Ves'ical oxyd, Cystine, Nephrine, Scor'dosmine*. A species of urinary calculus, having the shape of confused, yellowish, semi-transparent, insipid, very hard crystals. When distilled, it furnishes subcarbonate of ammonia, like all nitrogenized matters. It dissolves in the nitric, sulphuric, phosphoric, and oxalic acids.

OXYDA'TION, *Oxyda'tio, Oxida'tion, Oxygenation*. The action of oxidizing a body; that is, of combining it with oxygen; a combination from which results an oxyd.

OXYDE, Oxyd.

OXYDE D'ANTIMOINE SULFURÉ, *Oxydum stibii sulphuratum* — o. *Gris* or *noir de Mercure*, see Hydrargyri oxydum cinereum.

OXYDER'CIA, *Oxydor'cia, Visus a'cies*, from *ὄξυς*, 'quick,' and *ὄραω*, 'I see.' Sharpness of vision.

OXYDER'VICUS, *Oxyder'ces*. A medicine which sharpens the sight.

OXYDORCIA, Oxydercia.

OXYDUM, Oxid — o. Antimonii cum phosphate calcis, Antimonial powder.

OXYDUM FERRI NIGRUM, *Ferri ox'idum nigrum, Black oxyd of iron*. The scales, which fall from iron, when heated, consist of iron, combined with oxygen. They have been used like the chalybeates in general. The Edinburgh Pharmacopœia has a *Ferri ox'idum nigrum*, made by precipitating, by ammonia, a solution of the mixed sulphates of protozide and sesquioxide of iron. An analogous preparation is in the Dublin Pharmacopœia, under the name *Ferri ox'ydum magneticum, Magnetic oxide of iron, Mart'ial Ethiops*.

OXYDUM FERRICUM CRYSTALLIZATUM NATIVUM, *Hæmatites* — o. Hydrargyri completum, Hydrargyri nitrico-oxydum — o. Hydrargyricum, Hydrargyri nitrico-oxydum — o. Hydrargyricum præparatum, Hydrargyri oxydum cinereum — o. Hydrargyrosium, Hydrargyri oxydum cinereum.

OXYDUM STIBII SULPHURATUM, *Hepar antimoni'i, Cro'cus metallo'rum seu antimoni'i*, (F.) *Oxyde d'antimoine sulfuré, Foie d'Antimoine*. This was formerly exhibited in the cure of fevers, but it is now rarely employed.

OXYDUM URICUM, Uric oxide.

OXYECOIA, Hyperacuis.

OXYG'ALA, from *ὄξυς*, 'sour,' and *γάλα*, 'milk.' Sour milk. The *Oxygala equi'muni, Caracas' mos*, is reckoned amongst the delicacies of the Tartars.

OXYG'ARON, from *ὄξυς*, 'acid,' and *γαρον*, 'garum.' A composition of garum and vinegar.

OXY'YGENE, *Oxygen'ium, Emphy'real, Pure, Vital* or *Dephlogis'ticated air, Oxyg'enes, Ox'ygum, Princip'ium oxyg'eanus* seu *oxygenet'icum* seu *acidif'icans* seu *ac'id'idum, Elementum acidif'icum*, (F.) *Oxygène, Air du feu*; from *ὄξυς*, 'acid,' and *γενναω*, 'I engender,' that is, *generator of acids*; and such it was believed to be, *exclusively*, at the period when the name was given to it. This is now known not to be the case. Oxygen is largely distributed in nature. It exists in the air, in water, in several acids, in all the oxyds, and in vegetable and animal substances, &c. It is obtained by decomposing the peroxyd of manganese or the chlorate of potassa by heat in close vessels. Although oxygen, in the state of admixture in which it is found in the atmosphere, is of vital importance, it cannot be respired in a pure state with impunity. Animals die in it long before the whole of the oxygen is consumed. The properties of oxygen seem to be stimulant. It increases the force and velocity of the pulse, and has, accordingly, been used in cases of chronic debility, chlorosis, asthma, scrofula, dropsy, paralysis, &c. It requires to be diluted with from 10 to 20 parts of atmospheric air; one to two quarts being given during the day.

OXYGENATION, Oxidation.

OXYGÈNE, Oxygen.

OXYGÈNESES. A name given by Baumes to diseases which he attributed to disordered oxygenation.

OXYGEUSIA, Hypergeusia.

OXYG'LICUS, *Oxyg'lices*, from *ὄξυς*, 'acid,' and *γλυκός*, 'sweet;' *Mulsa acida, Acetum nulum dulce*. Prepared by macerating and boiling honey-comb (from which the greater part of the honey has been taken) in water, and adding vinegar. An *Oxymel*.

OXY-HYDRO-CARBURETUM EX OLEO PYROXYLICO PARATUM, Creasote.

OXYLAPATHUM, Rumex acutus.

OXYMEL, *Apom'eli, Mel acetatum*, (F.) *Acetomel*, from *ὄξυς*, 'acid,' and *μελί*, 'honey.' Honey and vinegar boiled to a syrupy consistence. (*Mel despumat. lbj, acid. acetic. ℥vij, aq. destillat. f℥viij*. Add the acid to the water and mix them with the honey previously heated.—Ph. L.) It is cooling; — externally detergent.

OXYMEL ÆRUGINIS, Linimentum Æruginis.

OXYMEL COL'CHICI, *O. of meadow saffron*, (F.) *Oxymel colchiqué*. (*Rad. colch. recent. in laminas tenues sectæ ℥j, acet. destillati lbj, mellis despumat. pond. lbj*. Macerate in a gentle heat for 48 hours. Press and boil the liquor with the honey to the thickness of a syrup; stirring with a wooden spoon. Ph. D.) It is expectorant and diuretic. Dose, f℥j, in gruel.

OXYMEL COLCHIQUE, *O. colchici* — o. of Meadow saffron, *O. colchici*.

OXYMEL SCILLE, *O. of squills, O. Scillicit'icum, Mel scilla*. (*Mellis despumat. Oiss, acet. scilla, Oij*. Boil in a glass vessel over a gentle fire to a proper consistence. Ph. U. S.) It is reputed to be expectorant and diuretic. Dose, f℥j to f℥ij.

OXYMEL OF SQUILL, *O. scilla*.

OXYMYRRHINE, Ruscus.

OXYMYRSINE, Ruscus.

OXYNGLIUM, Adeps suillus.

OXYNI'TRON, from *ὄξυς*, 'acid,' and *νιτρον*, 'nitre.' Name of a plaster, composed chiefly of vinegar and nitre, and recommended by Aëtius.

OXYNOSEMA, Acute disease.

OXYNOSOS, Acute disease.
 OXYNUSOS, Acute disease.
 OXYOPIA, *Galero'pia*, *Hyperop'sia*, *Suff'isio excludans*, *Acies visus*, from *οξυς*, 'quick,' and *ωψ*, 'sight.' Excessive acuteness of the sense of sight. Instances have occurred where persons could see the stars in the day time. The cause is seated in great sensibility of the retina. The term has been used synonymously with nyctalopia.

OXYOSPHERE'SIA, *Oxyosphra'sia*, from *οξυς*, 'acute,' and *οσφρησις*, 'smell.' Excessive acuteness of the sense of smell.

OXYPHLEGMA'SIA, *οξυφλεγμασια*, (*οξυς*, 'acute,' and *φλεγμασια*), *Acuta et ve'hemens inflammatio*. A violent inflammation.

OXYPHENICON, Tamarindus.

OXYPHONIA, *Vox acuta*; from *οξυς*, 'sharp,' and *φωνη*, 'voice'; *Paraphonia clangens* seu *ulcerosa*, *Clangor*, *Vox clangosa*, *Leptophonia*. A shrill and squalling voice,—frequently, a symptom of morbid affection of the larynx.

OXYPHYLLON, *Oxalis acetosella*.

OXYPODIA, see *Kylosis*.

OXYPROTEIN, see *Corium phlogisticum*.

OXYREG'MIA, *Ructus ac'idus*, from *οξυς*, 'sour,' and *ερευνω*, 'I belch.' Acid eructation.

OXYRIA RENIFORM'IS, *Rumex dig'ynus*, *Boreal sourdock*, *Mountain Sorrel*, *Welsh sorrel*. A plant, *Ord. Polyganaceæ*, *Sex. Syst. Diandria Digynia*, which grows in the northern parts of America and Europe; blossoming in the spring. It possesses the same properties as *Oxalis acetosella*.

OXYRRHOD'INON, *Acetum rosatum*, from *οξυς*, 'acid,' and *ροδον*, 'a rose.' A composition of vinegar and roses. (*Ol. rosat.* ζ ij, *acet. rosat.* ζ ij.) Used as a liniment in herpes and erysipelas.

OXYS, Acid, Acute — o. *Alba*, *Oxalis acetosella*.

OXYSACHARUM, from *οξυς*, 'acid,' and *σακχαρον*, 'sugar.' A mixture of sugar and vinegar. It was called *Oxysaccharum vomitivum*, when it held in solution the glass of antimony; and *Oxysaccharum scilliticum*, when it contained squills.

OXYSAL DIAPHORET'ICUM AN'GELI SALÆ. A preparation of Angelo Sala. Acetate of potass exposed to the atmosphere; and consequently fallen into a state of deliquium.—Orfila.

OXYTARTARUS, *Potassæ acetas*.

OXYTES, Acidities.

OXYTOC'IA. Same etymon as the next. Rapidity of parturition.

OXYTOC'IC, *Oxytocus*, from *οξυς*, 'quick,' and *τικτω*, 'I bring forth.' A medicine which promotes delivery.

OXYTRIPHYLLON, *Oxalis acetosella*.

OXYURE VERMICULAIRE, *Ascaris vermicularis*.

OXYURIS VERMICULARIS, *Ascaris vermicularis*.

OYSTER GREEN, *Ulva latissima* — o. Root, *Tragopogon* — o. Shells, *Ostreæ testæ* — o. Prepared, *Testa præparata*.

OZÆNA, *Coryza enton'ica* seu *purulen'ta* seu *ozæno'sa* seu *ulcero'sa* seu *virulen'ta* seu *maligna*, *Pyorrhœa nasalis*, *Entozæ'na*, *Rhinitis ulcerosa*, *Ulcus narium fetens*, from *οζω*, 'I smell of something.' (F.) *Ozène*, *Punaisic*. An affection of the pituitary membrane, which gives occasion to a disagreeable odour similar to that of a crushed bed-bug; hence the name *Punais*, by which the French designate one labouring under *ozæna*. It is, sometimes, owing to caries of the bones; but is, perhaps, most frequently dependent upon syphilitic ulceration of the pituitary membrane, with or without caries of the bones of the nose.

OZÆNA BENIGNA, *Coryza*, chronic.

OZE, Breath, offensive.

OZEMUN, Albumen.

OZËNE, *Ozæna*.

OZONE: same etymon as *Ozæna*. The powerfully odorous matter produced when a current of ordinary electricity passes from pointed bodies into the air.—Schönbein. It is presumed to be a peculiar modification of oxygen; and its varying quantity in the atmosphere is supposed to affect the health of man.

Air containing ozone is said to be *ozonized*.

P.

P. A contraction of *Pugillus*.
 P. Æ. A contraction of *Partes æquales*.
 P. P. A contraction of *Pulvis patrum*.

See Abbreviation.

PAB'ULUM, *Trophæ*, *Phorbē*, *Alimentum*, *Nutrimētum*. Food, aliment. The animal heat and animal spirits—unmeaning terms—were formerly considered the *Pabulum vitæ*.

PACAY, *Prosopis dulcis*.

PACCHIO'NI, GLANDS OF, *Pacchio'nian Bodies*, *Glandulæ Duræ Matris* seu *duræ Menin'gis*, *Tubercula parva* seu *Cor'pora glandifor'mia duræ matris*. (F.) *Glandes de Pacchioni*, *Granulationes cérébrales*. Small, whitish, or yellowish bodies, sometimes separate, at others united like a bunch of grapes, which are observed in several parts of the dura and pia mater. They receive vessels, but apparently no nerves. Their texture and uses are unknown. A considerable number is observed in the longitudinal sinus, covered by the internal membrane.

PACHË'MIA, *Pachyæ'mia*, *Pachæ'ma*, *Pachyæ'ma*, from *παχυς*, 'thick,' and *αιμα*, 'blood.' Too great thickness of the blood.

PACHEABLEPHARO'SIS, *Pacheableph'ara*, *Pachybleph'aron*, *Pachyblepharosis*, *Pachy'tes*, from *παχυς*, 'thick,' and *βλεφαρον*, 'an eyelid.' A name given, by some authors, to a thickening of the eyelids, produced by tubercles or excrescences formed on their margins. It is the same affection as that which Sauvages designates *Culi'go à Pacheablepharosi*.

PACHETOS, see *Laqueus*.

PACHULOSIS, *Pachylosis*.

PACHYÆMIA, *Pachæmia*.

PACHYBLEPHARON, *Pacheablepharosis*.

PACHYCHOL'IA, from *παχυς*, 'thick,' and *χολη*, 'bile.' Morbid thickness of the bile.

PACHYDERMATOCELĒ, from *παχυς*, 'thick,' *δερμα*, *δερματος*, 'skin,' and *κηλη*, 'a tumour.' A disease of the dermoid tissue, apparently congenital, which increases from a small mole or

spot, at times to the size and appearance of a relaxed and very emaciated mamma.—V. Mott.

PACHYLO'SIS, *Pachulo'sis*, from *παχυσ*, 'thick.' An inordinate production of the epidermis dependent upon hypertrophy of the papillæ of the skin.—E. Wilson.

PACHYNSIS, Polysarcia adiposa.

PACHYNTICA, Incrassantia.

PACHYSMUS, Polysarcia adiposa.

PACHYTES, Pacheablepharosis.

PACINIAN CORPUSCLES, see Corpuscles.

PACKING, OF THE HYDROPATHISTS;

Émaillotage.

PACKWAX, see Nucha.

PAD, (S.) *Pajado*, from *paja*, 'straw' [?]; *Plumaceolus*, *Pulvin'ulus*, *Pulvin'ulus*, *Parvum pulvin'ar*;—a cushion, a little cushion; a junk; (F.) *Coussinet*. A small bag, filled with feathers, wool, hair, bran, chaff, &c. It is used to compress or support parts. In the treatment of certain fractures, soft pads or cushions, called by the French *Remplissages*, are placed between the splints and the fractured limb, in order that the prominent parts may not be chafed by the splints.

PADDIE, see Oryza.

PADDY, see Oryza.

PADNOON, Bit noben.

PAD'UA, MINERAL WATERS OF. Near Padua, in Italy, there are several thermal sulphureous springs, the hottest of which is 188° Fahr. The chief establishments are Abano, Battaglia, and Montegrotto.

PADUS, *Prunus padus*—p. *Avium*, *Prunus padus*—p. *Lauro-cerasus*, *Prunus lauro-cerasus*.

PÆDAN'CHONÈ, from *παις*, *παῖδος*, 'a child,' and *αγγω*, 'I strangle'; *Ang'na Sicca*. Name of a fatal species of cyanche, mentioned by M. A. Severinus; probably the *Cyanche Trachealis*, or *Cyanche Maliqna*.

PÆDARTHROCACE, *Spina ventosa*.

PÆDATROPH'IA, *Atrophia infantilis*, *Mars'mus lactan'tium*, from *παις*, *παῖδος*, 'a child,' a, privative, and *τροφη*, 'nourishment.' Atrophy of children. *Tabes mesenterica*.

PÆDATROPHIA GLANDULOSA, *Scrofula*.

PÆDERAS'TIA, *Pædogo'gium*, *Pædicat'io*, *Cinæ'dia*, from *παις*, *παῖδος*, 'a boy,' and *ερωσ*, 'love.' The love of boys. A disgraceful passion, common in ancient times, but now unknown. These terms are likewise applied to the crime of sodomy.

PÆDEROTA VIRGINICA, *Leptandra virginica*.

PÆDENCÉPHALIE, *Hydrocephalus internus*.

PÆD'IA, *παῖδεια*, *Educat'io infantum*. The bringing up or education—physical as well as moral—of children.

PÆDIATR'IA, *Pædiat'rica*, *Pædiat'rics*, from *παις*, *παῖδος*, 'a child,' and *ιατρεια*, 'medical management.' Treatment of the diseases of children.

PÆDICATIO, *Pæderastia*.

PÆDICTERUS, *Icterus infantum*.

PÆDOBAROMACROMETER, *Baromacrometer*.

PÆDOGOGIUM, *Pæderastia*.

PÆDOMETER, *Baromacrometer*.

PÆDON'OSUS, from *παις*, *παῖδος*, 'a child,' and *νοσος*, 'disease.' A disease of childhood.

PÆDOPHLEBOTOM'IA, from *παις*, *παῖδος*, 'a child,' *φλεψ*, 'a vein,' and *τομη*, 'incision.' *Venæsect'io puero'rum*. Bleeding performed on children.

PÆDOTRIBES, *Min'ister Gymnas'tæ*, from *παις*, *παῖδος*, 'a child,' and *τριβω*, 'I train.' In ancient gymnastics, the officer acquainted with all the prescribed exercises, and who carried them into effect, according to the direction of the superior.

PÆDOTR'OPHY, *Pædotroph'ia*, (F.) *Pædotrophie*, from *παις*, *παῖδος*, 'a child,' and *τροφη*, 'nourishment.' The part of hygiene, which concerns the nourishment of children.

PÆON, Physician.

PÆON'IA, *P. officina'lis* seu *mas'cula* seu *nemora'lis* seu *fem'ina* seu *loba'ta*, *Glycis'idè*, *Hæmag'o'gum*, *Pe'ony*, or *Pi'ony*, male and female. (F.) *Pivoine*, *Pione*, *Herbe Sainte-Rose*. From *Παιων*, 'the god of physic.' The root, flowers, and seeds were long esteemed powerful medicines. They are feebly astringent, and have been considered to be narcotic and antispasmodic. They have been given, particularly, in *intermittens* and epilepsy, but are not now used. *f. s.* flowers are called *Rosæ benedict'æ*, *R. re'giæ*.

PÆONICE, Medicine.

PÆONICUS, Medical.

PÆONIUS, Medical.

PÆOSYNE, Medicine

PAGAPOPLEX'IA, from *παγειν*, 'to nail fast,' and *αποληξια*, 'apoplexy.' Apoplexy from cold.

PAGOS, Peritonæum.

PALDIA, Infancy.

PAIDION, Infans.

PAIGIL, *Primula veris*.

PAIN, (old F.) *painer*, 'to torment;' Sax. *pinan*, 'to torture.' *Dolor*, *Algos*, *Alge'ma*, *Alge'do*, *Alge'sis*, *Od'ynè*, *Ache*, (Sc.) *Hachse*, (Prov.) *Crazy*, *Wark*, (F.) *Douleur*. A disagreeable sensation, which scarcely admits of definition. It is generally symptomatic, and is called *acute*, (F.) *aiguè*, when very violent, as a *twinge*; *pungent*, (F.) *pongitive*, when it resembles that which would be produced by a sharp instrument run into the part: *heavy*, (F.) *gravative*, when attended with a sensation of weight; *tensive*, when the part seems distended: *lan'cinating*, when occurring in shoots: *lac'èrating* or *tearing*, when the part seems to be tearing: *burning*, (F.) *brûlante*, when resembling that produced by a burn, &c.

PAIN, SUN, *Hemicrania*.

PAIN, see *Triticum*—p. à *Coucou*, *Oxalis acetosella*—p. de *Madagascar*, *Jatropha manihot*—p. de *Pourceau*, *Cyclamen*.

PAINS, AFTER, see P. labour.

PAINS, GNAWING, *Dolo'res roden'tes*. Pains resembling what might be produced by the gnawing of an animal.

PAINS, Labour pains, *Throes*, *Throws*, *Parturien'tis dolo'res*, *Odin*, *Odis*, *Dolo'res ad partum*, *Torm'ina parturient'ium*, (F.) *Mal d'Enfant*, *Douleurs*. The uneasy sensations that accompany labour, and are owing to uterine contraction. The pains that precede actual delivery, and are simply employed in dilating the os uteri, are called *grinding*; those which extrude the child, *forcing*. Those which take place in the first days after delivery, and are employed in forcing away coagula, &c., are termed *After pains*, *Dolo'res* seu *Torm'ina post partum*, *D. puerperarum*, (F.) *Tranchées utérines*.

"To take a pain,"—"To try a pain,"—is to make an examination *per vaginam*, during labour, to discover its progress, character, &c.

The French term the pains, which precede and announce labour, *mouches*; those which accompany it, *douleurs*; and those which occur immediately afterwards, *tranchées* ou *coliques*.

PAINT, (from *pingere*, *pinctum*, 'to paint,' (L.) *pinto*, (F.) *peint*;) *Pignen'tium*, *Fucus*, (F.) *Fard*. A name given to different substances, employed for embellishing the complexion or rendering the skin softer. The substances most commonly used for this purpose are:—the *Subnitrate of Bismuth*, (F.) *Blanc de fard*. A spirituous solution of benzoin, precipitated by water, and forming *Virgin's milk*, (F.) *Lait virginal*; the red or *rouge*

of the carthamus; *Spanish white*; the oxides of lead, tin, and mercury, vermilion, red saunders, &c. All paints may be said to be noxious. They injure the skin; obstruct perspiration; and, thus, frequently lay the foundation for cutaneous affections. See Cosmetic.

PAINT, INDIAN, *Hydrastis Canadensis*, *Sanguinaria Canadensis*—p. Yellow, *Hydrastis Canadensis*.

PALAD, Vertex.

PALÆSTRA, Gymnasium.

PALAIS, Palate.

PALAME, Palm.

PALATAL, Palatine.

PALATE, *Palatum*, *Hypero'a*, *Hyperö'um*, *Uranis'cos*, *Roof of the mouth*, *Fossa Palati'na*, *Palatum stab'ile*, *Hard Palate*, (F.) *Palais*. The upper part of the cavity of the mouth; a kind of parabolic vault, formed by the two superior maxillary bones, and the two palate bones, covered with a thick and dense mucous membrane: bounded, before and at the sides, by the superior dental arch; and, behind, by the velum palati. A whitish line runs along the middle, from before to behind; at the anterior extremity of which is a tubercle corresponding to the inferior orifice of the anterior palatine canal. The arteries of the palate and corresponding gums proceed from the palatine, alveolar, infra-orbital, labial, and buccal branches. The veins follow a similar course. The nerves are given off from the palatine, facial, infra-orbital, superior dental, and from the naso-palatine ganglion.

PALATE, ARTIFICIAL, (F.) *Obturateur du Palais*. A plate of tortoise-shell, silver, &c., used to close a deficiency of the palate.

PALATE BONE, *Os Palati seu basilarë*, (F.) *Os Palatin* ou du *Palais*, is a small bone, of an irregular shape, situate at the posterior part of the nasal fossæ and palate. It seems formed by the union of two bony plates joined at right angles to each other; so that one is *inferior* and *horizontal*;—the other, *superior* and *vertical*. The *horizontal* or *palatine portion*, *Arch of the palate*, is quadrilateral. Its upper surface forms part of the nasal fossæ; the lower forms part of the palatine arch, and contains the inferior orifice of the *posterior palatine canal*. Its anterior edge is articulated with the palatine process of the superior maxillary bone; the *posterior* is free and sharp. It gives attachment to the velum palati, and presents an eminence, which, when joined with one on the opposite side, forms the posterior nasal spine. Its inner edge is articulated with the corresponding bone; its outer is confounded with the vertical portion. The *vertical* or *ascending portion* has the form of a long square. The inner surface forms part of the outer paries of the nasal fossæ. Its outer surface is unequal, and is articulated with the superior maxillary bone; behind, it presents a vertical groove, which forms part of the posterior palatine canal; and, above, a small free surface, which looks into the zygomatic fossa. Its anterior edge is united with the superior maxillary bone; the posterior is unequal, and rests on the internal ala of the pterygoid process. The angle, which it forms by uniting with the posterior edge of the horizontal portion, presents a very prominent pyramidal eminence, called the *tuberosity of the palate bone*. Its upper margin is surmounted by two eminences;—the one, anterior, called the *orbital process*;—the other posterior, the *sphenoid process*. These two processes are separated by an almost circular notch, which the sphenoid bone forms into a foramen, called the *spheno-palatine*.

This bone appears to be developed from a single point of ossification. It is articulated with

the sphenoid, ethmoid, the cornua sphenoidalia, superior maxillary bone, the inferior spongy bone, the vomer, and its fellow.

PALATE, CLEFT, see Harelip—p. Falling down of the, *Uvulitis*—p. Fissured, see Harelip—p. Hard, Palate—p. Soft, *Velum pendulum palati*.

PALATINE, *Pal'atal*, *Palati'nus*, *Pal'atic*, from *palatum*, 'the palate.' Relating or belonging to the palate.

PALATINE OR PALATAL ARTERIES are two in number. They are distinguished into, 1. The *superior palatal* or *palatine*, *Palati'na descendens* or *Pal'ato-max'illary*, which leaves the internal maxillary behind the top of the orbit; descends into the pterygo-maxillary fissure, and enters the posterior maxillary canal. Its branches are distributed to the velum palati and the nasal fossæ. 2. The *inferior* or *ascending palatine* or *palatal*, which is very small, and separates from the facial near its origin. It passes along the lateral and superior part of the pharynx, between the pillars of the velum palati, and divides into a number of ramusculi, which are distributed to the pharynx, the corresponding tonsil, the Eustachian tube, and the velum palati.

PALATINE CANALS OR DUCTS. These are two in number. The anterior, *Ductus incisivus* seu *Naso-lo-palati'nus*, *Incisive canal*, is situate at the anterior part of the palatine arch, and is formed by the two superior maxillary bones. It is single beneath, but opens above by two apertures, one into each nasal fossa. The foramen is called *Foramen incisivum* seu *Palati'num anterius* seu *Alveolarë anterius* seu *cæcum ossis maxilla'ris superioris*. The *posterior palatine canal* is situate at the posterior part of the palate. It is formed by the palate and superior maxillary bones, ascends between these two bones, and, in its course, gives rise to two or three small accessory palatine canals, which open above the tuberosity of the palate bone. It transmits the nerves and vessels which bear its name. The foramen is called, *F. Palati'num posterius* seu *Palato-maxilla'rë* seu *alveolarë posterius*.

PALATINE MEMBRANE is the fibro-mucous membrane that lines the palate or roof of the mouth.

PALATINE OR PALATAL NERVES, *Gutturale-palatin* (Ch.), are three in number; and arise from the inferior part of the spheno-palatine ganglion. 1. The *great palatine*, *Palatin inférieur* (Ch.), is situate anteriorly to the two others, and descends into the posterior palatine canal; gives a *nasal filament* and a *staphyline filament*, and is distributed on the palate. 2. The *middle palatine*, *Gutturale* (Ch.), which arises behind the preceding, enters one of the accessory palatine canals, and is distributed to the tonsils and velum palati. 3. The *little palatine nerve*, situate still more backward than the last, which loses itself by several filaments in the uvula, tonsils, and follicles of the palatine membrane.

PALATITE, Isthmitis.

PALATITIS, Uranisconitis.

PALATO-GLOSSUS, Glossostaphylinus.

PALATO-PHARYNGEUS, *Pharyngo-staphylinus*, *Staphylinopharyngus*, *Thyro-pharyngo-staphylinus*, part of the *Hypero-pharyngus*, (F.) *Palato-pharyngien*, *Stylo-pharyngien* (Ch.). A membranous muscle, broader at its middle than at its extremities, and situate vertically in the lateral paries of the pharynx and velum palati. It includes the peristaphylo-pharyngus, pharyngo-staphylinus, and thyro-staphylinus of Winslow. When the two palato-pharyngei contract together, they depress the velum. They elevate and shorten the pharynx, and act principally in deglutition.

PALATO-PHARYNGIEN, Palato-pharyn-

geus—p. Salpingeus, Circumflexus—p. *Salpingien*, Circumflexus.

PALATOSTAPHYLINI, see Azygos muscle.

PALATUM FISSUM, Hyperoochasma, see Harelip—p. Mobile, Velum pendulum palati—p. Molle, Velum pendulum palati—p. Pendulum, Velum pendulum palati.

PALE, Pollen.

PALENESS, *Pallor*, *Och'rotes*, *Ochro'ma*, *Ochri'asis*, *Leuco'sis*, *Dealba'tio*, *Luror*, (F.) *Pâleur*. Whiteness of complexion. It appears to be owing to a diminution or alteration of the blood circulating in the capillary vessels, and is often a sign of disease.

PALES COULEURS, Chlorosis.

PALETTE (F.), *Pal'mula*, *Fer'ula*. An instrument of percussion. It has the shape of a spatula with a long handle; is made of very light, white wood, and has been proposed, by Mr. Percy, for what is called the *Massage*, a kind of pressure or kneading, exerted by the hand on the body and limbs, to excite the tone of the skin and subjacent tissues.

Palette also means a cup for bleeding; and the xiphoid cartilage [?].

PALETTE A PANSEMENT. A small splint of thin, scooped wood, having the shape of the hand, and used to support the hand in certain cases—when burnt, for example—in order to prevent the fingers from being deformed by the cicatrices.

PALETTE DE CABANIS. An instrument, invented by Cabanis of Geneva to draw out the extremity of the stylet when passed into the nose, in the operation for fistula lacrymalis. It is composed of two plates of silver, pierced with several holes, and movable on each other. To use it, the instrument must be carried into the nose, so that the holes of the two plates correspond. When the end of the stylet is received into one of these holes, it is pinched, by sliding one of the plates on the other, and is easily withdrawn.

PÂLEUR, Paleness.

PALI PLAGUE, see Plague.

PALICOUREA CROC'EA, *Psycho'tria croc'ea*, *Order*, Cinchonaceæ, a native of the West Indies, is possessed, according to Von Martius, of emetic properties.

PALICOUREA MARCGRAA'VII, *Erva do rato*, *Galva'nia Vellozii*, a native of Brazil, is poisonous, and employed there to kill rats and mice.

PALICOUREA OFFICINA'LIS, a native of Brazil, is reputed to be a powerful diuretic in small doses.

PALICOUREA SPECIO'SA, *Goldshrub*, a native of New Granada and Brazil. The leaves are considered to be antisymphilitic. The decoction in large doses is poisonous.

PALILLO, *Campomanesia lineatifolia*.

PALIMPISSA, see *Pinus sylvestris*.

PALINCOTESIS, *Reerudescencia*.

PALINDROME, *Palindromia*.

PALINDROM'IA, *Palin'dromē*, from *παλι*, 'again,' and *δρομος*, 'a course.' This word signifies, with some, a reflux of fluids from the exterior towards the interior; and, according to others, the relapse of an affection—the recurrence—*Recur'sio*, *Repetit'io*—of a paroxysm, or disease,—*Morbus recidi'vus*, *Morbi recur'sus*.

PALINGENESIS, *Regeneration*.

PALLA, *Pila*.

PALLAT, *Vertex*.

PALLIATION, *Pallia'tio*, from *palliare*, *palliatum*, 'to cover, mask;' from *pallium*, 'a mantle.' The act of palliating—that is, of causing the symptoms of a disease to mitigate, without

curing it. The medical art can frequently only moderate the symptoms of a disease, prevent it from making progress, prolong the days of the patient, and diminish his sufferings. This is *palliative treatment*, (F.) *Traitement palliatif*.

PALLIATIVE, *Palliat'ivus*, *Antipath'ic*, *Enantiopath'ic*, (F.) *Palliatif*. A remedy or mode of treatment, which only relieves a disease, without curing it. The *palliative treatment*—*Cura palliat'iva*, is placed in antithesis to the radical, *Cura radica'lis*; see Radical.

PALLIDULUS, *Blafard*.

PALLIDUS MORBUS, Chlorosis.

PALLOR, Paleness—p. *Virginum*, Chlorosis.

PALM, *Palma*, *παλαρη*, *Vola*, *V. manûs*, *Plate'a*, *Thenar*, *Ages*, *Agos'tus*, *Poc'ulum*, *Pa'tera*, *Suppellez seu Suppellectilē Diog'enis*, (F.) *Paume* ou *Creux de la main*. The hollow or inside of the hand. It is limited, *without*, by the thenar eminence, which answers to the thumb; *within*, by the hypothenar eminence, which answers to the little finger; *above*, by the wrist-joint; and, *below*, by the four fingers.

PALM, GOMUTO, see *Toddy*.

PALMA CHRISTI, *Ricinus communis*—p. *Cocos*, *Cocos nucifera*—p. *Dactylifera*, *Date tree*—p. *Humilis*, *Musa paradisiaca*—p. *Indica vinaria secunda*, see *Toddy*—p. *Unguentarium*, *Myrobalanus*.

PALMÆ UTERI PLICA'TÆ, *Arbor vite uteri'nus*, *A. uteri viv'ificans*. The arborescent striae in the interior of the cervix uteri.

PALMAIRE, *Palmar*—p. *Cutané*, *Palmaris brevis*—p. *Grand*, *Palmaris magnus*—p. *Grêle*, *Palmaris longus*—p. *Long*, *Palmaris longus*.

PALMAR, *Palma'ris*, (F.) *Palmaire*, from *palma*, 'the palm of the hand.' That which concerns the palm of the hand. The palm has, sometimes, been divided into three regions, called *palmar*. 1. The *external palmar region* corresponds to the thenar eminence. 2. The *internal palmar region* is formed by the hypothenar eminence: and, 3. The *middle palmar region* is the hollow of the hand, (F.) *Creux de la main*.

PALMAR APONEURO'SIS, *Palmar fas'cia*. A strong triangular aponeurosis, which arises from the inferior tendon of the palmaris brevis, and the anterior annular ligament of the carpus. It covers the whole palm of the hand, and adheres, somewhat strongly, to the skin of the part. The *palmar ligaments* are small, very numerous, fibrous fasciæ, which unite the different bones of the carpus and metacarpus.

PALMAR ARCHES, (F.) *Arcades* on *Crosses palmaires*. The curved extremities of the radial and cubital arteries in the palm of the hand. There are two palmar arches:—the one, *cubital* or *superficial*,—*grande Arcade palmaire* of Chaussier, furnishes, at its convexity towards the fingers, the collateral arteries of the fingers, and the internal collateral of the thumb; the other, the *radial*, *profound*, or *deep-seated*,—*petite Arcade palmaire* of Chaussier, is deep in the palm of the hand beneath the tendons of the flexor muscles of the fingers. It gives some small branches only to the surrounding parts. The palmar veins accompany the corresponding arteries.

PALMAR ARTERIES, see *Palmar arches*—p. *Fascia*, *P. aponeurosis*.

PALMAR MUSCLES. These are three in number. 1. *Palma'ris Magnus*, *Flexor carpi radia'lis*, *Radia'lis intern'us*, (F.) *Épitrochlo-métacarpien* (Ch.), *Palmaire grand*, *Radial antérieur*. A long fusiform muscle, which passes obliquely from the inner tuberosity of the humerus to the upper extremity of the second metacarpal bone. It bends the hand. 2. *Palmaris longus*, *Lateseen'tis chordæ*, *Ulna'ris grac'ilis*, (F.) *Épitrochlo-carpi-pal-*

maire (Ch.), *Palmaire long*, *P. grêle*. This muscle is situate on the inner side of the last. It is very slender, and passes from the inner tuberosity of the humerus to the anterior annular ligament of the carpus, and to the palmar aponeurosis, which it seems to form by the vanishing of its fibres. It stretches the palmar aponeurosis, and bends the hand. 3. *Palmaris Brevis*, *Caro quadrata*, *Carpipœus*, (F.) *Palmaire cutané*. A small, thin, quadrilateral muscle; situate before the thenar eminence. It passes from the annular ligament of the carpus to the integuments of the palm of the hand, which it wrinkles by its contraction.

PALMAR VEINS, see Palmar arches.

PALMARIS BREVIS, see Palmar muscles — p. Longus, see Palmar muscles — p. Magnus, see Palmar muscles.

PALMETTO, SAW, *Chamærops serratula*.

PALMI-PHALANGIENS, *Lumbricales manus*.

PALMISTRY, *Chiromancy*.

PALMOSCOP'IA, from *παλμος*, 'palpitation,' and *σκοπεω*, 'I view.' Investigation of the beating of the heart and pulse. Prognosis from the beating of the heart and pulse.

PALMULA, Date, *Palette*.

PALMUS, Palpitation — p. Cordis, Palpitation — p. Plumbarius, Colic, metallic — p. Vomitus, Vomiting.

PALO DE CALENTURAS, *Calenturas* — p. de Vacca, *Galactodendron utile* — p. de Velas, *Parmentiera cerifera*.

PALOMMIER, *Gaultheria*.

PALOS DE CALENTURA, *Cinchona*.

PALPA'TION, from *palpare*, *palpatum*, (F.) *palper*, 'to feel.' The sense of touch. It is also used for the mode of exploring diseases by feeling or pressing upon the diseased organ. A delicate and discriminating touch — *tactus eruditus* — is important in the diagnoses of many morbid conditions.

PAL'PEBRA, supposed to be from *palpitare*, 'to palpitate,' owing to its frequent motion. [?] *Bleph'aron*, *Oper'culum* seu *Coöper'culum oculi*, *Eyelid*, (Prov.) *Eye-brcek*, (Sc.) *Ëe-winker*, (F.) *Paupière*. The eyelids are two movable vela, situate in front of the eye; which by their separation permit the organ to receive the impression of light, or by their greater or less occlusion protect it from the influence of too great light, or from the action of extraneous bodies. They are separated, above, from the forehead, by the eyebrows; and, below, are confounded with the cheeks. They are distinguished into *upper*, *Palpebra major* seu *superior*, *Epicœ'lis* — and *lower*, *Palpebra minor* seu *inferior*, *Hypocœ'lis*, *Hypocœ'lum*, *Hypocœ'ylum*. The former is much broader and more movable than the latter. They are separated by a transverse cleft — *Fissu'ra palpebrarum* — and their edges are thick, and furnished with the cilia or eyelashes. Supported by the tarsal cartilages, they unite at the extremities of the transverse diameter of the orbit, forming two angles, the innermost being called the *greater angle of the eye*, or *inner* or *greater canthus*; the other, the *lesser*, or *external angle* or *canthus*. They are formed, 1. Of a thin dermoid texture: 2. Of a muscular membrane, — a portion of the orbicularis: 3. Of a particular fibrous membrane: 4. Of the tarsi: 5. Of a mucous membrane, — a part of the tunica conjunctiva.

Their vessels and nerves are called Palpebral.

PALPEBRA INFERIOR EXTRORSUM FLEXA, *Ectropion* — p. Tertia, *Valvula semilunaris*.

PALPEBRÆ SUPERIORIS PRIMUS, *Levator palpebræ superioris*.

PAL'PEBRAL, *Palpebra'lis*, from *palpebra*, 'the eyelid.' That which belongs or relates to the eyelid.

PALPEBRAL ARTERIES are those distributed to the eyelids. They are two in number; an *upper* and a *lower*. The *former* arises from the ophthalmic, a little beyond the cartilaginous pulley of the greater oblique muscle, and descends towards the upper eyelid, over which it is distributed. The *latter* arises at the side of, and a little behind, the preceding, and sends its ramifications to the lower eyelid and the neighbouring parts. The palpebral veins have a similar arrangement; except that some of them open into the temporal and labial veins.

PALPEBRAL FLUX, PURIFORM. A puriform discharge, furnished by the glands of Meibomius, when inflamed; and to which Scarpa attributes fistula lacrymalis, in many cases.

PALPEBRAL LIGAMENTS are distinguished into *superior* and *inferior*. Some anatomists, with Winslow, have described, under this name, the fibrous layer which is attached, — on the one hand, to the outer part of the circumference of the orbit; on the other, to the tarsal cartilages.

PALPEBRAL NERVES, *Nerves of the eyelids*, arise, particularly, from the frontal and lachrymal branches; from the ophthalmic nerve of Willis; and from the facial, nasal, and infra-orbital branch of the superior maxillary nerve.

PALPEBRALIS, *Orbicularis palpebrarum*.

PALPEBRARUM APERIENS RECTUS, *Levator palpebræ superioris* — p. Duo musculi, *Orbiculares palpebrarum*.

PALPEBRATIO, *Nictation*.

PALPITATIO, Palpitation — p. Arteriarum, see Palpitation — p. Cordis trepidans, *Cardiotromus*.

PALPITATIO MEMBRORUM. A term used by Gaubius for involuntary shaking of the legs.

PALPITA'TION, *Palpita'tio*, *Palmus*, *P. seu Tremor Cordis*, *Palpita'tio seu Pulsatio Cordis*, *Vibratio Cardiacæ seu Cordis*, *Cardiogmus*, *Cardiopalmus*, *Subsultio*, *Clonus Palpita'tio*, (Sc.) *Dunt*, *Dount*, (F.) *Palpitation*, *P. du Cœur*, from *palpitare*, *palpitatum*, 'to throb.' A name given to the pulsations of the heart, when they become stronger, more extensive, or more sensible to the individual than ordinarily. Palpitations occur in a number of affections. They are, sometimes, owing to organic diseases of the heart — hypertrophy, inflammation, &c.; at others, to a disease in some other viscus; whilst, frequently, they are merely nervous.

PALPITATION is sometimes felt in the arteries, constituting *Palpitatio Arteriosa*.

PALPITATION DU CŒUR, Palpitation.

PALSIED, *Paralytic*.

PALSY, *Paralysis* — p. Bell's, *Paralysis*, *Bell's* — p. *Histrionic*, *Paralysis*, *Bell's*.

PALSY, LEAD, *Paralysis saturnina* seu *metallica*, *Molybdoparësis*, (F.) *Paralysis saturnine*, *Metallic Palsy*, *Painters' Palsy*. The paralysis of the upper extremities especially, induced by the poison of lead. Palsy of the intestines, thus induced, is called, by Piorry, *Aenétéronervie saturnine*.

PALSY, METALLIC, see Palsy, lead — p. *Painters'*, *P. lead* — p. *Shaking*, *Paralysis agitans* — p. *Trembling*, *Paralysis agitans*.

PALSY WORT, *Primula veris*.

PALTA, *Persea gatissima*.

PALUDAL, *Elodes*.

PALUDAPIUM, *Apium graveolens*.

PALUDÉEN, *Elodes*.

PALUDOSUS, *Elodes*.

PALUS, *Marsh*, *Penis* — p. *Sanctus*, *Guaiacum*.

PALUSTRE, *Elodes*.

PAMBIOMA, *Panbioma*.

PAMOIION, *Syncope*.

PAMPINIFORM PLEXUS, *Corpus pampiniforme*.

PAMPINIFORME CORPUS, see Corpus pampiniforme.

PAMPLE'GIA, *Panplegia*, from *πav*, 'all,' and *πληγω*, 'I strike.' General paralysis. Palsy of the whole body.

PANACE'A, *πανακτα*, *Catholicon*, *Catholicon*, from *πav*, 'all,' and *ακτομα*, 'I cure.' *Universale remedium*, *Panchrestos*. A pretended universal remedy. There is no such thing in existence.

PANACEA DUCIS ILLSATIÆ, *Potassæ sulphas* — p. *Duplicata*, *Potassæ sulphas* — p. *Lapsorum*, *Arnica montana* — p. *Mercurialis*, *Hydrargyri submurias* — p. *Mercurii rubri*, *Hydrargyri nitrico-oxidum* — p. *Pectoris*, *Glechoma hederacea* — p. *Vegetabilis*, *Crocus*.

PANACÉE ANGLAISE, *Magnesia carbonas*. PANADA, diminutive of Ital. *pane*, 'bread,' (Lat. *panis*), *Panda'ta*, *Panatel'la*. Bread, boiled in water to the consistence of pap. Sometimes administered to the sick.

SIMPLE BREAD PANADA may be made by putting any quantity of grated stale bread into enough water to form a moderately thick pulp; covering it up, and leaving it to soak for an hour; then beating it up with two tablespoonfuls of milk, and a small portion of refined sugar, and boiling the whole for ten minutes, stirring all the time.

PANAIS, *Pastinaca sativa*.

PANARIS, *Paronychia*.

PANARITUM, *Paronychia*.

PANARIUM, *Paronychia*.

PANATA, *Panada*.

PANATELLA, *Panada*.

PANAX, see *Panax quinquefolium* — p. *Costium*, *Pastinaca opoponax* — p. *Heracleum*, *Pastinaca opoponax* — p. *Pastinacea*, *Pastinaca opoponax*.

PANAX QUINQUEFOLIUM, *Aurelia'nô* seu *Ara'lia Canaden'sis*, *Ginseng*, *Ninsing*, *Gensang*, *Red-berry*, *Five fingers*. Same etymon as *Panacea*. Family, *Araliaceæ*. See. *Syst. Polyandria Monœcia*. This plant grows in North America. The root—*Panax* (Ph. U. S.)—*Radix ginseng*—is about the thickness of the little finger; an inch or two in length, often dividing into two branches; of a whitish-yellow colour; wrinkled on the surface, and of a compact, almost horny, texture. It has no smell, but a very sweet taste, combined with a slight degree of aromatic bitterness. It is much esteemed by the Chinese, who pay a high price for it. It is a gentle and agreeable stimulant.

PANAX SCHINSENG, *Asiat'ic Ginseng*, a native of Asia, has been usually confounded with the last. The root, *radix ninsi*, has like virtues.

PANBIO'MA, *Pambio'ma*, from *πav*, 'all,' and *βιος*, 'life.' The original animating principle. The general principle of life.

PANCHRESTOS, *Panacea*.

PANCHYMAGO'GUM, *Pantago'gon*, from *πav*, 'all,' *χυμος*, 'juice,' and *αγω*, 'I drive away.' A medicine which the ancients believed capable of purging away all sorts of humours.

PANCHYMAGOGUM MINERALE, *Hydrargyri submurias*.

PANCENOSUS, *Pandemic*.

PANCENUS (MORBUS), *Pandemic*.

PANCRATIUM, *Pancreas*.

PANCREAS, from *πav*, 'all,' and *κρεας*, 'flesh,' i. e. 'quite fleshy.' *Calli'reas*, *Pancreatium*, *Pan'creum*, *Lactes*, *Pulvi'nar ventri'culi*, *Totum carno'sum*, *Gland'ula saliva'lis abdom'ini's*, *Pancre'ne*, *Sweetbread*. A gland, deeply seated in the abdomen, and lying transversely on the vertebral column, between the three curvatures of the duodenum, behind the stomach, and to the right of the spleen. Its left extremity is called the tail of the pancreas; it is smaller than the

right, which is called the head. At its right portion, it has, almost always, a greater or less prolongation; called, by Winslow, and some others, the lesser pancreas, (F.) *Petit pancreas*, *Pancreas of Aselli*, *Pancreas minus*. The pancreas resembles the salivary glands in structure, and has been called the *Abdominal Salivary Gland*. It is composed of lobes and granulated lobules, distinct, and united by areolar tissue. From each of the granulations of these lobes arise the radicles of its excretory duct, which are very delicate, and united like veins. The duct itself, *Ductus Pancreat'icus* seu *Wirsungia'mus*, *Pancreat'ic duct*, *Canal or Duct of Wirsung or Wirsungs*, (F.) *Canal pancréatique*, proceeds in a serpentine course through the substance of the organ; and when it has reached behind the second portion of the duodenum, it becomes free, and is of the size of a crow's quill. It opens at an acute angle into the choledoch duct, or proceeds close to it, opening separately into the duodenum. The *Pancreatic arteries* are very numerous and small. They proceed from the coeliac, splenic, superior mesenteric, right gastro-epiploic, coronaria ventriculi, and left capsular. Its veins open into the radicles of the vena porta; and, particularly, into the splenic and lesser mesenteric. Its nerves emanate from the solar plexus, and its lymphatics pass into ganglions, to which it gives its name. The pancreas secretes the *Pancreatic juice*, *Succus seu Liquor Pancreat'icus*, *Lympha Pancreat'is*, (F.) *Suc pancréatique*, which resembles the saliva. When this juice is mixed with amylaceous matters, it converts them into dextrin and glucose. Its great use appears, however, to be, to emulsify fatty matters by virtue of a peculiar albuminoid principle — *pancreatin* — coagulable by heat or alcohol, which it contains.

PANCREAS OF ASELLI, see *Pancreas* — p. *Minus*, see *Pancreas* — p. *Petit*, see *Pancreas* — p. *Second*, *Brunner's glands*.

PANCREATAL'GIA, from *pancreas*, and *αλγος*, 'pain.' Pain or disease of the pancreas.

PANCREATEMPHRAX'IS, from *pancreas*, and *εμφρασσω*, 'I obstruct.' Obstruction of the pancreas.

PANCREAT'IC, *Pancreat'icus*, (F.) *Pancréatique*. Same etymon as *Pancreas*. Relating to or affecting the pancreas.

PANCREATIC ARTERIES, see *Pancreas* — p. *Duct*, see *Pancreas* — p. *Juice*, see *Pancreas* — p. *Nerves*, see *Pancreas* — p. *Veins*, see *Pancreas*.

PANCREAT'IC SARCO'MA OF AB'ERNETHY, *Emphy'ma sarco'ma pancreat'icum*. A tumour, in irregular masses, connected by loose fibrous substance, like the irregular masses of the pancreas. Found in the areolar substance: but, more usually, in lymphatic glands, chiefly in the female breast.

PANCREATIN, see *Pancreas*.

PANCREATIT'IS, *Inflamma'tio pancreat'is*, (F.) *Inflammation du Pancreas*, from *pancreas*, and *itis*, denoting inflammation. Inflammation of the pancreas; — an affection, the phenomena of which are not well known.

PANCREATOID, from *pancreas*, and *ειδος*, 'appearance.' *Pancreatoid'es*. A tumour resembling the pancreas in structure.

PANCREATON'CUS, from *pancreas*, and *ογκος*, 'a swelling.' Tumour of the pancreas.

PANCRENE, *Pancreas*.

PANCREUM, *Pancreas*.

PANDA'LEA, *Panda'leum*. A kind of lozenge used by the Arabian physicians.

PANDALEUM, *Pandalea*.

PANDALITUM, *Paronychia*.

PANDEMIA, *Pandemic*.

PANDEMIC, *Pan'demy*, *Pande'mia*, *Morbus Pandem'ius* seu *Pande'mus* seu *Pancae'nus*, *Pan-*

cœno'sus, (F.) *Pandémie*; from *παν*, 'all,' and *ἄσμος*, 'people.' An epidemic which attacks the whole, or a great part, of the population.

PANDÉMIE, Pandemic.

PANDEMY, Pandemic.

PANDICULAT'ION, *Pandicula'tio*, *Scordine'ma*, *Scordinis'mus*, *Clonus Pandicula'tio*, from *pandiculari*, (*pandere*, 'to stretch out,') 'to stretch as one awaking from sleep.' *Stretching*, *Hal'ices*, (pl.) An action, which consists in elevating the upper limbs, and throwing the head and trunk backwards, at the same time that the lower limbs are extended. This series of motions of the extensor muscles is in some measure independent of the will, and is accompanied with yawning, which is equally involuntary. In the state of health, stretching occurs before and after sleep; especially when we are fatigued. It is also observed at the onset of certain paroxysms of fever, hysteria, &c.

PANDOCE'UM, *Pandochi'um*, *Pandoci'um*, from *παν*, 'all,' and *δέχομαι*, 'to receive.' An inn that receives all classes. A general hospital, or one that admits all cases.

PANDOCHIUM, Pandoceum.

PANDOCIUM, Pandoceum.

PANHIDRO'SIS, from *παν*, 'all,' and *ἰδρωσις*, sweating.' *Sudor universa'lis*. Sweating over the whole body.

PANHYPÉRÆMIA, Plethora.

PANIC D'ITALIE, Panicum Italicum.

PANICAUT, *Eryngium campestre*—p. *Mari-time*. *Eryngium maritimum*.

PANIC GRASS, ITALIAN, Panicum Italicum.

PANICUM DACTYLON, *Cynodon dactylon*.

PAN'ICUM ITAL'ICUM, from *panis*, 'bread,' *Ital'ian Panic Grass*, *Indian Millet*, *Guinea Corn*, *Barba'does Millet*, *Mil'ium Ind'icum*, *Sorghum*, *Holcus Sorghum*, (F.) *Millet des oiseaux* ou à *grappes*, *Panic d'Italie*. *Nat. Ord.* Graminææ. The seed—*Mil'ii Sem'ina*—are much esteemed in Italy, being a constant ingredient in soups, and made into a variety of forms for the table.

PANICUM MILIA'CEUM, *P. mil'ium*, *Common Millet*, *Milium*, *M. Pan'icum* seu *Esculent'um*, *Cenchrion*, *Cenchrus*, (F.) *Millet ordinaire*, *Mil. Millet-seed* are esteemed a nutritious article of diet, and are often made into puddings.

PANICUM MILIUM, *P. miliaceum*.

PANIS CANICACEUS, see *Canicæ*—p. *Cibarius* seu *secundarius*, *Syncomistos*—p. *Cuculi*, *Oxalis acetosella*—p. *Porcinus*, *Cyclamen*.

PANIV'OROUS, *Paniv'orus*, from *panis*, 'bread,' and *voro*, 'I devour.' Subsisting on bread.

PANNI, Swathing clothes.

PANNICLE, Membrane.

PANNICULE CHARNU, *Panniculus carnosus*.

PANNIC'ULUS, diminutive of *pannus*, cloth. A piece of fine cloth. *Pterygion*.

PANNICULUS ADIPOSUS, Cellular membrane.

PANNICULUS CARNO'SUS, *Tu'nica carno'sa*, *Muscular Web*, *Mantle*, (F.) *Pannicula carnea*, is a general covering found in the quadruped, and formed by a thin, subcutaneous muscle, which serves to move the skin. It exists only in certain parts of the human body,—as in the forehead, where it is formed by the occipito-frontalis; in the neck, by the platysma myoides; and in the scrotum, by the cremaster muscle.

PANNICULUS CORDIS, *Pericardium*—p. *Hymenæus*, *Hymen*—p. *Virginalis*, *Hymen*.

PANNIKELLI, Cranium.

PANNUS. A piece of cloth. This word has several other meanings, many of which are equivocal. It means a tent for a wound, and also, an irregular nævus or mark on the skin.—*Castelli*. Modern ophthalmologists apply it to an

opaque and vascular condition of the anterior membrane of the cornea, almost invariably produced by the continuance of purulent or strumous ophthalmia, or by chronic inflammation of the cornea. This part becomes nebulous, covered with red vessels, and opaque. At times, the sclerotic conjunctiva undergoes a similar change to that which occurs in the corneal portion.

PANNUS HEPATICUS, *Chloasma*—p. *Lenticularis*, *Ephelides*.

PANOCHIA, Bubo.

PANOPHO'BIA, *Pantopho'bia*, *Panpho'bia*, *Panopho'bia*, *Athym'ia*, *Pavor*, (F.) *Frayeur nocturne*, *Souci*; from *Παν*, 'the god Pan,' and *φοβος*, 'fear'; a panic or fear inspired by the god Pan, according to the opinion of the ancients. Others derive it, and with more probability, from *παν*, 'all,' and *φοβος*, 'fear.' This universal and groundless fear is morbid, and is a symptom of melancholy.

PANOPHTHALMI'TIS, from *παν*, 'all,' and *ophthalmitis*, 'inflammation of the eye.' Inflammation of the whole eye.

PANPHOBIA, Panophobia.

PANPLEGIA, Pamplegia.

PANSCLERO'SIS, from *παν*, 'all,' and *σκληρωσις*, 'hardness.' Complete induration of a part.

PANSE, Inguivies.

PANSEMENT, Dressing.

PANSIES, *Viola tricolor*.

PANSPER'MIA, from *παν*, 'all,' and *σπερμα*, 'sperm.' The theory of *Dissemination of Germs*, according to which, ova or germs are disseminated over all space, undergoing development under favourable circumstances.

PANSY, *Viola tricolor*.

PANTAGOGON, *Panchymagogum*.

PANTANANCEPHA'LIA, from *παν*, *παντος*, 'all,' and *anencephalia*, absence of brain. Entire absence of brain—the same as *anencephalia*.—I. G. St. Hilaire.

PANTATROPH'IA, from *παν*, *παντος*, 'all,' and *ατροφία*, 'atrophy.' Universal atrophy.

PANTHOD'IC, *Panthod'icus*, from *παν*, *παντος*, 'all,' and *ὁδος*, 'a way.' An epithet applied by Dr. Marshall Hall, to a course of nervous action proceeding from one point in all directions to every other.

PANTICES, Intestine.

PANTING, *Anhelatio*.

PANTOGANGLIITIS, Cholera.

PANTOPHAGISTS, see *Omnivorous*.

PANTOPHAGUS, Omnivorous.

PANTOPHOBIA, *Hydrophobia*, *Panophobia*.

PANTOZOOTIA, *Panzootia*.

PANUS, *Phygethlon*—p. *Faucium*, *Stomatopanus*—p. *Inguinalis*, *Bubo*.

PANZOÏ'TIA, *Pantozōïtia*; from *παν*, 'all,' and *ζωον*, 'animal.' An endemic or epidemic disease affecting animals generally.

PAP, *Mamma*, *Nipple*. Also, a soft food made of bread boiled or softened with water, (*Sc.*) *Breadberry*.

PAP OF THE HASS, *Uvula*—p. of the *Throat*, *Uvula*.

PAPAS AMERICANUS, *Solanum tuberosum*.

PAPA'VER, *P. somniferum*, *Mecon*, *Lethe'a*. The *White Poppy*, *Papaver sati'vum*, (F.) *Pavot des Jardins*. *Ord.* *Papaveraceæ*. *Sex. Syst.* *Polyandria Monogynia*. The CAPSULE OF THE WHITE POPPY, *Co'dia*, *κωδία* or *κωδεια*, *Scaphion*, *Papaveris Caput* seu *Cap'sula*, *Papaver*, (Ph. U. S.,) *Mecon*, *Poppyhead*, is used in fomentation as an anodyne and relaxant, to inflamed or ulcerated parts. The expressed oil of the seeds is called by the French *Huile d'Œillets*. It is from the poppy that *ORPUM*—called, also, *Opium Thebæicum*, *Mecon'ium*, *Opion*, *Manus Dei*, *Affion*, *Affium*, *Amphiam*, *Afium*, *Osoron*, *Les danum*,

Mecon, Sopia, (Prov.) *Poppy pill*, (F.) *Opium brut* ou *eru*—is procured. It is the milky juice obtained after the flowering of the plant, by making longitudinal incisions in the capsules and stalks. It is commonly obtained from the Levant or India, where the poppy grows abundantly. Opium is a compound of morphia, narcotina, meconic acid, codeia, narcein, meconin, caoutchouc, fecula, resin, oil, and several other substances. *Turkey Opium* is of a heavy and slightly fetid colour. Its taste is nauseous, bitter, acrid, and warm: it is in flat pieces; solid and tenacious; of a dark brown colour, and yellowish when powdered; making a light brown, interrupted streak on paper. In *East India Opium*, the odour is the same, and empyreumatic; the taste is less bitter, but more nauseous, and the colour darker. The varieties of opium known in commerce are the *Smyrna*, the *Constantinople*, the *Egyptian*, the *Persian*, and the *Indian*. Opium is stimulant in small doses; sedative, in large; narcotic and anodyne; operating through the nervous system. It is a most valuable remedy in all painful affections, and inflammations, when given so as to produce its full, sedative effects, especially in peritonitis. In diarrhoea and dysentery, it acts as an astringent; and in intermittents, it will often prevent the paroxysm. In typhus, in small doses, it acts as a cordial; in larger, it allays irritation and produces sleep. When applied externally, its narcotic effects are developed: and, hence, it is a useful application to irritable sores, painful tumours, &c. Dose. gr. $\frac{1}{4}$ to $\frac{1}{2}$ as a stimulant; gr. j to as a sedative.

PAPAVER CEREALE, P. rhœas—p. Corniculatum, Chelidonium majus—p. Erraticum, P. rhœas—p. Luteum, Chelidonium majus.

PAPAVER NIGRUM. This is merely a variety of the white poppy, producing black seeds.

PAPAVER RHŒAS. The systematic and pharmacopœial name of the *Red corn-poppy*, *Corn rose*, *Papaver erraticum* seu *cered'le* seu *rubrum*, *Copper rose*, *Red-malikes*, (F.) *Coquelicot*. The heads of this species contain a milky juice of a narcotic quality. A syrup, *Syr'upus Rhœados*, of its flowers—*Rhœas* (Ph. L. and E.)—has been directed, which has been esteemed diaphoretic and slightly soothing; but is more admired for its colour than for any other property.

PAPAVERACEUM, Opiate.

PAPAVERCULUM, Meconium.

PAPAVERINE, *Papaverina*; from *papaver*, 'the poppy.' An alkaloid contained in opium; but not much investigated.

PAPAVERINUM, Codeine.

PAPAW TREE, *Carica papaya*.

PAPAYER, *Carica papaya*.

PAPER, BLISTERING, see Sparadrapum vesicatorium.

PAPIER ÉPISPASTIQUE, see Sparadrapum vesicatorium.

PAPILLA, (F.) *Papille*—diminutive, perhaps, from *papa*, one of the earliest cries of the infant, ascribed to a craving for food. The end of the breast, the nipple. See Nipple. An eminence similar to a nipple. A name given to small eminences, more or less prominent, at the surface of several parts, particularly of the skin and mucous membranes, in which latter situation they are also called villi. See Villous. They appear formed by the ultimate expansion of the vessels and nerves, and are susceptible, in some cases, of a kind of erection. They are also called *Papilla nervosa* seu *Ner'vea*, P. *Pyramidales*, *Nervous papilla*, (F.) *Papilles* ou *Papilles nerveuses*, *Houppes nerveuses*.

PAPILLA LACRYMALIS, see Lachrymal puncta—p. Mamme, Nipple—p. Nervi optici, see Optic nerve—p. Pili, see Hair.

PAPILLÆ, see Corpuscles, Pacinian—p. Calyciformes, see Papillæ of the tongue—p. Capitatae, see Papillæ of the tongue—p. Circumvallatæ, see Papillæ of the tongue—p. Conical, see Papillæ of the tongue—p. Conoidal, see Papillæ of the tongue—p. Filiform, see Papillæ of the tongue—p. Fungiform, see Papillæ of the tongue—p. Fungoid, see Papillæ of the tongue.

PAPILLÆ OF THE KIDNEY, (F.) *Mamelons du rein*, are the projections into the pelvis of the kidney of the apices of the cones—*Pyramids of Malpighi*, *Pyramides Malpighiana*—of the tubular substance of the organ. They are also called *Processus mamilla' res*, *Carunculæ papilla' res*, and *Papillæ rennæ*.

PAPILLÆ, LENTICULAR, see Papillæ of the tongue—p. Maximæ, see Papillæ of the tongue—p. Mediæ, see Papillæ of the tongue—p. Minimæ, see Papillæ of the tongue—p. Mucosæ, see Papillæ of the tongue—p. Nerveæ, Corpuscles, Pacinian—p. Nervous, see Papilla—p. Pyramidal, see Papillæ of the tongue—p. Pyramidales, see Papilla—p. Rennæ, see Papillæ of the kidney—p. Semilenticulares, see Papillæ of the tongue.

PAPILLÆ OF THE TONGUE are very numerous and marked. They are observed, particularly, at the upper surface of the organ, and are distinguished into—1. *The Lenticular papilla*, *Papilla mucosæ seu max'imæ seu capitatæ seu vallatæ seu circumvallatæ seu truncatæ seu calyciformes*. They are arranged at the base of the tongue in two oblique lines having the shape of the letter V; and united angularly at the foramen cœcum. They have, in general, an ovoid or spherical shape, and have seemed to be mucous follicles similar to those of the palate, lips, &c. 2. *The Fun'giform or Fungoid Papilla*, *Papillæ med'ia* seu *semilenticula' res*, arc of indeterminate number, but always more numerous than the preceding. They are irregularly disseminated near the edges and the point of the tongue; have a rounded and flattened head, supported by a short and narrow footstalk. Their tint is whitish. 3. *The Con'ical, Conoid'al or Pyram'idal papilla*, P. *min'imæ* seu *villo'sæ*, are the most numerous of all. Their arrangement is more regular in the forepart of the tongue than behind. They resemble small cones; the base being towards the tongue and the apex free. The anterior are very small, and have been called *Fil'iform papillæ*. They appear to be produced by the terminations of the filaments of the lingual nerve, and are surrounded by an evident vascular network.

PAPILLÆ TRUNCATÆ, see Papillæ of the tongue—p. Vallatæ, see Papillæ of the tongue—p. Villosæ, see Papillæ of the tongue.

PAPILLARY, *Papilla'ris*, *Papill'ous*, (F.) *Papillaire*, from *papilla*. Of or belonging to the nipple or to the papilla.

PAPILLARY BODY, Corpus papillare.

PAPILLI-AUT-MAMMILLI-FORMIS, Mastoid.

PAPILLIFORM, *Papilliform'is*, from *papilla*, and *forma*, 'form.' Having the shape or appearance of a papilla.

PAPILLO'MA. A tumour, whose specific elements are those of the papillæ of the normal skin; and which consequently is composed of a stem of fibrous or homogenous connective tissue; is club-shaped, cylindrical or acuminated, and covered with a layer of epithelial cells, similar to those of the normal papillæ.—Förster.

PAPILLOUS, Papillary.

PAPPOSE ROOT, Caulophyllum thalictroides.

PAPPE, Mamma.

PAPPEA CAPENSIS. A small tree of the *Nat. Ord.* Sapindacæ, common in Cafferland, the fruit of which is called *Wild Plums*. It

furnishes a vinous beverage, and excellent vinegar. Its kernel contains an oil, which, although eatable, is somewhat cathartic, and is recommended as an external application in tinea capitis, alopecia, &c.

PAPPUS AMERICANUS, *Solanum tuberosum*.

PAP'ULA. Akin to *papilla*. A pimple, *Exor'mia*, (Prov.) *Pouke*, *Puckle*, (Sc.) *Pluke*, *Plouk*, (F.) *Papule*, *Bouton*, *Bourgeon*. A small, acuminated elevation of the cuticle, with an inflamed base; very seldom containing a fluid, or suppurating, and commonly terminating in scurf or desquamation. An eruption of pimples is called, in Devonshire, *Murples*.

Papule form the first order of Willan and Bateman's arrangement of cutaneous diseases.

PAPULA AGRIA, *Lichen agris* — p. *Fera*, *Herpex exedens* — p. *Miliaris*, Miliary fever — p. *Typhosa*, Spots, red.

PAPULÆ, *Lichen* — p. *Siccæ*, *Lichen* — p. *Sudorici*, Miliary fever — p. *Sudorales*, *Sudamina*.

PAPULAR, *Papulose*.

PAPULEUX, *Papulose*.

PAP'ULOSE, *Papulo'sus*, *Pap'ulous*, *Papula'tus*, *Pimpled*, *Pap'ular*, *Papula'ris*, (F.) *Papuleux*, from *papula*. Of or belonging to, resembling, or covered with, *papule* or pimples.

PAQUERETTE VIVACE, *Bellis*.

PAR NERVO'RUM, *Syz'gyji nervo'rum*. A pair of nerves.

PAR NONUM, *Hypoglossus* — p. *Opticum Nervorum*, *Optic nerve* — p. *Primum nervorum cerebri*, *Olfactory nerve* — p. *Quartum*, *Pathetic nerve* — p. *Quintum nervorum cerebralium*, *Trigemini* — p. *Secundum nervorum*, *Optic nerve* — p. *Septimum sive faciale*, *Facial nerve* — p. *Tertium*, *Motores oculorum* — p. *Trigeminum*, *Trigemini* — p. *Trium funicularum*, *Trigemini* — p. *Vagus*, *Pneumogastri* — p. *Visorius*, *Optic nerve*.

PARA, *para*, a common prefix, 'by, near, contrary to, through,' (*per*); 'above and beyond,' (*ultra*); 'besides,' (*præter*). In certain terms, as in *Paracausis*, *Parapsis*, *Parabysma*, &c., used by Dr. Good, *para* means a defective or morbid condition.

PARA NUT, see *Pichurim* beans.

PARABAL'ANUS, from *παρὰβαλλειν*, (*para*, and *βαλλειν*, 'to cast,') 'to expose one-self.' A name given, by the ancients, to a person who devoted himself to the service of the sick in hospitals; and particularly during epidemics and the plague.

PARABYS'MA, from *para*, and *βυσιν*, 'to stuff.' Infarction or engorgement of an organ — as *Parabysma Lie'nis*, *Engorgement of the spleen*.

PARABYSMA MÉSENTERICUM, *Tabes mesenterica*.

PARABYS'TIA, same etymon. *Engorgement or infarction of an organ with blood*.

PARACELSUS'TA, *Paracel'sist*, *Paracel'sian*; from *Paracelsus*. A follower of *Paracelsus*.

PARACELSISTICA MEDICINA, see *Spagyrist*.

PARACENTE'RIMUM. Same etymon as the next. *Woolhouse* has given this appellation to a small trocar, employed by *Nuck* for puncturing the eye in cases of *dropsy* of that organ.

PARACENTE'SIS, *Perfora'tio*, *Punctio*, *Punctu'ra*, *Cenembat'esis*, *Cente'sis*, *Compunctio*, (F.) *Paracente'se*, from *παράκεντω*, (*para*, and *κεντω*, 'I pierce,') 'I pierce through.' *Puncture*. The operation of *tapping* to evacuate the collected fluid in *ascites*, *ovarial dropsy*, &c.

PARACENTESIS, *Puncturing* — p. *Thoracis*, *Thoracocentesis*.

PARACENTETERION, *Trocar*.

PARACENTICION, *Trocar*.

PARACEPH'ALUS, (F.) *Paracéphale*, from

παρα, 'defective,' and *κεφαλή*, 'head.' A genus of monsters, with the head badly formed, but voluminous; the face distinct, with a mouth; rudimentary sensorial organs, and thoracic members.

PARACHRŒ'A, from *para*, and *χρῶσα*, 'colour.' Morbid change of colour of the surface, especially of the face.

PARACHROMA, *Achromatopsia*.

PARACHROSIS, *Decoloration*.

PARACINE'SES, (G.) *Parakinesien*, from *para*, and *κίνησις*, 'motion.' Diseases of the motor nerves; morbid movements of voluntary muscles.

PARACMASIS, *Decline*.

PARACMAS'TIC, *Paracmas'ticus*, from *παράμαζω*, (*para*, and *ακμή*, 'the highest point,') 'I decrease.' *Decreasing*. An epithet for a distemper, which gradually decreases. Also, according to *Galen*, the period of life when a person is said to grow old, which he places at from 35 to 49, after which he is said to be old — a definition that would not suit us at the present day. — *Gorræus*, and *Castelli*.

PARACMASTICOS, see *Acmaستicos*.

PARACME, *Decline*.

PARACOE, see *Cophosis*, *Paracausis*.

PARAC'OPĒ, *Paraph'ora*, *Paracru'sis*, from *παράκοπτω*, (*para*, and *κοπτω*, 'I strike,') 'I strike falsely.' *Delirium*. In *Hippocrates*, it means the slight delirium which sometimes occurs in febrile diseases.

PARACOUSIA, see *Cophosis*.

PARAC'RISES, (G.) *Parakrisien*: from *para*, and *κρίσις*, 'secretion.' Diseases of the secretory function. — *Fuchs*.

PARACRUSIS, *Paracope*.

PARACUSIS, *Cophosis*. Also, *perverted audition*.

PARACU'SIS ACRI, *Audi'tus acrior*, *Paracru'sis oxyco'ia*, from *para*, and *ακούσις*, 'the act of hearing.' The hearing painfully acute, and intolerant of the lowest sounds; a symptom in *otalgia*, *epilepsy*, *cephalitis*, and *febrile affections*.

PARACUSIS DUPLICATA, *Double hearing* — p. *Imaginaria*, *Tinnitus aurium* — p. *Imperfecta*, *Double hearing*, *P. perversa* — p. *Obtusa*, *Baryco'ia* — p. *Oxyco'ia*, *P. acris*.

PARACUSIS PERVER'SA, *P. Willisiana* seu *imperfecta*, *Perverse hearing*. The ear only sensible to articulate sounds, when excited by other and louder sounds intermixed with them. — *Good*.

PARACUSIS SURDITAS, see *Cophosis* — p. *Willisiana*, *Paracausis perversa*.

PARACYCLE'SES, (G.) *Parakyklesen*, from *para*, and *κύκλισις*, (*κύκλος*, 'a circle,') 'circulation.' Diseases of the blood as regards its distribution and motion. — *Fuchs*.

PARACYESIS, *Pregnancy*, *morbid*, *Pregnancy*, *preternatural* — p. *Abortus*, *Abortion* — p. *Tubaria*, *Salpiugocyesis*.

PARACYNAN'CHĒ, (*para*, and *cynanche*.) *Inflammation of the external muscles of the larynx*. According to others, a slight *cynanche*.

PARÆSTHESIA, *Paresthesis* — p. *Olfactoria*, *Parosmia*.

PARÆSTHESIS, *Paresthesis* — p. *Auditus flacca*, *Proptoma auricularum*.

PARÆTHENAR, *Parathenar*.

PARAGEUSIS, *Ageustia*. Also, *perversion of taste*, *Parageu'sia*, *Parageust'ia*, *Allotriogeus'tia*, *Gustus deprava'tus*, from *para*, and *γευσίς*, 'taste.'

PARAGEUSTIA, *Parageusis*.

PARAGLOSSA, *Paraglos'se*, from *para*, and *γλωσσα*, 'the tongue'; *Swelling of the tongue*; *Dysph'gia Linguo'sa*, *Glossomegist'us*, *Macroglos'sa*, *Prolap'sus linguæ*. *Sauvages*, under the term *Paraglossa deglutito'ria*, means a pretended

doubling of the tongue into the pharynx, (F.) *Renversement de la langue*. See Glossocele.

PARAGOGE, Abduction, Coaptation.

PARAGOMPHOSIS, *Paragomphosis capitis*, from *para*, and *γομφωσις*, 'a nailing.' Incomplete wedging of the head of the child in the pelvis during labour.

PARAKINESIEN, Paracineses.

PARAKRISIEN, Paracrisis.

PARAKYKLESEN, Paracycleses.

PARALALIA, Mogilalia — p. Nasalis, Rhinophonia.

PARALAMP'SIS, *παλαμψις*, from *παλαμψω*, (*para*, and *λαμψω*, 'I shine,') 'I shine at the side of;' *Macula corneæ margaritæcea*, *Perla*. A cicatrix on the transparent part of the eye.—Hippocrates.

PARALEREMA, Delirium.

PARALLAGE, Insanity.

PARALLAGMA, *Chevauchement*.

PARALLAXIS, *Chevauchement*, Insanity.

PARALLE'LA. A kind of scurfy, cutaneous eruption, affecting the palms of the hands, in parallel lines, and symptomatic of the venereal disease.—Forestus.

PARALLELISM OF DISEASES, Isopathia.

PARALOGIA, Delirium.

PARALOPH'IA, from *para*, and *λοφια*, 'the first vertebra of the back.' The lower and lateral part of the neck, near the vertebra.—Keil.

PARALYSÉ, Paralytic.

PARALYSIE, Paralysis—p. *Musculaire atrophique*, Atrophic musculaire, progressive—p. *Saturnine*, Palsy, lead.

PARALYSIS, *Par'esis*, *Resolutio membrorum seu nervorum*, *Carus paralysis*, *Catal'ysis*, (F.) *Paralysie*, *Résolution des membres*; *Aneur'ria*, *Anev'ria*, *Aner'vismie*,—Piorry; *Palsy*; from *παρالىω*, (*para*, and *λυω*, 'I loosen,') 'I relax.' Abolition or great diminution of the voluntary motions, *Myoparal'ysis*, and sometimes of sensation, in one or more parts of the body.

Palsy is said to be *local*, when it affects only a few muscles. When it extends to half the body, vertically or horizontally, it is called *Hemiple'gia* or *Paraple'gia*. It is commonly symptomatic of disease of the brain or of the nerves themselves, and is a frequent accompaniment, precursor, or successor of apoplexy,—*Phrenoparal'ysis*. The immediate cause is, generally, pressure, either by blood effused, or by serum, or by vascular turgescence. At its onset, therefore, blood-letting may be advisable; but, afterwards, the disease becomes one of nervous debility, and requires stimulants to the paralyzed parts, or to the mucous membranes,—frictions, sinapisms, blisters, the moxa, baths, electricity, galvanism, purgatives, and the nux vomica, which last has the property of exciting movements where the will has no longer power. The disease generally admits only of palliation, and is extremely apt to recur.

PARALYSIS, *Primula veris*.

PARALYSIS AG'ITANS, P. *trem'ula*, *Syn'clonus ballis'mus*, *Scelotyr'bè festi'nans*, *Tremor*, *Tromos*, *Shaking Palsy*, *Trembling Palsy*. A variety of tremor, in which the muscles are in a perpetual alternation of contraction and relaxation.

PARALYSIS, BELL'S, *Bell's Palsy*, *Histrion'ic Paral'ysis* or *Palsy*, *Paral'ysis facia'lis*, *Proso-paral'ysis*, *Trismus diastrophè Sauvage'sii*, *Diastrophè Gale'ni*, *Hemiple'gia facia'lis*, *Oris tortu'ra paralyt'ica Linnæ'i*, *Hemiprosople'gia*. The paralysis of the face induced by a lesion of the portio dura, has been called Bell's Palsy, owing to Sir Charles Bell having been one of the first to investigate it minutely.

PARALYSIS BERIBERIA, Beriberi—p. *Extremi-tatum*, *Acro-paralysis* — p. *Facialis*, *Paralysis*,

Bell's—p. *Hemiplegia*, *Hemiplegia*—p. *Histrion'ic*, *Paralysis*, Bell's—p. of the Insane, *Dementia paralytica* — p. *Intestini recti*, *Proctoparalysis* — p. *Intestinatorum*, *Enteroparalysis* — p. *Linguae*, *Glossolysis* — p. *Medullarum*, *Paraplegia* — p. *Metallica*, *Palsy*, lead—p. *Nervi hypoglossi*, *Glossoplegia*—p. *Nervi vagi in parte thoracica*, *Asthma* — p. *Nervorum thoracis*, &c., *Stethoparalysis*—p. from Poisons, P. *Venenata*—p. *Rachialgia*, *Colic*, *metallic*—p. *Saturnine*, *Palsy*, lead—p. *Scorbuitica*, *Pellagra* — p. *Spinalis*, *Paraplegia* — p. *Tremula*, *Paralysis agitans*.

PARALYSIS VENENATA, *Paralysis e vene'nis*, *Paralysis from poisons*. Paralysis, the result of poisonous substances—as of lead, mercury, arsenic, ergot, &c.

PARALYSIS E VENENIS, P. *Venanata*—p. *Ventriculi*, *Gastroparalysis*.

PARALYTIC, *Paralyt'ic*, *Par'alyzéd*, *Pal'sied*, (F.) *Paralysé*, *Paralytique*. Same etymon as Paralysis. Affected with or causing paralysis.

PARALYTIC STROKE, see Stroke, paralytic.

PARALYZED, Paralytic.

PARAME'NIA, from *para*, and *μην*, 'a month,' *Menstruatio anom'ala*, *Menses anom'ala*, *Mis-menstruation*. Difficult menstruation. Disordered menstruation.

PARAMENIA DIFFICILIS, *Dysmenorrhœa* — p. *Erroris*, *Menstruation*, vicarious — p. *Obstructionis*, see *Amenorrhœa* — p. *Profusa*, *Menorrhagia* — p. *Superflua*, *Menorrhagia*.

PARAME'RIA, *παραμηρια*, from *para*, and *μηρος*, 'the thigh.' The internal parts of the thigh.

PARAMESOS, Annular finger, see Digitus.

PARAMO DE RUIZ, MINERAL WATERS OF. A remarkable acid spring in New Granada. It contains free sulphuric and chlorohydric acids, and has a temperature of 157° Fabr.

PARANEPHRI'TIS, from *para*, and *nephritis*, 'inflammation of the kidney.' Inflammation of the renal capsules, *Inflammat'io renum succenturiatorum*.

PARANŒA, Delirium, Dementia.

PARANYMPH'US, from *para*, and *νυμφη*, 'a young spouse,' 'a bride.' A name given by the ancients to him who led the bride to the house of her husband. The term was adopted into the ancient schools of medicine to designate the usual discourse pronounced at the end of the prescribed period of study for licentiate, in which the qualifications and merits of the candidate were described.

PARAPATHIA, Pathomania.

PARAPECHYON, Radius.

PARAPHIA, Parapsis.

PARAPHIMOSIS, *Periphimo'sis*, *Circumligatu'ra*, *Phimo'sis circumlig'ata*, *Penis lipoderm'us*, from *para*, and *φιμωω*, 'I bridle.' Strangulation of the glans penis, owing to the opening of the prepuce being too narrow. It frequently happens in persons affected with phimosis, when the prepuce has been pushed violently behind the base of the glans, during copulation, &c. In paraphimosis, the narrow and resisting aperture of the prepuce forms, behind the corona glandis, a kind of ligature, which strangulates the part, causes it to swell and inflame, and even to become gangrenous. Attempts must be made to bring back the prepuce. These excite considerable pain, yet they must be persevered in for some time; and should they not succeed, the rings, formed by the tumefied prepuce, must be cut transversely, and the antiphlogistic treatment be adopted.

PARAPHOBIA, Hydrophobia.

PARAPHO'NIA, from *para*, and *φωνη*, 'the voice.' Affection of the voice, when its character or timbre is less agreeable.

PARAPHONIA CLANGENS, Oxyphonia — p. Gutturalis, Asaphia — p. Nasalis, Rhinophonia — p. Puberum, Hirquitalitas — p. Rauca, Raucedo — p. Ulcerosa, Oxyphonia.

PARAPHORA, Delirium, Paracope.

PARAPHRENESIS, Paraphrenitis — p. Diaphragmatica, Diaphragmitis.

PARAPHRÉNIE, Insanity.

PARAPHRENITIS, from *para*, and *φρενες*, 'the diaphragm'; *Paraphrenesis*, (F.) *Paraphrénésie*. A name given to inflammation of the diaphragm, (see Diaphragmitis,) which was supposed always to produce delirium:—as well as to the delirium itself accompanying that affection. See Phrenitis.

PARAPHROSYNE, Delirium.

PARAPHROTÉS, Delirium.

PARAPLASTIC, *Paraplasticus*, from *para*, and *πλαστικός*, 'formative.' Possessed of depraved formative powers,—as Carcinoma, Encephaloma, Melanosis, &c.

PARAPLE'GIA, *Paraplex'ia*, *Rachioparal'ysis*, *Rhachioparal'ysis*, *Rhachio'ple'gia*, *Myeloparal'ysis*, *Paral'ysis spina'lis scu Medulla'ris*, *Carus paraly'sis paraple'gia*, (F.) *Paraplégie*, from *para*, and *πλησσω*, 'I strike.' Palsy of the lower half of the body, including the bladder and rectum. It is, generally, owing to disease of some part of the cerebro-spinal axis; especially of the spinal portion. The ancients sometimes used the term for incomplete apoplexy. Some authors have, also, made a distinction between *paraplegia* and *paraplexia*,—using the former for *partial apoplexy*,—the latter for *general or complete apoplexy*.

PARAPLEURITIS, Pleurodynia.

PARAPLEXIA, Paraplegia.

PARAPOPHYSES, see Vertebra.

PARAPOPLEXY, *Parapoplex'ia*, from *para*, and *αποπληξια*, 'apoplexy.' False apoplexy; a soporous state, resembling apoplexy; and especially that which occurs in the paroxysms of pernicious intermittents.

PARAP'SIS, *Paraph'ia*, from *para*, and *απτομαι*, 'I touch.' Sense of touch or general feeling vitiated or lost.—Good.

PARAP'SIS ACRIS TENERITUDO, Soreness — p. Expers, Torpor, Anæsthesia — p. Illusoria, Pseudæsthesia — p. Pruritus, Itching.

PARARMA, Fimbria.

PARARRHYTHMICUS, Pararrhythmus.

PARARRHYTHMUS, *Pararrhyth'micus*, from *para*, and *ρυθμος*, 'rhythm.' An epithet for the pulse, when it has not the rhythm proper to the age and constitution of the individual.

PARARTHRE'MA, *Pararthro'ma*, *Pararthre'sis*, *Pararthro'sis*, *Parce'tasis*, *Parastrep'sis*, from *para*, and *αρθρον*, 'a joint,' Incomplete luxation; subluxation.

PARASCEPAS'TRA, from *para*, and *σκεπεζω*, 'I cover.' A cap or bandage, which covers the whole head.—Galen.

PARASCEUE, Apparatus.

PARASCHIDES, from *para*, and *σκιζω*, 'I cleave.' Fragments or splinters of a broken bone.

PARASITE, *Parasit'us*, from *παρσιτειν*, (*para*, and *σιτος*, 'corn,' 'food.') 'I eat by the side of.' Parasites are plants which attach themselves to other plants; and animals which live in or on the bodies of other animals,—so as to subsist at their expense. The mistletoe is a parasitic plant;—the louse a parasitic animal. The chief parasitic animals are the *Pediculus humanus corporis*, *P. cap'itis*, *P. pubis*, *Pulex irritans*, *P. pen'tetrans*, and the *Ac'arus Sca'biei*.

PARASIT'IC, *Parasit'icus*, *Parasitoid*, *Parasitoid'es*. Same etymon. Having the nature of, or resembling a parasite,—as 'parasitic growths,' tubercles, cancer, monster, (F.) *Parasitaire*, &c.

PARASITICIDE, Antiparasitic.

PARASITISM, *Parasitism'us*. Same etymon as Parasite. The condition of a parasite, or of an organized body which lives on another organized body.

PARASITISMUS INTESTINALIS, Helminthiasis — p. Superficiæ, Malis.

PARASITOG'ENY, *Parasitogen'ia*, *Parasitogen'esis*. The corporeal condition, which favours the development of parasites.

PARASITOID, Parasitic.

PARASPA'DIA, from *para*, and *σπασω*, 'I draw.' A preternatural opening of the urethra at the side of the penis. One whose urethra opens in this manner is called *Paraspadia'us* and *Paraspa'dias*.

PARASPADIAEUS, see Paraspadia.

PARASPIHAGIS, from *para*, and *σπαση*, 'the throat.' The part of the neck contiguous to the clavicles.

PARAS'TATA, *Paras'tates*, from *παριστημι*, (*para*, and *στημι*,) 'I stand near.' The prostate. In Hippocrates, it means the epididymis. The epididymes were called by Herophilus and Galen *Varico'sæ parastata*, to distinguish them from *glandulo'sæ parastata* or *prostate*. Rufus of Ephesus called the Tubæ Fallopiæ *Parastata varico'sæ*.

PARASTATA ADENOIDES, Prostate — p. Glandula, Prostate — p. Glandulosa, Prostate.

PARASTATES, Parastata.

PARASTATI'TIS, *Epididymi'tis*; from *parastata*, 'epididymis,' and *itis*, denoting inflammation. Inflammation of the epididymis.

PARASTREM'MA, *Paras'trophê*, from *παραστρεφω*, (*para*, and *στρεφω*, 'I turn,') 'I distort or pervert.' Convulsive distortion, especially of the face, the soft parts being drawn laterally.

PARASTREPSIS, Pararthrema.

PARASTROPHE, Parastremma.

PARASYNANCHE, Cyananche parotidæa.

PARASYSTOLE, Aeinisia.

PARATH'ENAR, *Paræ'thenar*, from *para*, and *θεναρ*, 'the sole of the foot.' Winslow called *grand parathénar*, *parathénar major*, a portion of the abductor of the little toe, *musculus scandula'rius*; and *petit parathénar*, *parathénar minor*, the short flexor of that toe.

PARATHENAR MAJOR, Abductor minimi digiti pedis — p. Minor, Flexor brevis minimi digiti pedis.

PARATHROMA, Elongatio.

PARATONIA, see Spasm.

PARATOPIA, Luxation.

PARATOP'LE, from *para*, and *τοπος*, 'place.' Diseases in which organs are removed from their proper position. See Ectopia.

PARATRIMMA, Chafing.

PARATROPE, Apotrope.

PARAT'ROPHY, *Paras'trophê*, *Paratroph'ia*, from *para*, and *τροφή*, 'nourishment. Misnutrition.

PARBREAKING, Vomiting.

PARDALIANCHES, Aconitum.

PARDALIANCHIUM, Aconitum.

PARCE'TAMA, *Parce'tasis*, from *para*, *εκ*, 'out of,' and *τεινω*, 'I stretch.' Immoderate extension, distension, or dilatation of a part—as of the heart.

PARRECTASIS, Pararthrema, Parectama.

PARGOR'IC, *Paregor'icus*, *So'piens*, (F.) *Parégorique*, from *παρηγορεω* (*para* and *αγορευω*), 'I soothe, I calm.' That which soothes or assuages—as paregoric elixir. An anodyne.

PARAIEA, Gena.

PARAIEA, see P. brava.

PARAIEA BRAVA, *Cissam'pelos Pareira*, *Pa'reira*, *Butua*, *Abu'ta*, *Albu'tua*, *Boton*, *Cua-pebo*, *Overo butua*, *Wild vine*, *Velvet leaf*. Family

Menispermeæ. *Sec. Syst.* Diœcia Monadelphia. The root of this plant—*Paireira* (Ph. U. S.)—a native of South America and the West Indies, has a sweet taste, with considerable bitterness and slight roughness. It has been recommended in nephritic and calculous affections; but it is not much used. By A. de St. Hilaire, *Paireira* is assigned to *Cissampelos glaberina*.

PARELLE, *Rumex hydrolapathum*, R. patentiâ.

PARENCEPHALIS, Cerebellum.

PARENCEPHALITIS, Cerebellitis.

PARENCEPHALOCE'LE, from *παρεγκεφαλις*, (*para*, and *εγκεφαλος*, 'the brain,') 'the cerebellum,' and *κληη*, 'a rupture.' *Hernia of the cerebellum*; a very rare disease. It occurs under the form of a soft, indolent, or slightly painful tumour, without change in the colour of the skin, and is situate in the occipital region. It is constituted of the cerebellum, which escapes through an aperture in the occipital bone. Great attention must be paid not to mistake it for an ordinary tumour, as its extirpation would be attended with fatal consequences.

PARENCEPHALUS, Cerebellum.

PAREN'CHYMA, *Caro parenchymat'ica* seu *viscerum* seu *viscera'lis* seu *viscero'sa*, *Substantia parenchymat'osa*, *Proched'ma*, (F.) *Parenchyma*. The texture of glandular and other organs, composed of agglomerated globules united by areolar tissue, and tearing with more or less facility. Such is the texture of the liver, kidneys, &c. *Παρεγχυμα* signifies, in Greek, effusion, (*para*, *en*, and *χυνω*, 'I pour,') and it was believed, that this tissue consisted of effused blood or other fluid.

PARENCHYMA TESTIS, Pulpa testis.

PAREN'CHYMAL, *Parenchym'atous*, *Paren'chymous*, *Parenchyma'lis*, *Parenchymat'icens*, (F.) *Parenchymateux*; same etymon. Belonging or relating to the parenchyma of an organ.

PARENCHYMATITIS; from *parenchyma*, and *itis*, denoting inflammation. *Inflammatio parenchymat'ica*. Inflammation of the substance of an organ.

PARENCHYMATOUS, Parenchymal.

PAR'ESIS, from *παρημι*, 'I relax.' (F.) *Parésie*. Paralysis. According to some, a slight, incomplete paralysis, affecting motion, not sensation.

PARESTHE'SIS, *Paræsthe'sis*, *Paresthe'sia*, *Sensus imperfectus*, from *para*, and *αἰσθησις*, 'sensation.' Congenital misconstruction of the external organs of sense. A genus in the nomenclature of Good. Also, perversion of sensibility.

PAR'ETICA EXARTHRO'SIS. Luxation from relaxation of the ligaments of a joint.

PARETICUS, Relaxant.

PAREYRA, *Paireira brava*.

PARFUM, Suffimentum.

PARIERA, *Paireira brava*.

PARIES, Table.

PARI'ETAL, *Parieta'lis*, *Pariet'inus*, from *paries*, *parietis*, 'a wall.' Appertaining to the parietes or walls of an organ or to the parietal bones.

PARIETAL ARTERY, see P. Bones.

PARIETAL BONES, *Ossa parietalia* seu *vertic'alia* seu *vertic'is* seu *sincip'itis* seu *breg'matis* seu *bregmat'ica* seu *nera'lia* seu *tetrago'na*, are two fellow-bones, occupying the lateral and upper parts of the cranium, in the formation of which they assist. They have a quadrilateral shape: their external surface is convex, and presents, at its middle part, an eminence called the *Parietal protuberance*, *Tuber parietal'e*, (F.) *Bosse pariétale*. Their inner or cerebral surface, which is concave, has a depression that corresponds with the preceding eminence, and which is called the *Parietal fossa*, *Fossa parietalis*. Above and be-

hind, near the superior edge of these bones, is a foramen, which does not always exist, called the *Parietal foramen*, *Fora'men parietal'e*, through which passes a vein—*parietal vein*—that opens into the superior longitudinal sinus of the dura mater; and an artery—*parietal artery*—a branch of the occipital, which ramifies on the same sinus. Each parietal bone is articulated *above*, with its fellow; *below*, with the temporal bone: *before*, with the frontal; *behind*, with the occipital, and by the anterior and inferior angle with the great ala of the sphenoid. Each parietal bone is developed from a single point of ossification.

PARIETAL FORAMEN, see P. Bones—p. Fossa, see P. Bones—p. Protuberance, see P. Bones—p. Veins, see P. Bones.

PARIETA'RIA, *P. officina'lis*, *Helx'inê*, *Vittra'ria*, *Wall pellitory*, (F.) *Parîétaire commune*, *Perce-muraille*, *Aunure*, *Herbe aux murailles* ou *des Nones*. Family, Urticææ. *Sec. Syst.* Polygamia Monœcia. This plant grows on old walls,—hence its name, from *paries*, *parietis*, 'a wall,'—and contains much nitrate of potassa. It is diuretic, but is not much used.

PARIETA'RIA PENNSYLVAN'ICA, *American Pellitory*, a small weed, flowering from June to August, has been used in juice or decoction as a diuretic, deobstruent [?] and emmenagogue.

PARI'ETES, Plural of *Paries*, 'a wall,' (F.) *Parois*. A name given to parts which form the enclosures or limits of different cavities of the body, as the *Parietes of the cranium, chest, &c.*

PARIETINUS, Parietal.

PARIS, *P. quadrifolia*, *Solutum quadrifolium*, *Uva inver'sa* seu *lupi'na* seu *vulpi'na*, *Oneyberry*, *Truelove*, (F.) *Parisette*, *Raisin de Renard*, *Herbe à Paris*, *Étrangle-loup*. It possesses narcotic properties, and was formerly considered a powerful love philter. It is emetic, and is sometimes used externally as a resolvent and anodyne.

PARISAGOGE INTESTINORUM, Intussusception.

PARISETTE, Paris.

PARISTH'MIA, *para*, and *ισθμος*, 'the throat.' A word employed to designate the tonsils, and, likewise, inflammation of the tonsils. *Cynanche tonsillaris*, and *Cynanche* in general.

PARISTHMIOT'OMUS, from *παρισθμια*, 'the tonsils,' and *τεμνω*, 'I cut.' An instrument with which the tonsils were formerly scarified.

PARISTHMITIS, Cynanche, C. tonsillaris.

PARISTHMIUM, Tonsil.

PARISWORT, *Trillium latifolium*.

PARMA CITY, Cetaceum—p. Poor Man's, *Thlaspi bursa*.

PARME'LIA PARIET'INA, *Lichen parietinus*, *Yellow wall Lichen*, *Common Yellow Wall Moss*, which grows abundantly on trees and walls, Order, Lichenaceæ, is used in intermittent fever on account of its bitterness.

PARMELIA ISLANDICA, *Lichen Islandicus*—p. Plicata, *Lichen plicatus*—p. Pulmonacea, *Lichen pulmonarius*—p. Rocella, *Lichen roccella*—p. Saxatilis, *Lichen saxatilis*.

PARMENTIE'RA CERIF'ERA, *Palo de velas*, *Candle Tree*. A forest tree in the valley of the Chagres,—*Nat. Ord.* Crescentiaceæ,—the long cylindrical fruit of which, resembling candles, serves for food for cattle.

PAROARION, Parovarium.

PAROCHETEUSIS, Derivation.

PARODON'TIDES, from *para*, and *οδους*, 'tooth.' Tumours on the gums; parulis, &c.

PARODYNIA, *Dystocia*—p. *Perversa*, Presentation, preternatural.

PAROIS, Parietes.

PAROLE, Voice, articulated.

PAROMPHALOCE'LE, from *para*, *ομφαλος*,

'the navel,' and κηλη, 'rupture.' Hernia near the navel.

PARONIRIA, from *para*, and *ovειρον*, 'a dream.' Depraved, disturbed, or morbid dreaming; *Oνειροδυν'ια ακτι'να*, *Erethis'mus oneirodun'ia*. The voluntary organs connected with the passing train of ideas, overpowered by the force of the imagination during dreaming, and involuntarily excited to their natural or accustomed actions, while the other organs remain asleep.—Good.

PARONIRIA AMBULANS, Somnambulism—p. Salax, Pollution.

PARONYCHIA, *Paron'ychis*, *Paronychi'tis*, *Pan'aris*, *Redu'via*, *Rediv'ia*, *Vermis* seu *Pteryg'ium dig'iti*, *Panarit'ium*, *Digit'ium*, *Pandali'tium*, *Passa*, *Dactyl'i'tis*, *Pan'arium*, *Onychi'ia*, (F.) *Onglade*, from *para*, and *ονυξ*, *ονυχος*, 'the nail.' The ancients gave this name to an inflammatory tumour,—*Onychi'tis*, *Onyxi'tis* (Gross),—seated near the nail, and involving the pulp or matrix. Some of the moderns have extended it to inflammation of the hand, and even of the forearm. It usually means every phlegmonous tumour of the fingers or toes, and especially of the first phalanx. Four kinds of paronychia are commonly pointed out: 1. That seated between the epidermis and skin, called in France *Tourniole*. 2. That seated in the subcutaneous areolar tissue. 3. That occupying the sheath of a tendon; and 4. That considered to be seated between the periosteum and bone. The last three are only different degrees of the same disease, constituting *Whitlow*, (Prov.) *Teak*, (F.) *Mal d'aventure*:—the worst kinds, in English, are called *Felon*. The inflammation generally commences in the subcutaneous areolar tissue, and spreads to other parts, occasioning excessive, lancinating pain, owing to the parts being put upon the stretch; hence, the necessity of dividing them freely,—even down to the bone, when there is reason to believe that the affection belongs to the fourth division,—making use of emollient applications, the antiphlogistic treatment, and opiates to relieve pain.

PARONYCHIA, *Asplenium ruta muraria*—p. *Digitum*, *Digitium*.

PARONYCHIS, *Paronychia*.

PARONYCHITIS, *Paronychia*.

PAROPHOBIA, *Hydrophobia*.

PAROPIA, *Canthus* (lesser.)

PAROPLEXIA, *Paraplegia*.

PAROPSIS, *Dysaesthesia visualis*—p. *Amaurosis*, *Amaurosis*—p. *Cataracta*, *Cataract*—p. *Glaucoma*, *Glaucoma*—p. *Illusoria*, *Pseudoblepsia*—p. *Lateralis*, *Dysopia lateralis*—p. *Longinqua*, *Presbytia*—p. *Lucifuga*, *Nyctalopia*—p. *Noctifuga*, *Hemeralopia*—p. *Propinqua*, *Myopia*—p. *Staphyloma*, *Staphyloma*—p. *Staphyloma purulentum*, *Hypopyon*—p. *Staphyloma simplex*, *Hydrophthalmia*—p. *Strabismus*, *Strabismus*—p. *Synezisis*, *Synezisis*.

PAROPTE'SIS, from *παρ*, dim., and *σπταω*, 'I roast.' Forcing a sweat by placing a patient before the fire or putting him in a dry bath.

PARORA'SIS, from *para*, and *οραω*, 'I see.' Perversion of sight, which prevents the person from judging accurately of the colour of objects. *Achromatop'sia*. *Hallucination*.—Galen.

PARORCHID'IUM, from *para*, 'something wrong,' and *ορχις*, *ορχιδος*, 'testicle.' Any position of one or both testicles, different from that which they ought to occupy in the scrotum;—whether they may not have descended through the abdominal ring, or are drawn up to the groins by the cremaster muscle.

PAROR'CHIDO-ENTEROCE'LE, *Hernia paror'chido-enter'ica*. Internal hernia complicated with displacement of the testicle.—Sauvages.

PAROSMIA, *Anosmia*. Also, perversion of smell; *Parosm'ia olfacto'ria*, *Olfactus depravatus*, *Idiosyncras'ia olfacto'ria*, from *para*, and *οσμη*, 'odour.'

PAROSTIA, from *παρα*, 'defectively,' and *οσσειον*, 'a bone.' Bones untempered in their substance, and incapable of affording proper support.—Good.

PAROSTIA FLEXILIS, *Mollities ossium*—p. *Fragilis*, *Fragilitas ossium*.

PARTOTIA, *Cynanche parotidæa*.

PARTOTID, *Gland'ula parotide'a* seu *ad Aures*, *Parot'idis*, *Animel'læ*, *Alimel'læ*, *Lactici'ia*; from *para*, and *ους*, *ωρος*, 'the ear.' The largest of the salivary glands, seated under the ear, and near the angle of the lower jaw. It is composed of many separate lobes, giving rise to excretory ducts, which unite to form one canal, called the *Parotid duct*, *Steno' canal*,—the *Ductus superior* or *Superior salivary canal*, of some. This duct, after having advanced horizontally into the substance of the cheek, proceeds through an opening in the buccinator muscle, and terminates in the mouth opposite the second upper molaris. About the middle of its course, it sometimes receives the excretory duct of a glandular body, situate in its vicinity, and called the *Accessory Gland of the Parotid*, *So'cia Parot'idis*, *Gland'ula so'cia parot'idis*. In the substance of the parotid are found—a number of branches of the facial nerve, of the transverse arteries of the face, and the posterior auricular. It receives, also, some filaments from the inferior maxillary nerve, and from the ascending branches of the superficial cervical plexus. Its lymphatic vessels are somewhat numerous, and pass into ganglions situate at its surface or behind the angle of the jaw. The parotid secretes saliva, and pours it copiously into the mouth.

PARTOTID, *ACCESSORY GLAND OF THE*, see *Parotid*.

PARTOTID APONEURO'SIS. A sheath of great thickness, continuous, below, with the cervical fascia. It forms a frame-work to the parotid by means of fibrous prolongations from its deep surface. Its density accounts for the pain of parotitis, and for the difficulty with which pus makes its way to the surface.

PARTOTID ARTERIES, see *Parotid*—p. *Duct*, see *Parotid*—p. *Veins*, see *Parotid*.

PARTOTIDE, *Parotis*.

PARTOTIDE'AN, *Parotidæ'us*, (F.) *Parotidien*. Belonging or relating to the parotid.

PARTOTIDITIS, *Cynanche parotidæa*, *Parotis*.

PARTOTIDON'CUS, *Tumor parot'idis*, *T. Gland'ula parotide'æ*, from *parotis*, and *ογκος*, 'a tumour.' Swelling of the parotid.

PARTOTIS, *Phleg'monè parotide'a*, *Inflammatio parot'idum*, *Cynan'chè parotide'æ*, *Paroti'tis*, *Parotid'i'tis*, *Diosc'ri*, (F.) *Parotide*, is the name of a tumour seated under the ear; which is reddish, hard, and attended with obtuse pain; the progress to suppuration being slow and difficult. Sometimes it is of a malignant character, sloughing, and long protracted. Some French pathologists restrict the term *parotide* to symptomatic parotitis—as to that which occurs in plague; whilst they apply the terms *Oreillons* or *Ourles*, *Parotonec'ia*, to *Cynanche parotidæa* or *Mumps*.

PARTOTIS CONTAGIOSA, *Cynanche parotidæa*—p. *Epidemica*, *Cynanche parotidæa*—p. *Serose*

glutine tumens, Cynanche parotidæa—p. Spuria, Cynanche parotidæa.

PAROTITIS, Cynanche parotidæa, Parotis—p. Epidemica, Cynanche parotidæa—p. Erysipelatosa, Cynanche parotidæa—p. Polymorpha, Cynanche parotidæa—p. Specifica, Cynanche parotidæa.

PAROTONCIES, see Parotis.

PAROVA'RIUM, properly *Parov'rium*; *Corpusculum con'icum Rosenmülleri*, from *para*, and *ovov*, 'the ovary.' A body closely analogous in structure to the epididymis, which is seated between the Fallopian tube and the ovary in the broad ligament. The Corpus Wolffianum concurs in its formation.—Kobelt.

PAROXYN'TIC, *Paroxynticus*, (F.) *Paroxyntique*, from *παροξύνω*, 'I excite.' Relating to a paroxysm.

Jours paroxyntiques are days on which paroxysms take place.

PAR'OXYSM, *Paroxysmus*, from *παροξύνω*, (*para*, and *οξύνει*, 'to render sharp.') 'I irritate;' *Impetus*, *Insultus*, *Invasio*, *Exacerbatio*, *Accessio*, *Accessus*, (Old Eng.) *Aces*, (F.) *Exacerbation*, *Redoublement*, *Accès*. The augmentation which supervenes at equal or unequal intervals in the symptoms of acute diseases. Also, a periodical exacerbation or fit of a disease.

PAROXYSMAL, *Paroxysmalis*; same etymon. (F.) *Paroxystique*. Of or belonging to a paroxysm;—as a *paroxysmal* day, (F.) *Jour paroxystique*; a day on which a paroxysm of disease occurs.

PAROXYSMUS FEBRILIS, Pyrexia.

PAROXYSTIQUE, Paroxysmal.

PARTHENEIA, Virginity.

PARTHENIUM FEBRIFUGUM, *Matricaria*—p. Mas, *Tanacetum*.

PARTHEN'IUS (*Morbus*); from *παρθενος*, 'a virgin.' A disease in a young female. Also, chlorosis.

PARTHENOGEN'ESIS, 'virgin birth;' from *παρθενος*, 'a virgin,' and *γενεσις*, 'generation.' The successive production of procreating individuals from a single ovum, without any renewal of fertilization.—Owen.

PARTHENOL'OGY, *Parthenolog'ia*, from

παρθενεια, 'virginity,' and *λογος*, 'a description.' A description or consideration of the state of virginity in health or disease.

PARTHENUS, Virgin.

PARTIALIS, Local.

PARTICLES, PRIMITIVE, OF MUSCLES, Sarcous Elements.

PARTICULÆ SANGUINIS, Globules of the blood.

PARTIES, LES, Genital organs—p. *Génitales*, Genital organs—p. *Honteuses*, Genital organs—p. *Génoitres*, Genital organs—p. *Naturelles*, Genital organs—p. *Nobles*, Genital organs—p. *Sexuelles*, Genital organs.

PARTIO, Parturition.

PARTRIDGE-BERRY, *Gaultheria*, *Mitchella* repens.

PARTS, THE, Genital organs.

PARTURA, Parturition.

PARTU'RIENT, *Partu'riens*, from *parturire*, *parturiturum*, itself from *parere*, 'to bring forth.' Bringing forth, or about to bring forth, or having recently brought forth young.

The *Parturient*, *Puer'perous*, *Childbed* or *Lying-in* or *Lying-down* state, *Confinement*, *Puerperium*, generally comprises the period from parturition to perfect recovery, which is usually a month. In the north of England this is called the *steg-month*, requires careful management, and is subject to various diseases.

A *Parturient* or *Parturif'cient* is a medicine which induces or promotes labour; as ergot, and, perhaps borate of soda. See Abortive.

PARTURIFACIENT, Parturient.

PARTURIGO, Parturition.

PARTURIT'ION, *Puerperium*, *Partus*, *Partio*, *Parturiti'o*, *Parturigo*, *Partu'ra*, *Tocos*, *To'ctos*, *Taxis*, *Lochi'a*, *Apocy'esis*, *Mæu'sis*, *Maieu'sis*, *Nego'tium* seu *Actus parturitio'nis*, *Enix'us* seu *Enix'io* seu *Expul'sio fœtus*, *Apoll'ysis*, *Status parturien'di*, *Deliv'ery*, *Labour*, *Child-bearing*, *Child-birth*, *Birth*, *Trav'ail*, (Sc.) *Child-ill*, *Crying*, *Crying out*, (F.) *Accouchement*, *Couche*, *Trouvail d'Enfant*, *Enfantement*. Same etymon as Parturient. The act of delivery of the fœtus and its appendages, also the state during and immediately after delivery—*Childbed*, (Sc.) *Gizzenbed*, *Gizzen*, see Parturient. Labour is the necessary consequence of conception, pregnancy, and the completion of gestation. It does not take place, at the full time, until after nine months of utero-gestation,—the causes producing it being the contraction of the uterus and abdominal muscles. By different authors, the stages of labour have been variously divided. We may, perhaps, admit of four. The *first stage* comprises the precursory signs. One, two, or three days before labour, a mucous discharge, streaked with blood, takes place from the vagina, which is called the *Stignum*, *Leucorrhœa Nabothi*, *Hæmorrhag'ia Nabothi*, *Labour-show*, or *Show*; and, along with this, trifling grinding pains, called by the French *Mouches*, are felt in the loins and abdomen. *Second stage*:—Peculiar pains, which extend from the lumbar region towards the uterus; tension and dilatation of the neck and orifice of that organ; protrusion into the vagina of the envelopes of the fœtus, forming the *bag of waters*, (F.) *Poche des eaux*; and rupture or breaking of the waters. *Third stage*:—Contractions of the uterus and abdominal muscles; forcing pains; the head of the fœtus becomes engaged in the pelvis: the occiput being commonly situate above the left acetabulum, passes beneath the arch of the pubis. *Fourth stage*:—the head now presents at the vulva, the perineum being

considerably distended; at length it clears the external parts, and the rest of the body is easily disengaged. The child still continues attached to the mother by the umbilical cord, which has to be divided. In the course of fifteen or twenty minutes, trifling pains occur, and the secundines are expelled. This completes delivery—the *birth*, (F.) *Naissance* of the child. In by far the majority of cases, the head is the presenting part, the occiput directed anteriorly, and the face posteriorly. Of 12,633 children, born at the Hospital *La Maternité*, in Paris, from the 10th of December, 1797, to the 31st of July, 1806, the following were the presentations:

The head, with the face posteriorly...	12,120
The head anteriorly.....	63
The breech.....	198
The feet.....	147
The knees.....	3
Other positions.....	102
	12,633

The following table, drawn up from data furnished by Velpeau, gives an approximate view of the comparative number of presentations, according to the experience of the individuals mentioned:

Labour has received different names, according to the period of pregnancy at which it occurs, and the mode in which it takes place. It is called *miscarriage* or *abortion*, prior to the seventh month; *premature labour*, *Omotoc'ia*, *Partus præcox* seu *præmaturus*, between this and eight months and a half; and *labour at the full period*, (F.) *Accouchement à terme*, when it happens at the end of nine months. Labours have likewise been variously divided by different authors. Perhaps the one into *Natural*, *Preternatural*, and *Labourious*, is as common as any;—*natural Labour* meaning that which would occur without manual assistance; *preternatural*, requiring the assistance of art, but by the hand solely; and *laborious* or *instrumental*, requiring instrumental assistance; which M. Capuron calls *Accouchement Mécanique*. *Powerless labour*, the *Inertie par*

épuisement of Madame Lachapelle, is that in which the muscular powers from exhaustion are unable to accomplish such delivery.

Forced labour or *parturition*, (F.) *Accouchement ou Avortement provoqué*, is labour or abortion, induced by art. When labour is accompanied with other phenomena of a deranging character, it is said to be *complicated*. When the child, even when reduced in size, cannot pass, it is termed *impracticable*, &c. See *Dystocia*.

The French use the term *Part, Partus*, at times, synonymously with *delivery*; at others, with *fœtus*, *Maieu'na*, *Mæu'na*. *Suppression de part* means concealment of delivery; *Part légitime*, a fœtus which comes into the world with the condition necessary for its enjoying advantages granted by law; and *Part illégitime*, one that does not fall under those conditions.

TABLE OF THE COURSE AND MANAGEMENT OF DIFFERENT KINDS OF LABOURS.

I. NATURAL LABOURS.		
<i>Or those in which Delivery can be effected without Assistance.</i>		
HEAD PRESENTING. (Four Positions.)	1. <i>Occiput towards the Left Acetabulum.</i>	The head with the chin bent upon the breast clears the brim of the pelvis. Motion of rotation produced by the inclined planes of the pelvis; the occipital protuberance is carried behind the symphysis pubis, and the face towards the hollow of the sacrum.
	2. <i>Occiput towards the Right Acetabulum.</i>	The head attains the outlet: clears it; the occiput being first disengaged, and the face afterwards, which passes successively along the whole of the hollow of the sacrum. The shoulders enter the brim diagonally; and execute the movement of rotation. The one behind first clears the outlet. The same thing occurs with the nates.
	3. <i>Occiput towards the Right Sacro-iliac Symphysis.</i>	The same course is here followed: except that after the rotary movement, the face passes behind the symphysis pubis, and the occiput into the hollow of the sacrum. The occiput is first extruded;—the face next.
	4. <i>Occiput towards the Left Sacro-iliac Symphysis.</i>	When the chin presents and is turned forwards, the face is first expelled; the head is thrown backwards. This presentation is uncommon. If the chin present and be thrown backwards, natural delivery cannot be effected.

NATURAL LABOURS.—CONTINUED.

LOWER EXTREMITY PRESENTING.
(Four Positions of the Feet, Knees, and Breech.)

1. *Heel, Tibia, or Sacrum towards the left Acetabulum.*
2. *Heel, Tibia, or Sacrum towards the Right Acetabulum.*
3. *Heel, Tibia, or Sacrum towards the Right Sacro-iliac Symphysis.*
4. *Heel, Tibia, or Sacrum towards the Left Sacro-iliac Symphysis.*

The nates enter the brim diagonally; movement of rotation: the one passes behind the symphysis pubis; the other towards the hollow of the sacrum. The one behind is first extruded.

The same thing happens to the shoulders. The chin is bent upon the chest to clear the brim: movement of rotation: the occiput passes behind the symphysis pubis, and the face towards the hollow of the sacrum. The face clears the outlet first; the occiput last.

The same progress, except that after the movement of rotation, the face is towards the pubis, and the occiput towards the sacrum. The face is here again delivered first.

II. PRETERNATURAL LABOURS,

Or those which require Manual Assistance only.

I. PRESENTATION OF THE HEAD, UPPER EXTREMITIES, BACK, ABDOMEN, &c.

1. When the labour is without any serious complication, and the head is not in a good position at the brim of the pelvis, endeavours are to be made to place it in its natural position: the hand to be introduced with the fingers united, and the long diameter of the head to be placed diagonally in the brim, if possible. Or the lever may be fixed over the occiput, and, by drawing it down, a closer approximation of the chin and chest may be effected; the position of the head to the pelvis being at the same time attended to.
2. If complicated with syncope, convulsions, hemorrhage, want of uterine action, &c., the feet must be laid hold of, and the child *turned*. For this purpose, empty the rectum and bladder; and turn, if possible, prior to the escape of the liquor amnii. The female may be placed on her back or left side, with the breech over the edge of the bed. Use the right or left hand, according as the feet of the child are to the right or left side of the pelvis; always so introducing the hand, that the child shall be in its palm, and the back of the hand opposed to the inner surface of the uterus. The hand and arm to be introduced during an interval of pain: and they must be flattened and tranquil whilst the uterus is contracting forcibly. If both feet cannot be readily brought down, seize one, and tie a fillet around it.
3. If the toes point to the vertebral column, or to the abdomen of the mother, the head, in its descent, will not enter the pelvis: the chin and occiput will be hitched on the pubis and promontory of the sacrum. In such case, grasp the nates as soon as they have passed the os externum; and, during a pain, endeavour to direct the toes towards either sacro-iliac synchondrosis. When the fingers can be passed along the body of the child, and over the shoulders to the bend of the elbows, draw down the arms successively. When the body is expelled, and the head filling up the brim, the termination of labour must be accelerated by passing two fingers over the shoulder of the child; using moderate and steady extracting power, whilst one finger of the other hand, passed into the mouth, depresses the chin on the sternum. In this way, the head may be extracted.

III. INSTRUMENTAL LABOURS,

Or those requiring the Assistance of appropriate Instruments.

GENERAL OBSERVATIONS.

If the pains become feeble, or inadequate from any cause;—or if the presenting part be firmly wedged in the pelvis; or the woman be becoming exhausted, instrumental assistance may be required. In all such cases, place the female on the back or left side, empty the bladder and rectum; wait till the os uteri is in a fit state; afford assistance during the pains; introduce the instrument during the intervals between the pains: have the patient on her left side (generally); and extract according to the axes of brim and outlet, as the case may be.

1. *Short Forceps*

Apply these to the sides of the head of the child, so that the ears and parietal protuberances may be within the fenestra. Introduce the left-hand blade first: the index and middle fingers of the right hand guiding it to the ear. With the right hand pass the other in an opposite line, corresponding with the course of the first blade, guided by the fore and middle fingers of the left hand; the third and little fingers being employed to retain the left-hand blade in place; humour the instrument so as to allow the blades to lock. The handles may now be tied gently together. The force used must be from blade to blade, with a gentle, tractile effort.

2. *Long Forceps*

Applicable where the head does not enter the brim. The long forceps must be applied, in most cases, over the occiput and face of the child, so that the convex edges of the blades may be towards the hollow of the sacrum. When used, the power may be exerted from side to side, with moderate traction.

3. *Lever or Vectis*

The lever is applicable to the same cases as the forceps. It must not be used strictly as a lever, but as a hook with which to draw downwards. It may be applied to any part of the head, but is generally hitched on the occiput.

4. *Fillet and Blunt Hook*

In certain cases of breech and knee presentation, where the hand is insufficient, it may be necessary to pass over the joint a fillet, or the blunt hook, with which to exert some force of traction. The operation is very simple.

INSTRUMENTAL LABOURS.—CONTINUED.

EMBRYULCIA	Disproportionate size of head, or distorted or deformed pelvis, may require the child to be destroyed, and its bulk lessened; or the Cæsarean section or symphysotomy, or the induction of premature labour may be called for.
SYMPHYSTOMY AND CÆSAREAN SECTION.	The instruments required here, are the <i>Porforator</i> , <i>Crotchet</i> , and <i>Craniotomy Forceps</i> . Make a steady pressure on the abdomen; pass two fingers of the left hand up to the head: feel for a suture or fontanelle; introduce the perforator and bore through, until the progress of the instrument is arrested by its <i>shoulders</i> . Open the handles, and turn the instrument in different directions, so that the opening may be large enough to admit the perforator, with which the brain must be broken down.
SEPARATION OF THE HEAD OF THE FŒTUS FROM THE BODY.	If, after this, delivery cannot be accomplished without further aid, pass up the craniotomy forceps; open the handles slightly, and introduce the blade without teeth within the cranium. On closing the forceps, a hold is obtained; and a tractile force can now be exerted during the pains, and the extrusion of the child be effected.
INDUCTION OF PREMATURE LABOUR.	Should great difficulty exist at the brim, the bones at the top of the head may have to be removed, until the base alone remains. The chin must then be brought through first.
	The crotchet is often used instead of the craniotomy forceps, being passed into the opening made by the perforator, and hooked upon some bony projection in the interior of the skull; but it is not a good instrument. In presentations of the face demanding perforation of the cranium, the perforator should be introduced just above the nose, in the sagittal suture.
	When it is necessary to open the head after the lower extremities have been expelled, the perforation must be made behind the ear.
	In cases of great narrowness of the pelvis, the operation of <i>Symphysotomy</i> has been adopted by French practitioners,—rarely by British or American; and, in extreme cases, recourse has been had to the <i>Cæsarean Section</i> .
	If the body of the fetus has been forcibly separated, and the head left in the uterus, it must be laid hold of with one hand, and the forceps be applied; or the head be opened and delivered, as under embryulcia. Should the head have been brought away, and the body left behind, the feet must be brought down.
	In cases of narrowness of the pelvis, where the fetus, at the full term, cannot be born alive, delivery may be brought about at an earlier period, or as soon as the child is capable of carrying on its functions independently of the mother.
	The most advisable plan for accomplishing this object is merely to pass the finger round and round within the os and cervix uteri, so as to detach the decidua;—the membranes being thus left entire, and the life of the child not so much endangered, as where the membranes are punctured, and the waters evacuated. Parturition usually follows within forty-eight hours.

The laying of eggs by animals is termed, in French, *ponte*. The term has been applied to the periodical discharge—*ponte périodique*—of ova, (F.) *Chute des Œufs*, which is supposed to take place from the ovaries at each menstrual period.

PARTURIUM, DRY, Partus siccus.

PARTURIUM VANUM, *Fausse couche*.

PARTUS, Parturition—p. Abactio, Abortion—p. Abactus, Abortion—p. Cæsareus, Cæsarean section—p. Difficilis, Dystocia—p. Laboriosus, Dystocia, Laborious labour—p. Præcox, Parturition (premature)—p. Præmaturus, Parturition (premature)—p. Serotinus, Opsitocia.

PARTUS SICCUS, *Dry labour* or *parturition*. Labour, which is neither preceded nor attended by a discharge of the liquor amnii.

PARULIS, from *para*, and *ουλον*, 'the gum.' *Apostema parulis seu paroulis*, *Phlegmonè Parulis*, *Gum Boil*, *Alveolar abscess*. Small abscesses are so called which generally form in the alveoli and involve the gums, sometimes without any known cause, but which often depend upon carious teeth.

PARURIA, from *para*, and *ουρω*, 'I pass urine.' Morbid secretion or discharge of urine.

PARURIA INCONTINENS, Enuresis—p. Incontinens aquosa, see Diabetes—p. Inops, Ischuria, false—p. Mellita, Diabetes—p. Retentionis, Ischuria—p. Retentionis renalis, Ischuria—p. Retentionis vesicalis, Retention of urine—p. Stillatitia, Strangury—p. Stillatitia mucosa, Cystirrhœa.

PARVITAS MORBOSA PARTIUM ORGANICARUM, Microtesia.

PAR'YGRON, from *para*, and *'υγρος*, 'humid.' A liquid or moist preparation for allaying topical inflammation.

PAS D'ÂNE, Tussilage.

PASMA, Catapasma.

PASQUE FLOWER, *Anemone pulsatilla*.

PASSA, Paronychia.

PASSÈ CORINTHIACÆ, see *Vitis Corinthiaca*.

PASSAGES, DIGESTIVE, Ways, digestive—p. Second, Ways, second.

PASSAMBIO, Rio vinaigro.

PASSE-PIERRE, *Crithum maritimum*.

PASSERAGE, *Iberis amara*—p. *Sauvage*, *Cardamine pratensis*.

PASSIBILITY, GREAT, Hyperæsthesis.

PASSIFLORA LAURIFOLIA, *Bay-leaved Passion Flower*. *Ord.* Passifloræ. A native of Surinam. The fruit has a delicious smell and flavour, and quenches thirst, abates heat of the stomach, increases the appetite, &c.

PASSIFLORA MALIPOR'NIS, *Apple-shaped Granadilla*. The fruit of this species is esteemed a delicacy in the West Indies, where it is served up at table in desserts.

Some of the genus are said to possess narcotic and emetic properties.

PASSIO, Disease, Passion—p. *Æmoptoica*, *Hæmoptysis*—p. *Cadiva*, *Epilepsy*—p. *Cardiaca*, *Cardialgia*—p. *Cœliaca*, *Cœlia flux*—p. *Cholerica*, *Cholera*—p. *Felliflua*, *Cholera*—p. *Hæmoptoica*, *Hæmoptysis*—p. *Hypochondriaca*, *Hypochondriasis*—p. *Hysterica*, *Hysteria*—p. *Iliaca*, *Ileus*—p. *Ischiadica*, *Neuralgia femoro-poplitea*—p. *Pleuritica*, *Pleuritis*—p. *Stomachica*, *Dyspepsia*—p. *Ventriculosa*, *Cœlia flux*—p. *Vomico-flua*, *Phthisis pulmonalis*.

PASSION, *Pas'sio*, *Aut'imi Pathe'ma*, *Affectus*, *Emotio*, from *patior*, *passus*, 'to suffer.' An active affection or emotion of the mind; as rage, terror, love, hatred, &c.

PASSION FLOWER, BAY-LEAVED, *Passiflora laurifolia*—p. *Hystérique*, *Hysteria*—p. *Iliac*, *Ileus*.

PASSIONES ANIMI, Affections of the mind.

PASSIVE, *Passivus*. Same etymon as *Passion*. An epithet for diseases which seem owing

to a greater or less diminution of the strength, or which are without apparent reaction. Thus, passive hemorrhages are such as supervene in debilitated individuals, or under conditions in which increased action of the arteries can scarcely be presumed. The term *passive* has, also, been given to aneurisms of the heart with extenuation of the parietes; in opposition to *active* aneurisms, with thickness of the parietes — hypertrophy.

PASSULÆ MAJORES, see *Vitis vinifera* — p. *Minores*, see *Vitis Corinthiaca*.

PASSULA'TUM, (*Uvæ passæ*, 'raisins, dried grapes.') A medicine in which the pulp of raisins is a chief ingredient.

PASSY, MINERAL WATERS OF. This village is in the vicinity of Paris. There are several springs, containing sulphates of lime, iron, and magnesia, alum, common salt, carbonate of iron, carbonic acid, &c. They are employed as a tonic and astringent.

PASTA DE ALTHÆÅ, Paste, marshmallow — p. *Amygdalina*, Confection (almond) — p. *Dactylis*, Paste, date — p. *Emulsiva*, Confection (almond) — p. *Jujubis*, Paste of jujubes — p. *Regia*, Confection (almond).

PASTA GLYCYRRHIZÆ GUMMA'TA ET ANISA'TA seu *Massa de extracto glycyrrhizæ*. A compound of extract of liquorice, gum Senegal, sugar, Florence orris-root, and volatile oil of aniseed. Demulcent.

PASTA ZINCI CHLORIDI, (F.) *Pâte de Canquoin*, Paste of Chloride of Zinc, Canquoin's Caustic Paste. This paste is made of three strengths, consisting, respectively, of chloride of zinc, 1 part; wheaten flour, parts 4, 3 and 2; water sufficient to make a paste. This caustic destroys the part in a direct ratio with the thickness of the layer applied.

PASTE, *Pasta*, (F.) *Pâte*. A viscid, tenacious mixture. Also, a compound medicine, like the *pastil*, but less consistent, flexible, less saccharine, and more mucilaginous.

A convenient paste for attaching labels to glass, or for other services, is made of gum tragacanth and water, to which alum is added. This the author always keeps by him. Another form is to make a solution of Gum Arabic, $\mathfrak{z}\text{ij}$, boiling water, $\text{f}\mathfrak{z}\text{ij}$, and glycerin, $\text{f}\mathfrak{z}\text{ij}$; and another is made by mixing powdered Gum Arabic, and powdered tragacanth, of each $\mathfrak{z}\text{ss}$, water, $\text{f}\mathfrak{z}\text{ss}$, acetic acid, $\text{m}\mathfrak{xx}$.

PASTE, CAGLIARI, see *Turundæ Italicæ*.

PASTE OF CHLORIDE OF ZINC, *Pasta Zinci chloridi*.

PASTE, DATE, *Massa seu Pasta de dactylis*. Composed of dates, sugar, gum Arabic, water, and orange-flower water.—Ph. P. Demulcent.

PASTE OF ICELAND MOSS, *Pasta Lichenis*, (F.) *Pâte de lichen*. A paste made by boiling lichen Islandicus to a proper consistence, and adding gum Arabic and sugar.

The *Pâte de Lichen opiacée* contains opium in addition; about $\frac{1}{3}$ d of a grain to an ounce.

PASTE, ITALIAN, see *Turundæ Italicæ*.

PASTE OF JUJUBES, *Pasta de jujubis*, *Massa de zizyphorum fructu*, (F.) *Pâte de Jujube*. Composed of jujubes, gum Senegal, sugar, water, and tincture of lemon-peel. Demulcent.

PASTE, MARSHMAL'LOW, *Massa de gummi Arabico*, *Pasta de althæâ*, (F.) *Pâte de Guimavee*. A compound of gum Arabic, sugar, white of egg, and orange-flower water.—Ph. P. It is demulcent.

PASTE, TOOTH, Dentifricium — p. *Vienna*, see *Powder*, *Vienna* — p. *Ward's*, *Confectio piperis nigri*.

PASTEL, *Isatis tinctoria*.

PASTÉQUE, *Cucurbita citrullus*.

PASTIL, *Pastillus*, *Diocres*, *Avicula Cip'ria*,

Cande'la fuma'lis, *Phthois*, *Phthois'cus*. A compound of aromatic substances in various shapes, used as a fumigating material when set fire to. See *Fumigation*.

The French use the term *Pastille*, (L.) *Pastillus*, for a solid, dry, round, oblong, square, or triangular compound, whose base is essential oil, and sugar the excipient. These pastilles are in fact small lozenges, and only differ from the *tablette* in their smaller size. They are termed, also, *Saccharolés solides*.

PASTILLE, see *Pastel*.

PASTILLES DIGESTIVES D'HAUTE-RIVE-VIOHY, see *Trochisci Sodæ bicarbonatis* — p. *Fumigating*, see *Fumigation* — p. *de Vichy*, see *Trochisci Sodæ bicarbonatis*.

PASTILLI DIGESTIVI DARCETII, see *Trochisci Sodæ bicarbonatis* — p. *Emetinæ Pectorales*, *Trochisci emetinæ pectorales*.

PASTILLI DE MENTHÆ PIPERITÆ, *Peppermint drops*. (*Sacch. alb.*, *aquæ menthæ pip.*, *aq. destillat.* $\mathfrak{a}\mathfrak{a}$ $\mathfrak{z}\text{ij}$. Boil to the consistence of an electuary. Take of fine white sugar in powder, $\mathfrak{z}\text{iv}$; volatile oil of peppermint, $\mathfrak{z}\text{ss}$. Mix, and add the electuary whilst warm. Drop it then on marble, and dry the drops.—Ph. P.)

PASTILLUS, *Pastil*.

PASTINACA ALTISSIMA, P. *opopanax* — p. *Anethum*, *Anethum graveolens* — p. *Graveolens*, *Anethum graveolens* — p. *Opaca*, P. *sativa*.

PASTINACA OPOPANAX. *Ord. Umbelliferae*. The name of the plant which furnishes the *Opopanax*. The plant, whence the gum resin is obtained, has, also, been called *Fer'ula opopanax* seu *apopanax*, *Pastinaca altissima*, *Laserpitium* seu *Seli'num chiro'num*, *Opopanda'cum*, *Panax heracle'um* seu *costi'num*, *Postin'cea*, *Kyna*, *Hercules-all-heal*, *Opopanaxwort*.

Opopanax, *Opopana'cis gummi-resi'na*, *Gezir*, *Popanax*, *Gummi Panda'cis*, exudes from the roots when wounded. Its odour is strong and peculiar; taste, bitter and acrid. It is met with in the shops, in lumps of a reddish-yellow colour, without; white within. It has been recommended as an antispasmodic and emmenagogue; but is seldom used. Dose, gr. x. to $\mathfrak{z}\text{ij}$, in powder.

PASTINACA PRATENSIS, P. *sativa*.

PASTINACA SATI'VA, *Elaphobos'cum*, *Pastinaca sylvestris* seu *opa'ca* seu *praten'sis*, *Anethum* seu *Seli'num pastinaca*, *Ban'ica*, *Garden parnep*, (F.) *Panais*. The root is sweet and nutritious, and is in esteem as an article of food. It has been used as a diuretic and demulcent in calculous affections, &c.

PASTINACA SYLVESTRIS. P. *sativa* — p. *Sylvestris tenuifolia officinarum*, *Daucus carota*.

PATATE, *Convolvulus batatas*.

PATCHOULI, *Pogostemon patchouli*.

PÂTE, Paste — p. *Arsenicale*, *Arsenical paste* — p. *de Canquoin*, *Pasta Zinci chloridi* — p. *Caustique de Vienne*, *Powder*, *Vienna* — p. *de Guimavee*, Paste, marshmallow — p. *de Jujube*, Paste of Jujubes.

PATEL'LA, *Rot'ula*, R. *genu*, *Epigon'atis*, *Epigon'tis*, *Acromy'le*, *Epigou'nis* seu *Epigu'nis* seu *Epigo'nis*, *Mola* seu *Concha* seu *Oculus* seu *Orbis* seu *Scutum genu*, *Os scutifor'me* seu *discifor'me* seu *thyreo'id'es*, *Supergenu'alis*, *Cancaloi'd'es*, *My'lacris*, *Mylè*, *Gamba*, *Olec'ranon mob'ilè*, (Prov.) *Cop bone*, (F.) *Rotule*. Diminutive of *patera*, 'a bowl,' so called from its shape. A sort of sesamoid, flat, short, thick, rounded bone, situate in front of the knee, and enveloped in the substance of the tendon common to the extensor muscles of the leg. The posterior surface of the patella is divided into two *facettes*, united angularly, which are encrusted with cartilage, and each of which is articulated with one of the condyles of

the femur. The patella is developed by a single point of ossification. When the patella is fractured, it is difficult to produce bony union. This can only be accomplished by keeping the fractured extremities closely in apposition.

PATELLA, Cup — p. Fixa, Olecranon.

PATENCY OF THE FORAMEN OVALE, see Cyanopathy.

PATENT MEDICINE, *Médecine brevetée* ou *patentée*, *Remède breveté* ou *patenté*. A medicinal compound, for the sale of which the proposer obtains from government an exclusive privilege. A specification of his *invention* must be registered in the Patent Office, and, hence, it differs from a secret medicine.

PATER OMNIUM VIVENTIUM, Penis.

PATERA DIOGENIS, Palm.

PÂTEUX, Clammy.

PATHEMA, Affection, Disease.

PATHEMATOLOGY, Pathology.

PATHETIC, *Pathet'icus*, from *παθεω*, 'I feel.' That which moves the passions. A name given to the superior oblique muscle of the eye, and, also, to a nerve.

PATHETIC MUSCLE, Oblique superior of the eye.

PATHETIC NERVE, *Nervus Pathet'icus* seu *trochlear'is* seu *trochleator'ius* seu *trochleator*, the 4th pair of nerves, *Par quartum*, (F.) *Oculo-musculaire interne* (Ch.), *Nerf pathétique*, is the smallest encephalic nerve. It arises behind the inferior part of the tubercula quadrigemina (*testes*) at the lateral parts of the valvula Vieussenii. Its roots unite into one thin round cord, which makes a turn upon the peduncles of the brain, and passes into a canal of the dura mater, near the posterior clinoid process. It enters the orbit by the broadest parts of the sphenoidal fissure, and terminates in the superior oblique muscle of the eye, by dividing into several filaments,

PATHEMISM, Magnetism, animal.

PATHIC, Morbid.

PATHICAL, Morbid.

PATHICUS, Morbid.

PATHNE, Alveolus.

PATHOGENETIC, *Pathogenet'icus*, *Pathogen'icus*. Same etymon as Pathogeny. Relating to pathogeny.

PATHOGENETIC PHYSIOLOGY, *Physiolog'ia pathogenet'ica*. That part of physiology which relates to the origin of disease.

PATHOGENICUS, Pathogenetic.

PATHOGENY, *Pathogen'ia*, *Nosogen'esis*, *Nosogen'ia*, from *παθος*, 'a disease,' and *γενεσις*, 'generation.' The branch of pathology which relates to the generation, production and development of disease.

PATHOGNOMON'IC, *Pathognomon'icus*, *Signum conjunctum* seu *characteristicum* seu *morbi essential'ē*; from *παθος*, 'an affection,' and *γινωσκω*, 'I know.' A characteristic symptom of a disease.

PATHOGRAPHY, *Pathograph'ia*, from *παθος*, 'disease,' and *γραφω*, 'I describe.' A description of disease.

PATHOLOGIA, Pathology — p. Humoralis, Humorism — p. Solidaris, Solidism.

PATHOLOG'ICAL, *Patholog'icus*, *Pathol'ogus*, (F.) *Pathologique*. Same etymon as pathology. Relating to pathology. Often used in the sense of pathical.

PATHOLOGICAL ANATOMY, see Anatomy.

PATHOL'OGIST, *Pathol'ogus*. Same etymon. One versed in pathology.

PATHOL'OGY, *Pathematology*, *Patholog'ia*, *Pathematology*, *Patholog'icē*, from *παθος*, 'a disease,' and *λογος*, 'a discourse.' The branch of medicine whose object is the knowledge of disease. It has been defined *diseased physiology*,

and *physiology of disease*. It is divided into *general* and *special*. The first considers diseases in common; — the second, the particular history of each. It is subdivided into *internal* and *external*, or *medical* and *surgical*.

PATHOLOGY, HUMORAL, Humorism.

PATHOMANIA, *Parapath'ia*, *Moral Insanity*, from *παθος*, 'a disease,' and *mania*. *Ma'nia sine Delir'io*. A morbid perversion of the natural feelings, affections, inclinations, temper, habits, moral disposition, and natural impulses, without any remarkable disorder or defect of the intellect, or knowing and reasoning faculties, and particularly without any insanity or hallucination.

PATHOMYOTOM'IA; from *παθος*, 'affection,' *μυς* or *μυων*, 'muscle,' and *τομή*, 'incision.' The title of a work by Dr. John Bulwer (1649), being "a dissection of the significative muscles of the affections of the mind."

PATHOPATRIDALGIA, Nostalgia.

PATHOS, Affection, Disease.

PATIENCE, *Rumex patientia* — p. *d' Eau*, *Rumex hydrolopathum* — p. Garden, *Rumex patientia* — p. *Rouge*, *Rumex sanguineus* — p. *Sauvage*, *Rumex acutus*.

PATIENT, see Sick.

PATIENT OF DEATH, Agony.

PATIENTIA, Rumex patientia.

PATIENTIÆ MUSCULUS, Levator scapulæ

PATNE, Alveolus.

PATOPATRIDALGIA, Nostalgia.

PATOR NA'RIUM. The cavity or the opening of the nostrils.

PATRATIO, Ejaculation, (of sperm.)

PATRINIA JATAMANSI, Nardus Indica.

PATTE D'OIE (F.), 'Goose's foot.' An aponeurotic expansion, which covers the internal surface of the tibia at its upper part, and consists of the expansion formed by the tendons of the sartorius, gracilis, and semi-tendinosus muscles.

PATURSA, Syphilis.

PAU, (CLIMATE OF.) Pau is the capital of the department of the Lower Pyrenees, and is about 150 miles from Bordeaux, and 50 from Bayonne. The climate corresponds with that of the south-west of France generally; its great quality is the comparative mildness of its spring, and exemption from cold winds. It is regarded as a favourable winter residence for invalids labouring under chronic affections of the mucous membranes. It is too changeable for the consumptive; and to be avoided by the rheumatic.

PAULLIN'IA. This is an extract from a plant of the same name in Brazil. It is prepared by the Indians, and appears to possess excitant powers. In Brazil, and the neighbouring countries, it is given in the form of tisane — the powder being mixed with cocoa — in diarrhoea and dysentery. It has been employed also as a tonic. An extract is prepared in Brazil from *Poullinia sor'billa*, Ord. Sapindacæ, known there under the name of *Guarana*, which is administered in similar pathological cases.

PAUME DE LA MAIN, Palm.

PAUNCH, Inguivies.

PAUNTA, Sedatives.

PAUPIÈRE, Palpebra.

PAUSIME'NIA, from *παυσις*, 'cessation,' and *μηνες*, 'menses.' Cessation of the menses.

PAVANA WOOD, Croton tiglium.

PAVANNE, Laurus sassafras.

PAVIL'ION. The French give the name *pavillon*, to the expanded extremity of a canal or cavity, — for example, of a catheter, sound, &c.

PAVILION OF THE EAR, *Auric'ula*, *Pinna*, *Otium*, *Ala*, (F.) *Auricule* ou *Oricule*, *Pavillon de l'oreille*, is seated behind the cheeks, beneath

the temple, and anterior to the mastoid process. Its size varies in individuals. It is free above, behind, and below. Anteriorly and within, it is continuous with the neighbouring parts. Its outer surface has several prominences, the *Helix*, *Anhelix*, *Tragus*, *Antitragus*, and *Lobe*; and several cavities—the groove of the *Helix*, the *fossa navicularis* seu *scaphoïdes*, and the *Concha*. The skin which covers the pavilion is very fine, and studded with a number of sebaceous follicles. The auricle is fixed to the head by three fibro-areolar ligaments;—a *superior*, *anterior*, and *posterior*.

PAVILLON DE L'OREILLE, Pavilion of the ear—*p. de la Trompe*, see *Tuba Fallopiana*.

PAVIMENTUM CEREBRI, Base of the brain.

PAVINA, *Æsculus hippocastanum*.

PAVITA'TIO, *Tremor*; from *pavitare*, *pavitatum*, 'to tremble from fear.' Trembling from fright.

PAVOPHOBIA, Panophobia.

PAVOR (L.), Dread. Great fright. Panophobia.

PAVO'RES NOCTUR'NI seu **DORMIEN'TIUM**. Fear during sleep.

PAVOT, Papaver.

PAW, Manus.

PAWPAW, see *Carica papaya*.

PAXWAX, see *Nucha*.

PAXYWAXY, see *Nucha*.

PAZAHAR, Bezoar.

PEA, *Pisum*—*p. Garden*, *Pisum*—*p. Ground Squirrel*, *Jeffersoniana Bartoni*—*p. Hoary*, *Galega Virginiana*—*p. Love*, *Abrus precatorius*—*p. Nut*, *Arachis hypogea*—*p. Partridge*, *Cassia chamæcrista*—*p. Turkey*, *Galega Virginiana*.

PEACH BRANDY, *Amygdalus Persica*—*p. Tree*, *Amygdalus Persica*—*p. Wood*, see *Cæsali-pina*.

PEAGLE, *Primula veris*.

PEAR, see *Pyrus malus*—*p. Avocado*, *Persea gratissima*.

PEARL, *Perla*, *Mar'garon*, *Margari'ta*, *Margel'ium*, *Marge'lis*, *U'nio*, (F.) *Perle*. A roundish concretion of a silvery white colour, and brilliant polish, found in several shells, and especially in the *Avic'ula margaritif'era*, which has, hence, been called *Mater perlarum*, *Margari'ta*, and *Mother of pearl*, and is much used in the fabrication of handles for surgical instruments, &c. Pearls were formerly given in powder as astringents and antacids. They consist of lime and an animal matter.

PEARL ASH, Potash of commerce.

PEARL, MOTHER OF, see *Pearl*—*p. White*, *Bismuth*, subnitrate of.

PEAU, Cutis—*p. Divine*, *Condom*.

PEAUCIER, *Platysma myoides*.

PECAN or **PECCAN NUT**, see *Hickory*.

PECCANT, *Peccans*, from *peccare*, 'to sin.' Morbid, not healthy. An epithet given by the humourists to the humours when erring in quality or quantity. See *Materia Morbosa*.

PECHAN, *Stomach*.

PECHEDEON, *Perinæum*.

PECHEGUERA. A pulmonary affection affecting children three or four months old in South America, which is promptly fatal.

PÉCHER, *Amygdalus Persica*.

PECHIAGRA, *Pechyagra*.

PECHING, *Anhelatio*.

PECHU'RIM seu **PICHU'RIM CORTEX**. A highly aromatic bark, the produce of a species of *lanrus*. It is extremely fragrant, like cinnamon, which it greatly resembles in its properties. In Portugal it is used in the cure of dysentery, &c. See *Pichurim beans*.

PECH'YAGRA, *Pech'iagra*, *Ancon'agra*, *Pec-*

tihagra, from *πηχυς*, 'the elbow,' and *αγρα*, 'a seizure.' Gout affecting the elbow.

PECHYS, *Elbow*.

PECHYTYRBE, *Porphyra nautica*.

PECKISH, *Hungry*.

PECTE, *Cheese*.

PECTEN, *Pubes*. Also, a comb.

PECTEN DENTIUM, see *Sepes*—*p. Veneris*, *Scandix cerefolium*.

PECTIHAGRA, *Pechyagra*.

PECTIN, from *πηκτος*, 'coagulated, curdled.' A name given by Braconnet to a principle which forms the basis of vegetable jelly. It is extensively diffused in the juices of pulpy fruits and roots, especially when they are mature; and occasions these juices to coagulate when they are mixed with alcohol or boiled with sugar.

It is the basis of one of the classes of elementary principles of Dr. Pereira—the *pectinaceous*.

PECTINACEOUS, *Pectinous*.

PECTINALIS, from *pecten*, *pectinis*, 'the pubes'; *Pectina'us*, *Musculus liv'idus*, *Pectina'tus*, (F.) *Pubio-fémoral*, *Suspubio-fémoral* (Ch.), *Pectiné*. This muscle is situate at the inner and upper part of the thigh. It is long, flat, and triangular; is attached, above, to the space which separates the ileo-pectineal eminence from the spine of the os pubis; and, below, by a flat tendon, to the oblique line which descends from the lesser trochanter to the *linea aspera*. The pectinalis bends the thigh on the pelvis, and carries it outwards in adduction and rotation. It may also bend the pelvis on the thigh.

PECTINATED, *Pectina'tus*, *Pectin'iform*, *Pect'inate*, (F.) *Pectiné*, from *pecten*, *pectinis*, 'a comb.' Having the shape of the teeth of a comb.

PECTINATED MUSCLES, *Pectina'ti musculi*. The fascicular texture observed in the right auricle of the heart:—*Musculi Auriculæ Pectina'ti*. Their main use probably is—to prevent the over dilatation of the auricles.

PECTINATUS, *Pectinalis*.

PECTINÉ, *Pectinalis*, *Pectinated*.

PECTINEUS, *Pectinalis*.

PECTINIFORM, *Pectinated*.

PECTINIOUS, *Pectina'ceus*, *Pectino'sus*, *Pectina'ceous*, from *pectin*. Of or belonging to pectin or vegetable jelly,—as a *pectinous* or *pectina- ceous* vegetable principle.

PECTORAL, from *pectus*, *pectoris*, 'the breast.' Relating to the breast. See *Pectorals*.

PECTORAL, **GRAND**, *Pectoralis major*.

PECTORALE, *Corset*.

PECTORALIS INTERNUS, *Triangularis sterni*.

PECTORALIS MAJOR, from *pectus*, *pectoris*, 'the breast.' *Pectora'lis*, *Sterno-cleido-brachia'lis*, (F.) *Sterno-costo-clavio-huméral*, *Sterno-huméral* (Ch.), *Grand Pectoral*. A large, flat, triangular muscle, situate at the anterior part of the chest, before the axilla. It is attached, on the one hand, by means of aponeurotic fibres, to the inner half of the anterior edge of the clavicle; to the anterior surface of the sternum, and to the cartilages of the first six true ribs;—on the other, by a strong tendon, which is inserted at the anterior edge of the bicipital groove of the humerus. The use of this muscle is to move the arm in various directions. If it be hanging by the side of the body, it carries it inwards and a little forwards. When the arm is raised, it depresses it and carries it inwards. It can, also, move it in rotation inwards. If the humerus be raised and fixed, the pectoralis major draws the trunk towards the upper extremity.

PECTORALIS MINOR, *Serra'tus anti'cus minor*, (F.) *Costo-coracoidien* (Ch.), *Petit Pectoral*, *Petit*

dentelé antérieur. This muscle is situate beneath the preceding, at the anterior and upper part of the chest. It is flat and triangular; is attached by its base, which appears digitated, to the upper edge and outer surface of the 3d, 4th, and 5th true ribs, and is inserted at the anterior part of the coracoid process. The pectoralis minor draws the scapula forwards and downwards, and makes it execute a rotatory motion, by virtue of which its inferior angle is carried backwards, and the anterior depressed. When the shoulder is fixed, it elevates the ribs to which it is attached, and aids in the dilatation of the chest.

PECTORALS, *Pectoralia, Thoracica.* Medicines considered proper for relieving or removing affections of the chest.

PECTORAL DROPS, BATEMAN'S, consist chiefly of tincture of castor, with some camphor and opium, flavoured by aniseed. Gray gives the following formula: *Castor, ℥j; ol. anisi, ℥j; camph. ℥v; cocci, ℥iss; opii, ℥j; proof spirit, a gallon.*

A form, advised by a committee of the Philadelphia College of Pharmacy, is the following:—*Alcohol. dil. cong. iv; Santal. rubr. ras. ℥j; digere per horas xxiv; cola, et adde Pulv. opii, Pulv. catechu, Camphoræ, āā ℥ij; Ol. anisi, ℥iv.* Digest for ten days.

PECTORILOQUE, from *pectus, pectoris*, 'the chest,' and *loqui*, 'to speak.' One, according to Laënnec, who presents the phenomenon of *Pectoriloquism*. Also, a stethoscope.

PECTORILOQUIE, Pectoriloquy — *p. Chévrotoante*, Egophony.

PECTORILOQUOUS BRONCHOPHONY, see Pectoriloquy.

PECTORIL'OUQUY, *Pectoril'ouquism, Cav'ernous voice, Pectoril'ouquia*, (F.) *Pectoriloquie, Voix caverneuse, V. articulée*. Same etymon. Speech or voice coming from the chest. Laënnec has designated, by this name, the phenomenon often presented by consumptive individuals, when their chests are examined with the stethoscope. The voice seems to issue directly from the chest, and to pass through the central canal of the cylinder, — a phenomenon owing to the voice resounding in the anfractuons cavities, produced in the lungs by the suppuration or breaking down of tubercles, which constitute abscesses or ulcers of the lungs. By some, it is not separated from bronchophony, having been termed, at times, *strong bronchophony*, and *pectoril'ouquous bronchophony*. See Laryngophony. *Whispering pectoriloquy* is that produced by the whispering of the patient.

PECTOROSUS, from *pectus, pectoris*, 'the chest.' One who has a broad chest.

PECTUS, Sternum, Thorax — *p. Carinatum*, see Carina and Lordosis.

PECULIUM, Penis.

PEDAGRA, Potassæ supertartras impurus.

PEDAL, *Peda'lis*, from *pes, pedis*, 'the foot.' Relating to the foot: — as

PEDAL APONEURO'SIS, (F.) *Aponévrose pédieuse*. A thin, aponeurotic layer, which invests the extensor brevis digitorum pedis, and separates the tendons of the foot from each other.

PEDBELLY, Physconia.

PEDES, Genital organs.

PEDESIS, Pulsation.

PEDETHMOS, Pulsation.

PEDIAL'GIA, *Pedional'gia, Pedioneural'gia*, from *πέδιον*, 'the sole of the foot,' and *άλγος*, 'pain.' Pain in the sole of the foot. Neuralgia of the foot in general. An affection of this kind, under the name *Pédionalgie*, prevailed in 1762 at Savigliano in Piedmont, and in 1806 amongst the military at Padua.

PEDICLE, VITELLINE, see Vesicula umbilicalis.

PECULIARIA, Delphinium staphisagria.

PEDICULATIO, Phtheiriasis.

PEDICULUS, *Phtheir, Louse*, (Prov.) *Biddy*, (F.) *Pou*. Diminutive of *pes, pedis*, 'a foot,' from its having many feet. A genus of parasitic insects. The human body is infested with three kinds: the *Body-louse*, or *Clothes-louse, Pediculus vestimenti*, (F.) *Pou de corps*; the *Head-louse, Pediculus capitis*, (F.) *Pou de la tête*, which lives in the hair; the *Crab-louse, Morpion, Fera'lis pediculus, Plat'ula, Phthi'rius inguinalis, Pediculus Pubis*, (F.) *Morpion*, which infests the hair of the pubes. Infusion of tobacco, or mercurial ointment, or ointment of white precipitate of mercury, or the white or red precipitate of mercury, readily destroys them. The louse occurring in phtheiriasis, *pediculus tabescentium*, differs from the common louse.—Vogel.

PEDICULUS CAPITIS, see Pediculus — *p. Pubis*, Crab-louse—*p. Tabescentium*, see Pediculus—*p. Vestimenti*, see Pediculus.

PÉDICURE, Chiropodist.

PEDICUS, Extensor brevis digitorum pedis.

PÉDIEUX (*muscle*), Extensor brevis digitorum pedis.

PEDIGAMBRA, Ysambra.

PEDILAN'THUS TITHYMALOÏDES, *Euphor'bia tithymaloïdes seu myrtifolia, Jew bush, Order, Euphorbiaceæ*, grows in various parts of the West Indies. The practitioners of Curacoa give a decoction in venereal cases. It is also used in domestic practice, in amenorrhœa. It is, moreover, known and used as *Ipecacuanha*.—Lindley.

PEDILU'VIUM, from *pedes*, 'the feet,' and *lavo*, 'I wash.' *Lavipe'dium*, (F.) *Pédiluve, Bain de pied*. A bath for the feet. See Bath.

PEDION, Sole.

PEDIONALGIA, Pedialgia.

PEDIONEURALGIA, Pedialgia.

PEDIUM, Tarsus.

PÉDONCULE, Peduncle.

PÉDONCULES DU CERVEAU, Peduncles of the brain—*p. du Cervelet, Corpora restiformia* — *p. du Conarium*, Peduncles of the pineal gland — *p. de la Glande pinéale*, Peduncles of the pineal gland.

PEDORA. The sordes of the eyes, ears, and feet.

PED'UNCLE, *Pedun'culus*, (F.) *Péduncule*, from *pes, pedis*, 'a foot.' This term has been applied to different prolongations or appendices of the encephalon.

PEDUNCLES OF THE BRAIN, *Pedun'culi seu Crura seu Caudæ cer'ebri*, called, also, *Crura anteriora medullæ oblongatæ*, (F.) *Péduncules du Cerveau*, are two white cords, about $\frac{3}{4}$ ths of an inch in diameter, on the outside of the corpora albicantia. They arise from the medullary substance of the brain, and gradually approach, till they join the tuber annulare. They are formed, internally, of a mixture of cineritious and medullary matter; the former of which, being of a darker colour at one part than in any other part of the brain, has been called *Locus niger crurum cerebri, Substantia nigra pedun'culi*.

PEDUNCLES OF THE CEREBELLUM, *Pedun'culi seu Crura cerebel'li*, called, also, *Crura posteriora*, are six in number, three on each side—a superior, a middle, and an inferior. The superior peduncles are generally known as the *Processus cerebelli ad testes, Crura cerebel'li ad corpora quadrigen'ina, Bra'chia copulati'va*: the inferior are the *Processus cerebelli ad medullam oblongatam*; and the middle are called, also, *Cerebellar peduncles*—*Processus seu Crura cerebel'li ad pontem, Bra'chia pontis*.

PEDUNCLES, INFERIOR, OF THE CEREBELLUM,

Corpora restiformia—p. of the Medulla oblongata, Corpora restiformia.

PEDUNCLES OF THE PINEAL GLAND, *Pedunculi conarii*, (F.) *Pédoncules de la glande pinéale*, *P. du Conarium*, are two medullary bands or strips, which seem to issue from the pineal gland, and proceed on each side upon the upper and inner region of the optic thalami. See Pineal Gland.

PEDUNCULI CEREBELLI, Peduncles of the Cerebellum—p. Cerebri, Peduncles of the brain—p. Conarii, Peduncles of the pineal gland, see Pineal gland—p. Medullæ oblongatæ, Corpora restiformia.

PEDUNCULUS, Peduncle.

PEGA, Canthus (lesser).

PEGANELÆ'ON, *Oleum ruta'ceum*, *O'leum ruta*, from *πεγανον*, 'ruc,' and *ελαιον*, 'oil.' Oil of Rue.

PEGANUM, Ruta.

PEGMIN, Corium phlogisticum.

PEINE, Hunger.

PEINOTHERAPIA, Límotherapeia.

PEIRA, Effort, Experience, Nisus.

PELA'DA, (F.) *Pelade*. A word of uncertain origin, applied to alopecia, especially to that resulting from syphilis. See Alopecia.

PELA'GIA. A kind of scaly erysipelas of the hands—sometimes of the legs, at others, of the face. Pellagra [?].

PELAGRA, Pellagra.

PELARGONIUM ANCEPS, *Peris'tera anceps*. A South African plant, *Nat. Ord.* Geraniaceæ, the decoction of which is used by the Malays in amenorrhœa, and to promote parturition and abortion.

PELARGONIUM ANTIDYSENTERICUM, *Jenkin'sonia antidynter'ica*. This South African plant is used by the natives in dysentery. It is boiled in milk.

PELARGONIUM CUCULLATUM. Common along the side of the Table Mountain. It has been recommended in decoction as an enema in colic, nephritis, and suppression of urine. It is an excellent emollient, and was formerly exported to Holland under the name *Herba Althæ'æ*.

PELARGONIUM TRISTE, *Polyact'ium tristè*. The root of this plant, which grows at the Cape of Good Hope, is somewhat astringent, and is used there in diarrhœa and dysentery, and as an anthelmintic.

PEL'ICAN, *Pelica'nus*, *Peleca'nus*, *Pel'ecan*, *Pel'ecus*, *πελεκαν*, from *πελεκαι*, 'I cleave.' An instrument, curved at the end like the beak of a pelican. Its use is to extract teeth.

PELI'CIDÈ, *Pelu'dè*, *Mel coc'tum*. Boiled honey.—Ruland and Johnson.

PELICOMETER, Pelvimeter.

PELIDNOMA, Eechymoma, Pelioma.

PELIO'MA, *Pelidno'ma* from *πελος*, 'black.' A livid eechymosis.—Forestus. See Eechymoma.

PÉLIOSE, Purpura.

PELIOSIS, Purpura hæmorrhagica—p. Rheumatica, see Purpura simplex.

PELLA, Cutis, Prepuce.

PELL'LAGRA, *Pell'agra*, *Ichthyo'sis* seu *Tuber* seu *Impeti'go Pellagra*, *Elephant'iasis Ital'ica*, *Lepra Mediolanen'sis* seu *Lombard'ica*, *Scorbu'tus alpi'nus*, *Ma'nia pella'grica*, *Erythe'ma endem'icum* seu *pell'agrum*, *Insolazione de Primavera*, *Male del Sole*, *Dermat'agra*, *Erysip'elasperiod'ica nervosa chron'ica*, *Paral'ysis scorbut'ica*, *Scurvy of the Alps*, (F.) *Mal de misère*, *Scorbut des Alpes*; from *πελλα*, [?] 'skin,' and *αγρα*, 'seizure.' A disease, particularly noticed among the Milanese, which consists in the skin becoming covered with wrinkles, and assuming a scaly appearance, especially in the parts exposed to the air. The strength diminishes, the intellectual faculties and

sensations become obscure, and cramps, convulsions, and other lesions of muscular contractility supervene. It is a singular endemic affection, and has been supposed to follow everywhere the introduction of Indian corn: hence the name *Rapha'nia maiz'tica*, given to it by some of the Italian physicians.

An affection endemic in the Asturias is said to be a variety of pellagra. It is the *Rosa* seu *Lepra Astu'rica*, *Mal de la Rosa*.

PELLENS, from *pellere*, 'to drive.' Driving; impelling.

PELLEN'TIA MEDICAMEN'TA are medicines that promote the occurrence of the menstrual or hæmorrhoidal flux.

PELLICULA OVI, Membrana putaminis—p. Summa, Epidermis—p. Superior, Epidermis.

PELLICULÆ CORDIS, Ostiola cordis.

PELLIS, Cutis—p. Summa, Epidermis.

PELLITORY, *Xanthoxylum fraxineum*—p. American, *Parietaria Pennsylvanica*—p. Bastard, *Achillea ptarmica*—p. of Spain, *Anthemis pyrethrum*—p. Wall, *Parietaria*.

PELMA, Sole.

PELOHÆ'MIA, (F.) *Pelohæmie*, from *πηλος*, 'dirt,' and *αίμα*, 'blood.' A condition of the blood in which it is thick, syrupy, and of a very dark colour—as in diseases of the blood, gangrene, &c.

PELOR, Monster.

PELORIA, Monster.

PELORIUM, Monster.

PELORUM, Monster.

PELOTE DE MER, Pila marina.

PELTALIS seu PELTATUS CARTILAGO, Thyroid cartilage, Xiphoid cartilage.

PELTAN'DRA VIRGIN'ICA, from *πελη*, 'a target,' and *ανθη*, 'for anther,' from the shield-shaped stamens. *Arum Virgin'icum*, *Calla* seu *Lecon'tia* seu *Rensselaëria Virgin'ica*, *Arrow Arum*, *Taraho*, *Wampee*; indigenous; of the Order Araceæ. The fresh roots and seeds are acrid stimulants, like *Arum*.

PELTIDEA AMPLISSIMA, *Lichen caninus*—p. *Aphthosa*, *Lichen aphthosus*—p. *Canina*, *Lichen caninus*—p. *Leucorrhiza*, *Lichen caninus*—p. *Malacea*, *Lichen caninus*—p. *Spuria*, *Lichen caninus*.

PELIGERA CANINA, *Lichen caninus*.

PELUDE, Pelicoid.

PELVIC, *Pelvicus*, *Pelvi'nus*. (F.) *Pelvien*, from *pelvis*. Belonging or relating to the pelvis.

PELVIC APONEURO'SIS, (F.) *Aponévrose pelvienne*. A tendinous lamina, given off from the sides of the pelvis, and from the entire circumference of the brim, which passes into and lines the pelvis, and is soon divided into two distinct layers;—one external, the lateral *pelvic* or *obturator fascia*, which continues to line the sides of the pelvis, and covers the obturator internus muscle; the other, internal or superior, which passes inwards upon the side of the prostate, bladder, and rectum in the male, and of the bladder, vagina, and rectum in the female, in order to form the floor of the pelvis.

PELVIC CAVITY, (F.) *Cavitè pelvienne*. The cavity of the pelvis.

PELVIC MEMBERS. The lower extremities.

PELVIC SURFACE OF THE IL'IUM. That which faces the pelvic cavity.

PELVICULA OCULI, Orbit.

PELVID'YMUS, (F.) *Pelvidyme*, from *pelvis*, and *ειδυμος*, 'a twin.' A monster united at the pelvis, and double above.

PELVI-TROCHANTE'RIAN, *Pelvi-trochanter'iana*. That which relates to the pelvis and great trochanter. The *Pelvi-trochanterian* region is formed by the muscles—*pyramidalis*, *two obturators*, *geminis*, and *quadratus femoris*—which

pass from the pelvis to the digital cavity of the great trochanter.

PELVIAN, Pelvic.

PELVIMETER, *Pelycom'eter, Pelyom'eter, Pelicom'eter, Pylom'eter*, (F.) *Pelvimètre*, from *pelvis*, and *μετρον*, 'a measure.' A barbarous hybrid. This name has been given to different instruments, invented for measuring the diameters of the pelvis, and particularly the antero-posterior or fore-and-aft diameter of the brim:—*Pelvimeter*, (F.) *Pelvimétrie*. Two have been chiefly employed, especially by French practitioners:—the *Compas d'épaisseur*, and the *Pelvimeter of Coutouly*. 1. The *Compas d'épaisseur* or *Callipers* of Baudeloque, is formed like a pair of compasses—with blunt extremities—the branches of which can be moved at will. One of these is applied to the symphysis pubis, and the other on the sacrum. About three inches must be deducted from this measurement for the thickness of the mons veneris, pubis, and the base of the sacrum. 2. The *Pelvimeter of Coutouly* resembles the instruments used by shoemakers for measuring the length of the foot. The two branches are introduced, in a state of approximation, into the vagina, and then separated, so that one touches the promontory of the sacrum, the other comes behind the os pubis. It is a barbarous contrivance, and its introduction ought never to be attempted on the living subject. It does not, indeed, seem possible to introduce it without mischief.

The finger is, decidedly, the best pelvimeter, and by it we can judge whether the base of the sacrum be unusually prominent. Measurement of the pelvis by the hand has been called *Pelyochirometre'sis*; from *πελvis*, 'the pelvis,' *χειρ*, 'the hand,' and *μετρον*, 'measure.'

PELVIMETRY, see Pelvimeter.

PELVIS, *Cho'ana, Py'elos, Lec'ane*, (F.) *Basin*; so called from *πελvis*, and *πελλis*, 'a basin,' because fancied to be shaped like an ancient basin. The part of the trunk which bounds the abdomen below. It is a large, bony, irregular, conoidal cavity,—open above and below,—which supports and contains a part of the intestines, and the urinary and genital organs; and serves, at the same time, as a fixed point for the articulation of the lower limbs, the attachment of their muscles, and the execution of their movements. The pelvis supports, behind, the vertebral column, and is sustained, before, by the ossa femorum. It is situate, in the adult, near the middle part of the body, and is composed of four broad, flat, unequally thick bones, differing much in their shape, size, and arrangement, which touch, are articulated at some part of their surface, and intimately united by means of a number of ligamentous fasciæ. Of these bones, two are behind, on the median line,—the sacrum and the coccyx; the two others are before and at the sides,—the ilia. They are fellows, and unite, before, with each other. The most important parts of the pelvis, in an obstetrical point of view, are the *brim* and the *outlet*. The *BRIM*, *Angus'tia abdomin'al'is, Intro'itus, Apertu'ra pelvis superior, Upper Opening or Strait of the Cavity of the Pelvis*, (F.) *Détroit supérieur, D. abdominal*, is the narrow part which separates the greater pelvis from the less—the *false* from the *true, Pelvis vera* seu *minor*. In the well-formed woman it is elliptical, and slightly inclined forwards. Its *antero-posterior, sacro-pubic* or *con'jugate diameter*, in a standard *pelvis*, measures $4\frac{1}{2}$ inches, but with the soft parts, $3\frac{3}{8}$ inches; its *transverse* or *iliac* or *lateral*, $5\frac{1}{4}$ inches, but with the soft parts 4 inches; and its *oblique, Diameter of Decenter*, with the soft parts, $4\frac{3}{8}$ inches. The *OUTLET, Ex'itus, Inferior opening or strait, Angus'tia perinæal'is*, (F.) *Détroit inférieur, D. périnéal*,

forms the lower aperture of the pelvis. The antero-posterior diameter is here, on account of the mobility of the coccyx, 5 inches: the lateral, 4 inches. The *AXIS* OF THE *PELVIS* is important to be known in obstetrics. The *Axis of the Brim* is indicated by a straight line drawn from the umbilicus to the apex of the coccyx;—the *Axis of the Outlet* by a line drawn from the first bone of the sacrum to the entrance of the vagina. An imaginary curved line which indicates the direction of the canal of the pelvis, has occasionally been termed the *curve of Curus*, in consequence of its having been pointedly described by the German obstetrician.

PELVIS AURIUM, Cochlea—p. Cerebri, Infundibulum of the brain.

PELVIS OF THE KIDNEY, *Pelvis ren'al'is seu renum, Sinus, Venter* seu *Alvus Renum*, (F.) *Bassinet*. This is a small, membranous pouch, occupying the posterior part of the fissure of the kidney. It is placed behind the renal artery and vein; is elongated from above to below; flattened from before to behind; irregularly oval in figure; and, below, contracts considerably, to be continuous with the ureter. It receives the orifices of the infundibula, which pour the urine secreted in the kidney into its cavity.

PELVIS MINOR, Pelvis—p. Ocularis, Scaphium oculare—p. Renalis, Pelvis of the kidney—p. Renum, Pelvis of the kidney—p. Vera, Pelvis.

PELYCOHIROMETRESIS, see Pelvimeter.

PELYCOMETER, Pelvimeter.

PELYOMETER, Pelvimeter.

PEM'MICAN or PEM'ICAN. Meat cured, pounded, and mixed with fat. It has been much used as nutriment on long overland journeys.

PEMPHIGODES, *Pemph'igoid*, (F.) *Pemphigode*, from *πεμφιξ*, 'a blister,' and *ειδος*, 'form.' An epithet given by the ancients to the fever that accompanies pemphigus.

PEM'PHIGUS, *Emphly'sis Pem'phigus, Pom'pholyx*, from *πεμφιξ*, *πεμφιγος*, 'a blister;' *Febris bullo'sa seu vesicula'ris seu ampullo'sa seu pemphigo'des seu pemphingo'des, Exanthe'ma serosum, Morta, Pem'phigus morta* seu *Helvet'icus* seu *major* seu *minor, Morbus bullo'sus seu vesicula'ris seu ampulla'ris, Pemphix, Pemphix, Pemphix, Typhus vesicula'ris, Vesic'ular Fever, Bladdery Fever, Water-blebs*, (F.) *Fievre bulleuse ou vesiculaire, Maladie bulleuse*. A disease, defined to consist of vesicles, scattered over the body; transparent, filbert-sized, with a red, inflamed edge, but without surrounding blush or tumefaction; on breaking, disposed to ulcerate; fluid, pellucid or slightly coloured; fever, typhous. It is doubtful whether any such idiopathic fever have ever existed: the probability is, that the fever and vesications have been an accidental complication. Cullen thinks the *Pemphigus Helveticus* must have been malignant sore throat. If, however, such a distinct disease did exist, it was probably only as an endemic-epidemic.

PEMPHIGUS GANGRENO'SA, *Rupia escharotica*—p. Hungaricus, see Anthrax—p. Infantilis, *Rupia escharotica*—p. Major, Pemphigus—p. Minor, Pemphigus—p. Morta, Pemphigus—p. Variolodes, see Variella.

PEMPHIX, Pemphigus.

PEMPHIX, Pemphigus.

PEMPTÆA FEBRIS, Quintan.

PENÆA MUCRONATA, see Sarcocolla—p. Sarcocolla, Sarcocolla.

PENCHE, Abdomen.

PENCIL-LIKE PROCESSES, Styloid processes.

PENDULOUS ABDOMEN, Physconia.

PENDULUM PALATI, Velum pendulum palati.

PENETRATING, *Pen'etrans*, from *penetrare*, *penetratum*, (*penitus intrare*), 'to go into.' A wound is so called which penetrates one of the great splanchnic cavities — *Vulnus penetrans*.

A medicine is, also, so called, which is supposed to pass through the pores, and stimulate.

PENICILLUM, Compress, Penicillus.

PENICILLUS, *Penicillum*, *Peniculus*, 'a painter's brush;' diminutive of *penis*, 'a tail.' A tent or pledget. A pessary. The secreting glandiform extremities of the venæ portæ, (*Ac'ini bilio'si*) have been so termed, as well as the villous textures.

PENICILLUS, Tent.

PENICULUM, Compress.

PENICULUS, Penicillus, Tent.

PÉNIDE, *Penidium*.

PENIDES, *Saccharum hordentum*.

PENID'IUM, *Penidium saccharatum*, from *penis*, 'a tail,' from the shape [?], (F.) *Pénide*, *Sucre tors*. A kind of clarified sugar, made up into rolls. *Barley sugar*. It is demulcent; see *Saccharum hordentum*.

PÉNIL, *Mons veneris*.

PENIS, 'a tail.' *Caulis*, *Coles*, *Caules*, *Canlos*, *Mentula*, *Menta*, *Phallus*, *Farcifera*, *Posthæ*, *Prosthium*, *Criothè*, *Cor'ynè*, *Vomer*, *Pater om'nium videntium*, *Pria'pus*, *Virga*, *V. viri'lis*; *V. genita'lis*, *Veretrum*, *Sathè*, *Membrum viri'lè* seu *seminalè* seu *genitalè vir'rum*, *Morion*, *Cyon*, *Sic'ula*, *Tentum*, *Hasta*, *H. nuptia'lis*, *H. viri'lis*, *Vas*, *Vas'culum*, *Pecu'lium*, *Vir'gula*, *Vir*, *Thyrus*, *Tensus*, *Clavus*, *Cauda salax*, *Cauda*, *Fascinum*, *F. viri'lè*, *Muto*, *Nervus*, *N. fistulo'sus* seu *fistulo'ris* seu *juveni'lis*, *Per'tica per se*, *Scapus*, *Leco*, *Curcu'lio*, *Vena*, *Contus*, *Telum*, *Gurgu'lio*, *Sceptrum*, *Arma*, *Gla'dius*, *Lubr'icium Caput*, *Muti'num*, *Palus*, *Pes'sulus*, *Radix*, *Ramus*, *Rutab'ulum*, *Arma Ventris*, *Columna adstans inguin'ibus*, *Columna*, *Pyr'amis*, *Trabs*, *Spina*, *Catapulta viri'lis*, *Verpa*, *Macha'ra*, *Taurus*; the *Yard*, *Male organ*, &c. (F.) *Verge*, *Membre viril*. This organ, the use of which is to carry the seminal fluid into the female organs of generation, is cylindroid, long, and erectile, and situate before and beneath the symphysis pubis. In the ordinary state, it is soft and pendent in front of the scrotum. During erection, it becomes elongated, upright, and assumes a triangular shape. Its upper surface is called the *Dorsum penis*, (F.) *Dos de la verge*; and, at its anterior surface, there is a longitudinal projection formed by the canal of the urethra. The two sides of the penis are round, and its posterior extremity or root is attached to the pelvis. Its anterior extremity is free, and presents the glans, prepuce, and orifice of the urethra. The penis is formed of the corpora cavernosa, the principal seat of erection; the corpus spongiosum of the urethra, for the conveyance of the urine and sperm; and of the glans, which terminates the canal. The *Arteries* of the penis are branches of the internal pudic. The *Veins* correspond with the arteries. The *Nerves* are from the internal pudic.

PENIS CEREBRI, Pineal gland—p. *Femineus*, *Clitoris*—p. *Lipodermus*, *Paraphimosis*—p. *Muliebris*, *Clitoris*.

PENNATUS, Penniform.

PEN'NIFORM, *Pennif'ormis*, *Penna'tus*, from *penna*, 'a pen,' and *forma*, 'form.' An epithet for muscles whose fleshy fibres are inserted at the side of a middle tendon, like the feathers of a pen on their common stalk.

PENNSYLVANIA, MINERAL WATERS OF. The most celebrated are those of Bedford. The Carlisle, Ephrata, and Yellow Springs are also frequented.

PENNYCRESS, *Thlaspi*.

PENNYROYAL, *Mentha pulegium*, *Hedeoma pulegioides*—p. *Hart's*, *Mentha cervina*.

PENNYWORT, ASIATIC, *Hydrocotyle Asiatica*.

PENSACOLA, see *Saint Augustine*.

PENSÉE, *Viola tricolor*—p. *Savage*, *Viola tricolor*.

PENSILIA, *Pudibilia*.

PENSY, *Viola tricolor*.

PENTAMY'RON, from *πεντε*, 'five,' and *μυρον*, 'ointment.' An ancient ointment, consisting of five ingredients. These are said to have been—storax, mastich, wax, opobalsam, and unguentum nardinum.—Paulus, and Aëtius.

PENTAPHAR'MACON, from *πεντε*, 'five,' and *φαρμακον*, 'remedy.' Any medicine consisting of five ingredients.

PENTAPHYLLUM, *Potentilla reptans*.

PEN'TATEUCH, (SURGICAL), *Pentateuchus*, from *πεντε*, 'five,' and *τευχος*, 'a book,' which signifies the five books of Moses—Genesis, Exodus, Leviticus, Numbers, and Deuteronomy. By analogy, some surgeons have given the name *Surgical Pentateuch* to the division of external diseases into five classes:—wounds, ulcers, tumours, luxations, and fractures.

PENTATH'ETUM, from *πεντε*, 'five,' and *θηβαι*, 'to place.' An ancient plaster consisting of five ingredients.

PENULA, *Ingluvius*.

PENZANCE, CLIMATE OF. This is the chief residence of invalids in Cornwall, England, during the winter. It is situated on Mount's Bay, about ten miles from the Land's End. It is 5½° warmer in winter than London, 2° colder in summer: scarcely 1° warmer in the spring, and only about 2½° warmer in the autumn. It is a very favourable winter residence for the phthisical invalid.

PEONY, *Pæonia*.

PEPANSIS, Coction, Maturation.

PEPANTICOS, Maturative.

PEPASMOS, Coction, Maturation.

PEPAS'TIC, *Pepas'ticus*, from *πεπαινω*, 'I concoct.' A medicine supposed to have the power of favouring the concoction of diseases. Maturative.

PEPEIRUS, Concocted.

PEPERI, *Piper*.

PEPINO (S.). A *Cucurbitacea*, which is cultivated in great abundance in the fields of Peru. The pulp or edible part is solid, juicy, and well flavoured; but is apt to disagree.

PEPO, *Cucurbita pepo*—p. *Lagenarius*, *Cucurbita lagenaria*—p. *Vulgaris*, *Cucurbita pepo*.

PEPPER, BLACK, *Piper nigrum*—p. *Cayenne*, *Capsicum annum*—p. *Chilly*, *Capsicum annum*—p. *Cubeb*, *Piper cubeba*—p. *Decorticated*, *Fulton's*, see *Piper nigrum*—p. *Guinea*, *Capsicum annum*—p. *Jamaica*, *Myrtus Pimento*—p. *Long*, *Piper longum*.

PEPPER BUSH, SWEET, *Clethra alnifolia*.

PEPPER, MALAGUET'A. This term has been applied to the fruit or seeds of several zingiberaceous plants, as well as to the pimento. It is usually considered to be synonymous with *Grana Parad'isi*, *Grains of Par'adise*, and *Grana Guineen'sia*, *Guinea grains*.—*Pereira*.

PEPPER, POOR-MAN'S, *Polygonum hydropiper*—p. *Tailed*, *Piper cubeba*—p. *Turnip*, *Arum triphyllum*—p. *Water*, *Polygonum hydropiper*—p. *Water*, of *America*, *Polygonum punctatum*—p. *Wall*, *Sedum*—p. *White*, *Piper album*.

PEPPERWORT, *Lepidium*.

PEPSIN, *Pepsine*, *Pepsinum*, *Chyl'mosin*, *Gastérase*, *Digestive Prin'ciple*, from *πέψις*, 'coction,' 'digestion.' A peculiar organic matter, which, in combination with the gastric acids, is considered to form the proper digestive solvent. Its chemi-

cal constitution is unknown. It would appear that its presence is necessary to induce changes in the elements of the food, which may enable the gastric acids to act upon them so as to form chyme.

PEPSINUM, Pepsin.

PEPSIS, Coction, Digestion.

PEPTIC, *Pep'ticus*, from *πεπτω*, 'I ripen,' 'I digest.' An agent that promotes digestion, or is digestive. Also, applied adjectively to an article of food that is easy of digestion.

PEPTIC PERSUADER, see *Pilulæ aloes et Kinæ Kinæ*.

PEPTONE. A presumed definite combination between the solvent fluid in the stomach, and albuminous matters received into the organ as aliments. The same as Albuminose.

PER, 'by or through,' in composition often gives intensity to the signification: as *pertussis*, a violent cough.

PERACUTUS, Catoxys.

PERARTICULATIO, Diarthrosis.

PERATODYNIA, Cardialgia.

PERCE-CRANE, Perforator.

PERCE-FEUILLE, *Bupleurum rotundifolium*.

PERCE-MOUSSE, *Polytrichum*.

PERCE-MURAILLE, *Parietaria*.

PERCE-PIERRE, *Crithmum maritimum*.

PERCEPTA, from *percipere*, *perceptum*, (*per*, and *capio*), 'to perceive,' 'receive.' A word used by some writers on hygiene to indicate, in a general manner, the effects of the nervous action on the animal economy; in other words, the sensations, the functions of the mind, and their deterioration or privation.

PERCEPTIBILITY, see Sensibility.

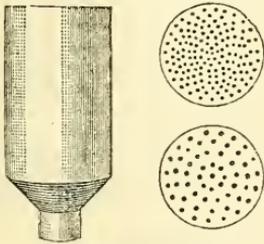

PERCEPTION, *Perceptio*. Same etymon. The appreciation which the brain has of an impression made upon an organ of sense.

PERCEPTIVITY. Same etymon. The power of perception.

PERCOLATIO, Filtration, Percolation.

PERCOLATION, *Percolatio*, from *percolare*, *percolatum*, (*per*, and *colare*), 'to strain through.'

The terms *percolation* and *displacement* are applied in pharmacy to an operation which consists in placing any substance, the virtues of which have to be extracted by a funnel-shaped instrument, having

Displacer or Percolator.

ing a septum perforated with holes, or its tube stuffed with cotton or tow, and pouring fresh portions of the menstruum upon it until all its virtues have been extracted. The operation is used in the formation of certain infusions, extracts, tinctures, &c.

An instrument used for this purpose is called a *displacer* or *per'colator*.

PERCOLATOR, see Percolation.

PERCUSS. *Percuterè*, *Percussion*, (*per*, and *quaterè*, 'to strike,') (F.) *Percuter*, *Frapper*. Same etymon as the next. To strike upon with the view of appreciating the resulting sound. To practise percussion.

PERCUS'SION, *Epicrou'sis*, *Percus'sio*. When immediate or direct percussion is made on the chest or abdomen, the more or less perfect resonance is an index of the state of the contained

organs; and the physician is thus aided in his diagnosis. For this purpose the chest may be struck with the fingers, gathered into a bundle, and their tips placed upon a level. It is better, however, to employ *mediate percussion*, which consists in interposing, between the point of the fingers and the chest, the finger of the other hand, or a *Plein'eter*, and striking this instead of the naked chest.

PERCUSSION, AUSCULTATORY, see *Acuophonia*. *PERCUTER*, Percuss.

PERCUTEUR COURBE À MARTEAU, (F.) An instrument used by Baron Heurteloup in the operation of lithotomy, in which a hammer is employed instead of a screw, to force together the blades of the instrument on the foreign body.

PERDO'NIUM. A medicated wine of herbs. —Paracelsus.

PERETERIUM, Trepan.

PERETORIUM, Trepan.

PERFORANS, from *perforare*, (*per*, and *forare*), 'to bore through.' A name given to different muscles, whose tendons pass through intervals between the fibres or tendons of other muscles; thence called *perforated*. See *Flexor Longus Digitorum*, &c. Under the name *Perforating Arteries*, are included, 1. *In the hand*—arterial branches, given off by the profound palmar arch, which traverse the muscles and interosseous spaces. 2. *In the thigh*—three or four arteries, furnished by the profunda, which pass through the openings of the abductor magnus. 3. *In the foot*—the anterior and superior branches of the plantar arch.

PERFORANS CASSERI, see *Cutaneous*—p. *Manûs*, *Flexor profundus perforans*—p. *Profundus*, *Flexor longus digitorum pedis profundus perforans*.

PERFORATED SPOT, *Locus perforatus*.

PERFORATING ARTERIES, see *Perforans*.

PERFORATIO, Perforation—p. *Cranii*, see *Perforator*—p. *Intestinorum*, *Enterobrosis*—p. *Ventriculi*, *Gastrobrosis*.

PERFORA'TION, *Perfora'tio*, *Anatre'sis*, *Diatre'sis*. Same etymon as *Perforans*. An accidental opening in the continuity of organs, either from an external or internal cause.

PERFORATION, *Paracentesis*—p. *de l'Estomac*, *Gastrobrosis*—p. *des Intestins*, *Enterobrosis*—p. *Uteri*, *Uterus*, rupture of the.

PERFORATOR, *Perfora'torium*, (F.) *Perce-crane*. An instrument for opening the head of the fœtus in utero, when it is necessary to diminish its size. The operation is called *Cephalotomia*, *Perfora'tio cranii*.

PERFORATORIUM, Perforator.

PERFORA'TUS. That which is pierced. Anatomists have given this name to muscles whose fibres or tendons separate to suffer other parts to pass through them. Such are the *Flexor brevis digitorum pedis*, *F. sublimis perforatus*, and *Coraco-brachialis*. Also, to parts that are perforated for any purpose—as the *substantia perforata* of the brain.

PERFORATUS CASSERI, *Coraco-brachialis*.

PERFRIC'TIO, *Perfrige'rium*, *Cataplysx'is*, *Peripsyx'is*, from *perfrigere*, *perfrictum*, (*per*, and *frigere*), 'to shiver with cold.' Considerable refrigeration. Great sense of cold:—shivering.

PERFRIGERATIO, see *Rigor*.

PERFRIGERIUM, *Perfrictio*.

PERFUSIO, Fomentation—p. *Frigida*, see *Affusio*.

PERI, *περι*, 'about, on all sides, round about. An augmentative prefix. Hence:

PERIÆRESIS, from *peri*, and *απειν*, 'I take away.' A sort of circular incision, which the ancients made in the neighbourhood of large ab-

cesses. The periæresis is now only practised in some cases of tumours.

PERIALGIA, from *peri*, and *αλγος*, 'pain.' A very violent pain.

PERIAMMA, Amuletum.

PERIAPTON, Amuletum.

PERIBLAST, *Periplast*, (F.) *Périblaste*, from *περι*, 'around,' and *βλαστος*, 'a germ.' The amorphous matter, which surrounds the endoblast, *endoplast*, (F.) *Endoblaste* or cell nucleus, and undergoes segmentation.

PERIBLEMA, Catalema.

PERIBLEP'SIS, from *peri*, and *βλεπω*, 'I look.' The wild look that accompanies delirium. —Foësius.

PERIB'OLE, from *περιβαλλω*, (*περι*, and *βαλλω*), 'I surround.' The dress of a person. The pericardium. Also, the translation of morbid matters towards the surface of the body.

PERIBRO'SIS, *Periera'sis*, from *περιβρωσκω*, (*περι*, and *βρωσκω*, 'I eat,') 'I eat around.' Ulceration or erosion at the corners of the eyelids.

PERICAR'DIAC, *Pericar'dial*, *Pericar'diacus*; same etymon as Pericardium. Relating to the pericardium,—as 'pericardial murmur,' 'pericardial effusion,' 'pericardial arteries, veins,' &c., &c.

PERICARDIAL, Pericardiac.

PERICARDITIS, from *pericardium*, and *itis*, denoting inflammation; *Inflamma'tio seu Pleur'itis pericar'dii*, *Cardi'tis exter'na seu sero'sa seu membrano'sa*, *Exocar'di'tis*, *Inflamma'tion of the pericardium*, (F.) *Péricardite*, *Inflamma'tion du Péricarde*. This is probably the proper appellation for most of those cases which have received the names of *Carditis*, *Cardipericarditis*, *Cardopericarditis*, and *Cardiopericarditis*. Along with signs of pyrexia, the local symptoms resemble those of pneumonia. Those which point out that the pericardium is the seat of disease, are the following:—pain, referred to the region of the heart, or the scrobiculus cordis,—sometimes pungent, at others, dull and heavy; palpitation, accompanied with spasmodic twitchings in the neighbourhood of the heart, shooting up to the left shoulder; pulsation, and sometimes soreness of the carotids, with tinnitus aurium and vertigo; the breathing is by catches; dyspnoea considerable; pulse jarring, jerking, peculiar; the tongue white, covered with a mucous coat, and the skin often bathed in sweat, as in acute rheumatism. The *physical signs* during the first period are as follows. The action of the heart is generally evident to the eye, and may be felt by the hand. There is soreness to the touch over the intercostal spaces, and over a small surface in the epigastric region, when the pressure is directed upwards towards the pericardium. Percussion is usually natural, but at times there is dulness. On auscultation, the cardiac movements are found to be frequent, abrupt, jerking, and tumultuous; often irregular and intermittent. The pulse presents corresponding characters. When effusion of lymph has occurred, percussion may be negative, or be but slightly affected. On auscultation, in addition to the preceding signs, there may be one or more of the rubbing or friction *bruits* resembling the rustling of parchment, or of a sawing or rasping character. In some cases, the sound is like the creaking of new leather. This has been supposed to be pathognomonic of effused lymph. The most important point in the pathology of pericarditis is its connexion with acute rheumatism; and it forms one of the most dangerous occurrences in the latter disease. It may be *acute* or *chronic*: in either case, it is, of course, formidable. The most active depletion must be used; with large doses of opium, counter-irritants, and all the means re-

quired in the most violent internal inflammations.

PERICARDITIS EXSUDATORIA SANGUIOLENTA, Hæmopericardium.

PERICARDIUM, *Pericar'dion*, *Perib'olē*, *Membra'na Cor circumplex'a*, *Involu'crum seu Ar'cula seu Capsa seu Cap'sula seu Cam'era seu Indumentum seu Pannic'ulus seu Membra'na seu Theca seu Saccus seu Sac'culus seu Scrotum seu Vagi'na seu Ves'i'ca seu Arca seu Thal'amus regalis seu Amphies'ma seu Bursa Cordis, Sac or Capsule of the Heart*, (F.) *Péricarde*; from *peri*, and *καρδία*, 'the heart.' The pericardium is a membranous sac, which envelops the heart, and the arterial and venous trunks that pass from or into it. It is seated in the separation of the mediastinum, above the central aponeurosis of the diaphragm, to which it strongly adheres. Its shape is triangular, like that of the heart, to which it is fitted. The pericardium is composed of two membranes:—the one—*external*—fibrous; the other—*internal*—serous. The latter, having lined the inner surface of the external layer, is reflected over the heart, and covers it entirely; without, however, having the heart within it; in which arrangement it resembles other serous membranes. The pericardium envelops the heart; retains it in position, and facilitates its movements by means of the serous fluid contained in its cavity—*Cavum pericar'dii*—and secreted by the membrane—*Liquor seu Aqua seu Humor seu Lympha seu Uri'na Pericar'dii*, *Hydrocar'dia*, which it contains in greater or less quantity.

The *arteries* of the pericardium are small, and derived from the superior phrenic, anterior mediastinal and bronchial. The *veins* accompany them, and open into the brachio-cephalic. No nerves have been traced to it. The *lymphatics* enter the lymphatic glands that surround the vena cava superior.

PERICARPIUM, Epicarpium.

PERICHOLIA, Polycholia.

PERICHONDRI'TIS, *Inflamma'tio perichon'drii*, from *perichondrium*, and *itis*, denoting inflammation. Inflammation of the perichondrium: hence *Perichondri'tis larynge'a*;—Inflammation of the perichondrium covering the larynx.

PERICHON'DRIUM, (F.) *Périchondre*, from *peri*, and *χονδρος*, 'a cartilage.' A membrane of a fibrous nature, which covers cartilages that are non-articular, and bears considerable analogy to the periosteum in organization and uses.

PERICHRISIS, Circumlitio, Liniment.

PERICHRISTON, Circumlitio, Liniment.

PERICLA'SIS, from *peri*, and *κλαω*, 'I break.' A comminuted fracture, with denudation of the bone. —Galen. Foësius.

PERICLYMENUM, *Lonicera periclymenum* —p. Vulgare, *Lonicera periclymenum*.

PERICNE'MIA, from *peri*, and *κνημη*, 'the leg.' The parts surrounding the tibia;—the tibia itself.

PERICOLONI'TIS, *Pericol'i'tis*, from *peri*, and *colonitis*. Inflammation of the areolar tissue surrounding the colon.

PERICOLPI'TIS, from *peri*, *κολπος*, 'vagina,' and *itis*, denoting inflammation. Inflammation of the areolar tissue surrounding the vagina.

PERICRANIEDE'MA, from *pericranium*, and *οίδημα*, 'a swelling.' Œdema of the head, owing to fluid effused under the pericranium.

PERICRANIUM, *Periera'nion*, *Periera'nia*, (F.) *Périerane*, from *peri*, and *κρανιον*, 'the cranium.' The periosteum, which covers the cranium externally.

PERICRASIS, Peribrosis.

PERICYSTI'TIS, from *peri*, *κυστις*, 'the bladder,' and *itis*, denoting inflammation. Inflam-

mation of the areolar tissue separating the bladder from the neighbouring parts.

PERIDER'IA, from *peri*, and *δερν*, 'the neck.' Twisting of the cord round the neck of the child.

PERIDES'MIC, *Perides'micus*; from *peri*, and *δεσμος*, 'a ligament.' Some nosologists have given this name to ischuria caused by a ligature round the penis or by stricture of the urethra.

PERIDES'MIUM, from *peri*, and *δεσμος*, 'ligament.' The delicate areolar tissue covering a ligament.

PERIDIASTOLE, see Diastole.

PÉRIDIDYME, see Testicle.

PERID'ROMUS, from *peri*, and *δρομος*, 'a course.' The extreme circumference of the hairs of the head.—Gorræus.

PERIESTICOS, Salutory.

PERIGLOTTIS, Epiglottic gland: see Tongue.

PERIG'RAPHĒ, from *περιγραφω*, (*περι*, and *γραφω*, 'I write,') 'I circumscribe.' The aponeurotic intersections of the rectus abdominis are so called.—Vesalius.

PERIHEPATITIS, see Hepatitis.

PERILARYNGITIS, from *peri*, *larynx*, and *itis*, denoting inflammation. Inflammation of the areolar tissue surrounding the larynx, which not unfrequently ends in *perilaryngeal abscess*.

PERILYMPH, Cotunnus, liquor of.

PERIMYELITIS, Meningitis, spinal.

PERIMYS'IUM, *Fas'cia*, from *peri*, and *μυς*, 'a muscle.' The areolar membrane or sheath—*vagina muscularis*—that surrounds a muscle, or its fasciculi. The sheath of the whole muscle is termed *Perimysium externum*; of the fasciculi, *Perimysium internum*.

PERIN, *Peris*, from *περα*, 'a sac or pouch.' With some, this means the scrotum; with others, the testicle; with others, the vagina; with others, the peritonæum; and with others, the anus.

PERINÆOCELE, Hernia, perineal.

PERINÆOR'RHAPHY, *Perinæorrhaph'ia*, from *περιναϊον*, 'perinæum,' and *ραφή*, 'suture,' Suture of the perinæum, (F.) *Suture du Périnée*, in cases of laceration of the same.

PERINÆ'UM, *Interfemin'ium*, *Interfemin'ium*, *Interfemin'ium*, *Interfemin'ium*, *Interfemin'ium*, *Peris*, *Perin*, *Perinæum*, *Gressu'ra*, *Ptechas*, *Am'phiplex*, *Pech'e'deon*, *Mesos'celon*, *Mesos'celus*, *Perine'on*, *Perinæ'os*, *Perinæ'os*, *Tramis*, *Tawros*, *Interforamin'um*, *Cocho'nē*, *Plichos*, *Mesom'ion*, *Fœmen*, *R'egio Perinæ'i*, (F.) *Périnée*, (*πριν*, *πρινος*, 'the scrotum' [?].) The space at the inferior region of the trunk, between the ischiatic tuberosities, anus, and genital organs. It is smaller in the female than in the male; has a triangular shape, and is divided into two equal parts by a median line, called *Raphē*. It is occasionally ruptured in labour. At times, it has been made to extend posteriorly as far as the os coccygis. The part between the pudendum and anus is sometimes called *ante'rior perinæ'um*, to distinguish it from that which extends from the anus to the coccyx, called *post'e'rior perinæ'um*.

PERINÆUS, Perineal.

PERINÆ'AL, *Perinæ'us*, *Perinæ'al'is*, *Perinæ'al'is*. That which relates or belongs to the perinæum; as *Perineal artery*, *P. hernia*, &c.

PERINEAL APONEUROSIS, P. Fascia.

PERINEAL ARTERY, *Arte'ria perinæ'al'is*, *Superf'cial artery of the Perinæ'um*. A branch of the internal pudic distributed to the perinæum.

PERINEAL CUTANEOUS NERVE, see Sciatic nerve, lesser.

PERINEAL FAS'CIA, *Fas'cia Perinæ'i*, *Perinæ'al aponeuro'sis*. The fasciæ,—*superf'cial and deep-seated*—*Perinæ'al lig'ament*—*Camper's ligament*, *Trian'gular lig'ament*,—which belong to the perinæum.

PERINÆ'AL FOSSA, *Fossa perinæ'i*, *Ischio-rectal fossa*. A conical fossa, the base of which corresponds with the skin; is formed anteriorly by the transversus perinæi muscle; behind, by the inferior border of the glutæus maximus; internally, by the levator ani; and externally, by the tuber ischii. It is filled up with fat and fibrous strææ.

PERINEAL ISCHURIA, *Ischu'ria Perinæ'al'is*. A name given by Sauvages to retention of urine, caused by a tumour seated in the perinæum.

PERINEAL LIGAMENT, see P. fascia.

PERINEAL NERVE. A branch of the internal pudic; which is mainly distributed to the perinæum and scrotum of the male; and to the vulva and perinæum of the female.

PERINEAL REGION, Perinæum.

PERINEAL SECTION, *Sec'tio perinæ'al'is*. An incision into the perinæum for the cure of stricture of the urethra.

PÉRINÉE, Perinæum.

PERINEPHRITIS, (F.) *Phlegmon périné-phrétique*, from *peri*, *νεφρος*, 'kidney,' and *itis*, denoting inflammation. Inflammation of the external areolar and fibrous membranes of the kidney, or of their investing adipose areolar tissue.

PERINEPHRUS, see Kidney.

PERINEURION, Neurilemma.

PÉRINÈVRE, Neurilemma.

PERINYC'TIDES, *περι*, and *νυξ*, *νυκτος*, 'night.' An eruption appearing at night and disappearing by day.—Erolian.

PERIOD, *Pe'riodus*, *Periode'ia*, *Periodeu'sis*, *Stad'ium*, *Circu'itus*, (F.) *Période*, from *peri*, and 'odos,' 'way;' *Circuit*. *Periods* are the different phases or revolutions of a disease,—the epochs which are distinguishable in the course of a disease. Three periods are commonly enumerated. 1. The *augmentation*, *increase*, or *progress*, (*In-cremen'tum*;) 2. The *acme* or *height*, (F.) *État* (*Status*;) and, 3. The *decline* (*Decrementum*.) Some authors reckon only the *invasion* and *termination*.

Period is sometimes used in describing an intermittent, for the time between the commencement of a paroxysm and that of the next, including the fit as well as interval.

PERIODS, MONTHLY, Menses.

PERIODEIA, Period.

PERIODEUSIS, Period.

PERIODEUTES, Charlatan.

PERIODIC'ITY, *Periodic'itas*, *Rhythm*, (F.) *Périodicité*. Same etymon. The aptitude of certain physiological and pathological phenomena, in health or disease, to recur at particular periods, after longer or shorter intervals, during which they cease completely. Diseases, thus recurring, are called *periodical* or *rhythmical*—*Typo'ses*.

PERIODOL'OGY, *Periodolog'ia*, from *περι-odos*, 'a course or circuit,' and *λογος*, 'a discourse.' The doctrine of periodicity in health and disease.

PERIODONTITIS, (F.) *Périodontite*, *Inflam-mation de la Membrane alvéolo-dentaire*, from *peri*, and *ὀδὸς*, *ὀδοντος*, 'a tooth.' Inflammation of the membrane that lines the socket of a tooth.

PERIODONTITIS GINGIVARUM, Ulitis.

PERIODOSCOPE, from *περιόδος*, 'a period,' and *σκοπεω*, 'I view.' An instrument, proposed by Dr. Tyler Smith, for the ready calculation of the periodical functions of the sex. It consists of a movable circular dial, upon which the months and days are engraved, fixed on a pivot in the centre of a large plate on which are numbered the different conditions of the reproductive system, as conception, abortion, premature labour, hemorrhage, labour, &c. By a knowledge of the date of conception, say November 14th, and fixing

the movable plate opposite the point on the fixed plate which indicates conception, the observer is enabled, at once, to see, that, allowing 280 days for gestation, labour may be expected about the 20th of August. The dial is made of card-board, and is affixed to a small volume, in which its uses and applications are explained.

PERIODUS LUNARIS, see Menses — p. Morbi, Type — p. Sanguinis, Circulation.

PERIODYN'IA, from *peri*, and *δύσιν*, 'pain.' A violent and extensive pain.

PÉRIONE, Decidua.

PERIOR'BITA, *Perios'teum or'bitæ*, (F.) *Périorbite*, from *peri*, and *orbita*, 'the orbit.' An appellation used, by some, for the periosteum lining the orbit, which is a continuation of the dura mater. The inflammation of this periosteum is termed *Periorbitis* or *Periörbitis*, and *Inflamma'tio perios'tei or'bitæ*.

PERIORBITIS, see Periorbita.

PERIORBITITIS, see Periorbita.

PERIOSTEITIS, see Periostitis.

PERIOS'TEOPHYTE, from *periosteum*, and *φύω*, 'I grow.' An osseous formation, commencing in the periosteum.

PERIOS'TEUM, *Perios'teon*, *Perios'teos*, *Perios'tium*, *Circumossa'te*, *Membra'na ossis*, *Omen'tum ossium*, *Circumossa'tis Membra'na*, (F.) *Périorste*, from *peri*, and *στέον*, 'a bone.' The periosteum is a fibrous, white, resisting medium, which surrounds the bones every where, except the teeth at their coronæ, and the parts of other bones that are covered with cartilage. The external surface is united, in a more or less intimate manner, to the neighbouring parts by areolar tissue. Its inner surface covers the bone, whose depressions it accurately follows. It is united to the bone by small, fibrous prolongations; and, especially, by a prodigious quantity of vessels, which penetrate their substance. The periosteum unites the bones to the neighbouring parts. It assists in their growth, either by furnishing, at its inner surface, as M. Béclard demonstrated, an albuminous exudation, which becomes cartilaginous, and at length ossifies;—or by supporting the vessels, which penetrate them to carry the materials of their nutrition. See Medullary membrane.

PERIOSTEUM INTERNUM, Medullary membrane — p. Orbitæ, Periorbita.

PERIOSTI'TIS, *Periosteit'is*, *Inflamma'tio perios'tei*, from *periosteum*, and *itis*, denoting inflammation. Inflammation of the periosteum.

PERIOS'TO-MEDULLI'TIS, (F.) *Périostomédullite*, from *periosteum*, *medulla*, 'marrow,' and *itis*, a suffix denoting inflammation. Simultaneous inflammation of the periosteum and medulla spinalis. — Gerdy.

PERIOS'TOSIS, (F.) *Périostose*. Tumour of the periosteum. Tumours are so called which are developed on bones, and formed by their outer membrane. These tumours are more rapidly developed, have a less degree of consistence, and sooner disperse than exostoses, which they resemble greatly.

PERIOSTOSTE'ITIS, (F.) *Périostostéite*, from *periosteum*, *στέον*, 'a bone,' and *itis*, denoting inflammation. Simultaneous inflammation of the periosteum and bone. — Gerdy.

PERIPHERAD, see Peripheral aspect.

PERIPH'ERAL, *Periph'erie*, *Periph'erical*; from *peri*, and *φέρω*, 'I bear.' Relating or appertaining to the periphery or circumference.

PERIPHERAL ASPECT. An aspect towards the circumference of an organ. — Barclay. *Periph'erad* is used by the same writer adverbially to signify 'towards the peripheral aspect.'

PERIPHERAL VASCULAR SYSTEM, Capillary system.

PERIPHIMOSIS, Paraphimosi.

PERIPLAST, Periblast.

PERIPLEUMONIA, Peripneumonia.

PERIPLUCA INDICA, Hemidesmus Indicus — p. Mauritiana, see Scammony.

PERIPLYSIS, from *peri*, and *πλύσις*, 'the act of washing;' *Proflu'vium*. A copious discharge from any part, especially from the bowels.

PERIPNEUMON'IA, *Peripleumonia*, *Peripneumonitis*, *True peripneumony*, from *peri*, and *πνευμων*, 'the lung.' Inflammation of the substance of the lungs. See Pneumonia.

PERIPNEUMONIA BILIO'SA. Inflammation of the lungs, accompanied with bilious fever.

PERIPNEUMONIA CATARRH'ALIS. Bronchitis or pulmonary catarrh, with pain in some part of the chest. Peripneumonia notha.

PERIPNEUMONIA NOTHA, *P. spuria* seu *pituitosa seu catarrhalis*, *Pneumonia notha*, *Pseudo-peripneumonia*, *Pseudo-pneumonia*, *Pseudo-pneumonitis*, *Bronchoc'ace*, *Blennothor'ax*. *Obstruc'tio pulmonum pituitosa febrilis*, *Bronchitis asthenica*, *False or Bastard Peripneumony*, (F.) *Péripneumonie bâtarde ou fausse*, *Fausse pneumonie*. An inexact name, under which some affections are comprised that resemble pneumonia; and, especially chronic bronchitis with pleurodynia. See Bronchitis (chronic.)

PERIPNEUMONIA PITUITOSA, P. notha.

PERIPNEUMONITIS, Peripneumonia.

PERIPNEUMONY, Pneumonia — p. Bastard, Peripneumonia notha.

PERIPNEUMONY, LATENT. Peripneumony whose symptoms are so obscure as to be recognised with difficulty.

PERIPROCTI'TIS, from *περι*, 'around,' and *πρωκτος*, 'the anus.' Inflammation of the areolar tissue surrounding the rectum.

PERIPSYXIS, Catapsyxis, Perfrictio.

PERIPYE'MA, from *peri*, and *πυον*, 'pus.' Suppuration around an organ; — a tooth for example.

PERIRRHŒ'A, *Perir'rhœe*, from *peri*, and *ρῶω*, 'I flow.' Afflux of fluids from every point of the body towards an organ which has to remove them from the economy. Also, enuresis.

PERIS, Perin.

PERISCELIS, *Jarretière*.

PERISCYPHISMUS, Periscythismus.

PERISCYTHI'SMUS, *Periscy'thisis*, *Periscy'this'mus*, *Periscy'this*, *Periscy'phismus*, *Scalping*, from *peri*, and *Σκυθης*, 'a Scythian,' that is, 'scalping after the manner of the Scythians.' An operation described by Paulus of Ægina. It consisted of an incision made around the cranium, and was employed in habitual weakness of the eyes, pains of the head, &c.

PERISPHAL'SIS, *Circumductio*, from *peri*, and *σφάλλω*, 'I move.' A circular motion impressed on a luxated bone, for the purpose of reducing it.

PERISSODACTYLUS, Polydaetylus.

PERISPLENITIS, see Splenitis.

PERISTALTIC, Systaltic — p. Action, Peristole.

PERISTAPHYLINUS EXTERNUS, Circumflexus musculus — p. Inferior, Circumflexus musculus — p. Internus, Levator palati.

PERISTERA ANCEPS, Pelargonium anceps.

PERISTERIUM, Verberna officinalis.

PERISTER'NA, from *peri*, and *στέρον*, 'the sternum.' The lateral parts of the chest.

PERIS'TOLE, *Motus Peristalticus* seu *compressorius seu vermicular'ris* seu *testudin'eus*, from *peri*, and *στέλω*, 'I contract,' 'I close.' The peristaltic action of the intestines, *Motus peristalticus*, (F.) *Mouvement péristaltique*. It consists of a kind of undulation or vermicular movement,

in appearance irregular, but in which the circular fibres of the muscular membrane of the intestine contract successively, from above downwards, in proportion as the chyme advances in the alimentary canal; so that, being compressed above, it is pushed into the next portion of the intestine, whose fibres are in a state of relaxation. When the fibres contract inversely, they occasion an *antiperistaltic action*. The peristaltic action is involuntary, and is not under the immediate influence of either brain or spinal marrow. It continues for some time after death.

PERISTOMA, Peristroma.

PERISTOMIUM, Mouth.

PERISTRO'MA, *Peris'toma*, *Mus'cus villosus*, *Crusta membrana'cea seu vermicula'ris*, from *peri*, and *σπρωννυμι*, 'to spread.' The villous or mucous coat of the intestines.—Castelli.

PERISYS'TOLE, from *peri*, and *συστολη*, 'contraction.' The interval that exists between the systole and diastole of the heart, which is only perceptible in the dying.—Bartholine.

PERITERION, *Trépan perforatif*.

PERITESTIS, Albuginea.

PÉRITOINE, Peritonæum.

PERITOME, Circumcision.

PERITONÆREX'IS, *Peritonæorex'is*, from *peritonæum*, and *ρηγνυμι*, 'to break.' Hernia formed by the rupture of the peritonæum.

PERITONÆ'UM, *Peritonæum*, *Peritonæ'on*, *Peritonei'on*, *Peritonæ'os*, *Periton'i'on*, *Peritonæ'os*, *Velamentum abdominal'le*, *Tu'nica præten'sa* seu *Opærentium prætensum seu Membra'na abdominal'is*, *Pagos*, *Siphar*, *Syphar*, *Zepach*, *Ziphac*, (F.) *Péritoine*, from *peri*, and *τενω*, 'I stretch.' A serous membrane, which lines the abdominal cavity, *Peritonæum parietal'le*, extends over the greater part of the organs contained there, *Peritonæum intestinal'le* seu *viscera'le*, envelops them wholly or in part, and maintains their respective relations by means of different prolongations and ligamentous folds:—the *mesentery*, *epiploon*, *mesocolon*, &c. Like all the serous membranes, the peritonæum, except in the female, is a sort of sac without aperture, which covers the abdominal organs, without containing them within it, and the internal surface of which is smooth, and lubricated by a serous fluid. In the male fœtus, the peritonæum furnishes a prolongation, which accompanies the testicle at the time of its descent, and, in the female fœtus, forms the *Canal of Nuck*. Below the neck of the gall-bladder, the peritonæum has a triangular opening, called the *Foramen* or *Hiatus of Winslow*, through which it proceeds behind the stomach, to form a sort of secondary cavity, called the *posterior cavity of the peritonæum*, (F.) *Arrière cavité péritonéale* ou *Cavité des Épiploons*.

PERITONÆUM DUPLICATUM, Epiploon, gastrocolic.

PERITONÆ'AL, *Peritonæ'us*. That which appertains or relates to the peritonæum.

PÉRITONITE, Peritonitis—*p. Puerpérale*, see Peritonitis.

PERITONITIS, *Empres'ma* seu *Causa Peritonitis*, *Peritonæi'tis*, *Inflamma'tio* seu *Phlegmonæ Peritonæ'i*, *Phlegma'sia* or *Inflammation of the Peritonæum*, from *peritonæum*, and *itis*, denoting 'inflammation.' (F.) *Péritonite*, *Inflammation du Péritoine*. The characteristic signs of acute inflammation of the peritonæum are, — violent pain in the abdomen, increased by the slightest pressure, often by the simple weight of the bed-clothes. It generally occurs in the parturient state; *Lochoperitonitis*, and begins on the second or third day after delivery. At times, a malignant epidemic, and perhaps contagious, variety has made its appearance, and destroyed

numbers of females. This has been described under the name *Puer'peral Fever*, *Metroperitonitis*, *En'e'cia Syn'ochus Puerperæ'rum*, (F.) *Péritonite puerpérale*, *Métropéritonite puerpérale*, *Fèvre puerpérale*, *Typhus puerpéral*, *Erythemat'ic* or *Nonplastic Puerperal Peritonitis*, *Typhohæmic Peritonitis*, *Adynam'ic* or *Malignant Puer'peral Fever*, *Low Fever of Childbed*. It is, according to some, a malignant inflammation of the peritonæum and uterus; according to others, a *Uterine Phlebitis*. In any form it requires active treatment, early employed. The appearances on dissection are such as occur whenever a serous membrane has been inflamed, and such inflammation has produced death:—effusion of fluid with flakes of coagulable lymph in it; appearances of vascularity, &c., in the membrane. The treatment—in *active peritonitis*—must consist of the same course as recommended under Enteritis. In the *chronic* kind, symptoms must be combated as they arise, and it may be advisable to excite a new action in the system by means of mercury. In the epidemic and malignant variety, unless bleeding be freely employed at the very outset, it does harm. If used early, it is of decided advantage. Everything depends upon arresting the morbid process at the outset.

PERITONITIS, ERYTHEMATIC, see Peritonitis—*p. Hepatica*, see Hepatitis—*p. Nonplastic*, see Peritonitis—*p. Puerperal*, see Peritonitis—*p. Typhohæmic*, see Peritonitis.

PERITTOMA, Excrement.

PERITYPHLITIS; from *peri*, and *typhlitis*, inflammation of the cæcum. Inflammation of the areolar substance surrounding the cæcum. See Typhlo-enteritis.

PERI-UTERINE, *Peri-uteri'nus*, badly compounded from *peri*, and *uterus*. That which is situated around the uterus; hence "*periu'terine inflammation*" or "*periu'terine phlegmon*,"—inflammation of the areolar tissue around the uterus.

PERIWINKLE, LESSER, *Vinea minor*.

PERIZO'MA, from *περιζωννυμι*, (*περι*, and *ζωννυμι*, 'to gird,' 'to gird around.') A bandage; a girdle. In Fabricius Hildanus, a truss. *I herpes zoster*. The diaphragm.

PER'KINISM. A therapeutical means, first employed by Dr. Elisha Perkins, of Norwich, Connecticut, towards the termination of the last century, and named after him. It consisted in drawing over affected or other parts the pointed extremities of two metallic rods, called *Metallic Tractors*, each made of a different metal. The success obtained, was through the influence of the imagination; and, consequently, as a remedial agent, it ranks as high as animal magnetism, but no higher. The operation was, also, called *Tractoration*.

PER'KINIST. A believer in and practiser of Perkinism.

PERKINIS'TIC. Relating or belonging to Perkinism.

PERLA, Pearl, Paralampsis.

PERLE, Pearl.

PERMISTIO, Coition.

PERMIXTIO, Coition.

PERMOTIO, Motion.

PERNICIEUX, Deleterious.

PERNICIOSUS, Deleterious.

PERTIO, Chillblain.

PERNOCTATIO, Insomnia.

PEROCERPH'ALUS, from *πηρος*, 'deficient,' and *κεφαλη*, 'head.' A monster with a defective head.

PEROCORMUS, from *πηρος*, 'deficient,' and *κορμος*, 'trunk.' A malformation in which the trunk is defective, and too short, from the ab-

sence of one or more vertebræ,—the head and limbs being normal.

PERODACTYLEUS, Flexor longus digitorum pedis profundus perforans.

PERODYNIA, see Cardialgia.

PEROMEL'IA, from *πηρος*, 'deficient,' and *μελος*, 'a limb.' Congenital misconstruction, or mutilation of the limbs. A genus in the nosology of Good.

PEROM'ELUS. A monster possessed of the deformity mentioned above.

PÉRONÉ, Fibula—*p. Col du*, Collum fibulæ.

PERONE'AL, *Peronæus*, *Fibula'ris*, *Fib'ular*, (F.) *Péronier*, from *περονη*, 'the fibula.' Belonging or relating to the fibula.

PERONEAL ARTERY, *Fib'ular*, A., arises from the popliteal, and is situate deeply in the posterior and outer part of the leg. It gives off branches of little importance. Near the outer ankle, it divides into two branches. 1. The *posterior peroneal*, which descends behind the lower joint of the fibula, on the outer surface of the calcaneum. 2. The *anterior peroneal*, which crosses the inferior extremity of the interosseous ligament, to be distributed on the dorsal surface of the foot.

PERONEAL MUSCLES are three in number. 1. *Peronæus Brevis seu Secundus seu Ant'icus seu Me'dius*, *Semi-fibulæus*, (F.) *Grand-péronéo-sus-métatarsien*, *Court péronéo-latéral*, *Moyen Péronier*. A muscle, situate beneath the peronæus longus. It is attached above, to the outer surface of the fibula, and terminates, below, at the posterior extremity of the 5th metatarsal bone, after having been reflected beneath the malleolus externus. It extends the foot upon the leg, at the same time raising a little the outer edge. It may, also, act upon the leg, and extend it upon the foot. 2. *Peronæus Longus seu primus seu post'icus seu max'imus seu poste'rior*, (F.) *Tibi-péronéo-tarsien*, *Long péronier latéral*, *Péronéo-sus-tarsien*, (Ch.) *Muscle grand péronier*. This muscle is situate at the outer part of the leg. It is long, thick, and triangular above; thin, narrow, and flat below. It is attached above to the outer edge of the upper extremity of the fibula, and to the upper third of the outer surface of that bone. Below, it terminates at the outer part of the posterior extremity of the first metatarsal bone. This muscle extends the foot on the leg, turning its point outward, and raising its outer edge. It acts, also, upon the leg, which it extends on the foot. 3. *Peronæus Tertius*, *Nonus Vesal'ii*, (F.) *Péronier antérieur*, *Petit péronéo-sus-métatarsien* (Ch.) *Petit Péronier*. A muscle, situate at the anterior, outer, and inferior part of the leg. It is long and flat, and is attached, above, to the inferior third of the anterior margin and inner surface of the fibula; terminating, below, at the posterior extremity of the 5th metatarsal bone. This muscle bends the foot on the leg, by raising its outer edge. It can, also, bend the leg on the foot.

PERONEAL NERVE, see Popliteal nerves.

PERONEAL VEIN follows the same course as the artery.

PERONEDACTYLIUS, Flexor longus digitorum pedis profundus perforans.

PÉRONÉO-LATÉRAL COURT, Peronæus brevis—*p. Phalangien du gros orteil*, Flexor longus pollicis pedis—*p. Sus-phalangietti du pouce*, Flexor longus pollicis pedis—*p. Sus-tarsien*, Peronæus longus—*p. Sus-métatarsien*, Peronæus tertius—*p. Sus-métatarsien*, grand, Peronæus brevis—*p. Sus-phalangietti du pouce*, Extensor proprius pollicis pedis—*p. Tibi-sus-phalangietti commun*, Extensor communis digi-

torum pedis—*p. Sus-phalangien du pouce*, Extensor proprius pollicis pedis.

PERONEUM, Fibula.

PÉRONIER, Peroneal.

PÉRONIER, GRAND, Peronæus longus—*p. Latéral*, long, Peronæus longus—*p. Moyen*, Peronæus brevis—*p. Petit*, Peronæus tertius.

PERONODACTYLLÆUS, Flexor longus digitorum pedis profundus perforans.

PERONODACTYLIUS, Flexor longus digitorum pedis profundus perforans.

PEROS'MUS, from *πηρος*, 'deficient,' and *σωμα*, 'body.' A monster, whose whole body is imperfectly developed.—Gurlt.

PEROSPLANCH'NICA, from *πηρος*, 'deficient,' and *σπλαγχνον*, 'a viscus.' Congenital misconstruction of the viscera. A genus in the nosology of Good.

PERPENDICULUM HEPATIS, Suspensory ligament of the liver.

PERPERACU'TUS. 'Extremely acute.' An epithet applied to very violent and rapid diseases.

PERPLEXI MORBI, see Complication.

PERPLICA'TION, *Perplicatio*; from *per*, 'through,' and *πlico*, *plicatum*, 'to fold.' A method of tying arteries, which consists in making a small incision in the side of the artery, near its bleeding orifice, introducing a small pair of forceps, seizing the open extremity, and drawing it backward, through the aperture made in the side of the vessel, so as to form a kind of knot.

PERROSIN, see Pinus abies.

PERRY COUNTY WARM SPRINGS. These are in Pennsylvania, eleven miles from Carlisle, and fourteen from Harrisburg. Temperature 67°; impregnation not much. They are used for bathing.

PERSEA CAMFORA, see Camphor—*p. Cassia*, *Laurus cassia*—*p. Cinnamomum*, *Laurus cinnamomum*—*p. Cubeba*, *Piper cubeba*.

PER'SEA GRATIS'SIMA, *Laurus Persea*, *Palta tree*, *Avocado Pear*. A slender, very high tree of Peru, with a small dome-like top, which grows on the eastern declivity of the Andes, and rises, at times, to the height of more than 60 feet. Its fruit—(S.) *Palta*—which is pear-shaped, is generally much liked. It dissolves, like butter, on the tongue, and hence is called, in some of the French colonies, *beurre végétale*. The leaves are reckoned balsamic, pectoral and vulnerary. The seeds are very astringent.

PERSEA PICHURIM, see Pichurim beans—*p. Sassafras*, *Laurus sassafras*.

PERSIAN FIRE, Anthracion.

PERSICA VULGARIS, Amygdalus Persica.

PERSICAIRE ÂCRE, Polygonum hydropiper—*p. Brulante*, Polygonum hydropiper—*p. Douce*, Persicaria—*p. Poivrée*, Polygonum hydropiper.

PERSICARIA, Polygonum Persicaria—*p. Minor*, Polygonum Persicaria—*p. Mitis*, Polygonum Persicaria—*p. Urens*, Polygonum hydropiper—*p. Wandspiked*, Polygonum Virginianum—*p. Water*, Polygonum amphibium.

PERSIL, Apium petroselinum—*p. d'Âne*, Chærophyllum sylvestre—*p. Faux*, Æthusa cynapium—*p. de Macédoin*, Bubon Macedonicum—*p. de Montagne*, Athamanta aureoselinum.

PERSIMMON, Diospyros Virginiana.

PERSOLATA, Aretium lappa.

PERSOLLATA Aretium lappa

PERSOLUTA, Aretium lappa.

PERSPICILLUM, see Spectacles.

PERSPIRABLE SANCTORIANUM, Perspiration.

PERSPIRA'TION, *Perspiratio*, *Transpiratio*, *Diffusio*, *Diap'noë*, *Diapnœ'a*, *Diapneusis*, *Perspirabilè Sanctoria'num*, from *per*, 'through,

and *spirare, spiratum*, 'to breathe, exhale.' The *insensible transpiration* or exhalation continually going on at the surface of the skin and membranes. Sensible perspiration is called *semitranspiration*. The perspiratory fluid is secreted by an appropriate glandular apparatus, termed by Breschet, *diapnog'neous*, (F.) *Appareil diapnogène*; the *sudorip'arous glands, Gland'ulæ sudorip'aræ, Or'gana sudorip'ara, sweat glands*, consisting of a convoluted tube, situate beneath the true skin, and of spiral ducts, which open obliquely under the scales of the epidermis. A certain portion of the perspired fluid is thrown off by ordinary physical evaporation.

The *Pulmonary exhalation or transpiration* is that which takes place into the bronchia, and is sent out with the expired air.

PERSPIRATORY, *Perspirato'rius, Transpi'ratory, Transpirato'rius*, (F.) *Perspiratoire, Transpi'ratoire*. Same etymon as the last. Relating or belonging to, or the product of, perspiration.

PERSUDIATIO, Diapedesis.

PERSULTATIO, Diapedesis.

PERTE, Metrorrhagia — *p. d'Appetit, Anorexia* — *p. de la Mémoire, Amnesia* — *p. de l'Odorat, Anosmia* — *p. de Sang, Hæmorrhagia* — *p. de la Voix, Aphonia* — *p. de la Vue, Cæcitas*.

PERTÉREBRANT, *Perte'rebrans*, from *per*, 'through,' and *terebrare*, 'to bore.' The French give this epithet to an acute pain — *Douleur perté'rebrante* — which occasions a sensation like that which would be produced by an instrument penetrating and lacerating a part; — the pain from whitlow, for example.

PERTES BLANCHES, Leucorrhœa — *p. de Sang, Metrorrhagia* — *p. Séminales, Spermatorrhœa* — *p. Uétrines, Metrorrhagia* — *p. Uétrines blanches, Leucorrhœa* — *p. Uétrines rouges, Metrorrhagia*.

PERTICA PER SE, Penis.

PERTURBATIONES ANIMI, Affections of the mind.

PERTURBA'TRIX, (*Medici'na*) from *perturbare, perturbatum* (*per* and *turbare*) 'to disturb greatly.' *Perturbating treatment*, (F.) *Méthode ou Médecine perturbatrice*; a mode of treatment in which very active means are employed, and such as impress upon diseases a different course from that natural to them. It is the antithesis to the *Medicina expectans*. Much evil has resulted from such treatment, especially in febrile diseases.

PERTUS'SIS, from *per*, and *tussis*, 'a cough,' 'a violent cough.' *Tussis feri'na seu convulsiv'va seu pu'eros strang'ulans seu quinta seu etonach'al'is seu an'hela clamo'sa seu stran'gulans seu delas'sans seu suffocans seu amphemer'ina seu tussiculo'sa seu spasmod'ica seu asini'na seu cani'na, Bronchi'tis convulsiv'va, Bronchocephali'tis, Pneus'is pertus'sis, Amphemer'ina, Orthopnœ'a tussiculo'sa seu clango'sa seu suffocant'va seu clamo'sa seu spasmod'ica, Morbus Cucul'tus seu cuculla'ris, Cucul'tus, Bechorthopnœ'a, Bez convulsiv'va seu theri'o'des, Hooping-cough, Whooping-cough, Chin-cough, Kin-cough, Kind-cough, (Germ. Kind, 'a child,') (Sc.) *Kink-host*, (Prov.) *Kinkhaust*, (F.) *Coqueluche, Catarrhe ou Bronchite convulsive, Toux convulsive ou quinteuse ou blene, Maladie cuculaire*. A violent convulsive cough, returning by fits, (F.) *Quintes*, at longer or shorter intervals; and consisting of several expirations, followed by a sonorous inspiration or *whoop*. The fits of coughing generally recur more frequently during the night, morning, and evening, than in the day. It is esteemed to be contagious, and attacks the young more particularly. It is rare for it to affect an individual for the second time. The duration is various, — six or eight weeks or more. Although the paroxysms are very violent, it is not a dangerous disease. It may, however,*

give rise to other affections, as convulsions, pneumonia, &c., when the complication is very dangerous, as the cause cannot be removed. Those children suffer the least, who evacuate the contents of the stomach during the fit. In the treatment, all that can be done is to palliate. It must be borne in mind, that the disease will, in time, wear itself out. If there be such tensive pain of the head, or fever, bleeding may be required, but it is seldom necessary. Narcotics occasionally afford relief, but it is temporary. Gentle emetics, given occasionally, when the paroxysms are long and dry, give decided relief, and aid in the expectation of the morbid secretions. After the disease has continued for some weeks, and persists in part from habit, change of air is essential, and this, even should the change be to an atmosphere that is less pure.

PERU, see Lima.

PERUNCTIO, Inunction.

PERVENCHE, *Vinea minor*.

PERVER'SION, *Perver'sio*, from *per* and *vertere, versum*, 'to turn.' *Dias'trophè, Diastrem'ma*. One of the four modifications of function in disease: the three others being augmentation, diminution, and abolition. The humourists used this term also to designate disorder or morbid change in the fluids.

PERVERSION DE LA TÊTE DES OS ET DES MUSCLES, Loxarthrus.

PERVIGILIUM, Insomnia, Coma vigil.

PES, genitive *Pedis*, πους, ποδος, *Ichnus*, (Sc.) *Fit*, (F.) *Pied*, 'the foot.' The inferior extremity of the abdominal member, representing a bony arch, an elastic vault, which transmits the weight of the body to the ground. It is divided into three parts; — the *tarsus, metatarsus*, and *toes*.

PES ALEXANDRINUS, *Anthemis pyrethrum* — *p. Anserinus, Chenopodium bonus Henricus, Facial nerve* — *p. Cati, Antennaria Dioica* — *p. Equinus, Pes equinus*, see *Kylosis* — *p. Hippocampi major, Cornu ammonis* — *p. Hippocampi minor, Hippocampus minor* — *p. Hippopotami major, Cornu ammonis* — *p. Hippopotami minor, Cornu ammonis* — *p. Leonis, Alchemilla*.

PESANTEUR, Weight — *p. Spécifique, Gravity, specific*.

PÈSE-ACIDE, Acidometer — *p. Liqueur, Areometer* — *p. Sirop, Saccharometer*.

PESETTE, *Ciccr arietinum*.

PESSAIRE, Pessary — *p. Intra-utérin, Pessary, intra-uterine*.

PESSARY, *Pessa'rium*, from πῶσος, 'a small stone; a pessary,' *Pessus, Pessum, Pessulus, Penic'ulus, Tabus, Nod'ulus uter'inus, Suppositorium uter'inum, Glans, Lemnis'cus*, (F.) *Pessaire*. A solid instrument, composed of cork, ivory, or elastic gum, which is introduced into the vagina to support the uterus, in cases of prolapsus or relaxation of that organ; to keep vaginal hernia reduced, &c. The ancients made use of *medicated pessaries*, which they distinguished into emollient, astringent, aperient, &c., and they are still used. The form of pessaries is very variable; — round, oval, &c., according to circumstances.

PESSARY, EGYPTIAN, *Ægyptius pessus*.

PESSARY, INTRA-U'TERINE, *Stem pessary*, (F.) *Pessaire intra-utérin, Redresseur utérin*. An instrument for rectifying uterine displacements — as anteversion and retroversion, consisting of a stem which is introduced into the uterus; this stem is attached to a flattened ovoid bulb or ball, on which the cervix uteri rests. — Connected with this is an external part or wire frame, which is attached, at one extremity, to a flat tubular portion, passing into the vagina, to be fixed to the intra-uterine portion. The wire frame is made to

press upon the pubis, so that the pessary can be kept in position *in utero*. This is essentially the intra-uterine pessary of Professor Simpson of Edinburgh.

PESSARY, STEM, Pessary, intra-uterine.

PESSULUS, Pessary, Penis.

PESSUM, Pessary.

PESSUS, Pessary.

PEST, Plague.

PESTE, Plague—*p. Antonine*, Plague of Antoninus—*p. d'Athènes*, Plague of Athens—*p. Noire*, Death, black.

PESTICIDÆ, Petchiæ.

PESTICLÆ, Petchiæ.

PESTILENCE, *Pestilentia*, *Pestil'itas*, from *pestis*, 'a pest.' A malignant spreading disease;—applied especially to plague.

PESTILENCE, CHOLERIC, Cholera spasmodica—*p. Glandulari*, Plague—*p. Hæmagastriæ*, Fever, yellow—*p. Septicæ*, Plague.

PESTILENT-WORT, Tussilago petasites.

PESTILENTIA, Plague—*p. Hæmagastriæ*, Fever, yellow.

PESTILENT'IAL, *Pestilentia'lis*, *Pestilentia'rius*, *Pestilentio'sus*, *Pestilent'us*, (F.) *Pestilentiël*. Relating or appertaining to a pest or plague. *Pestilential diseases* are those that bear some resemblance to the plague in respect to mode of propagation, symptoms, danger, &c.

PESTILITAS, Plague.

PESTIS, Plague—*p. Acutissima*, Plague—*p. Adeno-septica*, Plague—*p. Americana*, Fever, yellow—*p. Antoniniana*, Plague of Antoninus—*p. Bellica*, Typhus—*p. Britannica*, Sudor Anglicus—*p. Bubonaria orientalis*, Plague—*p. Contagiosa*, Plague—*p. Glandulosa*, Plague—*p. Glossanthrax*, Glossanthrax—*p. Inguinaria*, Plague—*p. Inter-tropica*, Fever, yellow—*p. Nigra*, Death, black—*p. Occidentalis*, Fever, yellow—*p. Orientalis*, Plague—*p. Septica*, Plague—*p. Variolosa*, Variola.

PESTLE, Pilum—*p. Spring*, see Pilum.

PET. Fart.

PETALE, Phtheiriæsis.

PETASITES, Tussilago petasites—*p. Hybrida*, Tussilago petasites—*p. Major*, Tussilago petasites—*p. Officinalis*, Tussilago petasites—*p. Rubens*, Tussilago petasites—*p. Vulgaris*, Tussilago petasites.

PETAURUM. A seat suspended by ropes, in which a person taking the exercise sat, and was tossed about by assistants.—Juvenal and Martial.

PETE'CHIE, *Petic'ula*, *Pestich'ia*, *Pestic'ia*, *Punctic'ula*, *Pur'pura mali'na*, *Por'phyra Græco'rum*, (F.) *Pétéchies*. Small spots, similar in shape and colour to flea-bites, which occur spontaneously upon the skin, in the course of severe fevers, &c. They are, under such circumstances, signs of great prostration.

PETECHLÆ SINE FEBRE, Purpura simplex.

PETE'CHIAL, *Petchi'al'is*; same etymon. Resembling or accompanied by petechiæ.

PETECHIAL SCURVY, Purpura simplex.

PETECHIANOSIS, Purpura hæmorrhagica.

PETER'S PILLS, Pilulæ Aloes et Cambogizæ—*p. Worm* lozenges, see Worm lozenges, Sherman's.

PETICULÆ, Petchiæ.

PETIGO, Impetigo.

PETINA, Sole.

PETIOLUS, *Pediolus*, diminutive of *pes*, 'a foot. A footstalk or leafstalk of a plant. A petiole.

PETIOLUS EPIGLOTTIDIS. The root of the Epiglottis.

PETIOLUS MALLEI, Manubrium mallei.

PETIT ARGENT, Platinum—*p. Courier*, Influenza—*p. Lait*, Serum lactis—*p. Lait d'Hoffmann*, Serum lactis Hoffmanni—*p. Mal*, see

Epilepsy—*p. Sus-maxillo-labial*, Levator anguli oris.

PETITE-POSTE, Influenza.

PETITS-LAITS, see Serum lactis.

PETRELEUM, Petroleum.

PETREUM, Solidago virgaurea.

PETRAPIUM, Bubon Macedonicum.

PÉTRÉOLE, Petroleum.

PÉTREUX, Petrous—*p. Os*, see Temporal bone.

PETRO DEL PORCO, Bezoar of the Indian porcupine.

PÉTROLE, Petroleum.

PETRO'LEUM, *Petrolæ'um*, *Petræ'leum*, *Petræ'oleum*, *Bitu'men Petroleum*, *Pisselæ'um Indicum*, *Rock Oil*, *Petroleum Barbaden'se*, *Barbadoes Tar*, (F.) *Pétrole* ou *Pétréole*, from *πέτρος*, 'rock,' and *ελαϊον*, 'oil.' A bituminous substance flowing spontaneously from the earth, in various parts of the world; of a fetid odour, and bitter, acrid taste. It is semi-liquid, tenacious, semi-transparent; of a reddish-brown colour; insoluble in water and alcohol; combines with fixed and essential oils and sulphur; and is partially soluble in ether. The petroleum found at Gabian, near Béziers, in France, has been called *Oleum Gabia'num*, (F.) *Huile de Gabian*, *Petroleum rubrum*. It has been given as an excitant expectorant; and, mixed with tincture of asafoetida, in tapeworm. It is, also, used externally in chilblains, chronic rheumatism, affections of the joints and skin, and paralysis.

New York Petroleum, called *Sen'eca Oil*, is used externally in similar cases.

PETROLEUM BARBADENSE, Petroleum.

PETROLEUM SULPHURATUM, *Bal'samum Sulphuris Barbaden'se*.—(Composed of *petrol*, *Barbad.* ʒxvj, *flor. Sulph.* ʒiv) has been used as a pectoral; and as a detergent to ulcers. It has been accounted antispasmodic and sudorific. Dose, gtt. x. to xxx. Externally, it is used as a stimulant and discutient.

PETRO-OCCIPITAL, *Petro-occipitalis*. Belonging to the petrous portion of the temporal bone and to the occipital bone.

PETRO-OCCIPITAL SUTURE is formed by the junction of the petrous portion of the temporal with the occipital bone. It is a deep groove separating the bones, which have between them a thin layer of cartilage.

PETRO-SALPINGO-PHARYNGEUS. A fleshy fasciculus, which extends from the sphenoid bone, from the petrous portion of the temporal bone, and from the Eustachian tube to the upper part of the pharynx. See Constrictor.

PETRO-SALPINGO-STAPHYLINUS, Circumflexus—*p. Salpingo-staphylinus*, Levator palati—*p. Staphylin*, Levator palati.

PETRO-SPHENOID'AL, *Petro-sphenoida'lis*. Belonging to the petrous portion of the temporal bone and to the sphenoid bone.

PETRO-SPHENOIDAL SUTURE;—a name given to the small suture which is formed by the anterior edge of the petrous portion of the temporal bone and the posterior edge of the sphenoid.

PETROSAL, Petrous.

PETROSELINUM, Apium petroselinum—*p. Macedonicum*, Bubon Macedonicum.

PETROSUM, OS, see Temporal.

PETROUS, *Petro'sus*, *Petro'sal*, (F.) *Pétréux*, *Pierrenæx*, from *πέτρα*, and *πέτρος*, 'a stone.' Resembling stone; having the hardness of stone. Relating or belonging to the petrous portion of the temporal bone.

PETROUS GANGLION, *Petro'sal Ganglion*, *Ganglion of Andersch*, is formed by the glosso-pharyngeal nerve, shortly after it emerges from the

jugular fossa. From this ganglion, M. Jacobson of Copenhagen traced an anastomosing loop through the cavity of the tympanum, which left branches there, and was thence reflected downwards to join the Vidian nerve. — See Otic Ganglion. This has been called the *Nerve of Jacobson*, *Tympanic branch of the glosso-pharyngeal*, and the innosculation, *Jacobson's Anastomosis*.

PETROUS PORTION OF TEMPORAL BONE, see Temporal Bone—p. Process, see Temporal Bone.

PETROUS SINUSES, *Petro'sal Sinuses*, are two venous sinuses of the dura mater, connected with the petrous portion of the temporal bone, and distinguished on each side, into:—1. The *superior petrosal sinus*. It arises from the cavernous sinus; follows the upper edge of the petrous portion which affords it a gutter; passes into the great circumference of the tentorium cerebelli, and opens into the lateral sinus where the latter experiences a bend near the base of the pars petrosa. Its form is triangular. 2. The *inferior petrosal sinus* arises from the cavernous sinus at the same point as the last, with which it communicates at the moment of its origin. It descends between the inferior edge of the pars petrosa and the basillary process; and terminates in the lateral sinus, at the sinus or gulf of the internal jugular vein. It is triangular, and broader at its extremities than at the middle,

PETUM, *Nicotiana tabacum*.

PETUN, *Nicotiana tabacum*.

PEUCE, *Pinus sylvestris*.

PEUCEA BALSAMEA, see *Pinus abies*.

PEUCED'ANUM, from *πευκη*, 'the pine tree,' its leaves resembling those of the pine; *P. officinalis* seu *alsaticum* seu *altissimum* seu *paniculatum* seu *ternatum*, *Selinum peucedanum*, *Marathrum sylvestris*, *Marathrophylitum*, *Pinastellum*, *Fœniculum porci*, *num*, *Bonus Genus*, *Hog's Fenel*, *Sulphurwort*, (F.) *Peucedan*, *Queue de Pourceau*, *Fenouil de Porc*. *Ord. Umbelliferae. Sez. Syst. Pentandria Digynia*. The root has a strong, fetid smell—somewhat resembling that of sulphureous solutions—and an acrid, unctuous, bitterish taste. It has been recommended as antihysterical and nervine.

PEUCEDANUM ALSATICUM, *Peucedanum*—p. *Altissimum*, *Peucedanum*—p. *Officinale*, *Peucedanum*—p. *Oroselinum*, *Althamanta aureoselinum*.

PEUCEDANUM PALMATUM, *Thysselium* seu *Selinum palustre*, *Selinum sylvestris* seu *thysselium* seu *lactescens*, *Thysselinum*, *Olenitium*, *Marsh selinum*, a European plant, has been recommended as an anti-epileptic. In Courland, it has been a famous remedy in epilepsy.

PEUCEDANUM PANICULATUM, *Peucedanum*—p. *Pratense*, *P. silans*.

PEUCEDANUM SILAÛS, *P. pratense*, *Seseli pratense*, *Sium* seu *Ligusticum* seu *Cnidium silaus*, *Saxifraga vulgaris* seu *Anglica*, *Hippomarathrum*, *Fœniculum eraticum*, *English or Meadow Saxifrage*, (F.) *Séséli des prés*. The roots, leaves, and seeds have been recommended as aperients, diuretics, and carminatives. Rarely used.

PEUCEDANUM TERNATUM, *Peucedanum*.

PEUPLIER, *Populus*—p. *Baumier*, *Fagara octandra*—p. *de la Caroline*, *Fagara octandra*—p. *Franc*, *Populus*—p. *Noir*, *Peucedanum*.

PEXIS, *Concretion*.

PEYERI GLAND'ULÆ, *Peyeri Plexus glandulosi*, *Glandula Peyeria'næ* seu *mucosæ coaginata* seu *agminata* seu *muciparæ racematim congesta* intestino'rum seu *intestinalis plexiformis* seu *spuriæ*, *Corpuscula glandularum similia*, *Glandulæ in æqum congregatæ intestino'rum*, *Enterad'næ*, *Peyer's Glands*, *Agminated or aggregate glands*. Small glands or follicles,

situate beneath the villous coat of the intestines, called after Peyer, who well described them. They are clustered together, (F.) *Plaques de Peyer*, having a honey-comb appearance—*Plaques gaufrées*—and are extremely numerous. They occur most numerously in the lower portion of the ileum, and resemble, in their morphology and functions, the lymphatic ganglions. They are, evidently, concerned in the great function of lymphosis.

PEZA, *πέζα*, *Doric and Arcadian* for *πους*, 'a foot.' The foot: according to some, the sole of the foot; and to others, the astragalus. The ankle.

PEZI'ZA seu PEZE'ZA AURIC'ULA, from *πέζα*, 'the sole of the foot,' *Tremella auricula Judæ*, *Auricula Judæ*, *Auricularia sambuci* seu *sambucina*, *Exidia auricula Judæ*, *Merulius auricula*, *Fungus sambucinus*, *Agaricus Auricula formæ*, *Jew's Ear*. *Ord. Fungi*. This fungus is said to be astringent; but has chiefly been used as a gargle in relaxed sore throat.

PFEFFERS or PRÄFFERS, MINERAL WATERS OF, *Therma Piperina*, *Th. fabarica*. These springs, which are in the Swiss Alps, are simply thermal: temperature 100° of Fahrenheit.

PHACĒ, *Phacæa*, *Phacus*, *φακν*, 'a grain of the lentil,' *Erum lens*. Also, chloasma; the crystalline lens; and a flask for the application of heat, so called owing to its flattened lens-like shape.

PHACELLUS, *Fasciculus*.

PHACELUS, *Fasciculus*.

PHACHYMENTIS, *Phacohymenitis*.

PHACI, *Ephelides*.

PHACI'CUS, *Phacotus*, *Phacodes*; from *φακν*, 'lens.' Lens-shaped, lenticular.

PHACI'TIS, *Phacoiditis*, *Lentititis*, *Crystallitis*, *Cristalloiditis*, *Glenitis*, from *φακος*, 'a lens,' and *itis*, a termination denoting inflammation. Inflammation of the crystalline lens [?]. Inflammation of the capsule of the lens is termed *Capsulitis*, *Capsulitis*, and *Crystallino-capsulitis*, *PHACOD'ES*, *Phacicus*.

PHACOHYMENTIS, *Phakomenitis*, *Phachymenitis*, *Inflammatio capsulæ lentis*; from *φακος*, 'a lens,' *ὑμνη*, 'a membrane,' and *itis*, denoting inflammation. Inflammation of the capsule of the crystalline.

PHACOIDEITIS, *Phacitis*.

PHACOMALACIA, *Cataract*, soft.

PHAC'OPIS, *Phacotus*; from *φακν*, 'lens,' and *οπίς*, 'a knife,' *Scalpellum lenticularē*. A lenticular-shaped knife.

PHACOPS'IS, from *φακν*, 'lens,' and *οπίς*, 'vision.' The state of one who has chloasma or freckles on the face.

PHACOPTIS'ANA, *Phacium*; from *φακν*, 'lens,' and *πιανν*, 'drink.' A drink of lentils. A poultice of lentils.

PHACOS, *Erum lens*.

PHACOSCOTOMA, *Cataract*.

PHACOTUS, *Phacicus*, *Phacopis*.

PHACUS, *Phace*.

PHÆNIGMUS, *Phenigmus*.

PHÆNOMENOLOGIA, *Semeiology*.

PHÆNOMENON, *Phenomenon*.

PHAGÆNA, *Boulimia*.

PHAGEDÆNA, *Boulimia*, *Phagedenic ulcer*—p. *Sloughing*, of the mouth, *Cancer aquaticus*—p. *Gangrænosa*, *Hospital gangrene*.

PHAGEDEN'IC, *Phagedænicus*, *Depas'cens*, (F.) *Phagédénique*, *Rougeant*, from *φαγν*, 'I eat.'

PHAGEDENIC ULCER, *Nonæ*, *Phagedæna*, *Ulcus depas'cens* seu *obambulans* seu *feritum*, (F.) *Ulcère phagédénique* ou *rougeant*, is one which rapidly eats and corrodes the neighbouring parts.

Phagedenic, in *Materia Medica*, is a substance

used for destroying fungous granulations in ulcers, &c.

PHAKOHYMENTIS, Phacohyementis.

PHALACRA, Calvities.

PHALACROMA, Calvities.

PHALACROSIS, Calvities.

PHALACROTIS, Alopecia.

PHALENA PINGUINALIS, see Ectozoa.

PHALAIJA. A barbarous term, employed by Basil Valentine to designate a universal medicine or panacea.

PHALAN'GAL, *Phalan'gian*, *Phalangia'nus*, from *φαλαγγ*, *φαλαγγος*, 'a phalanx.' Having relation to a phalanx.

PHALANGARTHRI'TIS, from *φαλαγγ*, *φαλαγγος*, 'a phalanx,' *αρθρον*, 'a joint,' and *itis*, denoting inflammation. Gout in the fingers. Inflammation of the joints of the fingers.

PHALANGE, Phalanx.

PHALANGES DES DOIGTS, see Phalanx—p. of the Fingers, see Phalanx—p. des Orteils, see Phalanx—p. of the Toes, see Phalanx.

PHALANGETTES, see Phalanx.

PHALANGETTIEN. Professor Chaussier uses this term for any thing relating to the third phalanx of the fingers or toes, — *Phalangien*, for what relates to the first, — and *Phalanginien*, to the second.

PHALANGIAN, Phalangal.

PHALANGIEN, see *Phalangettien*.

PHALANGINES, see Phalanx.

PHALANGINIEN, see *Phalangettien*.

PHALANGIUM ESCULENTUM, Scilla esculenta.

PHALANGO'SIS, *Hispid'itas*, from *φαλαγγ*, *φαλαγγος*, 'a phalanx,' 'a row of soldiers.' An affection of the eyelids in which the lashes are arranged in two or three rows. See *Trichiasis*. Also, dropping of the upper eyelid, from paralysis of the levator palpebræ superioris muscle.

PHALANX, *Phalan'gē*, *Phalango'ma*. Same etymon. A name given to the small bones which form the fingers and toes, because placed alongside each other like a phalanx. They are distinguished into the *Phalanges of the fingers*, *Ossa seu Ag'mina seu A'cies seu Artic'uli seu Scutic'ula seu Scutula seu Nodi seu Interno'dia seu Scytal'ides seu Con'dyli Digt'o'rum Manū*; and the *Phalanges of the Toes*, *Ossa seu Artic'uli seu Interno'dia Digt'o'rum Pedis*. I. *Phalanges of the fingers*, (F.) *Phalanges des doigts*. They are, in each hand, fourteen,—three to each finger, and two to the thumb; and are situate one above the other. They are distinguished, numerically, reckoning from the base towards the tip of the finger. 1. The first or metacarpal, *Procon'dyli*, (F.) *Premières phalanges* ou *Phalanges métacarpiennes*, 2. The second or middle phalanges, (F.) *Secondes phalanges* ou *Phalanges moyennes*, *Phalangines*, (Ch.) 3. The third phalanges, *Metacon'dyli*, *Phalan'ges un'guim*. (F.) *Troisièmes phalanges* ou *Phalanges unguéales* ou *unquifères* ou *unquinales*, *Phalangettes* (Ch.), which terminate each finger, and support the nail. II. *Phalanges of the toes*, (F.) *Phalanges des Orteils*. They are the same in number as those of the fingers, but much smaller, and of a very different shape.

The phalanges of a finger or toe are united with each other; and the first with the metacarpal or metatarsal bone. They are developed from two points of ossification; one for the superior extremity, and the other for the body and inferior extremity.

PHAL'ARIS CANARIEN'SIS. *P. ova'ta*, (*φαλαρος*—from *φαω*, 'I shine,'—'bright, shining,' in application to the seed,) *Cultivated Canary Grass*, (F.) *Alpiste*. Ord. Gramineæ. Sex. Syst. Triandria Digynia. The seed of this grass, *Canary seed*, (F.) *Graines d'aspic*, afford a nou-

rishing meal. The ancients recommended them for allaying pains in the kidney and bladder.

PHALARIS ZIZANOIDES, *Andropogon muricatus*.

PHALLAL'GIA, *Phalldyn'ia*, from *φαλλος*, 'the male organ,' and *αλγος*, 'pain.' Pain in the male organ.

PHALLANCYLOSIS, Chordee.

PHALLI'TIS, *Priapi'tis*, from *φαλλος*, 'the male organ,' and *itis*, a suffix denoting inflammation. Inflammation of the male organ.

PHALLOCAMPSIS, Chordee.

PHALLOCARCIN'OMA, from *φαλλος*, 'the male organ,' and *καρκινωμα*, 'cancer.' Carcinoma or cancer of the penis.

PHALLODYN'IA, Phallalgia.

PHALLON'CUS, from *φαλλος*, 'the male organ,' and *ογκος*, 'swelling.' Tumefaction of the male organ.

PHALLOPSOPH'IA, from *φαλλος*, 'the male organ,' and *ψοφος*, 'a noise.' Discharge of wind from the male urethra.

PHALLORRHAG'IA, from *φαλλος*, 'the male organ,' and *ρηγνυμι*, 'I break out.' Hemorrhage from the male urethra. Stomatosis.

PHALLORRHŒA, Gonorrhœa.

PHALLORRHOÏS'CHESIS, from *φαλλος*, 'the male organ,' *ρηγ*, 'discharge,' and *ισχειν*, 'to withhold.' Sudden arrest of a gonorrhœal discharge.

PHALLUS, Penis—p. Esculentus, Morehella esculenta.

PHANEROG'AMOUS, *Phanerogam'ic*, *Phanerogam'icus*, (F.) *Phanérogame*, from *φανeros*, (*φαω*, 'I shine,') 'evident,' and *γαμος*, 'marriage.' An epithet used by botanists for plants whose sexual organs are apparent. It is, consequently, the opposite to *cryptogamous*.

PHANTASIA, Delirium, Imagination.

PHANTASM, *Phantas'ma*, *Phanto'ma*, *Phas'ma*, from *φανταζω*, (*φαινω*, 'I bring to light,') 'I make appear.' A phantom, false appearance, apparition. Hallucination. Derangement of the sense of sight or of the intellectual faculties, causing objects to be perceived, which are not before the eyes.

PHANTASMA, Pseudoblepsia.

PHANTASMATICUS, Phantasticus.

PHANTASMATOSCOPIA, Metamorphopsia.

PHANTASMOSCOPIA, Metamorphopsia.

PHANTAS'TICUS, Inebriant. Creating phantasms—*phantasmat'icus*.

PHANTOM, Fantom—p. Tumour, see Fantom.

PHANTOMA, Phantasm—p. Obstetricium, Fantom.

PHARMACEIA, Poisoning

PHARMACEUM, Apothecary.

PHARMACEUTA, Apothecary.

PHARMACEUTIC, *Pharmaceut'icus*, *Pharmaceut'ical*, *Pharmaceut'ic'alis*, (F.) *Pharmaceut'ique*, from *φαρμακον*, 'a medicine.' An epithet for every thing belonging to pharmacy. Thus, we say, *Pharmaceutical preparations*, &c.

PHARMACEUTICE, Pharmacy.

PHARMACEUTIST, Apothecary.

PHARMACIEN, Apothecary.

PHARMACOCATAGRAPHOLOG'IA, *Catagrapholog'ia*, *Ars for'nulas concinuan'di*, from *φαρμακον*, 'a medicine,' *κατα*, 'beneath,' *γραφη*, 'a writing,' and *λογος*, 'a description.' The art of writing prescriptions.—J. J. Plenck.

PHARMACOCHEMIA, Chymistry, pharmaceutical.

PHARMACODYNAMICS, from *φαρμακον*, 'a medicine,' and *δυναμις*, 'power.' *Pharmacodynam'icē*, *Dynam'ical Materia Medica*, *Pharmacodynam'ica doct'rina*, *Pharmacodynam'icolog'ia*. A division of pharmacology, which considers the effects and uses of medicines.

PHARMACODYNAMIOLOGIA, Pharmacodynamics.

PHARMACOGNOS'IA, *Acognos'ia*, *Acognos'ia*, from *φαρμακον*, 'a medicine,' and *γνωσις*, 'knowledge.' A division of pharmacology, which treats of simples, or unprepared medicines.

PHARMACOLOGIA, *Materia medica*.

PHARMACOMANIA, from *φαρμακον*, 'a medicine,' and *μανια*, 'mania.' One who has a mania for prescribing or for taking medicine.

PHARMACON, Poison.

PHARMACOPŒ'IA, *Pharmacopœ'a*, *Codex medicamentarius*, (F.) *Pharmacopœe*, from *φαρμακον*, 'a medicine,' and *ποιω*, 'I make.' A work, containing a collection of formulæ for the preparation, &c., of medicines: generally published by authority. Formerly, a chemical laboratory, *Laboratorium chymicum seu pharmaceuticum*.

PHARMACOPŒUS, Apothecary, Druggist.

PHARMACOPOLA, Apothecary, Druggist.

PHARMACOPOLE, Apothecary, Druggist.

PHARMACOPOLI'UM, *Apotheca*, *Officina*, *Taberna Medica*. The shop of the druggist or apothecary, (F.) *Apothicairerie*, from *φαρμακον*, 'a medicine,' and *πωλεω*, 'I sell.'

PHARMACOPOS'IA, from *φαρμακον*, 'a medicine,' and *ποσις*, 'a potion.' A liquid medicine, especially one that is cathartic.

PHARMACO'SA MEDICAMENTA, from *φαρμακον*, 'a poison.' Medicines that contain poisonous substances. — Fallopius.

PHARMACOTHE'CA, *φαρμακοθηκη*, from *φαρμακον*, 'a medicine,' and *τηρημι*, 'I place.' A case for medicines. A medicine chest.

PHARMACOTHERAPI'A, from *φαρμακον*, and *θεραπεια*, 'treatment.' Cure of diseases by remedies.

PHARMACTER, Apothecary.

PHARMACUM, Medicament, Poison — p. *Ægyptiacum*, *Ægyptiacum* — p. *Amatorium*, *Philter*.

PHARMACUM AD AURES, *Ægyptium Medicamentum ad Aures*. A name given to a medicine, composed of bitter almonds, white pepper, saffron, myrrh, opium, frankincense, castor, verjuice, sulphate of iron, vinegar, pomegranate-bark, unguentum nardium, &c. It was believed to be useful for cleansing fetid ulcers in the ears.

PHARMACURGICUS, Apothecary.

PHARMACURGUS, Apothecary.

PHARMACY, *Pharmacia*, *Pharmaceuticæ*, *Pharmac'ia*, from *φαρμακον*, 'a medicine.' The art which teaches the knowledge, choice, preservation, preparation, and combination of medicines. It was formerly divided into *Galenical* and *Chymical*. The former, called after Galen, embraced the operations undertaken on medicines without chymistry; — the latter, *Chymical Pharmacy* or *Pharmaceutic Chymistry*, *Pharmacochym'ia*, comprised the preparation of medicines, founded on the chymical action of their principles.

PHARMAXIS, Pharmacy.

PHARNA'CEUM LINEA'RE, called after Pharnaces, King of Pontus. A South African plant, *Nat. Ord.* Paronychiaceæ, employed at the Cape in pulmonary affections. It is generally given in infusion.

PHARUS, Pharynx.

PHARYGATHRON, Pharynx.

PHARYGETHRUM, Pharynx.

PHARYNGÆ'UM (SAL.), from *pharynx*, *pharyngis*. A compound of cream of tartar, nitrate of potassa, burnt alum, and distilled vinegar. It was formerly employed, united with honey and plantain-water, to make gargles, which were advised in quinsy.

PHARYNGÉ, Pharyngeal.

PHARYNGE'AL, *Pharyngæ'us*, (F.) *Pharyngé*,

Pharyngien. Same etymon. That which relates to the pharynx. A name given to the muscles, vessels, and nerves of the pharynx.

PHARYNGEAL ARTERIES. These are two in number. The one—*superior* or *pterygo-palatine*, *Ramus Pharyngæ'us superior* of Haller — arises from the internal maxillary at the base of the zygomatic fossa, passes through the pterygo-palatine canal, and proceeds to be distributed to the pharynx and the corresponding part of the Eustachian tube. The other — the *inferior* — *Pharyngæ'a ascendens* of Haller — arises from the external carotid, on a level with the facial. It ascends along the lateral and posterior part of the pharynx, and divides into two branches; the one — the *pharyngeal*, properly so called — is distributed to the pharynx; the other — the *meningeal* — gives its branches particularly to the dura mater.

PHARYNGEAL NERVE. A branch sent by the pneumogastric to the pharynx. It descends behind the internal carotid; communicates with the glosso-pharyngeal; and divides, opposite the middle constrictor of the pharynx, into a great number of filaments, which anastomose, in a multitude of different directions, with filaments of the glosso-pharyngeal nerve, of the superior laryngeal branch, and of the first cervical ganglion. These different nervous filaments united constitute the *pharyngeal plexus*, the irregular meshes of which send numerous ramifications to the pharynx.

PHARYNGEAL VOICE, see Voice.

PHARYNGEMPHRAX'IS, from *φαρυγξ*, *φαρυγγος*, 'the pharynx,' and *εμφραξις*, 'obstruction.' Obstruction of the pharynx.

PHARYNGETHRON, Pharynx.

PHARYNGEURYSMA, Pharyngocœle.

PHARYNGICUS, Pharyngeal.

PHARYNGIEN, Pharyngeal.

PHARYNGITE, Cynanche pharyngea — p.

Tonsillaire, Cynanche tonsillar.

PHARYNGITIS, Cynanche pharyngea.

PHARYNGITIS APOSTEMATOSA. Abscess of the pharynx.

PHARYNGITIS, DIPHTHERIT'IC, *Angina pseudo-membranacea seu membranacea seu pellicularis seu plastica seu diphtheritica seu maligna seu pseudo-membranosa seu pestilentialis*, *Pharyngocœ'acè*, *Pseudo-membranosa Inflammation of the Throat*, (F.) *Angine couenneuse ou gutturale couenneuse ou pseudo-membraneuse ou plastique ou diphthérique*. From *pharynx*, and *itis*, denoting inflammation. Diphtheritic inflammation of the pharynx. See Cynanche maligna.

PHARYNGITIS, FOLLICULAR, *Follicular Inflammation of the Pharynx*, *Angina follicularis of the Pharynx*, *Aene of the Throat*. Inflammation and enlargement of the follicles of the pharynx, occasionally extending to the larynx. Sometimes termed *Clergyman's Sorethroat*, *Tubercles of the Larynx and Fauces*, and *Tubercular Sorethroat*.

PHARYNGITIS, GANGRENOUS, Cynanche maligna.

PHARYNGOCACE, Pharyngitis, diphtheritic.

PHARYNGOCE'LE, *Pharyngœury'sma*, *Diverticulum* seu *Hernia* seu *Prolapsus* (*Æsoph'agi* seu *pharyng'is*, *Æsoph'agus succenturiatus*, from *φαρυγξ*, *φαρυγγος*, 'the pharynx,' and *κληη*, 'a tumour.' An enlargement at the upper part of the gullet, in which the food sometimes rests in considerable quantity.

PHARYNGODYN'IA, from *φαρυγξ*, *φαρυγγος*, 'the pharynx,' and *δωνη*, 'pain.' Pain in the pharynx.

PHARYNGOGLOSSAL, *Glossopharyngeal*, *Pharyngoglossia'nus*. That which belongs to the pharynx and tongue.

PHARYNGOGLOSSAL NERVE, *Glossopharyngeal*

Nerve, Lingualis lateralis, (F.) Nerf Glossopharyngien, Pharyngoglossien—a portion of the eighth pair—arises from the superior and lateral parts of the spinal marrow, between the facial and pneumogastric nerves, by several filaments, which soon unite into a single cord, that passes out of the cranium by the foramen lacernum anterius; goes downwards and forwards, and gains the posterior and inferior part of the tongue. Immediately after its exit from the cranium, it gives a branch to the meatus auditorius externus, and receives a filament from the facial, and another from the pneumogastric nerve. It then furnishes two other filaments, which descend upon the carotid artery, and unite at the bottom of the neck with branches from the cervical ganglions and cardiac nerves, and give two filaments to the stylo-pharyngeus muscle. The glossopharyngeus, after sending a twig or two to the tonsil, to the upper part of the pharynx and membrane of the epiglottis, divides into many branches which run partly to the margin, and partly to the middle of the root of the tongue; supplying, especially, the papillæ majores, and the parts in their neighbourhood.

By some, this nerve is regarded as the controller of the associated motions of the tongue and pharynx. By others, it is esteemed to be the special nerve of gustation.

PHARYNGOG'RAPHY, Pharyngogra'phia, from φάρυξ, φάρυγος, 'the pharynx,' and γραφή, 'a description.' An anatomical description of the pharynx.

PHARYNGOL'OGY, Pharyngolog'ia, from φάρυξ, φάρυγος, 'the pharynx,' and λογος, 'a discourse.' The part of anatomy which treats of the pharynx.

PHARYNGOLYSIS, Pharyngoplegia.

PHARYNGOPARALYSIS, Pharyngoplegia.

PHARYNGOPLE'GIA, from φάρυξ, φάρυγος, 'the pharynx,' and πλησσω, 'I strike.' *Dysphagia paralytica* seu tor'pida seu aton'ica, *Angi'na paralytica, Astheni'a Deglutitio'nis, Pharyngol'ysis, Pharyngoparal'ysis, Paral'ysis Œsoph'agi, Gutæ Imbeci'litas.* Paralysis of the pharynx or œsophagus: commonly a symptom of general paralysis, or of approaching dissolution.

PHARYNGORRHAG'IA; from φάρυξ, φάρυγος, 'the pharynx,' and ραγή, 'rupture.' Hæmorrhage from the vessels of the pharynx.

PHARYNGOSPAS'MUS, from φάρυξ, φάρυγος, 'the pharynx,' and σπασμος, 'spasus.' Spasm or cramp of the pharynx.

PHARYNGOSTAPHYLINUS, Palato-pharyngeus.

PHARYNGOTOME, Pharyngot'omis, from φάρυξ, φάρυγος, 'the pharynx,' and τεμνω, 'I cut.' An instrument, invented by J. L. Petit, used to scarily inflamed tonsils, and to open abscesses, which form in the parietes of the pharynx. It is composed of a long, narrow blade with a lancet point, enclosed in a sheath or canula of silver slightly curved. This instrument is carried to the part to be cut, and the point of the blade is made to pass out of the sheath, by pressing on a button at the end of the pharyngotome. A spring causes the blade to re-enter as soon as the pressure is removed.

PHARYNGOT'OMY, Pharyngotom'ia; same etymology. Some authors have used this word synonymously with œsophagotomy. It means, also, scarification of the tonsils, or an incision made for opening abscesses there, &c.

PHARYNX, φάρυξ, Pharynx, φάρυξ, Pharus, Gula, Læmos, Fauces, Pharyg'ethron, Pharyng'ethron. Pharyng'ethros, Pharyg'ethron, Isthmos, Isth'mion, Ingu'vies, Princip'ium Gutæ, Os posterum, Gorges, (F.) Arrière-bouche, Goster, Gorge. A species of musculo-membranous, symmetrical

canal, on the median line, irregularly funnel-shaped, and situate between the base of the cranium and the œsophagus, in front of the vertebral column. It is very narrow above; but dilates in the middle, and again contracts below, at its junction with the œsophagus. Into the anterior paries of the pharynx open, successively, from above to below,—the posterior orifices of the nasal fossæ; the Eustachian tubes; the posterior aperture of the mouth, and the top of the larynx. The pharynx is formed, externally, of a muscular coat, and, internally, of a mucous membrane, which is continuous, above, with the Schneiderian membrane; and in the middle, with that of the mouth; below, with that of the œsophagus; and, at the sides, with that of the Eustachian tubes. This membrane has no villi, and presents only a few inequalities, which are owing to the presence of muciparous follicles. The muscular coat of the pharynx is composed of the constrictor muscles, stylopharyngei, and pharyngostaphylini. The vessels and nerves are called *pharyngeal*. The pharynx serves as a common origin for the digestive and respiratory passages. It gives passage to the air, during respiration; and to the food at the time of deglutition.

PHARYNX, FOLLICULAR INFLAMMATION OF THE, Pharyngitis, follicular.

PHARYX, Pharynx.

PHASELUS, Phaseolus

PHASE'OLUS, φασήλος, φασήλος, φασήλος, P. Vulgar'is, Phasi'olus, Phase'lus, Fase'lus, Fase'olus, Bona, Boona, Faba; Kidney Bean; French Bean; (F.) Fasoële, Haricot. Ord. Leguminosæ. Ser. Syst. Diadelphia Decandria. When young and well boiled, this is easy of digestion, and delicately flavoured. It is less flatulent than the pea.

PHASEOLUS CRETICUS, Cajan, Cayan. A decoction of the leaves, according to Ray, restrains the hemorrhoidal flux when excessive.

PHASEOLUS VULGARIS, Phaseolus.

PHASIA'NUS GALLUS, so called from the river, *Phasis,* in Colchis, near the Black Sea: (F.) *Cocq.* The parts of generation of the cock, dried and pulverized, were formerly regarded as proper for increasing the quantity of semen. The fat was used as emollient and resolvent; the brain, in diarrhœa; the gall, in freckles and diseases of the eyes. These phantasies are now abandoned.

PHASIOLUS, Phaseolus.

PHASMA, Phantasm.

PHATNE, Alveolus.

PHATNION, Alveolus.

PHATNORRHAG'IA, Stomatorrhag'ia alveolarum, from φάτιον, 'an alveolus,' and ρηγγιμι, 'I break forth.' Hemorrhage from the alveoli.

PHAUSIN'GES, φανσιγγες, plural of φανσιγξ, from φανίζω, 'I roast.' Spots or blisters on the legs, produced by heat; and, in a more extensive signification, by any other cause. Also, a pustule. — *Foësius.*

PELLANDRE, Phellandrium aquaticum.

PELLANDRIUM AQUAT'ICUM, Phellandrium, Enan'thè phellandrium seu aquat'ica, Ligusticium phellandrium, Fœnic'ulum aquat'icum, Cicuta'ria aquatica, Water Fennel, Fine-leaved Water Hemlock, (F.) Phellandre, Fenouil d'eau, Ciguë d'eau, Millefeuille aquatique. Ord. Umbelliferae. Ser. Syst. Pentandria Digynia. This plant is stimulant and narcotic. It has been used in intermittents and dyspepsia. It has, also, been given in phthisis pulmonalis, and in cases of scrofulous atonic ulcers.

PIENE, Benzole.

PHENIG'MUS, Phœnig'mus, Phœnig'mus, from φανιξ, 'red.' *Red Jaundice.* A cutaneous affection, consisting of redness diffused over the skin, without fever. Sauvages makes it a genus of his

order *Icteritiæ*. Also, the act of irritating a part by a stimulating application.

PHÉNOMÈNE, Phenomenon.

PHENOM'ENON, *Phænomenon*, (F.) *Phénomène*, from φαίνομαι, 'I appear.' An extraordinary and unexpected event. In *Medicine*, it means any change, appreciable by our senses, which supervenes in an organ or function:—as the *phenomena*, of the circulation, respiration, &c. It is used in pathology, synonymously with symptom.

PHENTYLE, HYDRURET OF, Benzole.

PHEUGOPHOBIA, Hydrophobia.

PHEUGYDRON, Hydrophobia.

PHI'ALA, *A Phial or Vial*. (F.) *Fiole*, φιάλη, φιάλη, 'a vessel with a broad bottom.' A small bottle, in which apothecaries are in the habit of sending out their mixtures, draughts, &c.: hence called *Medicine Vials*, (F.) *Fioles à Médecine*. They are usually sold in grosses, and assorted into vials of oz. 8; oz. 4; oz. 3; oz. 2; oz. 1½; oz. 1; and oz. ½.

PHILADYNAMICA, Debilitants.

PHILANTHROPUS, Galium aparine.

PHILETRON, Philter.

PHILETRUM, Lacuna labii superioris.

PHILIA'TER, *Philiatros*, φιλιατρος, from φιλω, 'I love,' and ιατρινη, 'medicine.' An amateur of medicine. One who studies medicine; *Studio'sus medicinæ*.

PHILOBIO'SIS, (F.) *Philobiosie*: from φιλω, 'I love,' and βίος, 'life.' The love of life.

PHILE'NIA, from φιλω, 'I love,' and οινος, 'wine.' Love of wine. Addiction to wine.

PHILOGYNIA, Muliebrositas.

PHILONIUM LONDINENSE, Confectio opii.

PHILOPATRIDALGIA, Nostalgia.

PHILOPATRIDOMANIA, Nostalgia.

PHILOSOPHER'S STONE, see Alchemy.

PHILOSOPHIA CORPORIS VIVI, Physiology — p. Hermetica, Alchemy — p. per Ignem, Chymistry.

PHILTER, from φιλω, 'I love.' *Philtrum*, *Philtretion*, *Philtretion*, *Pharmaceutum* seu *Poculum amatorium*, *Amatorium veneficum*, (F.) *Philtre*. A medicine or drink considered capable of causing love.

PHILTRUM, Lacuna labii superioris.

PHILYRA, Tilia.

PHIMA, Phyma.

PHIMOS, Capistrum.

PHIMO'SICUS, Relating to Phimosus.

Sauvages calls *Ischuria phimosica* seu *urethralis à phimosi*, the retention of urine which depends upon phimosus.

PHIMO'SIS, *Phymo'sis*, *Capistra'tio*, *Epago'gium*, *Ligatu'ra glandis*, *Strictu'ra præputii*, *Reductio præputii impedita*, from φίμωω, 'I bind tight.' A disease which consists in a preternatural narrowness of the opening of the prepuce, so that it cannot be carried behind the corona glandis. This affection is most commonly congenital. Sometimes it is accidental, and dependent upon tumefaction of the glans, or of the prepuce, as occurs in syphilis. To remedy this state, the prepuce may be divided by means of a bistoury and director; or circumcision may be practised.

PHIMOSIS ADNATA seu **CONGENITA** seu **PUERILIS**, Congenital phimosus — p. Circumligata, Paraphimosus — p. Congenita, P. adnata.

PHIMO'SIS ŒDEMATO'DES, *Hydrophimo'sis*. Phimosus with œdematous swelling of the prepuce.

PHIMOSIS PUERILIS, Ph. adnata.

PHLASMA, Contusion.

PHELBARTERIODIALYSIS, see Aneurism.

PHELBECTA'SIA, *Phlebec'tasis*, from φλεψ, φλεβος, 'a vein,' and εκτασις, 'dilatation.' Dila-

tion of a vein, or of a portion of a vein. — Alibert.

PHELBECTIARCTIE. A mongrel term, from φλεψ, φλεβος, 'a vein,' and *arcto*, 'I contract.' Contraction of a vein.

PHLEBES, (Arteries.) See Artery.

PHLEBEURYSMA, Varix.

PHLEB'ION, diminutive of φλεψ, φλεβος, 'a vein.' A vein. — Hippocrates. A small vein, — *Ve'nula*.

PHLEBIS'MUS, from φλεψ, φλεβος, 'a vein.' A term employed by Dr. Marshall Hall for the turbulence of veins, produced by impeded return of the blood. See Trachelismus.

PHLEBI'TIS, *Inflammat'io venarum*, (F.) *Phlebite*, *Inflammat'io des veines*, from φλεψ, φλεβος, 'a vein,' and *itis*, the termination for inflammation. Inflammation of the inner membrane of a vein, *Endo-phlebitis*, which sometimes follows blood-letting, and extends from the small wound made in that operation to the neighbouring parts of the venous system. The symptoms are, first, inflammation in the punctured part; and, afterwards, a knotty, tense, painful cord, following the direction of the vessel, and accompanied with more or less fever, according to the extent of the inflammation, the nervous symptoms, &c. Phlebitis, also, sometimes supervenes on the ligation or excision of varices; after amputation, gun-shot wounds, delivery (*Uterine Phlebitis*, *Locho-metro-phlebitis*, *Metro-phlebitis puerperalis*, *Phlebitis uterina*, *Metri'tis venosa*), the ligature of the umbilical cord, &c. It may terminate by resolution, suppuration, ulceration, or gangrene.

PHLEBITIS, CRURAL, Phlegmatia dolens — p. Uterina, see Peritonitis, and Phlebitis.

PHLEBOG'RAPHY, *Phlebogra'phia*, from φλεψ, φλεβος, 'a vein,' and γραφη, 'a description.' A description of the veins.

PHLEB'OLITE, *Phlebolithus*, *Vein stone*, from φλεψ, φλεβος, 'a vein,' and λιθος, 'a stone.' A loose concretion, varying in size from that of a currant to that of a pea, occasionally found in the veins. It would seem to be formed in the blood.

PHLEBOLITHUS, Phlebolite.

PHLEBOL'OGY, *Phlebo'log'ia*, from φλεψ, φλεβος, 'a vein,' and λογος, 'a discourse.' The part of anatomy which treats of the veins.

PHLEBOPA'LIA, from φλεψ, φλεβος, 'a vein,' and παλλω, 'I palpitate.' With the ancients, *pulsation*, which they conceived to be produced by the veins. See Pulsus venarum.

PHLEBOPHTHALMOTOM'IA, *Ophthalmophlebotom'ia*, from φλεψ, φλεβος, 'a vein,' οφθαλμος, 'the eye,' and τεμνω, 'I cut.' Blood-letting in the eye.

PHLEBOPLEROSIS ECPHRACTICA, Inflammation.

PHLEBORRHAG'IA, from φλεψ, φλεβος, 'a vein,' and ρηγνυμι, 'I break out.' Rupture of the veins; and, in a more extensive sense, venous hemorrhage.

PHLEBORRHEX'IS, from φλεψ, φλεβος, 'a vein,' and ρηξις, 'rupture.' Rupture of a vein. Also, hemorrhage from a vein, *Phleborrhag'ia*.

PHLEBOSTENO'SIS, from φλεψ, φλεβος, 'a vein,' and στενωσις, 'contraction.' Constriction or contraction of a vein.

PHLEBO'OMIST, from φλεψ, φλεβος, 'a vein,' and τεμνω, 'I cut.' A bleeder. One who practises particularly the art of phlebotomy. See Blood-letting.

PHLEBOTOMUM, Fleam.

PHLEBOTOMY, see Blood-letting.

PHLEBS, Vein.

PHLEDONIA, Delirium.

PHLEGM, *Phlegma*, φλεγμα, *Pituita*, *Pit'uite*,

Mucus, Mother, (F.) Phlegme, Pituite. One of the four natural humours of the ancients, which, according to them, was cold and moist, as atrabilis was cold and dry. It predominated, especially, in winter.

Pituita was afterwards applied to every aqueous or excrementitious humour, such as the saliva, nasal and intestinal mucus, serum, &c. The terms *phlegm* and *pituita* are no longer used in physiology,—the different humours having received particular names; but the vulgar still use *phlegm* to designate a stringy mucus, expectorated, or rejected by vomiting. The ancient chymists gave the name 'phlegm' to aqueous, insipid, and inodorous products obtained by subjecting moist vegetable matters to the action of heat.

PHLEGMA NARIUM CRASSUM, Nasal mucus—p. Vitrioli, Sulphuric acid (very dilute.)

PHLEG'MAGOGUE, *Phlegmagogus*; from φλεγμα, 'phlegm,' and αγω, 'I expel.' A medicine, formerly believed capable of "cutting" or removing phlegm.

PHLEGMOPYRA, Fever, adeno-meningeal.

PHLEGMASIA, Inflammation, Phlegmon—p. Adenosa, Adenitis—p. Alba dolens puerperarum, Ph. dolens—p. Cellularis, Induration of the cellular tissue—p. Glandulosa, Adenitis—p. Myoica, Myositis—p. of the Peritoneum, Peritonitis.

PHLEGMAT'IA, from φλεγμα, φλεγματος, 'phlegm.' Edema, Anasarca, Hydrops.

PHLEGMAT'IA DOLENS, *P. lac'tea seu dolens seu alba dolens seu Leucophlegmasia dolens seu Spargano'sis seu Scelal'gia seu Edema puerperarum, Scelont'cus, Anasar'ca serosa, Ecphy'mu œdemat'icum, Ecchymo'ma lymphat'icum, Is'chias a spargano'si, Edema lacteum, Infarc'tus lac'tei extremitatum, Metast'asis lactis, Hyster'al'gia galact'ica, Hydrophlegma'sia tertius cellulosi, Cru'al Phleb'i'tis. White leg, Swelled leg, Milk leg, White swelling of lying in women, (F.) Edème des nouvelles accouchées, Edème douloureux des femmes en couche, Dépot laiteux sur la cuisse, Edème actif des nouvelles accouchées, Enflure ou Engorgement des jambes et des cuisses de la femme accouchée, E. laiteux des membres abdominaux.* It occurs, for the most part, in the second or third week after delivery:—is limited to the lower extremity, and chiefly to one side: exhibiting to the touch a feeling of numerous irregular prominences under the skin. It is hot, white, and unyielding; and is accompanied, sooner or later, with febrile excitement. After a few days, the heat, hardness, and sensibility diminish, and the limb remains œdematous for a longer or shorter period. The disease frequently, if not generally, consists in the obstruction of the iliac or other veins. Owing to the pressure of the gravid uterus—the flow of blood being obstructed—the serous part of it is thrown out into the cellular membrane of the limb. Sometimes the vein is found completely obliterated.

The treatment consists in the use of antiphlogistics:—the application of leeches or cupping-glasses near the groin, fomentations to the limb, &c.; and, when the active state has subsided, the use of a roller, applied gently at first, but, afterwards, gradually tightened.

PHLEGMATIA LACTEA, *P. dolens.*

PHLEGMATIAE, see *Empresma*—p. Membranosa et parenchymatosa, *Empresma.*

PHLEGMAT'IC, *Phlegmat'icus*, from φλεγμα, 'phlegm.' Abounding in phlegm,—as the 'phlegmatic or lymphatic temperament.'

PHLEGMATOCHEMY, see *Chemistry.*

PHLEGMATOPYRA, Fever, adeno-meningeal.

PHLEGMATORRHAG'IA, *Phlegmatorrhœ'a, Cutarrh*, from φλεγμα, φλεγματος, 'phlegm,' and

ρευ, 'I flow.' Stahl and his partisans gave this name to a copious secretion, by the nostrils, of a limpid and thin mucus, without inflammation. It is the *Coryza Phlegmatorrhag'ia* of Sauvages. See *Coryza*.

PHLEGMHYMENITIS, *Phlegmymenitis.*

PHLEGMON, from φλεγω, 'I burn.' *Phlogos'is phleg'monê, Phleg'monê, Phlegma'sia, Incen'dium, Inflammatio*, (Prov.) *Beal.* Inflammation of the areolar texture accompanied with redness, circumscribed swelling, increased heat and pain; which is, at first, tensive and lancinating; afterwards, pulsatory and heavy. It is apt to terminate in suppuration. It requires the antiphlogistic treatment, until suppuration seems inevitable, when the suppuration must be encouraged as the next favourable termination to resolution.

PHLEGMONE PÉRINÉPHRÉTIQUE, *Periphrenitis*—p. Peri-uterine, see *Peri-uterine.*

PHLEGMONE, Inflammation—p. Mammæ, Mastodynia apostematosa—p. Mastodynia, Mastodynia apostematosa—p. Parotidæa, Parotis—p. Peritonei, Peritonitis—p. Parulis, Parulis—p. Muscularum, Myositis—p. Ventriculi, Gastritis.

PHLEGMONEUX, *Phlegmonous.*

PHLEGMONODES, *Phlegmonous.*

PHLEGMONOID, *Phlegmonous.*

PHLEG'MONOUS, *Phlegmono'des, Phleg'monoid*, (F.) *Phlegmonoux*, from φλεγμων, (φλεγω, 'I burn.') 'a phlegmon,' and ειδος, 'resemblance.' That which relates or belongs to or resembles phlegm.

PHLEGMONOUS INFLAMMATION is the active inflammation of the areolar membrane; in contradistinction to erysipelatos inflammation, or that of the skin.

PHLEGMOPYRA, Fever, adeno-meningeal.

PHLEGMORRHAGIA, *Blennorrhœa.*

PHLEGMORRHAGIE PULMONAIRE, *Bronchorrhœa.*

PHLEGMORRHŒA, *Blennorrhœa.*

PHLEGMYMENT'IS, *Phlegmymenit'is*, from φλεγμα, 'phlegm,' 'μυνη, 'a membrane,' and 'itis, the termination for inflammation. Inflammation of a mucous membrane.

PHLEGMYMENTIS ENTERICA, see *Enteritis.*

PHLEPS, *Vein.*

PHLOGIA, *Inflammation.*

PHLOGICUS, *Inflammatory.*

PHLOGISTIC, *Inflammatory.*

PHLOGISTICI, *Empresma.*

PHLOGISTON, *Hydrogen.*

PHLOGMUS, *Verbascum thapsus.*

PHLOGO'DES, from φλοξ, φλογος, (φλεγω, 'I burn,') 'flame,' and ειδος, 'resemblance.' *Inflamed, Inflammatus, Inflammatorius*, *Inflammatory.* An epithet employed particularly to express the red colour of the face.

PHLOGOGUS, *Antiphlogistic.*

PHLOGOPYRUS, *Synœcha.*

PHLOGOSED, *Inflamed.*

PHLOGO'SIS, *Incen'dium, Inflammation*, from φλοξ, φλογος, 'flame.' Some writers use this word exclusively for external inflammation—phlegmon; others, for that which is superficial or erysipelatos.

PHLOGOTICA, *Inflammations.* The second order in the class *Hæmatica* of Good.

PHLOIOS, *Cortex.*

PHLOMUS, *Verbascum thapsus.*

PHLOOS, *Cortex.*

PHLORIDZINE, *Phloridzi'na, Phloridzin*, from φλοος, 'inner bark,' and ριζα, 'root.' The bitter or active principle of the root and trunk of the apple, pear, cherry, and plum tree. It is deposited from the decoction on cooling; crystallizes in silky spicula of a dead white colour when in masses, or in long slender prisms or tables,

when crystallized with care. 1000 parts of water, at a temperature of from 32° to 71°, only dissolve about one part; but at from 70° to 212°, it is dissolved in all proportions. It is very soluble in pure alcohol, but only slightly so in ether; s. g. 1.429. It has been administered successfully in intermittents,—10 to 20 grains being generally required to arrest the paroxysm. It may be given either in the form of pill or powder.

PHLOUS, Cortex.

PHLOX, *Verbascum thapsus*.

PHLYCTÆNA, *Phlyctæ'nis*, *Phlyctis*, *Phlyctæ'cion*, *Ampullæ*, *Holophlyctides*, *Phlyctides*, *Phlysis*, from φλυζω, 'I boil.' Tumours formed by the accumulation of a serous fluid under the epidermis.

PHLYCTÆNULA, see Hydatid.

PHLYCTENOID, *Phlyctenoides*, from *phlyctæna*, and εἶδος, 'resemblance.' Resembling phlyctæna. An epithet for a variety of herpes.

PHLYCTEN'ULAR, same etymon as Phlyctæna. Of or belonging to phlyctæna, — as *phlyctenular ophthalmia*; inflammation of the eye, accompanied with phlyctæna on the cornea.

PHLYCTIDES, Phlyctæna.

PHLYCTID'TUM, same etymon. A circular or annular spot of inflammation of the corium, encircled by a red ring or zone, within which suppuration takes place. The genuine small-pox pustule, and that produced by the application of tartar emetic ointment, are examples of it.

PHLYCTIS, Phlyctæna.

PHLYSIS, φλυσις, same etymon. A cutaneous eruption. An ulcerative, subcutaneous tumour: flat, tensile, glabrous: diffused, hot, throbbing; at length fluctuating, with an acrid ichor.—Good.

PHLYSIS, Phlyctæna — p. Ecthyma, Ecthyma — p. Impetigo, Impetigo — p. Porrigo, Porrigo — p. Scabies, Psora.

PHLYZACIA, Ecthyma.

PHLYZACION, Phlyctæna.

PHOBODIPSON, Hydrophobia.

PHOCOM'ELUS, from φωκη, 'a seal,' and μελος, 'a limb.' A monster, in which the limbs are shortened; the hands and feet appearing to exist alone, and to be inserted immediately on the trunk, as in the seals and the herbivorous cetacea. — I. G. St. Hilaire.

PHŒNICINE, Hæmatin.

PHŒNICISMUS, Rubeola.

PHŒNIGMUS, Phenigmus — p. Petechialis, Purpura simplex.

PHŒNIX DACTYLIFERA, Date tree — p. Excelsa, Date tree.

PHŒNODINE, Hæmatin.

PHONA'TION, *Phona'tio*, from φωνη, 'voice.' The physiology of the voice.

PHONE, Voice.

PHON'ICA, φωνικα, from φωνη, 'voice.' The first order of the class *Pneumatica*, in Good's Nosology. Defined: diseases affecting the vocal avenues:—the passage of the voice impeded, or its power suppressed or depraved.

PHONON'OSI, *Phononi'si*, from φωνη, 'the voice,' and νοσος, 'a disease.' *Phonopathi'æ*, *Morbi vocis*. Diseases of the voice.

PHONOPATHIÆ, Phononosi.

PHORA, Gestation.

PHORBE, Pabulum.

PHORONOM'IA, from φερω, 'I move,' and νομος, 'law.' The doctrine of muscular motion.

PHOROUS, from φερω, 'I carry.' A suffix denoting conveyance. Hence, *Galactophorous*, &c.

PHOS, Light.

PHOSPHAS, *Phosphate*. A salt formed by the union of phosphoric acid with a salifiable base.

PHOSPHAS CALCICUM STIBIATUM, Antimonial powder — p. Calcis stibiatus, Antimonial powder — p. Natricum, Soda, phosphate of.

PHOSPHATE, Phosphas.

PHOSPHAT'IC, *Phosphat'icus*, from *Phosphorus*. Relating to the phosphates; hence the *Phosphat'ic Diath'esis* is the habit of body which favours the deposition of the phosphates from the urine.

PHOSPHÈNE, see Photopsia.

PHOSPHORE, Phosphorus.

PHOSPHORÉNÈSES. M. Baumes unites, under this generic name, diseases which he attributes to disordered phosphorization; i. e. to excess or deficiency of calcareous phosphates or its decomposition. Amongst these affections he ranks rachitis, osteo-malacia, and gout.

PHOSPHORES'CENTE, *Phosphorescentia*, *Luminosity*; from *phosphorus*. The properties possessed by certain bodies of being luminous in obscurity, or under particular circumstances. This phosphorescence has been occasionally witnessed in man, when suffering from some wasting disease, and near death.

PHOSPHORIC ACID, *Ac'idum phosphor'icum*, (F.) *Acide phosphorique*. Same etymon. A solid, colourless compound; highly sapid; very soluble in water, and vitrifiable by fire. It exists in bones combined with lime. It has been employed in medicine in the form of lemonade, in passive hemorrhage, typhus, phthisis, marasmus, &c., and in injection in cases of cancer of the uterus. It does not seem preferable to other acids. An *Acid'um phosphor'icum dilutum* is official in the London pharmacopœia.

PHOSPHORNECROSIS, see Phosphorus.

PHOSPHORURIA, Urine, phosphorescent.

PHOSPHORUS, *Phosphorum*, *Autophosphorus*, *Ignis philosophicus*, *Lumen constans*, from φως, 'light,' and φερω, 'I carry.' (F.) *Phosphore*. 'A light carrier.' An elementary or undecomposed substance; not metallic; solid; transparent or semitransparent; colourless; brilliant; flexible; of a sensible garlic odour; very inflammable, and susceptible of combining with the oxygen of the atmosphere, at even the ordinary temperature. It does not exist pure in nature, but is found frequently united to other bodies. Its fumes in the manufacture of lucifer and Congreve matches have caused, it is said, necrosis of the lower jaw — *Phosphornecro'sis*, *phosphorus jaw disease*, *Lucifer-match-makers' Disease*.

Phosphorus has been used in medicine, dissolved in ether or suspended in the yolk of egg, as a stimulant; but the greatest precautions are necessary in its administration: hence it is rarely employed.

PHOSPHORUS JAW DISEASE, see Phosphorus.

PHOSPHURIA, Urine, phosphorescent. See Urine.

PHOTOCAMPSIS, Refraction.

PHOTOMA'NIA, from φως, φωτος, 'light,' and mania. Insane delirium induced by light.

PHOTOPHOB'IA, from φως, φωτος, 'light,' and φοβος, 'fear.' Aversion to light:—intolerance of light. Nyctalopia.

PHOTOPHOBICUS, Lucifugus.

PHOTOPHOBOPHTHALMIA, Nyctalopia.

PHOTOPHOBUS, Lucifugus.

PHOTOP'SIA, *Visus lu'cidus*, from φως, φωτος, 'light,' and ωψ, 'the eye.' A false perception of light, as of sparks, flashes of fire, &c., occasioned by certain conditions of the retina and brain, and by pressure on the eyeball. When pressure does not induce the luminous appearance, (F.) *Phosphène*, the existence of amaurosis may be inferred. See Metamorphopsia.

PHOTURIA, from *φως, φωτος*, 'light,' and *ουρον*, 'urine.' A luminous condition of the urine.

PHRAGMOS, *φραγμος*, 'a fence,' from *φρασσω*, 'I enclose.' A row of teeth.

PHRASIS, Voice, articulated.

PHRASUM, Marrubium.

PHREN, *φρην*, 'the mind.' Also, the diaphragm and serobiculus cordis.

PHRENAUX'Ē, *Hypertroph'ia cer'ebri*, from *φρην*, 'the mind, the organ of mind,' and *αυξη*, 'increase.' Hypertrophy of the brain.

PHRENATROPH'IA, *Atroph'ia cer'ebri*, from *φρην*, 'the mind, the organ of mind,' *a*, priv., and *τροφη*, 'nourishment.' Wasting or atrophy of the brain.

PHRENES, Diaphragm.

PHRENESIA, Phrenitis.

PHRĒNĒSIE, Phrenitis.

PHRENESIS, Delirium, Phrenitis.

PHRENETIASIS, Delirium, Phrenitis.

PHRENETISMUS, Phrenitis.

PHRENIC, Diaphragmatic.

PHRENICA, from *φρην*, 'the mind.' Diseases affecting the intellect; characterized by error, perversion, or debility of one or more of the mental faculties, (*Phrenopath'ia*.) The first order of the class *Neurotica* of Good. Also, remedies that affect the mental faculties — *Phren'ics*.—Percira.

PHRENICS, see Phrenica.

PHRENICULA HYDROCEPHALICA, Hydrocephalus internus.

PHRENISMUS, Phrenitis.

PHRENITIS, *Phren'esis*, *Phren'esia*, *Phreneti'asis*, *Phrenis'mus*, *Phrenetis'mus*, *Cephalit'is*, *Encephalit'is*, *Cerebrit'is*, *Cephalalg'ia inflammato'ria*, *Karabitus* (Arab.), *Sibave*, *Sphacelis'mus cer'ebri*, *Empres'ma cephalit'is*, *Siri'asis*, *Seiri'asis*, *Siderat'io*, *Inflammat'io seu Cauxma phrenit'is*, *Phrensy*, *Delirium*, *Brain Fever*, (F.) *Phréné-sie*, *Cérébrite*, *Inflammation du cerveau et du cervelet*, from *φρην*, 'the mind,' and *itis*, denoting inflammation. A disease characterized by violent pyrexia, pain in the head, redness of the face and eyes, intolerance of light and sound, watchfulness, and delirium, either furious or muttering. Its causes are the same as those of other inflammations: sometimes, however, it is induced by a *Coup de soleil*; by inebriation; violent mental emotions, &c. Some authors have given the name *Phrenitis* and *Meningitis* to inflammation of the membranes of the brain; and that of *Cephalitis*, *Encephalitis*, or *Cerebritis* to inflammation of the substance of the brain; but there are no pathognomic symptoms, which can lead us to refer the seat of the disease to either of those parts exclusively. Phrenitis is, of course, a very dangerous affection, from the importance of the organ concerned. The most active treatment must necessarily be pursued. Repeated bleeding; purging; the application of ice to the shaved head; a position in which the head is raised; and the avoiding of irritation of every kind;—form the remedial means during the violent stage. After this has yielded, counter-irritants to the nape of the neck or to other parts of the body will be useful adjuvants. When the brain and meninges were affected only symptomatically, as in inflammation of the diaphragm, the disease was formerly called *Paraphrenitis*.

Hydrocephalus acutus is a variety of phrenitis.

PHRENITIS CALENTURA, *Coup-de-soleil*—p. Latrans, Hydrophobia—p. Potatorum, Delirium tremens—p. Verminosa, Vercoquin.

PHRENO-GLOTISM, Asthma thymicum.

PHRENOLOGY, Craniology.

PHRENO-MAGNETISM, *Phreno-mes'merism*, *Mes'mero-phreno'logy*. A term applied to the condition of a mesmerized person, in which, when any cerebral or phrenological organ—so called—

is touched, the functions of the organ are manifested. It has been established, that no such phenomena can be elicited in children, or in those who have never seen a phrenological cast or picture.

PHRENOPARALYSIS, see Paralysis.

PHRENOPATHIA, see Phrenica.

PHRENOPATHIA ÆTHE'REA. The aggregate of encephalic phenomena induced by the inhalation of ether.

PHRENSY, Phrenitis.

PHRICASMUS, Horripilation.

PHRICE, Horripilation.

PHRICIA, Horripilation.

PHRICIASIS, Horripilation.

PHRICO'DES (FEBRIS), from *φρικη*, 'a shivering;' *Horri'fica*. A fever in which the chill is very intense and prolonged.

PHRYGMA, Shuddering.

PHRYCTE, Colophonias.

PHRYG'IUS (LAPIS). An earthy matter, found in Phrygia and Cappadocia, and formerly employed as an astringent.—Gorræus.

PHTHARMA CALIGO, Caligo—p. Cataracta, Cataract—p. Glaucoma, Glaucoma.

PHTHEIR, Pediculus.

PHTHEIRE'MIA, from *φθειρω*, 'I corrupt,' and *αιμα*, 'blood.' A state in which the plastic powers of the blood are deteriorated.

PHTHEIRIASIS, *Phthiri'asis*, *φθειρασις*, from *φθειρω*, 'a louse;' *Morbus pediculo'sus seu pedicula'ris*, *Pruri'go pedicula'ris*, *Pedicula'tio*, *Malis pedicu'li*, *Peta'le*, *Lousiness*, *Lousy disease*, (F.) *Maladie pédiculaire*, *Phthir'ase*. A disease which consists in the excessive multiplication of lice on the human body, under conditions in which it does not ordinarily take place, and in spite of cleanliness. It has been asserted that the affection has often caused death. Simple and medicated baths have been recommended for its removal; lotions of the decoction or infusion of tobacco and stavesacre, mercurial frictions, &c.

PHTHEIRIUM, Delphinium staphisagria.

PHTHIEROCTONUM, Delphinium staphisagria.

PHTHINAS, Pththisis.

PHTHINODES, Pththisicus.

PHTHIRIASE, Pththiriasis.

PHTHIRIASIS, Malis, Pththiriasis.

PHTHIRIUM SCABIEI, see Psora.

PHTHIRIUS, Antiparasitic—p. Inguinalis, see Pediculus.

PHTHIEROCTONUS, Abortive.

PHTHIROPORON, Autumn.

PHTHISES: same etymon as Pththisis. In the classification of Fuchs, diseases attended with ulceration, hectic fever, and emaciation.

PHTHISIS, Pththisis. Also, a slight tickling cough, (Prov.) *Tissick*.

PHTHISICAL, Pththisicus.

PHTHIS'ICUS, *Phthino'des*, *Pththis'ical*, *Tis'ical*, (F.) *Phthistique*, *Poitrinaire*; same etymon as pththisis. Belonging to pththisis. Also, one labouring under pththisis, or who is *consumptive*.

PHTHISIE, Pththisis pulmonalis—p. *Aiguë*, Consumption, galloping—p. *Calculeuse*, Calculi, pulmonary, see Lithiasis pulmonum—p. *Carcinomatense*, Pththisis, cancerous—p. *Galopante*, Consumption, galloping—p. *avec Mélanose*, Anthracosis pulmonum—p. *Mésentérique*, *Tabes mesenterica*—p. *Trachéale*, see Pththisis laryngea—p. *Tuberculeuse*, Pththisis pulmonalis.

PHTHISIOLOGY, *Phthisiolog'ia*, from *φθισις*, and *λογος*. A treatise on pththisis.

PHTHISIOSIS, Tubercular consumption.

PHTHISI-PNEUMONIA, Pththisis pulmonalis.

PHTHISIQUE, Pththisicus.

PHTHISIS, *Phthoë*, *Phthinas*, *Tabes*, *Te'ce-*

don, Consumption, Decline, Phthisis, Tisic, from φθίω, 'I waste away, I decay.' This word, taken in a general sense, means progressive emaciation of every part of the body. It is usually, however, restricted to phthisis pulmonalis.

PHTHISIS ACUTA, Consumption, galloping — p. Black, see Anthracosis.

PHTHISIS BRONCHIAL, Phthisis bronchialis. Phthisis occasioned by the pressure of enlarged tuberculous bronchial glands, which, not unfrequently, communicate with caverns in the lungs, or with the bronchia.

PHTHISIS CALCULOSA, Lithiasis pulmonum.

PHTHISIS, CANCEROUS, Scirrhus, Carcinoma et Fungus Pulmonum, Medullary or Ecephaloid Tumour of the Lung, (F.) Cancer du Poumon. Cancer of the lung, which gives rise to carcinomatous phthisis, (F.) *Phthisie carcinomateuse*, of Bayle.

PHTHISIS CONSUMMATA, see Ph. pulmonalis — p. Dorsalis, Tabes Dorsalis — p. Dyspeptic, see Phthisis — p. Exulcerata, Ph. pulmonalis — p. Hepatica, Hepato-phthisis — p. Ischiadica, Ischio-phthisis.

PHTHISIS LARYNGEA, Chronic Laryngitis, Laryngitis et Tracheitis chronica, Tuberculo'sis laryngis et tracheæ, Laryngo-et-Tracheophthisis, Laryngophthisis, Ulcera seu Helco'sis Laryngis, (F.) Phthisie laryngée, Ulcère du larynx, Laryngite avec sécrétion de Pus, is a species of consumption analogous to phthisis pulmonalis, produced by inflammation and ulceration of the interior of the larynx, and sometimes by caries of the cartilages. *Phthisis trachealis, Tracheophthisis, (F.) Phthisie trachéale,* is a similar affection, seated in the trachea. Chronic inflammation of the larynx and trachea may exist, however, without tubercles or phthisis.

PHTHISIS MESERICA, Tabes mesenterica — p. Nodosa, Ph. pulmonalis — p. Mucosa, see Bronchorrhœa — p. Notias, Tabes dorsalis — p. Pituitosa, see Bronchorrhœa.

PHTHISIS PULMONALIS, Ph. pulmonum seu pulmonaris seu nodosa pulmonalis vera seu tuberculo'sa seu scrophulo'sa seu tuberculo-ulcerata seu purulenta exulcerata seu exulcerata, Marasmus seu Hectica seu Hæmoptysis phthisis, Passio vomico'flua, Phthisis-pneumo'nia, Tabes pulmonalis seu pulmonum, Ulcus pulmonum, Helco'sis pulmonalis, Pneumophthisis, Pneumophthoë, Pneumopthoë, Pulmo'nia, Tuberculo'sis Pulmonum, Gongrophthisis, Morbus Anglicus, Tuberculous disease of the lungs, Pulmonary consumption, Consumption, Decline, Phthisic, Tisic, (Sc.) Teasick, (F.) Phthisie, P. pulmonaire seu tuberculense, Crachement de pus. Occasionally, this formidable disease occurs accidentally: but, usually, it is caused by a conformation obtained from progenitors. This, at least, predisposes to it; and but a slight exciting cause may be required to rouse the predisposition into action. It is less a disease of the torrid zone; and in the temperate regions of the globe, its pathology is often intimately allied with that of scrofula. It consists in the formation of tubercles in the lungs, which sooner or later inflame and break down. In such a constitution, ulcerations of the lungs do not readily heal; and hectic fever — the universal attendant upon irritability and debility — is established. This persists, and gradually wears down the patient, till he ultimately expires, exhausted by the irritative fever. The chief symptoms are the following. The patient feels a sense of uneasiness in the chest, with severe fits of coughing, or a short and dry cough with dyspnoea. This may be considered the incipient stage. The cough then becomes extremely troublesome, especially in the morning; and dyspnoea is increased on the

slightest exertion. The expectoration is evidently purulent, with fever in the evening, and circumscribed redness of the cheeks; wasting and colliquative sweats early in the morning. This must be considered the confirmed stage, — *Phthisis consummata, Pneumophthisis.* In the third, or last stage, the hectic is constant, with small pulse, pungent heat, colliquative sweats, and diarrhoea. The weakness becomes extreme, and the patient exhausted. *Physical Signs.* — 1. In the first stage, whilst there are yet scattered milary tubercles, — the only appreciable change at the exterior of the chest, and this is not constant, is a want of freedom in the movements under one or both clavicles. Percussion will generally discover a slight diminution of sound corresponding to the summit of one lung. In the same situation, auscultation shows that the inspiratory murmur is either weaker, rougher, or confused. The sound of expiration is more distinct. The voice and cough are rather more resonant, and wheezing or mucous râles are occasionally heard in the same region. 2. When the tubercular deposition has become more abundant, the motion of the chest is more markedly diminished under one or both clavicles. The loss of sound on percussion is more distinct, the inspiration, on auscultation, is bronchial, the expiration louder and more superficial, and the resonance of the voice and cough is increased. The rest of the lung is perhaps healthy, or the respiration may be purile. 3. When the tubercles are undergoing softening, — in addition to the preceding signs, auscultation exhibits a subcrepitant râle around the apex of the lung, decreasing from above downwards. It is most distinct during or after the cough, and at the close of a deep inspiration. As the disease proceeds, the bubbling becomes successively larger, and ultimately *gargouillement* is heard. The inspiration and expiration are cavernous or tracheal. The voice and cough indicate unusual resonance and pectoriloquy. The intercostal spaces are often depressed locally, and percussion may become gradually clearer and even tympanitic as the cavern increases.

It is only in the incipient state of this formidable disease, that advantage can be expected from any plan of treatment; and of all means that can be devised, that of removing to a climate in which air and exercise can be daily enjoyed during the autumnal, winter, and spring months is the best. See Climate. If this be impracticable, the patient must be kept in a regulated temperature, taking care that the chamber is duly ventilated; and gestation in the open air be used; whenever the atmosphere, although cold, is dry. The other indications will be: 1. To moderate inflammatory action: 2. To support the strength; and, 3. To palliate urgent symptoms. The whole treatment indeed is palliative. Counter-irritants relieve pain; demulcents and mild opiates alleviate the cough; the mineral acids, united with opium, relieve the colliquative sweats: and chalk and opium the diarrhoea.

Dr. Wilson Philip has pointed out a particular species of phthisis, which is characterized, in the early stage, by a deranged state of the digestive organs; flatulent, irregular bowels; furred tongue; impaired appetite; unnatural fæces; and the epigastric region more or less full and tender on pressure. The affection of the lungs is here secondary. He calls it *Dyspeptic phthisis.*

PHTHISIS PULMONALIS PURULENTA EXULCERATA, Phthisis pulmonalis — p. Pulmonalis scrofulosa, Phthisis pulmonalis — p. Pulmonalis tuberculosa, Phthisis pulmonalis — p. Pulmonalis tuberculosa-ulcerata, Phthisis pulmonalis — p. Pulmonalis vera, Phthisis pulmonalis — p. Pupillæ, Synezisis — p. Pupillaris, Myosis — p. Scrophu-

Iosa, Phthisis pulmonalis — p. Sicca, Tabes dorsalis — p. Tuberculosa, Phthisis pulmonalis — p. Uterina, Metrophthisis — p. Vesicalis, Cysto-phthisis.

PHTHISIS WEED, *Ludwigia palustris*.

PHTHISURIA, Diabetes.

PHTHISURIE, Diabetes — p. *Sucrée*, Diabetes mellitus.

PHTHOË, Phthisis.

PHTHOIS, Pastil, Trochiscus.

PHTHOISCOS, Pastil, Trochiscus.

PHTHONGODYSPHORIA, Hyperacusis.

PHTHORA, Abortion, Corruption, Plague.

PHTHORIUS, Abortive.

PHTHOROCTONUS, Abortive.

PHUCAGROSTIS MINOR, *Pila marina*.

PHUSCA, Oxycerate.

PHYGANTHROPIA, Misanthropia.

PHYGETH'LOX, *Panus, Phypella*, from φῦω, 'I grow,' [?]. Inflammation of the superficial lymphatic glands, not ending in suppuration.

PHYLACTERION, Amuletum.

PHYLACTERIUM, φυλακτηριον, from φυλασσω, 'I preserve.' A *Phylactery*, (F.) *Phylactère*. An amulet: — a prophylactic.

PHYLAXIS, Conservation.

PHYLLANTHUS URINARIA, *Binkohumba*. Ord. Euphorbiaceæ. A plant employed in Ceylon, in decoction, as a diuretic.

PHYLLITIS, *Asplenium scolopendrium* — p. *Muraria*, *Asplenium ruta muraria* — p. *Rotundifolia*, *Asplenium trichomanoides*.

PHYMA, *Phima*, from φῦω, 'I grow.' With the ancients, this word was used with great latitude: sometimes, in the sense of phlegmon, for tumours larger than a boil, and perfectly suppurative. In the nosology of Sauvages, *Phymata* is an order of diseases, to which he refers erysipelas, œdema, phlegmon, emphysema, scirrhus, &c. In that of Dr. Good it is a genus, including hordeolum, furunculus, syccosis, and anthrax.

PHYMA ANTHRAX, Anthrax — p. Anthrax terminthus, Terminthus — p. Syccosis, Syccosis.

PHYMATOID, *Phymatoides*, (F.) *Phymatoides*, from φῦμα, 'a tubercle,' and εἶδος, 'resemblance.' A state of cancerous tissue, in which the dull yellow hue and the consistence resemble those of tubercle. — Lebert.

PHYMATOSES, from φῦμα, 'a hard tumour.' Tuberculous diseases. — Fuchs.

PHYMATOSIS, Excrescence — p. *Cerebri*, *Ecephalophymata* — p. *Elephantiasis*, *Elephantiasis* — p. *Lupus*, *Lupus* — p. *Verrucosa*, *Verruca*.

PHYMOSIS, Phimosus.

PHYPELLA, Phygethlon.

PHYSA, Crepitation.

PHYSAGOGA, Carminatives.

PHY'SALIS, from φῦσα, 'a bladder,' referring to the inflated calyx, *P. Alkekengi* seu *halicacabum*, *Solanum vesicarium*, *Alchachen'gë*, *Alkekengi*, *Halicacabum*, *Winter Cherry*, (F.) *Alkekenge*, *Coqueret*. Ord. Solanaceæ. *Sez. Syst.* Pentandria Monogynia. The berries are recommended as a diuretic, from 6 to 12 for a dose, in dropsical and calculous cases. It has been affirmed, that the whole plant — twigs, leaves, capsules and berries — possesses the antiperiodic virtues of Cinchona.

PHYSALIS ALKEKENGIS, *Physalis* — p. *Halicacabum*, *Physalis* — p. *Obscura*, *Ph. viscosa* — p. *Pennsylvanica*, *Ph. viscosa* — p. *Pubescentes*, *Ph. viscosa* — p. *Stramonium*, *Anisodus luridus*.

PHYSALIS VISCO'SA, *P. obscura* seu *Pennsylvanica* seu *pubesces*, *Ground cherry*; indigenous. The berries are said to be diuretic and sedative.

PHYSCE, Abdomen, Colon.

PHYSICIA ISLANDICA, *Lichen Islandica* — p. *Nivalis*, *Lichen caninus*.

PHYSICIA, from φυσικον, 'the paunch.'

Ventros'itas, *Ecphy'ma physco'nia*, *Hyposar'ca*, *Emphrac'tica*, *Visco'nia*, *Hyperarchid'ios*, *Pot-belly*, *Pendulous abdomen*, *Swagbelly*, *Gorbelly*, (Prov.) *Gotchbelly*, *Pedbelly*. A generic term, under which Sauvages has comprised every large tumour developed in the abdomen, that is neither fluctuating nor sonorous. Linnæus calls it *Hyposarca*.

PHYSCO'NIA ADIPO'SA, *Obes'itas* seu *Polysar'cia vis'cerum*. Accumulation of fat in the intestines.

PHYSCONIA BILIOSA, *Turgescencia vesiculæ felleæ*.

PHYSCONIA EMPHYSEMAT'ICA. Accumulation of air in the areolar tissue, or between the coats of particular viscera.

PHYSCONIA LIENIS, *Splenoncus* — p. *Mesenterica*, *Tabes mesenterica* — p. *Splenica*, *Ague cake*.

PHYSCONIA STRUMO'SA, *Serof'ula abdominal'is inter'na*. Tumid abdomen from serophulous enlargement of the glands.

PHYSCONIE MÉSENTÉRIQUE, *Tabes mesenterica*.

PHYSEMA, *Tympanitis*, *Phytesis*.

PHYSE'SIS, *Physe'na*, from φυσω, 'I inflate.' An emphysematous tumour. *Tympanitis*.

PHYSETER MACROCEPHALUS, see *Cetaceum*.

PHYSIATRICE, *Vis medicatrix naturæ*.

PHYSIAUTOCRATIA, *Vis medicatrix naturæ*.

PHYSIC, Medicament, *Medicina* — p. *Indian*, *Euphorbia corollata*, *Gillenia trifoliata* — p. *Root*, *Leptandra purpurea*.

PHYSICAL, Medical — p. *Signs*, see *Symptom*.

PHYSIC'IAN, *Med'icus*, *Iatros*, *Aces'tor*, *Aces'ter*, *Altheus*, Παιων, Ραον, (Old Eng.) *Fesis'ian*, *Ficicion*, *Leche*, *Leech*, from φυσis, 'nature.' (F.) *Medecin*, *Docteur*. One who has received his degree from an incorporated Institution, as Doctor of Medicine. The French formerly used the word *physicien* in the same sense. It is now appropriated by them to the natural philosopher. *Physicist* has the same signification.

PHYSICIAN, FAMILY. One regarded as the regular attendant on a family.

PHYSICIAN, LEARNED, *Iatrosophista* — p. *Practical*, *Iatrotechna* — p. *Priest*, see *Asclepiadæ*.

PHYSICIEN, *Physician*.

PHYSICIST, see *Physician*.

PHYSICS, MED'ICAL, *Iatrophys'ics*. Physics directly applied to medicine, — either to the explanation of the vital phenomena, the preservation of individuals, or the treatment of disease.

PHYSIOAUTOCRATIA, *Vis medicatrix naturæ*.

PHYSIOG'NOMIST, *Physiognom'on*, one who busies himself especially with, or pretends to be versed in, physiognomy.

PHYSIOG'NOMY, (Old Eng.) *Vis'nomy*, *Physiognom'ia*, *Physiognom'ica*, *Physiognom'icè*, *Physionom'ia*, *Physiognomon'ia*, *Physiognom'onè*, *Physiognomos'ynè*, *Physiognomosis*, *Anthroposcopy'ia*, *Prosopomanti'ia*, *Prosopolog'ia*, *Semiot'icè fa'ciei*, *Physiognom'ica*, *Physiognom'omy*, *Metopos'copy*, *Prosop'osis*, from φυσis, 'nature,' and γνωνη, 'knowledge.' The art of knowing the dispositions of men from their external appearance; especially from the features. Every inference of this kind must necessarily be extremely fallacious, and cannot be reduced to rule, as was attempted by Lavater and others. In infantile diseases, numerous shades of expression are evident, which experience teaches how to appreciate; and which afford useful guides in understanding the pathology of that period of existence.

PHYSIOLOGIA PATHOGENETICA, see *Pathogenetic*.

PHYSIOLOG'ICAL, *Physiolog'icus*, (F.) *Physiologique*. Relating or belonging to physiology.

PHYSIOLOGICAL ANATOMY, see Anatomy — p. Doctrine, Broussaism.

PHYSIOLOGIST, Physiology.

PHYSIOL'OGIST, *Physiologos*. Same etymon as the next. One who occupies himself specially, or is well acquainted, with physiology.

PHYSIOL'OGY, *Physiolog'ia*, *Biol'ogy*, *Bion'omy*, *Biot'ics*, *Biophænomenolog'ia*, *Physiolog'icō*, *Œconom'ia animal'is*, *Anatom'ia viva*, *Anat'omē animal'a*, *Anthropolog'ia*, *Microcosmograp'hia*, *Microcosmica scien'tia*, *Cognit'io physiolog'ica*, *Paras naturalis medicina*, *Philosoph'ia corporis vivi*; from *φύσις*, 'nature,' and *λογος*, 'a description.' Formerly, Physiology meant the same as Physics, in its extensive signification, now does. At the present day, it includes the science which treats of the functions of animals or vegetables; an acquaintance with the phenomena the aggregate of which constitute life. It is the science of life. It is divided into *animal*—*Zoō-physiologia*, or *Zoobiolog'ia*; and *vegetable*—*Phytophysiolog'ia*, or *Phytobiolog'ia*, according as it considers the life of animals or of vegetables singly. *Comparative physiology* comprises both. Physiology is, also, *general* or *special*, according as it treats of life in the abstract or in some particular species. To the latter belongs the *Physiology of Man*,—called also, *Hygienic Physiology* or *Pathology*.

PHYSIOLOGY, PATHOGENETIC, see Pathogenetic.

PHYSIONOMIA, Physiognomy.

PHYSIONOMIE ÉGARÉE, see Wild.

PHYSIS, Natura, Sex.

PHYSOCELĒ, *Pneumatocele*, *Hernia ventosa*; *Oscchocele flatulenta*, *Emphysema Scroti*, from *φύσσω*, 'I inflate,' and *κηλη*, 'a tumour.' An emphysematous tumour of the scrotum; probably a case of intestinal hernia, containing much flatus.

PHYSOCEPH'ALUS, from *φύσσω*, 'I inflate,' and *κεφαλη*, 'the head.' (F.) *Physocéphale*. Emphysematous tumefaction of the head.

PHYSOCELIA, Tympanites.

PHYSO'DES; from *φύσσω*, 'I inflate,' and *εἶδος*, 'resemblance.' Full of air; apparently full of air—applied to tumours, &c.

PHYSOME'TRA, *Emphysema Uteri* seu *Uteri'um*, *Hysterophyse*, *Hysteremphyse'ma*, *Hysteremphyse'ma*, *Metremphyse'ma*, *Inflatio Uteri*, *Tym'pany of the Womb*, *Uterine tympanites*, from *φύσσω*, 'I inflate,' and *μητρα*, 'the womb.' A light, tense, circumscribed protuberance in the hypogastrium, obscurely sonorous, with wind occasionally discharged through the os uteri with noise, *Hysteropsoph'ia*, *Œdæopsoph'ia uteri'na*.

PHYSON, Flatulence.

PHYSONCUS, Emphysema.

PHYSOPSOPI'IA; from *φύσσω*, 'I inflate,' and *σοφος*, 'a noise.' A discharge of air with noise.

PHYSOSPASMUS, Colica flatulenta.

PHYSOTHORAX, Pneumothorax.

PHYTEL'EPHAS MACROCAR'PA, from *φυτον*, 'a plant,' and *ελεφας*, 'an elephant.' A tree of South America, called, by Willdenow, *Elephantusia*, the dense albumen of whose unt, is the vegetable ivory, which is as durable and nearly as hard as the ivory of the elephant.

PHYTIVOROUS, Phytophagous.

PHYTOALPECIA, Porrigo decalvans.

PHYTOBIOLOGIA, see Physiology.

PHYTO-CHEMISTRY, see Chemistry.

PHYTOLAC'CA DECAN'DRA, *P. vulgaris*, *Poke Weed*, *American night shade*, *Cancer root*, *Poke*, *Skoke*, *Jucato Calleeo* [?], *Jalap*, *Pigeon Berry*, *Jalap cancer root*, *Solanum racemosum America'num* seu *magnum Virginia'num rubrum*, *Blitum America'num*, *Garget*, (F.) *Raisin d'Amé-*

rique, *Phytolaque à dix étamines*, *Morelle en grappes*, *Méchoacan du Canada*. Ord. Chenopodeaceæ; *Sex. Syst. Decandria Decagynia*; from *φυτον*, 'a plant,' and *lacca*; because the colour of the juice of the berries resembles that of lacca. The leaves, berries, and roots are employed. The young stems, when boiled, are sometimes eaten at table; but when old, they must be cautiously used, as the plant is emetic and cathartic. It is most celebrated as a remedy in chronic rheumatism; and is given in the form of tincture of the ripe berries. It is, also, used in cutaneous eruptions; tinea capitis, itch, cancerous ulcers, &c.

The root is gathered and dried in the fall.

PHYTOLAQUE À DIX ÉTAMINES, *Phytolacca decandra*.

PHYTOLOGIA MEDICA, Botany, medical.

PHYTO-PARASITE, Epiphyte.

PHYTOPH'AGOUS, *Phytoph'agus*; *Phytiv'orous*, *Phytiv'orus*; from *φυτον*, 'a plant,' and *φαγω*, 'I eat.' Feeding or subsisting on vegetables.

PHYTOTOPHYSIOLOGIA, see Physiology.

PHYTOSPERM'ATA, (F.) *Phytospermes*; from *φυτον*, 'a plant,' and *σπερμα*, 'sperm.' Particles similar to the spermatozooids of animals, observed in vegetables, and presumed to possess a similar agency in reproduction.

PHYTOTOMY, see Anatomy, (vegetable.)

PHYTOZOOON, Zoophyte.

PIA MATER, *Pia* seu *mollis* seu *ten'uis Mater*, *Pia mening*, *Mening interior* seu *vasculo'sa* seu *choroï'des*, *Inner lam'ina of the Meninge*, (Ch.), *Membra'na vasculo'sa Cer'ebr*, *M. Cer'ebr* *ten'uis* seu *mollis* seu *prop'ria*, (F.) *Pie mēre*, *Méningette*. The pia mater is a very delicate membrane, which covers the brain immediately, penetrates into its anfractuosities, and envelops, also, the cerebellum and the spinal prolongation, &c. Bichat does not regard it as a membrane, properly so called, but as a network of blood-vessels, united by a lax areolar tissue. The *Pia Mater exterior* is the portion of membrane which covers the exterior of the encephalon, and faces the arachnoid externally. The *Pia Mater interior* is that which lines the cerebral fossæ, into which it penetrates by a cleft situate between the posterior part of the corpus callosum and the fornix; and by two other fissures, situate between the corpora fimbriata and thalami nervorum opticorum. The pia mater contains a great number of granulations similar to the *Glandulæ Pacchioni*.

PIA MATER TESTIS, Tunica vasculosa—p. *Mening*, *P. Mater*.

PIAN, Frambesia.

PIANS, MOTHER OF, *Mama-pian*.

PIAR, Fat.

PIARHĒ'MIA, *Piarrhæ'mia*, from *πιαρ*, 'fat,' and *αἷμα*, 'blood.' Fat in the blood.—Simon.

PICA, Malacia—p. *Africanorum*, *Chthonophagia*.

PICAC, Euphorbia corollata.

PICACISM'US, *Pica'tio*, from *πιρ*, *pici's*, 'pitch.' Depilation by means of a pitch plaster. Also, Malacia.

PICATIO, Malacia, Picacismus.

PICEA, Pinus abies.

PICERON, Butter.

PICHURIM BEANS. The seed, *Faba Pichurim*, *F. Pecku'rei*, *Para nut*, *Sassafras nut*, *Puziri*, *Brazilian nutmeg*, of a tree, supposed to be *Persea pichurim*, *Ocote'a pichurim* seu *Puchury*, *Tetranthe'ra pichurim*, *Nectan'dra puchury*, *Puchury* or *Puchury* of the Brazilians, Ord. Lauracæ, which grows in Brazil, Guiana, Venezuela, and other parts of South America. They are of an elliptical shape; flat on one side, convex on the other; of an aromatic odour between that of

nutmegs and saffras, and of a spicy, pungent taste. The medical properties are the same as those of other aromatics. For the bark, see *Pechurim cortex*.

PICK, Emetic.

PICKERELWEED, SHOVEL, *Unisema deltifolia*.

PICOTE, Variola.

PICOTEMENT, Pricking.

PICOTIN, *Arum maculatum*.

PICRA, *Pulvis aloës et canellæ*.

PICRÆNA EXCELSA, *Quassia*.

PICRIA, Bitterness.

PICRUM SPICATUM, *Coutoubea alba*.

PICROCHOLOS, Biliious.

PICROMEL, *Bilin*; from *πικρος*, 'bitter,' and *μελι*, 'honey.' A name given by Thénard to a colourless, soft substance, of an acrid, bitter, saccharine taste, nauseous smell, and very soluble in water, which is considered to be a *bilate of soda*. It is not an immediate principle, but a mixture of different substances. It forms part of the bile, and is generally classed amongst the animal immediate principles.

PICROPEGÆ, *Picropegæ*, from *πικρος*, 'bitter,' and *πηγή*, 'a spring.' Mineral waters; bitter from the presence of chloride of magnesium.

PICROS, *Amarus*.

PICROTOXINE, *Picrotoxina*, *Picrotoxin*, from *πικρος*, 'bitter,' and *τοξικον*, 'poison.' A vegetable alkali, discovered by M. Boullay in the *Menispermum Cocculus*. It crystallizes in quadrangular, white, brilliant, semitransparent prisms; which are excessively bitter, soluble in three parts of alcohol, and in fifteen of boiling water.

The *Cocculus Indicus* owes its poisonous properties to this principle.

PIE MÈRE, *Pia mater*.

PIE-MÉRITE, *Inflammatiō piæ matris*. A miserably compounded term, employed by M. Grisolle, to express inflammation of the pia mater:—from (F.) *pie mère*, 'the pia mater,' and *ite, itis*; a termination denoting inflammation.

PIÈCE, *Hepatitis*.

PIÈCES D'ANATOMIE ARTIFICIELLES, see *Artificial*.

PIED, *Pes*—*p. d'Alexandre*, *Anthemis pyrethrum*—*p. d'Alouette des champs*, *Delphinium consolida*—*p. Bot*, see *Kyllosis*—*p. de Chat*, *Antennaria dioica*—*p. de Cheval marin*, *Cornu ammonis*—*p. de Griffon*, *Gryphus pes*, *Helleborus foetidus*—*p. de Lièvre*, *Arum maculatum*—*p. de Lion*, *Alechilla*—*p. de Lit*, *Origanum*—*p. d'Ours*, *Acanthus mollis*—*p. Plat*, see *Kyllosis*—*p. de Veau*, *Arum maculatum*—*p. de Veau triphyllæ*, *Arum triphyllum*.

PIEIRON, *Fat*.

PIERRE, *Calculus*—*p. d'Aigle*, *Ætites*—*p. d'Amant*, *Magnet*—*p. d'Azur*, *Lapis lazuli*—*p. Caluminaire*, *Calamine*—*p. à Cautère*, *Potassa cum calce*—*p. PIERRES CRAYEUSES, *Calculi*, *arthritis*—*p. au Fiel*, *Calculi*, *biliary*—*p. Stercorales*, *Calculus of the Stomach and Intestines*—*p. Urinaires*, *Calculi*, *urinary*.

PIERREUX, *Petrus*.

PIESTER, *Press*.

PIESTERION, *Press*.

PIESTRON, from *πιέζω*, 'I press.' An instrument recommended by Hippocrates for breaking the bones of the fetal head when too large to be extracted otherwise.

PIGAMON JAUNÂTRE, *Thalictrom*.

PIGEON BERRY, *Phytolacca decandra*—*p. Breasted*, see *Lordosis*—*p. Tree*, *Aralia spinosa*.

PIGMENT CELLS, see *Cell*, *pigment*.

PIGMENTAL, *Pigmentary*, *Pigmentarius*, (F.) *Pigmentaire*, from *pigmentum*, (*pingere*, *pic-tum*, 'to paint,') 'paint.' Having relation to pigment or colouring matter.

PIGMENTAL APPARATUS, (F.) *Appareil pigmental*. The apparatus concerned in the coloration of the skin of the coloured varieties of man.—*Flourens*.

PIGMENTARIUS, *Apothecary*, *Unguentarius*. PIGMENTARY, *Pigmental*—*p. Nævi*, see *Nævus*.

PIGMENTUM, *Paint*—*p. Indicum*, *Indigo*—*p. Nigrum*, see *Choroidea tunica*—*p. Uracu*, *Terra Orleana*.

PIGMY, *Pygmy*.

PIGNEROLE, *Cantaurea calcitrapa*.

PIGNON DE BARBARIE, *Jatropha curcas*—*p. d'Inde*, *Jatropha curcas*—*p. d'Inde*, *petit*, *Croton tiglium*.

PIGNET, *Earthnut*, *Groundnut*. The bulbous root of *Bu'nium Bulbocastanum*. *Ord. Umbelliferæ*. Called *pignuts*, from the fondness of the pig for them. They have been considered to possess a styptic quality; and are deemed serviceable in atonic affections of the kidney.—*Hooper*.

PIGNET, *Bunium bulbocastanum*.

PIG'S FLARE, *Adeps suillus*.

PIKROPEGÆ, *Picropegæ*.

PIKRY, *Pulvis aloës et canellæ*.

PILA, *Sphæra*, *Palla*, *πᾶλλα*, *Ball*. A gymnastic exercise, much used by the ancients as well as moderns.—*Galen*. Also, a mortar and a pestle—*Ac'oniz*.

PILA, *Mortar*, *Pillar*—*p. Damarum*, *Ægagropila*—*p. Rupicaprarum*, *Ægagropila*.

PILA MARI'NA, *Sphæra Marina* seu *Thalassia*, *Hályonium rotundum*, (F.) *Pelote de Mer*, *Zostère*, *Algue marine*, *A. commune ou des Verriers*. Certain light, round, depressed, or oblong masses—inodorous and insipid—in which rushes, hairs, and the débris of shells are met with. These are found on the sea-shores, and have been regarded by Spielmann as consisting chiefly of the roots of the *Zostera Marina* seu *Mari'ima*, *Alga Mari'na*, (*Big tangles*, *Ware*, *Wair*, *Sea-ware*), *Phucagrostis minor*. Iodine is detected in the ashes, which accounts for their success in goitre. They have, also, been given as a vermifuge.

PILAIRE, *Pileous*.

PILAR, *Pileous*.

PILARE MALUM, *Trichosis*.

PILAT'IO, from *pilus*, 'a hair.' Fracture of the cranium in which the fissure is narrow, and has the appearance of a hair—a *capillary fissure*, (F.) *Fente capillaire*.

PILE, *Hair*.

PI'LEA PUMILA, from *pilus*, 'a hair,' *pilosus*, 'hairy.' *Richweed*, *Clearweed*, *Coolweed*; indigenous; *Order*, *Urticaceæ*; flowering from July to September; has been used as a wash in poisoning by *Rhus*. It has a strong, grateful smell.

PILEOLUM, *Calotte*.

PILEOLUS, *Caul*, *Pileus*.

PI'LEOUS, *Pilo'sus*, *Pilose*, *Pilous*, *Pilar*, (F.) *Pileux*, *Pilaire*, from *pilus*, 'a hair.' That which relates to the hair. *Hairy*.

PILEOUS SYSTEM of Bichat is that formed by the hair. It comprises the different species of hair of the human body.

PILES, *BLIND*, *Cæcæ hæmorrhoides*, see *Hæmorrhoids*.

PILEUS, 'a hat, cap, or bonnet for the head.' *Pile'olus*. A shield. A nipple-like instrument, formed of various materials, and used by females

for protecting the nipple during the child's sucking, when the part is painful. Also, a caul.

PILEUS, Cucupha — p. Hippocraticus, *Bonnet d'Hippocrate*.

PILEUX, Pileous.

PILEWORT, Ranunculus acris, and R. ficaria.

PILI CAPITIS, see Capillus — p. Cutis, Lanugo — p. Palpebrarum, Cilia — p. Pudendorum, Pubes.

PILLIER, Pillar.

PILIFEROUS, *Pilifer*, from *pilus*, 'a hair,' and *fero*, 'I bear.' Pile or hair bearing, — as a 'piliferous cyst,' — one containing hair.

PILIMICTIO, see Trichiasis.

PILL, Pilula — p. Abernethy's, see Pilulæ hydrargyri — p. of Aloes and Camboge, Pilulæ aloes et cambogiæ — p. of Aloes and cinchona, Pilulæ aloes et kinæ kinæ — p. of Aloes and colocynth, Pilulæ aloes et colocynthidis — p. of Aloes and fetid gums, Pilulæ de aloë et fetididis — p. of Aloes and ginger, Pilulæ aloes et zingiberis — p. of Aloes and iron, Pilulæ aloes et ferri — p. Aloes and myrrh, Pilulæ aloes et myrrhæ — p. Aloetic, Pilulæ aloeticæ — p. Aloetic and assafoetida, Pilulæ aloes et assafoetidæ — p. Bacher's, Pilulæ ex helleboro et myrrhâ — p. Barbarossa's, Barbarossæ pilulæ — p. Barthez's, see Pilulæ aloes et myrrhæ.

PILL, BLAIR'S. An empirical preparation of colchicum, much used in England in cases of gout.

PILL, BLAUD'S. These pills, proposed by M. Bland as antichlorotic, are formed as follows: — Take of *gum tragacanth*, in powder, six grains; *water*, one drachm. Macerate in a glass or porcelain mortar, until a thick mucilage is formed, and if it be desired to prevent the formation of peroxide of iron, and to make the pill similar to those of Vallet, substitute a drachm of powdered sugar for the mucilage. Add afterwards of *sulphate of iron*, in powder, half an ounce. Beat well until the mixture is homogeneous, and add *subcarbonate of potassa*, half an ounce. Beat until the mass becomes of a deep-green colour, and of a soft consistence. Divide into 48 [?] pills. Dose, one a day; gradually increasing to two, and afterwards to three.

PILL, BLUE, Pilulæ hydrargyri — p. Brandreth's, Pilulæ aloes et cambogiæ — p. Calomel, Pilulæ hydrargyri chloridi mitis — p. Calomel, compound, Pilulæ hydrargyri submuriatis compositæ — p. Calomel and opium, Pilulæ calomelanos et opii — p. Camboge, Pilulæ cambogiæ compos. — p. Camboge, compound, Pilulæ cambogiæ compositæ — p. of Carbonate of iron, Pilulæ ferri carbonatis — p. Cathartic, compound, Pilulæ catharticæ compositæ — p. of Colocynth and henbane, Pilulæ colocynthidis et hyoseyami — p. of Colocynth, compound, Pilulæ colocynthidis compositæ — p. Common, Pilulæ aloes et myrrhæ — p. of ammoniated Copper, Pilulæ cupri ammoniati — p. of Digitalis and squill, Pilulæ digitalis et seillæ — p. Dinner, see Pilulæ aloes et kinæ kinæ, and Pilulæ rhej.

PILL, DINNER, OF MR. MAYO. This is composed of *P. Rhej*, gr. iv.; *Sodæ Carb.* gr. j.

PILL, EVERLASTING. A pill once in vogue, and said to be composed of metallic antimony. It was believed to have the property of purging as often as it was swallowed. A lady having swallowed one of these pills, became seriously alarmed at its not passing. "Madam," said her physician, "fear not; it has already passed

through a hundred patients without any difficulty." — Paris.

PILL, FEMALE, Pilulæ de aloë et fetididis — p. Ferruginous, of Vallet, see Ferri protocarbons — p. Fothergill's, see Pilulæ aloes et colocynthidis — p. Frank's, see Pilulæ aloes et kinæ kinæ — p. Fuller's, see Pilulæ de aloë et fetididis — p. Galbanum, compound, Pilulæ galbani compositæ — p. Griffith's, Pilulæ ferri compositæ — p. Griffith's, see Pilulæ rhej compositæ — p. PILL, LARTIGUE'S, *Pilulæ Colchici et Digitalis*, (F.) *Pilules de Lartigue*. (*Ext. Coloc. c. 3ss; Ext. Sem. Colchic. alcoholic., Extract. Digital. alcoholic. ãã gr. iss; f. massa in pilul. x dividend.*) Dose, two, three, or more, in the 24 hours, in gout, until purging is induced.

This is a form that has been employed as a substitute for the *Pilules de Lartigue*, the composition of which is not known. M. Bouchardat recommends for the same purpose a combination of *Extractum colocynthidis compositum*, *Extractum colchici* and *Extractum opii*, which is almost identical with pills prescribed by Sir Henry Hallford for the gout; the only difference being, that the latter substitutes *Dover's powder* for the *Extractum opii*.

PILL, OPIATE, OF LEAD, Pilulæ plumbi opiatæ.

PILL, LEE'S NEW LONDON, is composed of *scammony*, *gamboge*, *calomel*, *jalap*, *aloës*, *soap* and *syrup of buckthorn*.

PILL, LEE'S WINDHAM, consists of *gamboge*, *aloës*, *soap* and *nitrate of potassa*.

PILLAR, *Pilla, Colum'na, Columella*, (F.) *Pilier*. A name given to several parts; as the *pillars of the velum palati, diaphragm, &c.*

PILLULA, *Pilula*.

PILNA, MINERAL WATERS OF, see Pillna.

PILOX, *Pilum*.

PILOSELLA, *Hieracium pilosella*—v. Alpina, *Hieracium pilosella*.

PILOSUS, *Pileous*.

PILOUS, *Pileous*.

PIL'ULA, *Pillula*, plural *Pil'ulæ*. Diminutive of *pila*, 'a ball.' *Sphærid'ion, Catap'otion, Catop'otum, Catap'otia, Sphæ'rion, Gongyl'ion, Gon'gyllis, Gongylid'ium, Sphæ'rule Gale'ri*. A pill. (F.) *Pilule*. A simple or compound medicine, weighing from one to five grains, of a firm consistence and spherical form; intended to be swallowed at once, without chewing. The *Pill* differs from the *Bolus*, the latter being softer and larger.

Medicines are often given in the form of pill, on account of their disagreeable taste and odour. *Pilula*, also, means a *Pilular mass*.

PILULÆ EX ALOE, *P. aloes compositæ*—p. de Aloe et cambogiâ, *P. aloes et cambogiæ*.

PILULÆ ALOES, *P. Aloë'icæ* seu *ex Aloë et Sapo'næ, Aloë'ic Pill*, (F.) *Pilules d'aloës on aloë'tiques*. (*Aloës in pulv.*; *saponis*. sing. \mathfrak{J}); *q. s.* to form 240 pills.—Ph. U. S.) Dose, gr. x. to xx, in habitual costiveness.

PILULÆ ALOES ET ASSAFÆG'TIDÆ, *Aloetic and Assafætida Pills*. (*Aloës, assafætidæ, saponis*, sing. \mathfrak{S} ss; *aguæ*, q. s. to form 180 pills.—Ph. U. S.) Purgative and stomachic. Dose, gr. x.

PILULÆ ALOES ET CAMBOG'IE, *P. de Aloë et Cumbog'ia* seu *Hydrago'gæ Bon'tii, Pill of Aloës and Camboge*. (*Aloës, cambog., gum. ammoniac.*, $\mathfrak{a}\mathfrak{a}$ p. \mathfrak{a} . Make into a powder. Dissolve in vinegar; pass through a cloth; express the residuum strongly; and afterwards evaporate, in a water-bath, to a pilular consistence.—Ph. P.) Purgative; used in dropsy. Dose, gr. xij to xxx.

Peter's Pills,—a nostrum—are formed of *aloës, jalap, scammony, and camboge*, of each equal parts.

The basis of *Morrison's Pills*, often called *Hygienic Pills*, of *Brandreth's Pills*, and *Moffat's Pills*, is said to be *aloës*, with *camboge, scammony, &c.*

Rush's Pills were formed of *calomel, aloës*, and *camboge*, with *oil of mint*.

PILULÆ ALOES ET COLOCYN'THIDIS, *P. ex Colocynth'idæ cum aloë* seu *Aloës cum Colocynth'idæ* seu *coë'cinæ seu coë'chi seu colocyn'thidis compos'itæ seu coë'ciæ mino'res, Pill of Aloës and Colocynth.* (F.) *Pilules panchymogones on universelles, Pilules cochées*. (*Pulp. coloc.* \mathfrak{S} ss; *aloës hepat., scammon.* $\mathfrak{a}\mathfrak{a}$ \mathfrak{J}); *sapon.* \mathfrak{J} ij; *ol. caryoph.* \mathfrak{J} ij; *syryp.* q. s.—Ph. D.) Cathartic. Dose, gr. v to x or more.

Fothergill's Pills consist of *aloës, scammony, colocynth*, and *oxide of antimony*; and *Harvey's Antibilious Pills*, and *Rudius's Pills* do not differ much from them.

PILULÆ ALOES COMPOS'ITÆ, *P. ex Aloë, Compound Aloetic Pills*. (*Aloës spic. extract.* cont. \mathfrak{J} ij; *ext. gentianæ*, \mathfrak{S} ss; *olei carui*, gtt. xl; *syryp.* q. s.—Ph. L.) These are sometimes, also, called *Family pills, Antibilious pills, &c.*

PILULÆ ALOES ET FERRI, *Pills of aloës and Iron*. (*Ferri sulphat.* p. iij; *Aloës Barbada.* p. j; *Pulv. arom.* p. vj; *Conserv. Rosæ*, p. viij.—Ph. Ed.) In atonic constipation. Dose, one to three pills.

PILULÆ DE ALOË ET FÆ'TIDIS, *P. Benedic'tæ*

Fulleri seu Ecphraë'ticæ seu Aloës martia'les, Pills of aloës and fetid gums, Female pills, (F.) *Pilules hénites de Fuller*. (*Aloës socotr., sennæ, assafætidæ, galbani*, $\mathfrak{a}\mathfrak{a}$ \mathfrak{J} ij; *myrrh.* \mathfrak{J} iv; *croci, macis*, $\mathfrak{a}\mathfrak{a}$ \mathfrak{J}); *ferri sulphat.* \mathfrak{J} ss. Reduce to powder separately, and add *ol. succin.* gtt. viij; *syryp. artemisicæ*, q. s.—Ph. P.) Purgative, and given in hysteria. Dose, gr. xv to xx.

Whytt's Pills, given in similar cases, consisted of *chloride of iron, aloës, extract of horehound, and assafætida*.

Stahl's Pills, much used as a tonic aperient in Germany, are made as follows:—*Ferri pulv.*, \mathfrak{D} ss; *Aloës pulv.*, \mathfrak{D} ij; *Ext. colocynth.*, \mathfrak{D} ij; *mucilag. acaciæ* q. s. ut fiant pil xl.

PILULÆ ALOES ET JALAP'Æ, commonly called *Anderson's pills, Anderson's Scots' pills, Scotch pills*. (*Aloës Barbada.* \mathfrak{b} ij; *rad. helleb. nigr.*, *rad. jalapæ, potassæ subcarb.* $\mathfrak{a}\mathfrak{a}$ \mathfrak{J}); *ol. anisi*, \mathfrak{J} iv; *syryp. simpl.* q. s.—Gray.) Dose, gr. x to xxx.

A committee of the Philadelphia College of Pharmacy recommend the following: *Aloës Barbada.* \mathfrak{S} xxiv; *saponis*. \mathfrak{J} iv; *colocynthid.* \mathfrak{J} ij; *cambogiæ*, \mathfrak{J} ij; *ol. anis.* \mathfrak{f} \mathfrak{S} ss.

PILULÆ ALOES ET KINÆ KINÆ, *P. stomachicæ seu ante cibum, Pill of aloës and cinchona*, (F.) *Pilules gowmandes*. (*Aloës socotr.* \mathfrak{J} vj; *ext. cinchon.* \mathfrak{J} ij; *cinnam.* \mathfrak{J} ij; *syryp. absinth.* q. s.—Ph. P.) Stomachic and laxative. Dose, gr. x. to xx.

Lady Crespigny's pills, Lady Webster's pills, Lady Hesketh's pills; the *Pilules de Duchesne*, (*Quercetanus*), the *Grains de Vie* on *Pilules de Olérambourg*; the *Pilules Indiennes stomachiques de La Croix*, the *Pilules de Barbier*, and the *Pilulæ stomachicæ Mesuës* (Ph. L. 1635), resemble these.

Frank's pills, much employed, also, as 'dinner pills,' or, — to use the language of the eccentric Kitchener — as 'peptic persuaders,' are said to be much used, under the name *Graines de santé*, in various parts of Europe. They consist of *aloës, jalap, and rhubarb*, with *syryp of wormwood* as an excipient.

PILULÆ ALOES MARTIALES, *P. de aloës et fetidiss.*

PILULÆ ALOES ET MYRRHÆ, *P. aloës cum myrrhâ* seu *de aloë et myrrhâ, P. Ruffi* seu *Ruffi* seu *communes, Ruffus's or Ruffus's pills, Common pills, Pills of Aloës and myrrh.* (*Aloës, Jij; croci*, in pulv. \mathfrak{S} ss; *myrrh.* \mathfrak{J} ij; *syryp.* q. s. to form 480 pills.—Ph. U. S.) Cathartic and emmenagogue. Dose, gr. x to xx.

Hooper's pills—possessed of similar properties — according to one of Gray's formulæ are made as follows: *Ferri sulph.*, *aguæ*, $\mathfrak{a}\mathfrak{a}$ \mathfrak{J} vij. Dissolve. Add *aloes Barbada.* \mathfrak{b} ij and \mathfrak{J} vij; *canelæ albæ*, \mathfrak{J} vj; *gum. myrrh.* \mathfrak{J} ij; *opopanax*, \mathfrak{J} iv. The committee of the Philadelphia College of Pharmacy recommend the following form: *Aloës Barbadaensis*, \mathfrak{J} vij; *ferri sulphatis exsiccæ*, \mathfrak{J} ij, and \mathfrak{J} ss, vel *ferri sulph. crystall.* \mathfrak{J} iv; *ext. helleb. nigr.* \mathfrak{J} ij; *myrrh.* \mathfrak{J} ij; *saponis*, \mathfrak{J} ij; *canelæ*, in pulv. tritæ, \mathfrak{J} ij; *zingib.* in pulv. trit. \mathfrak{J} ij.

Speediman's pills consist of *aloës, myrrh, rhubarb, extract of chamomile, and essential oil of chamomile*; and the *Pills of Barthez*, of *aloës, myrrh, musk, camphor, and balsam of Peru*.

PILULÆ DE ALOE ET SAPONE, *P. aloeticæ*.

PILULÆ ALOES CUM ZINGIB'ERÆ, *Pills of aloës and ginger*. (*Aloës hepat.* \mathfrak{J} ij; *rad. zingib.* in pulv. \mathfrak{J} ij; *sapon.* *Hispan.* \mathfrak{S} ss; *ol. ess. menthæ pip.* \mathfrak{S} ss.—Ph. D.) In habitual costiveness. Dose, gr. x to xx.

PILULÆ AMMONIURE'TI CUPRI, *P. Cupri, Pills of Ammoniu'ret of copper*, (F.) *Pilules d'ammoinure de cuivre*. (*Ammoniu'r. cupri*, in pulv. ten. trit., gr. xvj; *micæ panis*, \mathfrak{D} iv; *aguæ carbonatæ*

ammonia, q. s. Beat into a mass, and divide into xxxij pills.—Ph. E.) Tonic and antispasmodic, in epilepsy, &c. Dose, one pill twice daily; gradually increasing the dose.

PILULÆ ANTE CIBUM, P. aloes et kinæ kinæ.
 PILULÆ ANTIBILO'SÆ, *Barclay's Antibilious pills.* (Extract of colocynth, ℥ij; resin of jalap. ℥j; almond soap, ℥iss; guaiac, ℥ij; emetic tart. gr. viij; oils of juniper, carraway, and rosemary, āā iv drops; syrup of buckthorn, q. s. to form 64 pills.) Dose, two or three.

Dixon's Antibilious pills are formed of aloes, scammony, rhubarb, and tartarized antimony.

PILULÆ ANTIHERPETICÆ, Pilulæ hydrargyri submuriatis comp.—p. Antihysteriæ, P. galbani composiæ.

PILULÆ ANTISCROPHULO'SÆ, P. ex ox'ido stib'ii et hydrargyri sulphure'to nigro composi'tæ. (P. scammony, hydrarg. sulphur. nigr. āā ℥ij; antimoniæ oxidî albi, milleped., sapon. amygdalin. āā ℥ij; extract. glycyrrh. ℥v. Make into a mass.—Ph. P.) Dose, gr. iv to xx.

PILULÆ ANTISPASTICÆ, P. galbani composi'tæ —p. Assafœtidæ composi'tæ, P. galbani composi'tæ.

PILULÆ ASIAT'ICÆ, *Asiat'ic or Tanjore pills.* (Acid. arsenios. gr. lv; piper. nigr. pulv., ℥ix; acaciæ, q. s. ut fiant pil. 800. Each pill contains about one-fiftenth of a grain of arsenious acid. These pills are employed in India for the cure of syphilis and elephantiasis.

PILULÆ ASSAFŒTIDÆ, *Assafet'ida pills.* (Assafœtid. ℥iss; saponis, ℥ss. Beat with water so as to form a mass to be divided into 240 pills.—Ph. U. S.)

PILULÆ BALSAM'ICÆ, P. Docto'ris Morton. (*Milleped. pulverisat.* ℥xviij; gum ammon. ℥xj; acid. benzoic. ℥vj; croci, balsami Peruv. āā ℥j; balsam. sulph. anisat. ℥vj. Mix.—Ph. P.) Tonic, expectorant, and balsamic.

PILULÆ BENEDICTÆ FULLERI, P. de aloes et foetid.

PILULÆ CALOMELANOS COMPOSITÆ, P. Hydrargyri submuriatis composi'tæ.

PILULÆ CALOMEL'ANOS ET OPII, P. Hydrargyri chlor'idi et o'pii, *Pills of Calomel and Opium.* (Hydrarg. chlorid. mit. p. iij; Opii p. j; Confect. Ros. q. s. To be divided into pills each containing two grains of calomel.—Ph. Ed.)

PILULÆ CAMBO'GIÆ COMPOSITÆ, P. de guttâ gaman'drâ seu hydrog'o'gæ seu gummi guttæ aloet'icæ, *Gamboge pills, Compound gamboge pills.* (F.) *Pilules de gomme gutte composées.* (Cambogiæ contritæ, aloes spicat. extract. contrit., pulv. cinnam. comp. sing. ℥j; saponis, ℥ij.—Ph. L.) Cathartic. Dose, gr. x to xx.

Morrison's Pills are said by Dr. Paris to be nothing more than the above, with the addition of a small portion of cream of tartar.

PILULÆ CATHARTICÆ COMPOSITÆ, *Compound cathartic pills.* (Ext. colocynth. comp. in pulv. ℥ss; ext. jalapæ in pulv. hydrarg. chlorid. mit. āā ℥ij; gambog. in pulv. ℥ij. M. Form into a mass with water, and make into 180 pills.—Ph. U. S.) Three for a dose.

PILULÆ COCCII, P. aloes et colocynthidis—p. Coccinæ minores, P. aloes et colocynthidis—p. Colchici et digitalis, P. Lartigue's—p. Colocynthidis composi'tæ, P. aloes et colocynthidis—p. ex Colocynthide cum aloes, P. aloes et colocynthidis.

PILULÆ COLOCYNTHIDIS ET HYOSCY'AMI, *Pills of Colocynth and Henbane.* (Pil. Colocynth. comp. p. ij; Ext. Hyoscyam. p. i.—Ph. E.) Dose, gr. v to gr. xx.

PILULÆ COMMUNES, P. aloes et myrrhæ.

PILULÆ CONII COMPOSITÆ, *Compound Pill of Hemlock.* (Ext. Conii ℥v; Ipecac. pulv. ℥j; Theriac. q. s.—Ph. L.) Dose, gr. v three times a day.

PILULÆ CUPRI, P. ammoniuretî cupri.

PILULÆ COPA'IBÆ, *Pills of Copaiba.* (Copaib. ℥ij; magnesie, recentè præpar. ℥j. Mix, and set aside till it concretes into a pilular mass, to be divided into 200 pills.—Ph. U. S.) Each pill contains nearly five grains of copaiba. Two to six for a dose.

PILULÆ CUPRI AMMONIA'TI, *Pills of ammoniated Copper.* (Cupri ammon. in pulv. p. j; mica panis, p. vj; Liq. ammon. carbonat. q. s.—Ph. E.) Dose, one to six pills.

PILULÆ DE CYNOGLOS'SO, P. de extracto o'pii. (Pulv. rad. cynogloss., semin. hyoscyam. alb., extract. opii vinos. āā ℥iv; pulv. myrrh. ℥vj; oliban. ℥v; croci, castor., āā ℥iss; syrup opii, q. s.—Ph. P.) Anodyne. In cough, &c. Dose, gr. iv to gr. viij.

PILULÆ DEPURANTES, P. hydrargyri submuriatis compos.

PILULÆ DIGITA'LIS ET SCILLÆ, *Pills of Digitalis and Squill.* (Digital., Scillæ, āā p. j; Elect. aromat. p. ij.—Ph. E.) One or two pills for a dose.

PILULÆ ECPHRACTICÆ, P. de aloes et foetid.

PILULÆ FERRI CARBONA'TIS, *Pills of carbonate of iron, Vallet's pills, Vallet's ferru'ginous pills.* (Ferri sulph. ℥viij; sodæ carbonat. ℥x; Mel. despumat. ℥ij; sacchar. ℥ij; aquæ bullientis, Oij; syrup. q. s. Dissolve the sulphate of iron and carbonate of soda, each in a pint of the water, and to each solution add a fluidounce of syrup; then mix the two solutions in a bottle just large enough to contain them; close it accurately with a stopper, and set it by, that the carbonate of iron may subside. Pour off the liquid, and having washed the precipitate with warm water, sweetened with syrup in the proportion of f℥j of the latter to Oj of the former, until the washings no longer have a saline taste, place it upon a flannel cloth, and express as much water as possible; then mix it with the honey and sugar. Lastly, heat the mixture in a water-bath, until it attains a pilular consistence.—Ph. U. S.)

PILULÆ FERRI COMPOSITÆ, P. ferri cum myrrhâ, *Compound pills of iron, Griffith's Pills.* (F.) *Pilules de fer composées.* (Myrrh. in pulv. ℥ij; sodæ subcarb., ferri sulph. āā ℥j; syrup, q. s. Mix, to form 80 pills.—Ph. U. S.) Tonic. Dose, gr. x to xx.

PILULÆ FERRI IOD'IDI, *Pills of Iodide of iron.* (Ferri sulphat. ℥j; Potass. iodid. ℥iv; tragacanth. pulv. gr. x; sacchar. pulv. ℥ss. Beat with syrup into a mass, to form 40 pills.—Ph. U. S.) Dose, one to three every day a tonic and eutrophic is indicated.

PILULÆ FERRI CUM MYRRHÂ, P. Ferri composi'tæ.

PILULÆ FERRI SULPHA'TIS, *Pills of Sulphate of Iron.* (Ferri sulph. exsic. p. ij; Ext. Taraxac. p. v; Conserv. Rosæ p. ij; Glycyrrhiz. pulv. p. ij.—Ph. E.) Dose, gr. v to gr. xx.

PILULÆ FŒTIDÆ, P. galbani composi'tæ.

PILULÆ GAL'BANI COMPOSITÆ, P. assafœtidæ composi'tæ seu fœ'tidæ seu gummo'sæ seu e gummi seu antispast'icæ seu antihyster'icæ seu myrrhæ composi'tæ, *Compound gal'banum pill, Gum pill.* (Galban., myrrhæ, āā ℥vj; assafœtidæ, ℥ij; syrup. q. s. to form 240 pills.—Ph. U. S.) Antispasmodic and emmenagogue. Dose, gr. x to xx.

PILULÆ GUMMI, P. galbani composi'tæ—p. Gummi guttæ aloeticæ, P. cambogiæ composi'tæ—p. Gummosæ, P. galbani composi'tæ—p. de Guttâ gamandrâ, P. cambogiæ composi'tæ.

PILULÆ EX HELLEBORO ET MYRRHÂ, P. ton'icæ, *Bacher's pills, Tonic pills of Bacher, Pills of hellebore and myrrh.* (Ext. helleb. nig., myrrh. āā ℥j; fol. cardui benedict. in pulv. ℥ij. M.—Ph. P.) Tonic and emmenagogue.

In dropsical, cutaneous, and verminous affections. Dose, gr. iv to gr. viij.

Matthews's pills,—*Starkey's pills*, are formed of rad. helleb. nigr., rad. glycyrrh., sapon. Castill., rad. curcumæ, opii purif., syrup. croci, æā ʒiv; ol. tereb. q. s. ut fiat massa.—Gray.

PILULÆ HYDRAGOGÆ, P. cambogiæ compositæ —p. Hydragogæ Bontii, Pilulæ aloes et cambogiæ.

PILULÆ HYDRARGYRI, P. mercuria'les, *Mercurial* or *Blue pill*, (F.) *Pilules de Mercure*. (Hydrarg. purif. ʒi; conf. rosæ, ʒiiss; glycyrrh. pulv. ʒss. Rub the quicksilver with the confection, until the globules disappear; then add the liquorice powder, and beat the whole into a uniform mass, to be divided into 480 pills.—Ph. U. S.) Antisyphilitic; mercurial;—in large doses, purgative.

A purgative pill, much prescribed by Mr. Abernethy, and called *Abernethy's pill*, consisted of pil. hydrarg. gr. x; jalap. pulv. gr. xx; syrup. rhamni, q. s. ut fiat pil. vj. Two were given at night, and the next morning a wineglassful of infusum sennæ.

PILULÆ HYDRARGYRI CHLORIDI ET OPII, P. Calomelanos et Opii.

PILULÆ HYDRARGYRI CHLORIDI MITIS, *Pills of mild chloride of mercury, Calomel pills*. (Hydrarg. chlorid. mit. ʒss; acaciæ, in pulv. ʒi; syrup. q. s. ut fiat pil. 240.—Ph. U. S.) Each pill contains one grain.

PILULÆ DE HYDRARGYRO, SCAMMO'NIO ET ALOE, vulgo MERCURIA'LES, (F.) *Pilules Mercurielles ou de Mercure, Scammonée et Aloes*. (Hydrarg. purif. ʒi; mellis, ʒxj. Rub until the globules disappear; then add aloes Socot., scammon. æā ʒij; macis, cinnamon. æā ʒij. Make into a mass.—Ph. P.) *Uses*, same as the last, but they are more purgative. Dose, gr. viij to xxx. These pills are nearly the same as the *Pastilles de Renaudot*.

PILULÆ EX HYDRARGYRO MURIATICO MITI CUM SULPHURE STIBIATO AURANTIACO, Pilulæ hydrargyri submuriatis compositæ.

PILULÆ HYDRARGYRI SUBMURIATIS COMPOSITE, P. ex stib'io et hydrargyro seu antiherpeticæ seu ex hydrargyro muriat'io miti cum sulphure stibid'io aurantiaco seu resolventes cum mercurio seu depurantes seu hydrargyri submuriatis, *Pilulæ Hydrargyri chlor'idi compos'itæ, Pilulæ calomelanos compos'itæ, Compound Calomel pill, Compound pills of submuriate of mercury, Calomel pills, Plummer's pills, Red pill*. (Hydrarg. submur., antimon. sulphur. precipitat. sing. ʒij; guaiac. gum resin. contrit. ʒiv; spirit rect. ʒss. Beat together.—Ph. L.) Mercurial, and reputed to be diaphoretic and alterative. Dose, gr. v to x.

Leake's pilula salutaris resembles these. It is used in syphilis.

PILULÆ HYDRARGYRI SUBMURIATIS ET OPII, P. Calomelanos et Opii.

PILULÆ IPECACUAN'HÆ ET OPII, *Pills of Ipecacuanha and Opium*. (Pulv. Ipecac. et Opii, p. iij; Conserv. Rosæ, p. j.—Ph. E.) One grain of opium in about thirteen grains.

PILULÆ IPECACUAN'HÆ CUM SCILLÂ, *Pills of Ipecacuanha with Squill*. (Pulv. Ipecac. comp. ʒiij; Scillæ pulv., Ammoniac. in pulv. æā ʒi; Theriac. q. s.—Ph. L.) Dose, gr. v to x.

PILULÆ MERCURIALES, P. hydrargyri, P. de hydrargyro, scammonio et aloë—p. Doctoris Morton., P. balsamicæ—p. Myrrhæ compositæ, P. Galbani compositæ.

PILULÆ OPIA'TÆ, *Pilulæ Opii* (Ph. U. S.). *P. Thebaicæ, Opium pills, Common night pills, Anodyne pills*, (Prov.) *Squatting pills, Nepen'thes opiatum*, (F.) *Pilules opiacées*. (Opii pulv. ʒj; sapon. gr. xij; to be made into 60 pills.—Ph. U. S.) Each pill contains a grain of opium.

PILULÆ DE EXTRACTO OPII, P. de cynoglossa

—p. ex Oxido stibii et hydrargyri sulphureto nigro compositæ, *Pilulæ antiscrophulosæ*.

PILULÆ PLUMBI OPIA'TÆ, *Opiate Pills of Lead*. (Plumb. acetat., p. vj; Opii, p. j; Conserv. Rosæ, p. j. To be made into four grain pills.—Ph. E.) Each pill contains three grains of acetate of lead.

PILULÆ RESOLVENTES CUM MERCURIO, P. hydrargyri submuriatis compos.—p. de Rhabarbaro, *Pilulæ rhei compositæ*.

The stomachic nostrum, sold under the name of *Moseley's pills*, consists merely of *rhubarb and ginger*.

PILULÆ QUINÆ SULPHA'TIS, *Pills of sulphate of quina*. (Quin. sulph. ʒi; acaciæ, in pulv. ʒij; mel. q. s. ut fiat pilulæ 480.—Ph. U. S.) Each pill contains a grain of the sulphate of quina.

PILULÆ RHEJ, *Pills of Rhubarb*. (Rhej pulv. ʒvj; saponis, ʒij. M. et fiat pil. 120.—Ph. U. S.) Each pill contains three grains of rhubarb.

A good dinner or stomachic pill is made of *Rhej pulv. ʒij; Capsic. pulv. ʒij*; make into a mass with molasses, and divide into 60 pills. Dose, two or three before dinner.

PILULÆ RHEI COMPOS'ITÆ, P. de Rhabarbaro, *Compound rhubarb pills*. (Rhei, pulv. ʒj; aloes, pulv. ʒvj; myrrh. pulv. ʒiv; ol. menthæ pip. fʒss. Beat into a mass, with syrup of orange-peel, to form 240 pills.—Ph. U. S.) Laxative and stomachic. Dose, gr. x to xx.

PILULÆ RHEJ ET FERRI, *Pills of Rhubarb and Iron*. (Ferri sulph. exsiccant. p. iv; Ext. Rhej, p. x; Conserv. Rosæ, p. v. Make into five grain pills.) Dose, as a tonic and laxative, two or three pills.

Griffitt's pills, so called after Dr. S. P. Griffitts, of Philadelphia, who prescribed them as a tonic aperient, were formed as follows:—*Rhej*, pulv. ʒiss; ferri sulph. ʒss; saponis, ʒij; aquæ, q. s. ut fiat massa in pil. xl dividenda. Dose, three or four at bedtime.

PILULÆ RUFI, P. aloes et myrrhæ—p. Salutaris, *Leake's*, see *Pilulæ hydrargyri submuriatis compositæ*—p. Saponaceæ, P. saponis cum opio—p. Saponis compositæ, P. saponis cum opio.

PILULÆ SAPONIS COMPOS'ITÆ, P. Saponaceæ seu saponis compos'itæ, *Pills of soap and opium*, (F.) *Pilules de savon et d'opium*. (Opii, ʒss; sapon. ʒij. M.—Ph. U. S.) Five grains contain one of opium.

The Pharmacopœia of the United States has a form for the *Pilulæ opii, Opium pills*, as well as for the *Pilulæ saponis compositæ*; the only difference between them being in the proportion of the ingredients. See *Pilulæ opiatæ*.

PILULÆ SCILLÆ, P. scillæ compositæ.

PILULÆ SCILLÆ COMPOS'ITÆ, P. scillit'icæ seu scillæ cum zingib'ere seu e scillâ, *Compound squill pill*. (Scillæ, pulv. ʒj; zingib. pulv., ammoniac. pulv. æā ʒij; saponis, ʒiij; syrup. q. s. ut fiat pil. 120.—Ph. U. S.) Dose, two pills. Expectorant and diuretic. Dose, gr. x to xx.

PILULÆ SCILLÆ CUM ZINGIBERE, P. scillæ compos'itæ—p. Scilliticæ, P. scillæ compos'itæ—p. ex Stibio et hydrargyro, P. hydrargyri submur. compos.—p. Stomachicæ, P. aloes et kinæ kinæ.

PILULÆ STRYCH'NLE, *Pills of Strychnia*. (Very pure strychnine, 2 gr.; conserve of roses, ʒss. Make into 24 pills.) One or two for a dose.

PILULÆ STRY'RACIS, P. S. Compos'itæ, *Storax Pills*. (Styracis pur. ʒvi; opii, croci, sing. ʒij.—Ph. E.) Five grains contain one of opium.

PILULÆ SUBLINGUALES, Hypoglottidæ.

PILULÆ DE TREBIN'THINA, *Turpentine Pills*. Made of turpentine boiled in 3 times its weight of water, until, when thrown into cold water, it forms a soft paste, which has the properties of turpentine, and has been administered in gleet, &c.

PILULÆ THEBAICÆ, P. opiatæ — p. Tonicæ, P. ex Helleboro et myrrhâ.

PIL'ULAR, *Pilularis*, (F.) *Pilulaire*, from *pilula*, 'a pill.' Relating to pills, — as 'a *pilular* mass,' 'pilular form,' &c.

PILULÆ, *Pilulæ* — p. *Agrégatives*, see Aggregate — p. *d'Aloes ou aloétiques*, *Pilulæ aloetica* — p. *d'Ammonire de cuivre*, *Pilulæ ammoniuretî cupri* — p. *de Barbier*, see *Pilulæ Aloes et kinæ kinæ* — p. *Bénites de Fuller*, *Pilulæ de aloes et fetidîs* — p. *Cochées*, *Pilulæ aloes et colocynthidis* — p. *de Duchesne*, see *Pilulæ Aloes et kinæ kinæ* — p. *de Fer composées*, *Pilulæ ferri compositæ* — p. *Ferrugineuses de Vallet*, see *Ferri protocarbonas* — p. *Gourmandes*, *Pilulæ aloes et kinæ kinæ* — p. *Indiennes stomachiques de Delacroix*, see *Pilulæ aloes et kinæ kinæ* — p. *de Lartigue*, *Pill*, *Lartigue's* — p. *de Mercure*, *Pilulæ hydrargyri* — p. *de Mercure*, &c., *Pilulæ de hydrargyro*, et scammonio et aloes — p. *Mercurielles*, *Pilulæ de hydrargyro*, scammonio et aloes — p. *Opiacées*, *Pilulæ opiatæ* — p. *Panchymagogues*, *Pilulæ aloes et colocynthidis* — p. *de Savon et d'Opium*, *Pilulæ saponis cum opio* — p. *Universelles*, *Pilulæ aloes et colocynthidis*.

PILULIER (F.), *Pill Machine*. An instrument for rolling and dividing pills. Also the earthen pot in which pills are preserved.

PILUM, *Pistillus*, *Pistillum*, *Hyp'eros*, *Cer'cis*, (F.) *Pilon*. A pestle. A wooden, iron, bell-metal, marble, agate, porcelain, or glass instrument for beating or dividing substances in a mortar.

A *spring pestle* is one attached above to a spring, so as to take off the weight, and thus lessen the labour of pounding.

PILUS, *Capillus*, *Caul*, *Hair*.

PIMELE, *Fat*.

PIMELECCHYSIS, *Pimelorrhœa*.

PIMELICUS, *Fatty*.

PIMEL'ITIS, from *πιμελη*, 'fat,' and *itis*, denoting inflammation. Inflammation of the adipous tissue.

PIMELODES, *Fatty*.

PIMELO'MA, from *πιμελη*, 'fat.' A fatty swelling.

PIMELORRHŒ'A, *Pimelecchysis*, from *πιμελη*, 'fat,' and *ρρω*, 'I flow.' A morbid discharge or disappearance of fat.

PIMELORTHOPNŒ'A, *Piorthopnœ'a*; from *πιμελη*, 'fat,' *ορθος*, 'upright,' and *πνευ*, 'to breathe.' *Dyspnœa*, practicable only in the erect attitude, owing to fat.

PIMELO'SIS, *Obesitas nim'ia*, from *πιμελη*, 'fat.' Conversion into, or formation of, fat, — as *Pimelo'sis hepatic'a*, 'fatty degeneration of the liver.'

PIMELOSIS HEPATICA, *Adiposis hepatica* — p. *Nimia*, see *Polysarcia*.

PIMENT, *Capsicum annuum* — p. *d'Eau*, *Polygonum hydropiper* — p. *Royal*, *Myrica gale*.

PIMENTA, see *Myrtus pimenta*.

PIMENTÆ BACCÆ, see *Myrtus pimenta*.

PIMENTO, see *Myrtus pimenta*.

PIMPERNEL, *BLUE*, *Scutellaria lateriflora* — p. *Red*, *Anagallis* — p. *Scarlet*, *Anagallis arvensis* — p. *Water*, *Veronica beccabunga*.

PIMPILIM, *Piper longum*.

PIMPINEL, (*bipinella* or *bipennula*, from the double pennate order of its leaves,) see *Pimpinella*.

PIMPINEL ITALIAN, *Sanguisorba officinalis*.

PIMPINELLA ALBA, P. saxifraga — p. *Angelicifolia*, *Ligusticum podagraria*.

PIMPINEL'LA ANI'SUM, *Anise plant*, *Anisum* (Ph. U. S.), *A. officina'te seu vulgare Sison ani'sum*, *A'pinum ani'sum*, *Sola'men vulgare rum*, *Anes'sum*, (F.) *Anis*, *Boucage anis*. *Ord.* Umbelliferæ. *Secz. Syst.* Pentandria Digynia. A native of Egypt. The seeds, *Ani'sum*, (Ph. U. S.) *Sem'ina*

Ani'si, *Ani'seed*, (Old Eng.) *Aneys*, have an aromatic odour; and a sweetish, warm, grateful taste. They are carminative, and used in dyspepsia and in tormina of infants. Dose, gr. xv to ʒj, bruised. The oil, — **OLEUM ANI'SI**, (F.) *Huile d'anis* — is officinal. Dose, gtt. v to xv. Most of the oil used in this country under the name of *Oil of Anise* is said to be obtained from *Illicium Anisatum*.

Aqua ani'si, *Anise water*, (Ph. D.) is made by mixing a fluidounce of *essence of anise*, with half a gallon (Imp. meas.) of *distilled water*, and filtering through paper.

PIMPINELLA, GREATER, P. magna — p. *Hircina*, P. saxifraga — p. *Laterifolia*, *Sion ammi*.

PIMPINEL'LA MAGNA seu *nigra* seu *major* seu *rubra*; *Greater Pimpinella*; *Tragosel'num majus* seu *majus*, *Daucus*, *Cyan'opus*, (F.) *Boucage majeur*. The root has been extolled as diuretic and resolvent, as well as in erysipelatus ulcerations, tinea capitis, rheumatism, &c.

PIMPINELLA MAJOR, P. magna — p. *Nigra*, P. magna — p. *Nostras*, P. saxifraga — p. *Officinalis*, *Sanguisorba officinalis* — p. *Rubra*, P. magna.

PIMPINELLA SAXIF'RAGA, *Sax'ifrage*, *Burnet sax'ifrage*, *Pote'rimum sanguisor'ba*, *Sorbastrel'la*, *Tragosel'num*, *T. saxif'raga*, *Pimpinella hirci'na* seu *umbellifera* seu *alba* seu *nostras*, (F.) *Boucage mineur*, *Petit B.*, *Pimprenelle*, *Rompt-pierre*. The root has an unpleasant smell, and hot, pungent, bitterish taste. It has been recommended as a stomachic; and as a stimulating gargle in paralysis of the tongue.

PIMPINELLA UMBELLIFERA, P. saxifraga.

PIMPLE, *Papula*.

PIMPLED, *Papulose*.

PIMPRENELLE, *Pimpinella saxifraga* — p. *Noire*, *Sanguisorba officinalis*.

PIN. Perhaps from *pennum*, low Latin: or from *spina* [?], *Spina fer'rea*, *Sp'innula*, *Acus capita'ta*, (F.) *Épingle*. An iron or brass instrument, generally of a small size, pointed at one extremity, and having a head at the other. It is used, in Surgery, to fix rollers and dressings; and occasionally in sutures.

PIN AND WEB, *Caligo*.

PIN A PIGNON, see *Pinus picea*.

PINASTELLUM, *Peucedanum*.

PINASTER, *Pinus sylvestris*.

PINBONE, *Ischion*.

PINCE, Forceps — p. *à Anneaux*, see *Forceps* — p. *à Dissection*, see *Forceps* — p. *à Ligature*, see *Forceps* — p. *Lithodrassique*, see *Lithodrassic* — p. *Pansemee*, see *Forceps*.

PINCÉ, *Pinched*.

PINCÉE, *Pugillus*.

PINCERS, *Forceps*.

PINCETTE, *Forceps*.

PINCHE, *Contractus*, *Retrac'tus*, (F.) *Pincé*, *Grippé*. An epithet applied to the face, when the features are contracted or shrunken; as in violent abdominal affections, or during intense pain.

PINCKNEY'A PUBENS, P. *Pubes'cens*, *Georgia Bark*, *Bitter Bark*, *Florida Bark*, *Fever tree*. This bark has been used in Georgia in the cure of intermittents, and successfully. It is a powerful bitter. Dose of the powder, ʒj.

PINDARS, *Arachis Hypogea*.

PINE APPLE, *Bromelia ananas* — p. *Aphernousli*, *Pinus cembra* — p. *Ground*, *Lycopodium complanatum* — p. *Ground*, stinking, *Camphorosma Mospeliaca* — p. *Loblolly*, *Pinus tæda* — p. *Mountain*, see *Pinus mughos* — p. *Mugho*, see *Pinus mughos* — p. *Prince's*, *Pyrola umbellata* — p. *Sap*, *American*, *Hypopitys lanuginosa* — p. *Stone*, *Pinus pinea* — p. *Sugar*, see *Arrow Root* — p. *Yellow*, *Pinus palustris*.

PINEA, *Pinus pinea*.

PINE'AL, *Pineal'is*, from *pinus*, 'a pine.' That which resembles a pine-apple.

PINEAL GLAND, *Glandula pineal'is*, *Cerebral epiph'ysis*, *Cona'rrium*, *Cono'ides corpus*, *Corpus turbina'tum*, *Penis* seu *Virga* seu *Turbo cer'ebr'i*, is a small body, of a conical shape; pale red or grayish colour; and soft consistence; situate between the fornix and the tubercula quadrigemina. It almost always contains sabulous particles, *Sab'ulum cona'rrii*, *Brain Sand*, *Pine'al Sand*. When these are grouped together over the base of the gland, they form the *Acer'vulus Cer'ebr'i* of Sömmerring, *Acer'vuli* seu *Lapilli glandulae pineal'is*. From its anterior parts arise two medullary striae, which proceed over the posterior commissure; coast along the optic thalami, and unite at the anterior pillar of the fornix, — the *Habe'næ*, *Huben'ulæ* or *reins* of the pineal gland — *Peduncul'i cona'rrii*, see Peduncles of the Pineal Gland.

The uses of the pineal gland are unknown. Descartes supposed it to be the seat of the soul!

PINEAL SAND, see Pineal gland.

PINEI, see *Pinus pinea*.

PINEOLI, see *Pinus pinea*.

PINEUS PURGANS, *Jatropha curcas*.

PINEWEED, *Hypericum srothra*.

PINGUEC'ULA, *Pteryg'ium pingue* seu *lard'acum*, from *pinguis*, 'fat,' 'fatty.' A small, whitish-yellow tumour in the sclerotic conjunctiva and subjacent areolar tissue, close to the margin of the cornea on its nasal or temporal side; so called from its being supposed, but erroneously, to be of a fatty nature.

PINGUEDO, Fat — p. Renalis, Nephridion.

PINGUIC'ULA VULGA'RIS, (*pinguis*, 'fat,') *P. alp'i'na*, *Sanic'ula monta'na* seu *Eboracen'sis*, *Vi'ola palus'tris*, *Dodecath'eon Plin'i'i*, *Butterwort*, *Yorkshire San'icle*. Ord. *Lentibulaceæ*. *Sec. Syst.* *Diandra Monogynia*. The unctuosity of this plant has caused it be applied to chaps, and as a pomatum to the hair. Decoctions of the leaves, in broths, are used by the common people in Wales as a cathartic.

PINGUID, Fatty.

PINGUIDINOUS, Fatty.

PINGUIN, *Bromelia pinguin*.

PINGUITUDO, *Polysarcia adiposa*.

PINHOLE PUPIL, see *Pupul*, pinhole.

PINHONES INDICI, *Jatropha curcas*.

PINK, *CAROLINA*, *Spigelia Marilandica*.

PINK DYE. *Stripped safflower*, \mathfrak{J} , *subcarb.* of *potass.* gr. xvij, *spirit of wine*, \mathfrak{J} vij; digest for two hours; add *distilled water*, \mathfrak{J} ij; digest for two hours more, and add *distilled vinegar* or *lemon juice* q. s., to reduce it to a fine rose-colour. Used as a cosmetic.

PINK GROUND, *Silene Virginica* — p. *Indian*, *Spigelia Marilandica* — p. *Wild*, *Sileno Virginica*.

PINKROOT, *Spigelia marilandica* — p. *Demerara*, *Spigelia anhelmia*.

PINNA, *Ala*, *Pavilion* of the ear — p. *Marina*, see *Bissus*.

PINNACULUM FORNICIS GUTTURALIS, *Uvula*.

PINNÆ HEPATIS, Lobes of the liver — p. *Naris*, see *Nasus*.

PINNULA, *Aileron*.

PINNULÆ HEPATIS, Lobes of the liver.

PINO'LI (S.). A preparation used for subsistence on long journeys in the West. It is parched corn, beaten or ground very fine, and sweetened with sugar, to be used with water, and drunk on the march. It is the *cold flour* of the Indians, and early Western pioneers.

PIÑONCILLO TREE, *Castilignia lobata*.

PINSWEAL, *Furunculus*.

PINT, *Octarius*.

PINTA, from (S.) *paintar*, 'to paint.' *Blue stain*: a disease, which is said to prevail in Mexico, and to be a variety of *Pityriasis versicolor*.

PINUS A'BIES. *P. excel'sa* seu *picca*, *A'bies*, *A. rubra* seu *excelsa* seu *picca*, *Ell'atê thele'a*, *Pice'a*, *Norway Spruce Fir*, *Yew-leaved Fir*. *Nat. Ord.* *Coniferæ*. *Sex. Syst.* *Monœcia Monadelphica*. The tops are used in making *Spruce Beer*.

Essence of Spruce, *Essent'ia Abie'tis*, is a fluid extract, prepared by decoction from the twigs of this species of fir. From this is made *Spruce Beer*.

This fir affords the Burgundy pitch and common frankincense. 1. *Bur'gundy* or *White pitch*, *Pix Burgun'dica* seu *alba* seu *ar'da* seu *abiet'i'na* seu *abie'tis* (Ph. U. S.), *Res'i'na abie'tis hu'mida*, *R. alba humida*, *Pini abie'tis resina sponte concre'ta*, (F.) *Poix blanche* ou *grasse* ou *jaune* ou *de Bourgogne*. This prepared concrete juice is of a close consistence, rather soft, of a reddish-brown colour, and not unpleasant smell. It is very adhesive to the skin; and, consequently, forms excellent plasters for remaining upon the part for some time; — as in cases of affections of the chest. 2. *Abie'tis Res'i'na* (Ph. L. since 1809), *Common Frankincense*, *Perrosin*, *Thus*, *Th. femini'num* seu *vulgarè*, *Oli'banum vulgarè* seu *sykes'trè*, *Resina abictis sicca*, *Resin of the Spruce Fir*. It is solid, dry, brittle; externally, brownish-yellow; internally, whitish. Used in plasters like the last.

PINUS ABIES, see *P. picea* — p. *Alba*, *P. picea*.

PINUS BALSAME'A, *Abies balsame'a* seu *balsamif'era*, *Peu'cea balsame'a*, *Balsam fir*. The tree which affords the *Canada Balsam*, *Balsamum Canaden'se* seu *de Can'ada*, *Resina strobili'na*, *Terebinth'ina Canaden'sis* seu *Pini balsame'æ*, *Canada Turpentine* or *Balsam*, *Balsam of Fir*, (F.) *Baume de Canada*, is one of the purest turpentine. It has the common properties of those substances.

PINUS CANADEN'SIS, *Abies Canaden'sis*, *Hemlock*, *Hemlock Spruce*. A tree, which is abundant in Canada, Nova Scotia, and the more northern parts of New England, and is found in the elevated and mountainous regions of the Middle States. The pitch — *Pix Canadensis*, *Canada Pitch*, *Hemlock Pitch* — obtained from it is commonly known under the name *Hemlock Gum*.

PINUS CANDICANS, *P. Picea*.

PINUS CEMBRA, *P. Monta'na*, *Aphernous'li Pine*. It yields an agreeably scented turpentine: — the *Carpathian Balsam*, *Balsamum Carpath'icum* seu *Lib'ani*, *Carpath'icum*, *Briançon Turpentine*. The nuts, *Cembro nuts*, *Nuclei Cembrae*, have an eatable kernel, and yield oil. The shoots yield *Riga Balsam* by distillation.

PINUS DAMAR'RA, *Ag'athis Damarra*, grows in the East India Islands. The juice speedily concretes into a very hard resin, — the *Damarra turpentine*.

PINUS EXCELSA, *P. abies* — p. *Gallica*, *P. picea*.

PINUS LARIX, *Abies larix*, *Laric*, *L. commu'nis* seu *decid'ua* seu *Europa'ea* seu *pyramida'lis*. The *Larch*, (F.) *Mélèze*. From this tree exudes *Or'emberg gum*, *Briançon manna*, *Gummi lar'icis* seu *Oreburgen'se* seu *Uralen'se*, *Manna Briganti'na* seu *laric'ea*. It also yields, by boring, *Common Venice Turpentine*, *Resina Lar'icis*. *Terebinthina Ven'eta* seu *laric'ina*, *Pini Lar'icis resina liq'uida*, (F.) *Térébenthine de Vénise* ou *de Mé-lèze*. It is usually thinner than the other sorts of turpentine.

PINUS MUGHOS. The *Mountain* or *Mugho Pine*, *Pinus Pumil'ia*. From the extremities of the branches exudes the *Res'i'na Strobili'na*, of the Germans, or *Hungarian Balsam*. It is also obtained, by expression, from the cones. By dis-

tillation, the Hungarian balsam affords the *Krumholz* oil, *Oleum Templinum*.

PINUS PALUSTRIS, see *Pinus sylvestris*.

PINUS PICE'A, *P. Abies*, *A'bies*, *A. pice'a* seu *pectinata* seu *Gal'lica* seu *alba* seu *can'dicans* seu *vulgaris* seu *taxifolia*, *European Silver Fir Tree*, *El'ate*, (F.) *Sapin commun*. By piercing the tubercles of the bark of this fir, the *Strasburg Turpentine* is obtained:—the *Resi'na Abietis* (Ph. L. before 1809), *Oleum Abietis*, *Terebinth'ina Argentoratensis*.

PINUS PINASTER, see *P. sylvestris*.

PINUS PI'NEA, *Stone Pine*, *Pinea*, *Pinus*, *P. uber'rima* seu *sati'va*. The nuts, *Zirbel nuts*, *Pine nuts*, *Nu'clei Pi'neæ*, *Pinei*, *Pine'oli*, (F.) *Pin à pignons*, are eaten raw, or preserved like almonds. They are, also, used in emulsions.

PINUS PUMILIO, see *Pinus Mughos*—*p. Sativa*, *P. pinea*.

PINUS SYLVESTRIS, *Pinas'ter*, *Peuce*, *Scotch Fir*. This pine, as well as *P. marit'ima* (*P. Pinaster*), and other species of *Pinus*, affords common turpentine and its oil, resin, tar, and pitch. 1. *Common Turpentine of Europe*, *Terebinth'ina*, *T. vulgaris* seu *communis*, *Resina pini*, *Bijon*, *Horse Turpentine*, *Bordeaux Turpentine*, (F.) *Térébinthine de Bordeaux*, *Térébinthine commune*, is obtained by wounding the tree in hot weather. It is used, chiefly, as a dressing for wounds, &c., in horses, and for the distillation of the oil, (see *Oleum Terebinthinæ*.) The *white Turpentine*, or *common Turpentine of America*—*Terebinth'ina*, Ph. U. S.—is produced chiefly from *Pinus palustris*, *Yellow pine*, and *P. tæda*, *Loblolly pine*, and perhaps from other species inhabiting the Southern States. When the oil is distilled with water, yellow resin, or *Rosin*, (*Resi'na*, Ph. U. S.)—*Resina flava*—is left, which is only used in the formation of ointments and plasters. If without the addition of water, the residuum is *common resin* or *Colophony*. 2. When the cold begins to check the exudation of the common turpentine, part of it concretes in the wounds. This is called, in France, *Gallipot*, *Barras*; and *White Rosin*, *Resina alba*, when hardened after long exposure to the air. 3. When the old trees are subjected to distillation, in a coarse manner, Tar is obtained—*Hygropissos*, *Pissa*, *Pix ce'dria* seu *liq'uida*, *Resi'na pini empyreumatica liq'uida*, *Terebinth'ina empyreumatica*, *Alchitron*, *Alchit'ra*, *Cedria*, (F.) *Goudron*, *G. végétale*, *Poiz liquide*, *Brai liquide*. *Tar water*, *Aqua Pice'a* seu *Picis*, *Infu'sum Picis liq'uida* seu *Picis empyreumatica liq'uida*, *Po'tio pice'a*, (F.) *Eau de Goudron*, which is made by mixing two pints of tar with a gallon of water, stirring with a wooden rod for fifteen minutes, and, when the tar has subsided, straining and keeping in well stopped bottles, was, at one time, a fashionable remedy in numerous complaints, and its use has been revived, since its virtues have been presumed to be owing to creasote. It is employed chiefly in pulmonary affections, and the vapour has been recommended in phthisis and other diseases of the lungs. It is used externally as a detergent. A wine or beer of tar, *Tarbeer*, *Jews'beer*, has been employed in Philadelphia in similar cases. It may be made by adding to tar enough beer to saturate it, mixing, and allowing them to macerate for three days, with occasional agitation. The dose is a table-spoonful. 4. *Common Pitch*, *Pix nigra*, *Black Pitch*, *Burnea*, *Burnia*, *Stone Pitch*, *Pix sicca*, *P. atra*, *P. navalis*, *Zopissa*, *Palimpse'sa*, *P. ar'ida* (Ph. L. before 1809), (F.) *Poiz navale*, *P. noire*, is obtained by inspissating tar. It is used only as a resolvent in plasters.

PINUS TÆDA, see *P. sylvestris*—*p. Taxifolia*,

P. picea—*p. Uberrima*, *Pinus pinea*—*p. Vulgaris*, *P. picea*.

PIONE, *Pæonia*.

PIONY, *Pæonia*.

PIORTHOPNŒA, *Pimelorthopnæa*.

PIOULQUES (F.). A kind of sucking-pump, invented by Louis, for extracting water that had entered internal cavities, in cases of drowning. A useless instrument.

PIP, *Syphilis*.

PIPE-PLANT, *Monotropa uniflora*.

PIPER, *πείπερι*, see *Piper nigrum*.

PIPER ALBUM, *Leucopiper*, *White Pepper*, is black pepper freed from its cuticle.

PIPER ANGSTIFOLIUM, *Matico*—*p. Aromaticum*, *P. nigrum*—*p. Betel*, *Betel*—*p. Brazilianum*, *Capsicum annuum*—*p. Calecuticum*, *Capsicum annuum*.

PIPER CAPENSE, a South African species, has all the properties of the peppers, and, in appearance and taste, greatly resembles enebbs. It possesses, too, similar virtues.

PIPER CARYOPHYLLATUM, see *Myrtus pimenta*—*p. Caudatum*, *P. cubeba*—*p. Chiapæ*, see *Myrtus pimenta*.

PIPER CUBEBA, *Perse'a* seu *Laurus cubeba*, *Litsæa cubeba* seu *piperi'ta*. *Ord.* *Piperaceæ*. A native of Java and Guinea. The odour of these berries—*Cubeba* (Ph. U. S.), *Com'peper*, *Compeba*, *Cubal sini*, *Piper caudatum*, *Baccæ Piperis glabri*, *Cubeb* or *Tailed Pepper*, *Cama'mus*, (F.) *Poivre-à-queue*, *Quabebe*—is aromatic; taste at first cooling, afterwards pungent. The active principle is an essential oil—*Oleum Cubebæ*, oil of cubeb—which is official in the Pharm. U. S. The properties of the cubeb are stimulant and purgative. It is used only in gonorrhœa. Dose, from ℥j to ʒj, in powder, three or four times a day; of the volatile oil, 10 or 12 drops.

'*Turkey yellow berries*,'—the dried fruit of the *Rhamnus Catharticus*—are often substituted for cubeb.

PIPER ELONGATUM, *Matico*.

PIPER GUINEENSE, *Capsicum annuum*—*p. Hispanicum*, *Capsicum*—*p. Indicum*, *Capsicum annuum*—*p. Jamaicense*, see *Myrtus pimenta*.

PIPER LONGUM, *Macropiper*, *Acopat'li*, *Caturip'ali*, *Pim'plim*, *Chav'ica Roxburghii*, *Long Pepper*, (F.) *Poivre long*. As we receive the berries, they consist of the unripe fruit dried in the sun; and are small, round grains, disposed spirally on a cylindrical receptacle. They are stimulant, carminative, and tonic, like the other peppers. Dose, gr. v to ℥j.

PIPER LUSITANICUM, *Capsicum annuum*—*p. Murale*, *Sedum*.

PIPER METHISTICUM, see *Ava*.

PIPER NIGRUM, *Melanopiper*, *Molagoco'di*, *Lada*, *Piper aromaticum*, *Black Pepper*, (F.) *Poivre noir*. *Black pepper*, *Piper* (Ph. U. S.), is the unripe fruit dried in the sun. *Virtues*, same as those of the other peppers. When freed from its husk by mechanical trituration it constitutes *Fulton's decorticated pepper*.

PIPER ODORATUM JAMAICENSE, see *Myrtus pimenta*—*p. Tabasum*, see *Myrtus pimenta*—*p. Turcicum*, *Capsicum annuum*.

PIPERINA, *Piperin'um*, *Piper'ine*, *Piperin*, from *piper*, 'pepper.' A resinoid substance, obtained from the piper nigrum by M. Erstädt, in which a part of the virtues of the pepper resides. It has been employed, like the quinia, in intermittents, and successfully.

PIPEROID, *Piperoid'um*, *Zingib'erin*, from *piper*, 'pepper,' and *eidōs*, 'resemblance.' A yellow syrupy mass obtained by exhausting ginger root by ether. It is soluble in ether, alcohol, and oils, and may be given in tincture, sugar, lozenge, or syrup, in cases where ginger is indicated.

PIPEROPASTUS, from *πικρι*, 'pepper,' and *πασσιν*, 'to strew.' Strewed with pepper,—socks, for example, where it is desirable to excite the surface of the feet.

PIPETTE. 'A small pipe.' In Pharmacy, a small tube terminating in a perforated point, which is passed into a liquid to be removed— from the surface of a precipitate, for example. The liquid is drawn into the tube by applying the mouth to the free extremity.

PIPINNA, *Men'tula parva*. A small penis.

PIPPERIDGE BUSH, see *Oxyeantha Galeni*.

PIPSISSEWA, *Pyrola umbellata*—p. Spotted, *Pyrola maculata*—p. White, *Pyrola maculata*.

PIPTONYCHIA, *Onychoptosis*.

PIPTOSTEGIA OPERCULATA, see *Batata de purga*—p. *Pisonis*, *Convolvulus mechoacan*.

PIQUETÉ, see *Sablé*.

PIQURE, *Puncture*, *Wound*, *punctured*.

PIRTLING, *Slavering*.

PIRUS, see *Pyrus malus*.

PISA, (CLIMATE OF.) Pisa has long been celebrated as one of the most favourable climates in Italy for the consumptive. It is genial, but somewhat oppressive and damp. It is softer than that of Nice, but not so warm; less soft, but less oppressive than that of Rome.

PISCIARELLI, MINERAL WATERS OF. A spring at Monte Secco, in Italy, between Lake Agnano and Solfatara. It is thermal (100° Fahr.), sulphureous, and carbonated; and is chiefly used in old ulcers, leucorrhœa, chronic diarrhœa, and in cutaneous affections.

PISCIDIA ERYTHRI'NA, *Jamaica Dog-wood*. *Ord. Leguminosæ*. A small branching tree, common in most of the West India Islands; *Diadelphia Decandria* of Linnæus. It is used in the West Indies to poison fish. It appears to be an acro-narcotic, and has been used in the form of a tincture of the bark of the root in toothache.

PISCINA, *Baignoire*.

PISCIVOROUS, *Piscivorus*, *Ichthyoph'agus*, *Ichthyoph'agus*, from *piscis*, 'a fish,' and *voro*, 'I eat.' Feeding or subsisting on fish.

PISIFORM, *Pisiformis*, from *pisum*, 'a pea,' and *forma*, 'shape.' Pealike, pea-shaped.

PISIFORMĒ, *Os*, *Os lenticularĒ seu orbiculārē seu extra ord'inem carpi*, (*Ē Os hors du rang*, is the fourth bone of the first row of the carpus. It is round, and gives attachment to the tendon of the cubitalis anterior, and to the anterior transverse ligament of the carpus. It is articulated, behind, with the os cuneiforme.

PISO, *Mortar*.

PISSA, see *Pinus sylvestris*.

PISSASPHAL'TUS, *Pissasphaltum*, *Mineral Pitch*, from *πισσα*, 'pitch,' and *ασφαλτος*, 'bitumen.' (F.) *Pois minérale*. A thicker kind of *Petroleum* or *Rock oil*; formerly employed as a vulnerary. It is synonymous with *Glutinous bitumen*, *Malta bitumen*, and *Mineral tar*.

PISSELEUM, *Oleum Pic'inum*, from *πισσα*, 'pitch,' and *ελαιον*, 'oil.' An oily matter obtained from boiling pitch, and used for the same purposes as tar.

PISSELEUM INDICUM, *Petroleum*.

PISSEMENT DE PUS, *Pyuria*—p. *de Sang*, *Hæmaturia*.

PISSENLIT, *Leontodon taraxacum*.

PISSE-SANG, *Fumaria*.

PISSE'ROS, from *πισσα*, 'pitch.' Ancient name of a cerate, prepared of *olive oil*, *oil of roses*, and *dried pitch*. It was, also, called *Ceratum pica'tum*, and *C. tetraphar'macum*.—*Hippocrates*.

PISSI'TES, *Vinum pica'tum*. Same etymon.

A wine prepared from tar and the must of the grape. It was regarded to be stomachic.

PISSOSIS, *Malacia*.

PISSWEED, *Anthemis cotula*.

PISTACHIO NUTS, see *Arachis hypogea*, *Pistacia vera*.

PISTACIA CHIA, *P. lentiscus*.

PISTA'CIA LENTIS'CUS, *P. Chia*, *Terebin'thus lentiscus*, *Lentiscus vulg'aris*; the *Mastich Tree*, *Ord. Terebinthaceæ*. The wood of this tree abounds with the resinous principles of mastich; and a tincture made from it has been used in the cure of dyspeptic affections, gout, and dysentery. It yields, by incision, the resin *Mastich*, *Resi'na Lentis'cina*, *Men'frigē*, *Mas'tichē*, *Mastix*, *Pistacia Lentis'ci Resi'na*. This resin has an agreeable smell when heated: is almost insipid; in globular, irregular, yellowish, semi-transparent masses; soluble in ether; partially so in alcohol. It is stimulant, and has been used in old coughs, and gleet, and is chewed to sweeten the breath. It is sometimes, also, employed to stop holes in carious teeth.

Oil of Mastich, *Mastichel'on*, *Oleum Mastich'inum*, is mentioned by Dioscorides.

PISTACIA NARBONENSIS, *P. lentiscus*—p. *Reticulata*, *P. lentiscus*.

PISTACIA TEREBIN'THUS, *P. Narbonensis seu reticulata seu vera*, *Turpentine Tree*, *Habel-Kalimbat*, *Terebinthus vulg'aris*, *Terminthos*. The tree which affords the *Cyprus Turpentine*, *Resi'na Terebin'thi*, *Terebin'thina vera* seu *Chia* seu *Cyp'ria*, (F.) *Térébinthine de Chio*. This substance is classed amongst the resins. It is procured by wounding the bark of the trunk. The best Chio turpentine is of about the consistence of honey; very tenacious, clear, and almost transparent; of a white colour inclining to yellow, and of a fragrant smell; moderately warm to the taste, but free from acrimony and bitterness. It resembles in virtues the other turpentine.

PISTACIA VERA, *πισακια*. Name of the tree which affords the *Nux Pistacia*. *Pistachio nuts* have a sweetish, unctuous taste, resembling that of sweet almonds. Like these, they afford an oil, and may be formed into an emulsion.

PISTILLUM, *Pilum*.

PISTOLOCHIA, *Aristolochia pistilochia*.

PISTORIENSIS GLADIUM, *Bistouri*.

PISUM, *πισον*, *P. sativum*, *Pea*, *Garden pea*, (F.) *Pois*, *P. cultivē*. The seeds of the pea, *Ord. Leguminosæ*, *Sex. Syst. Diadelphia Decandria*, are much employed as an aliment, both in the fresh and dried state. They are farinaceous, and, when dried, not easy of digestion.

PIT, *Pock mark*—p. of the *Stomach*, *Fossette du cœur*.

PITAY'A BARK. This bark of *Cincho'na pitay'a*, *Ord. Cinchonaceæ*, is preferred in Colombia to any other. It contains a new vegetable alkali, to which the name *Pitayine* has been given.

PITAYINE, see *Pitaya bark*.

PITCAITHLEY, MINERAL WATERS OF. These saline springs, at *Pitcaithley*, about four miles from *Perth*, *Scotland*, contain chlorides of sodium and calcium.

PITCH, *Colophonia*—p. *Black*, see *Pinus sylvestris*—p. *Burgundy*, see *Pinus abies*—p. *Canada*, see *Pinus Canadensis*.

PITCH CAP, see *Depilatory*.

PITCH, COMMON, *Pinus sylvestris*—p. *Hemlock*, see *Pinus Canadensis*—p. *Jew's*, *Asphaltum*—p. *Mineral*, *Pissasphaltum*.

PITCH PLASTER, see *Depilatory*, *Emplastrum pici*.

PITCH, STONE, see *Pinus sylvestris*—p. *White*, see *Pinus abies*.

PITHYRIASIS, Pityriasis.
 PITHYRINUS, Acerosus, Furfuraceus.
 PITCH/CIUM. A pitch plaster, from *πιττα*, 'pitch.'

PITTING, Pock mark.

PITIOSIS, Malacia.

PITTO'TA. Medicines in which pitch is the chief ingredient.

PITTSBURG, MINERAL WATERS OF. A chalybeate mineral spring, situate about four miles south-west of Pittsburg, in Pennsylvania. It contains chloride of sodium, chloride of magnesium, oxide of iron, sulphate of lime, and carbonic acid.

PITUITA, Mucus, Phlegm—p. Narium, Nasal mucus.

PITU'ITARY, *Pituitarius*, (F.) *Pituitaire*, from *pituita*, 'phlegm.' Concerned in the secretion of mucus or phlegm. A name given to several parts.

PITUITARY BODY, P. Gland—p. Fossa, Sella turcica.

PITUITARY GLAND, *Glandula Pituitosa* seu *pituitaria* seu *basilaris*, *Lacuna* seu *Appendicula cerebri*, *Senti'na*, *Hypoph'ysis* seu *Appendix cerebri*, *Corpus pituitar'e*, *Pituitary body*;—*Appendice sus-spheno'idale du cerveau*, (Ch.) A small, round body; the anterior portion of which is of a cineritious yellow hue, and the posterior, which is smaller, is whitish and pulpy. Its functions are unknown.

PITUITARY MEMBRANE, *Schneide'rian Membrane*, *Membra'na pituitaria* seu *olfactoria*. The mucous membrane which lines the nasal fossæ, and extends to the different cavities communicating with the nose. In the nasal fossæ, the membrane appears formed of two layers, intimately united;—the one in contact with the bone is fibrous;—the other is free at one surface. The latter is a mucous membrane, on which papillæ are not easily distinguishable, but which contains them, as well as a number of very small mucous follicles, that open into the cavity of the nares. On penetrating the maxillary, frontal, sphenoidal, and ethmoidal sinuses, the membrane becomes very thin, transparent, less vascular, and seems reduced to its mucous layer. The pituitary membrane receives the impression of odours, by means of the expansion of the olfactory nerves upon it. It is the seat of smell.

PITUITA, Mucus.

PITU'ITOUS, *Pituitosus*; from *pituita*, 'mucus or phlegm.' Consisting of, or resembling, or full of mucus or phlegm.

PITYRIASIS, from *πυρρον*, 'bran;' *Lepidos'is* *Pityriasis*, *Pityris'ma*, *Pithyri'asis*, *Herpes furfuraceus* seu *farinosus*, *Porri'go* (of some), *Tinea furfuracea* seu *porrigino'sa*, *Furfuratio*, *Furfuris'ca*, *Dandriff*, *Dandruff*, (Sc.) *Luss*, (Prov.) *Room*, *Rummet*, (F.) *Teigne*, *Dartre*, *D. furfuracée volante*;—a very superficial affection; characterized by irregular patches of thin scales, which repeatedly exfoliate and recur; but which never form crusts, or are accompanied with exoriations. It is not contagious. It occurs under three or four varieties of form.

PITYRIASIS, *Porri'go*—p. *Nigra*, *Melasma*—p. *Versicolor*, *Chloasma*.

PITYRISMA, Pityriasis.

PITYROIDES, Furfuraceus.

PITYRON, Furfur.

PIVOINE, Pæonia.

PIV'OTING. In dentistry, an operation, which consists in fastening in a new crown upon the root of a tooth by means of a piece of gold wire, called 'a pivot.'

PIX, Sperm—p. *Abietina*, see *Pinus abies*—p. *Abietis*, see *Pinus abies*—p. *Alba*, see *Pinus abies*—p. *Arida*, see *Pinus abies*, and *Pinus syl-*

vestris—p. *Atra*, see *Pinus sylvestris*—p. *Brutia*, *Brutia*—p. *Burgundica*, see *Pinus abies*—p. *Canadensis*, see *Pinus Canadensis*—p. *Cedria*, see *Pinus sylvestris*—p. *Græca*, *Colophonina*—p. *Liquida*, see *Pinus sylvestris*—p. *Navalis*, see *Pinus sylvestris*—p. *Nigra*, see *Pinus sylvestris*—p. *Sicca*, see *Pinus sylvestris*.

PLACE'BO, 'I will please,' from *placeo*. A medicine, prescribed rather to satisfy the patient than with any expectation of its effecting a cure.

PLACEN'TA, *πλάκος*, *πλάκωντος*. A Latin word, signifying a *Cake*. *P. uteri* seu *uteri'na* seu *uteri car'neæ*, *Hepar* seu *Jecur uteri'mum*, *Caro seu Affusio orbicularis*, *Mazo*. A soft, spongy, vascular body, adherent to the uterus, and connected with the fœtus by the umbilical cord. It is not in existence during the first period of the embryo state, but its formation commences perhaps with the arrival of the embryo in the uterus. It is generally considered to have two portions, one *fœtal*, and the other *maternal*. The fœtal consists of highly vascular villi and tufts, which contain the insulating loops of the umbilical arteries and umbilical vein of the fœtus. The maternal portion is considered by Dr. Reid to consist, essentially, of a large sac formed by the inner coat of the vascular system of the mother, into which the maternal blood is poured by the curling arteries of the uterus, and from which it is returned by the utero-placental veins. The tufts and villi of the fœtal placenta are ensheathed by this inner coat of the maternal vascular system; and, according to Prof. Goodsir, two distinct sets of nucleated cells—one maternal and the other fœtal—separate the maternal and fœtal portions where they come in contact, one set of which are probably, he thinks, concerned in the separation of nutritive matter from the maternal blood, and the other destined to convey it into the vessels of the fœtus. The placenta is formed of several *lobes* or *cotyledons*, which can be readily distinguished from each other on the uterine surface; but towards the fœtal surface are con-founded into one mass. It is composed of the umbilical vessels, areolar tissue, and whitish, resisting filaments, which are vascular ramifications obliterated. Lymphatic vessels have also been presumed to exist in it; and nerves have been traced, proceeding from the great sympathetic of the fœtus.

The main function of the placenta appears to be like that of the lungs in the adult. It admits of the blood of the fœtus being *shown* to that of the mother, and undergoing requisite changes. It may, also, be an organ for nutritive absorption, as observed above.

Animals, which have no placenta—as the Marsupialia—are called *implacental* and *nonplacental*.

PLACEN'TA CRUORIS, see *Blood*—p. *Febrilis*, *Ague cake*—p. *Oblata*, *P. prævia*—p. *Obvia*, *P. prævia*.

PLACENTA PRÆ'VIA, (from *præ*, 'before,' and *via*, 'way,') *P. ob'via* seu *ob'la'ta*. Presentation of the placenta; a condition which gives rise to an *unavoidable hemorrhage* from the uterus. The safety of the female depends upon speedy delivery.

PLACENTA SANGUINIS, see *Blood*—p. *Uteri Succenturiata*, *Decidua*.

PLACEN'TAL, *Placenta'lis*, (F.) *Placentaire*. Relating, or appertaining to, the placenta. Possessed of a placenta,—as 'a *placental mammal*.'

PLACENTI'TIS, *Placounti'tis*, *Placo'i'tis*, *Inflamma'tio placen'tæ*. A hybrid word—from *placenta*, and *itis*, a suffix denoting inflammation. Inflammation of the placenta.

PLACEN'TULA, 'a little cake,' diminutive of *placenta*, 'a cake.' A rudimental placenta. The placenta of an abortion.

PLACOITIS, Placentitis.

PLACOUNTITIS, Placentitis.

PLADAROMA, Pladarosis.

PLADAROSIS, *Pladaros'ma*, *Pladar'otes*, from *παθαρος*, 'soft.' A soft tumour on the eyelid, unaccompanied with redness or pain. Trachoma.

PLADAROTES, Pladarosis.

PLAFOND DES VENTRICULES DU CERVEAU, Corpus callosum.

PLAGA, Ictus, Wound.

PLAGIOBOL'IA, *Planobol'ia*, from *πλαγιος*, 'to one side,' and *βαλλειν*, 'to throw.' Imperfect emission of sperm into the vagina. Emission to one side; sometimes practised to render impregnation less probable.

PLAGUE, from *πληγη*, *plaga*, 'a stroke.' *Pestis*, *P. orientalis* seu *bubonic'aria orientalis* seu *inguinal'aria* seu *contagio'sa* seu *acutiss'ima* seu *septica* seu *glandulo'sa* seu *ade'no-septica* seu *inguinari'a*, *Pestil'itas*, *Ephem'era pestilentia'lis*, *E. mortif'era*, *Lues inguinal'aria*, *Clades glandula'ria*, *Phthora*, *Pestilent'ia*, *Lues*, *Loimos*, *Febris ade'no-nervo'sa*, *Laemos*, *Loem'e*, *Lo'mia*, *Laenop'gra*, *Chaosda*, *Anthr'acia Pestis*, *Anthraco'typhus*, *Febris pestil'ens*, *Syn'ochus pestilentia'lis*, *Typhus pestis* seu *pestilentia'lis* seu *gravis'simus* seu *anthrac'icus* seu *bubon'icus*, *Exanth'e'ma pestis*, the *Pest*, *Levant plague*, *Septic* or *glandular pestilence*, *The sickness*, (F.) *Peste*, *Typhus d'Orient*, *Fievre du Levant*, *F. ade'no-nerveuse*. An eminently malignant disease; endemic in the Levant; frequently epidemic, and destroying at least two-thirds of those it attacks. It is a fever of the most aggravated kind, with affection of the lymphatic glands of the groins or axillæ, and carbuncles. Its miasmata—it has been conceived—adhere to different organic textures, to woollen goods, clothing and furniture; and may thus be transported to a considerable distance; but this is not certain. The mean duration of the disease is six or seven days; some die in twenty-four hours, others not till ten or twelve days. Pathological anatomy has afforded little light with respect to it. Various means have been used for arresting it, but none have seemed to be pre-eminently distinguished. The great point is, to watch the indications as they develop themselves; and to treat the case, in general, like one of typhus gravior. It is universally agreed that the suppuration of the buboes should be aided as far as practicable. For preventing the importation and spread of the plague, the *Quar'antine Laws* have been instituted; and when the disease has actually appeared, a *cordon sanitaire* has been drawn round the infected district, so as to prevent all communication.

PLAGUE OF ANTONINUS, *Pestis Antoninia'na*, (F.) *Peste Antonine*. A severe febrile disease, which prevailed in the Roman empire, during the reign of Antoninus. It began in Asia, and passed westward. It resembled the Plague of Athens.

PLAGUE OF ATHENS, (F.) *Peste d'Athènes*. A febrile disease, which raged at Athens during the Peloponnesian war, in the 5th century before the Christian era; and a description of which is given in Thucydides. It was characterized by a cutaneous eruption, accompanied by small ulcerations, vomiting, affection of the respiratory organs, and diarrhœa. It began in the far East, and, before reaching Athens, ravaged Egypt, and the greater part of the Persian Empire.

PLAGUE, BLACK, Death, black.

PLAGUE, COLD. A severe form of congestive fever, seen in the Southern States. Bilious pneumonia, in which there is no reaction, has been, also, so called.

PLAGUE MARK, Plague token.

PLAGUE, PALI. A malignant fever, greatly

resembling Plague, which prevailed in Rajpootana after July, 1836.

PLAGUE SPOT, Plague token.

PLAGUE TOKEN, *Plague mark*, *Plague spot*. A mark by which one struck with the plague was known. Perhaps the early stage of carbuncle in unfavourable cases. It is described as a small tubercle—*Bossa*—somewhat resembling a wart, callous and more or less deficient in sensibility, varying in size from that of a millet-seed to that of a bean.

PLAGULA, Compress, Pledget, Splint.

PLAIE, Wound—*p. d'Arme à feu*, Wound, gunshot—*p. d'Arquebuse*, Wound, gunshot—*p. Contuse*, Wound, contused—*p. Evénimée*, Wound, poisoned—*p. par Arrachement*, Wound, lacerated—*p. à Lambesure*, see Flap.

PLAINTIVE, *Luctueux*.

PLANANTHUS FASTIGATUS, Lycopodium selago—*p. Selago*, Lycopodium selago.

PLANARIA LATTUSCULA, Distoma hepaticum.

PLANCHER (F.), 'floor.' In anatomy, the inferior wall or boundary of a cavity.

PLANCHER DU CERVEAU, Tentorium.

PLANCUS, Leiphus.

PLANE, Plexus.

PLANE, MESIAL, see Mesial.

PLANET-STRUCK, see Sideratio.

PLANETTES, *Planet'icus*, *Plan'icus*, *Errabundus*, *Errat'ic*, from *πλανη*, 'a wandering about.' An epithet given to diseases, whose returns are irregular—especially to intermittent fever; *Planetes Febris*, *F. Errat'ica*, *F. Erro'nea*, *F. Vaga*.

PLANETICA ARTHRITIS, Gout, wandering.

PLANICUS, Planetes.

PLANIPEDES, Steganopodes.

PLANTIES PEDIS, Sole.

PLANOBOLIA, Plagiobolia.

PLANTA NOCTIS, Hydroa, Sudamina—*p. Pedis*, Sole—*p. Prima pedis*, Tarsus.

PLANTA'GO, *P. Major*, *Centiner'via*, *Arnoglossum*, *Septiner'via*, *Polyne'ron*, *Heptapleuron*, *Plant'go latifo'lia* seu *major* seu *vulgar'is*, *Great plantain*, *Waybread*, (Sc.) *Wabran leaves*, (F.) *Plantain commun*. *Ord.* Plantaginacæ. *Sex. Syst.* Tetrandria Monogynia. The leaves have been said to be refrigerant, attenuant, substyptic, and diuretic.

PLANTAGO AQUATICA, *Alisma plantago*.

PLANTAGO CORDATA, *Heart leaved plantain*, *P. lanceola'ta*, *Ribgrass*, and *P. VIRGINICA*, *White plantain*, or *Ribwort*, indigenous; have properties like *Plantago major*.

PLANTAGO CORONOPUS, *Coranop'dium*, *Cornu cervi'num*, *Stella terræ*, *Plantago*, *Buckshorn Plantain*. Properties like the last.

PLANTAGO NITIDA, *P. psyllium*.

PLANTAGO PSYLLIUM, *P. nitida*, *Psyllium*, *P. erectum*, *Pulicaris herba*, *Crystal'ion*, *Cynomoi'a*, *Branching Plantain*, *Fleawort*, (F.) *Herbe aux puces commune*. The seeds have a nauseous, mucilaginous taste, and no remarkable smell. The decoction of the seeds is recommended in hoarseness and roughness of the fauces.

PLANTAGO VELGARIS, *Plantago*.

PLANTAIN DES ALPES, *Arnica montana*—*p. Branching*, *Plantago psyllium*—*p. Buckshorn*, *Plantago coronopus*—*p. Commun*, *Plantago*—*p. d'Eau*, *Alisma plantago*—*p. Great*, *Plantago major*—*p. Heart leaved*, *Plantago cordata*.

PLANTAIN MEAL, see *Musa paradisiaca*.

PLANTAIN, RATTLESNAKE, *Goodyera pubescens*—*p. Robin's*, *Erigeron bellidifolium*.

PLANTAIN TREE, *Musa paradisiaca*.

PLANTAIN, WATER, *Alisma plantago*, *Unisema deltifolia*—*p. White*, *Plantago Virginica*.

PLANTAIRE, Plantar muscle — *p. Grêle*, Plantar muscle.

PLANTAR, *Plantaris*, (F.) *Plantaire*, from *planta*, 'the sole of the foot.' That which relates or belongs to the sole of the foot. This name has been given to several parts.

PLANTAR APONEUROSIS, *P. fasciæ*. A thick, dense, resisting aponeurosis; of a triangular shape, and superficially situate, which occupies the middle and sides of the sole of the foot, and furnishes insertions to several of the muscles of the region, either directly or through the medium of septa, which it sends between them.

PLANTAR ARCH, see *Plantar arteries*.

PLANTAR ARTERIES. These are two in number, and arise from the extremity of the posterior tibial artery. They are distinguished into:—The *internal plantar artery*, situate above the abductor pollicis pedis. It extends from the termination of the posterior tibial to the trunk of one of the collaterals of that toe.—The *external plantar artery* is larger than the preceding, and ought to be considered as the termination of the posterior tibial. Situate above the flexor communis digitorum pedis, it extends from beneath the calcaneum to the posterior extremity of the last metatarsal space. When it has reached this part, it turns from without inwards; advances towards the posterior extremity of the first metatarsal bone, and anastomoses with the perforating branch of the *dorsalis tarsi*. In the first part of its course, it furnishes calcaneal, articular, muscular, and adipous branches. The second portion of the artery is called the *Plantar Arch* or *Cross*. It gives branches in all directions. The inferior and posterior have received no name. The superior — three in number — are the *posterior perforating arteries*. The anterior branches are larger, and there are commonly four. They furnish the *anterior perforating*, and the *collaterals* of the last four toes.

PLANTAR CROSS, see *Plantar arteries*—*p. Fasciæ*, *P. aponeurosis*.

PLANTAR LIGAMENTS. A name given to the inferior ligaments, which unite the bones of the tarsus and metatarsus, to distinguish them from the superior, called *dorsal*.

PLANTAR MUSCLE, *Plantaris*, *P. gracillius*, *Tibialis gracillius*, *Extensor tarsi minor*, (F.) *Plantaire*, *P. Grêle*, *Jambier grêle*, *Petit fémoro-calcanien*, (Ch.) A muscle, situate at the posterior part of the leg. It is long, thin, and narrow. Above, it is attached to the posterior part of the external condyle of the os femoris: below, it terminates by a long tendon, which is attached to the posterior and inner part of the calcaneum. This muscle extends the leg on the foot, and conversely. It can, also, assist in the flexion of the leg on the thigh.

PLANTAR NERVES. These are two in number, and are furnished by the termination of the posterior tibial nerve. They are distinguished into — 1. The *internal plantar nerve*, which extends from the inferior part of the tibial nerve to both sides of the first three toes, and the inner side of the fourth. It furnishes, also, branches to the abductor of the great toe; to the short flexor of the toes; to the accessory; to the short flexor of the great toe, the lumbricales, &c. 2. The *external plantar nerve* proceeds from the termination of the posterior tibial to the posterior extremity of the 5th metatarsal bone, and gives branches to the flexor brevis digitorum pedis, the accessory and the abductor of the little toe. This trunk subsequently divides into two branches;—the one—*profunda*—is distributed to the short flexor of the great toe: the interosseus and abductor pollicis pedis: the other—*superficialis*—sends filaments to the short flexor of the little toe, the

two sides of that toe, the outer side of the 4th, and the last lumbricalis.

PLANTAR REGIONS or SURFACES are different regions or surfaces of the sole of the foot. Three are generally reckoned,—the *internal*, *middle*, and *external*.

PLANTAR VEINS follow an arrangement similar to that of the arteries.

PLANTARIA, *Dengue*.

PLANTARIS, *Plantar*, *P. muscle*—*p. Superficies pedis*, *Sole*—*p. Verus*, see *Flexor longus digitorum pedis profundus perforans* (*accessorius*.)

PLANTARIUM, *Pubes*.

PLANTE DU PIED, *Sole*.

PLANTI-SOUS-PHALANGIENS, *Lumbricales pedis*—*p. Tendino-phalangiens*, *Lumbricales pedis*.

PLANUM APONEUROTICUM DIAPHRAGMATICIS. The tendinous expansion of the diaphragm.

PLANUM ORBITALE, see *Maxillary bone* (*superior*.)

PLANUM OS, from *planus*, 'soft, smooth.' The papyraceous or orbital plate of the ethmoid bone—*Lamina papyracea*, *Lamina plana*—was formerly so called.

PLANUM PDIS, *Sole*.

PLANUM SUPERUS LINGUÆ. The upper surface of the tongue.

PLANURIA, from *πλανος*, 'wandering, false,' and *ουρον*, 'urine.' Discharge of urine through unvented ways.

PLAQUEMINIER D'EUROPE, *Diospyros lotus*.

PLAQUES GAUFRÉES, *Peyeri glandulæ*—*p. Laitenses*, see *Taches lacteuses*—*p. de Peyer*, *Peyeri glandulæ*.

PLASMA, *Liquor sanguinis*.

PLASMEXHIDROSIS, from *plasma*, the *liquor sanguinis*; *εξ*, 'out of,' and *ἰδρωσις*, 'perspiration.' Exudation of the plasma of the blood from the vessels.

PLASTER, *Emplastrum*—*p. Adhesive*, *Emplastrum resinæ*, *Sparadrapum adhesivum*—*p. Adhesive*, *Baynton's*, see *Emplastrum resinæ*—*p. Adhesive*, of pitch and resins, *Emplastrum de pice et resinis glutinans*—*p. Ammoniacum*, *Emplastrum ammoniaci*—*p. Ammoniacum* with mercury, *Emplastrum ammoniaci cum hydrargyro*—*p. Aromatic*, *Emplastrum aromaticum*—*p. Asafoetida*, *Emplastrum asafoetidæ*—*p. of Belladonna*, *Emplastrum belladonnae*—*p. Blister*, *Blister*—*p. Blistering*, *Emplastrum lyttæ*—*p. of Blistering fly*, *Emplastrum lyttæ*—*p. Calefacient*, *Emplastrum calefaciens*—*p. of Cantharides*, compound, *Emplastrum lyttæ compositum*—*p. Cephalic*, *Emplastrum picis comp.*—*p. Corn*, *Sparadrapum viride*—*p. Corn*, *Kennedy's*, *Sparadrapum viride*—*p. Court*, *English*, see *Ichthyocolla*, *Sparadrapum adhesivum*—*p. Cummin*, *Emplastrum cumini*—*p. Defensive*, *Sparadrapum Galteri*—*p. Diachylon*, *Emplastrum plumbi*—*p. Fly*, *Emplastrum lyttæ*—*p. Frankincense*, *Emplastrum thuris*—*p. Galbanum*, *Emplastrum galbani*—*p. Galbanum*, compound, *Emplastrum galbani compositum*—*p. Gum*, *Emplastrum gummosum*—*p. of Gum-resins*, *Emplastrum cum gummi-resinis*—*p. Hemlock*, *Emplastrum ciutæ*—*p. Iron*, *Emplastrum ferri*—*p. Isinglass*, see *Sparadrapum adhesivum*—*p. Issue*, *Sparadrapum pro fonticulis*—*p. Lead*, *Emplastrum plumbi*—*p. Machine*, *Sparadrapier*—*p. Mercurial*, *Emplastrum hydrargyri*—*p. of Mercury*, compound, *Emplastrum hydrargyri compositum*—*p. Mustard*, *Cataplasma sinapis*—*p. PLASTIC, *Plas'ticus, Formati'vus, Form'ative*, (F.) *Plastique*, from πλασσω, 'I form.' That which forms, or serves to form.

PLASTIC ELEMENT. One which bears within it the germs of a higher form.—Gerber. *Plastic* or *histogenetic* or *organoleptic* elements of nutrition are those elements of food which go to the formation of organized tissue.—See Aliment.

PLASTIC FORCE. The generative or formative power in organized bodies. It is also called *Nisus formativus*, *Vis seu Virtus plastica seu formativa seu essentialis seu reproductiva, Facultas formatrix seu nutritrix seu auctrix seu vegetativa; Blas alterativum, Motus assimilationis, Anima vegetativa, Plasticismus, Virtus formatrix, Plasticitas, Plasticity, Force of Nutrition, F. of assimilation, F. of Formation, F. of vegetation, Puissance du moule intérieur* (Buffon), *Bildungsriebe, Germ-force* of the Germans.

PLASTIC LYMPH, *Liquor Sanguinis*—p. Surgery, *Morioplastice*.

PLASTICISMUS, *Plastic Force*.

PLASTICITAS, *Plastic Force*.

PLASTICITY, *Plastic Force*.

PLASTILYTIC, *Antiplastic*.

PLASTILYTICUM (**HÆMATOLYTICUM**), *Spanæmic*.

PLATA, *Scapula*.

PLATANO, *Musa Sapientum*.

PLATANTHE'RA ORBICULA'TA, *Large round-leaved Orchis*; indigenous. *Order, Orchidacææ*; flowering in July. From πλατους, 'wide,' and ἀνθη, for 'anther.' The leaves are large, soft and fleshy, and are used, in certain places, for dressing blisters.

PLATANUS, *Musa paradisiaca*.

PLATEA, *Bothriocephalus latus*.

PLATE-BONE, *Scapula*.

PLATEIASMA, *Platiasmus*.

PLATES, **MANSFORD'S**, see Galvanism.

PLATIASMUS, *Plateias'ma*, from πλατυς, 'broad.' Excessive development of the lips, causing the articulation to be imperfect.

PLATINA, *Platinum*.

PLATINUM, *Plat'ina*, from (S.) *plata*, 'silver.' (F.) *Platine, Or blanc, Petit argent*. The preparations of platinum resemble in their therapeutic properties those of gold. The **BICHLORIDE**, *Plat'ini Bichlor'idum*, made by dissolving platinum in *aqua regia*, and the **DOUBLE CHLORIDE** of PLATINUM and SODIUM, *Sodii chloroplatinas, Chloroplatinate of Sod'ium*, prepared by dissolving bichloride of platinum and pure chloride of sodium, in proper proportions, in water, evaporating and crystallizing.—are the preparations used. They are not much prescribed.

PLATULA, see *Pediculus*.

PLATYBREGMATE, see *Cranium*.

PLATYCORIA, *Mydriasis*.

PLATYCORIASIS, *Mydriasis*.

PLATYNO'SIS, from πλατυς, 'broad.' *Amplificatio*. Morbid extension of parts.

PLATYOPHTHALMON, *Antimonium*.

PLATYPOLIA, see *Kylosis*.

PLATYPUS, see *Kylosis*.

PLATYS'MA, from πλατυς, 'broad.' Anything broadly extended. A spread plaster.

PLATYS'MA MYO'IDES, *P. Myo'ides, Musculus cutaneus seu subcutaneus* (Winslow), *Quadratus genæ seu latissimus colli, Expan'sio musculo'sa, Tetragonus, Stomomandicon*, (F.) *Thoraco-maxillofacial, Thoraco-facial* (Ch.), *Peaucier*. A mus-

cle situate superficially on the lateral parts of the neck. It is flat, broad, and quadrilateral. Its fibres, which are all parallel to each other, pass obliquely upwards, and from without inwards. They arise from the areolar tissue, which covers the anterior and superior part of the chest; pass before the clavicle, and proceed to attach themselves at the interior part of the symphysis menti, at the external oblique line of the jaw, and at the commissure of the lips. The fibres of this last insertion form a distinct fasciculus, called by some anatomists *Musculus Risorius Santorini*. The platysma myoides depresses the commissure of the lips, and carries it outwards. It contributes, also, to the depression of the lower jaw. When it contracts, it wrinkles the skin of the neck transversely.

PLATYSTER'NOS, from πλατυς, 'broad,' and στήθων, 'the sternum.' One who has a broad, well developed chest.—D. Pechlin.

PLATYS'TOMUS; from πλατυς, 'broad,' and στομα, 'mouth.' One who has a broad mouth.

PLAUTUS, *Leipopus*.

PLECHAS, *Perinæum*.

PLECTANÆ, *Cornua uteri*.

PLECTANÆ, *Plica, Plegma, Plexus*. From πλεκω, 'I twine.' A fold; a plexus. Also, a cornu of the uterus.

PLECTRUM. The styloid process of the temporal bone. Also, the uvula, and the tongue.—Castelli.

PLEDGET, (D.) *Plagghe, Plumacæ'olus, Linteamen, Plog'ula*, (F.) *Plumaceau, Plumusseau*. A small compress or gâteau of lint—the filaments arranged parallel to each other—flattened between the hands after the extremities have been cut off or folded down. It is applied over wounds, ulcers, &c., to preserve them from the contact of the air, to retain dressings *in situ*, and to absorb the discharges.

PLEGE, *Blow, Ictus*.

PLEGMA, *Plectane, Plexus*.

PLEGOMETER, *Pleximeter*.

PLEIN, (F.) 'Full.' The middle part of a roller.

PLEIOMASTHUS, *Polymasthus*.

PLEIOMAZIA, see *Polymasthus*.

PLENA MULIER, *Pregnant*.

PLENITUDE, *Fulness*.

PLENITUDO, *Plethora*.

PLENCK'S DEPILATORY, see *Depilatory, Colley's*.

PLEOMAZIA, see *Polymasthus*.

PLEONECTICUS, from πλεον, 'more,' and εχειν, 'to have.' Covetous. Desirous to acquire: hence *mania pleonectica*.

PLEONECTICA ATHYM'IA seu **MELANCHOL'IA**. A form of insanity characterized by a desire for gain or by covetousness.

PLERO'SIS, from πληρης, 'full,' also *Repletio, Refectio, Repletion*. Restoration of flesh after sickness. *Plethora*.

PLEROTICUS, *Incarnans*.

PLES'MONĒ, *πληρομονη, Plenitudo, Sati'etas, Sati'ety*. Intemperance. A condition the opposite to that of hunger.

PLESSER, *Plexor*.

PLESSIMETER, *Pleximeter*.

PLESSIMĒTRE, *Pleximeter*.

PLETHOMER'IA, from πληθος, 'many,' and μέρος, 'a part.' Superabundance of parts, as in the case of six fingers to one hand.

PLETHOR'A, from πληθω, 'I fill.' *Polyæ'mia, Polyhyperæ'mia, Panhyperæ'mia, Polychym'ia sanguin'ea, Angiopleuro'sis, Angiopleuro'sis, Erythroæ'mia, Erythro'sis, Hæmatoplethor'a, Hæmatoplethor'a, Plenitudo, Multitudo, Redundantio, Repletio, En'chyma, Completio, Pleth'ory, Repletio, Sanguineness, Fulness*, (F.) *Abundance, Redondance*. The word *plethora*, which means

repletion, *Pleuro'sis*, expresses a superabundance of blood in the system, or in some part of it:—hence the division of plethora into *general* and *local*; the latter being called, according to its seat, *cerebral, pulmonary, uterine*, &c. The principal symptoms of plethora exist in the circulatory system; such as redness of the surface, swelling of the veins, increase in the fulness of the pulse, in the strength of the heart's pulsations, &c., with spontaneous hemorrhages occasionally. With these are usually united general heaviness, torpor, lassitude, vertigo, tinnitus aurium, flushes of heat, &c. The blood of plethoric persons differs from healthy blood in the smaller ratio of water which it contains, and especially in the augmentation of the red corpuscles.

The tendency to plethora, or its actual existence, must be obviated by purgatives, proper diet, exercise, &c.; and, if the danger from it be pressing, by blood-letting. This is, however, a doubtful remedy for general plethora, as it increases hæmatisis.

PLETHORÆ ARTERIO'SA is the form in which the blood is rich in fibrin and red corpuscles—the *arterial constitution*.

PLETHORA, LOCAL, *Hyperæmia* — p. *Partialis, Hyperæmia*.

PLETHOR'IC, *Pletho'ricus, Polyæ'mic, Polyæ'micus, Sanguine, Sanguineus*, (F.) *Pléthorique*. Same etymon. Full of blood. Relating to or affected with plethora.

PLETHORICUS, *Plethoric*.

PLETHORY, *Plethora*.

PLETHOS, *Satiety*.

PLEUMON, *Pulmo*.

PLEUMONIA, *Pneumonia*.

PLEURA, *Pleurum, Pleuro'ma*, 'the side, a rib.' *Membrana pleurit'ica succin'gens seu costas succin'gens, M. seu Tun'ica costalis seu subcostalis, Hypopleur'ios, Hypoz'ous*, (F.) *Plèvre ou Pleure*. The pleuræ are two thin, diaphanous, perspirable membranes, which line each side of the chest, and are reflected thence upon each lung. Like all serous membranes—to which class they belong—each represents a sac without aperture. From the junction of the pleura of each side the mediastina are formed. That portion of the pleura which lines the parietes of the chest is called *Pleura Costalis*; the portion that covers the lungs, *Pleura Pulmonalis*. The arteries of the pleuræ are from the intercostals, internal mammaries, phrenic, inferior thyroid, &c. The veins correspond with the arteries. They are, also, supplied with lymphatics, but nerves are not traceable in them.

Pleura is also used for *Cavity of the Pleura, Saccus Pleuræ*.

PLEURÆ. The sides of the chest.

PLEURAL, *Pleura'lis, Pleur'icus, Pleur'ites*. That which concerns the pleura:—as a *pleural fistula*;—*pleural cavity, pleural hemorrhage*, &c.

PLEURALGIA, *Pleurodynia*.

PLEURAPOPHYSES, *Costæ veræ*; see *Costa*.

PLEURAPOSTEMA, *Empyema*.

PLEURARTHRO'ACÉ, from *πλευρα*, 'a rib,' *αρθρον*, 'a joint,' and *κακος*, 'bad.' Caries of the ribs.

PLEURE. *Pleura*.

PLEURESIA, *Pleuritis*.

PLEURÉSIE, *Pleurisy* — p. *Fausse, Pleurodynia*.

PLEURESIS, *Pleuritis*.

PLEURÉTIQUE, *Pleuritic*.

PLEURICUS, *Pleural*.

PLEURIS, *Pleuritis*.

PLEURISY, *Pleuritis*

PLEURISY, *BILIOUS, Pleurit'is bilio'sa*. *Pleurisy* accompanied with bilious symptoms;—the effect of duodenitis or duodeno-hepatitis.

PLEURISY, FALSE, Pleurodynia.

PLEURISY, HEAD. A ridiculous term, occasionally used by the vulgar, in the Southern States especially, for bilious pneumonia before the pneumonic phenomena are developed, and whilst the head is prominently affected.

PLEURISY, HEMORRHAGIC, Hæmatothorax — p. *Rheumatic, Pleurodynia* — p. *Root, Aselepias tuberosa*.

PLEURISY, TYPHOID, Pleurit'is typho'ides seu typho'ides seu typho'sa. *Pleurisy* accompanied by adynamic symptoms.

PLEURITES, *Pleural*.

PLEURIT'IC, Pleurit'icus, Pleurit'ical, (F.) *Pleurétique*; same etymon as *pleuritis*. Relating or appertaining to pleuritis — as '*pleuritic pain*.'

PLEURIT'IS, from *πλευρα*, 'the pleura;' *Morbis lateralis seu pleurit'icus seu Costalis, Empres'ma seu Causa Pleuritis, Pleuris, Pleur'esis, Pleur'isia, Pleurit'is costalis seu vera, Pleurit'ica Febris, Passio pleurit'ica, Inflammatio Pleuræ, Pleurisy, Inflammatio of the Pleura*, (F.) *Pleurésie, Fèvre pleurétique, Inflammation de la Plèvre*, may be acute or chronic. Perhaps the most violent of all internal inflammations is the active form; known by acute, lancinating pain in one side of the chest, increased by inspiration, by coughing, and often by pressure; dyspnoea, the inspirations short and frequent; cough dry, or with little expectoration; and difficulty of lying on the affected side. Symptoms, attending the phlegmasiæ in general, strongly marked.

Physical Signs. There is seldom any perceptible alteration in the exterior of the chest. When effusion has taken place to a great extent, the signs will be similar to those of chronic pleurisy. The motion of the affected side is diminished, and the vibrations of the voice cannot be detected by the hand. There is more or less dullness of sound on percussion, the dullness diminishing or disappearing by change of position. On auscultation, the inspiration is feeble, distant, or inaudible; but change of position modifies it. Egophony is usually present, when the effusion is in moderate quantity, and is best heard over a portion of the thoracic parietes, represented by a band of three inches, running from below the inferior margins of the scapula in the direction of the ribs to the sternum. Simple pleurisy rarely attacks both sides at once: when such is the case, the presence of tubercles may be suspected.

Formerly, a *true pleurisy* meant one seated in the pleura: a *mediastinal pleurisy*, one situated in the anterior mediastinum; and *false pleurisy* or *rheumatismal pleurisy*, that which occupies the intercostal muscles. The last has received the name *Pleurodynia*; that of *pleurisy* being exclusively appropriated to inflammation of the pleura. *Pleurisy* has also been distinguished into *dry* and *humid*, according as it is or is not accompanied by expectoration. *Humid* or *moist pleurisy* is now properly regarded as a complication of pleurisy with pulmonary catarrh. It is the *catarrhal pleurisy* of some. The majority of the species of pleurisy, admitted by Sauvages, consist of complications.

The causes of pleurisy are like those of other internal inflammations. It may terminate by resolution, effusion, or suppuration.

CHRONIC PLEURISY, which has been particularly described by Bayle, Broussais, and Laënnec, most commonly terminates by a serous or purulent effusion, which sometimes simulates hydrothorax; at others, phthisis pulmonalis. It

may form slowly, without evident symptoms; or it may succeed acute pleurisy. In the former case, vague pains are felt in the chest, with small, dry cough, oppression at intervals, shivering, irregular febrile symptoms, and hardness of pulse.

Physical Signs. The affected side is smoother, more rounded and motionless; the intercostal spaces are dilated and filled up, or may even protrude slightly. In very chronic cases, however, the affected side may be smaller. The triangular space above the clavicle and the depression immediately above the sternum are often drawn downwards on the diseased side. No vibration is experienced by the hand when the patient speaks. The parietes of the thorax are sometimes œdematous, and fluctuation may be occasionally felt between the ribs. On percussion the sound is dull, or if clear, only so in the upper portions of the chest. On auscultation, there is an absence of the usual sounds over the affected parts, excepting occasionally transmitted sounds. There are no physical signs that can enable us to know whether pus or serum is effused into the chest. The introduction of a grooved needle through the intercostal space, as recommended by Dr. Thomas Davies, would of course settle the question.

On dissection of those who have died of pleurisy, the pleura is found thickened, red, inflamed, and covered with membranous exudations or false membranes. Sometimes it seems cartilaginous and ossified. Its cavity frequently contains serous or sero-purulent effusions.

The acute form of the disease requires the most active treatment. General blood-letting, to such an extent as to make a very decided impression on the system, and repeated if necessary. This is the most important agent. After the violence of the disease has been got over, counter-irritants will be found highly beneficial; as well as when it has passed into the chronic state. The cough may be relieved by demulcents.

Sauvages has given the name PLEURITIS VENTOSA, and Pringle that of PLEURODYNIA VENTOSA, to a pain behind the false ribs, attributed to the presence of air in the intestines.

PLEURITIS BILIOSA, Pleurisy, bilious—p. Bronchialis, Bronchitis—p. Costalis, Pleuritis—p. Diaphragmatica, Diaphragmitis—p. Humida, Bronchitis—p. Muscularis, Pleurodynia—p. Notha, Pleurodynia—p. Pericardii, Pericarditis—p. Pulmonis, Pleuro-pneumonia—p. Rheumatica, Pleurodynia—p. Spuria, Pleurodynia—p. Spuria simulata, Pleurodynia—p. Typhoides, Pleurisy, typhoid—p. Vera, Pleuritis.

PLEUROCELĒ, from *πλευρα*, 'the pleura,' and *κῆλη*, 'a tumour.' *Hernia of the pleura, Hernia pleurica et pulmonalis.* This name, employed by Sagar, is inaccurate, as the pleura never protrudes alone. It only forms a hernia, when it serves as an envelope to the lung, to tumours, or to purulent collections, which have protruded from the thoracic parietes.

PLEUROCOLLE'SIS, from *πλευρα*, 'the pleura,' and *κόλλησις*, 'I glue.' An adhesion between the pleura costalis and pleura pulmonalis.

PLEURODYNE, Pleurodynia.

PLEURODYNIA, *Pleuralgia, Pseudo-pleuritis, Pseudo-pleurisy, Pleurodynē, Autalgia dolorosa, Parapleuritis, Stethorrhœma, Rheumatismus pectoris, Pleuritis rheumatica seu muscularis seu notha seu spuria seu simulata, Pneumonia exter'na, Lagopneon, Thoracodyniē, Dolor Pectoris exter'nus, Pain in the side, Stitch in the side, False, rheumatic or rheumatismal pleurisy, (Old Eng.) Shott, (Sc.) Caik, (F.) Point de côté, Douleur de côté, Pleu-*

risie fuisse; from *πλευρα*, 'the side or pleura,' and *ὄδυνη*, 'pain.' A spasmodic or rheumatic affection, generally seated in the muscles of the chest, and, ordinarily, in the intercostals. It is usually augmented by outward pressure, inspiration, coughing, exertion, moving the thorax, and sometimes even the corresponding arm. It is unaccompanied by fever, cough, or dyspnoea, excepting under the form of a *stitch*, when dyspnoea exists. It is, generally, by no means obstinate, and yields promptly to warm applications and to cupping or leeches. If it still resists, a blister will, almost always, remove it.

PLEURODYNIA VENTOSA, Pleuritis ventosa.

PLEUROMA, Costa, Pleura.

PLEUROPATHIA, from *πλευρα*, 'the pleura,' and *πάθος*, 'a disease.' A disease of the pleura.

PLEUROPERIPNEUMONY, *Pleuroperipneumonia, Pleuroperneumonia, Pneumono-pleuritis, Pneumono-pleuritis, Pleuritis pulmonis, Pneumonia pleuritis.* Inflammation occupying the pleura and the lung at the same time. Pleurisy and peripneumony existing simultaneously. *Physical signs.* A dull sound is yielded by percussion for a variable extent over the more dependent portions of the affected side. The loss of sound is partially modified by change of position. The respiratory murmur on auscultation is very feeble or absent inferiorly; higher up, the crepitation or bronchial respiration of pneumonia may be detected; round the root of the lung, and near the inferior angle of the scapula, egophony is generally present. There is seldom much enlargement of the affected side, or displacement of the adjacent organs, as in the case of simple chronic pleurisy.

PLEUROPNŒUMA, Pnenmathorax.

PLEUROPNŒUMONIA, Pleuroperipneumony.

PLEUROPNŒUMONITIS, Pleuroperipneumony.

PLEUROPYESIS, Empyema.

PLEURORRHAGIA, Hæmatothorax.

PLEURORRHŒA, from *πλευρα*, 'the side,' and *ρῆσις*, 'I flow.' Accumulation of fluid in the pleura.

PLEURORRHŒA CHYLOSA, Chylothorax—p. Lymphatica, Hydrothorax—p. Purulenta, Empyema—p. Sanguinea, Hæmatothorax—p. Serosa, Hydrothorax.

PLEURORTHOPNŒA, from *πλευρα*, 'the side,' *ὄρθος*, 'erect,' and *πνεῦμα*, 'I respire.' Pain of the side, which does not permit the patient to breathe, except when in the vertical position.

PLEUROSO'MUS, from *πλευρα*, 'side,' and *σῶμα*, 'body.' A malformation in which the fissure is somewhat lateral, with eventration extending chiefly upon the upper part of the abdomen and upon the chest; the upper extremity of the fissured side being more or less atrophied.—Vogel.

PLEUROSTO'SIS, from *πλευρα*, 'the pleura,' and *ὀστέον*, 'a bone.' Ossification of the pleura, or in the cavity of the pleura. *Osteopleuria.*

PLEUROTETANUS, Pleurothotonos.

PLEUROTHOTONOS, *Pleurotonos, Pleurotetanus, Tetanus lateralis,* from *πλευροθεν*, 'laterally,' and *τονος*, 'tension.' A variety of tetanus, in which the body is curved laterally by the stronger contraction of the muscles of one side of the body.

PLEUROTONOS, Pleurothotonos.

PLEURUM, Costa, Pleura.

PLÈVRE, Pleura.

PLEXIM'ETER, *Plexom'eter, Plegom'eter,*

Plessimeter, *Anticoposcopium*, *Anticoposcope*, (F.) *Plessimètre*, from *πλησσω*, 'I strike,' and *μετρον*, 'measure,' 'a measure of percussion.' An ivory plate of a circular or ovoid shape, from an inch and a half to two inches in diameter, and about one-sixth of an inch in thickness. It has either a raised rim or edge, or projecting handles on its upper side, to permit its being held between the finger and thumb of the left hand, whilst it is struck with the right. It is used in percussion of the chest. A piece of metal, a coin, or the finger of the left hand may be used with equal advantage. — See Percussion, mediate.

PLEXOMETER, Pleximeter.

PLEXOR, from *πλησσω*, 'I strike.' *Plessor*. Any instrument employed in percussion. The ends of the fingers of the right hand brought together are the best *plexor*; as the finger of the left is, perhaps, the best *pleximeter*.

PLEXUS, *Plegma*, *Plectanē*, *Planē*, *Retē*, from *πλεκω*, *plecto*, 'I interlace,' 'I entwine.' (F.) *Lacis*. A network of blood-vessels or of nerves. The nervous plexuses, *Implicatio'nes reticulat'res* seu *Tectus nervorum* belong — some to the system of encephalic nerves — others to that of the great sympathetic; whilst some, as the pharyngeal, seem to be formed of the two sets. The plexuses represent complex networks, with more or less loose meshes, formed by the numerous and diversified anastomoses of the nervous filaments; from which proceed other branches, that are distributed to organs, or to other plexuses.

PLEXUS, CARDIAC, Cardiac plexus — p. Carotid, see Carotid nerve — p. Cavernosus, Bulbus vestibuli — p. Choroidea, see Choroïd — p. Choroidea Medius, Choroidea tela — p. Ciliaris, Ciliary ligament — p. *Cœliacæ*, *Cœliacæ plexus* — p. Coronarius ventriculi, Gastric plexus — p. Coronary, see Cardiac plexus, and Coronary plexus — p. Gangliiformis semilunaris, *Cœliacæ plexus* — p. Gangliiformes, Ganglions, nervous — p. Glandiformes, Ganglions, nervous — p. Glandulosi Peyerii, Peyerii glandulæ — p. Hederaceus, Corpus pampiniforme — p. Hepaticus, Hepatic plexus — p. Infra-thyroïdeale, see Thyroïdeale veins — p. *Lombo-abdominal*, Lumar plexus — p. Median, *Cœliacæ plexus* — p. Mesenterii proprius et maximus, *Cœliacæ plexus* — p. Nervorum anserinus, *Facial nerve* — p. *Opistogastricæ*, *Cœliacæ plexus* — p. Pampiniformis, Corpus pampiniforme — p. Pharyngeal, see Pharyngeal nerve — p. Pneumogastricus, see Pneumogastric nerve — p. Retiformis, Corpus cavernosum vaginæ — p. Reticularis, Bulbus vestibuli, Choroidea plexus — p. Solar, *Cœliacæ plexus* — p. *Sous-mésentérique*, Hypogastric plexus — p. *Testiculaire*, Spermatic plexus — p. *Trachélo-sous-cutané*, Cervical plexus — p. Vasculosus funiculi spermatici pampiniformis, Corpus pampiniforme.

PLICA, from *plico*, *πλεκω*, 'to fold,' *Tricho'sis plica*, *Tricho'na*, *Trichono'sis plica*, *Tricæ*, *T. Incuborum* seu *Seroforum*, *Plica Polonica* seu *Polonica Juda'ica* seu *Cachectica* seu *Saxon'ica* seu *caput Medusæ* seu *longicauda lateralis*, *Affectio Sarmatica*, *Lues Sarmatica* seu *Polonica* seu *Trichomat'ica*, *Helo'sis*, *Helo'tis*, *Cir'raga*, *Cir'rhagra*, *C. Polono'rum*, *Ephym'a trichoma*, *Morbus Cirrho'rum*, *Coma Cæsa'ra*, *Kolto*, *Rhopalo'sis*, *Plicatio*, *Plicat'ra*, *Matted hair*, *Platted hair*, *Trichomat'ose hair*, (F.) *Plique*, *P. Polonaise*. A disease endemic in Poland, Lithuania, and other parts of Northern Europe; so called on account of its being characterized by interlacing, twisting, and agglutination or matting of the hair. By some it has been regarded as a real disease; by others, as the want of attention to cleanliness. However this may be, it generally appears upon the hair of the head, but sometimes in that of other parts, as the beard, the

hair on the axilla, pubes, &c. Alibert admits three species of plica. 1. *Plica multiform'is* or *Plica caput Medusæ*, in which the hairs are mixed and agglutinated in greater or less masses; and this has been again subdivided into two varieties, according as the meshes are almost straight (*P. C. M. laciniata*, (F.) *Plique en lanières*) or much twisted, (F.) *P. en vrilles*.) 2. *Plica longicauda*, (F.) *Plique solitaire* ou *à queue*; when the hair is united into a single long mass, and 3. *Plica cespitosa*, (F.) *Plique en masse*, in which the hairs are matted into one large, shapeless mass. Pinel places this disease amongst the *Cutaneous phlegmasiæ*; but it is far from demonstrated, that it is the result of inflammation of the skin. Certain it is, however, that the tangling of the hair is symptomatic of an affection — sui generis — of the dermoid system. The idea that it is entirely owing to want of cleanliness, as has been conceived by some, is not tenable. It has been supposed to be produced by a fungous growth — a *mycoderma* or *trichomaphyte*.

PLICA, Plectane — p. Cachectica, Plica — p. Caput Medusæ, Plica — p. Centralis retinæ, see Optic nerve — p. Longicauda lateralis, Plica — p. Lunata, Valvula semilunaris — p. Polonica, Plica — p. Polonica Judaica, Plica — p. Saxonica, Plica — p. Semilunaris, Valvula semilunaris.

PLICÆ CONNIVENTES, Valvulæ conniventes — p. Semilunares, see Urinary bladder, and Uterus.

PLICATIO, Plica.

PLICATURA, Plica.

PLICATURÆ CEREBRI, Gyri cerebri.

PLICHIOS, Perinaeum.

PLIN'THIUM, *πλινθιον*. A machine invented by one Nileus, which was formerly employed in the reduction of fractures and luxations. Scultetus describes it in his *Armamentarium Chirurgicum*.

PLIQUE, Plica — p. Polonaise, Plica.

PLOCARIA CANDIDA, *Fuens amylaceus* — p. Helminthochorton, *Corallina Corsicana*.

PLOMB, Plumbum.

PLOMB (F.). The sulphuretted gas disengaged from privies, which proves fatal at times to the nightmen, (F.) *Vidangeurs*, engaged in emptying them.

PLOMB, ACÉTATE ACIDE DE, Plumbi superacetat — p. *Blanc*, Plumbi subcarbonas — p. *Blanc de*, Plumbi subcarbonas — p. *Carbonate de*, Plumbi subcarbonas — p. *Chlorure de*, Plumbi chloridum — p. *Iodure de*, Plumbi iodidum — p. *Nitrate de*, Plumbi nitras — p. *Oxide de, fondu*, Plumbi oxydum semivitreum — p. *Oxide rouge de*, Plumbi oxydum rubrum — p. *Oxide semi-vitreux de*, Plumbi oxydum semivitreum.

PLOMBAGE DES DENTS, Plugging.

PLOMBAGINE, Graphites.

PLOMBIÈRES, MINERAL WATERS OF. *Fontes medicati Plumbarii*, *Therma Plumbaria*. Plombières is a town in the department of the Vosges, 17 leagues from Nancy, and two from Remiremont. Here are several sources of thermal water. That which is called *Saponaceous* (F.) *Savonneuse*, is formed of the subcarbonate and sulphate of soda, chloride of sodium, silica, carbonate of lime, and much vegeto-animal matter. This last component, when held in solution by means of the subcarbonate of soda, gives to the water an unctuous character. This is the origin of its name. The waters of Plombières are employed as solvents in engorgements of the abdominal viscera, and as alteratives in chronic diseases of the skin.

PLORATIO, Lacrymatio.

PLORATUS, Lacrymatio.

PLOTUS, Leiopus.

PLOUK, Papula.

PLUGGING, (Sw.) *Plugg*, (F.) *Tamponnement*. The act of stopping a hole. The introduction of a plug or dossil of lint or rag into a wound or natural cavity—as the uterus or vagina—to arrest hemorrhage; or of some substance into a carious tooth to prevent toothache, (F.) *Plombage des dents*. See Filling.

PLUKE, Papula.

PLUM, Prunum, *Prunus domestica*—p. Assyrian, *Sebestina*.

PLUMA, Lannago.

PLUMACEAU, Pledget.

PLUMACEOLUS, Pad, Pledget.

PLUMASSEAU, Pledget.

PLUMBAGO, Graphites, *Persicaria*.

PLUMBA'GO EUROPE'A, *P. lapathifolia* seu *undulata*, from *plumbum*, 'lead,' because covered with lead-coloured spots, *Dentaria*, *Crepanella*, *Squama'ria*, *Dentelaria*, *Leadwort*, (F.) *Dentelaire*, *Herbe au Cancer*, *Malherbe*. Ord. *Plumbaginaceæ*. *Sex. Syst.* Pentandria Monogynia. The root was formerly much esteemed as a cure for toothache, like the *Pellitory of Spain*, which is also called *Dentaria*.

PLUMBI ACETAS, P. superacetatis—p. Acetas dilutum alcoholicum, Liqueur plumbi subacetatis dilutus—p. Acidulus siccus, Plumbi superacetatis—p. Carbonas, P. subcarbonas.

PLUMBI CHLORIDUM, *Chloride of Lead*, (F.) *Chlorure de Plomb*. This salt of lead has been used in the form of lotion and ointment in cancerous ulcerations.

PLUMBI DEUTOXYDUM RUBRUM, P. Oxydum rubrum—p. Hydriodas, P. Iodidum—p. Iodhydras, P. Iodidum.

PLUMBI IODIDUM, *P. Ioduretum* seu *Hydriodas* seu *Hydroïodas* seu *Iodhydras*, *Plumbum iodatum* seu *Hydroïodicum*, *Iodide* or *Ioduret of Lead*, (F.) *Iodure de Plomb*, *I. plombique*. This salt is formed by the double decomposition of *iodide of potassium* and *nitrate of lead*. It is used in scrofulous affections internally and externally; and is official in the *Pharmacopœia U. S.* 1851. Dose, gr. ss to gr. iij or iv.

PLUMBI IODURETUM, P. Iodidum.

PLUMBI NITRAS, *Plumbum nitricum*, *Nitras plumbicus*, *Nitrum saturninum*, *Nitrate of lead*, (F.) *Nitrate* ou *Azotate de Plomb*. A salt formed by the action of *diluted nitric acid* on *litharge*. Nitrate of lead has the same medical action as the other soluble salts of lead, and is a valuable antiseptic. It has been used, also, as an external antiseptic to wounds, ulcers, &c., and is the basis of *Ledoyen's disinfecting liquid*.

PLUMBI NITROSACCHARAS, *Nitrosaccharate of lead*. (*Sacchar.* p. j; *Acid. nitric.* p. ij; *Aquæ* p. x.) Beat together in a porcelain dish as long as chemical action continues; dilute the liquor with water, neutralize with chalk, and to the filtered solution add acetate of lead so long as a precipitate is formed. Collect, wash, and dry the precipitate, which is saccharate of lead. Dissolve in dilute nitric acid, (one part acid to nineteen of water,) filter and evaporate to form crystals, which are transparent, of an amber colour, and in regular hexagonal plates or prisms.

Advised as a solvent of phosphatic calculi.

PLUMBI OXYDUM ALBUM, Plumbi subcarbonas—p. Oxydum carbonatum per acidum acetosum, Plumbi subcarbonas—p. Oxydum fusum, Pl. oxydum semivitreum.

PLUMBI OXYDUM RUBRUM, *Minium*, *Miltus*,

Deutoxydum plumbi rubrum, *Superoxydum Plumbosum*, *Plumbum oxydatum rubrum* seu *superoxydatum*, *Sandix*, *Sandyx*, *Red lead*, (F.) *Oxide de plomb rouge*. It is sometimes used to kill vermin.

PLUMBI OXYDUM SEMIVITREUM, *Plumbum oxydatum*, *Lithargyrus*, *Lithargyrum*, *Lithargyrum*, *Oxydum plumbi fusum*, *Spuma argenti*, *Semi-vitrified oxyd of lead* or *litharge*, *Calcite'sa*, *Cath'nia*, (F.) *Oxide de plomb fondu*, *Oxide de plomb semivitreux*, (a yellow protoxyd of lead, prepared by heat, combined with carbonic acid.) It occurs in scales of a whitish-red colour, and semi-vitrified. It is employed for pharmaceutical purposes, as in the *Liquor plumbi acetatis*, *Emplastrum plumbi*, &c. Formerly, the *Litharge of gold*, *Chrysi'tis*, *Mas'sicot*, and *Litharge of silver*, *Almariab*, were distinguished in commerce. These were merely ordinary litharge, resembling gold or silver in colour.

PLUMBI SUBCARBONAS, *Carbonas plumbi* seu *plumbicus*, *Plumbi Carbonas* (Ph. U. S.), *Plumbum carbonicum*, *Pl. oxydatum carbonicum* *Magisterium plumbi*, *Oxydum plumbialbum*, *Cerussa*, *Æru'go plumbi*, *Psimmyth'ion*, *Psym'mythion*, *Simmitium*, *Flake white*, *Blanca*, *Gersa*, *Îf'ides*, *Subcarbonate of lead*, *Cerusse*, *White lead*, (F.) *Carbonate de plomb*, *Blanc de plomb*, *Plomb blanc*, *Céruse*, *Blanc d'Argent*, *Blanc de Céruse*, *Blanc de Krems*, *B. de Krems*, *B. de Krennitz*, *Craie de plomb*, (prepared by exposing spiral rolls of lead to the fumes of vinegar, in vessels placed in dung.) It is inodorous; has a sweet taste; is brittle; friable; snow white, and of a minute, scaly texture. It is astringent and sedative, and is sprinkled on parts affected with local inflammation, or to prevent chafing in children. It is also used in the formation of ointments and plasters.

PLUMBI SUPERACETAS, *Cerussa aceta'ta*, *Plumbi acidulus siccus*, *P. acetas* (Ph. U. S.), *Sal seu saccharum Saturni*, *Plumbum acetatum*, *Ulcedo Saturni*, *Acetas plumbicum crystallisatum*, *Sal plumbi*, *Sugar of lead*, *Superacetate of lead*, *Protoacetate of lead*, (F.) *Acétate acide de plomb*, *Sel ou sucre de Saturne*. (*Plumb. carb.* iij, *Acid acetic.* cong. 1½. Boil the lead with the acid till it is saturated; then strain through paper, and evaporate to a pellicle, that crystals may be formed. Wash the crystals and dry on blotting-paper. Ph. L.) The acetate of lead has a sweet, styptic taste; a very white colour, and silky lustre. It is astringent; and, in weak solution, cooling and sedative; in strong, stimulant. It is given internally, in visceral and other hemorrhages, combined with opium, and is used externally, in solution, in inflammation, burns, bruises, gonorrhœa, &c. Dose, gr. ss to iss.

PLUMBI TANNAS, see Tannin.

PLUMBICUM ACETAS CRYSTALLISATUM, Plumbi superacetatis.

PLUMBOSUM SUPEROXYDUM, Plumbi oxydum rubrum.

PLUMBUM, *Molybdos*, *Molibdus*, *Saturnus*, *Capricornus*, (F.) *Plomb*. Lead. A solid metal of a bluish white colour; more malleable than ductile; soft enough to be scratched by the nail; very fusible and oxydizable, when heated in the air, and existing, in nature, under a number of different shapes; the principal of which are those of sulphuret and oxyd. S. g. 11.352.

Its use is to form oxides and salts. In its metallic state, it has no action upon the body; but when oxydized or united with an acid, it acts, in large doses, as a powerfully astringent poison.

PLUMBUM ACETICUM, Plumbi superacetatis—p. Album, Tin—p. Candidum, Tin—p. Carbonicum,

Plumbi subcarbonas—p. Cinereum, Bismuthi subnitrate of—p. Hydroiodicum, Plumbi Iodidum—p. Iodatum, Plumbi Iodidum—p. Nigrum, Graphites—p. Nitricum, Plumbi nitras—p. Oxidatum, Plumbi oxydum semivitreum—p. Oxidatum carbonicum, Plumbi subcarbonas—p. Oxidatum rubrum, Plumbi oxydum rubrum—p. Superoxydatum, Plumbi oxydum semivitreum.

PLUMIERA ALBA; *Order*, Apocynaceæ; a native of tropical America, has a milky juice which is cathartic.

PLUMIERA DRAS'TICA, is given in Brazil in jaundice, and chronic obstructions, [?] mixed with milk of almonds.

PLUMIERA PHAGEDÆNICA, is in repute in Brazil as an anthelmintic.

PLUMS, SEEDED, see Diospyros Virginiana—p. Winter, see Diospyros Virginiana—p. Yellow, see Diospyros Virginiana.

PLUNGE BATH, see Bath.

PLUNGING SIPHON, see Siphon.

PLUNKETT'S CAUSTIC FOR CANCERS, Plunkett's Ointment.

PLUNKETT'S OINTMENT, *Plunkett's Caustic for Cancers*. This empirical cancer remedy consists of *Arsenious acid*, *Sulphur*, and the powdered flowers of the *Ranunculus flammula* and *Cotula fetida*:—levigated and made into a paste with the white of egg, and applied, on a piece of pig's bladder, to the surface of the cancer.

PLURAL BIRTH, see Multiparous.

PLU'TEA. Avicenna gives this name to duplicatures of the dura mater, such as the *Falx cerebri*.

PLUTONIUM, Barium.

PNEOBIDIOMANTIA, Docimasia pulmonum.

PNEOBIDIOMANTICA, Docimasia pulmonum.

PNEUMA, Air, Life. See Pneumatic Physiology.

PNEUMAPOSTEMA, *Pneumapostema*, *Abcessus pulmonum*; from *πνευμων*, 'the lung'; and *αποστημα*, 'abscess.' Abscess of the lung.

PNEUMARTHROSIS, from *πνευμα*, 'air,' and *αρθρον*, 'articulation.' Secretion of air into an articular cavity. Seen at times after acute rheumatism, but soon disappearing [?].

PNEUMATELECTASIS, Atelectasis pulmonum.

PNEUMATHÆMIA, *Pneumathæmia*, from *πνευμα*, *πνευματος*, 'air,' and *αιμα*, 'blood.' A morbid condition in which air is developed in the bloodvessels.—Cless.

PNEUMATHORAX, Pneumothorax.

PNEUMATIC, *Pneumaticus*, *Pneumatical*. (F.) *Pneumatique*, from *πνευμα*, *πνευματος*, 'life, air.' Relating to pneuma, air or health.

PNEUMATIC PHYSICIANS, *Pneumatici*. Name given to a sect of physicians, at the head of whom was Athenæus, who made health and disease to consist in the different proportions of an element—which they called *Pneuma*, *πνευμα*—to those of the other elementary principles. This *πνευμα* was a fancied spiritual principle, which the Stoics regarded as an element, different from water, air, earth and fire;—the sole elementary principles previously admitted.

PNEUMATICA, from *πνευμα*, *πνευματος*, 'air.' Appertaining to the breathing. Diseases of the respiratory function;—the second class in Good's system of nosology. Agents that act on the respiratory organs.—Pereira.

PNEUMATICAL, Pneumatic.

PNEUMATOCELE, Physocele.

PNEUMATODES, from *πνευμα*, 'wind,' and

ειδος, 'resemblance.' One distended with air, or who breathes with difficulty, owing to an accumulation of flatus in the digestive tube; or, according to others, owing to emphysema.

PNEUMATOMETER, Spirometer.

PNEUMATOMPHALOCELE, Pneumatomphalus.

PNEUMATOMPHALUS, *Pneumatomphalus*, from *πνευμα*, *πνευματος*, 'air,' and *ομφαλος*, 'the umbilicus.' Umbilical intestinal hernia, containing a considerable quantity of flatus.

PNEUMATORRHACHIS, from *πνευμο*, *πνευματος*, 'air,' and *ραχις*, 'the spine.' Accumulation of air in the vertebral canal.

PNEUMATOSE, Pneumatosis—p. *Péritonéale*, Tympanites.

PNEUMATOSIS, *Aërosis*, from *πνευμα*, *πνευματος*, 'air.' *Flatus*, (F.) *Maladie venteuse*, *Pneumatose*. Flatulence. Flatulent distension of the stomach or bowels, or both. Sauvages uses the word synonymously with emphysema. It is now generally employed for every abnormal collection of gaseous matters in any part of the body.

PNEUMATOSIS, Emphysema—p. Abdominis, Tympanitis—p. Enterica, Colica flatulenta—p. Pericardii, Pneumo-pericardium—p. Pulmonum, Emphysema of the lungs—p. Ventriculi, et Pneumatosis enterica, Flatulence.

PNEUMATOTHORAX, Pneumothorax.

PNEUMECTASIS, Emphysema of the Lungs.

PNEUMOCACE, Neopneumonia.

PNEUMOCELÈ, *Hernia pulmonis*, (F.) *Hernie du poulmon*. Hernia of the lung through one of the intercostal spaces.

PNEUMOCHOLOSIS, Pneumonia (bilious).

PNEUMOCHYSIS, Œdema of the lungs.

PNEUMOËCTASIE, Emphysema of the lungs.

PNEUMOGAS'TRIC, *Pneumogastricus*, (F.) *Pneumogastrique*, from *πνευμων*, 'the lung,' and *γαστηρ*, 'the stomach.' Belonging to the lungs and stomach.

PNEUMOGASTRIC NERVES, *Eighth pair of nerves* (*Tenth pair*, of some), *Par vagum*, *Pars vago*, *Nervus vagus seu ambulatarius seu pneumogastricus seu dec'imus seu sympathicus medius*, *Middle sympathetic*, (F.) *Nerfs pneumogastriques ou vagues*; so called because it is distributed especially to the organs contained in the chest and abdomen. This nerve arises from behind the eminentiæ olivariæ and near the corpora restiformia by one or two rows of filaments, regularly arranged. These filaments unite to form a flat cord, which issues from the cranium by the foramen lacerum posterius; behind the glosso-pharyngeal nerve. At its exit from the cranium, the pneumogastric nerve has the appearance of a very compact plexus—*Plexus gangliiformis*, *Ganglion of the superior laryngeal branch*, of Sir Astley Cooper. It then descends along the neck, deeply seated on the outside of the carotid artery and the internal jugular vein. When it has attained the lower part of the neck, it enters the chest, gliding behind the subclavian vein, and passing on the right side, in front of the subclavian artery, and, on the left, before the arch of the aorta. It proceeds, at first, backwards, increasing in size. Afterwards, it passes from behind the bronchia to the œsophagus, which it accompanies through the diaphragm, and terminates on the stomach. In the neck, the pneumogastric nerve anastomoses with the spinal, glosso-pharyngeal, great hypo-glossal, and great sympathetic nerves; and furnishes, 1, a *pharyngeal branch*, 2, a *superior laryngeal*, 3, *cardiac branches*. In the chest, it

gives off, 1, the *inferior laryngeal*, or *recurrent*, 2, the *pulmonary plexus*, and, 3, the *oesophageal branches*. On entering the abdomen, the oesophageal branches, which terminate the pneumogastric, are distributed upon the stomach, and give numerous filaments to that viscus, to the hepatic, cœliac, gastro-epiploic, and solar plexuses. Some go, also, to the pancreas, liver, gall-bladder, duodenum, &c.

PNEUMOGRAPHY, *Pneumographia*, from *πνευμων*, 'the lung,' and *γραφη*, 'a description.' The part of anatomy that describes the lungs.

PNEUMOLITHIASIS, from *πνευμων*, 'lung,' and *λιθιασις*, 'formation of stone.' A morbid state in which calculi form in the lungs.

PNEUMOLOG'Y, *Pneumologia*, from *πνευμων*, 'the lung,' and *λογος*, 'a discourse.' An anatomical treatise on the lungs. An anatomical description of the lungs.

PNEUMOMETER, Spirometer.

PNEUMOM'ETRY, *Pneumometria*, from *πνευμων*, 'the lung,' and *μετρον*, 'measure.' Measurement of the capacity of the lungs for air. See Spirometer.

PNEUMON, Pulmo.

PNEUMONALGIA, Angina pectoris.

PNEUMONATELECTASIS, Atelectasis pulmonum.

PNEUMONĒCROSIE, Necro-pneumonia.

PNEUMONECTASIS, Emphysema pulmonum.

PNEUMONEMPHRAX'IS, from *πνευμων*, 'the lung,' and *εμφραξις*, 'obstruction.' Congestion and infarction of the lungs.

PNEUMON'IA, *Peripneumonia*, *Empres'ma pneumonitis*, *Pleumonia*, *Peripneumonia*, *Pneumonitis*, *Pulmonia*, *Pulmonaria*, *Inflammatio pneumonica*, *I. pectoris acuta seu pulmonum*, *Pneumostasis*, *Febris pneumonica*, *Pneumony*, *Peripneumony*, *Inflammation of the Lungs*, *Lung-fever* (vulgarly), (F.) *Inflammation des poumons*, *Fèvre pneumonique ou péripneumonique*, *Fluxion de poitrine*, *Inflammation du parenchyme pulmonaire*. From *πνευμων*, 'the lung.' The chief symptoms of pneumonia are:—pyrexia, accompanied by pain, sometimes obtuse; at others pungent,—in some part of the thorax; pulse more or less quick and hard, according to the violence and extent of the local disorder; pain, aggravated by the cough, which, with dyspnoea, exists throughout the disease. At first, the expectoration is difficult and painful; but, in the course of a few days, it becomes free, and the oppression of breathing is mitigated. When the inflammation, instead of going off by resolution, passes on to suppuration, rigors are experienced; the respiration becomes more oppressed, but less painful, and a sense of weight is felt in one of the pleuræ. Pneumonia may, also, terminate by gangrene—but this rarely happens,—by induration and by hepatization.

Physical Signs. **FIRST STAGE**, (F.) *Engouement*. Diminution of the sound is generally observed over the affected part on percussion; auscultation exhibits an equal, dry, crepitating *râle*, which is best heard at the close of a deep inspiration, and on coughing. The respiratory murmur is intermingled with the crepitant *râle*, or it may be absent. In the neighbourhood of the affected parts it is natural or puerile. The voice and cough are rather more resonant than usual. **SECOND STAGE**, (F.) *Hépatisation rouge*. When hepatization has occurred, the motion of the affected side is impeded, and immediately above the sternum and in the corresponding triangular space on either side, there is often an evident depression. Percussion is dull over the affected

part in every position of the patient. On auscultation, the crepitation is found to be replaced by bronchial respiration. The respiratory murmur is louder in the other portions of the lung, the voice and cough are more resonant, and the heart's action is more distinct. **THIRD STAGE**, (F.) *Hépatisation grise*. When suppuration supervenes, the same signs persist; but usually the voice and cough are less resonant, and a coarse, mucous *râle* is heard. When gangrenous or suppurative cavities are formed, they present the ordinary signs.

The prognosis must be guarded. It is not a disease which we can always subdue. Great extent of inflammation; very considerable oppression; orthopnoea, and difficult expectoration are unfavourable symptoms. The most active treatment is of course necessary. General bleeding forms the sheet anchor,—employed so as to make a decided impression on the system, and repeated, if necessary; local blood-letting; nauseating doses of antimonials; purgatives; and when the violence of the inflammation has been got under,—counter-irritants, &c. Chronic pneumonia sometimes succeeds the acute, and, at others, occurs accidentally. It must be managed on general principles. Small bleedings, especially locally; and counter-irritants of all kinds are indicated.

PNEUMONIA BILIOSA, P. bilious.

PNEUMONIA, BIL'IOUS, P. *bilio'sa*, *Pneumocholosis*. Inflammation of the lungs, accompanied by gastric fever, and not uncommonly by typhoid symptoms;—*Pneumotiphus*, *Pneumonia typhoides seu typhoides seu typho'sa*, *Putrid*, *typhoid*, *adynamic*, or *erysipel'atous pneumonia*.

PNEUMONIA, ERYSIPEL'ATOUS, P. bilious — p. Gangrenosa, Necropneumonia — p. Hypostatica, Pneumoniopostasis — p. Intermittens, Pneumotypsis — p. Lobular, see Lobular — p. Notha, Peripneumonia notha — p. Pleuritis, Pleuropneumonia — p. Putrid, P. bilious — p. Typhodes, P. bilious — p. Typhoid, P. bilious — p. Typhosa, P. bilious, Necropneumonia — p. Vesicular, Bronchitis, vesicular.

PNEUMONIC, Pulmonic.

PNEUMON'ICA. From *πνευμων*, 'the lung.' Diseases affecting the lungs, their membranes or motive power; characterized by irregular, impeded, or painful respiration. The second order of the class Pneumatica of Good.

PNEUMONIC'ULA, diminutive of pneumonia. A slight inflammation of the lung.

PNEUMONICUS, Pulmonic.

PNEUMONIE, Pneumonia — p. *Disséminée*, see Lobular — p. *Lobulaire*, see Lobular — p. *Mamelonnée*, see Lobular.

PNEUMONIE DES AGONISANTS, *Pneumonie hypostatique*. The hyperæmic engorgement, which takes place in the lungs during the last moments of life, has been so termed. It would seem to be hyperæmia rather than inflammation.

PNEUMONIT'IC, *Pneumonit'icus*. Of, or belonging to pneumonitis, or inflammation of the lungs.

PNEUMONITIS, Pneumonia.

PNEUMONOCARCINO'MA, from *πνευμων*, 'the lung,' and *καρκινωμα*, 'cancer.' Cancer of the lungs.

PNEUMONOCE'LE, from *πνευμων*, 'the lung,' and *κηλη*, 'rupture.' Hernia of the lung.

PNEUMONOCE'LE DIAPHRAGMAT'ICA INTER'NA. Hernia of the lung through the diaphragm.

PNEUMONOCELE EXTER'NA seu **THORAC'ICA**. Hernia through the parietes of the chest.

PNEUMONOCELE THORACICA, Pn. externa.
 PNEUMONŒDEMA, Œdema of the lungs.
 PNEUMONOMELANOSIS, see Melanosis.
 PNEUMONOMETER, Spirometer.
 PNEUMONOPHTHISIS, Phthisis pulmonalis.
 PNEUMONOPHTHOE, Phthisis pulmonalis.
 PNEUMONOPLEURESIS, Pleuroperipneumony.

PNEUMONOPLEURITIS, Pleuroperipneumony.

PNEUMONORRHAGIA, Hæmoptysis.

PNEUMONORRHŒA, Hæmoptysis.

PNEUMONOSCIRRHUS, from *πνευμων*, 'the lung,' and *σκιρρος*, 'induration.' Induration of the lungs.

PNEUMONOSES, *Pneumoses*.

PNEUMONY, Pneumonia.

PNEUMONYPOSTASIS, *Pneumonia hypostatica*. Pneumonia in a depending portion of the lung, caused by lying on the back.

PNEUMOPÉRICARDE, Pneumo-pericardium.

PNEUMO-PERICARDIUM, *Pneumo-pericarditis*, *Pneumato'sis pericard'ii*, (F.) *Pneumopéricarde*, from *πνευμα*, 'air,' and *περικάρδιον*, 'pericardium.' Laënnec designates, under this name, the effusion of air into the cavity of the pericardium.

PNEUMOPHTHISIS, Phthisis pulmonalis.

PNEUMOPHYMATA, Tubercles of the lungs.

PNEUMOPLEURESIS, Pleuroperipneumony.

PNEUMOPHTHOE, Phthisis pulmonalis.

PNEUMORRHAGIA, Hæmoptysis — p. Interna, Hæmatothorax.

PNEUMOSEPSIS, Necropneumonia.

PNEUMOSSES, from *πνευμων*, 'the lung.' A term under which Alibert comprises every morbid affection of the lungs.

PNEUMOTHORAX, *Pneumothorax*, *Pneumatothorax*, *Emphyse'ma pectoris*, *Asthma æri-um* seu *emphysematicum*, *Dyspnœa pneumatica* seu *physiothorac'ica*, *Physothorax*, *Ærothorax*, *Æropleurie* (Piorry), from *πνευμα*, 'air,' and *θώραξ*, 'the thorax.' An accumulation of air in the cavity of the pleura. A complaint generally sudden in its invasion and fatal in its character. In many instances, along with the air, a liquid is effused, — *Hydropneumothorax*. The disease may be spontaneous and simple, but in a large proportion of cases it is complicated with pleurisy and pulmonary tubercles. The signs vary according as there is, or is not, a communication between the pleura and the bronchia. The affected side gives a hollow, tympanitic sound, even where the thickness of the parietes of the thorax is great. When the effusion is considerable, the affected side is dilated, but there is no *râle* of any kind. When a gaseous and a liquid effusion are present at the same time, the sound on percussion is found to be clear at the superior part of the thorax, but dull inferiorly; hence, by varying the position of the patient, and by consequence that of the contained fluids, the seats of the clear and the dull sound will be varied. When the gaseous effusion is owing to a fistulous communication between the pleura and bronchia, the metallic respiration and resonances are heard; and if there be both gaseous and liquid effusion, with a fistulous communication, in addition to these signs there is the *tintement métallique*. The presence of liquid can always be ascertained by succussion. See Emphysema of the lungs.

PNEUMOTOMY, *Pneumotomia*, from *πνευμων*,

'the lung,' and *τεμνω*, 'I cut.' Dissection of the lungs.

PNEUMOTYPHUS, Pneumonia, typhoid.

PNEUMOTYPO'SIS, *Pneumonia intermit-tens*, from *πνευμων*, 'the lung,' and *τυπος*, 'a stamp, a type.' Pneumonia characterized by periodicity.

PNEUOBIDMANTIA, Docimasia pulmonum.

PNEUSIOBIOGNOSIS, Docimasia pulmonum.

PNEUSIOBIOSCOPE, Docimasia pulmonum.

PNEUSIS, Respiration — p. Pertussis, Pertussis — p. Singultus, Singultus — p. Tussis, Tussis.

PNEUSOMETER, Spirometer.

PNIGALION, Incubus.

PNIGMOS, Orthopnœa, Strangulation.

PNIGOPHOBIA, Angina pectoris, Suffocation.

PNIX, Orthopnœa, Strangulation.

PNOE, Aura.

PNEUM. A nostrum of Dr. Samuel Hahnemann, the founder of the 'Homœopathic System,' which consisted — it is said — of borax only!

PNOOCOLYTICUS, Asthmatic.

POAD-MILK, Colostrum.

POCHE DES EAUX, see Liquor Amnii, and Parturition.

POCK, from Teut. *pocca*, 'pock' or little pouch.' A pustule of smallpox.

POCK-ARR, Pock-mark, see Cicatrix — p. Kine, Vaccina.

POCKFRETTE, see Pockmark.

POCKHOLE, Pockmark.

POCKMARK, *Pockhole*, (Prov.) *Pock-arr*, *Scrobic'ulus* seu *Cicatrix Vari'olæ*. The mark or pit or pitting left from a smallpox pustule. One pitted with smallpox is said to be *pockfretten* or *pockfredden*.

POCKY. Infected with, or appertaining to, or resembling, smallpox or syphilis.

POC'ULUM ABSINTHIA'TUM. This was regarded, in remote ages, as a wholesome beverage; the *absinthium*, or 'wormwood,' being supposed to act as an antidote to drunkenness.

POCULUM AMATORIUM, Philter — p. Degenis, Palm — p. Emeticum, Gohlet, emetic.

POD'AGRA, *Podarthrit'is*, *Podorrheu'ma*, *Podal'gia*, from *πους*, *ποδος*, 'the foot,' and *αγρα*, 'seizure.' Pain which attacks the feet. Gout, situate in the articulations of the foot. It has, also, been used in a more extensive signification synonymously with *gout*.

PODAGRA ABERRANS, Gout, (wandering) — p. Arthritis, Gout — p. Retrograda, Gout, (retrograde.)

PODAGRARIA, Ligusticum podagraria — p. Ægopodium, Ligusticum podagraria.

PODAG'RIC, *Podagr'ical*, *Podagr'icus*, *Arthrit'icus*, *Arthrit'ic*, *Gouty*, (F.) *Goutteux*. Relating or belonging to gout. Affected with, or liable to gout.

PODALGIA, Gout, Podagra.

PODALYRIA TINCTORIA, Sophora tinctoria.

PODANENCEPHALIA, see Podencephalus.

PODARTHTRITIS, Podagra.

PODARTHROC'ACÈ, from *πους*, *ποδος*, 'the foot,' *άρθρον*, 'an articulation,' and *κακος*, 'bad.' Caries of the articulation of the foot.

PODENCEPHALIA, see Podencephalus.

PODENCEPH'ALUS, *Podanenceph'alus*, from *πους*, *ποδος*, 'the foot,' and *κεφαλη*, 'the head.' A monster whose brain is placed outside the skull, and seems to be supported on a pedicle, which traverses the summit of the skull. This state of

monstrosity is termed *Podanencephalia*, or more properly, *Podencephalia*.—I. G. St. Hilaire.

PODEX, Anus, Nates.

PODEDE'MA, from *πους*, *πόδος*, 'foot,' and *οίδημα*, 'a swelling.' Œdema of the foot.

PODOL'OGY, *Podolog'ia*, from *πους*, *πόδος*, 'the foot,' and *λογος*, 'a discourse.' A description of the foot. A treatise on the foot.

PODOPHYLLUM PELTATUM, *Podophyllum*, *Anapodophyllum Canadense*, *May-apple*, *Mandrake*. Ord. Berberidaceæ. *Sex. Syst.* Polyandria Monogynia; from *πους*, *πόδος*, 'a foot,' and *φυλλον*, 'a leaf,' in reference to the shape of the leaf. A common plant throughout North America. The fruit is eatable, and esteemed by many. The leaves are said to be poisonous. The root or rhizoma, *Podophyllum* (Ph. U. S.), is purgative in the dose of 20 grains. It has also been used as an antelmintic.

PODOPHYLLUM MONTANUM, *Mountain May-apple*, *Mandrake*, *Wild Lemon*, *Ducksfoot*, *Raccoon Berry*, *Yellow Berry*, *Ground Lemon*, has the same properties.

PODORRHEUMA, Podagra.

PODOTHÉ'CA, from *πους*, *πόδος*, 'a foot,' and *θηκη*, 'a receptacle, a sheath.' The cuticle of the foot. An anatomical preparation. *Chirotheca*, has been used for the cuticle of the hand.

POËLETTE, Cup, Palette.

POË'PHAGUS, from *πους*, or *παι*, 'a plant, an herb,' and *φαγω*, 'I eat.' One who subsists on herbs or vegetables. The act of subsisting on feeding on herbs or vegetables is called *Poëphagia*. Hence Strabo calls the Irish *ποηφαγοι*.

POGON, Beard.

POGONIASIS, *Pogonia*, from *πωγων*, 'the beard.' A female beard. Also, great strength or quantity of beard. A female having a beard—*Virago*.

POGONIUM, *πωγωνιον*, diminutive of *πωγων*, 'beard.' A weak or small beard.

POGONOL'OGY, *Pogonolog'ia*, from *πωγων*, 'a beard,' and *λογος*, 'a description.' A description of, or treatise on, the beard.

POGOSTEMON INTERMEDIUS, P. Patchouli.

POGOSTEMON PATCHOULI, *P. Suavis* seu *intermedius*, *Pucha-Pat*, *Patchouli*. *Nat. Ord.* Labiatae. Native of Penang and the Malayan peninsula. The oil is used as a perfume. The distilled oil is used for the same purpose.

POGOSTEMON SUAVIS, P. Patchouli.

POHON ANTIAR, Upas—p. Upas, Upas.

POI, A favourite aliment in the Sandwich Islands. It is a sort of paste made from the root of the Kalo—*Arum esculentum*.

POIDS ET MÉSURE, Weights and measures.

POIGNÉE, Manipulus.

POIGNET, Carpus.

POIL, Galactocoele, Hair.

POILETTE, Cup.

POILS, see *Typha latifolia*.

POING, Fist.

POINT, Stitch.

POINT, BLISTERING. A name given by Dr. Rush to an indeterminate period in the course of a continued fever, intermediate between the stages of high excitement and collapse, in which blisters will—he thought—usually produce unequivocally good effects.

POINT DE COTÉ, Pleurodynia.

POINTS LACRYMAUX, Lachrymalia puncta.

POIRE, see *Pyrus communis*.

POIREAU, Allium porrum, Verruca.

POIRIER, *Pyrus communis*.

POIS, Pisum—p. à Cautère, see *Foniculus*—p. Chiche, *Cicer arietinum*—p. Cultivé, Pisum—p. à Gratter, *Dolichos pruriens*—p. Patate, *Dolichos tuberosus*.

POISON, *Phar'macon*, *Phar'macum*, *Toxicum*, *Vene'num*, *Virus*, *Delete'rium*, *Venend'tion*, (F.) *Poison*. A generic name for all substances which, when introduced into the animal economy, either by cutaneous absorption, respiration, or the digestive canal, act in a noxious manner on the vital properties or the texture of organs. Hence we speak of *fever poison*, *cholera poison*, &c. Poisons exist in the three kingdoms of nature; but those which proceed from animals are often called *venoms*, as the venom of the viper, scorpion, tarantula, &c.; whilst those that are the products of disease have the name *virus*. In common parlance, therefore, *poison* is restricted to deleterious articles, furnished by the mineral and vegetable kingdoms. Orfila has divided poisons into four classes. 1. ACRID, IR'RITATING, CORRO'SIVE, or ESCHAROT'IC, such as the concentrated acids and alkalies; mercurial, arsenical, cupreous, and antimonial compounds, cantharides, &c. 2. NARCOT'IC; those that act particularly upon the brain; as hyoscyamus, opium, &c., but without inflaming the organ with which they come in contact. 3. NARCOT'ICO-ACRID or ACRO-NARCOT'IC;—those that act on the brain, but, at the same time, irritate the parts to which they are applied; as aconite, belladonna, &c. 4. SEPTIC or PUTRES'CENT;—those furnished by the animal kingdom. See *Venom* and *Virus*. Various classifications, of a similar character, have been recommended by different toxicologists; but they are liable to the objection, that they throw substances together whose physiological action on the system is very different. It is, indeed, difficult to avoid unnatural compression of matters into places not properly belonging to them, in all such arrangements.

The following table, which exhibits a *comp d'œil* of the chief poisons, with most of the circumstances of importance connected with them, is not free from these objections

TABLE, EXHIBITING THE SYMPTOMS, TREATMENT, AND MODE OF DETECTING THE VARIOUS POISONS, MINERAL, VEGETABLE AND ANIMAL.

N. B. In all cases the Stomach-Pump should be used as soon as possible.

I. INORGANIC POISONS.

POISONS.	SYMPTOMS.	TREATMENT.	TESTS.
ACIDS. — <i>Acetic Acid.</i> — <i>Citric Acid.</i> — <i>Muriatic Acid.</i> — <i>Nitric Acid.</i> — <i>Sulphuric Acid.</i> — <i>Tartaric Acid.</i> — <i>Ozalic Acid.</i>	The acids, generally, are strong corrosive poisons. Sour, acrid taste, burning in the throat, which is increased by pressure, swallowing, or coughing; eructation, and excruciating pain in the stomach; more or less corrugation of the lining membranes of the mouth and primæ viæ; excoriation about the mouth or such other parts of the skin as the acid may have touched. The matter vomited effervesces with carbonate of lime. The countenance becomes glazed, extremities cold and clammy; convulsions and death. Nitric acid occasions yellow stains, and sulphuric acid, black.	The carbonates of soda, potassa, lime and magnesia, are all antidotes to the acids; calcined magnesia also. They are to be used with the following restrictions: for the acetic, citric, muriatic, sulphuric, and tartaric acids, they may be used indiscriminately. For the nitric and oxalic, carbonates of magnesia and lime can alone be employed with safety. In the case of sulphuric acid, water should not be drunk, on account of the great heat which is produced by their mixture. Subsequent inflammation to be treated by ordinary means. The carbonates of the alkalis and of magnesia and lime have the inconvenience, that a large quantity of gas is extricated in the stomach. Ammonia is an antidote; but it should not be employed in a very concentrated form. Liquid chlorine has also been found efficacious. The cold <i>douche</i> to the head has been recommended.	<i>Sulphuric acid</i> is known by a white precipitate with any salt of baryta, insoluble in nitric acid. <i>Muriatic acid</i> is known by a white precipitate with nitrate of silver, insoluble in nitric acid, which turns black by the action of light. <i>Nitric acid</i> gives rise to orange-coloured fumes, when copper is placed in it, and an ability to dissolve gold when mixed with muriatic acid. <i>Acetic acid</i> exhales the odour of vinegar. <i>Citric acid</i> blackens when heated. <i>Tartaric acid</i> precipitates crystals, with a solution of potassa; and a white precipitate is thrown down by lime-water. <i>Ozalic acid</i> gives a white precipitate with lime-water, which, when heated, is converted into carbonate of lime.
<i>Prussic Acid.</i> — <i>Oil of Bitter Almonds.</i> — <i>Laurel Water.</i>	Is a sedative poison; nausea, giddiness, debility, hurried pulse, weight and pain in the head; eructations having the flavour of the acid; spasms, tetanus, contracted pupil; convulsions, death.		<i>Prussic acid</i> exhales the odour of peach-kernels; forms a white precipitate with nitrate of silver neutralized with an alkali, gives a blue precipitate with the persalts of iron.
ALKALIES and their SALTS. — AMMONIA, <i>Strong Liquor or Water of.</i> — <i>Muriate of Ammonia or Sal Ammoniac.</i> — POTASSA. <i>Caustic Potassa, and Liquor Potassæ.</i> — <i>Carbonate of Potassa, or Pearl Ash, and Salt of Tartar.</i> — <i>Nitrate of Potassa or Saltpetre.</i> — <i>Sulphuret of Potassium or Liver of Sulphur.</i> — SODA.	Violent, caustic, acrid taste; great heat in the throat, with destruction of its lining membrane; difficult and painful deglutition; vomiting of bloody matter, which turns the yellow of turmeric brown; acute pain in the stomach; cold sweats, weakness, hicough; violent colic pains, with purging of bloody stools and membranous flakes; death.	The vegetable acids, such as vinegar, lemon juice, citric and tartaric acid in solution are antidotes to the alkalis and their carbonates. The fixed oils, such as castor, linseed, almond and olive, form soaps with the free alkalis, and therefore destroy their caustic effects. Poisoning by nitrate of potassa to be treated on general antiphlogistic principles; mucilaginous drinks. Liver of sulphur is said to be decomposed and neutralized by common salt. The liquid chloride of soda will also decompose it.	The alkalis are known by their action on turmeric paper: restoring the colour of litmus, which has been reddened by an acid. Carbonates are known by their effervescence with an acid; some of them affect the turmeric paper. Sal ammoniac gives out the pungent odour of ammonia, when mixed with quicklime. Nitrate of potassa decrepitates and deflagrates when thrown on hot coals. Liver of sulphur emits the odour of sulphuretted hydrogen when dissolved, or when treated with an acid.
EARTHS and COMPOUNDS. — BARYTA. <i>Carbonate of Baryta.</i> — <i>Chloride of Baryum.</i> — <i>Nitrate of Baryta.</i> — LIME.	Analogous to those of the corrosive metals. Violent burning in the stomach, vomiting, gripes, diarrhœa; excessive muscular debility, headache, convulsions, death. Lime differs from baryta in being a pure irritant.	The sulphates of soda and magnesia are prompt and effective antidotes to all the poisonous salts of baryta. Phosphate of soda will also counteract their effects. Lime may be neutralized by dilute acids. Carbonic acid, in soda-water, effervescing draught or yeast, it is supposed, would answer a good purpose. The fixed oils may be employed either for baryta or lime, when not in a compound state.	Baryta and its salts invariably give a white precipitate, insoluble in acid, with a soluble sulphate, Lime, when dissolved, gives a white precipitate with oxalic acid. Also with carbonic acid or a soluble carbonate. The same of baryta.

POISONS.	SYMPTOMS.	TREATMENT.	TESTS.
<p>ALCOHOL. — <i>Brandy, Wines, and all Spirituous Liquors.</i></p>	<p>Intoxication, and when taken very freely, complete insensibility, with apoplexy or paralysis of one side; the countenance swollen and of a dark-red colour; the breathing difficult, and often stertorous, with a peculiar puffing out of the lips; the breath smells of liquor, which will distinguish the symptoms from those of spontaneous apoplexy.</p>	<p>A powerful emetic of white vitriol, or tartar emetic, should be got into the stomach as soon as possible; and if the person has lost the power of swallowing, a flexible catheter or tube should be the means of conveying it thither. The vomiting should be encouraged as much as possible with warm water; and large and active glysters of salt and water should be thrown up. The patient should be placed erect, and if the countenance and other appearances be not improved after these means have been used, the jugular vein may be opened, and cold wet cloths applied to the head, particularly if the body be hotter than natural. If the extremities become cold, warmth and friction should be perseveringly used.</p>	
<p>VOLATILE OILS. — <i>Creasote.</i> — <i>Dippel's Animal Oil.</i> — <i>Oil of Tar.</i> — <i>Oil of Tobacco.</i> — <i>Oil of Turpentine.</i> — <i>Fusel Oil.</i></p>	<p>General action, that of irritant poisons. Burning pain, vomiting, pungent taste, purging, &c. The oils of turpentine and tobacco affect the nervous system; the peculiar odour of each oil will be manifested in the matter vomited.</p>	<p>Creasote is immediately coagulated by albumen Dippel's animal oil may be counteracted with dilute acids and the fixed oils. The other oils have no particular antidotes, and their effects must, therefore, be counteracted upon general principles.</p>	<p>No better mode of recognizing these substances exists, than that derived from their peculiar odour. Dippel's oil has the pungent odour of ammonia; creasote and oil of tar, a peculiar smell of smoke; the odour of tobacco and turpentine are well known; and fusel oil has a peculiar, offensive, suffocating odour.</p>
<p>GASES. <i>Carbonic Acid, or Fixed Air.</i> — <i>Carbonic Oxide.</i> — <i>Fumes of Burning Charcoal.</i> — <i>Chlorine.</i> — <i>Sulphuretted Hydrogen.</i></p>	<p>Chlorine produces, when inhaled, violent irritation of the organs of respiration; cough, bloody expectoration, inflammation of the lungs, and permanent pulmonary disease. The other gases, although producing some effect on the respiratory organs, act as poisons, in consequence of their sedative agency. The symptoms, therefore, are those of apoplexy, or narcotic poisoning.</p>	<p>The antidotes to chlorine are the cautious inhalation of ammonia, or sulphuretted hydrogen. The inflammatory symptoms from chlorine to be treated on general principles. For the other gases, cold affusions to the head, blood-letting, artificial respiration.</p>	<p>Chlorine is recognized by its peculiar odour and bleaching properties. Sulphuretted hydrogen, by its fetid smell, and the rapid blackening of lead. Carbonic acid, by its occasioning turbidness in lime-water placed in its atmosphere. Carbonic oxide, by the blue colour of its flame.</p>
<p>IODINE. — <i>Iodide of Potassium.</i></p>	<p>Irritant symptoms; burning pain in the throat, lacerating pain in the stomach, and fruitless efforts to vomit; suffusion of the eyes; excessive pain and tenderness of the epigastrium.</p>	<p>Iodine combines with starch, and forms an insoluble compound. The prompt administration of starch, wheat flour, or other vegetable matter containing fecula, beat up in water, is recommended. Iodide of potassium has no antidote. Vomiting should be promoted by draughts of warm water, and inflammation be subdued by general treatment.</p>	<p>Iodine is known by its odour, and the formation of a blue precipitate, when brought in contact with a cold solution of starch. Iodide of potassium gives a crystalline precipitate, with tartaric acid in excess. The supernatant fluid will give the blue colour to starch.</p>
<p>METALS. — ANTIMONY. — <i>Tartar Emetic.</i> — <i>Chloride, or Butter of Antimony.</i> — <i>Oxide of Antimony.</i></p>	<p>Vomiting. If vomiting do not occur promptly, violent irritant effects are produced. Burning pain in the pit of the stomach; Purging; colicky pains, sense of tightness in the throat, violent cramps; repeated recurrence of vomiting.</p>	<p>If vomiting have not been produced, it should be brought about by tickling the fauces, and administering copious draughts of warm water. Astringent infusions, such as of galls, oak bark, Peruvian bark, act as antidotes, and should be given promptly; powdered yellow bark may be used, until the infusion is prepared.</p>	<p>Antimony in solution is best distinguished by the peculiar orange-red precipitate, which it forms with sulphuretted hydrogen or solutions of the hydrosulphates. Free alkalis produce white precipitates. The muriate is known by a white precipitate, when it is poured into water. In its solid forms, it may be known by the formation of white fumes, when heated, which reddens litmus. It may also be converted into chloride, and then precipitated by adding water.</p>

POISONS.	SYMPTOMS.	TREATMENT.	TESTS.
<p>ARSENIC. <i>Arsenious Acid, or White Arsenic.</i> <i>Orpiment, or Yellow Sulphuret of Arsenic.</i> <i>King's Yellow.</i> <i>Realgar, or Red Sulphuret of Arsenic.</i> <i>Fly Powder.</i> <i>Fowler's Solution.</i> <i>Arsenical Paste.</i> <i>Arsenical Soap.</i> <i>Arsenite of Copper.</i> <i>Scheele's Green.</i></p>	<p>Violent burning pain in the region of the stomach and bowels; tenderness on pressure; retching: vomiting; sense of dryness and tightness in the throat; thirst; hoarseness and difficulty of speech; the matter vomited, greenish or yellowish, sometimes streaked with blood; diarrhœa; tenesmus; sometimes excoriation of the anus; urinary organs occasionally affected with violent burning pains and suppression; convulsions and cramps; claustrary sweats; lividity of the extremities; countenance collapsed; eyes red and sparkling; delirium; death.</p>	<p>The hydrated peroxide of iron diffused through water; or the precipitated carbonate; or the rubigo ferri, in very fine powder, to be administered every five or ten minutes, until relief is obtained. This is particularly efficacious when the <i>white arsenic</i> has been swallowed. If the arsenic have been taken in the form of Fowler's Solution, lime-water, in copious draughts, may be given. For either of the other forms, emetics of sulphate of zinc; diluents; demulcents, such as flaxseed tea, infusion of slippery elm, &c. Counter-irritants may be used to relieve the spasm, and violent pain in the stomach. Bleeding, as promoting absorption, should not be employed until the stomach is completely evacuated.</p>	<p>If the suspected substance can be obtained free from organic matter, the presence of arsenic may readily be shown by boiling it in distilled water, filtering, and testing with, 1st. Ammoniacal sulphate of copper. 2d. Ammoniacal-nitrate of silver. (<i>Hume's Test</i>) 3d. Sulphuretted hydrogen gas. The first will produce a <i>green</i> precipitate; second, a <i>pale yellow</i> precipitate; third, a <i>bright yellow</i> precipitate, if arsenic be present. A portion of the powder, or one of these precipitates, carefully and thoroughly dried, is then to be mixed with charcoal and exsiccated carbonate of soda, to be placed in a small glass tube, closed at one end, and then to be heated to a red heat in the flame of a lamp. The arsenic will be reduced, and sublime in the upper part of the tube, forming a dark crust, having considerable lustre on its exterior surface, resembling polished steel. By gently heating this crust in a very small flame, crystals of white arsenic will be formed, having a high adamantine lustre.</p>
<p>BISMUTH. <i>Nitrate of Bismuth.</i> <i>Pearl Powder.</i> <i>Oxide of Bismuth.</i> COPPER. <i>Sulphate of Copper</i> <i>Blue Vitriol.</i> <i>Acetate of Copper,</i> <i>Verdigris.</i> <i>Carbonate of Copper.</i> <i>Blue Verditer.</i> <i>Arsenite of Copper</i> <i>Scheele's Green.</i> <i>Food cooked in dirty copper vessels, or pickles made green by copper.</i></p>	<p>Similar to those produced from other irritant poisons. General inflammation of the whole alimentary canal; suppression of urine; hiccup, disagreeable metallic taste; vomiting; cramps; delirium: death.</p>	<p>Milk, and sweet mucilaginous drinks are recommended. Leeches, general bleeding; glysters; fomentations to be employed on the general principles of treatment for inflammatory symptoms.</p>	<p>If organic matter be present, it must be entirely destroyed, by heating the substance with nitromuriatic acid. After this has been done, and a clear, transparent solution in distilled water has been obtained, the subsequent process is as above indicated. If arsenious acid be submitted to the action of nascent hydrogen, it is deoxidized, and the metallic arsenic, thereby obtained, combining with hydrogen, forms arsenuretted hydrogen gas. (<i>Marsh's Test</i>.) Add to a suspected solution a few drops of pure chlorohydric acid, and place in it a slip of bright copper; no change occurs until the liquid is brought to the boiling point, when, if arsenic be present, even in small quantity, the copper acquires an iron-gray coating, from the deposit of that metal. Remove the slip of copper; wash it in water, dry it and gradually heat it in a reduction tube, when arsenious acid will be sublimed in minute octohedral crystals. The test succeeds with powdered arsenic, the arsenites, arsenic acid, the arseniates, and orpiment. It will even separate the arsenic from arsenite of copper, and from common lead-shot. <i>Reinsch's Test</i>.</p>
<p>BISMUTH. <i>Nitrate of Bismuth.</i> <i>Pearl Powder.</i> <i>Oxide of Bismuth.</i> COPPER. <i>Sulphate of Copper</i> <i>Blue Vitriol.</i> <i>Acetate of Copper,</i> <i>Verdigris.</i> <i>Carbonate of Copper.</i> <i>Blue Verditer.</i> <i>Arsenite of Copper</i> <i>Scheele's Green.</i> <i>Food cooked in dirty copper vessels, or pickles made green by copper.</i></p>	<p>Very similar to those produced by arsenic. Coppery eructations and taste. Fatal cases are generally terminated by convulsions, palsy, insensibility.</p>	<p>Albumen to be administered in either of its forms which can be most readily obtained, as milk or whites of eggs. Vinegar should not be given. The inflammatory symptoms are to be treated on general principles, and so of the nervous.</p>	<p>Bismuth is known by the formation of a white precipitate, when its solution in nitric acid is poured into water; and by the formation of a black precipitate with sulphuretted hydrogen gas, and hydrosulphates in solution.</p> <p>The presence of copper is readily shown in solutions. By ammonia a beautiful bluish precipitate is thrown down, which dissolves in an excess of the precipitant, and the solution has a rich blue colour. A bright iron bar, introduced into solutions of copper, occasions the separation of the copper, in a metallic form, which deposits itself upon the iron.</p>

POISONS.	SYMPTOMS.	TREATMENT.	TESTS.
GOLD. <i>Chloride of Gold.</i> <i>Fulminating Gold.</i>	Very analogous to those of other irritant poisons. This substance communicates a pink stain to the flesh, and patches of that colour may be found about the lips, and inside the mouth.	The salts of gold are decomposed by sulphate of iron; and this has, therefore, been recommended as an antidote. Inflammatory symptoms to be treated on general principles.	Chloride of gold is very readily decomposed, and the gold separated in a metallic state. Proto-sulphate of iron, nitrate of silver and protochloride of tin, all answer this purpose. The precipitated powder will be found insoluble, except in nitro-muriatic acid.
IRON. <i>Sulphate of Iron,</i> <i>Copperas,</i> <i>Green Vitriol.</i> <i>Chloride of Iron.</i>	Symptoms of irritant poisoning; colic pains, constant vomiting and purging. Violent pain in the throat, tension of the epigastrium, coldness of the skin, and feebleness of the pulse.	Carbonate of soda would be a most excellent antidote to either of these substances. Mucilaginous drinks might also be employed; and particular symptoms relieved by general treatment.	Iron is recognised by a bluish-black precipitate, with tincture of galls; rich blue, with prussiate of potassa; and a greenish or reddish precipitate, with the free alkalies or their carbonates.
LEAD. <i>Acetate of Lead,</i> <i>Sugar of Lead.</i> <i>Carbonate of Lead,</i> <i>White Lead,</i> <i>Red Oxide, or Red Lead,</i> <i>Litharge.</i> <i>Wines sweetened by Lead.</i> <i>Water which has been kept in Lead vessels.</i> <i>Acid food, cooked, or left standing in vessels glazed with Lead.</i>	Irritation of the alimentary canal; spasm; nervous symptoms; paralysis, either partial or complete. When taken for some time, in small quantity, violent and obstinate colic; rigidity of abdominal muscles, cramps; remission of pain; obstinate constipation, urine diminished, saliva increased; countenance anxious and gloomy. If relief be not promptly obtained, giddiness, debility, torpor, coma, convulsions and death. The paralysis affects generally the upper extremities.	Sulphate of magnesia and phosphate of soda are both good antidotes for the soluble salts of lead. For the solid forms, dilute sulphuric acid may be drunk. These are applicable to the irritant forms of poisoning by lead. In the chronic form, or colica pictonum, purgatives and anodynes are resorted to; venesection; and external applications to relieve the cramps. The use of strychnia is recommended for the paralysis.	Soluble salts of lead yield a white precipitate with sulphates and carbonates in solution. Salts of chromic acid and iodide of potassium occasion a yellow precipitate. Sulphuretted hydrogen, a black precipitate. If solid, the lead may be converted into a state of solution by nitric acid, and the dilute solution be tested as above.
MERCURY. <i>Corrosive Sublimate.</i> <i>Cyanide of Mercury.</i> <i>Nitrate of Mercury.</i> <i>White Precipitate.</i> <i>Red Oxide, or Red Precipitate.</i> <i>Sulphate, or Turbith Mineral.</i> <i>Vermilion, or Red Sulphuret.</i>	Violent symptoms of irritant poisoning; harsh metallic astringent taste; burning pain in the stomach; vomiting and purging frequently of bloody matter; often irritation of the urinary organs, and sometimes suppression; tightness and burning in the throat, occasionally so great as to prevent speech; countenance not always pale, but sometimes flushed; tendency to doze; stupor, convulsions and death.	Albumen, in some form, must be promptly administered; either white of eggs beaten up with water, milk, or wheat flour beaten up. The inflammatory symptoms to be counteracted by the usual means. Gold, finely mixed in dust, with fine iron filings. (?)	The free alkalies differ in their precipitates from solutions of mercury. Potassa gives, with corrosive sublimate, a yellowish one; ammonia, a white; lime-water, an orange; and sulphuretted hydrogen, a black. If a drop of the solution be placed on a piece of gold, and touched with a knife or key, the mercury will be reduced, which amalgamates with the gold, producing a white spot. The nitrate of mercury gives a black precipitate with the free alkalies. All the solid forms of mercury are volatile, and may be reduced by heating them in a glass tube with charcoal and carbonate of soda, when the metallic mercury will sublime, and may be collected in a globe.
SILVER. <i>Nitrate of Silver,</i> <i>or Lunar Caustic.</i>	Those of other irritant poisons.	Chloride of sodium, or common salt, immediately decomposes this substance, and destroys its activity. Antiphlogistic treatment is to be employed for the inflammatory symptoms.	Nitrate of silver is distinguished by the formation of a white precipitate, insoluble in nitric acid, with chloride of sodium; a gray precipitate with ammonia, which is redissolved in an excess of ammonia; yellow precipitate with phosphate of soda. The precipitate of chloride of silver, obtained by adding muriate of soda to the nitrate of silver, is readily reduced, and the metallic silver obtained, by mixing it with dilute sulphuric acid and granulated zinc.
TIN. <i>Chloride of Tin.</i> <i>Solution of Tin,</i> <i>used by Dyers.</i> <i>Oxide of Tin, or Putty Powder.</i>	The same as those from other irritant poisons, and a peculiar tanned appearance of the villous coat of the stomach.	Milk to be given copiously, and the subsequent treatment to be regulated by the symptoms.	The chloride precipitates vegetable colouring matter; also albumen and gelatin. The white oxide is precipitated from its solution by free alkalies; with sulphuretted hydrogen gas, a brown precipitate.
ZINC. <i>Sulphate of Zinc,</i> <i>White Vitriol.</i> <i>Acetate of Zinc.</i>	Violent vomiting; astringent taste, burning pain in the stomach; pale countenance; cold extremities; dull eyes; fluttering pulse. Death seldom ensues, in consequence of the emetic effects.	The vomiting may be relieved by copious draughts of warm water. Carbonate of soda, administered in solution, will decompose the sulphate of zinc. Milk and albumen also act as antidotes. General principles to be observed in the subsequent treatment.	A white precipitate is thrown down by the free alkalies from the soluble salts of zinc, which becomes yellow when strongly heated—recovering its white colour on cooling. Sulphuretted hydrogen occasions a white precipitate.

POISONS.	SYMPTOMS.	TREATMENT.	TESTS.
PHOSPHORUS.	Symptoms of irritant poisoning; pain in the stomach and bowels; vomiting, diarrhoea, tenderness and tension of the abdomen.	An emetic to be promptly administered; copious draughts containing magnesia in suspension; mucilaginous drinks; general treatment for inflammatory symptoms.	Phosphorus is known by its ready inflammability, luminousness at ordinary temperatures, and alliaceous odour.
GLASS or ENAMEL.	If taken in very coarse powder, it produces irritation and inflammation of the bowels.	Large quantities of crumb of bread should be eaten, to envelop the particles. (?) An emetic of sulphate of zinc should then be given, and vomiting be promoted by demulcent drinks.	

II. ORGANIC POISONS.

I. VEGETABLE POISONS.

IRRITANT POISONS.	SYMPTOMS.	TREATMENT.
<p><i>Anemone pulsatilla.</i> Wind Flower. <i>Arum maculatum.</i> Wake Robin. <i>Bryonia dioica.</i> Bryony. <i>Caladium seguinum.</i> Dumbcane. <i>Calla palustris.</i> Water Arum. <i>Caltha palustris.</i> Marsh Marigold. <i>Chelidonium majus.</i> Celandine. <i>Clematis vitalba.</i> Virgin Bower. <i>Convolvulus jalapa.</i> Jalap. <i>Convolvulus scammonia.</i> Scammony. <i>Croton tiglium.</i> Purging Croton. <i>Cucumis colocynthis.</i> Colocynth. <i>Cyclamen Europæum.</i> Sow Bread. <i>Daphne gnidium.</i> Spurge Bread. <i>Daphne mezereum.</i> Mezereon. <i>Delphinium staphisagria.</i> Stavesacre. <i>Dicella palustris.</i> Swamp leather-wood. <i>Equisetum hyemale.</i> Scourgrass. <i>Euphorbia officinarum.</i> Euphorbium. <i>Spurge.</i> <i>Gratiola officinalis.</i> Hedge Hyssop. <i>Hippophae mancinella.</i> Manchineel. <i>Hura crepitans.</i> Sand Box. <i>Hydrocotyle vulgaris.</i> Marsh Pennywort. <i>Jatropha curcas.</i> Indian Nut. <i>Jatropha manihot.</i> Cassada. <i>Juniperus sabina.</i> Savin (oil of). <i>Juniperus Virginiana.</i> Bed Cedar (oil of.) <i>Momordica elaterium.</i> Squirting Cucumber. <i>Narcissus pseudo-narcissus.</i> Daffodil. <i>Pastinax sativa.</i> Common Parsnep. <i>Pedicularis palustris.</i> Marsh Lousewort. <i>Phytolacca decandra.</i> Poke. <i>Piper cubeba.</i> Cubebs. <i>Plumbago Europæa.</i> Toothwort. <i>Ranunculus acris,</i> and other species. <i>Crowfoot.</i> <i>Rhododendron chrysanthemum.</i> Oleander. <i>Ricinus communis.</i> Castor Oil Plant. <i>Sambucus cbulus.</i> Elder. <i>Sedum acre.</i> Stone Crop. <i>Stalagmitis cambogioides.</i> Gamboge. <i>Tanacetum vulgare.</i> Tansy (oil of.)</p> <p>ACRO-NARCOTIC. <i>Ethusa cynapium.</i> Common Fool's Parsley. <i>Aconitum napellus.</i> Monkshood. <i>Agaricus,</i> five species. Mushrooms (poisonous). <i>Amanita muscaria.</i> Truffles (poisonous). <i>Anagallis arvensis.</i> Meadow Pimpernel. <i>Anda Gomezii.</i> <i>Apocynum androsemfotium.</i> Dogsbane. <i>Aristolochia clematitidis.</i> Birthwort. <i>Arnica montana.</i> Leopard's bane. <i>Asclepias Syriaca.</i> Swallowwort. <i>Atropa belladonna.</i> Deadly Night Shade. <i>Æsculus Ohioensis.</i> Buckeye. <i>Brucea antidysenterica.</i> False Angustura Bark. <i>Cerbera,</i> three species. Cerbera. <i>Cherophyllum sylvestre.</i> Bastard Hemlock.</p>	<p>The general effects of this class of vegetable poisons are;—an acrid pungent taste, with more or less of bitterness, excessive heat, great dryness of the mouth and throat, with sense of tightness there; violent vomiting, the efforts being continued even after the stomach is emptied; purging, with great pain in the stomach and bowels; pulse strong, frequent, and regular; breathing often quick and difficult; appearances of intoxication; the pupil of the eye frequently dilated, insensibility resembling death; the pulse becomes slow and loses its force, and death closes the scene.</p> <p>If applied externally, many of them produce violent inflammation of the skin, with vesications or eruptions of pustules.</p>	<p>If vomiting have been occasioned by the poison, and the efforts are still continued, they may be rendered easier by large draughts of warm water, or thin gruel; but if symptoms of insensibility have come on without vomiting, it ought to be immediately excited by the sulphate of zinc, or some other active emetic substance, and after its operation a sharp purgative should be given. After as much as possible of the poison is got rid of, a very strong infusion of coffee, or vinegar diluted with water, may be given with advantage. Camphor mixture with ether may be taken frequently, and if insensibility be considerable, warmth, frictions, and blisters, may be employed. If inflammation or other dangerous consequences have been induced, they are to be treated upon general principles.</p> <p>The fruit of <i>Feuillea Cordifolia</i> has been recommended as a powerful antidote against vegetable poisons; it is to be used in as recent a state as possible. (?)</p> <p>N. B. Bromine, chlorine, and iodine are said to be antidotes to the alkalis generally.</p>

Indian War Poison. <i>Cynanchum erectum</i>. Cynanchum. <i>Cytisus laburnum</i>. Laburnum. <i>Datura stramonium</i>. Thorn Apple. <i>Digitalis purpurea</i>. Foxglove. <i>Ergot</i>. See <i>Secale</i>. <i>Eryum creticia</i>. Bitter Vetch. <i>Gaultheria procumbens</i>. Wintergreen (oil of). <i>Hemanthus toxicarius</i>. <i>Helleborus niger</i>. Black Hellebore. <i>Hypophyllum sanguinaria</i>. Paddock Stool. <i>Ipecacuanha</i>. Ipecacuanha. <i>Lathyrus cicera</i>. Lathyrus. <i>Laurus camphora</i>. Camphor. <i>Lobelia inflata</i>. Indian Tobacco. <i>Lolium temulentum</i>. Darnel. <i>Melia azederach</i>. Pride of China. <i>Mercurialis perennis</i>. Mountain Mercury. <i>Nerum oleander</i>. Common Oleander. <i>Nicotiana tabacum</i>. Tobacco. <i>Enanthe crocata</i>. Hemlock Dropwort. <i>Passiflora quadrangularis</i>. Barbadiene. <i>Fiscidia erythrina</i>. Jamaica Dogwood. <i>Polygala renenosa</i> (of Java). <i>Rhus radicans</i>. Poison Vine. <i>Rhus toxicodendron</i>. Poison oak, or Sumach. <i>Robinia pseudo-acacia</i>. Locust Tree. <i>Ruta graveolens</i>. Rue. <i>Sanguinaria Canadensis</i>. Blood Root. <i>Scilla maritima</i>. Squill. Sea Onion. <i>Secale cornutum</i>. Ergot. Spurred Rye. <i>Sium latifolium</i>. Procumbent Water Parsnep. <i>Spigelia Marilandica</i>. Pink Root. <i>Strychnos Ignatii</i>. St. Ignatius's Bean. <i>Strychnos nux vomica</i>. Nux vomica. <i>Symplocarpus fetida</i>. Skunk Cabbage. <i>Ticunas</i>. Extract of various plants—South America. <i>Tieuté</i>. <i>Upas Tieuté</i>. Tree of Java. <i>Triticum Hybernium</i>. Wheat (diseased). <i>Upas antiar</i>. Tree in Java. <i>Veratrum album</i>. White Hellebore. <i>Veratrum viride</i>. American Hellebore. <i>Woorara</i>. War Poison of Guiana. <i>Zea mays</i>. Maize (diseased).</p>	<p>The narcotic vegetable poisons, if taken into the stomach or applied to a wound, occasion the following effects:—stupor; numbness; heaviness in the head; desire to vomit, slight at first, but afterwards insupportable; a sort of intoxication, stupid air, pupil of the eye dilated; furious or lively delirium, sometimes pain; convulsions of different parts of the body, or palsy of the limbs. The pulse is variable, but at first generally strong and full; the breathing is quick, and there is great anxiety and dejection, which, if not speedily relieved, soon ends in death.</p>	<p>The stomach to be effectually evacuated by giving four or five grains of tartar emetic, or from ten to twenty of the sulphate of zinc, repeated every quarter of an hour, till the full effect is produced. These means may be assisted by tickling the throat with a feather or the finger. Large and strong glysters of soap dissolved in water, or of salt and gruel, should be speedily administered, to clear the bowels, and assist in getting rid of the poison; and active purgatives may be given after the vomiting has ceased. When as much as possible of the poison has been expelled, the patient may drink, alternately, a tea-cupful of strong hot infusion of coffee, and vinegar diluted with water. If the drowsiness, which is sometimes extreme, and the insensibility bordering on apoplexy, be not remedied by these means, blood may be taken from the jugular vein, blisters may be applied to the neck and legs, and the attention be roused by every means possible. If the heat declines, warmth and frictions must be perseveringly used. Vegetable acids are on no account to be given before the poison is expelled, and it is desirable that but little fluid of any kind should be administered.</p> <p>N. B. Bromine, chlorine, and iodine are said to be antidotes to the alkaloïds generally.</p>
<p>NARCOTIC. <i>Actæa spicata</i>. Baneberry. <i>Amygdalus communis</i>. Bitter Almond. <i>Amygdalus Persica</i>. Peach. <i>Gelseminum nitidum</i>. Yellow Jessamine. <i>Helonias erythrosperma</i>. Fly Poison. <i>Hynscyamus albus</i>. White Henbane. <i>Hynscyamus niger</i>. Black Henbane. <i>Kalmia latifolia</i>. Mountain Ivy. <i>Lactuca virosa</i>. Strong-scented Lettuce. <i>Opium</i>, and its proximate principles. <i>Papaver somniferum</i>. Poppy. <i>Paris quadrifolia</i>. Herb Paris. <i>Prunus Carolinianna</i>. Wild Orange. <i>Prunus lauro-cerasus</i>. Cherry Laurel. <i>Prunus nigra</i>. Black Cherry. <i>Prunus padus</i>. Cluster Cherry. <i>Prunus Virginiana</i>. Wild Cherry. <i>Solanum dulcamara</i>. Bitter-sweet. <i>Sorbus acuparia</i>. Mountain Ash. <i>Taxus baccata</i>. Yew.</p>	<p>Nausea, heat, and pain in the stomach and bowels, with vomiting and purging, thirst; convulsions, and faintings; pulse small and frequent; delirium; dilated</p>	<p>The stomach and bowels to be cleared by an emetic of tartarized antimony, followed by frequent doses of Glauber's or Epsom salt, and large, stimulating glysters. After the poison is evacuated, ether may be administered, with small</p>
<p>POISONOUS MUSHROOMS. <i>Agaricus muscarius</i>. Fly Agaric. <i>Agaricus piperatus</i>. Pepper Agaric. <i>Agaricus necator</i>. Deadly Agaric. <i>Agaricus bobosus</i>. Bulbous Agaric. <i>Agaricus chantarellus</i>. Champignon.</p>	<p>Nausea, heat, and pain in the stomach and bowels, with vomiting and purging, thirst; convulsions, and faintings; pulse small and frequent; delirium; dilated</p>	<p>The stomach and bowels to be cleared by an emetic of tartarized antimony, followed by frequent doses of Glauber's or Epsom salt, and large, stimulating glysters. After the poison is evacuated, ether may be administered, with small</p>

POISONS.	SYMPTOMS.	TREATMENT.
	<p>pupil, and stupor; cold sweats, and death.</p> <p>Poisonous mushrooms may be distinguished from the edible by their botanical characters, and by the following criteria. The former grow in wet, shady places, have a nauseous odour; are softer, more open, and porous; have a dirty-looking surface, sometimes a gaudy colour, or many very distinct hues, particularly if they have been covered with an envelope; they have soft, bulbous stalks, grow rapidly, and corrupt very quickly.</p>	<p>quantities of brandy and water; but if inflammatory symptoms manifest themselves, such stimuli should be omitted, and other appropriate means be had recourse to.</p>

2. ANIMAL POISONS.

	SYMPTOMS.	TREATMENT.
<p>POISONOUS FISH. <i>Balistes monoceros.</i> Old wife. <i>Cancer astacus.</i> Crawfish. <i>Cancer rusticus.</i> Land Crab. <i>Clupea thryssa.</i> Yellow-billed Sprat. <i>Coracinus fuscus major.</i> Gray Snapper. <i>Coracinus minor.</i> Hyne. <i>Coryphæna splendens.</i> Dolphin. <i>Mormyra.</i> Blue Parrot Fish. <i>Muræna major.</i> Conger Eel. <i>Mytilus edulis.</i> Mussel. <i>Ostracion globellum.</i> Smooth Bottle Fish. <i>Perca major.</i> Barracuda. <i>Perca venenosa.</i> Grooper. <i>Perca venenata.</i> Rock Fish. <i>Physalia.</i> Portuguese Man of War. <i>Scomber cæruleus.</i> Spanish Mackerel. <i>Scomber maximus.</i> King Fish. <i>Scomber thynnus.</i> Bonetta. <i>Sparus chrysops.</i> Porgée. <i>Tetrodon sccleratus.</i> Tunny. <i>Tetrodon ocellatus.</i> Blower.</p>	<p>In an hour or two, or often in a much shorter time, after the fish has been eaten, a weight at the stomach comes on, with slight vertigo and headache, sense of heat about the head and eyes, considerable thirst, and often an eruption of the skin (urticaria), and in many cases death.</p>	<p>An emetic should be speedily administered, or, in the absence of it, vomiting may be excited, by tickling the throat with the finger, and taking large draughts of warm water. After full vomiting, an active purgative should be given, to remove any of the noxious matter that may have found its way into the intestines. Vinegar and water may be drunk after the above remedies have operated, and the body may be sponged with the same. Water, made very sweet with sugar, to which ether may be added, may be drunk freely as a corrective, and a very weak solution of alkali has been recommended to obviate the effects of the poison. If spasm ensue; after evacuations, laudanum, in considerable doses, is necessary. If inflammation should occur, the usual means of removing it must be employed.</p>
<p>POISONOUS SERPENTS. <i>Bna crotaloides.</i> Copperhead. <i>Cenchris mockeson.</i> Mockeson. <i>Cerastes nasicornis.</i> Horned Viper of Western Africa. <i>Coluber berus.</i> Viper. <i>Coluber prester.</i> Black Viper. <i>Crotalus</i>, (5 species.) Rattle Snake <i>Scytale piscivorus.</i> Water Viper.</p>	<p>A sharp pain in the wounded part, which soon extends over the limb or body; great swelling, at first hard and pale, then reddish, livid, and gangrenous in appearance; faintings, vomitings, convulsions, and sometimes jaundice; pulse small, frequent, and irregular; breathing difficult, cold sweats, the sight fails, and the intellectual faculties are deranged. Inflammation, and often extensive suppuration and gangrene, followed by death.</p>	<p>A cupping-glass to be applied over the wound, or a moderately tight ligature above the bites, and the wound left to bleed after being well washed with warm water; the actual cautery, lunar caustic, or butter of antimony, to be then applied freely to it, and afterwards covered with lint, dipped in equal parts of olive oil and spirit of hartshorn. The ligature to be removed if the inflammation be considerable. Warm, diluting drinks, and small doses of ammonia or hartshorn, to cause perspiration; the patient to be well covered in bed, and a little warm wine given occasionally. If gangrene be threatened, wine may be given more freely, and the bark should be had recourse to. Arsenic, the principal ingredient in the Tansjore Pill, has been strongly recommended.</p>
<p>CANTHARIS VESICATORIA. Spanish, or Blistering Fly. <i>Lytta vittata.</i> Potato Fly.</p>	<p>Nauseous odour of the breath; acrid taste; burning heat in the throat, stomach, and abdomen; frequent vomitings, often bloody, with copious bloody stools; excruciating pain in the stomach; painful and obstinate priapism, with heat in the bladder, and strangury or retention of urine; frightful convulsions, delirium and death.</p>	<p>Vomiting to be excited by drinking sweet oil, sugar and water, milk, or linned tea, very freely. Emollient glysters should be administered, and if symptoms of inflammation of the stomach, kidney, or bladder supervene, they must be subdued by appropriate treatment. Cannphor dissolved in oil may be rubbed over the belly and the thighs.</p>
<p>VENOMOUS INSECTS Tarantula. Scorpio. Scorpion. <i>Vespa crabro.</i> Hornet. <i>Vespa vulgaris.</i> Wasp. <i>Apis mellifica.</i> Bee. <i>Culex pipiens.</i> Gnat. <i>Cæstrus bovis.</i> Gad-fly.</p>	<p>In general, the sting of these insects occasions only a slight degree of pain and swelling; but occasionally the symptoms are more violent, and sickness and fever are produced by the intensity of the pain.</p>	<p>Hartshorn and oil may be rubbed on the affected part, and a piece of rag, moistened in the same, or in salt and water, may be kept upon it till the pain is removed. A few drops of hartshorn may be given frequently in a little water, and a glass or two of wine may be taken. The sting may, in general, be removed by making strong pressure around it with the barrel of a small watch-key.</p>

	SYMPTOMS.	TREATMENT.
SALIVA OF THE RABID DOG.	At an uncertain interval after the bite, generally, however, between the twentieth day and three or four months, pain or uneasiness occurs in the bitten part, though the wound may have been long healed. Anxiety, uneasiness, languor, spasms, horror, disturbed sleep, difficult respiration succeed, and are soon very much increased; violent convulsions affect the whole body, hideously distorting the muscles of the face; the eyes are red and protruded, the tongue swells and often hangs out, and viscid saliva flows from the mouth; there is pain in the stomach, with bilious vomitings, a horror of fluids, and impossibility of drinking them. All these symptoms are aggravated till the sufferer is relieved by death.	Hydrophobia is more easily prevented than cured; indeed, it is doubted whether it ever has been cured. Mercury, arsenic, opium, musk, camphor, acids, wine, vegetable and mineral alkali, oil, various herbs, and many other remedies whose effects are quite opposite, have been employed, but none can be relied on. Large blood-lettings, the warm and cold bath, and almost every other remedial agent, have been tried without success. The bitten part should be completely cut out, even after it has healed, if the symptoms have not yet come on; the part should then be immersed in warm water, or be washed with it as long as it will bleed, and, after the most persevering ablution, caustic should be applied to every part of the surface, and then the wound covered with a poultice, and suffered to heal by granulation. No milder discipline can ensure safety.

The most energetic poisons are used therapeutically, and often with considerable advantage. They have, of course, to be administered in extremely small doses, to avoid producing poisoning.

POISON, ARROW, see Arrow poison — p. Berry tree, *Melia azedarach* — p. Hemlock, *Conium*.

POISON, ITALIAN, *Liquor arsenicalis* — p. Morbid, *Virus*.

POISON OAK, *Rhus toxicodendron* — p. Root, *Cicuta maculata*.

POISON, SAUSAGE, *Allantotoxium* — p. Vegetable, *Upas*.

POISON VINE, *Rhus radicans*.

POISONING, *Veneficium*, *Toxicatio*, *Intoxicatio*, *Entozismus*, *Entoxicismus*, *Pharmacela*, *Maleficium*, *Venena'tion*, (F.) *Empoisonement*, *Intoxication*. The art of applying a poisonous substance to any of the textures in a dose capable of occasioning more or less serious symptoms. Rigorously speaking, therefore, if a physician, in treating any case, employs a deleterious medicine in a small dose, which, owing to particular circumstances, produces unpleasant symptoms, he may be said to have poisoned. The term is, however, generally restricted to poisoning by design.

Poisoning has also been used, by a few, to denote the series of symptoms resembling those produced by certain poisons, which occasionally follow the use of substances that are generally innocuous. Overloading the stomach with indigestible food, has, for example, given occasion to symptoms resembling those produced by a narcotic poison, and the effect has been termed *poisoning*.

Secret poisoning was, at one time, practised as an art. It consisted in administering medicines, which should act as *slow poisons*, and gradually undermine the strength and life. Its agency was far from being so extensive as was imagined.

POISONOUS, *Toxical*, *Noxius*, (F.) *Toxique*, *Vénéneux*. Having the qualities of a poison.

POISONS, ACRO-NARCOTIC, P. narcotico-acrid — p. Corrosive, P. acrid — p. Escharotic, P. acrid — p. Irritating, P. acrid — p. Putrescent, P. septic. See Poison.

POLANIS'IA GRA'VEOLENS, *Clammy weed*, *Stinkweed*, *Wormweed*, *Clammy Mustard*, *False mustard*, from *πολυς*, 'many,' and *ανισος*, 'unequal,' in reference to its stamens. An indigenous plant, *Ord. Capparidacæ*, *Sez. Syst. Dodecandria Monogynia*, which blossoms in summer, and is found in every part of North America. To the whole plant have been ascribed anthelmintic properties.

POLAR PLANT, *Silphium laciniatum*.

POLECAT WEED, *Dracontium foetidum*.

POLEMONIUM REPTANS, *False Jacob's Ladder*, *Greek Valerian*, *Sweat-root*. *Order*, *Polemoniaceæ*; indigenous, flowering in May; has been used as a diaphoretic and expectorant.

POLENTA, *Alphiton*.

POLES, *Chalazæ*.

POLEY MOUNTAIN, OF CANDY, *Teucrium Creticum* — p. Mountain of Montpellier, *Teucrium capitatum*.

POLIA'TER, from *πολις*, 'a town,' and *ιατρος*, 'a physician.' A physician exercising his profession in a town, by the appointment of the government. — *Castelli*.

POLICE', MED'ICAL, *Politica medica*, *Polybiotherapia*, *Medicina politica*, *Ordo medicina'lis*, *Political medicine*, (F.) *Police médicale ou sanitaire*. Hygienic rules established, or which ought to be established, for the prevention of disease, and to contribute to the progress of medicine. The salubrity of districts, especially during the existence of spreading disease, is greatly ensured by an efficient medical police.

POLICLIN'ICA, from *πολις*, 'a town,' and *κλινη*, 'a bed.' Treatment of diseases in a town.

POLIOSIS, *Trichosis poliosis*, *Spilosis poli-*

o'sis, *Poliotes*, *Canit'ies*, from *πολιος*, 'hoary, gray.' Hair prematurely gray or hoary. The state of becoming gray, *gray-haired*, *Poliot'richos*.

POLIOTES, Poliosis.

POLIOTRICHOS, see Poliosis.

POLITIA MEDICA, Police, medical.

POLITOBIOThERAPIA, Police, medical.

POLIUM CAPITATUM, Teucrium capitatum — p. Creticum, Teucrium Creticum — p. Montana, Teucrium capitatum.

POLL, Head.

POLLEN, (L.) *Pollen*, *Pollis*, *παλη*, 'dust.'

The fecundating dust contained in the anthers of flowers, which is dispersed on the stigma. It is conveyed to the ovary through the stigma by the *Pollen tube*, *Tubus pollin'icus*, (F.) *Boyan polinique*.

POLLEX, genitive *Poll'icis*, *An'ticheir*, *Prom'anus*, *Dig'itus primus seu magnus*, *Allus pollex*, *Thumb*, (Prov.) *Thame*, *Tom-toe*, from *pollere*, 'to have much strength.' (F.) *Pouce*. The first of the fingers in size and strength. It is asserted that the term *poltroon* is derived from *poll'icē truncato*; — the Romans who were desirous of being exempted from military service being accustomed to cut off the thumb, and thus render themselves unfit to handle arms.

POLLEX, see Digitus.

POLLEX PEDIS, *Hallus*, *Hallux*. The great toe.

POLLINC'TOR, *Pollinc'ter*, (L.) In antiquity, an anointer, dresser, or embalmer of the dead.

POLLINCTURA, Embalming.

POLLIS, Pollen.

POLLOCK, see *Oleum jecoris aselli*.

POLLOD'IC, *Pollod'icus*; from *πολυς*, 'many,' and *odos*, 'a way.' An epithet proposed by Dr. Marshall Hall for a course of nervous action proceeding from one point, in many directions, to every other.

POLLOM, LITTLE, *Polygala paucifolia*.

POLLUTION, *Pollutio*, from *polluo*, *pollutum*, 'to profane.' The excretion of the seminal liquor or sperm, or the production or orgasm in male or female, at other times than during coition. When occasioned by a voluntary act, it is called simply *Pollution* or *Masturbation*, (F.) *Souillure*; when excited during sleep, by lascivious dreams, it takes the name *Nocturnal pollution*, *Exoneiro'sis*, *Oneirog'mos*, *Oneirog'onos*, *Oneirogonorrhœ'a*, *Exoneirog'mus*, *Spermatocele'm'ia*, *Spermatocelep'sis*, *Spermatolep'sis*, *Spermatolep'isis*, *Gonorrhœa dormientium seu oneirog'onos seu vera seu libidinosa*, *Profluvium sem'inis*, *Spermatorrhœ'a*, *Pavor'ia salax*, *Night pollution*, (F.) *Pollution involontaire*.

POLLUTION INVOLONTAIRE, Pollution — p. Nocturnal, Pollution — p. Self, Masturbation — p. Voluntary, Masturbation.

POLONYCH'IA, *Polygonych'ia*, from *πολυς*, 'many,' and *ονυχος*, 'a nail.' The condition of having supernumerary nails, — a rare congenital monstrosity.

POLT-FOOT, see *Kylosis*.

POLY, *Polys*, *πολυς*, 'many, much, full.' Hence:

POLYACTIUM TRISTE, *Pelargonium triste*.

POLYÆMIA, Plethora.

POLYÆMIC, Plethoric.

POLYÆMICUS, Plethoric.

POLYANHÆMIA, Anæmia.

POLYANHÆMIE, Anæmia.

POLYANTH'ES TUBERO'SA, *Amaruacchu*. Ord. Liliacæ. The root is cut into slips and laid upon the bites of serpents by the Peruvian Indians.

POLYBLEN'NIA, from *poly*, and *βλενω*, 'mucus.' Excessive secretion of mucus.

POLYBREP'HA, Pregnancy, complex.

POLYCARP'Æ, from *poly*, and *καρπος*, 'fruit.'

A division of cutaneous diseases of the family Eczematosen, of Fuchs, including Psoriasis, Lichen, Herpes, and Impetigo.

POLY'CERAS, from *poly*, and *κερας*, 'horn.'

A monstrous animal having many horns. — Gurlt.

POLYCHOL'IA, *Perichol'ia*, *Hyperchol'ia*, from *poly*, and *χολη*, 'bile.' Superabundance of bile; such as is supposed to exist in bilious fevers.

POLYCHREST'US, from *poly*, and *χρηστος*, 'useful.' Having many virtues. An ancient name for certain medicines considered to be useful in many diseases.

POLYCHRONIUS, Chronic.

POLYCHY'LLIA, from *poly*, and *χυλος*, 'juice.' *Polychy'mia*. Fulness of juices.

POLYCHY'MIA, Polychylia — p. Sanguinea, Plethora.

POLYCLIN'ICA, from *poly*, and *κλινη*, 'bed.' Provided with many beds; — as an hospital.

POLYCOR'IA, from *poly*, and *κορη*, 'the pupil.' The state in which there is more than one pupil. — Von Ammon.

POLYCRINOSSES, see *Profluvium*.

POLYCYE'SIA, *Polycye'sis*, from *poly*, and *κρησις*, 'pregnancy.' Frequent or quickly recurring pregnancies; also, compound pregnancy.

POLYCYTHÆ'MIA, from *poly*, *κυτος*, 'a cell,' and *αιμα*, 'blood.' A condition of the blood in which there is an increase of the red corpuscles.

POLYDAC'TYLUS, *Perissodactylus*, from *poly*, and *δακτυλος*, 'a finger.' One who has a supernumerary finger or fingers, or toes.

POLYDIP'SIA, from *poly*, and *διψη*, 'thirst;' *Sitis morbo'sa seu inten'sa*, *Polydip'sia*, *Dipsosis aens*. *Excessive thirst*, (F.) *Soif excessive*. A constant desire for drinking, with a sense of dryness in the mouth and throat. It is mostly symptomatic of fever, inflammation, dropsy, excessive discharges, &c., and is so much a part of diabetes, that it has been called Polydipsia.

POLYG'ALA, from *poly*, and *γαλα*, 'milk;' *P. vulgaris*, *Common Milkwort*. Ord. Polygalacæe. *Sex. Syst.* Diadelphia Octandria. The leaves are bitter, and are used in the same cases as the *Polygala amara*.

POLYGALA AMA'RA, *P. amarella* seu *vulgaris*, *Bitter Milkwort*. A powerful bitter; and, consequently, tonic. Its reputed virtues are balsamic, demulcent, and corroborant. The *Polygala rubella*, or *Bitter Polygala* of the United States, has the same virtues.

POLYGALA AMARELLA, *P. amara* — p. Bitter, see *P. amara* — p. Grandiflora. *P. senega*.

POLYG'ALA PAUCIFO'LLIA, *Triclisper'ma grandiflora*, *Dwarf Milkwort*, *Little Pollom*, *Evergreen Snakeroot*, (F.) *Polygale naine*, possesses the same properties as *P. Senega*.

POLYG'ALA SEN'EGA, *P. Virginia'na* seu *grandiflora*, *Sen'eka*, *Rattlesnake Milkwort*, *Senega* or *Rattlesnake root*, (F.) *Polygale de Virginie* ou *de Sen'eka*. The bark is the active part of the root, *Senega* (Ph. U. S.). Its taste is at first acrid, and afterwards very hot and pungent. It was once esteemed to be specific against the poison of the rattlesnake and in pleurisy, pneumonia, &c., after the inflammatory action had been got under. It has been given also in humoral asthma, chronic rheumatism, dropsy, croup, amenorrhœa, &c. According to Peschier, it contains three particular principles, *Polyg'aline* or *Sen'e-gine*, *Isol'usine*, and *Polyg'alic Acid*. Dose, gr. 30 to 40 of the powder.

POLYGALA SERPENTA'RIA. A shrub of Caffria, the root of which is considered by the natives as a sure antidote against the bites of venomous serpents.

POLYGALA VIRGINIANA, P. senega — p. Vulgaris P. amara.

POLYGALACTIA, *Polyg'alia*, from *poly*, and *γαλα*, γαλακτος, 'milk.' Superabundant secretion of milk; galactia.

POLYGALAE NAINAE, *Polygala paucifolia* — p. de *Virginie*, *Polygala Virginiana*.

POLYGALIA, *Polygalactia*.

POLYGALINE, see *Polygala senega*.

POLYGONATUM, *Convallaria polygonatum* — p. *Anceps*, *Convallaria polygonatum* — p. *Caniculinatum*, *Convallaria canaliculata* — p. *Latifolium*, *Convallaria canaliculata* — p. *Multiflorum*, *Convallaria multiflora* — p. *Pubescens*, *Convallaria pubescens* — p. *Uniformum*, *Convallaria polygonatum* — p. *Vulgare*, *Convallaria polygonatum*.

POLYGN'ONUM, P. *aviculārē*, from *poly*, and *γων*, 'a knee or joint.' P. *centinod'ium* seu *erec'tum*, *Centinod'ia*, *Centunno'dia*, *Sanguinal'is Corrig'iola*, *Sanguinaria*, *Knottgrass*, *Knottweed*, *Bindweed*, *Doorweed*, (F.) *Renouée*, *Trainasse*, *Centinode*. Ord. *Polygonaceæ*. *Sex. Syst.* *Octandria Trigynia*. This grass is said to be a feeble astringent.

POLYGONUM ACRE, P. *hydropiper*.

POLYGONUM AMPHIBIUM, P. *cocein'eum*, *Water Persicaria*, of Europe and this country. The roots have been used like sarsaparilla, especially in diseases of the skin.

POLYGONUM BISTORTA, P. *bistortoides*, *Bistorta*, *Colubri'na*, *Offic'inal Bistort*, *Great Bistort* or *Snakeweed*, (F.) *Bistorte*, *Couleuvreine*, *Serpentaire rouge*. The root is a powerful astringent and tonic; and, as such, has been used in internal hemorrhage, atonic diarrhœa, ague, &c. Dose, gr. xv to ʒi.

POLYGONUM BISTORTOIDES, P. *bistorta* — p. *Centinodium*. P. *aviculare*.

POLYGONUM COCCINEUM, P. *amphibium*.

POLYGONUM DIVARICATUM; *Eastern Buckwheat plant*. The roots, reduced to a coarse meal, are said to be much used as an article of diet by the Siberians.

POLYGONUM ERECTUM, P. *aviculare*.

POLYGONUM FAGOPYRUM, *Fagopyrum*, (F. *esculentum*, *Triticum Fagi'num*, *Buckwheat*, (F.) *Sarrasin*, *Blé noir*. The grain of this plant constitutes a principal article of food with the inhabitants of Russia, Germany, and Switzerland. It is much used in the United States.

POLYGONUM HYDROPIPER, P. *acrē* seu *hydro-piperoides* (Pursh) seu *punctatum*, *Hydropiper*, *Persicaria urens*, *Mercurius terrestris*, *Poor Man's Pepper*, *Biting Arse-smart*, *Smartweed*, *Lakweed*, *Water-pepper*, (F.) *Poivre d'eau*, *Persicaire poivrée* ou *brûlante* ou *âcre*, *Piment d'eau*, *Ourage*, *Renouée âcre*. The leaves of this plant have an acrid, burning taste, and resemble those of the arum. They have been recommended as possessing antiseptic, aperient, and diuretic virtues. The fresh leaves have been applied externally as a stimulating cataplasm.

POLYGONUM HYDROPIPEROIDES, P. *Hydropiper*, P. *punctatum*. *Polygonum hydro-piperoides* of Michaux, *mild waterpiper*; indigenous; has no acrid properties.

POLYGONUM PERSICARIA, *Persicaria*, P. *minor* seu *mitis*, *Plumba'go*, *Lady's Thumb*, *Heart's ease*, (Prov.) *Redshanks*, (F.) *Persicaire douce*. This plant is said to possess vulnerary and antiseptic qualities. It has been given in wine to arrest gangrene.

POLYGONUM PUNCTATUM, P. *hydro-piperoides*, *Water pepper* of America, *Smartweed*, possesses similar properties to *Polygonum hydropiper*, and is occasionally used internally in gravel, and externally in chronic ulcers. A fluidrachm of the saturated tincture has been extolled in amenorrhœa. See *Polygonum hydropiper*.

POLYGN'ONUM VIRGINIANUM, *Wand-spiked Persicaria*, *Virgin'ia Bistort*; indigenous; is astringent, diuretic, and tonic.

POLYGNOMA, *Staphyloma*.

POLYHY'DRIA, *Poly'ydria*, *Polyhydro'sis*, from *poly*, and 'ιδρωσ', 'sweat.' Excessive sweating.

POLYHYDRIA, *Hydrops*.

POLYHYPERHÆMIA, *Plethora*.

POLYIDRIA, *Polyhidria*.

POLYIDROSIS, *Polyhidria*.

POLYLYMPHIA, *Anasarca*.

POLYMASH'TUS, *Pleiomasthus*, from *poly*, and *μαστος*, 'breast.' A monster having several breasts. — Gurlt. The condition has been called *Polyma'zia*, *Pleiomaz'ia*, and *Pleoma'zia*.

POLYMAZIA, see *Polymasthus*.

POLYMELE'IAN, (F.) *Polymélien*, from *poly*, and *μελος*, 'a limb.' An epithet given to monsters characterized by the insertion, in a well formed subject, of one or more accessory limbs, accompanied, at times, by the rudiments of certain other parts. — I. G. St. Hilaire.

POLYMERIA, *Polymerismus* — p. *Promiscua translativa*, *Transposition of the viscera*.

POLYMERIS'MUS, *Polymer'ia*, from *poly*, and *μερος*, 'a part.' A monstrosity, which consists in the existence of supernumerary organs; as a sixth finger of the hand.

POLYNEURON, *Plantago*.

POLYONYCHIA, *Polonychia*.

POLYOP'SIA, *Pol'yopy*, from *poly*, and *οψις*, 'sight.' Vision is so called, when multiple or manifold.

POLYOPY, *Polyopsia*.

POLYOREX'IA, from *poly*, and *ορεξις*, 'appetite.' Excessive appetite or hunger. A genus in the *Gastroses* of M. Alibert.

POLYPER'IA, from *poly*, and *προς*, 'mutilated.' Congenital misconstruction of various parts or organs. — Good.

POLYPHA'GIA, *Multivorant'ia*, from *poly*, and *φαγω*, 'I eat.' Voracity. Faculty of eating or subsisting on many kinds of food. See *Boulimia*.

POLYPH'AGOUS, *Polyph'agus*, *Multiv'orons*, (F.) *Polyphage*. Relating or appertaining to polyphagia.

POLYPHARMACIA, *Polypharm'acy*; from *poly*, and *φαρμακον*, 'a medicine.' The prescribing of too many medicines. A prescription, consisting of a number of medicines; hence the name *Polypharm'macus*, (F.) *Polypharmaque*, given to one who is in the habit of prescribing a number of medicines, and whose prescriptions are loaded with ingredients. The term is taken in bad part.

POLYPHARMAQUE, see *Polypharmacia*.

POLYPHY'SIA, *Flatulence*.

POLYPIFORM CONCRETIONS, see *Polypus*.

POLYPIONIA, see *Polysarcia* — p. *Infantum*, see *Polysarcia*.

POLYPIOSIS, see *Polysarcia*.

POLYPLAS'TIC, *Polyplast'icus*, from *poly*, and *πλασσω*, 'I form.' That which has many shapes.

POLYPLASTIC ELEMENT, in histology, is one which does not retain its primary shape; but undergoes transformation into others. — Gerber.

POLYPODI'TES. Wine impregnated with *polypody*.

POLYPO'DIUM, P. *Vulgarē* seu *Virgin'iana* — *seu pinnatifidum*, *Filic'ula dulcis*, *Common Polypody*, *Fern root*, *Rock Brake*, *Brake root*, (F.) *Fougère douce*. Ord. *Filices*. From *poly*, and *πους*, *πόδος*, 'a foot,' owing to its many roots. This fern grows in the clefts of rocks, walls, &c., in both hemispheres. It was formerly regarded as

a cholagogue, and was given in head diseases. It is not used now.

POLYPODIUM ADIANTIFORME, see *Calagualæ radix*—p. *Ammifolium*, see *Calagualæ radix*—p. *Argentæum*, see *Calagualæ radix*—p. *Cetaræcinum*, p. *incanum*—p. *Calaguala*, *Calagualæ radix*—p. *Coriaceum*, see *Calagualæ radix*—p. *Dentatum*, *Asplenium filix fœmina*—p. *Filix fœmina*, *Asplenium filix fœmina*.

POLYPODIUM FILIX MAS, *Aspidium* seu *Athyrium* seu *Nephrodium* seu *Polysticum Filix Mas*, *A. depasitum* seu *erosum*, *Filix pinna'ta*, *Pteris*, *Blechnon*, *Polyrrhizon*, *Blauenon Oriba'sii*, *Lonchitis*, *Filicula*, *Filix Mas*, *F. non ramo'sa dentata*, *Nephrodium crenatum*, *Polysticum callipteris*, *Male Polypody* or *Fern*, (F.) *Fougère mâle*. The rhizoma of this plant, *Filix Mas*, Ph. U. S., has been much extolled as an anthelmintic, and in cases of tœnia. It was the basis of a once celebrated remedy—*Madame Nouffer's*—but, perhaps, more of the efficacy was to be attributed to the active purgatives by which it was followed than to the fern. Dose, ʒij to ʒiij of the powdered solid part of the root; followed in the morning by a strong cathartic of camboge or jalap. An ethereal extract has been proposed by Dr. Peschier, of Geneva.

POLYPODIUM INCA'NUM, *P. cetaræcinum*, *Aerositicum polypodioides*, *Polypody*, *Rock Brake*; indigenous; has been considered demulcent, cathartic and antelmintic.

POLYPODIUM INSCISUM, *Asplenium filix fœmina*—p. *Molle*, *Asplenium filix fœmina*—p. *Pennatifidum*, *P. vulgare*—p. *Politum*, see *Calagualæ radix*—p. *Trifidum*, *Asplenium filix fœmina*—p. *Virginianum*, *P. vulgare*—p. *Vulgare*, *Polypodium*.

POLYPODY, *Polypodium incanum*—p. *Common*, *Polypodium vulgare*—p. *Male*, *Polypodium filix mas*.

POLYPOID, *Polypoides*; from *polypus*, and εἶδος, 'form.' Having the shape of, or resembling, a polypus.

POLYPORUS IGNIARIUS, *Boletus igniarius*—p. *Officialis*, *Boletus laricis*.

POLYPO'SIA, πολυποσία, from *poly*, and ποσις, 'drink.' Great thirst—desire for drink. *Polydipsia*.

POLYPOTOME, *Polypotomus*, *Polypus knife*, from *polypus*, and τεινειν, 'to cut.' An instrument for the removal of polypus by excision.

POLYPOUS, *Polypousis*: same etymon as the next. Relating, or belonging to, or resembling polypus.

POLYPUS, *Pseudometamorphosis polyposa*, from πολυς, 'many,' and πους, ποδος, 'a foot.' A name given to tumours, which occur in mucous membranes especially; and which have been compared to certain zoophytes. Polypi may form on every mucous membrane. They are most commonly observed in the nasal fossæ, pharynx, and uterus; more rarely in the stomach, intestines, bronchial tubes, bladder, and meatus auditorius externus. They vary much in size, number, mode of adhesion, and intimate nature. Accordingly, they have received various appellations; *mucous*, *soft*, *vesicular*, when their substance has been soft, spongy, vesicular, and, as it were, gorged with fluid. Others have been called *hard*; and these have been distinguished into *fibrous* or *fleshy*, and into *scirrhous* or *cancerous*. *Fibrous* polypi, *Polypii fibrosi*, *Inopolypii*, are of a dense, compact texture, and whitish colour. They contain few vessels, and do not degenerate into cancer. The *scirrhous* or *carcinomatous* are true cancerous tumours, painful and bleeding. They present all the pathological changes which belong to cancerous affections, and the prognosis is of course unfavourable.

The mode of treating polypi must differ according to their character. The means used to destroy them have been, 1. To subject them to the action of certain astringent powders or solutions, to obtain their resolution. 2. *Cauterization* or the application of the actual cautery or caustics. 3. *Excision* or ablation with a cutting instrument. 4. *Extirpation* with the fingers or with the polypus forceps. 5. A *ligature*, put round them so as to prevent their nutrition. A seton has, also, been sometimes used to gradually destroy the pedicle.

The term **POLYPI**, *Pseudopolypii*, *Carditis polyposa*, *Polypiform Concretions*, (F.) *Concretions polypenses* ou *polypiformes* ou *sanguines du Cœur*, *Hémocardioplasties*, (Piorry,) has likewise been applied to collections of blood—fibrinous concretions—found in the heart or great vessels after dissolution. These were once, erroneously, regarded as morbid. The presence of these concretions may be suspected, when in the course of an acute or chronic affection of the heart, or at the close of chronic diseases in general—especially those of the lungs—the heart's action becomes suddenly tumultuous, obscure, and accompanied with a soft bellows' murmur, whilst the general symptoms indicate the effects of obstructed circulation. The right cavities are most frequently affected.

POLYPUS BRONCHIA' LIS, *Bronchlemmitis*, *Bronchitis membrana' cea* seu *exsudati' va* seu *croup'osa*, *B. plastic*, *Bronchial Croup*, *Chronic Croup* [?], *Pseudo-membranous Bronchitis*, (F.) *Bronchite pseudo-membraneuse*. A membraniform secretion in the bronchial tubes of a diphtheritic character, having the shape, when unexpectorated, of the bronchia. It is the result of inflammation of the lining membrane of those tubes.

POLYPUS CARNO'SUS, *Sarcoma*—p. *Fibrosus*, see *Polypus*—p. *Uteri*, *Metropolypus*.

POLYRRHIZON, *Polypodium filix mas*.

POLYRRHŒEA, *Profuvium*.

POLYSAR' CIA, *Polysarcosis*, from *poly*, and σαρξ, σαρκος, 'flesh.' *Carnositas*, *Polysomatia*, *Adeliparia*, *Corpulentia*, *Steatites*. Excessive corpulency. Authors have distinguished two varieties of this:—**POLYSARCIA CARNO'SA**, *Corpulency*, and **P. ADIPO'SA**, *Polypodia*, *Polypiosis*, *Pimelosis nimia*, *Pachysmus*, *Pachy'sis*, *Obesitas*, *Hyperpim'elē*, *Liparia*, *Adiposis*, *Polysarcia jugino'sa*, *Empyemium polysarcia*, *Barysomia*, *Barysomat'ica*, *Lipo'sis*, *Liparotes*, *Lipas'ma*, *Pinguitudo*, *Pinguitude*, *Obesity*, (F.) *Obésité*, *Embonpoint excessif*. A severe regimen and exercise are the best preventives. Children are occasionally met with of unusual fatness, in spite of every care. This morbid disposition has been termed *Polypodia infantum*, and *Chlorosis gigante'a*.

POLYSARCIA VISCERUM, *Physconia adiposa*.

POLYSARCOSIS, *Polysarcia*.

POLYSCEL'IA, from *poly*, and σκελος, 'a leg.' A monstrosity, characterized by the presence of one or more supernumerary legs.

POLYSIAL'IA, from *poly*, and σαλον, 'saliva.' Excessive discharge of saliva.

POLYSOMATIA, *Polysarcia*.

POLYSO'MIA, from *poly*, and σωμα, 'body.' A monstrosity characterized by the existence of more bodies than one.

POLYSPAS'TON, from *poly*, and σπασω, 'I draw.' A powerful instrument for reducing luxations.—Goræus.

POLYSPERM'IA, from *poly*, and σπερμα, 'sperm.' Richness or fulness of sperm.

POLYSTICUM CALLIPTERIS, *Polypodium filix mas*—p. *Filix Mas*, *Polypodium filix mas*.

POLYSTOMA PINGUICOLA, see *Worms*—p. *Venarum*, see *Worms*.

POLYTRIC, *Asplenium trichomanoides*.

POLYTRICHIA, see *Polytrichus*.

POLYTRICHUM, from *poly*, and *τριχος*, 'hair,' *P. vulgare*, *Polytrichon*, *Adiantum aurivernum*, *Golden Maiden-hair*, (F.) *Perce-mousse*. *Ord. Musci*. It is possessed of astringent properties, and was formerly given in diseases of the lungs, and in calculous affections.

POLYTRICHUM COMMUNE, *Asplenium trichomanoides*.

POLYTRICHUM JUNIPERINUM, *Haircap moss*, *Robbin's Rye*, common in New England, is said to possess powerful diuretic properties.

POLYTRICHUS; same etymon as *Polytrichum*. Very hairy. One that has much hair. The condition is termed *Polytrichia*; although this term is, at times, employed for the growth of hair on parts not usually having it.

POLYTROPICIA, from *poly*, and *τροφεω*, 'I nourish.' Abundant or excessive nutrition.

POLYURESIS, Diabetes.

POLYURIA, Diabetes.

POLYURICUS, from *poly*, and *ουρον*, 'urine.' Sauvages calls—*Ischuria polyurica*—a kind of ischuria, caused by accumulation of urine in the bladder.

POMA, Drink—*p. Chinensis*, see *Citrus aurantium*.

POMACEUM, Cider.

POMATUM, *Pommatum*, from *poma*, 'apples,' which formerly entered into its composition. (F.) *Pommade*, *Liparolé*, *Stéarolé*. A pharmaceutical preparation, employed only externally, which differs but little from an ointment, except in having generally less consistence. It is usually scented and coloured to render it more agreeable. Apples formerly entered into the composition of the *pomatum*; hence its name.

Common Pomatum is made of lard, 12lbs; *suet*, 4lbs; *essence*, 3viij.

POMATUM AD LABIA DEMULCENDA. Cerate for the lips—*p. Epispasticum flavum*. Unguentum lyttæ medicatum aliud—*p. Epispasticum viride*, &c., Unguentum lyttæ medicatum—*p. for the Lips*, Cerate for the lips—*p. Nitricum seu oxygenatum*, Unguentum acidi nitrosi—*p. Saturni*, Unguentum plumbi superacetatis.

POMBALEA IPECACUANHA, see *Ipecacuanha*.

POMEGRANATE, *Punica granatum*.

POMILIUS, see *Nanus*.

POMMADE, *Pomatum*—*p. d'Alton*, Unguentum acidi nitrosi—*p. Antipsorique de Jasser*, Unguentum sulphuris compositum—*p. d'Autenrieth*, Unguentum antimonii tartarizati—*p. de Cyrillo*, Unguentum muriatis hydrargyri oxygenato medicatum—*p. Epispastique jaune*, Unguentum lyttæ medicatum aliud—*p. Epispastique verte*, Unguentum lyttæ medicatum—*p. de Garou*, Unguentum epispasticum de daphne gnidio.

POMMADE DE GONDRET, *P. ammoniacale de Gondret* (F.), *Gondret's Counterirritant*, *Gondret's ammoniacal Caustic*. (*Liq. ammon.* p. ij; *Sevi*, p. j; *Ol. amygdal.* p. j; *M.*) Used to excite a speedy revulsion in cases of chronic affections of the brain, incipient cataract, amaurosis, &c., as well as to cauterize the integuments deeply.

The above formula, is that of the French Codex, but, according to M. Trousseau, it is much too hard for use, unless the weather is warm. He proposes two formulæ, one for summer, the other for winter. In the former he directs three parts of lard, one of *suet*, and four of *liquor ammoniæ*; in the latter, equal parts of lard and *liquor ammoniæ*.

POMMADE POUR LES LÈVRES, Cerate for the lips—*p. Ophthalmique* (Regent's.) Unguentum ophthalmicum—*p. Oxygénée*, Unguentum

acidi nitrosi—*p. Stibiée*, Unguentum antimonii tartarizati.

POMME, see *Pyrus malus*—*p. d'Adam*, *Pomum Adami*—*p. d'Amour*, *Solanum lycopersicum*—*p. Épineuse*, *Datura stramonium*—*p. de Merveille*, *Momordica balsamica*—*p. Mousseuse*, *Bedegar*—*p. de Terre*, *Solanum tuberosum*.

POMMES HÉMORRHOÏDALES, see *Viscum album*.

POMMETTE, see *Malæ os*.

POMMIER, *Pyrus malus*.

POMPE POUR L'ESTOMAC, *Stomach pump*.

POMPHOLYGE'RON, *πομφολυγρον*, from *πομφολυγο*, 'to raise blisters.' The name of a plaster employed by the ancients.—*Castelli*.

POMPH'OLYX, from *πομφος*, 'a bladder.' A small vesicle on the skin. An eruption of *bullæ* or *blebs*, appearing without any inflammation around them, and without fever. It is the *Echphylis Pompholyx* of Good. See *Pemphigus*.

POMPHOLYX, *Tutia*, *Zinci oxydum*.

POMPHUS, *Wheat*.

POMPION, *Cucurbita pepo*.

POMUM ADA'MI, *Eminentia thyreoidea*, (F.) *Pomme d'Adam*, *Adam's Apple*. The projection formed by the thyroid cartilage in the neck—of males particularly. It is so called from a notion that it was caused by the apple sticking in the throat of our first parent.

POMUM AMORIS, *Testicle*—*p. Hierosolymitanum*, *Momordica balsamina*—*p. Melongena*, see *Solanum melongena*—*p. Mirabile*, *Momordica Balsamina*—*p. Spinosa*, *Datura stramonium*.

PONCTION, *Puncturing*.

POND SHOVEL, *Unisema deltofolia*.

PONDERA ET MENSURÆ, *Weights and measures*.

PONDUS, *Pudibilia*—*p. Pharmaceuticum*, see *Weights and measures*.

PONGITIE, *Pungent*.

PONS CEREBELLI, *Pons Varolii*—*p. Hepatis*, see *Lobulus anonymus*—*p. Sylvii*, *Quadrigenina Tubercula*—*p. Tarini*, *Tarini pons*.

PONS VARO'LII, *P. Cerebelli*, *Corpus annulære*, *Processus annularis*, *Prominentia annularis cerebri*, *Eminentia annularis*, *Nodus encephali seu Cerebri*, *Protuberantia basilaris*, *Protuberantia annularis Willisii*, *Varolii's bridge*, *Cerebral protuberance*, (F.) *Protuberance cérébrale ou annulaire*, *Mésencéphale*, *Mésocéphale*, *Pont de Varole*, *Annular protuberance*. An eminence at the upper part of the medulla oblongata, first described by *Varolius*. It is formed by the union of the crura cerebri and crura cerebelli.

PONS ZYGOMATICUS, *Zygomatic arch*.

PONT DE TARIN, *Tarini pons*—*p. de Varole*, *Pons Varolii*.

PONTE, see *Parturition*—*p. Périodique*, see *Parturition*.

PONTERERIA CORDATA, *Unisema deltofolia*.

PONTICUM ABSINTHIUM, *Artemisia Pontica*.

POOK, *Abdomen*.

POPLAR, AMERICAN, *Liriodendron*—*p. Balm of Gilead*, *Populus Candicans*—*p. Black*, *Populus*—*p. Tree*, *Liriodendron*—*p. Tulip-bearing*, *Liriodendron*.

POPLES, *Gare'tum*, *Garretum*, *Ignys*, *Ig'nyë*, *Suffrago*, *Fossa genu*, *Fossa poplitæ'a*, the *Ham*, *Hough*, *Hoff*, *Hoek*, (F.) *Jarret*, from *post*, and *plico*, 'I fold.' The posterior part of the knee joint. The ham forms what is called the *popliteal region* or *space*.

POPLESY, *Apoplexy*.

POPLITEUS, *Popliteal muscle*.

POPLITÉ, *Popliteus muscle*.

POPLITEAD, see *Popliteal aspect*.

POPLITE'AL, *Poplitæ'us, Poplit'ic*, (F.) *Poplité*, from *poples*, 'the ham.' That which relates to the ham. A name given to various parts.

POPLITEAL ARTERY — *Popliteal portion of the crural*, — (Ch.), is really a continuation of the femoral, which changes its name on passing through the adductor magnus muscle. It descends a little obliquely outwards into the hollow of the ham, and extends from the commencement of the lower third of the thigh to the end of the upper quarter of the leg, where it terminates by dividing into the *posterior tibial* and *peroneal* arteries. In the ham, it gives off the three *superior articular arteries*; and, at the top of the leg, the arteries of the gemini muscles or *gemini branches*, (F.) *branches jumelles*, the *two inferior articular arteries*, and the *tibialis antica*.

POPLITEAL ASPECT. An aspect towards the side on which the *poples* or ham is situated. (Barclay.) *Poplite'ad* is used by the same writer adverbially, and signifies 'towards the popliteal aspect.'

POPLITEAL FOSSA, *Poples*.

POPLITE'AL GLANDS, *Glandulæ poplitæ'æ*. Lymphatic glands, four in number, seated in the popliteal region or space.

POPLITEAL MUSCLE, *Poplitæ'us Muscle, Subpoplitæus*, (F.) *Muscle poplité, Muscle Jarretier, Fémoro-poplit-tibial*, (Ch.), is seated in the popliteal region. It is triangular, long, flat; and is inserted, on the one hand, by means of a strong tendon, into the tuberosity at the outer condyle of the femur, terminating below at the upper part of the posterior surface of the tibia. This muscle bends the leg on the thigh, and, reciprocally, the thigh on the leg. When the leg is bent, it causes it to turn, in rotation, inwards.

POPLITEAL NERVES. They result from the bifurcation of the sciatic, and are two in number, viz. 1. The *external popliteal, Peroneal nerve, Branche péronière*, (Ch.) It is smaller than the internal; turns to the outside of the fibula at the upper part of the leg, and divides into the *musculo-cutaneous branch, nerf prétébio-digital*, (Ch.) and the *anterior tibial, nerf prétébio-susphalungé-taire*, (Ch.) 2. The *internal popliteal nerve, Branche tibiale* (Ch.), which is larger than the other, and seems to be the real continuation of the sciatic nerve. It descends vertically into the hollow of the ham; and passes beneath the aponeurotic arch of the solaris muscle, beyond which it takes the name *tibial nerve*. It furnishes the *external saphena nerve*, and a number of branches, that are distributed to the posterior muscles of the leg. It then passes to the sole of the foot to be divided into two branches, called *Plantar nerves*.

POPLITEAL REGION, *Poples* — p. Space, *Poples*.

POPLITEAL VEIN has the same arrangement as the artery behind which it is situate.

POPLITIC, *Popliteal*.

POPONAX, see *Pastinaca opoponax*.

POPPY, CELANDINE, *Stylophorum diphyllum* — p. Corn, red, *Papaver rhœas*.

POPPY HEADS, see *Papaver*.

POPPY, HORN, *Stylophorum diphyllum*.

POPPY JUICE, *Meconium* — p. Pill, *Opium*.

POPPY, BRICKLY, *Argemone Mexicana* — p. Spotting, *Cucurbalus Behen* — p. Thorn, *Argemone Mexicana* — p. White, *Papaver* — p. White, capsule, see *Papaver*.

POP'ULUS, *P. nigra, Ægei'ros, Acheroi's, Black poplar*, (F.) *Peuplier, P. noir ou franc*. The young buds, *oculi* or rudiments of the leaves, which appear in the beginning of spring, were formerly used in an officinal ointment — the *unquen'tum populæ'um*. It was, also, recommended in chronic affections of the lungs.

The bark of *Populus Tremuloi'des, American*

aspens, of *P. TREM'ULA* seu *pen'dula*, *European aspen*, and of *POPULUS CAN'DICANS, Balm of Gilead Poplar*, is antiperiodic, and furnishes *salicin* and *populin*, in which the properties probably reside.

POPULUS BALSAMIFERA, see *Fagara octandra* — p. *Candicans*, see *Populus* — p. *Pendula, P. tremula* — p. *Tacamahaca*, see *Fagara octandra* — p. *Tremula*, see *Populus* — p. *Tremuloides*, see *Populus*.

PORCELAINÉ, *Essera, Urticaria*.

PORCELET, *Hyoscyamus*.

PORCELIA TRILOBA, see *Carica papaya*.

PORCELLIO, *Oniscus*.

PORCELLUS, *Oniscus*.

PORCULUS, *Oniscus*.

PORCUPINE DISEASE, *Ichthyosis*.

PORCUPINE MEX, *Echinoder'mi*. Persons have been so called in whom the cuticle is produced in the form of pointed prolongations, as if it had been moulded on the papillæ, like the shorter and blunter quills of the porcupine.

PORCUS, *Vulva*.

PORDE, *Crepitation*.

PORE, *Porus, Interstice, poros*, 'a passage.' Anatomists have given this name to the openings at the extremities of vessels at the surface of different membranes. EXHALANT PORES have been supposed to exist in the exhalants, to transmit the fluids exhaled. — ABSORBENT PORES are employed in taking up parts that have to enter the circulation. Pores exist in the cuticle; yet Humboldt, with a powerful magnifying-glass, was unable to observe them. The pores of the skin have also been called *spiræcula*.

POREBLIND, *Myopic*.

PORED MILK, *Colostrum*.

PORI BILIA'RII, *Ductus bilia'rii* seu *bilif'eri, Canaliculi bilif'eri, Sur'culi fell'ei*. Ducts which receive the bile from the penicilli of the liver, and convey it to the hepatic duct.

PORI CUTA'NEI, *P. Exhalan'tes* seu *Sudorif'eri* seu *Resorben'tes, Mea'tus cuticula'res*. The pores of the skin.

PORI EXHALANTES, *P. cutanei* — p. *Pulmonum, Cellules, bronchie* — p. *Resorbentes, P. cutanei* — p. *Sudoriferi, P. cutanei*.

PORNOGRAPHY, *Pornograph'ia*; from *πορνη*, 'a prostitute,' and *γραφω*, 'I describe.' A description of prostitutes or of prostitution, as a matter of public hygiene.

POROCE'LE, from *πωρος*, 'callus,' and *κληνη*, 'a tumour.' A hard tumour of the testicle or its envelopes.

POROMA, *Induration*.

POROMPHALOCELE, *Poromphalon*.

POROMPHALON, *Poromph'alus, Poromphaloc'e'le*, from *πωρος*, 'hard,' and *ομφαλος*, 'the navel.' Umbilical hernia with hard and thickened parietes.

POROS, *Canal*.

POROSIS, *Chalaza, Induration*.

POROT'IC, *Porot'icus*, (F.) *Porotique*, from *πωρος*, 'callus.' A remedy believed to be capable of assisting the formation of callus.

PORPHYRA, *Purpura* — p. *Græcorum, Petchiæ* — p. *Hæmorrhagia, Purpura hæmorrhagica* — p. *Laciniata, Ulva umbilicalis* — p. *Umbilicalis, Ulva umbilicalis*.

PORPHYRISMA, *Scarlatina*.

PORPHYRISMUS, *Scarlatina*.

PORPHYRIZATION, *Levigation*.

PORPHYROTYPHUS, see *Typhus*.

PORPHYRU'RIA, *Porphyr'u'ria*; from *πορφυρα*, 'purple,' and *ουρον*, 'urine.' A state of the urine — *pur'puric urine* — in which it deposits the remarkable colouring matter — *Pur'purine, Uro'sacine, Rosae'ic acid, Uro'e'y'thrin, Uro'rhodine, Ur'rhodine* — in association with urate of ammonia.

POR'PHYRY, *Porphyr'ites*, from *πορφυρα*,

'purple.' A species of very hard, compound rock, susceptible of considerable polish, and used in the fabrication of mortars and slabs for the apothecary.

PORPHYRY, BLACK, Ophtites.

PORPHYURIA, Porphyuria.

PORRACÉE, Porraceus.

PORRACÉOUS, *Porra'ceus, Pra'sinus*, from *porrum*, 'a leek.' (F.) *Porracé*. Having the green colour of the leek. An epithet given to certain excreted matters, — the sputa, bile and feces particularly.

PORREAU, *Allium porrum*.

PORRECTUM, Lever.

PORRET, *Allium porrum*.

PORRIDGE, ATHOL, see Mahogany.

PORRIGINE, *Porrigio favosa*.

PORRIGINEUX, *Porriginosus*.

PORRIGINOSUS, *Porriginosus*.

PORRIGINOUS, *Porriginosus*, (F.) *Porrigineux*. Appertaining to porrigo.

PORRIGO (L.), 'scurf or scall in the head.' *Tin'ca, Favus, Furfuratio, Furfures, Epye'sis* seu *Phlysis porrigo, Trichono'sis, Scalled head* in general, *Scallard*; from *porrigere*, 'to spread.' (F.) *Teigne, Rache*. Some of the varieties are contagious. It is principally characterized by an eruption of the pustules, called favi and achores, unaccompanied by fever.

PORRIGO CONFERTA, *P. scutulata*.

PORRIGO DECALVANS, *Tricho'sis a'rea, Area, Alope'cia areata seu partialis seu circumscripta, Phytoalope'cia, Trichono'sis furfura'cea, Tyr'ia, Tyro'ma, Ophi'asis, Tin'ea tendens, Herpens tonsu'rans, Squarra tendens, Limited or partial Baldness*, consists of patches of baldness without decay or change of colour in the surrounding hair, the exposed parts of the scalp being glabrous, white, and shining. The morbid condition sometimes spreads, so that the patches coalesce, rendering the baldness extensive. To a vegetable growth, found at the roots of the hair in *Tinea tendens*, Gruby gives the name *Microsporion Andou'ni*. It is, also, called *Tricophyton* seu *Trichomyces tonsu'rans*. The treatment consists in keeping the scalp cleared by constant shaving, and in the steady application of some stimulating liniment or ointment.

PORRIGO FAVO'SA, *Ce'rión, Favus, Epye'sis porrigo favosa, Tinea favosa, Scab'ies cap'itis favosa, Melice'ra, Melice'rum, Melice'ria, Melilifa'num, Porrigoph'ytia, Honey-comb Scall or Tetter*, (F.) *Teigne favense, Porrigine*. This consists in an eruption of pustules common to the head, trunk, and extremities, pea-sized, flattened at the top, in clusters, often uniting; discharge, fetid; scabs, honey-combed; the cells filled with fluid. It occurs both in early and adult life. Modern researches have satisfied some observers, that the crusts of favus are of vegetable nature, and formed of a parasitic plant, belonging, according to Gruby, to the obsolete genus *mycoderm'a*. MM. J. Müller and Lebert refer it to the genus *Oidium*, and call it *Oid'ium Schönleini*, whilst Remak assigns it to a new genus under the name *Achorion Schönleini*. The point is not, however, settled. The treatment of this variety must consist in the exhibition of laxatives and the mildest stimulating ointments, such as the *Ung. zinci, Ung. hydrargyri præcipitat. alb., &c.* Eczema of the hairy scalp is often confounded with Porrigo.

PORRIGO FURFURANS, *Epye'sis porrigo furfuracea, Tinea seu Tricho'sis furfuracea seu porriginosa, Pityri'asis, Teigne furfuracée* (Alibert), commences with an eruption of small achores, the fluid of which soon concretes and separates in innumerable thin, laminated scabs, or scale-like exfoliations. It is attended with a good

deal of itching and some soreness of the scalp, to which the disease is confined. It occurs chiefly in adults. In the treatment, the scalp must be kept shaved. The part must be washed repeatedly with soap and water, and an oiled silk cap worn. The nature of the ointments used must vary according to the period of disease and the irritability of the part affected. *Zinc ointment*; — one made with the *Cocculus indicus*; — the *Sulphur ointment*; — *Citrine ointment*; *Ung. hydrargyri nitrico-ocydii*; *Tar ointment*, and *Nitric acid ointment* have all been found useful. Should inflammation or discharge arise, these applications must of course be intermitted.

PORRIGO LARVALIS, *P. lupinosa*.

PORRIGO LARVALIS, *Crusta lactea, Epye'sis Porrigo crustacea, Menti'go, Achor, Tin'ea lactea seu Fa'ciei, Lactu'men, Lacti'go, Milky scall* or *Tetter, Milkblotch*, (F.) *Crôte de lait ou lait-eusé, Feux volages, La Graine*. This is, almost exclusively, a disease of infancy. It commonly appears first on the forehead and cheeks, in an eruption of numerous, minute, whitish achores on a red surface. These break and discharge a viscid fluid, which becomes incrustated in thin, yellowish, or greenish scabs. The patches spread, until the whole face becomes, as it were, enveloped in a mask; hence the epithet *larvalis*. The disease is rather a variety of Eczema. Sometimes the eruption appears on the neck and breast; and, occasionally, on the extremities. In general, the health of the child does not suffer, but the eruption is always attended with much itching and irritation. The treatment consists in mild, tepid ablution, and the application of gently stimulating ointments, as the oxydum zinci. The bowels must be kept in a soluble state by small doses of calomel, or by rhubarb and magnesia.

PORRIGO LUPINO'SA, *Tin'ea lupi'na, Favus disper'sus, Scabies cap'itis, Epye'sis porrigo lupino'sa, Porri'go larva'lis, Impeti'go figura'ta, Tin'ea granula'ta seu mucosa, Crusta lactea* (of some), *Ment'agra infan'tum*, (F.) *Teigne, Dartre crustacée flavescence, Favus disséminé*, consists of minute pustules in small patches, mostly commencing on the scalp; the patches terminate in dry, delving scabs, resembling lupine seeds; the interstices often covered with a thin, whitish and exfoliating incrustation. It occurs chiefly in early life, and requires the same treatment as the last.

PORRIGO SCUTULA'TA, *P. confer'ta, Tin'ea granula'ta seu fice'osa, Epye'sis porrigo galeata, Achores seu Scab'ies cap'itis, Favus confer'tus, Ringworm of the Scalp, Scalled head*, (F.) *Teigne annulaire, T. en anneau, T. nummulaire, Favus en groupes*. It commences with clusters of small, light, yellow pustules, which soon scab off; and, if neglected, become hard by accumulation. If the scabs be removed, the surface is left red and shining, but studded with slightly elevated points. If not attended to, it involves the whole head. It occurs in children three or four years of age, and is very unmanageable. The rules laid down under *Porri'go furfurans* must be here still more perseveringly enforced. The whole tribe of stimulating ointments may be used in succession. No one will always succeed, and hence the necessity of change, provided advantage should not seem to follow any particular application. The *Unguentum ad Scabiem* of Banyer sometimes cures, when others fail.

PORRIGOPHYTA, *Porri'go favosa*. *Porri'gophyta* means the plant of favus or of porrigo favosa.

PORRILLON, *Narcissus pseudonarcissus*.

PORRUM, *Allium porrum, Thymion*.

PORRUS, *Sarcoma, Thymion*.

PORTA, πύλη, *Pyle*, (F.) *Porte*, 'a gate.' The

part of the liver or other organ—*hilus*—where its vessels enter as by a gate. See Liver. Also, the Vulva.

PORTA HEPATIS, see Liver — p. Jecoris, see Liver — p. Lienis, see Spleen.

PORTA VENA, *Vena portæ*, *V. portarum* seu *ad portas* seu *portalis* seu *magna* seu *quæ ad portas est* seu *stelechia*'a seu *lac'tea* seu *ostia*'ria seu *arterio*'sa seu *arteria*'lis, *Rama*'lis *vena*, *Jan*'itrix, *Manus Jec*'oris seu *he*'patis, *Vena ad portas*. The System of the *vena porta* or the *Abdominal venous system* or *Portal system*, (F.) *Veine porte*, *Porte veine*, is a vascular apparatus of black blood, situate in the abdomen, and resulting from two distinct orders of vessels, united into one common trunk. 1. One of these trunks, much more extensive than the other, has received the name *Vena porta abdominalis*, because it arises from all the organs enclosed in the cavity of the abdomen, except the kidneys and bladder; and, in the female, the uterus. The *Abdominal vena porta* has two principal roots, the *splenic vein* and the *superior mesenteric*, which have their ramifications in all the digestive organs. 2. The other trunk, destined solely to the liver, has been called the *Hepatic vena porta*. It appears to be a continuation of the abdominal *vena porta*, and proceeds towards the inferior surface of the liver. Opposite the transverse fissure of that organ, it divides, like an artery, into two branches, which, by their union, seem to form a canal or duct, called by some the *Sinus of the vena porta*, or of the *portal vein*. These branches are distributed in the substance of the liver, whither they are accompanied by a prolongation of the fibrous capsule of that organ, — the capsule of Glisson. The different branches of the *vena porta* are devoid of valves. See Liver.

PORTAL, from *porta*, 'a gate.' Relating to the porta of the liver, — as the *portal system*, or system of the *vena porta*. By extension, the term has been applied to an analogous system of vessels in the kidney. See Kidney.

PORTAL FISSURE, see Liver — p. Fossa, see Liver — p. System, see *Porta Vena* — p. System of the Kidney, see Kidney — p. Vein, *Porta Vena* — p. Veins of the Kidney, see Kidney.

PORTE-AIGUILLE, *Acutenaculum*, *Needle-carrier*, *Needle-bearer*, from (F.) *porter*, 'to carry,' and *aiguille*, 'a needle.' An instrument for accurately laying hold of a needle, and giving it greater length, when it is so fine and small that it cannot be held by the fingers. It is of steel or silver, about two inches long, and throughout the whole, almost, of its length, divided into two branches, so as to form a kind of forceps, capable of being closed by means of a sliding ring. A modification of this instrument was devised by Dr. Physick for taking up deep-seated arteries beyond the reach of a tenaculum or common needle. It consists of a forceps so constructed as to hold in its extremity a needle armed with a ligature. The handles of the forceps are fastened together, temporarily, by a spring or catch; and, when the needle is fairly deposited beneath the vessel, it is disengaged from the forceps and drawn out, leaving the ligature behind, which can be tied without difficulty.

PORTE-BOUGIE (F.). A silver canula similar to that of a trochar, except that it is longer. It is used for conducting bougies into the urethra.

PORTE-CAUSTIQUE, *Porte-pierre* — p. *Feuille*, *Subscapularis*.

PORTE-LAQ. An instrument for carrying the laq or fillet over the limb of the fœtus whilst in utero, when turning is necessary.

PORTE-LIGATURE, from *porter*, 'to carry,'

and *ligature*. An instrument for conveying a ligature to deep-seated parts.

PORTE-MÈCHE (F.), from *porter*, 'to carry,' and *mèche*, 'a tent.' An instrument for carrying tents or *mèches* deeply into fistulous openings, or sinuses, to the bottom of ulcers, &c. It is a wire of silver or steel, four or five inches long, having a notch at one extremity, and a button at the other.

PORTE-MOXA (F.). A small instrument for keeping the moxa applied to a part to be cauterized. It consists of a metallic ring—separated from the skin by three supports of ebony — to which a handle is adapted.

PORTE-NEUD (F.), from *porter*, 'to carry,' and *neud*, 'a knot.' An instrument for carrying a ligature round the base or pedicle of a tumour.

PORTE-PIERRE (F.), *Porte-caustique*, *Caustic bearer*. An instrument similar to a *porte-crayon* for carrying lunar caustic.

PORTE-SONDE (F.). An instrument resembling a *porte-crayon*, employed for holding the style or *sonde*, and inserting it more readily into the nasal duct, during the operation for fistula lacrymalis.

PORTE VEINE, *Porta vena*.

PORTENTUM, *Monster*.

PORTER, *Cerevisia*.

PORTIO DURA, *Facial nerve* — p. *Inter duram et mollem*, *Portio Wrisbergii* — p. *Intermedia Wrisbergii*, *Portio Wrisbergii* — p. *Media inter portionem duram et portionem mollem*, *Portio Wrisbergii*.

PORTIO MOLLIS, *Auditory nerve*.

PORTIO WRISBERGII, *P. intermedia Wrisbergii* seu *media inter portionem duram et portionem mollem* seu *inter duram et mollem*, (F.) *Faisceau intermédiaire de Wrisberg*, *Intermédiaire de Wrisberg*. A small, white fasciculus, intermediate between the portio mollis and portio dura of the seventh pair of nerves, which was first described by Wrisberg. The Chorda Tympani is supposed by some to emanate from this nerve.

PORTION COSTO-TRACHÉLIENNE DU SACRO-SPINAL, *Longissimus dorsi* — p. *Écailléux ou squameux du temporal*, *Squamous portion of the temporal* — p. *Lombaire du plexus cervical*, *Lumbar plexus*.

PORTION GODRONNÉ DE LA CORNE D'AMMON. A name given by Vieq d'Azyr to a small, denticulated cord, of a compact tissue and granular appearance, which unites the cornu ammonis to the paries of the lateral ventricle.

PORTONARIUM, *Pylorus*, *Duodenum*.

PORTULACA, *P. oleracea*, *Andrach'nè*, *Allium Gallicum*, *Parslane*, (F.) *Pourpier cultivé*. This plant abounds with a watery and somewhat acid juice; and is often put into soups or pickled with spices. It is regarded as antiseptic and aperient.

PORUS, *Callus*, *Meatus* — p. *Acusticus*, *Auditory canal*, *internal*.

PORUS OPTICUS. An opening in the centre of the cribriform lamella of the sclerotic, through which the central artery of the retina enters the eyeball.

POSCA, *Oxyerate*.

POSE, *Coryza*.

POSITOS, *Potable*.

POSITION, FALSE, *False position*.

POSOL'OGY, *Posology*'ia, *Dosiology*'ia, from ποσος, 'quantity,' and λογος, 'a discourse.' Indication of the doses in which the different articles of the materia medica ought to be exhibited. (F.) *Dosage*.

POSOQUERIA DUMETORUM, *Randia Dumetorum*.

POSSÉDÉ, *Possessed*.

POSSESS'ED, *Dæmoni*'acus, (F.) *Possédé*. One

affected with epilepsy, or other strange neurotic affection, was formerly supposed to be 'possessed' by a demon. Hence, exorcism and various religious ceremonies, at one time employed to drive off the intruder.

POSSET, *Possetum*, from (L.) *posca*, 'sour wine and water' [?]. Milk curdled with wine, or any acid, or treacle. A preparation of beer and milk: *Zythofala*.

POSSET, SACK, see Sack—p. Sago, see Sago.

POSSETTING, *Regurgitatio* (of Infants).

POSTBRACHIALE, *Metacarpus*.

POSTCARPIUM, *Metacarpus*.

POSTERIOR ANNUALARIS. An external, interosseous muscle, which arises from the corresponding sides of the metacarpal bones of the ring-finger and little finger, and is inserted into the inside of the tendon on the back of the ring-finger. Its use is to draw the ring-finger inwards.

POSTERIOR AURIS, *Retrahens auris*.

POSTERIOR INDICIS MANÛS. An internal, interosseous muscle, which arises from the inner or ulnar side of the metacarpal bone of the fore-finger, and is inserted into the inside of the tendon on the back of the fore-finger. Its use is to draw the fore-finger inwards.

POSTERIOR INDICIS PEDIS, *Abductor Indicis Pedis*. An external, interosseous muscle, which arises from the contiguous sides of the metatarsal bones of the fore-toe, and second of the small toes, and is inserted into the outside of the root of the first bone of the fore-toe. Its use is to pull the fore-toe outwards.

POSTERIOR MEDII DIG'ITI MANÛS. An external, interosseous muscle, which arises from the corresponding sides of the metacarpal bones of the middle and ring-fingers; and is inserted into the inside of the tendon on the back of the middle finger. Its use is to draw the middle finger inwards.

POSTERIOR MEDII DIG'ITI PEDIS, *Abductor medii digiti pedis*. An external, interosseous muscle, which originates from the contiguous sides of the metatarsal bones of the second and third of the small toes, and is inserted into the outside of the root of the first bone of the second of the small toes. Its use is to pull the toe outwards.

POSTERIOR TERTII DIG'ITI, *Abductor tertii digiti*. An external, interosseous muscle, which arises from the contiguous sides of the metatarsal bones of the third and fourth of the small toes, and is inserted into the outside of the root of the first bone of the third of the small toes. Its use is to pull the toe outwards.

POSTHE, *Penis*, *Prepuce*.

POSTHETOMIST, *Posthetomus*, from *ποσθη*, 'prepuce,' and *τομη*, 'incision.' One who performs the operation of circumcision.

POSTHETOMY, *Circumcision*.

POSTHIA, *Hordeolum*.

POSTHIOPLAS'TIC, *Posthioplas'ticus*, from *ποσθη*, 'the prepuce,' and *πλασσω*, 'I form.' An epithet applied to the operation for restoring the prepuce.

POSTHITIS, *Acrobystitis*, *Acroposthitis*, from *ποσθη*, 'the prepuce, the penis,' and *itis*, the termination for inflammation. Inflammation of the prepuce.

POSTHIUM, *Prepuce*.

POSTHON'GUKS, from *ποσθη*, 'the prepuce or penis,' and *γκυος*, 'a tumour.' Swelling of the prepuce or penis.

POSTHIOPLAS'TICA, from *ποσθη*, 'prepuce,' and *πλαστικός*, 'formative.' The art of making a new prepuce.

POSTHUMOUS, from *post*, 'after,' and *humus*, 'the ground.' Occurring after death.

POSTHUMOUS CHILD. One born after the death of its father, or taken from the dead body of its mother, as by the Cæsarean section.

POSTIME, *Abscess*.

POST-MORTEM. 'After death;' as 'a *post mortem* or necroscopic examination.'

POST-NATUS. 'Born after.' In the old law writers, the second son.

POST-PARTUM. 'After delivery.' As '*post partum* hemorrhage.'

POSTPOSIT'IO, (*post*, 'after,' and *ponere*, 'positum', 'to place,') 'a postponement.' Delay in the return of a paroxysm. It is opposed to *anticipatio*, which means the return of a paroxysm earlier than its accustomed hour.

In this sense, we speak of an *anticipating*, and a *postponing* (*Febris hysteret'ica*) intermittent.

POSTREMA, *Uterus*.

POTABLE, *Potabilis*, from *potare*, 'to drink.' *Pot'imos*, *Potos*, *Pos'imos*, 'drinkable.' Water is said to be potable, when it contains atmospheric air: is not brackish; and has no mineral impregnation of consequence.

POTASH. So called from the pots or vessels in which it was made;—*Vegetable alkali*, *Gastrinum*. Also, *Potass*.

POTASH OF COMMERCE, *Potassa impura*, *Impure potassa*, *Alu'men catinum*, *Cin'eres Rus'sici*, *Subcar'bonas potassæ impuræ*, *Potassæ car'bonas impurus*, *Lix'ivus cinis*, the *Pearlash* of commerce, is prepared from the ashes of land-plants by calcination, solution in water, filtration, and evaporation. It usually consists of subcarbonate of potassa, sulphate of potassa, chloride of potassium, silicic acid, oxide of iron, &c.

From the ashes of lees of wine, and from vine-twigs, a much purer alkali is obtained. It is called *Cinis infecto'rius seu fæcum*, *Cin'eres clavella'ti seu gravella'ti*, *Alu'men fæcum*, (F.) *Cendres gravellées ou de sarment*.

Another variety of the alkali is afforded by burning argol in a crucible; afterwards powdering and calcining it, till it is nearly white; then dissolving in water, filtering, and evaporating. It is called *Salt of Tartar*, *Sal Tar'tari*, *Kali præparatum e tartaro*, *K. e tartaro*, *Subcar'bonas potassæ puris'simus*, *Potassæ subcar'bonas e tartaro*. Lastly, when wormwood is burnt to ashes, dissolved in water, filtered, and evaporated to dryness, it affords another variety of vegetable alkali, the *Sal absinthii* or *Salt of wormwood*.

Impure potash is used for preparing the subcarbonate for medical use.

POTASS, *Potassa fusa*, *Potash*. The protoxide of potassium.

POTASSA, ACETATE OF, *Potassæ acetas*—p. Bichromate of, *Potassæ bichromas*—p. Bisulphate of, *Potassæ supersulphas*—p. Bitartrate of, *Potassæ supertartaras*—p. Carbonate of, *Potassæ carbonas*—p. Carbonate of, pure, see *Potassæ subcarbonas*—p. Caustica cum calce, *Potassa cum calce*—p. Chlorate of, *Potassæ murias hyperoxygenatus*—p. Chromate of, *Potassæ chromas*—p. Chromate of, neutral, *Potassæ chromas*—p. Chromate of, yellow, *Potassæ chromas*.

POTASSA CUM CALCÈ, *P. opè calcis para'ta et ignè fusa*, *Potassa caustica cum calcè*, *Potassæ with lime*, *Calx cum kali puro*, *Caus'ticum commu'nè fortius*, *Lapis infernal'is sive septicus*, *Kali causticum cum calcè*, *Lapis causticus*, (F.) *Potasse préparée avec la chaux*, *P. à la Chaux*, *Pierre à caudère*. (*Potassæ, Calcis* ʒʒj. Rub together, and keep in a well-stopped bottle.—Ph. U. S.) Used for the same purposes as the next, but more manageable; being less deliquescent.

POTASSA, EUCHLORATE OF, *Potassæ murias hyperoxygenatus*—p. Ferrocyanate of, *Potassii ferrocyanuretum*—p. Ferropotassiate of, *Potassæ cyanuretum*.

POTASSA FUSA, *Potassa, Kali causticum seu purum, Fused potass, Alkali vegetab'ile fixum causticum, Caus'ticum commu'nē acer'rium, C. alkali'num seu commu'nē seu potentia'le seu Sali'num, Hydros ka'ticum, H. potassæ puræ fusæ, Potossæ hydros, Lapis causticus seu causticus chirurgo'rum seu inferna'lis alcali'nus seu septi'cus, Rupto'rium commu'nē, Fixed veg'table alkali, Hydrate of Potassa, (F.) Potassæ caustique.* (Prepared by evaporating solution of potass to dryness in an iron vessel.) This preparation is generally run into cylindrical moulds, covered with paper, and kept in well-corked vessels. It is powerfully escharotic, and is used for forming issues, curing strictures, &c.

POTASSA, FUSED, Potassa fusa.—p. Hydriodate of, Potassæ hydriodas.—p. Hydrobromate of, see Bromine.—p. Hydrocyanate of, Potassii cyanuretum.—p. Hypermanganate of, Potassæ hypermanganas.—p. Hyperoxalas, Potass, oxalate of.—p. Hypertartras, P. supertartras.—p. Impura, Potash of commerce.—p. and Iron, tartrate of, Ferrum tartarizatum.—p. with Lime, Potassa cum calce.—p. Liquida, Liquor potassæ.—p. Mephite of, Potassæ subcarbonas.—p. Monochromate of, Potassæ chromas.—p. Muriate of, Potassæ murias.—p. Nitrate of, Potassæ nitras.—p. Ope calcis parata et igne fusa, Potassa cum calce.—p. Oxymuriate of, Potassæ murias hyperoxygenatus.—p. Permanganate of, Potassæ permanganas.—p. Prussiate of, Potassii ferrocyanuretum.—p. and Soda, tartrate of, Soda, tartrate of.—p. Subcarbonate of, Potassæ subcarbonas.—p. Sulphate of, Potassæ sulphas.—p. Sulphate of, acid, Potassæ supersulphas.—p. Sulphuret of, Potassæ sulphuretum.—p. Supercarbonate of, Potassæ carbonas.—p. Supersulphate of, Potassæ supersulphas.—p. Supertartrate of, Potassæ supertartras.—p. Tartrate of, Potassæ tartras.

POTASSÆ ACETAS, *Oxytar'tarus, Acetas kali seu lixiv'iæ seu ka'licum, Alkali tar'tari aceto saturatum, A. vegetab'ile cum aceto, Magistra'rium tartari purgans, Terra folia'ta Tartari, Kali aceta'tum, Sal du'rel'icus seu Senner'ti, Arca'num tartari, Ac'etate of potass, (F.) Acétate de potasse.* (Acid, acetic. Oj, Potassæ carbon, q. s. Mix and add, by degrees, enough acetic acid to saturate the alkali; then filter and evaporate till a pellicle is formed, which is to be dried upon bibulous paper; evaporate again in a water-bath, and, removing the pellicles, dry.—Ph. U. S.)

It is cathartic and diuretic. Dose, ℥j to ℥ij, or more.

POTASSÆ ET ALUMINÆ SULPHAS, Alumen.—p. Biantimonias, Antimonium diaphoreticum.—p. Bicarbonas, Potassæ carbonas.

POTASSÆ BICHRÔMAS, *Kali chro'micum rubrum seu ac'idum seu bichro'micum, Bichro'mate of potassæ.* Procured by adding sulphuric, nitric, or acetic acid to a solution of the neutral chromate, and setting it aside to crystallize. It is a violent irritant poison; and has been used as a caustic in cases of morbid growths, in the proportion of from half a drachm to a drachm of the salt to from an ounce to an ounce and a half of water.

POTASSÆ BISULPHAS, P. supersulphas.—p. Bitartras, P. supertartras.

POTASSÆ CARBONAS, *Kali aëratum, Bicar'bonas potassæ, Potassæ bicar'bonas* (Ph. U. S., L., E., & D.), *Deuto'carbonas potassii, Carbonate, bicar'bonate or supercar'bonate of potassa.* This is not caustic, like the subcarbonate of potass, and hence, has been preferred to relieve acidity. (Potass. carbon. Biv, Aquæ destillat. Ox. Pass carbonic acid through the solution until it is saturated, and filter. Evaporate at a heat not exceeding 160°, and dry the crystals on bibulous paper. Carbonic acid is obtained from marble

by the addition of dilute sulphuric acid.—Ph. U. S.) Dose, gr. x to ℥ss. It is used in forming the soda powders, as well as for its antacid properties.

Distillers and brewers prepare this salt with great facility by suspending a solution of the purified carbonate of potassa in the fermenting tun. The alkaline salt is thus surrounded by an atmosphere of carbonic acid; and by absorbing it, it crystallizes into bicarbonate. The salt in powder is called *sal aëratum*. Its composition is between that of a carbonate and of a bicarbonate.

POTASSÆ CARBONAS, P. subcarbonas.—p. Carbonas e Lixivo Cinere, P. subcarbonas.—p. Carbonas impurus, P. subcarbonas.—p. Carbonas purus, Pure carbonate of potassa, see P. subcarbonas.—p. Chloras, P. murias hyperoxygenatus.—p. Chloruretum oxydatum, P. murias hyperoxygenatus.

POTASSÆ CHROMAS, *Kali chro'micum flavum seu neutra'le, Neutral yellow Chromate or Monochromate of potassa.* Prepared by igniting a mixture of four parts of native chromite of iron (chrome iron ore) and one part of nitre; dissolving out the chromate of potassa by water, and crystallizing. It has been used as an emetic, expectorant and diaphoretic. Dose, as an emetic, from two to four grains; as an expectorant, from ʒth to ʒ grain. In the proportion of one drachm to 32 ounces of water, it has been used as an antiseptic wash—called by Jacobson, *Liquor conservatrix*.

POTASSÆ CITRAS, *Citrate of potassa.* (Acid, citric. ℥x, Potass. bicarb. ℥xiv, Aq. q. s. Dissolve the acid in the water; and after effervescence has ceased, strain and evaporate to dryness. The salt is deliquescent, and must be kept in well-stopped bottles. Ph. U. S.) It possesses the refrigerant properties of the neutral salts, and may be given in fever, when to do little or nothing is the most advisable course. Dose, gr. x to ℥ss.

POTASSÆ ET FERRI TARTRAS, Ferri tartarizatum.—p. Hydros, Potassa fusa.

POTASSÆ HYDRIODAS, *Potassæ Protohy'driodas, Potassii protoz'idi hydri'odas, Kali Hydriodini'cum seu Hydriod'icum, Hydriodas Ka'licus, Hydri'odate of potass, (F.) Hydriodate de potassæ.* If a solution of potass be poured on iodine, an iodate and hydriodate are formed. These may be separated by means of alcohol, which only dissolves the latter of these salts. The hydriodate, or rather the *Iodide of Potassium, Kalium Ioda'tum, Potassii Iodure'tum seu Iod'idum, (F.) Iodure de potassium,* may be obtained by evaporation. When the *Iodide of potassium* is dissolved in water, it becomes the *Hydriodate of Potassa*. The following is the formula in the Ph. U. S. Potass. ℥vj; Iodin. in pulv. ℥xvj; Carbon. ligni in pulv. subtiliss. ℥ij; Aq. bullient. Oijj. Dissolve the potassa in the water: add the iodine gradually, stirring until the solution becomes colourless, and continue the additions until the liquid remains slightly coloured from excess of iodine. Evaporate to dryness, stirring in the charcoal towards the close. Rub to powder, and heat to dull redness in an iron crucible, keeping up the temperature for 15 minutes. When cool, dissolve out the saline matter with pure water, filter the solution, evaporate and set aside to crystallize. By evaporating and crystallizing as before, an additional quantity of crystals may be obtained. Virtues,—those of iodine.

POTASSÆ MURIAS, *Sal Digestivus seu febrif'ugus Sylvii, Spiritus salis mari'ni coagula'tus, Muriate of Potass.* Eitter and refrigerant.

POTASSÆ MURIAS HYPEROXYGENATUS, *Potassæ Chlorus seu oxymuri'as, Oxymuriate, Hyperoxymuriate, Chlorate or Euchlorate of potass,*

Protochlorate of potassium, Alkali vegetabile salitodephlogisticatum, Chloruretum potassæ oxydatum, Haloidum oxygenatum, Oxygenochloruretum potassii, Kali chloricum, Chloras Kalicus depuratus, (F.) Chlorate de potasse. It has been regarded as antineuropathic, and as an alterative purifier of the blood and humours. It is of doubtful efficacy. Dose, 3 to 6 grains or more.

POTASSÆ NITRAS, Nitrate of Potass, Nitrum, N. prismaticum, Sal nitrum, Nitre, Sulpetret, Sal petræ, Salse'do mucrum, Sanguinea, Berenicium, Halinitrum, Protonitrate of Potassium, Nitrate of protoxide of Potassium, Kali nitricum, Nitras kalicus seu lixiviatæ, Azotas potassicus, (F.) Nitrate ou Azotate de potasse. Obtained from the putrefaction of animal matters, in contact with calcareous or alkaline earths, by elixivation; adding, if necessary, wood-ashes to supply the alkaline basis. It is formed, in an impure state, by nature, in warm climates.

It is diuretic and refrigerant, and, in large doses, purgative; externally, cooling and detergent. Dose, gr. x to ʒj. In large doses it is an acrid poison.

POTASSÆ NITRAS FUSUS SULPHATIS PAUCILO MIXTUS, Sal prunellæ, Crystalus mineralis, Nitras potassæ cum sulphure fusus, Nitrum tabulatum, Lapis Prunellæ, Anodynum mineralis, Sore-throat salt, Mineral crystal. Nitrate of potass, mixed with a little sulphate of potass and run into moulds. Its properties are those of nitre.

POTASSÆ OXALAS, Oxalæ Acidulum Potassæ seu Potassæ acidulum seu baccicum, Superoxalæ kalicum seu Potassæ, Hyperoxalæ Potassæ, Sal Acetosellæ, Oxalium, Kali oxalicum acidulum, Oxalæ subpotassicus, Superoxalate of Protoxide of Potassium, Oxalate of Potass, Salt of Sorrel, (F.) Sel d'oseille, Sel à détacher. Prepared from the juice of wood sorrel. It is refrigerant, and is used to make lemonade, &c.

POTASSÆ OXALAS ACIDULUM, Potass, oxalate of—p. Oxymurias, P. murias hyperoxygenatus.

POTASSÆ PERMANGANAS, Permanganate of potassa, Hypermanganate of potassa, has been given in cases of diabetes. Dose, from gr. ij to gr. v, three times a day. It has been prescribed, also, in obstinate dyspepsia.

POTASSÆ PROHYDRIDIAS, P. hydridas—p. Puræ fusæ hydras, Potassa fusa—p. et Sodæ tartars, Soda, tartrate of.

POTASSÆ SUBCARBONAS, P. Carbonas (Ph. U. S.), *P. carbonas et Lixivæ Cineræ, Subcarbonas Kali, Carbonas Potassæ, Kali præparatum, Sal Herbarum seu Plantarum seu Tartari seu Absinthii, Calcareous Tartar, Subcarbonate or Mephite of Potass, &c.* (See Potash.) A filtered solution of the impure subcarbonate, *Potassæ carbonas impurus* (Ph. U. S.), *Pearl-ash* (see Potash), evaporated to dryness. This deliquescent salt is given in the same cases as the potassæ carbonas, than which it is more caustic and disagreeable.

The Parisian codex has a *Subcarbonas Potassæ ex tartaro combusto, vulgo Sal Tartari or Salt of Tartar*—(it is the *Potassæ carbonas purus, Pure Carbonate of Potassa, Ph. U. S.*); a *Subcarbonas Potassæ ex deflagrantibus simul tartaræ acidulo et Nitrate Potassæ paratus, vulgo Nitrum ex tartaro fixum*; and a *Subcarbonas potassæ ex deflagrantibus cum Carbonibus Nitratæ Potassæ paratus, vulgo Nitrum fixum.* They are all used like the preceding.

POTASSÆ SUBCARBONAS IMPURUS, Potash of commerce.

POTASSÆ SULPHAS, Kali vitriolatum seu sulphuricum, Sulphas Kali Lixiviatæ vitriolata, Nitrum vitriolatum Schroederi, Sal Sapientiæ seu Tartari Sulphuratum seu Polyphretus, Specificum Paracelsi, Spiritus vitrioli coagulatus

Mynsichti, Alkali vegetabile vitriolatum, Sal de duobus, Arcanum duplicatum, Tartarum vitriolatum, Panacea Ducis Holsatiæ seu duplicata, Sulphate of Potass, Protosulphate of Potassium, (F.) Sulfate de potasse. (The salt, that remains after the distillation of nitric acid, dissolved; the excess of acid saturated with subcarbonate of potass and crystallized.) Purgative and diuretic. Dose, ʒss to ʒj as a laxative. In a large dose it has proved an irritant poison.

POTASSÆ SULPHAS CUM SULPHURE, Sal Polyphretus Glaseri, Lixiviatæ Vitriolata Sulphurea. (Formed by deflagrating nitrate of potass with sublimed sulphur.) Same virtues as the last. Dose, gr. xv to xxx.

POTASSÆ SULPHURETUM, Potassii sulphuretum—p. Superoxalæ, Potassæ oxalæ.

POTASSÆ SUPERSULPHAS, P. Bisulphas, Sal enixum seu febrifugus of Lemery, Supersulphate of Potass, Acid Sulphate or Bisulphate of Potass, Superprotosulphate of Potassium, (F.) Bisulfate de Potasse. (The salt remaining after the distillation of nitric acid, dissolved, strained, and crystallized.) It is refrigerant and purgative. Dose, ʒss to ʒij.

POTASSÆ SUPERTARTRAS IMPURUS, Tartarus crudus, Tartarum, Lapis vini, Magnetinus, Pedagra, Tartar, (F.) Tartre cru ou brut. It is called, also, *Tartarum rubrum* and *Red Argol*, when obtained from red wines; *Tartarum album* or *White Argol*, when from white wines. Tartar is the saline deposit from wines as they become aged; which attaches itself to the sides of the casks and bottles in which they are kept. It consists of a considerable quantity of acidulous tartrate of potass, tartrate of lime, silica, alumen, oxyd of iron, manganese, and a red colouring matter, if the wine be red. It is chiefly used for the preparation of cream of tartar.

POTASSÆ SUPERTARTRAS, P. hypertartaras, P. Bitartaras (Ph. U. S.) seu *tartras acida, Crystalli Tartari, Tartras Acidulus Potassæ purus, T. superpotassicus, T. subpotassicus, Supertartrate of Protoxide of Potassium, Bitartrate or Supertartrate of Potass, Crystals of Tartar, Cremor Tartari, Cream of Tartar* (when in powder), *Supertartrate of Potass, (F.) Tartrate acide de potasse, Crème de Tartre.* (The tartar of wine purified.) It requires 60 parts of water at 60° to dissolve it. It is mildly purgative, refrigerant and diuretic. Dissolved in water, with a small quantity of white wine, some sugar and lemon-peel, it forms an agreeable beverage in febrile diseases, under the name of *Imperial*. Dose, as a diuretic, ʒj to ʒij; as a purgative, ʒss to ʒi.

POTASSÆ TARTRAS, Kali tartarizatum, Alkali fixum tartarizatum, Tartarum solubile, Tartarus tartarizatus, Lixiviatæ Tartarizata, Sal Panchrestum, Tartras Kalinus seu lixiviatæ, Sal vegetabile, Alkali vegetabile tartarizatum, Tartrate of Potass, Soluble Tartar, (F.) Tartrate de Potasse. (Potassæ carbon. ʒxvj; Potassæ Bitartrat. in pulv. subtiliss. ʒij, vel q. s., aquæ bullientis, cong. Dissolve the carbonate of potassa in the water, add the bitartrate to saturation, and boil; filter, evaporate till a pellicle forms, and set aside to crystallize. Pour off the liquid; dry the crystals on bibulous paper, and keep in closely-stopped bottles.—Ph. U. S.) A saline cathartic in the dose of ʒij to ʒj.

POTASSÆ TARTRAS ACIDA, P. supertartaras—p. *Tartras acidulus purus, P. supertartaras*—p. *Tartras stibialis seu stibiosus, Antimonium tartarizatum.*

POTASSE, ACÉTATE DE, Potassæ acetas—p. *Bisulphate de, Potassæ supersulphas*—p. *Caustique, Potassa fusa*—p. *à la Chauz, Potassa cum calce*—p. *Chlorate de, Potassæ murias hyperoxygenatus*—p. *Hydriodate de, Potassæ hy-*

driodas—*p. Liquide*, Liquor potassæ—*p. Nitrate de*, Potassæ nitras—*p. Préparée avec la chaux*, Potassa cum calce—*p. et de Soude, tartrate de*, Soda, tartrate of—*p. Stulfate de*, Potassæ sulphas—*p. Sulfure de*, Potassii sulphuretum—*p. Tartrate de*, Potassæ tartras—*p. Tartrate acide de*, Potassæ supertartras.

POTASSII BROMIDUM, *Potas'sæ hydrobro'mas*, Bromide of potassium, (F.) Bromure de Potassium. (Bromin, ℥ij; Ferri filii, ℥j; Potassæ carbon. ℥ij and ℥j, vel q. s.; Ag. destillat., Oiv. Add the iron filings and bromine to a pint and a half of the water; stirring for half an hour. Apply a gentle heat, and when the liquor assumes a greenish colour, add gradually the carbonate of potassa, dissolved in Oiss of the water, until it ceases to cause a precipitate. Continue the heat for half an hour, and filter. Wash the precipitate with the remaining water, boiling hot, and filter. Mix the liquors and crystallize by evaporation.—Ph. U. S.) Virtues:—those of iodide of iron.

POTASSII CYANIDUM, P. Cyanuretum. POTASSII CYANURETUM, P. Cyan'idum, Cyanuret of Potassium, Hydrocyanate of Potassa. (Potassii Ferrocyannur., in pulv. ℥viii; Potassæ Carbonat. exsicc., ℥ij. Mix intimately and throw into a deep iron crucible, heated to redness; keep up the heat till effervescence ceases, and the fused mass concretes, of a pure white colour, upon a warm glass rod dipped into it; then pour out the liquid carefully into a shallow dish to solidify, stopping before the salt becomes contaminated with the precipitated iron. Break up the mass whilst warm, and preserve in well-stopped bottles.—Ph. U. S.) Used in the same cases as the hydrocyanic acid. Dose, a quarter of a grain.

POTASSII DEUTO-CARBONAS, Potassæ carbonas. POTASSII FERROCYANURETUM, P. Ferrocyann'idum, Ferrocy'anide or Ferrocyannuret of Potassium, Ferrocy'anate or Ferroprussiate or Prussiate of Potassa, (F.) Protocyanure jaune de fer et de potassium, Cyanure de fer et de potassium. The yellow double cyanuret of potassium and iron, the salt from which the cyanuret of potassium is obtained by calcination. It is not much used in medicine. It has been advised as an astringent in the colligative sweats of phthisis, in leucorrhœa, &c.; but it does not seem to be possessed of much activity. Dose, 10 or 15 grains every four or five hours.

POTASSII HYDRARGYRO-IODIDUM, Potassæ Iodohydrar'gyras, Hydrargyrum biiodatum cum kalio iodato, Kalium iodatum hydrargyrum, Iodhydrar'gyrate or Hydrargyro-iodide of Potassium. This salt is made by the combination of iodide of potassium with red iodide of mercury. Its properties are similar to those of the iodides of mercury, but in a less degree.

POTASSII IODIDUM, Potassæ hydriodas—*p. Ioduretum*, Potassæ hydriodas—*p. Oxygeno-chloruretum*, Potassæ murias hyperoxygenatus—*p. Protoxidi hydriodas*, Potassæ hydriodas.

POTASSII SULPHO-CYANURETUM, Sulpho-cyan'uret of Potassium. This salt has been prepared as a substitute for hydrocyanic acid, and cyanuret of potassium, on the ground of its possessing their advantages without their inconveniences.

POTASSII SULPHURETUM, Potas'sæ Sulphure'tum seu tersulphure'tum, Kali sulphuretum, Hepar Sulph'uris, H. sulph'uris sali'num seu sulph'uris vulgare', Sulphure'tum liciv'ixæ seu kal'icum, Liver of Sulphur, Sulphuret of Potass, (F.) Sulfure de potasse, Sulfure de potassium sulfatè, Foie de Soufre. (Sulphur. ℥j, Potassæ carb. ℥ij. Rub them together, and place the mixture in a covered crucible upon the fire until they unite. It has been employed in affections of the chest, as an expectorant, in the dose of from ʒss to ʒj,

largely diluted; but it is chiefly used as a bath or wash in cases of itch, tinea capitis, and other cutaneous affections.)

POTASSII TERSULPHURETUM, Potassii sulphuretum.

POTASSIUM. Same etymon as potash. The metallic base of potassa.

POTASSIUM, BROMURE DE, see Bromine—*p. Cyanuret of*, Potassii cyanuretum—*p. Ferro-cyanide of*, Potassii ferrocyanuretum—*p. Ferro-cyanuret of*, Potassii ferrocyanuretum—*p. Protoarsenite of*, Arsenite of protoxide of potassium—*p. Protochlorate of*, Potassæ murias hyperoxygenatus—*p. Protonitrate of*, Potassæ nitras—*p. Protoxide of*, Potass—*p. Protoxide of*, nitrate of, Potassæ nitras—*p. Protoxide of*, superoxalate of, Potass, oxalate of—*p. Protoxide of*, supertartrate of, Potassæ supertartras—*p. Protosulphate of*, Potassæ sulphas—*p. Sulfure de*, sulfatè, Potassii sulphuretum—*p. Sulphuret of*, Potassii sulphuretum—*p. Superprotosulphate of*, Potassæ super-sulphas.

POTATO, Solanum tuberosum.

POTATO FLY, Lytta vittata.

POTATO, HOG, Convolvulus panduratus.

POTATO OIL, Oil, fusel. By distilling potato oil with anhydrous phosphoric acid, a volatile colorless oily liquid is procured, which is lighter than water, and boils at 102°. This is Amylene or Amylène, (F.) Amylène. It is best prepared from fusel oil by the action of chloride of zinc. The vapour has been employed as an anæsthetic.

POTATO, SPANISH, Convolvulus batatas—*p. Sweet*, Convolvulus batatas.

POTATO VINE, WILD, Convolvulus panduratus.

POTATO, WILD, Convolvulus panduratus.

POTBELLY, Physconia.

POTECARY, Hypoheary.

POTELÉE, Hyoseyamus.

POTENTIA, Force.

POTENTIA seu POTES'TAS COËUN'DI, Capability of copulation.

POTENTIA GENERAN'DI. The power of procreation.

POTENTIA IRRITANS, Stimulus.

POTENTIAL, Potentia'lis, (F.) Potentiel; from potens, 'able.' An epithet for remedies which, although energetic, do not act till sometime after their application. The caustic alkalies, for instance, are called Potential cauteries in contradistinction to the hot iron, which is termed actual.

POTENTILLA, P. reptans.

POTENTILLA ANSERINA, P. argenti'na seu impo'lita seu neglecta, Argenti'na vulgari's, Fragaria anserina, Ar'gentine, Chenobos'con, Argenta'ria, Anseri'na, Silver Weed, Wild Tansy, Moorgrass, (F.) Argentine, Potentille, Herbe aux oies. Ord. Rosacæ. The leaves are mildly astringent and tonic.

POTENTILLA ARGENTINA, P. anserina—*p. In-polita*, P. anserina—*p. Neglecta*, P. anserina.

POTENTILLA NORVEG'ICA, Norway Cinque-foil, an indigenous plant, is possessed of similar properties.

POTENTILLA PALUSTRIS, Comarum palustre.

POTENTILLA REPTANS, Pentaphyl'lum, Fraga'ria pentaphyl'lum, Potenti'la, Quinquefo'lium, Q. majus, Common cinquefoil, (F.) Potentille rampante, Quintefeuille. The roots are possessed of astringent properties.

POTENTILLA TORMENTILLA, Tormentilla.

POTENTILLE, Potentilla anserina—*p. Rampante*, Potentilla reptans.

POTENTIZING, see Dynamic.

POTERIUM SANGUISORBA, Pimpinella saxifraga.

POTESTAS COEUNDI, Potentia coeundi—p. Generandi, Potentia generandi.

POTEX, Anus.

POTHOMOR'PHA PELTA'TA, *Pothomor'phē pelta'ta*, (*pothos*, and *μορφή*, 'shape,') *Caapeba* [?]. A Brazilian plant, *Order*, Piperaceæ, which is possessed of diuretic properties, and has been given in stranguery.

POTHOMORPHA UMBELLA'TA, also called *Caapeba* [?], is used in Brazil to modify nutrition, as in glandular affections, in which it is also given externally in the form of decoction.

POTHOS PÆTIDA, *Dracontium fœtidum*—p. Putorii, *Dracontium fœtidum*.

POTIMOS, Potable.

POTIO, Drink, Haustus, Potion—p. Calcis carbonatis, *Mistura cretæ*—p. Effervescens antiemetica, *Potion of Riverius*—p. Leniens, *Looch ex ovo*—p. Oleosa, *Looch ex ovo*—p. Picea, see *Pinus sylvestris*.

POTION (F.), *Potio*; from *poto*, 'I drink,' *Hydrolé*, *Hydrolite*. A liquid medicine, from 4 to 8 ounces or more in quantity, the composition of which varies, and which is administered in divided doses. It corresponds to the English *mixture*. See *Mistura*.

POTION PECTORALE, *Looch ex ovo*.

POTION OF RIVERIUS. A mixture of *Lemon Juice* and *Subcarbonate of Potass*,—generally given in a state of effervescence. It is the *Potio efferves'cens anti-emetica dicta Rive'rii*, of the Parisian codex. The name in the codex indicates its use.

POTIONIS DESIDERIUM, Thirst.

POTIRON, *Cucurbita pepo*.

POTIUNCULA, Haustus.

POTOPARANŒA, *Delirium tremens*.

POTOS, Potable.

POTOTROMOPARANŒA, *Delirium tremens*.

POTTINGAR, Apothecary.

POTT'S CURVATURE, *Vertebral disease*.

POTT'S DISEASE, *Vertebral disease*.

POTUS, Drink—p. Hippocraticus, *Claret*.

POU, *Pediculus*.

POUCE, *Pollex*, see *Digitus*.

POUCHED, *Encysted*.

POUCHES, LARYNGEAL, see *Laryngeal pouches*.

POUDRE, Powder, Pulvis—p. *Absorbante et anti-acide*, Pulvis de magnesiâ compositus—p. *Alun composée*, Pulvis sulphatis aluminæ compositus—p. *Antiarthritique amère*, Pulvis de amariss compositus—p. *Antiasthmatique*, Pulvis de sulphure et scillâ—p. *Antimonial composée* ou de *James*, *Antimonial powder*—p. *Aromatique*, Pulvis cinnamomi compositus—p. *Asarum composée dite sternutatoire*, Pulvis asari compositus—p. *Balsamique*, Pulvis myrrhæ compositus—p. de *Breckmann*, Pulvis de aro compositus—p. de *Blanchement*, Calcis chloridum—p. de *Cannelle composée* ou *aromatique*, Pulvis cinnamomi compositus—p. *Costillon*, see *Powders*, *Castillon*—p. *Cathartique*, Pulvis scammonæ compositus—p. *Caustique du frère Cosme*, Powder, arsenical, of *Côme*—p. de *Chypre*, see *Cladonia rangiferina*—p. du *Comte de Palme*, *Magnesiæ carbonas*—p. *Cornachine*, Pulvis cornachini—p. de *Corne brûlée avec opium*, Pulvis cornu uesti cum opio—p. *Coton*, see *Collodion*—p. de *Craie composée*, Pulvis cretæ compositus—p. de *Craie composée avec opium*, see Pulvis cretæ compositus cum opio—p. de *Dover*, Pulvis ipecacuanhæ compositus—p. du *Duc de Portland*, Pulvis Ducis Portlandiæ—p. de *Dupuytren*, Powder of Dupuytren—p. *Gazifère laevate*, Powders, Seidlitz—p. *Gazifère simple*, Powders, soda—p. de *Gomme adragant composée*, Pulvis tragacanthæ compositus—p. de *Gomme gutte*, Pulvis e gummi guttâ—p. *Hydragogue*, Pulvis e gummi guttâ—p. *Incisive*, Pulvis

de sulphure et scillâ—p. *d'Ipecacuanhu et opium*, Pulvis ipecacuanhæ compositus—p. de *Jalap composée*, Pulvis jalapæ compositus—p. de *Kino composée*, Pulvis kino compositus—p. de *la Mirandole*, Pulvis Ducis Portlandiæ—p. de *Pérard*, Pulvis de sennâ, scammonæ et lignis—p. de *Querquetanus*, Pulvis e gummi guttâ—p. de *Rousselot*, Powder, arsenical, of *Côme*—p. de *Saint Ange*, Pulvis asari compositus—p. de *Savon végétale*, Pulvis gummosus alkalinus—p. de *Scammonée composée*, Pulvis scammonæ compositus—p. de *Seidlitz*, Powder, Seidlitz—p. de *Séné composée*, Pulvis sennæ comp.—p. de *Sentinelli*, *Magnesiæ carbonas*—p. *Styptique*, Pulvis sulphatis aluminæ compositus.

POUDRE SUBTIL DE DELCROIX. A fashionable depilatory "for removing superfluous hair in less than ten minutes." It is said to consist of *Quicklime* and *Sulphuret of Arsenic*, with some vegetable powder.—Paris.

POUDRE TEMPÉRANTE DE STAHL, Pulvis de sulphate potassæ compositus—p. de *Fennant*, Calcis chloridum—p. de *Valentini*, *Magnesiæ carbonas*—p. *Vermifuge mercurielle*, Pulvis e sulphureto hydrargyro nigro et scammonio—p. *Vermifuge sans mercure*, Pulvis ex helminthocorto compositus.

POUDRE DE ZWINGER, *Magnesiæ carbonas*.

POUGUES, MINERAL WATERS OF. These alkaline waters are in the department of Nièvre, France. They contain carbonic acid, carbonates of soda, lime, and magnesia; chloride of sodium; alumina, and silica, with protoxide of iron.

POUKE, *Papula*.

POULAIN, *Bubo*.

POULET, VIN DE (F.) *Pullet Wine*. A disgusting preparation, made by infusing the excrement of the pullet in white wine. According to Nysten, it is employed by the vulgar in France in a number of diseases, and especially in falls, contusions, &c.

POULIOT, *Mentha pulegium*.

POULS, Pulse—p. *Abdominal*, Pulsus inferior—p. *des Adultes*, Pulse, natural—p. *Agité*, Pulsus fortis—p. *Bas*, Pulse, low—p. *Capital*, Pulse, nasal—p. *Combiné*, Pulse, complex—p. *Compliqué*, Pulse, complex—p. *Composé*, Pulse, complex—p. *Contracté*, Pulse, contracted—p. *Défaillant*, Pulsus deficiens—p. *Déprimé*, Pulse, depressed—p. *Développé*, Pulse, developed—p. de *la Diarrhée*, Pulse, intestinal—p. *Dur*, Pulse, hard—p. *Élevé*, Pulse, ardent—p. *Embarrassé*, Pulsus intricatus—p. de *l'Estomac*, Pulse, stomachal—p. *Étroit*, Pulsus strictus—p. de *l'Expectoration*, Pulse, pectoral—p. *Faible*, Pulse, feeble—p. du *Foie*, Pulse, hepatic—p. *Grand*, Pulse, large—p. *Invisible*, Pulsus deficiens—p. *Intercedent*, Pulse, intermittent—p. des *Intestins*, Pulse, intestinal—p. *Languissant*, Pulse, languid—p. *Lent*, Pulse, slow—p. de *la Matrice*, Pulsus uterinus—p. *Modéré*, Pulse, natural—p. *Mou*, Pulse, soft—p. de *Nez*, Pulse, nasal—p. *Ondoyant*, Pulse, undulating—p. *Ondulant*, Pulse, undulating—p. *Palpitant*, Pulse, tremulous—p. *Parfait*, Pulse, natural—p. *Petit*, Pulse, small—p. *Plein*, Pulse, full—p. *Précipité*, Pulse, frequent—p. *Profond*, Pulse, deep—p. *Prompt*, Pulse, sharp—p. *Rare*, Pulse, slow—p. *Rebondissant*, Pulsus dicrotus—p. *Redoublé*, Pulsus dicrotus—p. des *Règles*, Pulsus uterinus—p. *Roide*, Pulse, tense—p. *Serratile*, Pulsus serrinus—p. *Serré*, Pulse, contracted—p. de *la Sueur*, Pulsus sudoralis—p. *Tardif*, Pulse, slow—p. *Tendu*, Pulse, tense—p. *Tremblant*, Pulse, tremulous—p. de *l'Urine*, Pulsus urinialis—p. *Véhément*, Pulsus fortis—p. *Ventral*, Pulsus inferior—p. *Vide*, Pulsus vacuus—p. *Vif*, Pulse, sharp—p. *Vite*, Pulse, sharp.

POULTICE, Cataplasm. For different poultices, see Cataplasm and Cataplasma.

POUNCE, Sandarac.

POUND, *Libra, Litra, λίτρα, Pondo, Ba-gé'dia* (of twelve oz.), *Bardá'dia*, (F.) *Livre*, from *pondere*, 'to weigh.' A weight, consisting of twelve ounces Troy,—sixteen ounces avoirdupois. See Weights and Measures.

POURD-MILK, Colostrum.

POURPIER CULTIVÉ, Portulaca.

POURPRE, Purpura—p. *Blanc*, Miliary fever—p. *de Cassius*, Purple of Cassius.

POURRITURE, Putrefaction—p. *d'Hôpital*, Hospital gangrene.

POUS, Pes.

POUSSE, Pursiness.

POUSSÉE, Lichen.

POUSSIERE TUBERCULEUSE (F.), 'Tuberculous Dust.' A name given by MM. Riiliet and Barthez to fine white or yellow minute points of tuberculous matter occurring in myriads, so as to be likened to dust.

POUSSIF, see Pursiness.

POW, Head.

POWDER, Pulvis.

POWDER OF ÆTHIOPIA, GUY'S. A once celebrated anthelmintic, which consisted of pure *rasped tin*, *mercury*, and *sulphur*, triturated together.

POWDER OF ALOES, COMPOUND, Pulvis aloes compositus, Pulvis sulphatis aluminæ compositus—p. of Aloes with canella, Pulvis aloes cum canellâ—p. Alum, compound, Pulvis sulphatis aluminæ compositus—p. Antimonial, Chenevix's, Antimonial powder—p. Aromatic, Pulvis cinnamomi compositus.

POWDER, ARSENICAL, OF CÔME, *Côme's powder*, (F.) *Poudre caustique du frère Cosme ou de Rous-selot*—a caustic—is formed of *arsenious acid*, gr. x; *red sulphuret of mercury*, gr. xl; powdered *animal charcoal*, gr. x. It is made into a paste with mucilage.

POWDER, ARSENICAL, OF JUSTAMOND, is made by melting *sulphuret of antimony* 16 parts; *arsenious acid* 1 part, in a crucible. When the mass is cold it must be reduced to powder, and five parts of *extract of opium* be added.

POWDER OF ARUM, compound, Pulvis de arô compositus—p. of Asarabacca, compound, Pulvis asari compositus—p. of Bladder-wrack, yellow, Pulvis querefûs marinæ—p. Bleaching, Calcis chloridum—p. Camboge, Pulvis e gummi guttâ—p. Cardinal del Lugo's, Cinchona—p. Castillon, see Powders, Castillon—p. of Catechu, compound, Pulvis Catechu compositus—p. of Chalk, compound, Pulvis cretæ compositus—p. of Chalk with opium, compound, Pulvis cretæ compositus cum opio—p. of Cinnamon, compound, Pulvis cinnamomi compositus—p. Côme's, Powder arsenical of Côme—p. of Contrayerva, compound, Pulvis contrayervæ compositus—p. Countess's, Cinchona—p. Countess of Kent's, Cantianus pulvis—p. Cyprus, Hibiscus abelmoschus—p. Dover's, Pulvis ipecacuanhæ compositus.

POWDER OF DUPUYTREN (CAUSTIC;) (F.) *Poudre de Dupuytren*, formed of 1 part of arsenious acid and 200 parts of mild chloride of mercury. A mild and manageable caustic for causing an eschar on exposed surfaces, and in lupus, &c.

POWDER, EARL OF WARWICK'S, Pulvis cornachini—p. of Ethiopia, Powder of Ethiopia.

POWDER OF FAYNARD. A celebrated powder for arresting hemorrhage, said to be nothing more than the charcoal of beech wood finely pulverized.

POWDER, FEVER, SCHWANBERG'S, Antimonial powder.

POWDER-FOLDER, In Pharmacy, an apparatus by which papers containing powders are folded of the desired length.

POWDER, GINGER-BEER, see Amomum zingiber—p. Gout, Duke of Portland's, Pulvis Ducis Portlandiæ—p. Gray, Hydrargyrum cum cretâ—p. of burnt Hartshorn with opium, Pulvis cornu cervi cum opio—p. of Ipecacuanha, compound, Pulvis ipecacuanhæ compositus—p. of Jalap, compound, Pulvis jalapæ compositus—p. James's factitious, Antimonial powder—p. Jesuit's, Cinchona—p. of Kino, compound, Pulvis kino compositus.

POWDER, KNOX'S. A disinfecting preparation, composed of eight parts of *chloride of sodium*, and three parts of *chlorinated lime*. An ounce, dissolved in a tumblerful of water, forms a solution of proper strength.

POWDER OF LEMONADE, see Lemonade—p. of Magnesia, compound, Pulvis de magnesiâ compositus—p. of the Marquis, Marchionis pulvis—p. Mead's, against the bite of a Mad dog, Pulvis antilyssus—p. Myrrh, compound, Pulvis myrrhæ compositus—p. Portland, Pulvis Ducis Portlandiæ—p. of Rhubarb, compound, Pulvis rhei compositus—p. Saline, compound, Pulvis salinus compositus—p. of the three Sanders, see Diatrium—p. Scammony and aloes, Pulvis scammonii cum aloë—p. Scammony, compound, Pulvis scammonie compositus—p. of Senna, compound, Pulvis sennæ compositus—p. Sneezing, see Veratrum album—p. Spruce beer, see Spruce beer—p. of Sympathy, Sympathetic powder—p. Talbor's, Cinchona—p. Tennant's, Calcis chloridum—p. Tonquin, Pulvis cobbii—p. Tooth, Dentifrice—p. Tragacanth, compound, Pulvis tragacanthæ compositus.

POWDER, VIEN'NA, is composed of equal parts of quicklime and potassa cum calce. In using it, it is made into a paste—*Vienna paste*, (F.) *Caustique de Vienne, Pâte Caustique de Vienne*—with spirits of wine, and is applied on the diseased part, previously circumscribed by a hole cut in a sticking plaster.

To be left on from 10 to 20 minutes, according to the depth of the eschar required. Used in cases of lupous ulceration.

By fusing the potass and lime, and raising the heat so as to cause ebullition, the caustic may be run into cylinders:—when it is called *Caustique-Filhos, Causticum Viennensæ fusum Filhos*, from the name of the author of the process.

POWDERS, CASTILLOX, or CASTILLOX, so called from the name of the physician who first proposed them. They are formed of *sago*, in powder; *salep*, in powder; *tragacanth*, in powder, each, four parts; *prepared oyster-shells*, one part, *cochineal*, half a part, divided into powders of one drachm each; one of which is given three or four times a day as a demulcent in diarrhœa and dysentery. Dorvault makes *poudre de Castillon* synonymous with arrow root.

POWDERS, SODA, *Pulveres effervescentes*, (F.) *Poudres gazifères simples*. (*Sodæ carb.* ʒss, in each *blue paper*; *tartaric acid*, gr. xxv, in each *white paper*; for half a pint of water.) A pleasant, cooling drink; taken during the effervescence.

Seidlitz Powders, (F.) *Poudres gazifères laxatives* ou *Poudres de Seidlitz*, contain one or two drachms of tartrate of potassa and soda, added to the alkali in blue paper.

POWER, Faculty—p. Inherent, Irritability—p. Sensorial, see Sensorial—p. Tonic, Irritability.

POX, Syphilis, Variola—p. Chicken, Variella.

POX DOCTOR, Syphilidiater.

POX, FRENCH, Syphilis—p. Grease, see Grease—p. Horn, see Variella—p. Noddy, Syphilomania—p. Small, Variola—p. Swine, see Variella—p. Water, see Variella.

POZZUOLI, MINERAL WATERS OF. Pozzuoli is in the neighbourhood of Naples. The springs are, 1. *Aqua della pietra*, Temp. 91° Fah. 2. *Aqua di Cavalanti*, Temp. 100°. *A. di subreni homini*, Temp. 102°; *A. del cantarello*, Temp. 86 to 89°; and that of the Temple of Serapis in Pozzuoli, Temp. 102 to 107°. The last contains carbonic acid, carbonates of lime, magnesia, alumina, and iron, carbonate of soda, chloride of sodium, sulphate of lime, and silica.

PRACTICE OF PHYSIC, Therapeutics.

PRACTITIONER, GENERAL, Surgeon apothecary—p. Irregular, see Irregular—p. Regular, see Regular—p. Routine, Routinist.

PRÆ. In composition, means 'before.'

PRÆBIUM, Dose.

PRÆCAUTIO, Prophylaxis.

PRÆCIPITANS, Absorbent—p. Magnum, Sepia.

PRÆCIPITATUM ALBUM, Hydrargyrum præcipitatum.

PRÆCIPITATUS RUBER, Hydrargyri nitrico-oxylum.

PRÆCISIO PRÆPUTII, Circumcision.

PRÆCOCIA, Prunus Armeniaca.

PRÆCOCITY, Precocity.

PRÆCOGNITIO, Prognosis.

PRÆCORDIA, from *præ*, and *cor*, *cordis*, 'the heart.' The diaphragm; also, the thoracic viscera, and the epigastrium.

PRÆCORDIAL or PRÆCORDIAL REGION, *Re'gio præcordiaca* seu *præcordia'lis*, is the epigastric region. Also, and more properly, the region of the heart. A line drawn from the inferior margins of the third ribs across the sternum, passes over the valves of the pulmonary artery a little to the left of the mesial line, and those of the aorta are behind them, but about half an inch lower down. A vertical line, coinciding with the left margin of the sternum, has about one-third of the heart, comprising the upper portion of the right ventricle, on the right, — and two-thirds, comprising the lower portion of the right ventricle and the whole of the left, on the left. This is the præcordial region.

PRÆCORDIUM, *Fossette du cœur*—p. Pedis, Metatarsus.

PRÆCOX MATURITAS, Precocity.

PRÆCUSTODIA, Prophylaxis.

PRÆDIASTOLICUS, Prædiastolic.

PRÆDICTIO, Prognosis.

PRÆDISPOSITIO, Predisposition.

PRÆDIVINATIO, Mantia.

PRÆDOMINIUM, from *præ*, and *domo*, *domitum*, 'I subdue.' Predominance of one thing over another.

PRÆDOMINIUM AQUÆ. A predominance of watery fluid, — *Tenu'itas aquosa*.

PRÆDOMINIUM SAN'GUINIS ARTERIO'SI. A predominance of arterial blood, *Arterios'itas sanguinis*.

PRÆDOMINIUM SAN'GUINIS VENO'SI, *Venos'itas sanguinis*. Predominance of venous blood.

PRÆFOCATIO, Orthopnoea, Suffocation—p. Faucium, Angone—p. Matricis, Angone—p. Uterina, Angone.

PRÆFOCATION, Strangulatio uterina.

PRÆFORMATIO, Preformation.

PRÆGNANS, Pregnant.

PRÆGNAS, Pregnant.

PRÆGNATIO, Fecundation, Pregnancy.

PRÆGNATUS, Fecundation, Pregnancy.

PRÆGNAX, Pregnant.

PRÆGUSTATIO, *Avant-gout*.

PRÆHENSIO, Prehensio.

PRÆLING'UA. The anterior part or tip of the tongue.

PRÆLIUM, Coition, Press, Tourniquet—p. Arteriale, Tourniquet.

PRÆLUMBARIS, Prelumbar.

PRÆNOTIO, Prognosis.

PRÆNUNTIATIO, Prognosis.

PRÆPARATIO, Preparation—p. Chyli, Chy- lification.

PRÆPARATUM, Preparation.

PRÆPOTEN'TIA, from *præ*, and *potens*, 'powerful,' Great power or strength.

PRÆPOTEN'TIA VIRI'LIS. Great, or too great procreative power on the part of the male.

PRÆPOTIO, Propotismus.

PRÆPUTIALIS, Preputial.

PRÆPUTIUM, Prepuce.

PRÆSAGIUM, Mantia.

PRÆSENTIA, Prognosis.

PRÆSCITIO, Prognosis.

PRÆSCRIPTIO, Prescription.

PRÆSCRIPTUM, Prescription.

PRÆSEPIOLUM, Alveolus.

PRÆSEPIUM, Alveolus.

PRÆSERVATIO, Prophylaxis.

PRÆSERVATIVUM, Amuletum.

PRÆSERVATORIA IN'DICATIO. A preservative indication; one proper for preventing the development of disease.

PRÆSERVATORIUS, Prophylactic.

PRÆSPINALIS, Prespinal.

PRÆTIBIALIS, Pretibial.

PRAIRIE BUSH, STINKING, *Ptelea trifoliata*—p. Pines, *Liatrix*.

PRASINUM VIRIDE, Cupri subacetatas.

PRASINUS, Porraceous.

PRASI'TES, from *prasium*, 'horehound.' Wine in which the leaves of horehound have been infused.

PRASIMUM, Marrubium.

PRASUM, Allium prasum.

PRAXIS, Action.

PRAXIS MED'ICA. The practical exercise of the healing art.

PREASER, Rennet.

PRECIPITATE, RED, Hydrargyri nitrico-oxylum—p. White, Hydrargyrum præcipitatum.

PRECIPITA'TION, *Præcipita'tio*, (F.) *Præcipité*, from *præcipitare*, *præcipitatum*, (*præ*, and *capit*, 'the head,') 'to throw headlong.' The action by which a body abandons a liquid in which it is dissolved, and becomes deposited at the bottom of the vessel. The matter, so thrown down or precipitated, is called a *precipitate*.

PRÆCIPITATION DE LA MATRICE, Procidencia uteri.

PRÆCIPITE BLANC, Hydrargyrum præcipitatum—p. Noir, see Hydrargyri oxylum cinereum—p. *Oxylum per se*, Hydrargyri nitrico-oxylum—p. *Rouge*, Hydrargyri nitrico-oxylum.

PRÆCOC'ITY, *Præcoc'iousness*, (F.) *Præcocité*, *Præcox maturitas*, *Matur'ity præcoc'ious*, from *præ*, 'before,' and *coquere*, 'to cook.' Rapid development before the usual time. See *Præotia*.

PRÆCORDIAL, Præcordial.

PRÆCUR'SORY, *Præcurso'rius*, (F.) *Præcurseur*, from *præ*, and *curro*, *cursum*, 'I run.' That which precedes.

PRÆCUR'SORY or PRÆMON'ITORY SIGNS or SYMPTOMS, (F.) *Signes præcurseurs* ou *præmonitoires*, *S. avant coureurs*, are those which indicate an approaching disease.

PREDIAS'TOLIC, *Prædiastolicus*, from *præ*, and *diastole*. That which precedes the diastole of the heart,—as '*prædiastolic friction sound*.'

PREDIS'PONENT or PREDISPOSING CAUSES, see Causes, predisponent.

PREDISPOSIT'ION, *Prædisposit'io*, *Semin'ia morbo'rum* (Gaubius); from *præ*, and *disponere*, *dispositum*, 'to dispose.' (F.) *Imminence morbide*. That constitution or condition of the body, which disposes it to the action of disease

under the application of an exciting cause. Thus, in hereditary diseases, the conformation is such, that but a slight exciting cause may be required to produce them. When the disease arises solely from the predisposition, or under the additional influence of an extremely slight exciting cause, it is, by some, termed a *disposition*.

PREDORSAL, *Prædorsalis*, from *præ*, and *dorsum*, 'the back.' That which is in front of the back.

PREDORSAL REGION of the vertebral column is the anterior surface of the dorsal region.

PRÉ-DORSO-ATLOÏDIEN, *Longus colli*.

PRÉ-DORSO-CERVICAL, *Longus colli*.

PRE-EXISTENCE OF GERMS, see *Preformation*.

PREFORMATION, *Præformatio*, from *præ*, 'before,' and *formatio*, 'forming.' An ancient theory of generation, which maintained that the germ of every part exists, but not visibly, before fecundation, and that fecundation occasions their development. It was the doctrine of *pre-existence of germs*.

PREGNANCY, *Pregnatio*, *Pregnatus*, *Impregnatio*, *Ingravidatio*, from *præ*, and *genero*, 'to beget'; *Hystero-cyësis*, *Graviditas*, *G. uterina*, *En'cymon*, *Cyësis*, *Eucyësis*, *En'cysis*, *Eucymo'sia*, *Cyopho'ria*, *Gestatio*, *Fœtatio*, *Ingravidatio*, *Utero-gestatio*; (F.) *Grossesse*. The state of a female who has within her a fecundated germ, which gradually becomes developed in or out of the uterus. When placed in the cavity of the uterus,—by virtue of the vital principle which animates it, it becomes attached to the inner surface of that viscus, and obtains from it indirectly the nutriment necessary for its gradual development, during the space of ten lunar months or two hundred and eighty days—the ordinary *term* or *duration of gestation*, although the period may be protracted to 300 days or upwards,—at the expiration of which parturition occurs. Pregnancy is commonly limited to a single fœtus: at times, the uterus contains two or three.—See *Reproduction*. Occasionally, one or two moles—the degenerated products of conception—alone occupy the uterus:—at other times, a fœtus likewise exists. In certain cases, and owing to accidental circumstances, the fecundated ovum remains in the ovarium, or is arrested in the Fallopian tube. Pregnancy has, accordingly, been distinguished into, 1. *Natural* or *uterine*, when the fœtus is carried in the cavity of the womb: and, 2. *Preternatural* or *extra-uterine*, *Exfœtatio*, *Conceptio vitio'sa*, *Paracyësis* seu *Ecyësis*, *Echystero-cyësis*, *Echystero-cyësis*, *Dysto'cia*, *Dyçyësis* seu *Graviditas extra-uteri'na*, (F.) *Grossesse contre-nature*,—when it occurs in the ovarium, tube, or cavity of the abdomen.

During pregnancy, the female experiences remarkable changes in the condition of her organs and functions. The genital apparatus is, of course, most affected. The uterus changes its shape, situation, size, and texture. The usual signs of pregnancy are,—suppression of the catamenia; the abdomen gradually enlarging and forming a hard tumour; the umbilicus prominent in the latter months; the breasts increasing in size; the areola round the nipple becoming darker and the follicles more developed; kyestein in the urine from an early period; a bluish tint of the vagina after the fourth week; about the fifth month, the evidence by *ballotement*, the placental *souffle*, and the sound of the fœtal heart heard on auscultation; the motion of the fœtus perceptible, and the neck of the uterus diminishing in length at the advanced periods.

PREGNANCY, ABDOMINAL, *Eccyësis abdominalis*, *Celiocyësis*, *Graviditas abdominalis*, (F.)

Grossesse abdominale. That in which the ovum has escaped into the cavity of the abdomen.

PREGNANCY, AFETAL, *Pregnancy without a fœtus*, (F.) *Grossesse afœtale* ou *sans fœtus*. Pregnancy produced by a false or degenerate conception, or any other affection, which has given place to unusual development of the uterus. Madame Boivin includes in this class, *sarco-hysterie*, *hydro-hysterie*, *gazo-hysterie*, and *hemato hysterie pregnancies*.

PREGNANCY, BIGEMINAL, (F.) *Grossesse bigeminale*, *Double pregnancy*. Pregnancy in which there are twins in utero.—Madame Boivin.

PREGNANCY, COMPLEX, (F.) *Grossesse complexe*, *G. inter-extra utérine*, is when the womb, besides a fœtus, contains much water, hydatids, a mole, &c.

PREGNANCY, COMPOUND, *Polybreph'ia*, *Poly-cyë'sia*, *Polycyë'sis*, (F.) *Grossesse composée*, is when there are two or three fœtuses in the cavity of the uterus.

PREGNANCY, DOUBLE, *Pregnancy, bigeminal*—p. Duration of, see *Pregnancy*—p. *Extra-uterine*, see *Pregnancy*.

PREGNANCY, FALSE, *Graviditas spuria*, (F.) *Grossesse fausse* ou *apparente*, *Pseudo-cyë'sis*. Authors have thus called different affections of a more or less serious character, which resemble pregnancy; so as, at times, to impose upon the best-informed practitioners. These diseases may be seated in the uterus or its dependencies, in the intestines or some other part of the abdomen. They may be;—a mole, hydatids, water, blood, or polypus distending the parietes of the uterus;—chronic enlargement of the uterus; development of tumours, &c., in its substance;—scirrhus; dropsy of the ovaria; ascites; tympanites, &c.

PREGNANCY, FŒTAL, (F.) *Grossesse fœtale*. Pregnancy in which there is a fœtus, or more than one, in the uterus or out of it. Madame Boivin puts in this class—the *solitary*, *bigeminal*, *trigeminal*, and *sarco-fœtal* pregnancies, which form the first order; and the *tubal*, *ovarial*, and *abdominal*, which constitute the second.

PREGNANCY, GAZO-HYSTERIC, (F.) *Grossesse Gazo-hystérique*. Afœtal pregnancy, caused by development of air or gas in the cavity of the womb.—Madame Boivin.

PREGNANCY, HEMATO-HYSTERIC, (F.) *Grossesse hémato-hystérique*. Afœtal pregnancy, caused by accumulation of blood in the uterus.—Madame Boivin.

PREGNANCY, HYDRO-HYSTERIC, (F.) *Grossesse hydro-hystérique*. Afœtal pregnancy, occasioned by the secretion and accumulation of serous fluid in the uterus.

PREGNANCY, INTERSTITIAL, *Graviditas in uteri substantiâ* seu *interstitiâ*. The development of the embryo in the proper substance of the uterus. The case generally terminates fatally at an early period of gestation; the thin external paries of the uterus being ruptured, and the ovum passing into the abdominal cavity.

PREGNANCY, MORBID, *Paracyë'sis*, *Dysto'cia*, *Dyçyë'sis*. The progress of pregnancy disturbed or endangered by the supervention of general or local disorder.—Good.

PREGNANCY, OVA'RIAN, (F.) *Grossesse ovarienne* ou *de l'ovaire*, *Eccyë'sis ovari'na*, *Oâriocyë'sis*, *Oöcyë'sis*, *Graviditas uteri seu extra-uteri'na in ovari'o*. Pregnancy in which the fœtus is developed in the interior of the ovary.

PREGNANCY, PLEA OF. A plea, which a woman, capitally convicted, may set up in arrest of execution until she is delivered. See *Jury of Matrons*, and *De ventre inspiendo*.

PREGNANCY, PRETEND'ED. The criminal act of a female, who, not having been delivered, presents an infant as having been born of her. (F.)

Supposition de part. (This term, in French, likewise includes the case of a female, who, having been delivered of a dead child, substitutes for it a living child which is not hers.)

PREGNANCY, SARCO-FŒTAL, (F.) *Grossesse sarco-fœtale.* Pregnancy in which there are one or more fœtuses, and one or more moles.—Madame Boivin.

PREGNANCY, SARCO-HYSTERIC, (F.) *Grossesse sarco-hystérique.* A fœtal pregnancy formed by moles, hydatids, or a false conception.—Madame Boivin.

PREGNANCY, SOLITARY, (F.) *Grossesse solitaire ou simple.* Pregnancy in which there is a single fœtus.—Madame Boivin.

PREGNANCY, TRIGEMINAL, (F.) *Grossesse trigéminal ou triple.* Pregnancy in which there are three fœtuses in the cavity of the uterus.—Madame Boivin.

PREGNANCY, TUBAL, (F.) *Grossesse tubaire, Ecty'sis tubalis, Graviditas tubaria.* Pregnancy where the fœtus remains and is developed in the Fallopian tube.

PREGNANCY, UTERINE, see Pregnancy.

PREGNANCY, UTERO-ABDOMINAL, (F.) *Grossesse utéro-abdominale.* Pregnancy consisting of two fœtuses; one in the uterus—the other in the abdominal cavity.—Madame Boivin.

PREGNANCY, UTERO-OVARIAL, (F.) *Grossesse utéro-ovarienne.* Pregnancy with two fœtuses, one in the womb, the other in the ovary.

PREGNANCY, UTERO-TUBAL, (F.) *Grossesse utéro-tubaire.* Pregnancy in which there is at the same time a fœtus in the womb and another in the Fallopian tube.

PREGNANT, Prægnans, Prægnas, Prægnax, Fetus, Fœtus, Encar'pos, Grav'ida, Pleno mul'ier, Incine'ta, Gravid, Breeding, (Old Eng.) Bealing. Same etymon. (F.) *Enceinte.* One in a state of pregnancy:—one with child.

PREHENSIO, Catalepsy, Epilepsy.

PREHENSION, Prehensio. from *prehendere, prehensum*, 'to lay hold of.' The act of laying hold of.

PREHENSION OF FOOD is the act of seizing and carrying it to the mouth, and introducing it into that cavity. It is, also, called *Assumptio, Prolepsis, Pro'sphora.*

PRÉLE, Hippuris vulgaris.

PRÉLOMBAIRE, Prelumbar.

PRÉLOMBO-PUBIEN, Psoas parvus—*p. Trochantin, Psoas magnus.*

PRELUM, Press—*p. Arteriale, Tourniquet.*

PRELUMBAR, Prælumbaris, (F.) Prélombaire, from præ, and lumbi, 'the loins.' That which is placed before the loins. The prelumbar surface of the spinal column is the anterior surface of the lumbar portion.

PREMIÈRES VOIES, Primæ viæ.

PREMOLAR, see Molar teeth.

PREMONTORY, see Precursory.

PRENANTHES, Gall of the Earth, Dewitt Snakeroot, Lion's Foot. There are many species of this indigenous plant, whose root and milky juice are very bitter. They are used in popular practice in dysentery; and in the form of cataplasm to bites of serpents.

PRENANTHES ALBA, Nabalus albus—*p. Serpentaria, Nabalus albus.*

PRENDRE INSCRIPTION, see Matriculate.

PRÉPARATE (VEINE), see Facial vein.

PRÉPARATION, Præparatio, from præ, and parare, paratum, 'to get ready.' The act of making ready any substance whatever that has to be employed for any purpose.

Also, the product of any pharmaceutical operation;—*Præparatum.*

Any part of the human body, preserved for the uses of the anatomist, is so called.

PREPUCE, Præputium, Epago'gium, Posthæ Pella, Posthium, Pu'tium, Foreskin. The prolongation of the integuments of the penis, which covers the glans. The prepuce is composed of two membranous layers: one external or cutaneous; the other internal or mucous, separated by areolar membrane. The mucous membrane lines the inner surface of the cutaneous layer till beyond the glans, when it is reflected over the latter; forming, behind the corona, a small *cul-de-sac* above the corpora cavernosa, which is interrupted by a triangular duplicature of the mucous membrane, called the *frænum*, fixed in the furrow at the inferior part of the glans, and terminating at a little distance from the orifice of the urethra. The clitoris is covered by a semilunar fold formed by a continuation of the skin of the labia. It is called *Præputium clitor'idis.*

PREPU'TIAL, Præputialis. Belonging or relating to the prepuce;—as the 'preputial secretion,—or that which takes place from the lining of the prepuce covering the glans.

PRESEBYODOCHIUM, Gerocomium.

PRESEBYON'OSI; from πρεσβυς, 'old,' and νοσος, 'disease.' Diseases of old age.

PRESEBYOPE, Presby'tes, (F.) Presbyte, from πρεσβυς, 'old,' and ὤψ, 'the eye.' One who is long-sighted or affected with presbyopia.

PRESEBYOPIA, Presbytia.

PRESEBYO'PIC, Presbyo'picus, Presby'tic, Presby'ticus. Relating or belonging to presbyopia or long-sightedness.

PRESEBYSYPHACELUS, Gangrene of old people.

PRESEBYTIA, Presbyo'pia, Amblyo'pia proximo'rum, Visus sen'ilis, Pres'byopy, (F.) Vue lanque; from πρεσβυτης, 'an old person.' A very high degree is termed *Hyperpresbytia*. A condition of vision, common in old persons, which consists in the circumstance of near objects being confusedly seen, whilst those at a greater distance are clearly distinguished. It is supposed to depend generally on diminution of the convexity of the cornea; whence results an alteration in the convergency of the rays, so that they form a focus behind the retina. This defect is remedied by the use of convex glasses, which augment the convergence of the luminous rays. It is, also, called *Long-sightedness, Far-sightedness, Paropy'sis longin'qua, Dyso'pia proximo'rum.*

PRESEBYTIC, Presbyopic.

PRESCRIPTION, Præscriptio, Anag'raphê, from præ, and scribere, scriptum, 'to write; Formula, F. medica, Schedula, Præscriptum, Præscriptio medica, Receptum, (F.) Formule, Ordinance. The formula which the physician writes for the composition of medicines adapted to any case of disease. A prescription should be as simple as possible, and should bear upon its face the evidence of the objects to be fulfilled by it. No article should form part of it, unless adapted for serving some useful purpose. A compound prescription has been divided into four parts:—the *basis* or principal ingredient of the prescription; the *ad'juvans*, or that which is designed to promote the action of the former; the *cor'rigens*, or that intended to correct its operation, or obviate any unpleasant symptom which it may be apt to produce; and the *constit'ens, excip'iens or vehiculum, Constituent, Excipient or ve'hicle*, the substance which gives to the other ingredients consistence or form. All these are seen in the following formula for cathartic pills:

Aloes.....	ʒj	Basis.
Hyd. Chlorid. Mit. gr. x.	Ad'juvans.
Olei Carui.....	gt. v.	Corrigens.
Syrupi.....	q. s.	Constituens.

M. et fiat pilulæ xx. See Symbol.

It is obvious, however, that most prescriptions are more simple than this. The basis, for example, may require neither adjuvant, corrigent, nor constituent.

Dr. Paris has given the following synopsis of the principles of medicinal combination, *Iamotaxiolog'ia*, *Iamotaxiolog'ia*, *Ars formulæ medicæ concinnand'i*, which may serve as an instructive guide to the prescriber:—

OBJECT I.

TO PROMOTE THE ACTION OF THE BASIS.

A. By combining the several different forms or preparations of the same substance. B. By combining the basis with substances which are of the same nature; i. e., which are individually capable of producing the same effects, with less energy than when in combination with each other. C. By combining the basis with substances of a different nature, and which do not exert any chemical influence upon it, but are found by experience, or inferred by analogy, to be capable of rendering the stomach or system more susceptible of its action.

OBJECT II.

TO CORRECT THE OPERATION OF THE BASIS BY OBVIATING ANY UNPLEASANT EFFECTS IT MIGHT BE LIKELY TO OCCASION, AND WHICH WOULD PERVERT ITS INTENDED ACTION, AND DEFEAT THE OBJECT OF ITS EXHIBITION.

A. By *chymically* neutralizing or *mechanically* separating the offending ingredient. B. By adding some substance calculated to guard the stomach or system against its deleterious effects.

OBJECT III.

TO OBTAIN THE JOINT OPERATION OF TWO OR MORE MEDICINES.

A. By uniting those medicines which are calculated to produce the same ultimate results, but by modes of operation totally different. B. By combining medicines which have entirely different powers; and which are required to obviate different symptoms, or to answer different indications.

OBJECT IV.

TO OBTAIN A NEW AND ACTIVE REMEDY, NOT AFFORDED BY ANY SINGLE SUBSTANCE.

A. By combining medicines which excite different actions in the stomach and system, in consequence of which new or modified results are produced. B. By combining substances which have the property of acting *chymically* upon each other; the results of which are:—a. The formation of new compounds; b. The decomposition of the original ingredients, and the development of the more active elements. C. By combining substances, between which no other change is induced than a diminution or increase in the *solubility* of the principles in which their medicinal virtues reside. a. By the intervention of substances that act *chymically*. b. By the addition of ingredients whose operation is entirely *mechanical*.

OBJECT V.

TO AFFORD AN ELIGIBLE FORM.

A. By which the *efficacy* of the remedy is enhanced. B. By which its *aspect* or *flavour* is rendered more agreeable, or its mode of administration more convenient. C. By which it is preserved from the spontaneous decomposition to which it is liable.

[The vocabulary in the author's "Medical Student," Philad., 1844, will aid the student not

only in translating, but in writing his prescriptions *more solita*.]

PRESENTATION, from (Lat.) *præsens*, (*præ*, 'before,' and *ens*, *feltis*, 'being.')

The part of a foetus which is *entis presenting*, on examination *per vaginam*. When the head presents, and especially the vertex, or the feet, knees, or breech, the presentation is said to be *natural*; when any other part, *preternatural*; and the labour is styled *perverse* or *preternatural*, *Parodynia* seu *Dysto'cia perver'sa*, *Cross-birth*, (F.) *Accouchement contre nature*. When any part besides the head, feet, knees, or breech presents, the operation of turning becomes necessary. See Parturition.

PRESERVATIVE, Prophylactic.

PRESIS, Swelling.

PRËSLE, Hippuris vulgaris.

PRESMA, Swelling.

PRESPI'NAL, *Præspinal'is*, from *præ*, and *spina*, 'the spine.' That which is situate before the spine. The prespinal surface of the vertebral column is the anterior surface.

PRESS, *Præ'lium*, *Præ'lium*, *Presso'rium*, *Pi-ëster*, *Piest'ri'on*, (F.) *Pressoir*, *Presse*, from *pre-mere*, *pressum*, 'to squeeze.' An instrument for subjecting matters to considerable pressure, for the purpose of separating the liquid from the solid portion.

PRESS OF HEROPHILUS, Torcular Herophili.

PRESSE-ARTÈRE, *Serre-nœud de Deschamps*, *Serre-Artère*. An instrument invented by Deschamps for the immediate compression of arteries. It is composed of a plate six or seven lines long, and three broad, and of a rod or stem two inches long, placed perpendicularly above the plate and riveted. At each extremity of the plate is a hole, through which each of the ends of the ligature, to be placed upon the artery, is passed. The ligature is then to be tightened by drawing the ends, and fixing them to the perpendicular rod. This *presse-artère* or *serre-artère*, surrounded with charpie, remains in the wound, until there is no longer danger of hemorrhage. The ligature is then cut, and the instrument withdrawn. It is an unnecessary instrument.

PRESSE-URÈTHRE, *Jugum Penis*. A kind of forceps of elastic iron, the branches of which, padded, may be approximated or separated by means of a screw. The penis is introduced between the branches, one of them being applied to the urethra, and the screw is tightened so as to exercise a degree of pressure sufficient to bring the parietes of the canal in contact. This instrument is sometimes used in incontinence of urine, to prevent the constant discharge of that fluid.

PRESSIO, Pressure.

PRESSION ABDOMINALE, Pressure, abdominal.

PRESSOIR, Press — *p. d'Hérophile*, Torcular Herophili.

PRESSORIUM, Press.

PRESSURE, *Pres'sio*, from *premere*, *pressum*, 'to press.' The action of pressing.

PRESSURE, ABDOM'INAL, (F.) *Pression abdominale*. A mode of examination by means of which the sensibility, size, suppleness, or hardness of any morbid abdominal viscus may be compared, in these respects, with its healthy condition. Bichat proposed, with the view of exploring the state of the thoracic organs, to exert a pressure from below upwards on the abdominal organs, so as to crowd them upon the diaphragm, and thus to diminish the dimensions of the cavity of the chest, noticing to what extent respiration was affected by this action. No great information can of course be derived from it.

PRESYS'TOLIC, *Præystol'icus*, from *præ*, 'before,' and *ystole*. That which precedes the

contraction of the heart—as “*presystolic friction sound*.”

PRETENDED DISEASES, Feigned diseases.

PRETIBIAL, *Prætibialis*, from *præ*, and *tibia*, ‘the tibia.’ That which is situate before the tibia; as the *ilio-pretibial* and *ischio-pretibial* muscles.

PREVENTIVE, Prophylactic.

PREVENTIVE, ROYAL, from *prævenire*, *præventum*, (*præ*, and *venire*), ‘to come before.’ An empirical preparation, used as a prophylactic against the venereal virus. It is a solution of acetate of lead,—the *Liquor Plumbi Subacetatis dilutus*.

PREVERTEBRAL APONEUROSIS. The aponeurosis which covers the muscles of the prevertebral region.

PREVERTEBRAL ARTERY, (F.) *Artère prévertébrale ou méningienne postérieure*. A ramus of the meningeal branch, and sometimes even of the trunk, of the pharyngeal artery, which is distributed to the prevertebral region.

PREVERTEBRAL MUSCLES, see Cervical region, anterior—p. Region, Cervical region, anterior.

PRIAPEIA, *Nicotiana rustica*.

PRIAPIS’COS. Same etymon as the next. Name of a piece of wood which forms part of the *scamnum Hippocraticum*. Paulus of Ægina calls thus a tent of linen shaped like a penis.

PRIAPIS’MUS, *Tenti’go*, *T. Penis*, *Priapism*, *Horn-colic* (vulg.), *Enta’sia Priapis’mus*, *Rhopalis’mus*, *Satyri’asis*, *Styma*, *Styxis*, from *Πριαπος*, ‘Priapus.’ Constant and distressing erection, without any voluptuous idea or desire for venery. It is often symptomatic; and sometimes the immediate result of morbid causes,—of the action of cantharides, for example. The application of cold liquids to the penis, and the internal use of opium and camphor, are the means usually had recourse to for its removal.

PRIAPITIS, Phallitis.

PRIA’PUS, *Mutun’nus*. In ancient mythology the deity who presided over gardens and the arts of generation, so called *propter deformitatem et membri virilis magnitudinem*.

PRIAPUS, Penis—p. Cervi, see Cervus—p. Ceti, Leviathan penis.

PRICKET, *Sedum acre*.

PRICKEN, Sax. *priccan*, (D.) *pricken*, (F.) *Picement*. A variety of pain, compared to that which pointed bodies would occasion.

PRIDE OF CHINA, *Melia azedarach*—p. of India, *Melia azedarach*—p. Tree, *Melia azedarach*.

PRIDEWEED, *Erigeron Canadense*.

PRIEST-PHYSICIANS, see *Asclepiadæ*.

PRIEST’S PINTLE, *Arum maculatum*.

PRIM, *Ligustrum vulgare*.

PRIMA CELLA COLI, *Cæcum*.

PRIMÆ VIÆ, (F.) *Premières voies*. ‘The first passages.’ The stomach and intestinal canal:—the lacteals being the *secundæ viæ* or ‘second passages.’ See Ways, digestive.

PRIMARY CELL, see Cell.

PRIMEVÈRE, *Primula veris*.

PRIMIP’ARA, *Primiparturiens*, (F.) *Primipare*, from *primus*, ‘first,’ and *parere*, ‘to bring forth.’ A name given to a female who brings forth for the first time.

PRIMIPARTURIENS, *Primipara*.

PRIMI-STERNAL, *Primi-sternalis*, from *primus*, ‘the first,’ and *sternum*, ‘the sternum.’ M. Béchard has called os *primi-sternal* *ou clavi-sternal*, the bony portion of the sternum.

PRIMIT’IÆ, from *primus*, ‘first.’ The first waters, or the waters discharged before the extrusion of the fœtus.

PRIMITIVE BAND, see Nerve fibres—p. Streak, Groove, primitive.

PRIMORDIAL CELL, see Cell.

PRIMORDIUM, *Arche*.

PRIMROSE EVENING, *Ænothera biennis*—p. Tree, *Ænothera biennis*.

PRIMULA OFFICINALIS, *P. veris*—p. Variablis, *P. veris*.

PRIM’ULA VERIS, *P. officinalis* seu *variabilis*, from *prim’ulus*, ‘first.’ So called, because it flowers in the beginning of the spring. *Verbas’culum*, *Paral’ysis*, *Herba paralys’eos* seu *paralytica*, the *Cowslip*, *Paigil* or *Peugle*, *Herb Peter*, *Palsywort*, (Prov.) *Cow-striplings*, *Cow-stropple*, *Crevel*, (F.) *Primevère*, *Herbe à la paralysie*, *Fleur de concou*, *Oreille d’ours*, *Brairette*; *Ord. Primulacæ*. *Sex. Syst. Pentandria Monogynia*. The flowers have been considered to be mildly tonic, antispasmodic, and anodyne.

PRIMULA VULGARIS. The leaves and roots of this plant have been used as sternutatories.

PRINCE ARTHUR’S FARINACEOUS FOOD, see *Farinaceus*.

PRINCEPS, *Rectum*.

PRINCEPS CERVICIS (*Artery*) *Cervical Artery*. A branch of the occipital artery, which descends between the splenius and complexus muscles, and may be followed down to the lower part of the neck.

PRINCEPS POL’LICIS (*Arteria*), *Arteria magna pollicis*. When the two collateral arteries of the thumb take origin from a common trunk—the trunk is the *Princeps pollicis*.

PRINCIPE CRYSTALLIZABLE DE DÉ-ROSNE, *Narcotine*—p. de la *Mélanose*, see *Choroïdea tunica*.

PRINCIPES IMMÉDIATS, *Principles*, immediate.

PRINCIPIUM, *Arche*, *Element*—p. *Acidifcans*, *Oxygen*—p. *Adstringens*, *Tannin*—p. *Byrsodepsicum*, *Tannin*—p. *Coriaceum*, *Tannin*—p. *Hydrogeneticum*, *Hydrogen*—p. *Hydroticum*, *Hydrogen*—p. *Oxygenens*, *Oxygen*—p. *Salivale*, see *Saliva*—p. *Scytodepsicum*, *Tannin*—p. *Urinousum*, *Urea*.

PRIN’CIPLE, COL’OURING, OF THE BLOOD. A name, given to the immediate principle in animals, to which the blood owes its red colour. It is solid, inodorous, and insipid. When recently separated from blood, it has a purple-red colour. When distilled, it furnishes, amongst other products, a purple oil. It is insoluble in water; but, if diluted with that liquid, acquires a vinous-red hue. It communicates a red colour to the albumen of the blood, and affords, on analysis, iron, to which the colour has been ascribed. See *Hæmaphæin*, and *Hæmatin*.

PRINCIPLE, DIGESTIVE, Pepsin—p. *Vital*, see *Vital principle*.

PRINCIPLES, IMMEDIATE, (F.) Principes immédiats, Matériaux immédiats. A name given to a considerable number of substances, composed of at least three elements, and which are obtained from animals and vegetables without alteration, by simple processes, and, in some measure, immediately.

PRINCIPLES, IMMEDIATE, OF ANIMALS, Proximate principles, Organic Elements, Compounds of Organization. These are divided into acid principles, fatty principles, and principles which are neither fat nor acid. The first include the *uric*, *rosacic*, *purpuric*, *allantoic*, *caseic*, *butyric*, &c. The fatty principles are:—*stearin*, *elain*, *cholesterin*, &c.; and the last division includes the most important compounds of organization:—*fibrin*, *gelatin*, *albumen*, *casein*, *osmazome*, &c.

PRINCIPLES, PROXIMATE, P. immediate.

PRINOS (of the ancients), *Ilex aquifolium*.

PRINOS, *P. verticillatus*, *Alean’na major latifolia denta’ta*, *Aquifolium fo’liis decid’nis*, *Prinos Grono’vii* seu *padifolius*, *Black Alder*, *Vir-*

ginia or *Whorled Winterberry*, *Feverbush*, (F.) *Apalachine à feuilles de Prunier*. Ord. Aquifoliaceae. *Ser. Syst.* Hexandria Monogynia. The bark of this common shrub of the United States — *Prinos*, (Ph. U. S.) — is astringent, bitter, and pungent. The berries are, likewise, bitter. The bark has been used as a substitute for the cinchona, in intermittents, and as a tonic.

PRINOS GLABER, see *P. lævigatus* — p. Gronovii, *Prinos*.

PRINOS LÆVIGATUS, *Smooth Winterberry*, and PRINOS GLABER, *Inkberry*. Indigenous; have the same properties as

PRINOS PADIFOLIUS, *Prinos*.

PRION, *Saw*.

PRIONO'DES, from *πριων*, 'a saw,' and *ειδος*, 'shape.' *Serra'ted*. Applied to the sutures of the head.

PRIOR, 'first, foremost,' as

PRIOR ANNULARIS, *Interos'seus quartus* of Winslow. An internal interosseous muscle which arises from the outside of the metacarpal bone of the ring-finger, and is inserted into the outside of the tendon on the back of the ring-finger. Its use is to draw the ring-finger outwards.

PRIOR INDICIS, *Extensor tertii interno'dii indicis*, (F.) *Sous-métacarpo-latéri-phalangien*. It arises from the outer or radial side of the metacarpal bone of the fore-finger, and is inserted into the outside of the tendon on the back of the fore-finger. *Action*: — to draw the finger outwards, towards the thumb.

PRIOR INDICIS PEDIS, *Adductor Indicis pedis*. An external, interosseous muscle of the foot, which arises from the contiguous sides of the metatarsal bones of the great and fore toes, and is inserted into the inside of the root of the first bone of the fore-toe. *Action*: — to pull the fore-toe inwards.

PRIOR MEDII, *Prior medii digiti*.

PRIOR MEDII DIGITI, *Prior Medii*, *Second interos'seus* of Douglas. An external, interosseous muscle of the hand, which arises from the corresponding sides of the metacarpal bones of the fore and middle fingers, and is inserted into the outside of the tendon on the back of the middle finger. *Action*: — to draw the middle finger outwards.

PRIOR MEDII DIGITI PEDIS, *Adductor medii digiti pedis*. An internal, interosseous muscle of the foot, which arises from the inside of the metatarsal bone of the middle toe, and is inserted into the inside of the root of the first bone of the middle toe. *Use*: — to pull the middle toe inwards, or towards the inner side of the foot.

PRIOR MINIMI DIGITI, *Adductor minimi digiti*. An internal, interosseous muscle of the foot, which originates from the inside of the metatarsal bone of the little toe, and is inserted into the inside of the root of the first bone of the little toe. *Action*: — to pull the little toe inwards.

PRIOR TERTII DIGITI PEDIS, *Adductor tertii digiti pedis*. An internal, interosseous muscle of the foot, which arises from the inner and under part of the metatarsal bone of the third of the small toes, and is inserted into the inside of the root of the first bone of the third of the small toes. *Action*: — to pull the third of the small toes inwards.

PRISIS, *Brygmus*, *Trepanning*.

PRISMA, *Scobs*.

PRYSMUS, *Brygmus*, *Trepanning*.

PRIVATE PARTS, *Genital organs*.

PRIVET, *Ligustrum vulgare*.

PRIVITIES, *Genital organs*.

PRIVY, *Ligustrum vulgare* — p. *Members*, *Genital organs* — p. *Parts*, *Genital organs*.

PRO, *pro*, 'before.' A common prefix to words, as in *Procatartic*, *Prostate*, &c.

PROAGOREUSIS, *Prognosis*.

PROBANG, *Sponge-probang*, *Detrusorium ex bale'na*. Allied to *probe*. A long slender rod of whalebone, with a piece of sponge at its extremity, intended to push down extraneous bodies, arrested in the œsophagus, into the stomach. A similar instrument is called by J. L. Petit, *Repoussoir d'arêtes*.

PROBARBIUM, *Genecias*.

PROBASCANIUM, *Amuletum*.

PROBASCANTIUM, *Amuletum*.

PROBE, *Catheterize*, *Specillum* — p. *Eycd*, see *Specillum*.

PROBING, see *Melosia*.

PROBOLE, *Processus*.

PROCARDIUM, *Scrobiculus cordis*.

PROCÉDÉ, *Process*.

PROCEDURE, *Procédé*.

PROCEPHALI, *Capitones*.

PROCERUS NASI, *Pyramidalis nasi*.

PROCES, *Process* — p. *Ciliaires*, *Ciliary processes*.

PROCESS, *Apophysis*, *Processus*.

Proc'ess, *Ratio*, (F.) *Procédé*, from *procedere*, *processum*, 'to march forwards.' *Procedure*, — method of performing any operation, chemical, pharmaceutical, or surgical.

PROCESS, *CUNEIFORM*, *Basiliary process* — p. *Modelling*, see *Modelling Process* — p. of *Rau*, see *Malleus* — p. *Vertical superior longitudinal*, *Falx cerebri*.

PROCES'SUS. A *process*; same etymon; *Projectura*, *Prob'ole*, (F.) *Procès*. An apophysis or eminence of a bone; see *Apophysis*. Also, any part which seems prolonged beyond others with which it is in connexion; as the *Ciliary processes*.

PROCESSUS ANCONÆUS, *Olecranon* — p. *Annularis*, *Pons Varolii* — p. *Ascendens*, see *Maxillary bone*, (*superior*) — p. *Belenoides*, see *Belenoid* — p. *Blumenbachii*, *Unciform process* — p. *Caudatus*, *Lobulus caudatus* — p. à *Cerebello ad medullam oblongatam*, *Corpora restiformia* — p. *Cerebelli ad pontem*, *Peduncles of the cerebellum* — p. *Cerebelli ad testes*, *Peduncles of the cerebellum* — p. *Cerebri lateralis*, *Cornu ammonis* — p. *Ciliares*, *Ciliary processes* — p. *Clavatus*, see *Funiculi graciles* — p. *Cochleariformis*, see *Tympanum* — p. *Cuneiformis ossis occipitis*, *Basiliary process* — p. *Ensisiformes*, see *Sphenoid bone* — p. *Enteroides cerebri*, *Convulsions (cerebral)* — p. *Falciformis cerebelli*, *Falx cerebelli* — p. *Falciformis duræ matris*, *Falx cerebri* — p. *Frontalis*, see *Maxillary bone*, (*superior*) — p. *Gracilis of Rau*, see *Malleus* — p. *Laterales iveri*, *Tubæ Fallopiantæ* — p. *Mamillares*, *Papillæ of the kidney*, *Olfactory nerves* — p. *Mamillares cerebri*, *Mamillary tubercles* — p. *Mastoideus*, *Mastoid process* — p. *Nasalis*, see *Maxillary bone (superior)* — p. *Olivarius*, *Olivary Process* — p. *Orbicularis cerebri*, *Infundibulum of the brain* — p. *Papillares*, *Olfactory nerves* — p. *Papillarum*, *Olfactory nerves* — p. *Rachidianus*, *Medulla spinalis* — p. *Sterni xiphoides*, *Xiphoid*.

PROCESSUS TER'ETES, *Eminentia seu Fasciculi ter'etes*. Two slightly convex bodies forming the anterior wall or floor of the fourth ventricle of the brain. They are separated by a longitudinal groove, which is continuous, inferiorly, with the sulcus longitudinalis posterior of the spinal cord. They are crossed transversely by several white and gray fasciculi — *linea transversa*, *stricæ medullares* — the origin of the auditory nerves.

PROCESSUS AD TESTES, see *Valvula Viussenii* — p. *Transversus duræ matris*, *Tentorium* — p. *Uncinatus*, *Olecranon*, *Unciform process*, see *Coracoid process* — p. *Uvifer*, *Uvula* — p. *Ventriculi*, *Duodenum* — p. *Xiphoides*, *Xiphoid cartilage* —

p. Xipho-sternalis, Xiphoid cartilage—p. Zygomatixus, Zygomatic process.

PROCHEILA, Antelabia.

PROCHEILIDION, Procheilon.

PROCHEILON, *Procheilid'ion, Prola'bium, Antela'bium*, from *pro*, and *χειλος*, 'a lip.' The extreme projecting part or margin of the lips.

PROCEUMA, Parenchyma.

PROCIDENCE DE L'ŒIL, Exophthalmia.

PROCIDENTIA, Prolapsus—p. Ani, Proctocæle—p. Intestini recti, Proctocæle—p. Iridis, Staphyloma of the Iris—p. Oculi, Exophthalmia—p. Sedis, Proctocæle—p. Uteri, Prolapsus uteri.

PROCNEME, Tibia.

PROCNEMIUM, Tibia.

PROCELIUS, *Proce'lius*, from *pro*, and *κοιλια*, 'belly.' One who has a large pendulous abdomen.

PROCELUS, Proœlius.

PROCONDYLUS, *προκόνδυλος*, from *pro*, and *κόνδυλος*, 'a knot.' The first joint of the fingers; the second being called *κόνδυλος*; the third *μετακόνδυλος*.

PROCREATIO, Generation—p. Sanguinis, Hæmatisis.

PROCREATION, Feundation, Generation.

PROCTAGRA, from *πρωκτος*, 'anus,' and *αγρα*, 'seizure.' Gout in the rectum. Proctalgia.

PROCTALGIA, *Proct'ica simplex, Proct'agra, Dolor ani, Proctodyn'ia*, from *πρωκτος*, 'the anus,' and *αλγος*, 'pain.' Pain in the anus: generally symptomatic of disease, as of hemorrhoids, scirrhus, &c.

PROCTALGIA, Clunesia—p. Hæmorrhoidalis, Hæmorrhoids—p. Inflammatoria, Rectitis—p. Intertriginosa, Chafing—p. Rheumatica, Proctorrhœma.

PROCTATRE'SIA, *Imperforatio ani*, from *πρωκτος*, 'the anus,' and *ατρησια*, 'imperforation.' Imperforate state of the anus.

PROCTICA, from *πρωκτος*, 'the anus.' Pain or derangement about the anus, without primary inflammation. A genus in the class *Cæliaca*, order *Enterica*, of Good.

PROCTICA EXANIA, Proctocæle—p. Marisca, Hæmorrhoids—p. Simplex, Proctalgia—p. Tenesmus, Tenesmus.

PROCTISIS, Proctitis.

PROCTITIS, *Proct'itis, Arch'itis, Clune'sia, Cyssot'is*, from *πρωκτος*, 'the anus,' and *itis*, denoting inflammation. Inflammation of the anus and rectum. Rectitis.

PROCTITIS GANGRÆNOSA, Proctocæce.

PROCTOCACĒ, *Proct'itis gangræ'nosa*, from *πρωκτος*, 'the anus,' and *κακος*, 'evil.' A disease of the rectum, so called by Fuchs, which, according to him, is common in Peru, in the neighbourhood of Quito and Lima, on the Honduras and Mosquito coasts, in Brazil, and on the Gold coast, &c. It is called by the Portuguese, *Bicho*, and *Bicho di Culo*; by the people of Quito, *Mal del Valle*, from its prevalence in the valleys; and in Africa, *Bitios de K'is*. It is an adynamic, inflammatory condition, frequently ending in gangrene. It has been attributed to bad food, and the use of spices.

PROCTOCELE, from *πρωκτος*, 'the anus,' and *κηλη*, 'hernia.' *Prolap'sus Ani, Proctopto'ma, Proctopto'sis, Procto'sis, Hedroce'le, Archeopto'ma, Archeopto'ma, Archopto'ma, Archeoc'e'le, Archopto'sis, Eca'nia, Hæmor'rhois proce'dens seu ab exa'niâ, Procidentia Ani seu intesti'ni recti seu sedis, Ecto'pia Ani, Sedes proci'd'ua, Falling down of the Fundament, Coming down of the Body*, (F.) *Chute du rectum, C. du Fondement, Renversement du rectum*. Inversion and prolapse of the mucous coat of the rectum, from relaxation of the sphincter, with more or less swelling. In the treatment, the application of cold water and

astringent lotions must be recommended: and if other means fail, one of the radii of skin, which converge at the anus, may be snipped off. On cicatrizing, the verge of the anus will be contracted, and the cure probably complete. In the way of palliation, the parts may be retained by an appropriate bandage.

PROCTOCYSTOTOMIA, see Lithotomy.

PROCTODYNIA, Proctalgia.

PROCTONCUS, from *πρωκτος*, 'anus,' and *ογκος*, 'swelling.' Swelling of the anus.

PROCTOPARALYSIS, *Proctople'gia, Paral'ysis Intesti'ni Recti*, from *πρωκτος*, 'the anus,' and *παρالىσις*, 'paralysis.' Paralysis of the muscles of the rectum.

PROCTOPLEGIA, Proctoparalysis.

PROCTOPTOMA, Proctocæle.

PROCTOPTOSIS, Proctocæle.

PROCTORRHAGIA, Hæmorrhoidal flux.

PROCTORRHEUMA, from *πρωκτος*, 'anus,' and *ρευμα*, 'defluxion.' Rheumatism of the anus.

PROCTORRHE'IA, from *πρωκτος*, 'the anus,' and *ρευω*, 'I flow.' A discharge of blood or slime from the anus. See Hæmorrhoids.

PROCTOS, Anus.

PROCTOSIS, Proctocæle.

PROCTOSPASMUS, Tenesmus.

PROCTOSTENOSIS ORGANICA, Stricture of the rectum.

PROCTOTOREU'SIS, from *πρωκτος*, 'anus,' and *τορευω*, 'to perforate.' Perforation of a closed anus.

PROCTUS, Anus.

PROCURATIO ABORTÛS. The promotion of abortion.

PRODIAGNO'SIS, from *pro*, and *diagnosis*. Prognostication of a disease to come,—a diagnosis by anticipation.

PRODROMIC, *Prodrom'icus*, (F.) *Prodrom'ique*. Same etymon as the next. Relating, or belonging, to the prodromus of a disease.

PRODROMUS, *Propath'ia*, from *pro*, and *δρομος*, 'course,' (F.) *Prodrome. Sta'dium opportunitatis seu prodromo'rum*: in contagious diseases, *Sta'dium laten'tis conti'gii*. The period immediately preceding an attack of disease; in which the *precursory signs* occur.

PRODU'CT, from *producere, productum*, (*pro*, and *ducere*, 'to lead,') 'to bring forth.' (F.) *Produit*. The result sought to be attained by any pharmaceutical operation.

PRODUCTIO, Prolapsus—p. Uvulæ à pituitâ, Staphylœdema.

PRODU'CTION, *Produc'tio*; same etymon. This word is used, especially by the French, synonymously with *prolongation*. The mesentery is, in this sense, a production of the peritoneum.

PRODUCTION ACCIDENTELLE. An accidental or adventitious structure.

PRODUCTIVITAS, Fecundity.

PRODUIT, Product.

PROËGUMENÆ CAUSÆ, Causes, predisponent.

PRÆLIUM, Press, Tourniquet.

PRÆMINENT, *Proë'm'inens*, from *pro*, and *eminere*, 'to project.' Some anatomists call the 7th cervical vertebra the *proeminent vertebra*, on account of the length of its spinous process, which passes the level of that of the neighbouring vertebrae.

PROENCEPHALUS, (F.) *Proenceph'ale*; from *pro*, and *εγκεφαλος*, 'encephalon.' A monster, whose encephalon is situated, in a great measure, out of, and in advance of, the cranium, which is open in the frontal region.

PRÆOTIA, *Pro'otes*, *πρωιότης* or *πρωιότης*, from *πρωι*, 'early.' 'Precocity.' *Præcox maturitas, Præco'cious maturity*. Premature development of sexual organization or power.—Good.

PROFLUVII CORTEX, Nerium antidysentericum.

PROFLUVIUM, *Discharge, Fluxus, Polyrhœa, Flux*; from *profluo*, (*pro*, and *fluo*.) 'I flow forth.' A term under which—in the plural, *Profluvia, Polycrinœses*—some nosologists have comprised all morbid discharges or fluxes:—others, increased excretions attended by fever.

PROFLUVIUM ALVI, Diarrhœa—p. Genitale muliebri, Menses—p. Mucosum urethræ, Gonorrhœa—p. Muliebri, Leucorrhœa, Menses—p. Sanguinis, Hæmorrhagia—p. Sanguinis à Renibus, Nephorrhagia—p. Sanguinis ex Ore, Stomatorrhagia—p. Sanguinis ex Utero, Metorrhagia—p. Seminis, Pollution—p. Ventris, Diarrhœa.

PROFOND, Profundus.

PROFUNDUS, (*pro*, and *fundus*, 'bottom.') *Altus*, 'having a deep base.' (F.) *Profond*. A name given to different parts, which are seated profoundly as regards others.

PROFUNDA ARTERIA FEMORIS, *A. vasta posterior seu muscularis femoris, Artère-grande musculaire de la cuisse*. (Ch.) This large branch arises commonly from the posterior part of the crural, between the pubis and lesser trochanter. It descends deeply, situate before the adductors; passes through the third adductor above the opening in it for the trunk of the femoral; and terminates in the short portion of the biceps. The *muscularis profunda* gives off, 1. The *external circumflex*: 2. The *internal circumflex*: and, 3. The three *perforantes*.

PROFUNDA ARTERIA HUMERI, *P. superior, Arteria spiralis*, (F.) *Artère humérale profonde, A. collatérale externe, Grand musculaire du bras*, (Ch.) Its origin is variable. When it arises from the brachial artery, it is given off opposite the groove of the humerus destined for the radial nerve, and descends backwards between the three portions of the triceps, accompanied by the nerve; giving branches to that muscle and to the humerus. When it reaches the posterior part of the bone, it divides into two branches, which are distributed to the triceps, supinator longus, &c.

PROFUNDA ARTERIA INFERIOR SEU MINOR is often a branch of the last; but, commonly, is given off from the brachial, near the middle of the arm. It gives off branches to the muscles, &c., about the inner side of the os humeri. It is, also, called *large communicating ulnar* or *profundo-ulnar*.

PROFUNDA ARTERIA PENIS. Chaussier has given this name to the *cavernous artery*, which arises from the artery of the penis, furnished by the internal pudic.

PROFUNDA ARTERIA SUPERIOR, *Profunda humeri*.

Certain muscles are distinguished by the names *profund* or *deep-seated*, and *superficial*. Thus, we speak of the *superficial* and *deep-seated* muscles of the neck, &c.; the *flexor profundus perforans*, &c.

PROFUSIO, Hæmorrhagia.

PROFUSIO AQUÆ. The discharge or breaking off of the waters at birth.

PROFUSIO SANGUINIS, Hæmorrhagia—p. Seminis, Ejaculation—p. Subcutanea, Purpura simplex.

PROGAS/TOR, from *pro*, and *γαστηρ*, 'belly.' One who has a pendulous belly.

PROGENIES, Epigone.

PROGENY, Epigone.

PROGLOS/SIS, from *pro*, and *γλωσσα*, 'the tongue;' *Apex linguæ*. The extremity or tip of the tongue.

PROGNA/THOUS, from *pro*, and *γναθος*, 'the jaw.' Having a projecting jaw. A term applied to the form of the head in which there is a pro-

longation or forward extension of the jaws, as in the negro.

PROGNO/SIS, *Proëgoreu'sis, Prorrhœ'sis, Præcognit'io, Prognos'ticè, Præno'tio, Prænuntia'tio, Præscient'ia, Præsit'io, Pronœ'a, Proph'asis, Prædic'tio*, (F.) *Prognostic, Pronostic*, from *pro*, and *γνῶσις*, 'knowledge.' A judgment formed by the physician regarding the future progress and termination of any disease.

PROGNOSIS, GENERAL. The opinion formed of a disease in the abstract. Thus, the *General prognosis* of *Cynanche tonsillaris* is favourable;—of *Phthisis pulmonalis*, unfavourable, &c.

PROGNOSIS, PARTICULAR. The opinion formed of any particular case of disease. The *particular prognosis* of one case of typhus, for example, may be favourable, whilst that of another may be unfavourable.

PROGNOSIS EX LINGUÀ, Glossomania.

PROGNOSTIC, Prognosis.

PROGNOSTICE, Prognosis.

PROGRESSIO, Augmentation.

PROGRESSION, Walking.

PROGRESSUS, Augmentation.

PROIOTES, Præotia.

PROJECTURA, Process.

PROLABIUM, Procheilon.

PROLAP/SUS, from *prolabor, prolapsus*, (*pro*, and *labor, lapsus*, 'to slide,') 'I slip down.' *Procidencia, Delaps'io, Delaps'us, Hypor'hysis, Propto'ma, Propto'sis, Product'io, Propendencia, Prominent'ia, Ptosis, Casus*, (F.) *Chute; a protrusion; a falling down*. A genus of diseases in the class *Locales* and order *Ectopiæ* of Cullen, distinguished by the falling down of a part through the orifice with which it is naturally connected.

PROLAPSUS ANI, Proctocœle—p. Bulbi oculi, Exophthalmia—p. Cornæ, Staphyloma of the cornea—p. Iridis, Ptosis iridis—p. Linguæ, Glossocele, Paraglossa—p. Œsophagi, Pharyngocele—p. Palpebræ, Blepharoptosis—p. Pharyngis, Pharyngocele—p. Umbilici, Exomphalus.

PROLAPSUS UTERI, *Exometra, Metropto'sis, Metropropto'sis, Orthysteropto'sis, Orthysteroptoma, Falling down of the womb, Adopto'sis seu Procidencia uteri, Hysteropto'sis, Hysterocele nuda*, (F.) *Abaissement ou Chute ou Descente ou Précipitation de la matrice*. Some use the term 'Procidencia Uteri' for a minor degree of the affection than prolapsus;—*Relaxatio uteri* expressing the slightest state of all. A falling down of the uterus, owing to relaxation of the parts about the utero-vaginal region. In the treatment, the horizontal posture must be insisted upon; the injection of astringent substances *per vaginam* be advised; and if the affection be not remedied by these means, a pessary may be employed as a palliative, or the operation of *Episiorraphy* be performed.

PROLAPSUS UVULÆ, Staphylœdema.

PROLAPSUS VAGINÆ, *Hysteropto'sis seu Prolapsus Adoptosis Vaginæ, Coleopto'sis, Colpoppto'sis, Elythropto'sis*—Protrusion of the upper part of the vagina into the lower. This, like the descent of the uterus, may be *relaxation, procidencia, prolapsus*, or complete *inversion*.

PROLAPSUS VESICÆ, Exocyste.

PROLECTA/TIO; from *pro*, and *legere, lectum*, 'to gather.' Action of separating the finer parts of a body from the grosser.

PROLEP/TICS, *Prolepticæ*, from *pro*, and *λαμβάνω*, 'I seize hold of.' A term proposed by Dr. Laycock to signify the art and science of predicting in medicine.

PROLEPTICUS, Anticipating.

PROLES, Epigone.

PROLICIDE, *Prolicid'ium*, from *proles* (*pro*, and *olescere*, 'to grow,') 'offspring,' and *cedere*, 'to kill.' Destruction of offspring: a term which includes fœticide as well as infanticide.

PROLIFIC, *Prolif'icus*, (F.) *Prolif'ique*, from *proles*, 'offspring,' and *facio*, 'I make.' That which has the faculty of engendering. Applied to man, and animals, and to their sperm or seed; as well as to remedies, which, by strengthening the genital organs, increase the secretion of sperm.

PROLIG'EROUS, *Pro'liger*, *Prolig'ernus*, from *proles*, 'offspring,' and *gero*, 'I carry.' That which is connected with carrying the offspring.

PROLIGEROUS DISC or **LAYER**, *Discus prolig'erus* seu *vitell'inus*, *Stratum prolig'erum*, *Gonostro'ma*, (F.) *Disque proligère*. A granular layer, situate generally towards the most prominent part of the ovarian vesicle, in the centre of which the true ovum or ovule exists.—Von Baer.

PROLONGEMENT RACHIDIEN, *Medulla spinalis* — p. *Sous-occipital*, Basillary process.

PROMALACTE'RIUM, from *pro*, and *μαλασσω*, 'I soften.' The room, in the ancient gymnasium, in which the body was softened and anointed. One of the operations in bathing.

PROMANUS, see *Digitus*, *Pollex*.

PROMETOPIDIA, Frontal bandages.

PROMETO'PIS, *Prometopid'ion*, from *pro*, and *μετωπον*, 'the forehead.' The skin of the forehead.

PROMINENTIA, *Prolapsus*, *Protuberance* — p. *Annularis Cerebri*, *Pons Varolii* — p. *Corneæ*, *Ceratocele* — p. *Ossis Continua*, *Apophysis*.

PROMINENTIÆ ALBICANTES, Mammillary tubercles — p. *Semiövales Medullæ Oblongatæ*, *Corpora olivaria*.

PROMONTOIRE, *Promontorium*.

PROMONTORIUM, *Promontory* — p. *Faciei*, *Nasus* — p. *Ossis Sacri*, see *Sacrum*.

PROMONTORY, *Promontor'ium*, (F.) *Promontoire* (from *pro* and *mons*, *montis*, 'a mountain,') seu *Tuber* seu *Tuberos'itas Tym'pani*. A small projection at the inner paries of the cavity of the tympanum, which corresponds to the external scala of the cochlea, and especially to the outer side of the vestibule.

PROMONTORY OF THE SACRUM, see *Sacrum*.

PRONATEUR CARRÉ, *Pronator radii quadratus* — p. *Grand* ou *rond*, *Pronator radii teres* — p. *Petit*, *Pronator radii quadratus*.

PRONA'TION, *Prona'tio*, from *pronus*, 'inclined forwards.' Anatomists understand, by pronation, the motion by which the inferior extremity of the radius passes before the ulna, and thus causes the hand to execute a kind of rotation from without inwards.

PRONA'TOR. That which produces the motion of pronation. This name has been given to two of the muscles of the forearm.

PRONATOR OBLIQUUS, *P. radii teres* — p. *Quadratus*, *P. radii quadratus*.

PRONATOR RA'DII QUADRA'TUS, *P. quadratus* seu *transvers'us* (Winslow) seu *radii brevis* seu *radii quadratus* (Cowper), *Quadratus ra'dii*, (F.) *Cubito-radial* (Ch.), *Petit* ou *carré pronateur*. This muscle is situate at the anterior, inferior, and profound part of the forearm. It is flat and square, and is attached, within, to the inferior quarter of the anterior surface of the ulna; and, without, to the inferior quarter of the anterior surface of the radius. It produces the motion of pronation.

PRONATOR RADII TERES, *P. teres* sive *obli'quus* (Winslow), (F.) *Épitrachlo-radial* (Ch.), *Grand* ou *rond pronateur*. A muscle seated at the upper and anterior part of the forearm. It is long, flat, and larger above than below. It is attached, above, to the inner tuberosity of the humerus and

to the coronoid process of the ulna. Thence it passes obliquely downwards and outwards, and terminates at the middle of the outer surface of the radius. It causes the radius to turn on the ulna, to produce the motion of pronation. It can, also, bend the forearm on the arm, and conversely.

PRONATOR TERES, *P. radii teres*.

PRONAUS, *Vestibulum*.

PRONERVATIO, *Aponeurosis*, *Tendon*.

PRONŒA, *Prognosis*.

PRONONCIATION, *Pronunciation*.

PRONOSTIC, *Prognosis*.

PRONUNCIATION, *Pronuncia'tio*, (F.) *Prononciation*, from *pro* and *nunciare*, 'to tell.' The mode of articulating or giving accent or utterance to words.

PROPATHIA, *Prodromus*.

PROPENDINGIA, *Prolapsus*.

PROPERTIES, PHYSICAL, OF THE TISSUES. These are *flexibility*, *extensibility*, *elasticity*, *racornissement* and *imbibition*.

PROPERTIES, VITAL. Those which depend upon the vital force, as *contractility*.

PROPHASIS, *Prognosis*.

PROPHYLACTIC, *Prophylact'icus*, *Diaphylact'ic*, *Diasoet'ic*, *Synteret'ic*, *Præservat'orius*, (F.) *Prophylact'ique*, from *pro*, and *φύλασσω*, 'I defend.' A preservative or preventive.

PROPHYLACTIC MEDICINE, *Hygiene*.

PROPHYLAX'IS, *Prophyl'acê*, *Prophylact'icê*, *Synteret'is*. Same etymon. *Præservat'io*, *Præcaut'io*, *Præcusto'dia*. Preservative or preventive treatment.

PRO'POLIS, from *pro*, and *πολις*, 'city;' literally, 'that which is before the city.' *Ceranthemus*, *Commo'sis*, *Bee-bread*. A red, resinous matter, with which the bees cover the bottom of the hive. Its fume has been esteemed antiasthmatic.

PRO'OMA, from *pro*, and *πομα*, 'a drink.' Ancient name of a medicine, composed of seven parts of *honey* and four of *wine*. It was drunk before a meal.—Paulus of Ægina.

PROPORTIO, *Symmetry*.

PROPOSITUM, *Intention*.

PROTOTISMA, *Mistura*.

PROTOTIS'MUS, *προποτισμος*. Same etymon. *Præpo'tio*. An ancient name for medicines which were given to the patients before purging them, and, in some sort, to prepare them.

PROPRIUS AURIUS EXTERNÆ, *Retrahens auris*.

PROPTOMA, *Prolapsus*.

PROPTOMA AURICULA'RUM, *Paræsthe'sis auditûs stacca*, *Flap Ear*. Lobe of the ear broad, loose, and pendent from birth.—Good.

PROPTOMA SCROTI, *Rachosis*.

PROPTOSIS, *Prolapsus* — p. *Palpebræ*, *Blepharoptosis* — p. *Uvulæ*, *Staphylædema*.

PROPTYSIS, *Expectoration*.

PRORA, *Occiput*.

PRORRHESIS, *Prognosis*.

PRORUPTIO SANGUINIS, *Hæmorrhagia*.

PROS, *προς*. In composition, this prefix generally signifies 'in addition to,' 'over and above,' 'besides.'

PROSARTHROSIS, *Diarthrosis*.

PROSBOLE, *Impression*.

PROSCHYSIS, *Affusion*.

PROSCOLLESI, *Adherence*, *Agglutination*.

PROSECTEUR, *Dissector*.

PROSECTIO, *Anatomy*.

PROSECTOR, *Dissector*.

PROSLEPSIS, *Prehension*.

PROSODOS, *Aditus*.

PROSOPALGIA, *Neuralgia*, *facial*.

PROSOPANTRA, *Frontal sinuses*.

PROSOPANTRI'TIS, from *prosopantra*, the

frontal sinuses, and *itis*, denoting inflammation. Inflammation of the frontal sinuses.

PROSOPARALYSIS, Palsy, Bell's.

PROSO'PIS DULCIS, *Ord.* Leguminosæ. A tree of rather large size, native of Peru. The fruit — *Pacay* — is a pod, from 20 to 24 inches long, containing black seeds imbedded in a white, soft, flaky substance; which last is eaten by the Limenos with pleasure.—Tschudi.

PROSOPODYNIA, Neuralgia, facial.

PROSOPODYSMOR'PHIA, from *προσωπον*, 'the face,' *δυσ*, 'with difficulty,' and *μορφη*, 'shape.' Malformation or atrophy of the face, — as where the process of nutrition suffers from diminished nervous influence.

PROSOPOLOGIA, Physiognomy.

PROSOPOMANTIA, Physiognomy.

PROSOPON, Face.

PROSOPORRHEU'MA, *Rheumatis'mus faciei*, from *προσωπον*, 'face,' and *ρηνμα*, 'defluxion,' 'rheumatism.' Rheumatism affecting the face.

PROSOPOSIS, Physiognomy.

PROSOSPASMUS, Canine Laugh.

PROSOPOSTERNODYMIA, see Cephalosomatodymia.

PROSPERITAS VALETUDINIS, Sanitas.

PROSPHORA, Prehension.

PROSPHYSIS, *Adnascent'ia, Coalit'io*, 'adhesion, adherence, connexion,' from *pros*, and *φωω*, 'I grow.' In a more limited sense, this word means morbid adhesion of the eyelids, either between themselves, or with the globe of the eye: *Ankylobleph'aron*.

PROST'ASIS, *προστασις*, from *προ*, and *στασις*, 'station,' 'superiority, preponderance;' same etymon as *Prostate*. A predominance or abundance of excrementitious humour.—Hippocrates.

PROSTATA, Prostate — p. Adenoides, Prostate — p. Bartholini, Cowper's glands in the female — p. Glandula, Prostate — p. Muliebris, Cowper's glands in the female.

PROSTATÆ, Prostate — p. Adenoides, Prostate — p. Glandulosæ, Prostate.

PROSTATAL, Prostatic.

PROSTATAL'GIA, from *προστατα*, 'the prostate,' and *αλγος*, 'pain.' Pain in the prostate.

PROSTATAUXË, Prostatoparectasis.

PROSTATE, *προστατα*, from *προ*, 'before,' and *στημι*, 'I stand.' — *Prostata*, *P. glandu'la, Prostata*, *P. glandulo'sæ* seu *adenoides, Paras'tata adenoides* seu *glandulo'sa, Adetans, Paras'tatæ, P. gland'ulæ, Testis minor, Corpus glandulo'sum* seu *glando'sum* seu *adeniforme* seu *glandiforme* seu *glandulo'sum* seu *adenoi'des, Assistentes glandulæ, Ad'stites glandulo'si*; the *Prostate gland.* A glandular, cordiform body, of the size of a chestnut, situate before the neck of the bladder, behind the symphysis pubis, and surrounding the first portion of the urethra. Its excretory outlets, to the number of 10 or 12, open into the part of the urethra that traverses it, and pour into it a whitish viscid humour — *Liquor prostat'icus* — intended to lubricate the interior of the urethra, and to serve as a vehicle for the sperm in its ejaculation.

PROSTATE, ANTERIOR, see Cowper's glands.

PROSTATELCO'SIS, from *προστατα*, 'prostate,' and *ελκος*, 'an ulcer.' Ulceration of the prostate.

PROSTATES INFÉRIEURES, Cowper's glands — p. *Petites*, Cowper's glands.

PROSTAT'IC, *Prostat'icus, Prost'al*, (F.) *Prostatic*. That which belongs or relates to the prostate. Winslow has named — *Superior Prostatic Muscles* — ligaments which pass from the pubis to the lateral parts of the prostate. He, also, calls — *Inferior prostatic muscles* — the fleshy fibres, which, from the lateral parts of the urethra,

near its membranous portion, pass to be inserted into the pubis.

PROSTATIC BISECT'OR. An instrument employed by Dr. Stevens, of New York, in the bilateral operation of lithotomy. In form it resembles a large olive, with a beak at the extremity, cutting edges at the sides parallel to its longest axis, and with a straight handle.

PROSTATIC LIQUOR, *Liquor prostat'icus*. The fluid secreted by the prostate, which mixes with sperm during emission.

PROSTATIC PORTION OF THE URETHRA. The part of the canal of the urethra included by the prostate: it is about 15 lines long.

PROSTATIC SINUS, see Sinus, prostatic.

PROSTATICUS SUPERIOR, Compressor prostate.

PROSTATIQUE, Prostatic.

PROSTATITIS, *Inflammat'io Prostatae*, from *προστατα*, 'the prostate,' and *itis*, denoting inflammation. Inflammation of the prostate; when accompanying gonorrhœa, it is the *gonorrhœo-prostatit'is*.

PROSTATOCELE, Prostatocœcus.

PROSTATON'CUS, *Prostatoce'le, Tumor prostatae*, from *προστατα*, 'the prostate,' and *ογκος*, 'a tumour.' Swelling of the prostate.

PROSTATOPAREC'TASIS, from *προστατα*, 'prostate,' and *παρεκτεινεν*, 'to extend.' Enlargement of the prostate; also, induration of the same, *Prostatocœi'rhus, Prostatari'ë*.

PROSTATOSCIRRHUS, see Prostatoparectasis.

PROSTERNID'IUM, from *προ*, 'before,' and *στερνον*, 'the sternum.' Any agent applied to the anterior part of the chest; a plaster to the breast.

PROSTHESIS, Prothesis.

PROSTHETA, Subdita.

PROSTHIUM, Penis.

PROSTOM'IA, *Commissu'ra labio'rum*; from *προ*, 'before,' and *στομα*, 'mouth.' The commissure of the lips.

PROSTRATION, *Prostrat'io virium*, (F.) *Prostration des forces, Abatement*. Great depression of strength. Almost total loss of power over the muscles of locomotion.

PROTEA MELIF'ERA. A South African plant, *Nat. Ord.* Proteaceæ, whose involucre and flowers, at the time of inflorescence, are filled with a sweet watery liquid, which contains a great deal of honey. By inspissation it forms a delicious syrup — *Syr'upus Proteæ*, which is much used in pulmonary affections.

PROTEA LEPIDOCARPON, and some other Proteæ, supply the same kind of juice.

PROTEAN, *Proteiform, Proteiform'is*, from *Proteus*, who could assume various shapes. Assuming different shapes.

PROTEIFORMIS, Protean.

PROTEIFORM'IS MORBUS. A disease which assumes various characters.

PROTEÏN, *Proteine, Proteï'na*, from *πρωτενω*, 'I take first rank.' A product of the decomposition of albumen, &c., by potassa. When animal albumen, fibrin or casein is dissolved in a moderately strong solution of caustic potassa, and the solution is exposed for some time to a high temperature, these substances are decomposed. The addition of acetic acid causes, in all three, the separation of a gelatinous translucent precipitate which has exactly the same characters and composition. This is protein. — Mulder.

Protein is the basis of animal and vegetable fibrin, albumen, and casein, and of gluten, which have been, consequently, classed under the "proteinaceous alimentary principle," by Dr. Pereira.

PROTEINACEOUS, Proteinous.

PROTEINOUS, *Proteina'ceous, Proteino'sus*,

(F.) *Protéineux*. Of, or belonging to protein; — as “a proteinous alimentary principle.”

PROTÉINEUX, Proteinous.

PROTENSIONES GLANDULARES, Mammary eminences.

PROTHESIS, *Pros'thesis, Adjunctio, Adjectio, Appositio*, ‘addition, application;’ from *προς*, ‘in addition to,’ and *τιθέναι*, ‘I put.’ That part of surgery whose object is to add to the human body some artificial part, in place of one that may be wanting, as a wooden leg, an artificial eye, &c.

PROTOMESIS, Umbilicus, Kidney.

PROTOAZOTATE DE MERCURE, Hydrargyri nitras.

PROTOGALA, Colostrum.

PROTIATROS, Archiater.

PROTOMEDICUS, Archiater.

PROTOMUS, Dissector.

PROTOPATHIA, Idiopathia.

PROTOPHYTE, *Protophyton*, from *πρῶτος*, ‘first,’ and *φύτον*, ‘a plant.’ A vegetable production at the foot of the scale; as a cryptogamous plant, — a fungus.

PROTOPLAST, from *πρῶτος*, ‘first,’ and *πλασσω*, ‘I form.’ A primary formation. A first formed organized body — the parent of all others.

PROTOSPOROS, Os uteri.

PROTOZÖON, from *πρῶτος*, ‘first,’ and *ζῶον*, ‘an animal.’ An animal lowest in the scale; — as a monad.

PROTRAHENS LENTIS, Ciliary muscle.

PROTRUSION, Prolapsus.

PROTUBERANCE, *Protuberantia, Extuberantia, Prominentia, Exerescencia, Ectuberantia*, from *pro*, ‘before,’ and *tuber*, ‘a projection.’ (F.) *Bosse*. A name given to rough, unequal protuberances, seen at the surface of certain organs; the *parietal protuberances, occipital protuberances, annular protuberances, &c.*

PROTUBERANCE, ANNULAR, Pons Varolii — p. Cerebrali, Medulla oblongata, Pons Varolii — p. *Cylindroide*, Cornu ammonis.

PROTUBERANTIA, Eminence — p. Annularis Willisii, Pons Varolii — p. Basilaris, Pons Varolii — p. Cylindrica, Cornu ammonis.

PROTRUSOR, Detrusor urinæ.

PROULMATESIS. A word employed by Forestus for hernia of the stomach [?].

PROUNE, Prunus domestica.

PROVENTRICULUS, *Bulbus glandulosus, Infundibulum, Second stomach*; from *πρῶ*, ‘before,’ and *ventriculus*, ‘the stomach.’ A bulbous expansion at the termination of the œsophagus, immediately above the gizzard of birds, the walls of which are thickly studded with a layer of glands or follicles which secrete a digestive fluid.

PROVERBS, MEDICAL. A proverbial expression frequently contains sound sense in its directions. In medicine, the greatest collection is in the *Regimen of Health of the School of Salerno*, composed in the 11th century, by John of Milan. Yet, although good sense is often inculcated, we frequently meet with the reverse.

Most of the proverbs are hygienic. The following are a few.

1. *Qu' après la soupe un coupe d'excellent vin*
Tire un écu de la poche du médecin.
2. *Surge quintâ, prande nonâ, cœna quintâ, dormi nonâ, nec est morti vita prona.*
3. *Nunquam recte corpus exerceri sine animo, neque animum sine corpore posse.*
4. *Viande bien machée est à demi digérée.*
5. *Optimum condimentum fames.*
Appetite is the best sauce.
6. *Plures occidit gula quam gladius.*

7. Early to bed and early to rise,
Makes a man healthy, wealthy, and wise.

8. One man's meat's another man's poison.

9. An ounce of prevention is better than a pound of cure.

PROVERSIO, Anteversion.

PROVINS, MINERAL WATERS OF. Chalybeate springs in the department of Seine et Marne, France, which contain carbonic acid and iron.

PROVOCATORIUS, Intercalary.

PROXIMAD, see Proximal aspect.

PROXIMAL, from *proximus*, ‘next.’ Proximate; nearest; next.

PROXIMAL ASPECT. An aspect towards the trunk, in the course of an extremity. — Barclay. *Proximad* is used by the same writer adverbially to signify ‘towards the trunk.’

PRUNA, Anthrax.

PRUNE, Prunum.

PRUNE JUICE EXPECTORATION OR SPUTA. The sputa resembling prune juice, which occur in the third or purulent stage of pneumonia.

PRUNEAU, Prunum.

PRUNELLA, Angina pectoris, Aphthæ, Cyananche, Pupil.

PRUNELLA, P. vulgaris seu *officinalis, Brunella, Consolida minor, Synphytum minus, Self-heal, Heal-all, Bagle*, (F.) *Prunelle, Brunelle*; *Ord. Labiatae. Sez. Syst. Didynamia Gymnosperma*. This plant has been recommended as an astringent, in hemorrhages and fluxes; and, also, in gargles against aphthæ, and in inflammation of the fauces.

PRUNELLÆ SAL, Potassæ nitras fusus sulphatis paucillo mixtus.

PRUNELLE, Prunella, Pupil.

PRUNELLIER, Prunus spinosa.

PRUNELLOE, Prunum Brignolense.

PRUNEOLA SYLVESTRIS, Prunus spinosa.

PRUNES, see Prunum — p. Pulp of, Pruni Pulp.

PRUNI PULPA, *Pulp of prunes*. Take of prunes a sufficient quantity, soften them in the vapour of boiling water, and having separated the stones, beat the remainder in a marble mortar and press through a hair-sieve. — Ph. U. S.

PRUNIER, Prunus domestica — p. *Savage*, Prunus spinosa.

PRUNUM. A dried Plum, a Prune. (F.) *Pruneau*. Three sorts of Prunes have been usually ranked amongst the articles of the materia medica. 1. The *Prunum Brignolensè*; the *Brignole plum* or *Prunelloe*; from Brignole in Provence. It is of a reddish-yellow colour; and has a very grateful, sweet, subacid taste. 2. The *Prunum Gallicum, Prunum* (Ph. U. S.), the *French Prune*; and 3. The *Prunum Damascenum* or *Damson, Brabylon*. All these possess the same general qualities as the other summer fruits. They are emollient and laxative.

PRUNUM STELTIUM, Averrhoa carambola.

PRUNUS ACACIA, Prunus padus.

PRUNUS ARMENIACA, *Armeniaca vulgaris* seu *epirotica*. The *A'pricot, Apricock, Bériceocè*, *βερικοκκη, Præcoëia*, (F.) *Abricotier. Ord. Rosaceæ. Sez. Syst. Icosandria Monogynia*. The apricot, *Melum Armeniacum*, (F.) *Abricot*, when ripe, is easily digested, and considered as a great delicacy.

PRUNUS A'VIUM, *P. cer'asus* seu *sylvestris* seu *macrophylla, Cer'asus A'vium* seu *nigra* seu *dulcis, Black Cherry Tree*, (F.) *Merisier*. The fruit is eaten; and a gum exudes from the tree, the properties of which are similar to those of gum Arabic.

PRUNUS CAPULIN, (S.) *Capulies*, grows in the

open fields of Peru; and is cultivated in gardens in the towns. The fruit is agreeable, and not often eaten; but on account of its agreeable odour it is used in making *Pucheros de flores*; or with odouriferous flowers to perfume linen.—Tschudi.

PRUNUS CER'ASUS, *Cer'asus ac'idula* seu *hortensis* seu *vulgaris* seu *rubra*. The Red Cherry Tree; (F.) *Cerisier*. The fruit *Cer'asum*, *Cerastion*, has a pleasant, acidulous sweet flavour. It is wholesome. See *Prunus avium*.

PRUNUS DOMES'TICA. The Plum or Damson tree, *Coccyne'lea*, *Proune*, (F.) *Prunier ordinaire*. The damson, when perfectly ripe, affords a wholesome fruit for pies, tarts, &c. It is gently laxative. See *Prunum*.

PRUNUS HORTENSIS, *P. cerasus*.

PRUNUS INSIT'IA. The Bullace Plum Tree. The fruit of this tree is used like the damson.

PRUNUS LAURO-CER'ASUS, *Cer'asus lauro-cerasus*, *Padus lauro-cerasus*, *Poison Laurel*, *Cherry Laurel*, *Common Laurel*, *Lauro-cerasus*, (F.) *Laurier-cerise*, *L. amandier*, *L. de Trébisonde*. The leaves, *Lauro-cer'asus*, (Ph. E. and D.) have a bitter, styptic taste, with the flavour of bitter almonds. The flowers have a similar flavour. The powdered leaves, applied to the nostrils, excite sneezing. The flavour of the leaves has given occasion to their being employed in tarts, custards, &c.; but in large quantities they are poisonous. The poisonous principle is the prussic acid. The distilled water, called *Laurel-water*, is poisonous. (See Poisons, Table of.) An *AQUA LAURO-CER'ASI*, *Cherry Laurel-water*, is official in the Edinburgh and Dublin Pharmacopœias. Dose, ℞ xxx to fʒi.

PRUNUS MACROPHYLLA, *P. avium*.

PRUNUS PADUS, *Padus*, *P. avium*, *Cer'asus Padus* seu *racemosus sylvestris*, *Wild cluster* or *Bird Cherry Tree*, (Sc.) *Hagberry*, *Huck-berry*, (Prov.) *Heckberry*, (F.) *Cerisier à grappes*, *Bois puant*. The bark of the tree has a fragrant smell, and a bitter sub-astringent taste, somewhat similar to that of bitter almonds. It has been recommended in intermittents, &c., in the form of decoction. The berries have been used in dysentery.

PRUNUS SEBASTINA, *Sebastina*.

PRUNUS SPINOSA. The *Sloe Tree*, *P. sylvestris* seu *Aca'cia*, *Agriococcine'lea*, *Agru'na*, *Agru'ne'la*, (F.) *Prunellier*, *Prunier sauvage*. The fruit—the *sloe*—is sometimes employed in gargles, and was formerly much used in hemorrhage, owing to the astringent properties. The *Aca'cia nostras* seu *Germanica* seu *vulgaris*, *Prunella sylvestris*, *Succus acacia nostralis*, *S. Acacia Germanica inspissatus* is obtained from this.

PRUNUS SYLVESTRIS, *P. Avium*, *P. Spinosa*.

PRUNUS VIRGINIANA, *Cer'asus serotina* seu *Virginia'na*, *Choke cherry*, *Wild Cherry Tree*, (F.) *Cerisier de Virginie*. The bark of this tree has been found useful in intermittents. The leaves are poisonous to certain animals, and the berries intoxicate different kinds of birds. The Indians use the bark in the cure of syphilis. It is bitter and astringent, and possesses some aromatic warmth, and likewise a sedative quality. It is stimulant and tonic. The leaves contain prussic acid. The distilled oil of the bark is very nearly identical with that of the bitter almond. A strong decoction of the bark is anthelmintic.

PRUNUS VULGARIS, *P. Padus*.

PRURIG'INOUS, *Pruriginosus*, (F.) *Pruriginæus*. Same etymon as the next. Relating, or belonging to, or resembling prurigo.

PRURIG'IO, *Pruritus*, *Chris'ma*; from *prurio*, *pruritus*, 'to itch.' The word is often used synonymously with *itching*. Willan and Bateman use the term for a genus of cutaneous diseases, the characteristic symptoms of which are

a severe itching, accompanied by an eruption of papulæ of nearly the same colour as the adjoining cuticle; *Cnesmos*, *Scabies papuliform'is*, *Exor'mia prur'igo*. It affects the whole surface of the skin, under three varieties of form;—the *P. mitis*, *P. formicans*, *P. senilis*, &c., as well as some parts of the body, as the *P. pod'icis*, and *P. puden'ti mulie'bris*, *Puden'dagra prur'iens*, *Pruritus vulvæ*, (F.) *Prurit de la vulve*.

PRURIGO, Heat—*p. Pedicularis*, *Phtheiriasis*.

PRURIT, Itching—*p. de la Vulve*, see *Prurigo*. **PRURITUS**, Gargalus, Itching, Prurigo—*p. Vulvæ*, see *Prurigo*.

PRUSSIAN BLUE, *Ferrum Zoët'icum* seu *Borus'sicum* seu *Cyanogen'dum* seu *oxydulat'um hydrocyan'icum*, *Ferri Ferrocyanas* seu *Ferrocyanuretum* seu *Cyanuretum* seu *Percyanidum*, *Borus'sias* seu *Prussias* seu *Hydrocyanus Ferri*, *Cæru'leum Borus'sicum* seu *Berolinens'e*, *Tritohydro-ferrocyanate* or *Ferrocyanuret* or *Ferropur'siate of iron*, (F.) *Bleu de Prusse*, *B. de Berlin*. In the Pharmacopœia of the United States, the pure salt—*Ferri ferrocyanuretum*—is directed to be made as follows: *Ferri Sulph. ʒiv*, *acid sulph. fʒiiss*, *acid nitric. fʒvj* or *q. s.*, *potassii ferrocyanuret. ʒivss*, *aquæ*, *Oij*. Dissolve the sulphate in a pint of water, and having added the sulphuric acid, boil the solution. Pour into it the nitric acid, in small portions, boiling the liquid for a minute or two after each addition, until it no longer produces a dark colour; then allow the liquid to cool. Dissolve the ferrocyanuret of potassium in the remainder of the water, and add this solution gradually to the first liquid, agitating the mixture after each addition; then pour it upon a filter. Wash the precipitate with boiling water until the washings pass tasteless. Lastly, dry and rub into powder. This salt is chiefly used in the preparation of the hydrocyanic acid and the cyanuret of mercury. It has been advised in the treatment of intermittents, and in epilepsy and scrophulosis. Externally, it has been applied to ill-conditioned ulcers. (ʒj to ʒj. of cerate.) Dose, four to six grains.

PSALIDIUM, *Fornix*.

PSALIS, *Fornix*, *Scissors*.

PSALTERIUM, *Lyra*.

PSAMMA, see *Gravel*.

PSAMMIS'MUS, *Ammis'mus*, *Gammis'mus*, from *ψαμμος*, 'sand.' *Arena'tio*. The application of sand to any part of the body for the cure of disease.—Paulus.

PSAMMODES, *Sabulous*.

PSAMMUS, see *Gravel*.

PSAUTIER, *Omasum*.

PELLIS'MUS, *ψελλισμος*, *Psellotes*, *ψελλοτης*, from *ψελλίζω*, 'I stutter.' Imperfect or depraved state of the articulation. A genus in the class *Pneumatica*, order *Phonica*, of Good.

PELLISMUS NASITAS, *Rhinophonia*—*p. Rhacismus*, *Rotaicis'm*.

PELLOTES, *Balnties*.

PSEUDACACIA ODORATA, *Robinia pseudacacia*.

PSEUDAC'OE, *Pseudacœo'a*, *Pseudeco'a*, from *ψευδης*, 'false,' and *ακοη*, 'audition.' *Pseudacœus'sis*. False hearing.

PSEUDACORUS, *Iris pseudacorus*.

PSEUDÆSTHES'IA, *Sensus perversus*, from *ψευδης*, 'false,' and *αισθησις*, 'I feel.' *αισθησις*, 'feeling.' *Parapsis illusoria*, *Pseudaph'ê*, *Pseudaph'ia*, (F.) *Pseudesthêsic*. Depraved feeling. Imaginary sense of touch or general feeling in organs that have no existence. Common to those who have suffered amputation; and to hypochondriacs and the insane.

PSEUDALEI MORBI, Feigned diseases.

PSEUDANGUSTURINUM, *Brucine*.

PSEUDAPHE, *Pseudæsthesia*.

PSEUDARTHRO'SIS, *Pseudarticulatio*, *Pseudarticulus*, *Articulatio notha seu artificialis*, from *ψεύδης*, 'false,' and *ἄρθρον*, 'a joint.' A false joint or articulation; *Articulus novus seu spurrius seu præternaturalis*, (F.) *Articulation surnuméraire*.

PSEUDARTICULATIO, Pseudarthrosis.

PSEUDECOIA, Pseudacoce.

PSEUDENCEPHALUS, *Paracephalus*, from *ψεύδης*, 'false,' and *εγκεφαλον*, 'the encephalon.' A monster, whose cranium is open in its whole extent, from before to behind, its base supporting a vascular tumour. — I. G. St. Hilaire.

PSEUDESTHÉSIE, Pseudæsthesia.

PSEUDO, False — p. Asthma, Dyspnoea.

PSEUDOBLEPSIA, *Pseudoblepsia*, *Pseudorasis*, *Suffusio oculi*, from *ψεύδης*, 'false,' and *βλεψίς*, 'sight.' *Pseudopsia*, *Paropsia illusoria*, *Suffusio*, *Phantasma*, *False sight*. A generic name, used by Cullen for perversion of vision. See *Metamorphopsia*.

PSEUDOBLEPSIS, Paropsis.

PSEUDOCARCINOMA LABII, Cancer aquaticus.

PSEUDOCROMIA, Achromatopsia.

PSEUDOCROUP, Asthma thymicum.

PSEUDOCYESIS, Pregnancy, false — p. *Cyesis molaris*, Mole.

PSEUDOENCEPHALITIS, Hydrancephaloid disease.

PSEUDO-FEVER, Irritation, morbid.

PSEUDOGEUSIA, *Pseudogeusis*, *Pseudogeusia*, from *ψεύδης*, 'false,' and *γεύσις*, 'taste.' *Hallucinatio gustus*. False taste.

PSEUDOGEUSTIA, Pseudogeusia.

PSEUDOHELMINTHES, Ectozoa.

PSEUDOLI'EN, *Pseudosplen*, from *ψεύδης*, 'false,' and *lien*, 'spleen.' Glands situate in the neighborhood of the spleen; probably, lymphatic glands.

PSEUDOMECHOACANA, *Convolvulus panduratus*.

PSEUDOMEDICUS, Charlatan.

PSEUDOMELANOTIC FORMATIONS, see *Anthracosis*.

PSEUDOMELANOTIC MENIX, Membrane, false — p. *Metamorphosis polyposa*, polypus.

PSEUDOMEMBRANA, Membrane, false.

PSEUDOMEMBRANE, Membrane, false.

PSEUDONARCISSUS, *Narcissus pseudonarcissus*.

PSEUDONOMA'NIA, from *ψεύδης*, 'false,' and *mania*. A form of insanity, which is characterized by a morbid propensity for lying.

PSEUDO-PARASITES, Ectozoa.

PSEUDOPERIPNEUMONIA, *Peripneumonia notha*.

PSEUDOPHLOGOSIS VENTRICULI RESOLUTIVA ET COLLIQUATIVA, *Gastromalacia*. **PSEUDOPHTHISIS**. 'False phthisis.' Emaciation occasioned by other cause than organic lesion of the lungs.

PSEUDOPLAS'MATA, from *ψεύδης*, 'false,' and *πλασσω*, 'I form.' A term applied to malignant heterologous tumours. — Vogel.

PSEUDOPLEURITIS, *Pleurodynia* — p. *Polypi*, see *Polypii* — p. *Pyrethrum*, *Achillea ptarmica* — p. *Spleen*, *Pseudolien*.

PSEUDOPNEUMONIA, *Peripneumonia notha*.

PSEUDOPNEUMONITIS, *Peripneumonia notha*.

PSEUDOPSIS, *Pseudoblepsia*.

PSEUDORASIS, *Pseudoblepsia*.

PSEUDOREX'IA, *Pseudorex'is*, from *ψεύδης*, 'false,' and *ορέξις*, 'appetite.' False appetite.

PSEUDO-RHONCHUS, from *ψεύδης*, 'false,' and *ρῶγχος*, 'rattle.' A sound heard during respiration, which appears to be produced, like the

ordinary rhonchi, in the air-tubes, but is exterior to them—as in the case of *pleural pseudorhonchi*. See *Rattle*, and *Râle*.

PSEUDOSCOP'IC, *Pseudoscop'icus*, from *ψεύδης*, 'false,' and *σκοπεω*, 'I view.' Conveying false impressions to the eye; as where projecting surfaces are seen depressed, and conversely.

PSEUDOS'MIA, *Pseudosphre'sia*, *Pseudosphre'sis*, from *ψεύδης*, 'false,' and *οσμη*, 'smell.' False sense of smell.

PSEUDOSPHERIA, *Pseudosmia*.

PSEUDOSYPHILIS, *Syphilis pseudosyphilis*.

PSEUDOTHANATOS, *Asphyxia*.

PSEUDOVARIOLÆ, *Varicella*.

PSEUDYMEN, Membrane, false.

PSID'IUM POMIF'ERUM. The *Apple Guava*, *Guava*. *Guayava*. *Ord.* *Myrtaceæ*. This plant and *P. Pyrif'erum* bear fruits; those of the former like apples,—of the latter like pears. The apple kind has an acid flavour, the other is sweet.

Of the inner pulp of either, the natives of the Indies make jellies; and, of the outer rind, tarts, marmalades, &c. They are somewhat astringent; this quality, indeed, exists in every part of the tree, and abundantly in the leaf-buds, which are occasionally boiled with barley and liquorice as an excellent drink in diarrhoea. A simple decoction of the leaves is said to be useful in the itch, and most cutaneous eruptions.

PSILOISIS, Depilation.

PSILOTHRUM, *Bryonia alba*, *Depilatory*.

PSIMMYTHON, *Plumbi subcarbonas*.

PSOA, *Dysodia*.

PSOÆ, *Psœia*, *Psœæ*, *ψοαί*, see *Lumbi*, 'the loins.' The psœæ muscles; *Alop'eces*, *Nephrom'e'tra*, *Neurom'e'teres*.

PSOAS-MAGNUS, *Psoas seu lumbaris inter' nus*, *Femur moventium sextus*, *Præ-lombo-trochantin*, *Præ-lombo-trochantiniën* (Ch.). A muscle, seated on the lateral parts of the lumbar portion of the vertebral column; and passing down to the superior and anterior part of the thigh. It is long, fusiform, and attached, above, to the body and transverse processes of the first four lumbar vertebrae, and last dorsal. Below, it terminates, by a very thick tendon, common to it and the iliacus muscle, — which is inserted into the top of the lesser trochanter. This muscle bends the thigh upon the pelvis, and carries it in rotation outwards. It may, also, bend the pelvis on the thigh, and the loins on the pelvis. It acts considerably in station and progression.

PSOAS PARVUS, *Præ-lombo-pubien*, (Ch.) A muscle situate anteriorly to the last. It is long, thin, flat, and narrow; and is attached, above, to the body of the last dorsal vertebra, and below, to the linea ileo-pectinea, by means of a slender tendon, which furnishes two expansions — one to the *Iliac aponeurosis*, and the other to the *pelvis*. This muscle bends the vertebral column on the pelvis; and, reciprocally, the pelvis on the vertebral column.

PSODYMUS, *Gastrodidymus*.

PSOΛÆ, *Psœæ*.

PSOÏTE, *Psœitis*.

PSOÏTIS, *Inflammatio mus'culi Psoas*, *Lumbago inflammatoria spasmod'ica*, (F.) *Psœite*, *Inflammation du muscle Psoas*. From *ψοαί*, 'the loins,' 'the psœæ muscles,' and *itis*, denoting inflammation. Inflammation of the psœas muscles and of the parts situate before the lumbar vertebrae: accompanied, from its commencement, by considerable fever, violent pains in the part affected and in the thigh of the same side, which remains commonly half bent. Psœitis may terminate by suppuration, and form a lumbar abscess.

PSOΛĒ, *ψωλη*, 'the male organ.' Also, the glans when uncovered.

PSOLON, Membrosus.

PSOLON'CUS, from *psole*, and *ογκος*, 'a tumour.' Swelling of the glans, or of the penis generally.

PSOLUS, from *psole*. One who has the glans uncovered. One who has been circumcised.

PSOPHOMETER, Stethoscope.

PSOPHOS, *ψοφος*, 'a noise.' A loud noise; a hollow sound.

PSORA, from *ψωω*, 'I rub gently.' *Scabies*, *Phlysis* seu *Ecpye'sis Scabies*, *Scabiola*, *Itch*, *Scotch*, *Scotch fiddle*, (Prov.) *Ichet*, *Scrat*, (Sc.) *the Reif*, *Youk*, *Yuke*, (F.) *Gale*, *Mal Saint-Main*, *Rogue*. A contagious eruption of very minute pimples—pustular, vesicular, papular, intermixed, and alternating, itching intolerably and terminating in scabs. It seems to be connected with an insect of the genus *Acarus*;—the *Acarus* seu *Sarcoptes* seu *Sarcoptes* seu *Phthirium* seu *Cheyletus Scabiei*, *Acarus Ciro*, *Itch-insect*, *Itch-animalcule*, *Itch mite*, (F.) *Ciron*. The itch occupies, particularly, the spaces between the fingers, the back of the hands, wrists, elbows, axillæ, groins, hams, &c., and rarely affects the face. The best applications, for its cure, are,—the *Unguentum Sulphuris* or *Ung. Sulph. comp.* night and morning; but the unpleasant smell of the sulphur has given occasion to the use of other means;—as the *White Hellebore*, *Potass in deliquescence*, *Muriate of Ammonia*, *Sulphuric Acid*, &c. The repugnance to the smell of sulphur ought not, however, to be regarded; especially as, in the course of four or five days, it will, in almost all cases, produce a perfect cure.

PSORA AGRIA, Psoriasis inveterata.

PSORA EBRIO'RUM, *Drunkard's Itch*. An eruption, attended by afflicting itching, to which elderly people, who have been much addicted to drinking alcoholic liquors, are liable.—Darwin.

PSORA LEPROSA, Psoriasis—p. Squamosa, Psoriasis.

PSORALEA, Psoralea pentaphylla.

PSORA'LEA GLANDULO'SA, from *ψωραλεος* 'scurfy or scaly,' in reference to its scurfy glands or dots. *Albaquill'a*. *Ord.* Leguminosæ. *Sex. Syst.* Diadelphia Decandria. A shrub, used in Chili as a vulnerary. The Paraguay tea is referred to it by M. Lenoble, of Montevideo. See *Ilex Paraguensis*.

PSORA'LEA PENTAPHYL'LA, *Psora'lea*, *Contrayer'va nova*, *Mex'ican Contrayer'va*. The root is little, if at all, inferior to the contrayer'va in its medical properties; which, by the by, are unimportant.

PSOENTERIA, Cholera.

PSORI'ASIS, (same etymon as Psora,) formerly, the state of being affected with *ψωρα*. *Lepido'sis psori'asis*, *Serp'edo*, *Serpi'go*, *Impeti'go* (of some), *Scabies sic'ca* seu *feri'na*, *Psora lepro'sa* seu *squamo'sa*, *Scaly Tetter*, *Dry Scall*, *Dry Scall*, (F.) *Dartre squameuse lichenoïde*, *D. écailleuse*, *Gratelle*, *Gale miliare*, *G. canine* ou *sèche*. A cutaneous affection, consisting of patches of rough, amorphous scales; continuous, or of indeterminate outline; skin often chappy. Psoriasis occurs under a considerable variety of forms. The surface, under the scales, is more tender and irritable than in lepra, which psoriasis, in some respects, resembles. Dr. Willan has given names to eleven varieties of psoriasis: the chief of which are the *Psoriasis gutta'ta*, *P. diffu'sa* (one form of which is the *Baker's Itch* and *Grocer's Itch*; and another, the *Washerwoman's Scall*), the *P. gyra'ta*, and *P. invetera'ta* seu *Psora a'gria*. The treatment of irritable psoriasis must be antiphlogistic, with the internal use of the fixed alkalies, sulphur, &c. They do better without any local application. The more local and less inflammatory are ameliorated by emollient and

soothing applications; or by slightly stimulating means, sea-bathing, the *Ung. hydrarg. nitrico-oxyd.*, *Ung. oxid'i zinci*, &c.

PSORIC, *Psor'icus*, (F.) *Psorique*, *Galez*; from *ψωρα*, 'itch.' That which has the nature of itch. A medicine for curing the itch.

PSOROCOMIUM, from *ψωρα*, 'the itch,' and *κομω*, 'I take care of.' An hospital for those affected with itch.

PSOROPHTHALMIA, Ophthalmia tarsi—p. Neonatorum, see Ophthalmia (purulenta infantum).

PSYÆ, Psœæ.

PSYCHAGOGA, Psychagogica.

PSYCHAGO'GICA, *Psychago'ga*, from *ψυχη*, 'life,' and *αγω*, 'I lead.' Medicines which resuscitate, when life seems extinct; as in syncope and apoplexy.

PSYCHE, Anima.

PSYCHIA'TER. Same etymon as the next. One who treats diseases of the mind—a *Mad-doctor*, (F.) *Médecin de fous*, *Aliéniste*.

PSYCHIATRIA, from *ψυχη*, 'mind,' and *ιατρεία*, 'healing.' Treatment of diseases of the mind.

PSY'CHICAL, *Psychicus*, from *ψυχη*, 'mind.' That which relates to the mind or mental endowments. *Psycholog'ical* is not unfrequently used with the like signification.

PSYCHOLOGICAL, see Psychological.

PSYCHOL'OGY, *Psycholog'ia*, from *ψυχη*, 'mind,' and *λογος*, 'discourse.' A treatise on the intellectual and moral faculties. Also, the intellectual and moral faculties or sphere.

PSYCHONOSOL'OGY, *Psychonosolog'ia*, from *ψυχη*, 'mind,' *νοσος*, 'disease,' and *λογος*, 'a description.' The doctrine of, or a treatise on, diseases of the mind.

PSYCHOPATHIES, Psychoses.

PSYCHORAGES, *Agoni'zans*, *Moribundus*, *Mor'ibund*, *Fey*, *Fee*, *Fie*, from *ψυχη*, 'mind,' 'life,' and *ραγη*, 'rupture.' Dying; in *Articulo Mortis*, "in the article of death;" in *extremis*. *Moribund* means, also, one who is dying.

PSYCHORAGIA, Agony, Death.

PSYCHORRHAGIA, Agony, Death.

PSYCHOS, Cold.

PSYCHO'SES, from *ψυχη*, 'mind.' Neuroses of the intellect. Diseases of the mind. *Psychop'athies*.

PSYCHOTHERAPEIA, from *ψυχη*, 'mind,' and *θεραπεω*, 'I attend upon the sick.' Treatment of disease through the mind.

PSYCHOTICA, Analeptica.

PSYCHOTRIA, Analeptica—p. Crocea, Pali-courea crocea—p. Emetica, Ipecaouanha.

PSYCHOTROPHUM, Beticonia officinalis.

PSYCHROLU'SIA, *Psychrolu'tron*, from *ψυχος*, 'cold,' and *λουω*, 'I wash.' A cold bath.

PSYCHROPHOB'IA, from *ψυχος*, 'cold,' and *φοβος*, 'fear.' Dread of cold, especially of cold water. Impressibility to cold.

PSYCHTICA, Refrigerants.

PSYDRA'CIA, *quasi*, *ψυκρα* 'υδρακια', 'cold drops,' from *ψυδραξ*, *ψυδρακος*, 'a small blister or pimple.' The ancients sometimes used this term for *pimples*; at others, for *vesicles*. Willan and Bateman define *Psychradium* to be, a small pustule, often irregularly circumscribed, producing but a slight elevation of the cuticle, and terminating in a laminated scab. Many of the *psychradia* usually appear together, and become confluent; and, after the discharge of pus, they pour out a thin, watery humour; which frequently forms an irregular incrustation. Frank limits the term to a psoriform eruption, which differs from itch in not originating from an insect, and is not contagious;—perhaps the lichen. Authors have differed regarding its acceptance.

PSYDRACIA ACNE, Acne.

PSYLLIUM, Plantago psyllium—p. Erectum, Plantago psyllium.

PTARMICA, Achillea ptarmica—p. Montana, Arnica montana.

PTARMICUM, Errbine, Sternutatory.

PTARMOS, Sneezing.

PTELEA, Ulmus.

PTELEA TRIFOLIA'TA, *Shrubby trefoil, Swamp dogwood, Stinking ash, Stinking prairie bush, Wingsed;* indigenous. Order, Xanthoxylaceæ. Flowering in June. Is said to be possessed of antiperiodic virtues, and to be anthelmintic.

PTERIS, Polypodium filix mas.

PTERIS AQUILI'NA, (περῦξ, 'a wing,' from the shape of its leaves.) *Pter'ia, Thelyp'teris, Filix Nymphaea seu fœmin'ea, Asple'num aquil'num, Common Brake or Female Fern; Eagle Fern, Bracken, (F.) Fougère femelle, La grande Fougère.* Nat. Ord. Filices. The root is considered to be anthelmintic; and as efficacious as that of the male fern in cases of tapeworm.

PTERIS PALUSTRIS, Asplenium filix fœmina.

PTERNA, Calcanæum.

PTERNIUM, Calcanæum.

PTERNOBATES, Calcigradus.

PTEROCARPUS ERINACEA, see Kino—p. Marsupium, see Kino—p. Sandalinus, P. Santalinus.

PTEROCARPUS SANTALI'NUS, *P. Sandali'nus, (περῦν, 'a wing,' and καρπός, 'fruit,') Sant'alum seu San'dalum Rubrum, Red Sanders or Saunders Tree, (F.) Santal rouge.* Ord. Leguminosæ. Ser. Syst. Diadelphia Decandria. Red Saunders wood, *Sant'alum, (Ph. U. S.) Lignum sandali'num* is used only as a colouring matter: it gives to rectified spirit a fine deep red. The juice of this tree, like that of *P. Draco*, affords a species of *Dragon's Blood*.

PTEROCALON PYCNOSTACH'YUM, *Conj'za pycnostach'ya, Black root;* indigenous. Order, Compositæ. The root is used as an alterative in the form of decoction. It is said to be possessed of cathartic properties.

PTEROS'PORA ANDROMEDE'A, (περῦρον, 'a wing,' and σπορά, 'seed,' in allusion to the singular wing borne by the seeds,) *Scaly Dragon claw, Dragon root, Fever root, Albany beechdrop.* An indigenous plant. Nat. Ord. Monotropeæ, Ser. Syst. Decandria Monogynia:—found in the State of New York, which blossoms in July. The root has been regarded as an anthelmintic, diuretic, emmenagogue, &c.: but is not used.

PTERYG'ION, *Pteryg'ium, Ala,* from περῦξ, περῦγος, 'a wing.' A small wing. *Web, Onyx, Pyl'osis, Unguis, (F.) Drapeau, Onglet.* A varicose excrescence of the conjunctiva, of a triangular shape, and commonly occurring at the inner angle of the eye; whence it extends over the cornea. Sometimes two or three pterygia occur on the same eye, and cover the whole cornea with a thick veil, which totally prevents vision. According to Scarpa, the ancients gave the name *Pannic'ulus* to this last complication. If the pterygion cannot be dispelled by means of discutient collyria, it must be removed by the scissors.

PTERYGIUM, Pterygion, Scapula—p. Digni, Paronychia—p. Lardaceum, Pinguicula—p. Pinguicula.

PTERYGO, in the composition of anatomical terms, means relating, or appertaining, to the pterygoid processes.

PTERYGO-ANGULI-MAXILLARE, Pterygoideus internus—p. *Colli-maxillaire, Pterygoideus externus*—p. *Maxillaire, grand, Pterygoideus internus*—p. *Maxillaire, petit, Pterygoideus externus*—p. Palatine canal, Pterygoid canal—p. Pharyngeus, Constrictor pharyngis—p. Staphylinus, Circumflexus.

PTERYGO-PAL'ATINE, *Pterygo-Palati'nus.* That which belongs to the pterygoid process and palate.

PTERYGO-PALATINE ARTERY or *Superior pharyngeal* is a very small artery, and is given off by the internal maxillary at the bottom of the zygomatic fossa: after having passed through the pterygo-palatine canal, it is distributed to the superior part of the pharynx, the sphenoid bone, and the Eustachian tube.

PTERYGO-PALATINE CANAL. A small canal, formed by the internal ala of the pterygoid process, and the palate bone. It gives passage to the vessels of the same name.

PTERYGO-STAPHYLINUS INTERNUS, Levator palati—p. *Syndesmo-staphyli-pharyngien, Constrictor pharyngis.*

PTERYGOIDES, Alatus.

PTERYGOID, *Pterygoid'es, Pterygoïde'us, Aliform'is;* from περῦξ, περῦγος, 'a wing,' and εἶδος, 'form.' A name given to two processes at the inferior surface of the sphenoid bone; the two laminae which form them having been compared to wings. These *alæ* or wings or processes,—*Processus aliform'es*,—have been distinguished, according to their position, into *internal (ento-ptyergoid)* and *external*.

PTERYGOID ARTERY, *Vid'ian Artery, Ram'ulus Duct'is Pterygoïde'i, Arteria pharyngea supra'ma,* arises from the internal maxillary artery, at the bottom of the zygomatic fossa, and enters the pterygoid canal with the nerve of the same name, to proceed to be distributed on the Eustachian tube and velum palati. The name, *ptyergoid arteries*, is likewise given to the branches, which the internal maxillary and some of its divisions, as the meningeæ media, and posterior temporalis profunda, furnish to the pterygoid muscles, behind the neck of the lower jaw.

PTERYGOID BONE, Sphenoid.

PTERYGOID CANAL, *Vid'ian canal, Ductus pterygoïdeus, Canalis Vidia'nus, (F.) Conduit ptérygoïdien ou Vidien, Pterygo-palatine canal,* is a narrow channel, which traverses, in a direction from before to behind, the base of the pterygoid process, and gives passage to the pterygoid nerve. The foramina of the sphenoid, which terminate the canals, have the same epithets applied to them.

PTERYGOID FOSSA, *Fossa Pterygoïde'a, (F.) Fosse ptérygoïdienne ou ptérygoïde,* is the depression which separates the two laminae or alæ of the pterygoid process.

PTERYGOID MUS'LES, *Ala'res mus'culi, Aliform'es mus'culi,* are two in number. 1. The *Pterygoideus externus seu minor, (F.) Ptérygocolli-maxillaire, Petit Pterygo-maxillaire (Ch.), Petit ptérygoïdien, Ptérygoïdien externe,* is a thick, short muscle, which arises, by short aponeuroses, from the outer surface of the external ala of the pterygoid process, and from the outer surface of the great ala of the sphenoid bone; and is inserted at the anterior part of the neck of the lower jaw-bone, and the corresponding part of the inter-articular fibro-cartilage. This muscle draws the condyle of the lower jaw and the inter-articular ligament forwards. It carries the chin forwards, and to the opposite side. If the two external pterygoids act together, the jaw is carried directly forwards. 2. The *Pterygoïdeus internus seu major, Mass'eter internus, Lutens in Ore, (F.) Grand Ptérygo-maxillaire, Ptérygoanguli-maxillaire, Grand Ptérygoïdien ou Ptérygoïdien interne.* A thick, quadrilateral muscle, which is attached by short and very strong aponeuroses; above, to the pterygoid fossa, whence it proceeds downwards, backwards, and outwards, to be inserted into the inner surface of the ramus of the lower jaw, near its angle. This muscle

raises the lower jaw, and carries it a little forwards. It also performs the grinding motion.

PTERYGOID NERVES. These are two in number. I. The *Pterygoid* or *Vidian Nerve*. It arises from the posterior part of the sphenopalatine ganglion; traverses the Vidian canal of the sphenoid; and, beyond, divides into two filaments. 1. A *superior* or *cranial, Nervus superficialis sive petrosus*, which ascends into the cranium, and enters the hiatus of Fallopius to unite with the facial nerve. 2. An *inferior* or *carotid, Nervus profundus* sive *major*, which traverses the carotid canal, and unites with the ascending branches of the superior cervical ganglion of the trisplanchnic. II. The *Pterygoid Nerve*, properly so called, *Nervus musculi pterygoidei*, is given off by the inferior maxillary branch of the 5th pair.

PTERYGOID PROCESSES, see *Pterygoid*.

PTERYGOÏDIEN GRAND ou INTERNE, *Pterygoideus internus*—*p. Externe, Pterygoideus externus*—*p. Petit, Pterygoideus externus*.

PTERYGO'MA, from *περυξ, περυγος*, 'a wing; a projecting or pendulous body.' A swelling of the vulva, which prevents coition.—M. A. Severinus.

PTERYX, Ala.

PTILOSIIS, Deplumatio, Madarosis.

PTISANA, Tisane—*p. Communis, Decoctum hordei compositum*—*p. Hippocratica, Decoctum hordei*.

PTISSANA, Tisane.

PTOCHIA'TER, *Ptochia'trus*, from *πωχος*, 'poor,' and *ιατρος*, 'a physician.' A physician to the poor, or to an establishment for the poor.

PTOCHIATRIA. Practice amongst the poor. Also, an institution for the treatment of the diseases of the poor.

PTOCHOCOMI'UM, from *πωχος*, 'a poor person,' and *κομω*, 'I take care of;' *Ptochodochi'um, Ptochei'um, Ptochotrophe'mor*. An almshouse. An hospital for the poor.

PTOCHODOCHIUM, *Ptochocomium*.

PTOCHOTROPHEUM, *Ptochocomium*.

PTOMA, Cadaver.

PTOSIS, *πτωσις*, Prolapsus—*p. Bulbi oculi, Exophthalmia*.

PTOSIS I'RIDIS, *Iridoce'le, Her'nia* seu *Prolapsus Iridis, Iridopto'sis*, from *πτωσις*, 'a falling.' A prolapsus of the iris through a wound of the cornea. It is known by a blackish tubercle, which projects a little from the cornea in various forms.

PTOSIS PALPEBRÆ, Blepharoptosis.

PTYALAGOGUE, Sialogogue.

PTYALIN, see *Saliva*.

PTYALISM, Salivation.

PTYALISME, Salivation—*p. Mercuriel, Salivation, mercurial*.

PTYALISMUS, Salivation—*p. Acutus mellitus*, see *Salivation*—*p. Acutus sympatheticus*, see *Salivation*—*p. Hydrargyratus, Salivation, mercurial*—*p. Iners, Slaving*—*p. Mercurialis, Salivation, mercurial*—*p. Pyrosicus, Pyrosis*.

PTYALOGOGUE, Sialogogue.

PTYALON, Saliva.

PTYASMAGOGUE, Expectorant, Sialogogue.

PTYELON, Saliva, Sputum.

PTYSIS, Exspuition.

PTYSMA, Saliva, Sputum.

PTYSMAGOGUE, Sialogogue.

PTYSMATIS'CHESIS, *Ptysmatos'chesis*, from *πρωμα*, 'sputum,' and *ισχειν*, 'to retain.' Suppression of pulmonary expectoration.

PTYSMATOSCHESIS, *Ptysmatichesis*.

PUANTEUR, Dysodia.

PUBENS, Ephebus.

PUBER, Ephebus.

PUBERAL; same etymon as *Puberty*. Re-

lating or appertaining to the age of puberty—as 'a *puberal* disease.'

PUBÈRE, Ephebus.

PUBERTAS, Ephebia.

PUBERTY, *Pubertas, Hebē, Pubes, Aphrodis'ia, Ephebi'a, Ephe'bia, Ephe'botes, Ephebo'synē, Pubes'cence*, from *pubescere*, 'to begin to have hair on the chin and sexual organs.' The period of life at which young people of both sexes are *pubes'cent* or *nubile*. According to the civil law, puberty occurs at 12 years in females, and 14 in males. The period varies somewhat in different climates, and in different individuals of the same climate.

PUBES, *Pubis, Epis'ch'ion, Cteis, Pecten;* the *Pubic region*. Same etymon. The middle part of the hypogastric region; so called, because it is covered with hair, in both sexes, at the period of puberty. The hair is also called *Pubes, Lanu'go* seu *Pili, Pudendo'rum, Planta'rium*; and, of old, *Epicten'ion* and *pubertas* signified the same. See *Tressoria*.

PUBES, *Puberty*.

PUBESCENCE, *Puberty*.

PUBESCENT, see *Puberty*.

PUBLÆUS, *Pubic*.

PUBIC, *Pub'ian, Pub'icus, Pubic'us*, (F.) *Pubis*. That which belongs to or concerns the *pubis*.

PUBIC ARCH, *Arch of the Pubis*, (F.) *Arcad's pubienne*. The arch at the anterior part of the inferior circumference of the pelvis. It is more expanded in the female than in the male; to correspond with the additional functions which she has to execute.

PUBIC ARTICULA'TION, *Sym'physis Pubis*, results from the junction of the ossa *pubis*. The medium of union is cartilage.

PUBIC LIG'AMENTS are two very solid, fibrous fasciæ, situate before and beneath the symphysis *pubis*, which they strengthen. The one is called the *anterior pubic ligament*; the other the *inferior* or *subpubic*.

PUBIC REGION, *Re'gio Pubis*. The region of the *pubes*.

PUBIEN, *Pubic*.

PUBIO-COCCYGIEN-ANN'ULAIRE, *Pubio-coecyge'us annula'ris*. Dumas gave this name to the levator ani and ischio-coecygens, which he considers a single muscle.

PUBIO-COCCYGIEN-ANNULAIRE, *Levator Ani*—*p. Femoral, Pectinalis*—*p. Femoralis, Adductor longus femoris*—*p. Umbilical, Pyramidalis abdominis*—*p. Prostaticus, Compressor prostatæ*—*p. Sous-umbilical, Pyramidalis abdominis*—*p. Sternal, Rectus abdominis*—*p. Urethral, see Compressor Urethræ*.

PUBIS, *Pubes*.

PUBIS OS, *Os Pec'tinis, Epise'ion, Episi'on, Epis'chion, Share Bone, Bar-bone*, (Sc.) *Ark-bein*. The anterior part of the os *innominatum*; so called because it corresponds to the genital organs and *pubic region*. The *angle of the pubis* is formed by the union of the body and rami of each side.

PUBLICÆ PARTES. 'Public parts.' Those organs are so called, the object of whose functions is the nutrition of all the others. Such are the digestive and respiratory organs.

PUCCOON, *Sanguinaria Canadensis*—*p. Red, Sanguinaria Canadensis*—*p. Yellow, Hydrastis Canadensis*.

PUCE, *Pulex irritans*—*p. de Bourgogne*, see *Anthrax*—*p. Maligne*, see *Anthrax*—*p. Péné-trante, Chique*.

PUCELAGE, *Virginity*.

PUCELLE, *Virgin*.

PUCHA-PAT, *Pogostemon patchouli*.

PUCHURY, see *Pichurim beans*.

PUCHYRY, see Pichurim beans.

PUCKLE, Papula.

PUDDING-GRASS, *Mentha pulegium*.

PUDDING-PIPE TREE, *Cassia fistula*.

PUDENDA, Genital organs—p. Virorum, Pubilia.

PUDEND'AGRA. A hybrid word; from *pudenda*, (*pudere*, 'to be ashamed,') 'the genital organs,' and the Greek *agra*, 'a seizure.' According to some, this term means pain in the genital parts: *Dolor pudendorum*, *Men'tulagra*, *Ædeodyn'ia*; according to others, it is synonymous with syphilis.

PUDENDAGRA PRURIENS, Prurigo pudendi muliebris.

PUDEND'AL, *Pudenda'lis*. Relating or appertaining to the pudenda.

PUDEND'AL HER'NIA. Hernia, which descends between the vagina and ramus ischii, and forms an oblong tumour in the labium; traceable in the pelvis as far as the os uteri.

PUDENDALIS, Pudendal.

PUDENDALIS LONGUS INFERIOR, see Sciatic nerve, lesser.

PUDENDUM, FEMALE, Vulva—p. Muliebre, Vulva.

PUDENDUS, Pudic.

PUDIBIL'IA; from *pudere*, 'to be ashamed.' The male genital organs; *Genitalia Viri*, *Viril'ia*, *Pensil'ia*, *Instrumen'ta*, *Puden'da viro'rum*, *Pondus*.

PUDIC, *Pudic'us*, *Puden'dus*, (F.) *Honteux*. Same etymon. That which causes shame. A name given to the genital organs as well as to different other parts.

PUDIC ARTERIES are distributed to the organs of generation. They are,—1. The *internal Pudic*, *Arteria Pud'ca*, *A. puden'da commun'is*, (F.) *Artère honteuse interne*, *A. Sous-pubienne* (Ch.), *Genital Ar'tery*. It is furnished by the hypogastric, and divides into two branches; the one — the *inferior* or *perineal* — which gives off the inferior hemorrhoidal and the artery of the septum; the other — the *superior*, (F.) *Ischiopénienne* — which furnishes the transverse perineal artery, and divides into two branches; the *artery of the corpus cavernosum*, and the *dorsalis penis*. This latter, in the female, has the name *Dorsal'is Clitor'idis*. 2. The *external Pudic Arteries*, (F.) *Artères scrotales ou vulvaires* (Ch.), *A. honteuses externes*, which are two in number. The one is *superficial* or *subcutaneous*, and the other *deep-seated* or *subaponeurotic*. They are given off from the femoral artery, or some one of its branches; and are distributed to the external parts of generation.

PUDIC NERVE, (F.) *Nerf honteux* or *ischio-pénién* or *Ischio-clitorien*, is a branch furnished by the sacral plexus, which is distributed to the genital organs; and, especially, to the penis in man, and the clitoris in the female.

PUERILE, *Pueril'is*, from *puer*, 'a child,' (F.) *Puéril*. Appertaining or relating to childhood. *Respiration puérile* or *exagérée* or *supplémentaire* or *hypervésiculaire*:—a term applied to the respiration when it is heard loud through the stethoscope, as in healthy children.

PUERILITAS, Dementia of the aged.

PUERTIA, see Age.

PUER'PERA, from *puer*, 'a child,' and *parere*, 'to bring forth.' *Tokas*, *Lochos*, *Enix'a*, *Lecho*, a *lying-in woman*, (F.) *Femme en Couché*, *Accouchée*. A female in child-bed. One recently delivered.

PUER'PERAL, *Puerpera'lis*; from *puerpera*. Relating to parturition and its consequences.

PUER'PERAL CONVULSIONS, *Eclampsia gravidarum* et *parturientium*.

PUER'PERAL FEVER. Any fever occurring

during the puerperal state—*Febris puerpera'rus*, *Lechop'gra*, *Lochiocal'itis*, *Lochiop'gra*, *Lochop'gra*, *Child-bed fever*. Most commonly restricted to a malignant variety of peritonitis.

PUERPERIUM, Child-bed state.

PUERPERIUS, Parturient.

PUFF, *Lycoperdon*.

PUFF, VEILED, see *Cavernous respiration*.

PUFF-BALL, *Lycoperdon*, *Leontodon taraxacum*.

PUFFINESS, from (D.) *poffen*, 'to blow.' *Infla'tio*, *Suffla'tio*, *Tumefac'tio mollis*, (F.) *Bouffissure*, *Boursouffure*. A soft intumescence, without redness, which may be partial or general, and be produced by accumulation of serous fluid, extravasation of blood, effusion of air into the subcutaneous areolar tissue, &c. Puffiness is most frequently seen in the face and legs; and sometimes appears around a wound.

PUGIL'LUS, *Drax*, *Dra'chion*, diminutive of *pugnus*, 'the fist.' *Dragma*, *Dragma*, (F.) *Pisécé*. The quantity of any substance, which may be taken with the ends of two or three fingers. The eighth part of a handful.

PUGTEETH, Canine teeth.

PUISSANCE DU MOULE INTÉRIEUR. Plastic force.

PUKE, Emetic.

PUKEWEED, *Lobelia inflata*.

PUKING, Vomiting, Regurgitation.

PULEGIUM, *Mentha pulegium*—p. *Cervinum*. *Mentha cervina*.

PULEX IRRITANS. The *common flea*, (F.) *Puce*. A parasitic insect found on the bodies of man and animals.

PULEX PENETRANS, *Chique*.

PULICARIA DYSENTERICA, *Inula dysenterica*.

PULICA'RIS, *Pulicula'ris*, (F.) *Pulicaire*, from *pulex*, *pulicis*, 'a gnat.' An epithet given to cutaneous eruptions resembling gnat-bites;—and, also, to diseases in which such eruptions occur.

PULICARIS HERBA, *Plantago psyllium*.

PÛLLNA, PILNA or BILNA, MINERAL WATERS OF. These well known bitter Bohemian springs contain sulphates of soda and magnesium, and chloride of magnesium.

PULMO, (pl.) *Pulmo'nes*; by transposition of the letter *l* from *pleumon*, *πλεμων*; *Pneumon*, *Pleumon*, *Spiramentum an'imæ*, *Ergasterion spir'itis*, *Flabell'um et ventila'brum cordis*, *Lights*. The essential organ of respiration, which is double, and occupies the two sides of the chest. The lungs, which are of a spongy, soft, flexible, compressible, and dilatable structure, fill exactly the two cavities of the thorax, and are separated from each other by the mediastinum and the heart. The right lung, which is shorter and broader than the left, is divided, by two oblique fissures, into three unequal lobes, *Lobi seu Ala pulmo'rum*. The left has only two lobes, and consequently only one fissure. At the internal surface of those organs, which is slightly concave, there is, about the middle, a pedicle, formed by the bronchia and pulmonary vessels, and called, by anatomists, the *root of the lungs*, (F.) *Racine des Poumons*. Essentially, the lungs are composed of prolongations and ramifications of the bronchia, and of the pulmonary arteries and veins,—the divisions of which are supported by a fine, areolar tissue.

When the surface of the lungs is examined in a clear light, we may see, even through the pleura, that their parenchyma is formed by the aggregation of a multitude of small vesicles, of an irregularly spheroid or ovoid shape, full of air, and separated by white and opaque septa, constituting lozenge-shaped spaces, which are called *lobules*—

lobuli seu *in'sula pulmonales*—and which are separated by interlobular areolar tissue. These lobules do not communicate with each other. The vesicles are called *Air-cells*, *Spiramenta* seu *Spiramina* seu *Cellulae Pulmonum*. Along the partitions or septa is deposited, in greater or less quantity, *black pulmonary matter*, (F.) *Matière pulmonaire noire*, as it has been called, which seems to be natural. Sometimes it is seen in points; at others, in spots. The colour of the lungs varies according to age and other circumstances. In youth, it is more red; and afterwards, grayish or bluish; often, as if marbled. The pleura pulmonalis is their investing membrane. The air is carried to the lungs by means of the trachea and bronchia. The black venous blood, which requires oxygenation, is conveyed to them from the heart, by the pulmonary artery; and when it has undergone this change, it is returned to the heart by the pulmonary veins. The blood-vessels inservient to the nutrition of the lungs are the *bronchial arteries* and veins. The pulmonary lymphatics are very numerous. Some are superficial; others, deep-seated. They pass, for the most part, into the *bronchial ganglions* or *glands*. The nerves are furnished by the pulmonary plexus.

PULMOMETER, Spirometer.

PULMETRY, see Spirometer.

PULMONAIRE, Pulmonaria—*p. en Arbre*, Lichen pulmonaria—*p. de Chêne*, Lichen pulmonaria—*p. des Français*, Hieracium murorum.

PULMONARIA, *P. Officinalis* seu *Maculata* seu *Maculosa*, *Lungwort*, *Spotted Lungwort*, *Jerusalem Cowslip*, *Jerusalem Sage*, *Spotted Comfrey*, (F.) *Pulmonaire*, *Sauge de Jerusalem*. Ord. Boraginaceæ. Ser. Syst. Pentandria Monogynia. The leaves of this plant have been used as demulcents and pectorals; partly from their resemblance to lungs—hence the name, from *pulmo*, *pulmonis*, 'the lung'—and partly because they have a slightly mucilaginous taste. The plant is not worthy of notice.

PULMONARIA, Pneumonia—*p. Arborea*, Lichen pulmonarius—*p. Gallica*, Hieracium murorum—*p. Officinalis*, Pulmonaria—*p. Virginica*, Mertensia Virginica.

PULMONARY, *Pulmonaris*, *Pulmonalis*, from *pulmo*, *pulmonis*, 'the lung.' That which relates or belongs to the lungs. A name given to various parts.

PULMONARY ARTERY, *Arteria pulmonaris*, *Vena arteriosa*, arises from the upper and left part of the right ventricle of the heart; whence it passes obliquely upwards and to the left side; dividing into two trunks, opposite the second dorsal vertebra—one passing to each lung. At its origin, it is furnished with three sigmoid or semilunar valves. It carries the blood to the lungs for aeration.

PULMONARY MATTER, BLACK, see Pulmo.

PULMONARY PLEXUS, *Plexus pulmonaris*. A considerable nervous network, situate behind the bronchia, which is formed by the filaments of the pneumogastric nerve or par vagum, and by other filaments from the inferior cervical ganglion and the first thoracic ganglia. This plexus forms a kind of areolar web, with numerous meshes of different sizes, in which vessels are lodged, surrounded by much areolar tissue. This plexus sends filaments to the bronchia, which they accompany to their extremities.

PULMONARY VEINS, *Venæ pulmonares*, *Arteriarum venosæ*. These arise in the lungs from the final terminations of the arteries of the same name; collect in ramusculi and rami of greater and greater size, and ultimately unite in four trunks; two of which issue from each lung to

open into the left auricle of the heart. The pulmonary veins have the same structure as the other veins of the body; from which they differ, in conveying arterial blood, as the pulmonary artery differs from the others in conveying venous blood. They carry the blood back to the heart after aeration.

PULMONES TARTARIZATI, Lithiasis pulmonum.

PULMONIA, Phthisis pulmonalis, Pneumonia. PULMON'IC, *Pulmon'icus*, *Pneumon'icus*, *Pulmonarius*, *Pneumon'ic*, (F.) *Pulmonique*, *Pneumonique*. Same etymon as Pulmonary. One affected with phthisis—one labouring under diseases of the lungs. Any thing relating or belonging to the lungs. A medicine for the lungs.

PULP, *Palpa*, *Palpa'men*, *Sarx*, (F.) *Pulpe*, *Pulpolite*. The soft and parenchymatous parts of vegetables reduced to a paste by the operation of pulping. Applied, also, to parts of the human body, which have the characters of, or resemble a pulp.

PULP OF THE FINGERS, (F.) *Pulpe des doigts*. The fleshy extremity of the fingers.

PULP OF THE TOOTH, Dental pulp.

PULPA CASSIÆ, see Cassia fistula—*p. Dentis*, Dental pulp—*p. Pili*, see Hair—*p. Pruni*, see Pruni pulpa—*p. Prunorum sylvestrium condita*, *Conserva pruni sylvestris*—*p. Tamarindi*, see Tamarindi pulpa.

PULPA TESTIS, *Parenchyma testis*. The parenchyma of the testis.

PULPAMEN, Pulp.

PULPATION, Pulping.

PULPE, Pulp—*p. Cérébrale*, see Cerebrum—*p. Dentaire*, Dental pulp—*p. des Doigts*, Pulp of the fingers.

PULPEUX, Pulpy.

PULPEZIA, Apoplexy.

PULPING, *Pulpa'tion*, *Pulpa'tio*. An operation—the object of which is to reduce certain vegetable substances to a pulp. For this purpose, they are bruised in a mortar, and then passed through a hair sieve, by the aid of a wooden spatula, called a *Pulper*, (F.) *Pulpoire*.

PULPOIRE, see Pulping.

PULPOLITE, Pulp.

PULPY, *Pulposus*, (F.) *Pulpeuz*. Full of pulp.

PULQUE, see Agave Americana.

PULS EX OVIS et LACTE, Oogala.

PULSATIF, Throbbing.

PULSATILLA NIGRICANS, Anemone pratensis—*p. Patens*, Anemone patens—*p. Praten-sis*, Anemone pratensis—*p. Vulgaris*, Anemone pulsatilla.

PULSATILLE NOIRE, Anemone pratensis—*p. des Prés*, Anemone pratensis.

PULSATIO, Pulsation—*p. Cordis*, Palpitation.

PULSA'TION, *Pulsa'tio*, *Sphygmos*, *Sphyxis*, *Pede'sis*, *Pedeth'mos*, (F.) *Battement*. The beating of the heart and arteries. Also, the beating felt in an inflamed part.

PULSATIVUS, Throbbing.

PULSATORY, Throbbing.

PULSE, from *pulso*, 'I beat;' *Pulsus*, *Pulsa'tio*, *Pulsus* seu *Ictus cordis et arteriarum*, *Incur'sus arteriarum*, *Sphygmos*, *Sphygma*, *Diasphyxis*, (F.) *Pouls*. Beating of the arteries, produced by the afflux of the blood propelled by the heart in its contractions. For the sake of convenience, we choose the radial artery at the wrist to detect the precise character of the pulse. These characters relate to the number of pulsations in a

given time; to their degrees of quickness; hardness and strength; to the equality or inequality either of the pulsations themselves or of their intervals; to the development or fulness of the

artery, and to the different impressions it may produce on the finger.

The following estimates have been made of the pulse at various ages:

Ages.	Number of Beats per minute, according to		
	HEBERDEN.	SÖMMERING.	MÜLLER.
In the embryo.....			150
At birth.....	130 to 140		Do.
One month.....	120		
One year.....	120 to 108	120	115 to 130
Two years.....	108 to 90	110	100 to 115
Three years.....	90 to 80	90	90 to 100
Seven years.....	72		85 to 90
Twelve years.....	70		
Puberty.....		80	80 to 85
Adult age.....		70	70 to 75
Old age.....		60	50 to 65

It does not appear that the pulse of the aged is less frequent, but the contrary. In general it is more frequent in females and in irritable persons, than in males and those of an opposite temperament. In the healthy state, the pulse, besides having the proper number of pulsations, is neither hard nor unusually soft; it is moderately developed; of a medium strength; and perfectly equal, both as regards the pulsations and their intervals. In diseases it wanders, more or less, from these physiological conditions. The different characters of the pulse that have been recorded, are remarkably numerous. In a dictionary, it is necessary to detail them, although many of them are not now regarded, and some are ridiculous.

PULSE, ARDENT, *Pulsus ardens*, (F.) *Pouls ardent, Pouls élevé*. One which seems to raise itself to a point in order to strike the finger.

PULSE, CAP'RIZANT, *Pulsus Caprizans seu dorcadis'sans seu gazell'ans seu fusalis, Goatleap pulse*, (F.) *Pouls caprisant*. One which seems to leap, as it were; an imperfect dilatation of the artery being succeeded by a fuller and a stronger one.

PULSE, COMPLEX, (F.) *Pouls combiné ou composé, P. compliqué*. A pulse which has the character of several critical pulses united.

PULSE, CONTRACT'ED, (F.) *Pouls serré ou concentré*. One whose pulsations are narrow, deep, and slightly hard.

PULSE, CONVUL'SIVE, *Pulsus convulsivus*, (F.) *Pouls convulsif*. That which is unequally frequent or unequally hard; in short, which resembles the irregular pulsations of a muscular fibre in a state of convulsion.

PULSE, CRIT'ICAL, *Pulsus criticus*. A pulse which, after having possessed the characters of irritation, becomes free, open, soft, &c.

PULSE, DECURTATE, *Pulsus myurus*: see, also, *Myurus*.

PULSE, DEEP, *Pulsus profundus*, (F.) *Pouls profond*. One which cannot be felt without difficulty, and without strong pressure by the finger.

PULSE, DEFIC'IENT, *Pulsus deficiens seu anmens et circumnuens, P. Flickering*, (F.) *Pouls défaillant, P. insensible*. One which seems, every instant about to cease.

PULSE, DEPRESSED, *Pulsus depressus*, (F.) *Pouls déprimé*. That which is deep and weak.

PULSE, DEVEL'OPED, (F.) *Pouls développé*. That which is broad, full, strong, and frequent.

PULSE, DICROT'IC, *Pulsus Di'croetus seu bicrotus seu intestinalis seu bif'reus seu molle'ris seu intercus' seu duplex*, (F.) *Pouls dicrote ou redoublissant ou redoublé*. That in which the finger

is struck twice at each pulsation; once lightly, the other time more strongly.

PULSE, EQUAL, *Pulsus equalis*. That in which the pulsations resemble each other, and return at equal intervals.

PULSE, FEBRILE, *Pulsus febrilis*. One very frequent.

PULSE, FEEBLE, *P. Weak, Pulsus debilis*, (F.) *Pouls faible*. One which strikes the finger feebly.

PULSE, FIL'IFORM, *P. thready*. One which resembles a thread slightly vibrating.

PULSE, FLICKERING, *Pulse, deficient*.

PULSE, FORM'ICANT, *Pulsus formicans*, (F.) *Pouls formicant*. One which resembles, by being small and scarcely perceptible, the motion of an ant.

PULSE, FREQUENT, (F.) *Pouls agité ou précipité*. One which strikes more frequently than usual in a given time.

PULSE, FULL, *Pulsus plenus*, (F.) *Pouls plein*. One which gives the notion of great repletion in the vessel.

PULSE, GOAT-LEAP, *P. Caprizant*.

PULSE, GUT'TURAL, *Pulsus gutturalis*, (F.) *Pouls guttural*. A pulse which has been supposed to indicate the termination of affections of the throat.

PULSE, HARD, *Pulsus durus*, (F.) *Pouls dur*. That in which the pulp of the finger seems to yield to the pulsation.

PULSE, HECTIC, *Pulsus hecticus*. The weak, frequent pulse observed in hectic fever.

PULSE, HEMORRHOID'AL, (F.) *Pouls des Hé-morrhoides*. A critical pulse, announcing the appearance of the hemorrhoidal flux. It is described as unequal;—the pulsations not being alike in force, and still less the intervals.

PULSE, HEPAT'IC, (F.) *Pouls du Foie*. A pulse imagined to indicate affections of the liver. It is not worthy of description.

PULSE, INF'E'RIOR, (F.) *Pouls inférieur ou abdominal ou central*. One supposed to announce evacuations below the diaphragm.

PULSE, INTERCUR'RENT, *Pulsus intercurrens seu intercidens*. One in which a superfluous pulsation seems to occur from time to time.

PULSE, INTERMITTENT, (F.) *Pouls intercadent*. One in which the pulsations fail from time to time.

PULSE, INTES'TINAL, (F.) *Pouls des intestins, P. de la diarrhée*. A critical pulse, presumed to announce an evacuation by the intestines.

PULSE, IN'TRICATE, *Pulsus intricatus*, (F.) *Pouls embarrassée*. That which is but little developed and unequally slow.

PULSE, IRREG'ULAR, *Pulsus anormalis*. One

whose pulsations are unequal, and return at unequal intervals.

PULSE OF IRRITATION, *Pulsus ab irritatio'nē seu nervi'nus seu aerit'icus*. One which is frequent, hard, and contracted.

PULSE, JARRING, *P.* vibrating—*p.* Jerking, Pulse, sharp.

PULSE, LANGUID, (F.) *Pouls languissant*. A slow and feeble pulse.

PULSE, LARGE, *Pulsus crassus seu magnus*, (F.) *Pouls grand*, *P. large*. That which is large and full.

PULSE, LONG. One which strikes the finger to a great extent in length.

PULSE, LOW, *Pulsus humilis*, (F.) *Pouls bas*. One in which the pulsations are scarcely perceptible.

PULSE, NASAL, (F.) *Pouls nasal ou capital ou du Nez*. One supposed to announce the end of an irritation in the nasal fossæ.

PULSE, NATURAL, (F.) *Pouls naturel des adultes ou parfait ou des adultes ou modéré*. One that is equal and regular in strength and frequency; compressible, and devoid of hardness.

PULSE, ORGANIC, (F.) *Pouls organique*. One which indicates the affected organ, or the organ by which an evacuation will take place.

PULSE, PECTORAL, (F.) *Pouls de l'expectoration*. A critical pulse, announcing the termination of some pulmonary irritation.

PULSE, QUICK. One which strikes sharply, but not forcibly, against the finger.

PULSE, REGULAR, *Pulsus normalis seu regularis*. One whose pulsations are equal, and succeed each other at equal intervals.

PULSE, RESISTING, (F.) *Pouls résistant*. One a little tense, a little hard.

PULSE, SHARP, (F.) *Pouls prompt ou vite ou vif*. One which strikes the finger sharply, rapidly. When to a greater extent, it is called a *jerking pulse*.

PULSE, SHARP-TAILED, *Pulsus myurus*: see Myurus.

PULSE, SIMPLE, *Pulsus simplex*. A critical pulse, indicating an evacuation by one organ only.

PULSE, SLOW, *Pulsus tardus seu rarus*, (F.) *Pouls lent ou tardif ou rare*. One which strikes the finger slowly.

PULSE, SMALL, *Pulsus parvus*, (F.) *Pouls petit*. One whose pulsations are slender and weak.

PULSE, SOFT, *Pulsus mollis*, (F.) *Pouls mou*. One which yields under the finger.

PULSE, STOMACHAL, (F.) *Pouls stomacal ou de l'estomac*. One supposed to announce an evacuation by the stomach.

PULSE, STRONG, *Pulsus fortis*, (F.) *Pouls fort*, *P. véhément*. One which strikes the finger strongly.

PULSE, SUPERIOR, *Pulsus Superior*, (F.) *Pouls supérieur*. A critical pulse, supervening on irritation of organs situate above the diaphragm.

PULSE, SUPPLE, *Pulsus elasticus*, (F.) *Pouls souple*. One in which the pulsations have strength without hardness.

PULSE OF SWEAT, *Pulsus Sudoralis*, (F.) *Pouls Sudoral ou de la sneur*. A critical pulse, indicating an approaching perspiration.

PULSE, TENSE, *P. Cordy*, *Pulsus tensus*, (F.) *Pouls tendu*, *P. roide*. One in which the artery resembles a cord fixed at its two extremities. When resembling a wire, it is called *wiry*.

PULSE, THREADY, *P.* filiform.

PULSE, TREMULOUS, *Pulsus tremulus*, (F.) *Pouls tremblant ou palpitant*. One in which each pulsation oscillates.

PULSE, UN'DULATING, *Pulsus fluctuosus seu fluens seu inē'dens Solani*, (F.) *Pouls ondulant*

ou *ondoyant*. One which resembles, in its movements, those of the waves.

PULSE, UNEQUAL, *Pulsus inæqualis*, (F.) *Pouls inégal*. One whose pulsations are not alike, or return at unequal intervals.

PULSE, URINAL, *Pulsus urinalis*, (F.) *Pouls de l'Urine*. A critical pulse, fancied to denote an approaching evacuation of urine.

PULSE, UTERINE, *Pulsus uteri'nus*, (F.) *Pouls Utérine ou de la Matrice ou des Régles*. One which indicates the flow of the menses, or the occurrence of metrorrhagia.

PULSE, VAGINAL, *Pulsus vaginalis*. The pulsation of the arteria vaginalis, which is increased in pregnancy, during abortion, labour, &c.

PULSE, VENOUS, *Pulsus venarum*.

PULSE, VERMICULAR. That which imitates the movement of a worm.

PULSE, VIBRATING, *Jarring Pulse*. One in which the artery seems to vibrate like a musical string.

PULSE, WIRY, see Pulse, tense.

PULSELESS, *Asphyctos*, Devoid of pulsation.

PULSELESSNESS, *Asphyxia*.

PULSEY, Cataplasm.

PULSIFIC, *Pulsificus*; from *pulsus*, 'pulse.' That which causes or excites pulsation.

PULSILEGIUM, *Pulsilegium*, *Pulsimeter*, from *pulsus*, 'the pulse,' and *lego*, 'I read,' *Sphygmolegium*, *Sphygmoneter*, *Sphygmoscopium*. Any instrument for measuring the quickness or force of the pulse.

PULSIMANTIA, from *pulsus*, and *μαντεια*, 'divination.' The art of predicting or prognosticating by the pulse.

PULSIMETER, *Pulsilegium*.

PULSUS, Pulse—*p.* Acreticus, Pulse of irritation—*p.* Æqualis, Pulse, equal—*p.* Annuens et circumnuens, Pulse, deficient—*p.* Anormalis, Pulse, irregular—*p.* Bicrotus, Pulse, dicrotic—*p.* Biferiens, *P.* dicrotic—*p.* Caprizans, Pulse, caprizant—*p.* Cordis, see Heart—*p.* Crassus, Pulse, large—*p.* Debilis, Pulse, feeble—*p.* Deficiens, Pulse, deficient—*p.* Dicrotus, Pulse, dicrotic—*p.* Doreadissans, Pulse, caprizant—*p.* Duplex, Pulse, dicrotic—*p.* Durus, Pulse, hard—*p.* Elasticus, Pulse, supple—*p.* Fluctuosus, Pulse, undulating—*p.* Fluens, Pulse, undulating—*p.* Formicans, Formicant, and Pulse, formicant—*p.* Fortis, Pulse, strong—*p.* Fusalis, Pulse, caprizant—*p.* Gazellans, Pulse, caprizant—*p.* Heterochronicus, see Heterochronicus—*p.* Humilis, Pulse, low—*p.* Incidens Solani, Pulse, undulating—*p.* Intercidens, Pulse, intercurrent—*p.* Mallearis, Pulse, dicrotic—*p.* Intercisus, Pulse, dicrotic—*p.* Intereurrens, Pulse, intercurrent—*p.* Intestinalis, Pulse, dicrotic—*p.* Intricatus, Pulse, intricate—*p.* Magnus, Pulse, large—*p.* Mollis, Pulse, soft.

PULSUS MYURUS, *Pulse decurtate or sharp-tailed*, (F.) *Pouls myure*. One which goes on diminishing. See Myurus.

PULSUS NERVINUS, Pulse of irritation—*p.* Normalis, Pulse, regular—*p.* Parvus, Pulse, small—*p.* Plenus, Pulse, full—*p.* Rarus, Pulse, slow.

PULSUS SERRINUS, (F.) *Pouls serrin ou serratile*. One which strikes, sometimes strongly, at others feebly, and recalls the idea of a saw.

PULSUS STRIATUS, (F.) *Pouls étroit*. One that strikes the finger to a small extent in breadth.

PULSUS SUDORALIS, Pulse of sweat—*p.* Tardus, Pulse, slow—*p.* Urinalis, Pulse, urinal—*p.* Uterinus, Pulse, uterine.

PULSUS VACUUS, (F.) *Pouls vide*. One which gives the idea of emptiness of the artery.

PULSUS VAGINALIS, Pulse, vaginal.

PULSUS VENA'RUM, *Venous Pulse*, *Phlebopatia*. A pulsation occasionally noticed in the jugular veins. It is owing to some of the blood of the right ventricle reflowing into the right auricle,

and communicating an impulse to the venous blood arriving in the auricle through the descending cava. It is often a sign of impediment to the flow of blood along the pulmonary artery.

PULTA'CEOUS, *Pulta'ceus*, (F.) *Pultacé*, from *puls*, *pultis*, 'pap,' or from *pultare*, *pultatum*, 'to beat.' Resembling pap. Having a softened, semifluid appearance.

PULTATIO, *Atheroma*.

PULTISE, *Cataplasm*.

PULTICULA, *Bouillie*.

PULVERES EFFERVESCENTES, *Powders*, *soda*.

PULVERIZABLE, *Pul'verable*. From *pulvis*, *pulveris*, 'dust.' Capable of being reduced to powder.

PULVERIZATION, *Pulverisatio*, *Pulveratio*, *Coniostosis*, (F.) *Pulvérisation*. The operation of dividing substances, so as to reduce them to powder.

Most drugs are reduced to powder by persons who make it a special business, and who are called *drug grinders*. This is done on a large scale in *drug mills*; and the implements used are the *grinding mill* and the *stamping mill*. In the shop of the apothecary, pulverization is effected by the *pestle* and *mortar*, and the *sieve*.

Where substances require the addition of other bodies to facilitate their reduction to powder, — as where camphor needs a few drops of alcohol — the process is called *pulverization by mediation*.

PULVÉROLÉS, see *Pulvis*.

PULVERULENT, *Pulverulentus*, from *pulvis*, *pulveris*, 'dust.' Reduced to the state of a fine powder. Covered, as it were, with dust. An epithet applied to the eyes when they appear dirty, and, as it were, sprinkled with dust, by reason of granulations or grayish striae, resulting from thickening of the mucous fluid of the conjunctiva. — *Nysten*.

PULVILLUS, *Pad*, *Bourdonnet* — p. e *Lina-*
mentis confectus, *Bourdonnet* — p. *Rotundus*,
Bourdonnet.

PULVINAR, *Pulvinarium*. A pillow.

PULVINAR HUMULI, see *Humulus lupulus*.

PULVINAR MEDICATUM seu *MEDICINA'LE*, *Sac-*
culus medicina'tis. A medicated pillow; as of
hops.

PULVINAR PARVUM, *Pad* — p. *Ventriculi*, *Pan-*
creas.

PULVIS, *Conis*, *Powder*, (F.) *Poudre*. A substance, reduced into small particles by pulverization. *Simple powders* are those of a single substance; *compound*, those which result from a mixture of several different powders. An *impalpable powder* is one which is so fine that it can scarcely be felt under the finger. *Compound powders* have been called *Species*, (F.) *Espèces*, *E. pulvérolentes*, *Pulvérolés*.

PULVIS ABSORBENS, P. de *magnesiâ compos.* — p. *Adpersorius*, *Catapasma* — p. *Alexiterius*, P. *ipeca-*
anhæ compositus — p. *Algothi*, *Algoth*.

PULVIS ALOES COMPOSITUS, P. *Aloës cum*
Guaia'co, P. *aloët'icus cum Guaia'co*, *Compound*
powder of Aloes. (*Aloës*, \mathfrak{z} iss, *guaiac. res.* \mathfrak{z} j, *pulv. cinnam. comp.* \mathfrak{z} ss.) Rub the aloes and
guaiacum separately, then mix the whole. (*Ph. L.*)
Cathartic, *stomachic*, and *sudorific*. Dose, gr. x
to \mathfrak{z} j.

PULVIS ALOES CUM CANELLÂ, P. *aloës et can-*
nellæ, (Ph. U. S.), P. *Aloët'icus*, *Powder of Aloes*
with Canella, *Species Hi'erae pieræ*, *Hi'era pieræ*,
vulg. *Hi'cry pi'cry*, *Pieræ*, and *Pi'cry*. (*Aloës*
 \mathfrak{b} j, *canell.* \mathfrak{z} ij.) Rub separately into a powder,
and mix. (*Ph. U. S.*) A warm *cathartic*. Dose,
gr. x to \mathfrak{z} j.

PULVIS ALOES CUM GUAIA'CO, P. A. *composi-*
tus — p. *Aloeticus*, P. *aloes cum canellâ* — p. *Alo-*

d'ipecacuanha et d'opium ou *de Dover*. (*Ipecacuanh. pulv.*, *opii pulv.*, sing. ʒj , *potassæ sulphat.* ʒj . *Mix.* *Diaphoretic.* Dose, gr. v to gr. xij.

PULVIS IPECACUANHÆ ET OPII, *P. ipecacuanhæ compositus*.

PULVIS JALAPÆ COMPOSITUS, *P. Diaturpethi compositus* seu *laxans* seu *purgans* seu *laxativus* seu *vegetabilis* seu *laxans cum salè* seu *Jalapæ salinus* seu *Jalapæ tartar'icus*, *Species Diagalapæ*, *Compound Powder of Jalap.* (*F.*) *Poudre de jalap composée*. (*Pulv. jalap.* ʒj , *potass. bitart.* ʒij . *Mix.*) Cathartic. Dose, ʒj to ʒij .

PULVIS JALAPÆ SALINUS, *P. jalapæ compositus*—*p. Jalapæ tartaricus*, *P. jalapæ compositus*—*p. de Jalapâ et scammonio compositus*, *P. scammonæ comp.*—*p. Jamesii*, *Antimonial powder*—*p. Jesuiticus*, *Cinchona*—*p. Joannis de Vigo*, *Hydrargyri nitrico-oxydum*.

PULVIS KINO COMPOSITUS, *Compound Powder of kino*, (F.) *Poudre de kino composée*, (*Kino ʒxv*, *cinnam.* ʒiv , *opii duri* ʒj . Rub each to powder, and mix. *Ph. L.*) Astringent. Dose, gr. v to xx.

PULVIS LAXANS, *P. jalapæ compositus*—*p. Laxans cum sale*, *P. jalapæ compositus*—*p. Laxativus vegetabilis*, *P. jalapæ compositus*.

PULVIS DE MAGNESIÂ COMPOSITUS, *P. Galactopæus* seu *Nutri'cum* seu *Infant'um* seu *Infantum antac'idus* seu *pro Infantibus* seu *antiac'idus* seu *absorbens* seu *epilepticus* *Marchionum*, *Compound Powder of Magnesia*, (F.) *Poudre absorbante et anti-acide*. (*Magnesiæ*, *sacchar.* ãã p. æ. *Mix. Ph. P.*)

PULVIS MANTUANUS, *P. contrayervæ comp.*—*p. Marchionis*, *Marchionis Pulvis*—*p. Mercurialis cinereus*, *Hydrargyri oxidum cinereum*—*p. ad Mucum pulmonalem liberius ciendum*, *P. de sulphure et scillâ*.

PULVIS MYRRHÆ COMPOSITUS, *P. e Myrrhâ compositus* seu *ad ul'cera tend'inum* seu *emmenagogus*, *Compound Myrrh Powder*, (F.) *Poudre Balsamique*. (*Myrrhæ*, *sabinæ*, *rutæ*, *custor. Russ.* ãã ʒj .) A stimulant, antispasmodic, and emmenagogue. Dose, gr. xv. to xl.

PULVIS NUTRICUM, *P. de magnesiâ compositus*—*p. Opiatus*, *P. cernu usti cum opio*—*p. Oxydi stibii compositus*, *P. cornachini*—*p. ad Partum*, *Ergot*—*p. Parturiens*, *Ergot*—*p. de Phosphate calcis et stibii compositus*, *Antimonial powder*—*p. Principis*, *Hydrargyri nitrico-oxydum*—*p. Purgans*, *P. jalapæ compositus*—*p. Quercetanus*, *Hydrargyri submuriæ*.

PULVIS QUERCUS MARIÆ, *Powder of Yellow Bladder-Wrack*. (The wrack in fruit, dried, cleaned, exposed to a red heat in a crucible with a perforated lid, and then reduced to powder. *Ph. D.*) Virtues dependent on iodine: used, consequently, in bronchocele, &c. Dose, gr. x to xl. See *Fucus vesiculosus*.

PULVIS RHEI COMPOSITUS, *Compound Powder of Rhubarb*. (*Magnes. lbj*, *zingib. pulv.* ʒij , *rhei pulv.* ʒiv . *M. Ph. E.*) An antacid and laxative. Dose, ʒj to ʒij .

PULVIS SALINUS COMPOSITUS, *Compound Saline Powder*. (*Sodii chlorid.*, *magnesiæ sulphat.*, ãã ʒiv , *potas. sulphat.* ʒij . *Ph. E.* Dose, as an aperient, two or three drachms dissolved in water.

PULVIS SCAMMONIÆ COMPOSITUS, *P. e Scammonio compositus* seu *Scammonii* seu *de Jalapâ et Scammonio compositus* dictus *Catharticus*, *Compound Powder of Scammony*, (F.) *Poudre cathartique* ou *Poudre de Scammonée composée*. (*Scammon.*, *ext. jalap. dur.*, sing., ʒij , *zingib.* ʒss . Rub separately to powder, and mix. *Ph. L.*) Cathartic. Dose, gr. viij to gr. xv.

PULVIS SCAMMONII CUM ALOË. *P. e Scammonio cum Aloë*, *Scammony and Aloes Powder*. (*Scammon.* ʒvj , *ext. jalap. dur.*, *aloes Socotr.* ãã ʒiiss , *zing.* ʒss .) Cathartic. Dose, gr. x to xv.

PULVIS SCAMMONII ANTIMONIALIS, *P. cornachini*.

PULVIS SENNÆ COMPOSITUS, *P. e Sennâ compositus seu e Senâ compositus seu Diase'næ*, *Compound Powder of Senna*, (F.) *Poudre de séné composée*. (*Sennæ, potass. supertart.*, sing., ʒij, scammon. ʒss, zingib. ʒij. *Ph. L.*) Cathartic, hydragogue. Dose, ʒj to ʒj.

PULVIS DE SENNÂ, SCAMMONIÆ ET LIGNIS COMPOSITUS dictus ANTIARTHRITICUS PURGANS, (F.) *Poudre de Pérad*. (*Gum Arab., potass. supertart., fol. sennæ, chinæ, aâ 4 p., scammon., rad. sarsapar., chinæ. guaiac. lign. aâ 2 p., fiat pulvis. Ph. P.*) Purgative. Used to obviate gout. Dose, ʒi.

PULVIS STANNI, see Tin—*p. Sternutatorius*, *P. asari compositus*—*p. Stibiatius*, Antimonial powder—*p. Stypiticus*, *P. Sulphatis aluminæ compositus*—*p. Sudorificus*, *P. ipecacuanhæ comp.*—*p. Sudorificus Doveri*, *P. ipecacuanhæ compositus*.

PULVIS SULPHATIS ALUMINÆ COMPOSITUS, *P. aluminosus seu aluminis kinosatus seu stypiticus seu aluminis compositus, Alumen kinosatum, Compound Alum Powder*, (F.) *Poudre stypitique ou d'alum composée*. (*Sulphatis aluminæ, p. iv, kino, p. l. Ph. E.*) Astringent. In intestinal hemorrhage and diarrhœa. Dose, gr. x to xv.

PULVIS DE SULPHURË ET SCILLÂ, *P. antiasthmaticus seu incisivus seu ad mucum pulmonalem liberius cien'dum*, (F.) *Poudre incisive ou anti-asthmaticque*. (*Sacchar., p. 3, sulphur. lot. p. 2, scillæ. siccata. p. j. Ph. P.*) Dose, gr. v to ʒss.

PULVIS DE SULPHATË POTASSÆ COMPOSITUS, *P. temperans Stahlîi*, (F.) *Poudre tempérante de Stahl*. (*Potass. sulph., p. nitrat. aâ 9 p., hydrarg. sulph. rubr. 2 p. Mix. Ph. P.*) As an antiphlogistic, and in acidity of the first passages. Dose, ʒj to ʒij.

PULVIS E SULPHURE TO HYDRARGYRI NIGRO ET SCAMMONIO, dictus VERMIFUGUS MERCURIALIS, (F.) *Poudre vermifuge mercurielle*. (*Pulv. cornachin., hydrarg. sulphuret. nigr. recent. præp., aâ p. æ. Mix. Ph. P.*) Dose, ʒj to ʒss.

PULVIS SYMPHATICUS, Sympathetic powder—*p. Temperans Stahlîi*, *P. de sulphate potassæ compositus*—*p. Terrestriis*, *P. cretæ compositus*.

PULVIS TRAGACANTHÆ COMPOSITUS, *P. e Tragacanthâ compositus, Species Diatrageant'he frig'idæ, Compound Powder of Diatragean*, (F.) *Poudre de gomme adragant composée*. (*Tragacanth. contus., acaciæ cont., amyli, sing., ʒiss, sacch. purif. ʒij. Ph. L.*) Demulcent. In coughs, &c. Dose, ʒss to ʒij.

PULVIS DE TRIBUS, *P. cornachini*—*p. Tonquiniensis*, *P. Cobbii*—*p. ad Ulcera tendinum*, *P. myrrhæ compositus*—*p. Vermifugus absque mercurio*, *Pulvis ex helminthocorto comp.*—*p. Vermifugus mercurialis*, *P. e sulphureto hydrargyri nigro et scammonio*—*p. Vite Imperatoris*, *P. cinnamomi compositus*.

PUMEX, *Lapis pumiceis, Punice*, (F.) *Pierre Ponce*. This was formerly employed as a desiccative and dentifrice.

PUMICE, *Pumex*.

PUMILIO, *Nanus*.

PUMILUS, see *Nanus*.

PUMMEL-FOOT, *Kyllosis*.

PUMP, BREAST, *Antlia lactea*—*p. Stomach, Stomach pump*.

PUMPKIN, *Cucurbita pepo*.

PUNÂ, (S.) *Veta, Sorocco, Soroche, Mareo; Hypsonosus, Mountain Sickness*, (F.) *Mal de Montagne*. A sickness common in the elevated districts of South America and elsewhere, which attacks those unaccustomed to breathe the rarefied atmosphere. It strongly resembles sea-

sickness, with a most acute and depressing throbbing in the head. It does not often affect the respiration greatly.

PUNAISE, *Cimex*.

PUNAISE, *Ozæna*.

PUNCH, Rhi'ssgra, from *pungere, punctum*, 'to prick.' *Repulso'rium*, (F.) *Répossoir*. A surgical instrument used for extracting the stumps of teeth. See *Lever*.

Also, an agreeable alcoholic drink, made of spirit, wine, sugar, lemon juice, and water. Milk is sometimes substituted in part for the water: it then forms *Milk Punch*.

PUNCTA OSSIFICATIONIS, *Ossification*, points of.

PUNCTÆ MUCOSÆ, see *Acne*.

PUNCTICULA, *Petechiæ*.

PUNCTIO, *Paracentesis, Puncture*—*p. Nervi, Neuronygme*.

PUNCTUM, *Stitch*.

PUNCTUM AU'REUM, *Punctura aurea*. Formerly, when an intestinal hernia was reduced by an incision made through the integuments down to the upper part of the spermatic vessels, a golden wire was fixed and twisted, so as to prevent the descent of any thing down the tunica vaginalis. Hence the term.

PUNCTUM CÆCUM, see *Optic nerve*—*p. Lacrymale, Lacrymal punctum*.

PUNCTUM SA'LIENTIS, *P. sanguineum salientis, Globulus sanguineus, Punctus ruber salientis*. The first moving point which makes its appearance after the fecundation of the germ. It has been generally, but erroneously, applied to the heart of the embryo.

PUNCTURA, *Paracentesis*—*p. Aurea, Punctum aureum*.

PUNCTURE, *Punctura, Punctio, Cente'sis, Paracente'sis, Nyxis*, from *pungere, punctum*, 'to prick.' *Tresis Punctura*, (F.) *Pique*. A wound made by a pointed instrument as a sword, bayonet, needle, thorn, &c. A puncture is, generally, of trifling consequence; but, sometimes, it becomes important from the parts implicated, and the after consequences.

PUNCTURING. Same etymon. *Compunctio, Paracente'sis*. (F.) *Ponction*. The operation of opening, by means of a trocar, lancet, &c., any natural or accidental cavity, with the view of evacuating any fluid, effused or accumulated therein. *Parucentesis* is a sort of puncturing.

PUNCTUS RUBER SALIENTIS, *Punctum salientis*.

PUNGENT, (F.) *Pongitif*. Same etymon. Pain is said to be pungent, when it seems as if a pointed instrument were forced into the suffering part.

PUNICA GRANATUM. The *Pomegranate, Rhœa, Rhœa, Granatum, Malogranatum*, (F.) *Grenadier: Ord. Myrtacææ. Sex. Syst. Icosandria Monogynia*. The rind of the fruit, called *Malico'rium, Malacorium, Malicorium, Granati Fructus Cortex* (Ph. U. S.); and the flowers—called *Balaustine flowers*—are used in medicine. They have been employed both internally and externally as astringents. The seeds are called *Cocco'nes, kokkoves*. The portion, however, of the plant, that has attained most celebrity, is the bark of the root, *Granati Radicis Cortex* (Ph. U. S.), which appears to be very efficacious in tœnia. It is given in decoction, (*Granat. rad. cort. ʒij; Aquæ Oij*, boiled to Oiss.) Dose, fʒij, every half hour. Three or four doses are usually sufficient to expel the worm.

The bark contains a peculiar matter called *Grenadin*.

PUNK, *Boletus ignarius*.

PUOGENIA, *Pyogenia*.

PUPIL, *Pupilla, Pupula, Pupilla, Vis'io*,

Opsis, Corz, Cora, Rhox, Fenes'tra seu Nigrum seu Foramen Oculi, Prunella, Lumen, Glené, Sight or Apple or Ball of the eye, (Sc.) Blak of the Eie, (Prov.) Candle, (F.) Pupille, Prunelle. The aperture of the iris, through which the rays of light pass that have to impress the image of an object on the retina. This aperture can be dilated or contracted so as to allow a greater or smaller quantity of luminous rays to penetrate. The pupil, in man, is round, and by it the anterior and posterior chambers of the eye communicate with each other. In the fetus, during the first six months of gestation, it is closed by the pupillary membrane.

PUPIL, CLOSURE OF THE, Synechisis.

PUPIL, PINHOLE. A condition of the pupil in typhus, in which it is so contracted as to resemble a pinhole. It indicates a dangerous form of brain affection.

PUPILLÆ VELUM, Pupillary membrane.

PUPILLARIS HERBA, Lapsana.

PUP'ILLARY, *Pupilla'ris, (F.) Pupillaire.* That which belongs to the pupil.

PUPILLARY MEMBRANE, *Membra'na Pupilla'ris, Pupill'æ velum, Membra'na Wacheudorfia'na.* The central aperture of the iris is closed, in the fetus, during a certain period of gestation, by a very thin membrane. It disappears in the seventh month.

PUPPET ROOT, *Veratrum viride.*

PUPPIS OS, Frontal bone.

PUPULA, Pupil.

PU'PULÆ, *A'pices digito'rum.* The pulps or extremities of the fingers.

PURBLIND, Myopia.

PURBLINDNESS, Myopia.

PURGAMENT, Purgative.

PURGAMENTA, Excrement — p. Alba, Leucorrhœa — p. Infantis, Meconium — p. Puerperii, Lochia — p. Uteri, Lochia.

PURGANS MEDICAMENTUM, Cathartic.

PURGATIO, Catharsis — p. Alvi, Catharsis — p. Muliebris alba, Leucorrhœa — p. Puerperii, Lochia.

PURGATION, Catharsis.

PURGATIONES, Menses — p. Menstruæ, Menses.

PURGATIONS, Menses.

PUR'GATIVE, *Purgati'vus, Purgans, Moch'licus, Catore'licus, Catoter'icus, Cathar'tic, Pur'gament, Purge, (F.) Purgatif,* from *purgare, purgatum, 'to cleanse.'* A medicine which operates more powerfully on the bowels than a laxative, stimulating the muscular, and exciting increased secretion from the mucous coat.

PURGE, Purgative — p. Root, *Euphorbia corollata.*

PURGING, Diarrhœa.

PURIF'ICANS, *Purif'icus, from purificare,* 'to make pure or clean.' Purifying; hence: —

PURIFICANTIA, Medicines that cleanse or purify the blood.

PURIFICUS, Purificans.

PUR'IFORM, *Puriform'is, from pus, puris, and forma.* Having the appearance of pus.

PURL. A medicated malt liquor, in which wormwood and aromatics are infused.

PURO-HEPATITIS, see Hepatitis.

PURO-MUCOUS, *Puro-muco'sus, from pus, puris, and mucus.* Having the character or appearance of pus and mucus.

PURPLE OF CASSIUS, (F.) *Pourpre de Cassius.* A precipitate, obtained by adding the protochloride of tin to a dilute solution of gold; or by dipping rods of tin in a solution of gold in diluted chlorohydric acid. Used in syphilis.

PURPLES, *Purpura hæmorrhagica.*

PUR'PURA, *Por'phyra, 'a purple colour.'* This word has been employed in many senses.

It generally means, livid spots on the skin from extravasated blood, with languor and loss of muscular strength, pains in the limbs. — (F.) *Pourpre.*

In PURPURA SIMPLEX, *Porph'gra simplex, Petchiæ sinè febrè, Pelio'sis, Phœnig'mus Petchia'lis, Profusio subcuta'nea, Pete'chial Scurvy,* the spots are numerous, but small and flea-bite-shaped; chiefly on the breast, arms, and legs; with paleness of countenance. At times, the affection is accompanied by severe pains in the extremities, constituting *Pelio'sis rheumat'ica.*

In PURPURA HÆMORRHAG'ICA, *Porph'gra hæmorrhag'ica, Stomac'ace universa'lis, Hæmorrhagia universa'lis, Petchiano'sis, Morbus maculo'sus hæmorrhag'icus Werlhof'ii, Pelio'sis hæmorrhag'ica, Scorbutus, Schorbutus, Hæmorrhœa petechia'lis, Hæmatospil'ia, Land Scurvy, Purples, (F.) Scorbüt, S. de Terre, Maladie de Werlhof, Hémacélinose, Pélïose hæmorrhagique* — the spots are circular, and of different sizes; often in stripes or patches, irregularly scattered over the thighs, arms, and trunk; with occasional hæmorrhage from the mouth, nostrils, or viscera, and great debility and depression of spirits.

In PURPURA NAU'TICA, *Porph'gra nautica, Scorbutus, Pechytyrbè, Gingibra'clium, Gingipe'dium, Scelotyrbè, Stomac'acè, Scorbutus nauticus, Sea scurvy, (Sc.) Scrubie, (F.) Scorbüt,* there are spots of different hues, intermixed with the livid, principally at the roots of the hair; the teeth are loose; the gums are spongy and bleeding; the breath is fetid, and the debility universal and extreme. This occurs chiefly at sea, after exposure to a moist, cold, foul atmosphere; with long use of one kind of food and of stagnant water.

All these varieties of purpura considerably resemble each other. In the first two, however, there seems, at times, to be some excitement, which has led to the employment of purgatives, and even of bleeding, with advantage. They are dependent upon a peculiar diathesis, which has been termed *Scorbütic Cachex'ia, Lues Scorbütica, and Cacoehym'ia Scorbütica.* Generally speaking, the use of the mineral acids will be indicated; and, in sea scurvy, vegetable acids must be regarded as the best antiscorbutics. Nitre is, also, a good antiscorbutic, and in cases of great prostration it may be united with cinchona or turpentine. Tamarinds and cream of tartar, made into drink, are also serviceable. But the great remedy is change from low to cheerful spirits; from filth to cleanliness; and from a cold and damp, to a temperate and dry climate, with change of food, and especially the use of green vegetables.

The general principles of management are the same in sea, as in land scurvy.

PURPURA, Scarlatina — p. Alba benigna et maligna, Miliary fever — p. Maligna, Petchiæ — p. Miliaris, Miliary fever — p. Puerperarum, Miliary fever — p. Urticata, Urticaria.

PURULENCE, Pus, Suppuration.

PURULENCY, Pus, Suppuration.

PURULENT, *Purulentus*, *Em'pyos*, *Pyo'des*, *Py'icus*, from *pus*, *puris*. That which has the character of pus or consists of pus; as *purulent matter*, a *purulent collection*, &c.

PURULENT DEPOSIT, Pus.

PURULENTIA, Suppuration.

PURVAIN, *Verbena officinalis*.

PUS, *Humor purulentus*, *Pyon*, *Pyono'ma*, *Matter*, *Pu'ru'lent depos'it*, *Pu'rulence*, *Pu'rulency*, (Sc.) *Worsum*, *Worsum*. A secretion from inflamed textures, and especially from the areolar membrane. It is, almost always, of the same nature, whatever may be the part it proceeds from. Pus of a good quality, — *laudable pus*, *Pus bonum* seu *laudabile* seu *nutritivum* seu *verum*, (F.) *Pus louable*, — is of a yellowish-white colour, opaque, inodorous, and of a creamy appearance. Heat, acids, and alcohol coagulate it. When analyzed by Schwilgué, it afforded albumen and water, a particular extractive substance, and a small quantity of soda, phosphate of lime, and other salts. Normal pus consists essentially of two distinct parts, *pus corpuscles* or *pus globules*, *Cytoid corpuscles*, (Henle) — and a colourless, aqueous fluid, *liquor puris*, in which the corpuscles are suspended. A variety of the pus corpuscles is described by M. Lebert under the name *pyoid*. Fully formed pus is plastic.

PUS BONUM, see Pus — p. Corpuscles, see Pus — p. Corrosivum, Sanies — p. Globules, see Pus — p. Laudable, see Pus — p. Louable, see Pus — p. Malignum, Ichor — p. Malignum, Sanies — p. Nutritivum, see Pus — p. Verum, see Pus.

PUSH, Pustule.

PUSILLA'TUM, *Pusula'tum*, from *pusillus*, 'small' [?]. A coarse powder.

PUSILLUS, Nanus.

PUSKILE, Pustule.

PUSTULA, Pustule — p. *Ardens*, *Eczema* — p. *Oris*, *Aphthæ* — p. *Gangrænosa*, see *Anthrax* — p. *Livida* *Esthonia*, see *Anthrax*.

PUSTULÆ SICCÆ, Lichen.

PUSTULAR, *Pustulous*, *Pustula'ris*, *Pustulo'sus*, (F.) *Pustuleux*. Of or belonging to pustules. Affected with pustules.

PUSTULA'TION, *Pustula'tio*, from *pustula*, 'a pustule.' The formation of pustules.

PUSTULE, *Puskile*, *Push*, *Pustula*, from *pus*. *Ecpye'sis*, *Ecthy'ma*, *Benath*, *Bubæ*, *Epanas'tasis*. An elevation of the cuticle, with an inflamed base, containing pus. Willan and Bateman reckon four varieties of pustules, *Phlyza'cium*, *Psydra'cium*, *Achor*, and *Favus*. The variolous pustule is often called, by the French, *Grain*; by us, *Pock*.

PUSTULE MALIGNÆ, see *Anthrax*.

PUSTULOUS, Pustular.

PUSULATUM, Pusillatum,

PUT TO BED, Deliver.

PUTAMEN OVI, see *Membrana putaminis*.

PUTIUM, Prepuce.

PUTREDO, Hospital Gangrene, Putrefaction.

PUTREFACT'ION, *Putrefac'tio*, *Putrescent'ia*. *Sepsis*, *Sap'rotes*, *Se'pedon*, *Putrid* or *Putrefac'tive fermentation*, from *putris*, *putre*, 'rotten,' and *facere*, 'to make.' A decomposition, experienced by animal substances, when deprived of life, and placed under special circumstances. The presence of water is indispensable, the temperature most favourable to it, is from 60° to 90° of Fahrenheit. The most common products of putrefaction are, water, carbonic acid, acetic acid, ammonia, carburetted hydrogen, and a semi-putrid substance, which is volatilized, and has an

infected odour. It has been supposed that something like putrefaction may occur in the living body, as in case of putrid fever. To this condition, Piorry has given the name *Typhohæ'mia*, conceiving it to be owing to alteration of the blood by putrid animal matters. *Putrefraction* signifies the state of becoming putrid: whilst *Putridity*, *Putre'do*, *Putrid'itas*, *Putridness*, (F.) *Pourriture*, is the state of rottenness.

PUTRESCENT, *Hyposaprus* — p. Poison, see Poison.

PUTRESCENTIA, Putrefaction — p. Uteri gravidi, *Hystero-malacia*.

PUTRID, *Pu'tridus*, *Sapros*, *Sepedono'des*, (F.) *Putride*, from *putreo*, 'to rot.' An epithet for some affections, in which the matters excreted and the transpiration itself exhale a smell of putridity. It is particularly applied to typhus.

PUTRIDITAS, see Putrefaction.

PUTRIDITY, see Putrefaction.

PUTRILA'GO, *Putror*, (F.) *Putrilage*. Same etymon. The pulaceous matter or *slough*, which forms in certain gangrenous and other ulcers, and is thrown off.

PUTROR, *Putrilage*.

PUTZOCHELL, see *Myroxylon Peruiferum*.

PUXIRI, see *Picharim* beans.

PYÆMIA, *Pyohæmia*.

PYAR'THRUM, from *πυον*, 'pus,' and *αρθρον*, 'joint.' A suppurated joint.

PYCNANTHEMUM INCA'NUM, (*πυχνος*, 'dense,' and *ανθερον*, 'a blossom.') *Clinopodium inca'num*, *Common Mountain Mint*, *Wild Basil*. An indigenous plant of the mint family — *Ord*. *Labiata* — which flowers in August. It has the aromatic properties of the mints.

PYCNANTHEMUM LINIFOLIUM, *Virginia Thyme*, has like virtues.

PYCNOCMASTICA, *Incrassantia*.

PYCNOSIS, *Inspissatio*.

PYCNOTICA, *Incrassantia*.

PYEC'CHYSIS, from *πυον*, 'pus,' and *εκχυσις*, 'effusion.' An effusion of pus.

PYELITIS, (F.) *Pyélite*, from *πυελος*, 'pelvis,' and *itis*, denoting inflammation. Inflammation of the pelvis and calices of the kidney.

PYELOMETER, *Pelvimeter*.

PYELONEPHRITIS, from *πυελος*, 'pelvis,' *νεφρος*, 'kidney,' and *itis*, denoting inflammation. Inflammation of the kidney, and of the pelvis and calices.

PYELOS, *Pelvis*.

PYEMESIS, *Pyemesis*.

PYESIS, *Suppuration*.

PYETIA, *Colostrum*, *Rennet*.

PYGE, *Nates*.

PYGMÆUS, *Pygmy*.

PYGME, *Fist*, *Forearm*.

PYGMÉE, *Pygmy*.

PYGYM, *Pygmy*, *Pygma'us*, (F.) *Pygmée*, from *πυγμα*, 'the fist; as big as the fist.' A dwarf. The *Pygmæi* were a fabulous nation of dwarfs in the extreme parts of India; or, according to others, in Ethiopia.

PYGODI'YMUS, *Did'yimus symphyoperina'e-us*, *Pygop'ages*, from *πυγη*, 'the nates,' and *διδυμος*, 'a twin.' A monstrosity, in which twins are united by the sacrum and coccyx.

PYGOM'ELES, (F.) *Pygonèle*, from *πυγη*, 'the nates,' and *μειλος*, 'unprofitable.' A monster with excessive growth on the nates or rump.

PYGOPAGES, *Pygodidymus*.

PYICUS, *Purulent*.

PYLE, *Porta*.

PYLEMPHRAX'IS, from *πυλη*, 'porta,' 'a gate,' and *εμφραξις*, 'obstruction.' Obstruction of the vena porta.

PYLEPHLEBITIS, from *πυλη*, 'porta,' *φλεψ*,

φλεβός, 'a vein,' and *itis*, denoting inflammation.

Inflammation of the vena porta.

PYLOR'IC, *Pyloricus*, (F.) *Pylorique*. Same etymon as pylorus. That which relates to the pylorus. An epithet given to different parts.

PYLORIC ARTERY, *Arteria Coronaria dextra*, (F.) *Petite artère gastrique droite*, arises from the hepatic, and is distributed to the pylorus and to the lesser curvature of the stomach, anastomosing, particularly, with the A. coronaria ventriculi and A. gastro-epiploica dextra.

PYLORIC VEIN follows the same distribution as the artery.

PYLORIQUE, Pyloric.

PYLO'RUS, *Janitor*, *Portonarius*, from πύλη, 'a gate,' and ούρος, 'a guardian.' *Ostium ventriculi duodenalet* seu *pyloricum* seu *dextrum* seu *inferius*, *Orificium dextrum* seu *inferius* seu *Egrediens* seu *Ostium inferius* seu *Anulus* seu *Sphincter ventriculi*, *Ostia'rius*, *Hostia'rius*, (F.) *Pyloré*. The lower or right orifice of the stomach—*Orifice intestinal* (Ch.)—is called *Pylorus*, because it closes the entrance into the intestinal canal, and is furnished with a circular, flattened, fibro-mucous ring, which occasions the total closure of the stomach during digestion in that organ. This ring has been called the *Valve of the Pylorus*, *Sphincter Pylori*, *Pylorus propriè sic dictus*, (F.) *Valvule du pylore*. It is a fold of the mucous and muscular membranes of the stomach; and is the *Pyloric muscle* of some authors.

PYO, in composition, means 'pus,' from πύον, 'pus.'

PYOBLENNICUS, Mucopurulent.

PYOBLENNORRHŒA, from *pyo*, and βλενω, 'mucus,' and ρεω, 'I flow.' A discharge of puriform mucus.

PYOCENO'SIS, from *pyo*, and κενωσις, 'evacuation.' Evacuation of pus.

PYOCHEZ'IA, *Diarrhœa purulen'ta*, from *pyo*, and χέζω, 'I go to stool.' Discharge of pus by stool. Purulent diarrhœa.

PYOCŒ'LIA, *Ascites purulentus*, from *pyo*, and κοιλία, 'the belly.' Pus in the abdominal cavity.

PYOCYSTIS, Vomica.

PYODES, Purulent.

PYŒDE'MA, from *pyo*, and οίδημα, 'swelling.' Tumefaction of the surface owing to effusion of pus.

PYŒM'ESIS, *Pyem'esis*, *Vom'itus purulentus*, from *pyo*, and εμεσις, 'the act of vomiting.' Vomiting of pus.

PYŒGENESIS, Pyogenia.

PYŒGENIA, *Puogen'ia*, *Pyogen'esis*, *Pyopog'esis*, from *pyo*, and γενεσις, 'generation.' Generation of pus. The theory or mechanism of the formation of pus. Some have believed that pus is formed by the arterial system, and is deposited, by way of excretion, in the inflamed parts; others, that it is formed by the destruction of solid parts. It seems to be owing to a degeneration of the liquor sanguinis and exudation corpuscles.

PYŒGENIA CORROSIVA, Ulceration—p. Simplex, Suppuration.

PYŒGEN'IC, *Pyogen'icus*. Same etymon. Having relation to the formation of pus.

PYOILÉ'MIA, *Pyæ'mia*, (F.) *Pyohémie*, from *pyo*, and αίμα, 'blood.' Alteration of the blood by pus, giving occasion to the *Diath'esis* seu *Infect'ia purulen'ta*.

PYOID CORPUSCLES or GLOBULES, see Pus.

PYOME'TRA, *P. purulen'ta*, from *pyo*, and μήτρα, 'womb.' A collection of pus in the uterus.

PYOMETRA PURULENTA, Pyometra.

PYON, Pus.

PYONÉPHRITE, see Nephritis.

PYONOMA, Pus.

PYŒTORRHŒA, Otitrhœa.

PYOPE'RICAR'DIA, *Pyopericar'dium*, from *pyo*, περι, 'about,' and καρδία, 'the heart.' A collection of pus in the pericardium.

PYOPHTHALMIA, Hypopyon—p. Neonatorum, see Ophthalmia (purulenta infantum).

PYOPELEURITE, Empyema.

PYŒPŒSIS, Pyogenia.

PYOP'TYSIS, from *pyo*, and πτω, 'I spit.' Spitting of pus.

PYORRHAG'IA, from *pyo*, and ραγή, 'violent rupture.' A sudden discharge of a large collection of matter.

PYORRHŒ'A, from *pyo*, and ρεω, 'I flow.' A discharge of pus.

PYORRHŒA ALVINA, Pyochezia—p. Aurium, Otitrhœa—p. Nasalis, Ozœna—p. Palpebræ, Blepharopyorrhœa—p. Urinalis, Pyuria—p. Viarum lacrymalium, Dacryopyorrhœa.

PYOSIS, Hypopyon, Pterygion, Suppuration—p. Pectoris, Empyema.

PYOTHORAX VERUS, Empyema.

PYOTORRHŒE, Otitrhœa.

PYOTURIA, Pyuria.

PYR, Fever.

PYRA, Anthrax—p. Crustumina, Crustuminatum—p. Crustumerina, Crustuminatum.

PYR'AMID, *Pyramis*, πυραμῖς, πυραμῖδος, *Eminentia pyramidalis tympani*, from πυρ, 'flame,' which has a conical appearance [?]. A small bony projection in the cavity of the tympanum, which is excavated, to lodge the muscles of the stapes. The *Centre-pin* of the trephine. A small, obtusely pointed eminence of the inferior vermiform process of the cerebellum.

PYRAMID, see Calumba—p. of Malacarne, Vermiform process, inferior.

PYRAMIDAL DE L'ABDOMEN, Pyramidalis abdominalis—p. de la Cuisse, Pyramidalis—p. du Nez, Pyramidalis nasi—p. Stapédien, Stapedius.

PYRAMIDALE, (OS.) Cuneiform, (bone.)

PYRAMIDA'LIS ABDOMINIS, *Musculus Fallo'pii* seu *succenturiatus* seu *auxiliaris*, (F.) *Pubio-ombilical*, *Pubio-sous-ombilical* (Ch.), *Pyramidal de l'abdomen*. A small, fleshy, pyramidal fasciculus, whose existence is not constant; and which is inserted, by its base, into the upper part of the pubis, and terminates, by its summit, at the inferior part of the linea alba. When it contracts, it stretches the linea alba.

PYRAMIDA'LIS, *P. Fen'oris*, *Il'iacus exter'nus*, *Pyriformis*, *Piriformis*, *Primus et superior quadrigen'ius*, (F.) *Sacro-trochantérien* (Ch.), *Pyramidal de la cuisse*. A flat, triangular muscle, situate at the posterior part of the pelvis. By its base, it is attached to the anterior surface of the sacrum; to the corresponding surface of the great sacro-sciatic ligament and to the posterior part of the ilium. It terminates by a tendon, which is attached to the inner surface of the great trochanter. This muscle is a rotator of the thigh outwards, or of the pelvis in an opposite direction.

PYRAMIDALIS FEMORIS, Pyramidalis.

PYRAMIDA'LIS NASI, *Proc'erus nasi*, *Nasum dilatans*, (F.) *Fronto-nasal* (Ch.), *Pyramidal du nez*. A thin, triangular muscle, which has its summit upwards. Above, it is continuous with the occipito-frontalis. It descends vertically before the root of the nose, on which it terminates, becoming confounded with the transversalis. This muscle wrinkles the skin of the root of the nose transversely, and stretches that which covers the tip.

PYRAMIDES. Corpora pyramidalia.

PYRAMIDES ANTÉRIEURES, Corpora pyramidalia—p. Ferrein, Ferrein, pyramids of

—p. Malpighiana, Papillæ of the kidney—p. *Postérieures du cercelet*, Corpora restiformia.

PYRAMIDS OF MALPIGHI, Papillæ of the kidney—p. of Ferrein, see Ferrein—p. Posterior, Corpora restiformia—p. of Wistar, Sphenoidal cornua.

PYRAMIS, Penis, Pyramid—p. Cochleæ, Modiolus—p. Trigona, see Temporal bone.

PYRÆA, Incendium.

PYRÆTICA, 'febrile;' from πυρετος, 'fever,' and εχω, 'I have.' Fevers: the first order in the class *Hæmatica* of Good.

PYRÆLAINES, Olea empyreumatica.

PYRENOIDES, Odontoid.

PYRÆTHRE, Anthemis pyrethrum.

PYRETHRUM, Anthemis pyrethrum, Urtica—p. Parthenium, Matricaria parthenium—p. Sylvestre, Achillea ptarmica.

PYRETICOSIS, from πυρ, 'fire,' πυρετος, 'fever;' *Morbus febrilis*. A febrile affection.

PYRETICUS, Febrifuge, Febrile.

PYRETOGENETIC, Stimulant.

PYRETOGRAPHIA, from πυρετος, 'fever,' and γραφη, 'a description.' A description of fever.

PYRETOL'OGY, *Pyretology'ia*, from πυρετος, 'fever,' and λογος, 'a discourse.' *Pyretology*. A treatise on fevers. A title sometimes given to a monograph on fever.

PYRETOS, Fever.

PYRETOTYPOSIS, Intermittent.

PYREX'IA, *Pyrex'is*, πυρεξις, (πυρ, 'fire,') Fever. The febrile condition. Also, a paroxysm of fever—*Paroxysmus febrilis*.

PYREX'LE, *Febrile diseases*. The first class of Cullen's Nosology.

PYRI MARTIALES, Ferrum tartarizatum.

PYRIA, Fomentation, Vaporarium.

PYRIATERIUM, Vaporarium.

PYRICAUSTUM, Burn.

PYRIFORMIS, Pyramidalis.

PYRIPH'LEGES, πυριφλεγεις, *Pyriphlectos*, πυριφλεκτος, from πυρ, 'fire,' and φλεγω, 'I burn.' One who has a burning fever.

PYRITES, IRON, Ferri sulphuretum.

PYRMONT, MINERAL WATERS OF. A celebrated mineral spring on the Weser, in Westphalia, four leagues from Hamelot. The waters are tonic, and contain chlorides of sodium and magnesium, sulphates of soda and magnesia, and carbonates of iron, lime, and magnesia dissolved in carbonic acid, with some resinous [?] principles. It is a highly carbonated chalybeate.

ARTIFIC'IAL PYRMONT WATER may be formed of *Epsom salt*, gr. xv; *common salt*, gr. v; *magnesia*, gr. x; *iron filings*, gr. v; *water*, Oijj. Impregnated with the gas from *marble-powder* and *sulphuric acid*, aa ℥vij.

PYRGENUS, Spiritus rectificatus.

PYR'OLA, *P. rotundifolia*, *Round-leaved Pyrola* or *Wintergreen*; *Shin leaf*. Ord. Ericaceæ. Diminutive of *Pyrus*, a pear tree, from a fancied resemblance of the foliage. This plant was once used as a gentle astringent and tonic.

PYR'OLA MACULA'TA, *Chimaph'ila Maculata*, *Spotted Pipsissewa*, *Spotted Wintergreen*, *White-leaf*, *White Pipsissewa*, *King cure*, *Ground holly*, *Rheumatism weed*, &c., has similar properties.

PYROLA, ROUNDLEAVED, *Pyrola*.

PYROLA UMBELLA'TA, *Chimaph'ila* seu *Chimoph'ila umbellata*, *C. Corymbosa*, *Ground-holly*, *Pipsissewa*, *Wintergreen*, *Rheumatism weed*, *Prince's pine*, *Herbe a pissier* (Canada). This common American plant is allied to the uva ursi, in botanical as well as medical qualities. It is tonic and diuretic. The bruised leaves irritate the skin. From the decoction or infusion an agreeable beverage may be formed by adding sugar,

ginger to flavour it, and yeast to produce fermentation. Under the name *Pipsissewa Beer* it has been used in scrofulous affections.

PYROLEUM OSSIUM RECTIFICATUM, Oleum animale Dippelii.

PYROLIG'NEOUS ACID, *Ac'idum pyroaceticum* seu *pyrolig'neum* seu *pyrolig'nosum* seu *pyroxyl'neum* seu *ligni pyro-oleo'sum* seu *aceticum empyreumaticum* seu *lig'neum* seu *ligno'rum empyreumaticum*, *Pyrolig'nic acid*, (F.) *Acide pyroacétique* ou *pyrolig'neuse* ou *pyrolig'neux*, *Vinaigre de bois*. An acid, obtained by distillation from wood, coal, &c., which was once believed to be of a peculiar character. It is now known to be formed of acetic acid and an empyreumatic oil, from which it may be freed; and, in this state, is sold in commerce for *Acetum distillatum*, *Acetic acid of commerce*, *Ac'idum aceticum e Ligno venale*. It is used for similar purposes as distilled vinegar, and for preserving animal substances. It has also been used as an antiseptic in gangrene and sphacelus, and to fowl ulcers; wherever indeed creasote is indicated.—The dose of the impure pyroligneous acid internally is from five to thirty drops, three or four times a day.

PYROMANIA, *Incediary monomania*, from πυρ, 'fire,' and mania. Insanity, with an irresistible desire to destroy by fire.

PYROPH'AGUS, *Igni'orus*, from πυρ, 'fire,' and φαγω, 'I eat.' One who eats fire. A juggler, who eats bodies in a state of ignition.

PYROS, Triticum.

PYRO'SIS, from πυρ, 'fire,' 'the act of burning,' *Ptydis'mus pyros'icus*. *Limo'sia cardinal'gia sputato'ria*, *Ardor seu Ebullit'io stom'achi seu ventric'uli*, *Cardial'gia sputato'ria*, *Pyrosis Suec'ica*, *Apo-ceno'sis vom'itus pyrosis*, *Dyspeps'ia pyrosis*, *Cis-morog'mia*, *Orex'is* (of some), *Soda*, *Waterbrash*, *Waterquamb*, *Waterpang*, *Black-water*, (F.) *Ardeur de l'estomac*, *Fer chaud*, *Cremuson*, *Gorgosset*. This affection consists of a hot sensation in the stomach, with eructations of an acrid, burning liquid, that causes a distressing sensation in the parts over which it passes. Attention to diet, and the use of bitter absorbents, will usually relieve, when the disease is functional. Occasionally, it is symptomatic of organic disease of the stomach.

Pyrosis also signified, of old, inflammation, gangrene, and a burn.

PYROSIS SUECICA, Pyrosis.

PYROSOPHIA, Chymistry.

PYROTECHNIA, Chymistry.

PY'ROTECHNY, *Pyrotech'ne*, *Pyrotech'nia*, from πυρ, 'fire,' and τεχνη, 'art.' Art of making fire-works, &c. Also, chymistry. M. Percy has used the term *Pyrotechnie Chirurgicale* for the art of applying fire or the actual cautery in surgery.

PYROTHIONIDE, from πυρ, 'fire,' and θονη, 'linen.' *Liquor pyro-oleo'sus e lin'teo parat'us*. A kind of pyrogenous or empyreumatic oil, produced by the combustion of textures of hemp, linen, or cotton in a copper vessel. The brown product is acid. Its medical properties probably resemble those of creasote. Diluted with three or four times its weight of water, it has been used as a gargle in cynanche tonsillar, but is not now employed.

It is said, also, to be a popular remedy for toothach and skin diseases. When prepared from rags, it is called *Rag oil*; when from paper, *Paper oil*. (F.) *Huile de Papier*.

PYROTICUS, Caustic.

PYROXYLIN, Gun cotton, see Collodion.

PYRUS AMERICANA, Sorbus Americana.

PYRUS CYN'ONIA, *Cydo'nia malifor'mis* seu *eulga'ris*, *Sorbus Cydo'nia*, *Cydo'nia*, *Coto'nia*,

Quince Tree, (F.) *Coignassier*, *Cognassier*. Ord. Rosaceæ. *Sex. Syst.* Icosandria Pentagynia. The fruit is termed *Cydo'nium malum*, *Malum canum* seu *coto'neum*, *Melum cydo'nium*, *Quince*, (F.) *Coign*. Quince-seeds—*Cydo'nium* (Ph. U. S. 1851)—are sometimes used in decoction as a demulcent. The fruit makes a pleasant preserve.

PYRUS DOMESTICA, *Sorbus domestica*.

PYRUS MALUS, *Malus*, *M. dasyphylla* seu *communis* seu *sylvestris*, *Sorbus malus*, *Melea*, the *Apple Tree*, (F.) *Pommier*. The apple—(F.) *Pomme*—is an agreeable fruit when ripe. When unripe, it disagrees, especially with those of weak digestive powers. The same may be said of the *pear*, (F.) *Poire*; the fruit of *Pyrus communis*, *P. Sorbus* seu *Sati'va*, *Pirus*, *A'pius*, (F.) *Poirier*.

Apple Brandy is a spirituous liquor obtained from the juice of the apple, and much used in the United States.

PYTIA, *Colostrum*, *Rennet*.

PYTISMA, *Sputum*.

PYUL'CON, *Pyul'eum*, from *πυον*, 'pus,' and 'ελκω, 'I extract.' (F.) *Tire-pus*. A surgical instrument for extracting pus from any cavity. Many pyulca have been employed, all of which act as exhausting syringes.

PYURIA, *Pyoturia*, *Pyorrhœa urinæ*, (F.) *Pyurie*, *Pissement de Pus*, from *πυον*, 'pus,' and *ουρον*, 'urine.' Discharge of purulent urine: a symptom which occurs in many diseases; particularly in cases of renal calculi, and in organic affections of the bladder. It receives various epithets, according to the part whence the pus proceeds:—as *Pyuria urethræ*, *P. renæ*, and *P. vesicæ*.

PYURIA CHYLOSA, *Chyluria*—p. *Lactea*, *Chyluria*—p. *Mucosa*, *Cystirrhœa*—p. *Serosa*, *Cystirrhœa*—p. *Viscida*, *Cystirrhœa*.

PYXIS, *πυξίς*. A box; a pill-box. Also, an emollient ointment.—*Aëtius*, and *Paulus*.

PYXIS, *Boîte*, see *Cotyloid*.

Q.

Q., see *Abbreviation*.

QUABEBE, *Piper cubeba*.

QUACK, *Charlatan*.

QUACK-MEDICINE, *Arcanum*.

QUACKSALVER, *Charlatan*.

QUADRANS, *Quarta pars libræ*. A quarter of a pound. Three ounces (Troy.)

QUADRA'TUS, (F.) *Carré*, from *quadrus*, 'square.' A name for muscles whose figure approaches a square. *Depressor Labii inferioris*, *Quadratus femoris*.

QUADRATUS DORSI, *Q. lumborum*.

QUADRA'TUS FEM'ORIS, *Quadratus*, *Quartus quadrigen'inus quadratus*, (F.) *Tuber-ischio-trochantérien* (Ch.), *Ischio-sous-trochantérien*. *Carré de la Cuisse*. A muscle situate at the posterior and upper part of the thigh. It is thin, flat, and quadrilateral, and is attached to the outer part of the tuberosity of the ischium; whence it proceeds transversely to the inferior part of the posterior margin of the great trochanter. It rotates the limb, turning the toe outwards.

QUADRATUS GENÆ, *Platysma myoides*—q. *Radii*, *Pronator radii quadratus*.

QUADRATUS LUMBO'RUM, *Quadratus* seu *Lumbæ'ris externus*, *Q. dorsi*, *Flectens par lumborum*, (F.) *Ilio-costal*, (Ch.) *Ilio-lombi-costal*, *Carré des lombes*. A flat, somewhat thick, irregularly quadrilateral muscle, situate in the loins, at the sides of the vertebral column. It is attached, below, to the crista illi and ilio-lumbar ligament; and above, to the inferior margin of the last rib; and besides, to the base of the transverse processes of the last four lumbar vertebræ. This muscle inclines the loins to its side; depresses the last rib, and is thus a muscle of respiration. It can also raise the hip.

QUADRIGA, *Cataplecta*.

QUADRIGEM'INA TUBER'CU'LA, *Eminentiæ Quadrigen'inae* seu *Bigem'inae*, *Optic Lobes*, *Optic Ganglia*, *Pons Sylvii*, *Corpora quadrigen'ina* seu *bigem'ina*, *Nates* et *Testes*, (F.) *Tubercules quadrjumeaux* ou *bijumeaux*, *Éminences bigémînées*, *Lobes optiques* ou *bijumeaux*. Four medullary tubercles, situate at the posterior surface of the tuber annulare. They are white, externally; gray, internally; oblong; rounded;

connected by pairs, and separated by two grooves, which divide them crucially. Of these tubercles—the superior called *Nates*, *Na'tule*, *Tubercula anteriora*, *Glu'tia*, are larger and more prominent than the lower, called *Testes*, *Tubercula posteriora*. The pineal gland corresponds exactly to the point of intersection of the two furrows that separate them.

QUADRIGEMINUS PRIMUS ET SUPERIOR, *Pyramidalis*—q. *Quartus quadratus*, *Quadratus femoris*—q. *Secundus et tertius*, *Ischio-trochanterianus*.

QUADRIJUMEAUX (TUBERCULES), *Quadrigenina Tubercula*.

QUADROON, see *Mulatto*—q. *Black*, see *Mulatto*.

QUAFADIL, *Melanthium Virginicum*.

QUAHOIL, *Cacao*.

QUAIL, *Tetrao coturnix*.

QUAMASH, EASTERN, *Scilla esculenta*.

QUANDROS. Ancient name for a precious stone, believed to exist in the brain of the vulture; and to which was attributed the property of augmenting the secretion of milk, and preserving from deadly accidents. No such stone exists.

QUAR'ANTINE, *Quar'entine*, *Quarentaine*, from (L.) *Quaranti'na*, itself from *quaranta*, 'forty,' (F.) *Quarantaine*. The time during which travellers, returning from a country where the plague or any other pestilential disease exists, are compelled to remain on board ship or in a lazaretto. They, as well as the ship, are said 'to perform quarantine.' Quarantine is sometimes extended beyond forty days, whilst its duration is frequently much less. It is sometimes enforced by land; for example, when contagious diseases require the establishment of *cordons sanitaires*, and when persons are desirous of leaving infected districts. During quarantine, no communication is allowed between the travellers and the inhabitants of the country. Quarantine is a great impediment to commerce; and is, doubtless, very frequently enforced when there is but little danger of contagion. The evils, however, that might arise from the introduction of a widely-spreading contagious disease, are so disastrous, as to induce

legislators to maintain these laws in perhaps an unnecessary degree of rigour.

QUARTAN, from *quartus*, 'the fourth.' *Quartana Febris*, *An'telus Quartanus*, *Tetartæus*, *Quartan Ague*, (F.) *Quarte*. An intermittent, the paroxysms of which recur every fourth day, leaving between them two days' interval. We speak also of the *Quartan Type*. A *Double Quartan*, (F.) *Double quarte*, is one in which one paroxysm occurs on the third and another on the second day, so that there is only one day of apyrexia and two of paroxysms in succession;—the paroxysms of every fourth day resembling each other. A *Triple Quartan* is one in which there is a paroxysm every day; and on every three days the paroxysms correspond. A *redoub'ling* or *repeat'ing quartan*, (F.) *Fièvre quarte doublée*, is one in which there are two paroxysms every fourth day. See Intermittent.

QUARTANUS REMITTENS, Tetartophia.

QUARTA'RIUS. An ancient measure, equal to one-fourth of the sextarius. See *Weights and Measures*.

QUARTE, Quartan.

QUARTERON, see *Mulatto*—q. *Black*, see *Mulatto*.

QUARTIO, *Astragalus*.

QUARTI-STERNAL, *Quadristernalis*. The fourth osseous portion of the sternum, corresponding to the fourth intercostal space.—*Béclard*.

QUASSATIO, *Conquassation*.

QUASSATURA, *Conquassation*.

QUASS'IA, *Q. amara* seu *excel'sa*, *Pieræ'na excel'sa*, *Ferbrifugum lignum*, *Quassy*, *Lofty Bitterwood Tree*, *Bitter-ash*, (F.) *Quassie*, *Bois amer*. *Ord. Simarubaceæ*. A West India tree, from which is obtained the *Lignum Quassia*, *Quassia* (Ph. U. S.) It is an intensely durable bitter, without astringency; and has been employed as a tonic and stomachic. It is generally given in the form of infusion. The bitter principle is called *Quassin*.

QUASSIA SIMAROU'BA, *Simarouba*, *Simaru'ba*, *S. officinalis*, *Evon'ygnus*, *Bitter Simarouba*, *Mountain Damson*. The bark of the root, *Simaru'ba*, (Ph. U. S.), is bitter, and not unpleasant. Both water and alcohol extract its virtues. It is not astringent. It is exhibited wherever a simple tonic is required.

QUASSIN, see *Quassia*.

QUATERNIO, *Astragalus*.

QUATRE ÉPICES, see *Myrtus pimenta*.

QUATRIO, *Astragalus*.

QUEASINESS, *Nausea*.

QUEEN OF THE MEADOW, *Spiræa lobata*—q. of the *Prairie*, *Spiræa ulmaria*.

QUEEN'S DELIGHT, *Stillingia*—q. *Root*, *Stillingia*.

QUELLES, *Elixir*.

QUENOUILLE D'EAU, *Typha latifolia*.

QUERCERA, *Epihalos*.

QUERCINI HERBA, *Lichen plicatus*.

QUERCULA MINOR, *Teucrium chamædrys*.

QUERCUS ALBA, *White Oak*; **QUERCUS ROBUR**, *Common Oak*; **Q. TINCTORIA**, *Black Oak*; **Q. RUBRA MONTANA**, *Red Oak* or *Spanish Oak*. *Ord. Cupuliferæ*. *Sex. Syst. Monœcia Polyandria*; (F.) *Chêne*. The bark of all these varieties is, probably, alike in medicinal properties. It is powerfully astringent and tonic, and has been used internally in intermittents, and externally in decoction, as an astringent wash, where such is indicated.

Acorns, *Ceces*, *Nuces Quercus*, (F.) *Glands*, were at one time much used as food; and a decoction of them was once recommended in dysentery and diarrhœa, in glandular obstructions, &c. A pessary made of them has been advised in immoderate flow of the menses. They are not now used.

QUERCUS INFECTO'RIA. A tree of Asia Minor, which affords *Turkey* or *Nut Galls*, *Gallæ Turcicæ* seu *Quercinæ* seu *Tincto'ria*, *Nux Gallæ*, *Galla maxima orbiculata*, *Cicis*, *Casseoles*, *Gallæ*, *Galls*, *Gall-nut*, (F.) *Noix de Galle*, *Galle de chêne*. The *nut-gall*—*Galla* (Ph. U. S.)—is a morbid protuberance or tubercle, produced by the puncture of the *Diplolepis* seu *Cynips Gallæ Tincto'ria*, *Cynips Quercus folii*. It is powerfully astringent and tonic, and has been employed in diarrhœa, intestinal hemorrhage, and intermittents: but is chiefly used, externally, in gargles and injections. The powder, made into an ointment with lard, is used in piles. The ordinary nutgalls of the shops are procured from the Levant. The large *Mecca* or *Bussorah galls*, at times called *Dead Sea apples*, *Mad apples* and *apples of Sodom*, are produced on *Quercus infectoria*.

There are upwards of thirty species of oak in the United States, all of which are probably more or less astringent and tonic.

QUERCUS COCCIFERA, see *Kermes*—q. *Marina*, *Fucus vesiculosus*—q. *Suber*, see *Suber*.

QUERQUERA, *Epihalos*.

QUEUE DE CHEVAL, *Hippuris vulgaris* *Cauda equina*, see *Medulla spinalis*—q. *de la Moëlle épinière*, *Cauda equina*—q. *de Pourceau*, *Peucedanum*—q. *de Rat*, *Sium lunare*.

QUICK-IN-THE-HAND, *Impatiens*.

QUICKEN TREE, *Sorbus acuparia*.

QUICK'ENING, from Sax. *çpiccan*, 'to make alive.' The period of gestation when the motion of the fœtus first becomes perceptible. This usually occurs about the eighteenth week, and was at one time erroneously believed to mark the time at which the fœtus becomes alive—*Anima'tio fœtus*. It need scarcely be said, that it possesses the principle of life from the moment of the union of the materials furnished by the sexes as a fecundating copulation. When the motion is felt, the female is said to be 'quick with child.'

QUICKENS, *Triticum repens*.

QUICKLIME, *Calx viva*.

QUICKSILVER, *Hydrargyrum*.

QUIES, *Acinesia*.

QUINA, *Quinine*—q. *de Campo*, *Strychnos pseudo-china*—q. *Quina*, *Cinchona*.

QUINÆ ACETAS, *SULPHAS*, &c., see *Quiniæ Acetas*, &c.

QUINCE, *Sorofula*, see *Pyrus cydonia*—q. *Tree*, *Pyrus cydonia*.

QUINIA, *Quinine*—q. *Acetate* of, *Quiniæ acetas*—q. *Amorphous*, see *Quinia*, *extract* of, and *Chinioidine*—q. *Arseniate* of, *Quiniæ arsenias*—q. and *Cinchonia*, *tannate* of, *Quiniæ et Cinchonix tannas*—q. *Arsenite* of, *Quiniæ arsenis*—q. *Citrate* of, *Quiniæ citras*.

QUINIA, EXTRACT OF, *Quiniæ sulphas impu'rus*. A preparation which consists in evaporating the liquor poured off the crystals of sulphate of quinia, to the consistence of a pilular mass.

It has the properties of sulphate of quinia, and its active principle appears to be amorphous quinia or chinioidine. Twenty-four grains will generally arrest ague.

QUINIA, FERROCYANATE OF, *Quiniæ ferrocyanas*—q. *Hydriodate* of, *Quiniæ hydriodas*—q. *Impure sulphate* of, *Quinia*, *extract* of—q. *Iodhydrate* of, *Quiniæ hydriodas*—q. *Iodide* of, *Quiniæ hydriodas*—q. *Iodide* of *iodhydrate* of, see *Quiniæ hydriodas*—q. *Ioduret* of, *Quiniæ hydriodas*—q. and *Iron*, *Hydriodate* of, see *Quinia*, *Iodide* of *Iodhydrate* of—q. *Lactate* of, *Quiniæ lactas*—q. and *Mercury*, *protochloride* of, *Hydrargyri et Quiniæ Protochloridum*—q. *Muriate* of, *Quiniæ murias*—q. *Nitrate* of, *Quiniæ nitras*—q. *Phosphate* of, *Quiniæ phosphas*—q. *Sulphate* of, *Quinine*, *sulphate* of.

QUININÆ ACETAS, *Chini'num acet'icum*, *Acet'itas Chini'ni* seu *Chini'ni* seu *Chini'nicus* seu *Quini'na* seu *Quina* seu *Quini'ni* seu *Kini'ni*, *Quina acet'ica*, *Acetate of Quinia* or of *Quinine*. Prepared by saturating *Quinia* with diluted *acetic acid*. Has the properties of the other salts of *Quinia*.

QUININÆ ARSENIAS, *Quini'næ* seu *Qui'næ Arsenias*, *Chini'num Arsenico'sum* seu *Arsenic'icum*, *Arseniate of Quinia* or of *Quina* or of *Quinine*, (F.) *Arséniate de quinine*. Formed by the union of *arsenic acid* and *quinia*. Employed as an antiperiodic in the dose of from three quarters of a grain to a grain and a half in the twenty-four hours.

QUININÆ ARSÊNIS, *Q. Diar'senis*, *Ar'senite of Quinia*. A salt resulting from the double decomposition of *arseniate of potassa* and *sulphate of quinia*. It has been used in chronic cutaneous diseases; and as an antiperiodic in ague, neuralgia, &c. Dose, one-third of a grain, three times a day.

QUININÆ CITRAS, *Quinæ* seu *Chini'ni citras*, *Citras chini'nicus* seu *qui'nicus*, *Chini'num* seu *Chini'num Citricum*, *Citrate of Quinia* or of *Quina* or of *Quinine*. Formed from the union of *citric acid* and *quinia*. It has the same properties as the sulphate.

QUININÆ ET CINCHOINÆ TANNAS, *Chini'num* seu *Chini'num tan'nicum*, *Tannate of Quinia* and *Cincho'nia*. This salt has the same properties as the salts of *quinia* in general.

QUININÆ DIARSÊNIS, *Quiniæ Arsenis*.

QUININÆ FERROCYANAS, *Chini'num ferrocya-nogen'tum* seu *ferrohydrocyan'icum*, *Ferrocyanate* or *hydrocyanoferrate of Quinia* or of *Quinine*. This salt is obtained by the decomposition of *sulphate of quinia* by means of a solution of *ferrocyanuret of potassium*. It has all the properties of sulphate of *quinia*, and, according to some, in a superior degree.

QUININÆ HYDRIODAS, *Chini'num hydriod'icum*, *Hydriodate* or *Iodhydrate of Quinia*; called, also, *Ioduretum* seu *Iod'idum Quini'æ*, *Iod'uret* or *Iodide of Quinia*, (F.) *Hydriodate* ou *Iodhydrate* ou *Iodure de Quinine*. This is formed by precipitating *sulphate of quinia* by means of *iodide of potassium*. Given in scrofulous affections; half a grain to a grain, three times a day, to a child.

An *iodide* and a *biniodide* have been formed; the latter made by mixing double the quantity of the *iodide of potassium* with the sulphate of *quinia*.

AN IODIDE OF IODHYDRATE OF QUINIA, (F.) *Iodure d'Iodhydrate de Quinine*, is prepared by pouring into an acid solution of *quinia* a solution of *iodide of iron*, containing a slight excess of iodine. The precipitate is treated with boiling alcohol: the liquor filtered, and crystals suffered to form. The salt possesses all the properties of the other salts of *quinia*. Under the name, *Hydriodate of iron and Quinia*, a preparation has been introduced by Mr. Battley. It is possessed of tonic and antiperiodic virtues.

QUININÆ IODIDUM, *Quiniæ hydriodas*—q. *Iodurum*, *Quiniæ hydriodas*.

QUININÆ LACTAS, *Quinæ lactas*, *Chini'num lac'ticum*, *Lactate of Quinia* or of *Quinine*, (F.) *Lactate de quinine*. Made by the action of *lactic acid* on *quinia*. Used in the same cases as the other salts of *quinia*.

QUININÆ MURIAS, *Chini'num muriat'icum* seu *sali'tum* seu *hydrochlor'icum*, *Murias chini'nicus*, *Muriate of Quinia* or of *Quinine*. May be prepared by dissolving *quinia* in dilute *muriatic acid*. Given as an antiperiodic. Dose, half a grain to a grain.

QUININÆ NITRAS, *Chini'num* seu *Chini'num ni'tricum*, *Nitrate of Quinia* or of *Quinine*, (F.) *Nitrate* ou *Azotate de quinine*. May be formed

by the addition of *nitric acid* to *quinia*. Its properties are those of the sulphate of *quinia*.

QUININÆ PHOSPHAS, *Chini'num* seu *Chini'num phosphor'icum*, *Phosphate of Quinia* or of *Quinine*; may be prepared by the addition of dilute *phosphoric acid* to *quinia*. It is thought by many to be next to the sulphate of *quinia* in its remedial powers.

QUININÆ SULPHAS, *Quinine*, sulphate of.

QUININÆ VALERIANAS, *Chini'num* seu *Chini'num Valerian'icum*, *Valerianate of Quinia*, of *Quina*, or of *Quinine*; may be formed by the union of *valerianic acid* with *quinia*. It has the properties of the salts of *quinia*.

QUININICINE, *Quinici'na*, *Quinic'ia*. When a salt of *quinia* is exposed to heat with certain precautions, the alkaloid is changed into another isomeric with it, to which this name has been given.

Quinicine, and its sulphate, possess the same medical properties as *quinia* and its salts. Dose, gr. v to gr. xv.

QUININIDIA, *Quinidi'na*, *Quinidine*, *Chini'dine*, *Cin'chotin*. An alkaloid of the cinchonas—of many of the genuine at least—obtained from them by the same process as that by which *quinia* is obtained from the barks that yield it. Its sulphate is more soluble however than the sulphate of *quinia*, and it is left, therefore, in the mother waters.

The salts of *quinidia* are markedly antiperiodic. From gr. x to gr. xxx will usually arrest a paroxysm.

QUININE, *Quinia*, *Quina*, *Kini'num*, *Ki'num*, *Sul' essential'e cortic'is Peruvia'ni*, *Chini'num*, *Quinina*. An alkaline, uncrystallizable substance; under the form of a porous, whitish mass; almost insoluble in water, soluble in alcohol and ether. It forms, with acids, salts that are in general soluble. It is obtained from different cinchonas, but chiefly from the yellow, and is the active principle of those valuable drugs.

QUININE, ACETATE OF, *Quiniæ acetas*—q. *Arseniate of Quiniæ arsenias*—q. *Arsenite of Quiniæ arsenis*—q. *Azotate of Quiniæ nitras*—q. *Citrate of Quiniæ citras*—q. *Ferrocyanate of Quiniæ ferrocyanas*—q. *Hydriodate de Quiniæ hydriodas*—q. *Iodhydrate de Quiniæ hydriodas*—q. *Iodide of Quiniæ hydriodas*—q. *Iodure de Quiniæ hydriodas*—q. *Iodure d'Iodhydrate de Quinia*, *iodide of iodhydrate of*—q. *Lactate of Quiniæ lactas*—q. *Muriate of Quiniæ murias*—q. *Nitrate of Quiniæ nitras*—q. *Phosphate of Quiniæ phosphas*.

QUININE, QUINA OR QUINIA, SULPHATE OF, *Quiniæ* seu *Qui'næ* seu *Quini'næ Sulphas*, *Quinæ Disulphas*, *Chini'num* seu *Chini'num Sulphur'icum*, (F.) *Sulfate de Quinine*—the salt usually employed in medicine—occurs in needles of a pearly and satiny appearance. It is employed with great success in the treatment of intermit-tents; and is available in many cases, where the bark in substance could not be retained, or would be injurious. Dose, as a tonic from 3 to 10 grains in the 24 hours. As an antiperiodic it may be carried much farther. Its action, in a large dose, is decidedly sedative. It is obtained, by treating the yellow bark with sulphuric acid. The following form is adopted in the Pharmacopœia of the United States,—*Cinchon. flav.* in pulv. crass. ℥iv; *Acid. muriat.* f̄ssij; *Calcis*, in pulv. ℥v; *Aquæ*, cong. v; *Acid. Sulphur.*, Alcohol; *Carbon. animal.* āā q. s. Boil the bark in one-third of the water mixed with one-third of the muriatic acid, and strain through linen. Boil the residue twice successively with the same quantity of acid and water as before, and strain. Mix the decoctions, and, while the liquor is hot, gradually add the lime, previously mixed with two pints of

water, stirring constantly, until the quinia is completely precipitated. Wash the precipitate with distilled water, and having pressed and dried it, digest it in boiling alcohol. Pour off the liquor and repeat the digestion several times, until the alcohol is no longer rendered bitter. Mix the liquors, and distil off the alcohol, until a brown viscid mass remains. Upon this substance, removed from the vessel, pour about half a gallon of distilled water, and having heated the mixture to the boiling point, add as much sulphuric acid as may be necessary to dissolve the impure alkali. Then add an ounce and a half of animal charcoal; boil for two minutes; filter the liquor while hot, and set it aside to crystallize. Should the liquor, before filtration, be entirely neutral, acidulate it very slightly with sulphuric acid. Should it, on the contrary, change the colour of litmus paper to a bright red, add more animal charcoal. Separate the crystals from the liquor, dissolve them in boiling water slightly acidulated with sulphuric acid, add a little animal charcoal, filter and set aside to crystallize. Wrap the crystals in bibulous paper, and dry with a gentle heat. The mother-waters may be made to yield an additional quantity of sulphate of quinia by precipitating the quinia with solution of ammonia, and treating the precipitated alkali with water, sulphuric acid, and animal charcoal, as before.

QUININE, TANNATE OF, Quiniæ et cinchoniz tannas—q. Valerianate of, Quiniæ valerianas.

QUININISM, *Quininis'mus*, *Quinism*, *Cinchonism*, (F.) *Inebriation* ou *Iresse quinique*. The aggregate of encephalic or neuropathic phenomena induced by over-doses of quinia.

QUINOIDINE, Chininoidine.

QUINQUEFOLIUM, *Potentilla reptans*—*Quinquefolium majus*, *Potentilla reptans*.

QUINQUINA, *Cinchona*—q. *Aromatique*, *Croton cascarilla*—q. *Bicolor*, *Cinchona* *Caribææ* cortex—q. *Faux de Virginie*, *Cusparia febrifuga*—q. *Gris de Loza*, *Cinchona* *lanceifolia* cortex—

q. *Jaune*, *Cinchona* *cordifolia* cortex—q. *Orange*, *Cinchona* *lanceifolia* cortex—q. *Piton*, *Cinchona* *Caribææ* cortex—q. *Rouge*, *Cinchona* *oblongifolia* cortex.

QUINQUINO, *Myroxylon peruferum*.

QUINSY, *Cynanche*, *C. tonsillarlis*—q. *Nervous*, *Angone*—q. *Wolf*, *Lycanche*.

QUINTAN, *Febris quinta'na* seu *pempte'a* seu *quinta*; from *quintus*, 'a fifth.' A fever whose paroxysms return only every five days inclusively; and between which there are, consequently, three days of apyrexia.

QUINTE, (F.) This word is used synonymously with *paroxysm* or *fit*, when speaking of cough,—as *une Quinte de Tour*—'a fit of coughing,' (Sc.) *Kink*. Also, the influenza.

QUINTEFEUILLE, *Potentilla reptans*.

QUINTERON, see *Mulatto*—q. *black*, see *Mulatto*.

QUINTES, see *Quinte*, and *Pertussis*.

QUINTES'SENCE, *Quinta Essen'tia*. A name formerly given to alcohol, impregnated with the principles of some drug. It was, consequently, often synonymous with *Alcoholic tincture*. The most volatile principles of bodies were, also, called *Quintes'sences*.

QUINTISTERN'AL. The fifth osseous portion of the sternum. It corresponds to the 5th and 6th intercostal spaces.

QUINUA, *Chenopodium quinoa*.

QUOTID'IAN, *Quotidia'nus*, *Ephem'erus*, (F.) *Quotidien*—itself from *quotidiè*, 'daily.' That which takes place every day.

QUOTID'IAN FEVER, *Q. ague*, *Febris quotidiana* seu *hemere'sia* seu *hem'e'rina* seu *eph'e'mera* seu *methem'e'rina* seu *methem'e'ria*, *An'etus quotidiana's*, *Cathe'merus*, *Cathemer'inus*, *Methemer'inus*, *Amphemer'inus*, *Amphimer'inus*, *Amphe'merus*, *Quotidia'nus*, (F.) *Fièvre quotidienne*, is an intermittent, the paroxysms of which recur every day.

A *simple*, *double*, or *triple quotidian*, is a quotidian, which has one, two, or three paroxysms in the 24 hours.

R.

R or R̄ is placed at the commencement of a prescription, as a contraction of *Rec'ipē*. (See Abbreviation.) Originally, it was the sign ♃ of Jupiter, and was placed at the top of a formula, to propitiate the king of the gods, that the compound might act favorably.

RABDOIDES, (SUTURA,) Sagittal suture.

RABID, *Rab'idus*, (F.) *Rabique*, *Rabitéique*, from *rabies*, (*rabo*, 'I am mad or furious,') 'canine madness.' That which belongs to hydrophobia; as *rabid virus*, &c. *Rabid* also means affected with hydrophobia, (F.) *Enragé*.

RABIÉIQUE, *Rabid*.

RABIES CANINA, *Hydrophobia*.

RABIQUE, *Rabid*.

RACAHOUT, *Am'ylum quer'neum*. A name given by the Arabs to the starch prepared from an edible acorn obtained from *Quercus flex*, but, according to Plagge, the so called *Racahout* of the Arabs, sold in Paris, is a compound of the potatoe starch, chocolate, and aromatics,—as *anilla*.

RACCOON BERRY, *Podophyllum montanum*.

RACE, from *radice*, abl. of *radix*, 'root,' breed. The union or aggregate of individuals whose con-

formation or particular condition differs perceptibly from those of neighbouring varieties. In the human species, several races are designated. See *Homo*.

RACÉMEUX, *Racemosus*.

RACEMOUSUS, *Rac'emosus*, *Rac'emo'se*, (F.) *Racémeux*. In clusters, like grapes.

RAC'EMUS. A cluster—as of grapes.

RACHAMEL'CA, from Hebr. רחם (*rechem*), 'the womb,' and כלך (*molech*), 'a king;' *Rechamal'ca*. A peculiar formative principle, supposed, by Dolæus, to exist in the uterus.

RACHE, *Porrigo*.

RACHIÆI, *Rhachitæ*.

RACHIALGIA, *Colic*, *metallie*, *Rhachiodynia*, *Vertebral disease*—r. *Mesenterica*, *Tabes mesenterica*—r. *Pictoniensium*, *Colic*, *metallie*—r. *Pictonum*, *Colic*, *metallie*.

RACHIALGIE MÉSENTÉRIQUE, *Tabes mesenterica*.

RACHIALGITIS, *Rhachialgitis*.

RACHIDIAN, *Spinal*.—r. *Arteries*, *Spinal arteries*—r. *Bulb*, see *Medulla oblongata*—r. *Canal*, *Vertebral canal*.

RACHIDIEN, Spinal.

RACHIOPHYMA, Rachiphyma.

RACHIPHYMA, *Rachiphyma*, *Rachio-phyma*, *Tumor Dorsi*, from *ραχίς*, 'the spine,' and *φύμα*, 'a tumour.' A tumour on the spine or on the back.

RACHIS, Vertebral column.

RACHIS'AGRA, *Rhachis'agra*, *Rhach'ia*, *Rhach'agra*, *Rhachid'agra*, *Rhachit'is spinalis*, from *ραχίς*, 'the spine,' and *αγρα*, 'a seizure.' A gouty or rheumatic affection of the spine.

RACHITÆ, Rhachitæ.

RACHITIC, *Rachit'icus*, *Rhachit'icus*, (F.) *Rachitique*. Same etymon as the next. Relating or appertaining to, or affected with rickets. Weak, feeble in the joints; defective in development.

RACHITIS, *Rhachit'is*, from *ραχίς*, 'the spine,' and *itis*, a suffix denoting inflammation. Inflammation of the spine. Also, *Cyrtosis Rachia*, *Cyrtosis*, *Morbus Anglicus*, *Osteomalacia Infantum*, *Tubercula pectoræ*; *Innutritio ossium*, *Spina nodosa*, *Rachitis mus*, *English disease*, *Rickets*; from *ραχίς*, 'the spine,' (F.) *Rachitisme*, *Nouure*. A disease characterized by crookedness of the long bones; swelling of their extremities; crooked spine; prominent abdomen; large head; and often precocity of intellect. It is accompanied by leanness, general debility, indigestion; and frequently induces atrophy and hectic. Rickets occurs, particularly, during the first years of existence, in weakly children, born of rickety or scrofulous parents; brought up in damp or confined situations; who are badly nourished, and do not take sufficient exercise. The progress and termination of the disease are very variable. Some children gradually recover their health: others become more and more deformed, and ultimately die of consumption, dropsy, or other organic disease. The treatment is almost wholly *hygienic*. Pure air; a healthy situation; nourishing diet; exercise; sea or common cold bathing, and tonics, afford the best prospect of success.

RACHITIS ADULTORUM, *Mollities ossium*.

RACHITISME, *Rachitis*.

RACHITISME, from *ραχίς*, 'spine,' and *τεμνειν*, 'to cut.' An anatomical instrument for opening the medullæ spinalis without injuring the medulla.

RACHOSIS, *Rhachosis*, *Rachosis*, from *ραχίς*, or *ραχω*, 'I wrinkle.' A relaxation of the scrotum. *Proptoma seu lac'itas Scroti*, *Scrotum pendulum*. An excoriation of the relaxed scrotum.

RACINE À BECQUET, *Geranium moschatum*—*r. de Bengal*, *Cassumunar*—*r. Brésilienne*, *Ipecacuanha*—*r. de Charcis*, *Dorstenia contrayerva*—*r. de Chine*, *Smilax china*—*r. de Dracke*, *Dorstenia contrayerva*—*r. des Philippines*, *Dorstenia contrayerva*—*r. de Safran*, *Curcuma longa*—*r. de Saint Esprit*, *Angelica*—*r. Salivaire*, *Anthemis pyrethrum*—*r. de Turbeth*, *Convolvulus turpethum*.

RACINES DU CERVELET, *Corpora restiformia*.

RACLURES DES BOYAUX, *Ramenta intestinorum*.

RACORNISSEMENT (F.), from *racornir*, (*cornu*, 'horn,') 'to make hard as horn.' *Cor'nification*. A physical property, possessed by animal substances, which consists in a kind of contractility, accompanied with sudden corrugation and curling. It is produced by heat, and by chemical agents, especially by the strong mineral acids.

RADCLIFFE'S ELIXIR, see *Tinctura aloes composita*.

RADESYGE, *Radzyge*.

RADEZYGE, *Radzyge*.

RADIAD, see *Radial aspect*.

RADIAL, *Radialis*, from *radius*, 'a bone of the forearm.' That which relates to the radius.

RADIAL ANTÉRIEUR, *Palmaris magnus*.

RADIAL ARTERY, *A. externa Cubiti*. It arises from the brachial, at the upper and anterior part of the forearm; descends on the outer side as far as the lower part of the radius, and proceeds downwards and backwards towards the superior extremity of the space which separates the first two metacarpal bones. It then buries itself in the palm of the hand, where it forms the *profund* or *radial* palmar arch. The radial artery gives off the *recurrent radial*, several *radio-muscular* branches, the *transverse palmar radio-carpal artery*, the *external superficial artery of the palm of the hand*, the *external dorsal of the thumb*, the *dorsalis carpi*, *dorsal interosseous artery of the index*, &c.

RADIAL ASPECT. An aspect towards the side on which the radius is situated.—Barclay. *Radial* is used by the same writer, adverbially, to signify 'towards the radial aspect.'

RADIAL EXTERNE PREMIER, see *Radialis*—*r. Externe second*, see *Radialis*—*r. Grand*, see *Radialis*.

RADIAL NERVE, *Radio-digital* (Ch.), *Spiral Nerve*, *Spiral muscular N.*, *Musculo-spiral nerve*, arises from the four inferior branches of the brachial plexus. It is, at first, situate behind the other nerves of the plexus. It then becomes engaged between the three portions of the triceps brachialis, passes behind the humerus, and descends between the supinator longus and brachialis internus, as far as opposite the upper extremity of the radius. In its course it gives numerous filaments to the triceps, supinator longus, extensor carpi radialis longior, and to the integuments. Opposite the upper extremity of the radius it divides into two branches;—the one *posterior*, which turns backwards into the substance of the supinator brevis, and when it has reached the space between the two layers of muscles on the posterior surface of the forearm, divides into a great number of filaments, which are distributed to those muscles, and to the integuments of the hand. The other branch is *anterior*: it descends before the supinator brevis and the radius; until, near the inferior third of that bone, it engages itself between the tendons of the supinator longus and extensor carpi radialis longior; and, becoming afterwards subcutaneous, divides into two branches, whose filaments are distributed to the integuments of the thumb, index, middle finger, to the outside of the ring finger, and to the first interosseous muscle of the back of the hand.

RADIAL PETIT, see *Radialis*.

RADIAL VEINS, *DEEP-SEATED*, follow the same course as the radial artery.

RADIALIS EXTERNUS BREVIOR, *Extensor Carpi Radialis Brevis*, *Radialis secundus*, (F.) *Second radial externe*, *Petit radial*, *Épicondyle-sus-métacarpien*, (Ch.) An extensor muscle of the wrist, situate beneath the extensor carpi radialis longior. It is attached, above, to the external tuberosity of the humerus, and terminates below, by a long tendon, inserted into the posterior part of the upper extremity of the third bone of the metacarpus. It has the same uses as the next muscle.

RADIALIS EXTERNUS LONGIOR, *Extensor Carpi Radialis Longior*, *Radialis externus primus*, (F.) *Premier radial externe*, *Grand radial*, *Huméro-sus-métacarpien*, (Ch.) It is seated at the outer part of the forearm; is thin, but thicker on the outside than on the inside. It is attached, above, to the inferior part of the outer edge, and

to the corresponding tuberosity, of the humerus; and terminates, below, by a long tendon, which is attached to the superior extremity of the second bone of the metacarpus. It extends the hand on the forearm.

RADIALIS EXTERNUS PRIMUS, R. Externus longior—r. Extensor longior, R. Externus longior—r. Internus, Palmaris magnus—r. Secundus, R. Externus longior.

RADIATED, Radia'tus, from *radius*, 'a ray;' (F.) *Rayonné*. That which is arranged in rays; in lines, diverging from a common centre. An epithet given to several ligaments, &c.; as to those which unite the ribs to the sternum; those which unite the tibia and fibula at their inferior extremity, &c.

RADIATED SUBSTANCE OF THE KIDNEY, see Kidney.

RADICAL, Radica'lis, from *radix, radiceis*, 'a root.' A radical cure, *cura radica'lis*, is one in which the disease is destroyed, as it were, from the root. It is used in opposition to *palliative cure*.

RADICAL MOISTURE, Humidum radiale.

RADICAL VESSELS, Vas'cular Rad'icles, (F.) *Radicales vasculares*, are the small vessels that take their origin in the tissues, and by their union form larger vessels.

RADICES OSSIS HYOIDEI, Cornua ossis hyoidei.

RADICIS'ECA, from *radix, radiceis*, 'a root,' and *secare*, 'to cut.' One employed in collecting and preparing plants was formerly so called.

RADICULA, Raphanus hortensis.

RADICULES VASCULAIRES, Radical ves-
sels.

RADII CILIARES, Ciliary processes.

RADI FRONTIS. The folds or wrinkles of the forehead.

RADIO, from *radius*. In composition, relating or belonging to the radius, a bone of the forearm.

RADIO-CARPAL, Radio-carpia'nus. That which relates to the radius and carpus.

RADIO-CARPAL ARTICULATION is the *wrist joint*, or articulation of the os scaphoides, os semilunare, and os cuneiforme of the carpus with the inferior surface of the radius, and the fibro-cartilage, situate below the ulna. It is strengthened by lateral, anterior, and posterior ligaments.

RADIO-CARPAL TRANSVERSE PALMAR ARTERY, (F.) Artère Radio-carpienne-transversale-pal-
maire. A transverse branch, given off by the radial artery, opposite the lower edge of the pronator quadratus, which sends several branches to the anterior or palmar surface of the carpus.

RADIO CUTANÉ (NERF), see Cutaneous—*r. Phalangettien du pouce, Flexor longus pollicis manus.*

RADIOLUS, Sound.

RADIO-MUSCULAR, Radio-muscula'ris. A name given to the branches sent off from the radial artery to the muscles of the forearm in the first part of its course; as well as to the nervous filaments which the radial nerve sends to the same muscles.

RADIS, Raphanus hortensis—*r. de Cheval, Cochlearia armoracia.*

RADISII, Raphanus hortensis—*r. Water, Nasturtium amphibium.*

RADIUS, 'a spoke'—so called from its shape. *Cercis, Foc'ile minus* seu *superius, Canna minor, Os ad cubita'le, Additamentum ulnae, Mann'brum manus, Parape'chyon, Arua'do bra'chii minor*, (F.) *Os du Rayon.* A long, prismatic bone, the upper and lesser extremity of which is called the *head*. This is supported by a *cervix* or *neck*. At the part where the neck is confounded with the *body* of the bone is the *tubercle* or *bicipital*

tuberosity or *eminence* for the insertion of the biceps. The radius is articulated, above, with the os humeri and with the lesser sigmoid cavity of the ulna: below, with the scaphoides, semilunare, and the head of the ulna. Its inferior extremity, which is larger than the superior, is flattened before and behind: is irregularly quadrilateral; and has, below, a double facette to be articulated with the first two bones of the carpus. On the outer side is the styloid process: and, on the inner, a concave facette, which joins the ulna. Behind, are grooves for the passage of the extensor tendons. The radius is developed from three points of ossification; one for the body, and one for each extremity.

RADIUS, COL DU, Collum radii.

RADIX, genitive, radiceis, Rhiza. A root: also, the male organ.

Radix, Root or *fang* of a tooth, is the part contained in the alveolus. The *radix* or *root* of the nail is the portion hidden under the skin, &c. Surgeons give the name to prolongations, sent by scirrhous, cancerous, or other tumours into the neighbouring parts.

Five Aperient Roots, Quinque radi'ces aperient'es, were, of old, asparagus, butchers' broom, fennel, parsley, and smallage.

Five Lesser Aperient Roots, Quinque radi'ces aperient'es mino'res, were caper, dandelion, eryngo, madder, and rest-harrow.

RADIX ASCLEPIADIS CRISPA, see Gomphocarpus crispus—*r. Braziliensis, Ipeacuanha.*

RADIX CORDIS, Basis Cordis. The base of the heart.

RADIX GINSENG, see *Panax quinquefolium*—*r. Indica Lopeziana, Lopez radix*—*r. Linguae*, see Tongue—*r. Lopeziana, Lopez radix*—*r. Ninsi, Panax schinseng, Sium ninsi*—*r. Rubra, Rubia*—*r. Serpentinum*, see *Ophiorrhiza mungos*—*r. Unguis, Nail, root of*—*r. Ventris, Umbilicus.*

RADULA, Raspatorium.

RADZYGE, Radzygin, Radesyge, Radezyge, Thæ'ria, (properly *Theria*, from θηριον, ('ελκος,) 'a malignant ulcer.') *Lepra borea'lis* seu *Norveg'ica, Norwe'gian Lep'rosy.* A name given, in Norway, to a disease, bearing considerable analogy to the yaws. Some have esteemed it a species of lepra or elephantiasis.

Another form—the *Spédalske, or Spedalskhed*—of Norway, appears to be a variety of tubercular lepra. Under the epithelial scales, numerous acari have been found; and the affection has been called *Sca'bies crustosa*, and *Sca'bies Norveg'ica Boeck'ii*, after Boeck, who well described a case of it.

RAFFLE'SIA ARNOLD'I. A plant of Java. Order, Rafflesiaceæ, a decoction of which is employed there as an astringent in relaxed conditions of the genito-urinary apparatus.

RAFRAÏCHISSANT, Refrigerant.

RAGE, Ira, Furor brevis, Orgê, Thyms, (F.) Colere, Rage. Violent passion, characterized by contraction of the muscles of the face, violence in every movement, extreme irritation of the nervous system, acceleration of the blood's motion, and, generally, redness and swelling of the face.

RAGE, Rhage.

RAGE, Hydrophobia, Rage.

RAGE DE TÊTE. An epidemic and fatal malady, which prevailed in France in 1481. It was presumed to be epidemic meningitis.

RAGWEED, Ambrosia elatior—*r. Golden, Senecio aureus*—*r. Great, Ambrosia trifida.*

RAGWORT, Senecio Jacobæa.

RAIA BATIS, and R. CLAVATA, see *Oleum jecoris aselli.*

RAIDEUR, Rigidity—*r. Cadavérique, Rigor mortis.*

RAIFORT, *Raphanus hortensis* — *r. Sauvage*, *Cochlearia armoracia*.

RAINBOW WORM, *Herpes iris*.

RAINURE, Groove — *r. Digestrique*, Mastoid groove.

RAISIN, see *Vitis vinifera* — *r. d'Amérique*, *Phytolacca decandra* — *r. de Bois*, *Vaccinium myrtillus* — *r. d'Ours*, *Arbutus uva ursi* — *r. de Renard*, Paris.

RAISING, Expectoration.

RAISINIÈRE (F.), from *raisin*, 'a grape.' A name given to a small granular, brownish or blackish tumour, which forms occasionally at the surface of the cornea, in consequence of ulcers or accidental wounds of that membrane. — Nysten.

RAISINS, *Uvæ passæ*, see *Vitis vinifera* — *r. de Corinthe*, see *Vitis Corinthiaca*.

RAISON, Reason.

RAKASIRA. An American balsam; of a brownish or brownish-red colour; semi-transparent; brittle; softening and becoming tenacious by heat; inodorous when cold, but exhaling a very agreeable smell when heated; and possessing a balsamic and slightly bitter taste. The precise vegetable that furnishes it is not known. It has been used chiefly as a balsam in gonorrhœa and urinary affections.

RAKE-TEETH. A term, used in the North of England for teeth which are wide apart, and similar to those of a rake.

RAKIA, see Spirit.

RAKOSIS, Rachosis.

RÂLE (F.), *Rattle*, *Rhonchus*, *Rhenchus*, *Rhenxis*, from (D.) *Ratel*; *Rhoncus*, *Cerchnus*, *Rhogmos*: (probably an example of onomatopœia.) Noise produced by the air in passing through mucus, of which the lungs are unable to free themselves. This condition is chiefly observed at the approach of death, and is commonly called, "the rattles."

The term *Râle* has been given to different sounds during respiration, caused by the air in connection with fluid contained in the bronchi, or areolæ of the pulmonary tissue; which are perceived by the stethoscope.

RÂLE BRONCHIQUE SEC, *Râle sonore* — *r. Bronchique humide*, *R. muqueux* — *r. Caveuroux*, Gurgling — *r. Cavernuleux*, see Gurgling — *r. Crépitant*, *Rhonchus crepitans*, see *Crepitant* — *r. c. Reduz*, see *Crepitant*.

RÂLE MUQUEUX, *R. bronchique humide*, *Rhonchus mucosus*, *Hygrobronchiorrhonchus*, *Mucous Rattle*. The sound produced by the passage of air through mucus accumulated in the larger bronchi or trachea, or through softened tubercular matter. This *râle* occurs in catarrh, and in softened tubercle. When carried to a very high degree, it constitutes gurgling, (F.) *Gargouillement*. The *subcrepitant rhonchus*, (F.) *Râle sous-crêpitant*, is produced by the bubbling of air through liquid of variable consistence in the minute bronchial tubes. When heard at the base of both lungs, it is a sign of capillary bronchitis. When heard at one base only, it is generally connected with tuberculosis higher up.

RÂLE SIBILANT, *Rhonchus sibilans* seu *sibilans*, *Sibilant Rattle*. A slight, though prolonged, whistling sound, occurring either at the commencement of inspiration, or of expiration, owing to the presence of mucus, thin and viscid, but not abundant, which obstructs, more or less completely, the smaller bronchial ramifications. It is seated in the small tubes, and occurs in the first stage of bronchitis. The *clicking* and *whistling* varieties differ, in the former being short, the latter prolonged. The former is a quick, sharp sibilus or whistle, which ceases almost in-

stantaneously; the latter a prolonged sibilus, of less sharpness, lasting almost the whole time of the movement which it accompanies. To these may be added the *hissing* variety, the name sufficiently indicating its character.

RÂLE SONORE, *E. bronchique sec ou ronflant*, *Rhonchus sonorus*, *Sonorous Rattle*. A sound resembling at times the snoring — (F.) *Roufflement* — of a person asleep; at others the sound of the bass string of an instrument when rubbed with the finger, and not infrequently the cooing — (F.) *Roucoulement* — of a dove. It seems to be caused by a contraction of the bronchial tubes, and is characteristic of chronic catarrh.

RÂLE SOUS-CRÉPITANT, see *Râle muqueux* — *r. Vésiculaire*, see *Crepitation*.

RAMEAU, Ramus.

RAMBERGE, Mercurialis.

RAMEN'TA INTESTINO'RUM, *Scrapings of the Intestines*, (F.) *Raclures des Boyaux*. The shreds or scrapings, as it were, of the mucous membrane of the bowels, often discharged in malignant dysentery. The evacuation in which these are contained has been termed *Diachore'ma cysmatodes*.

RAMENTUM, Fragment, Scobs.

RAMEX, Hernia — *r. Varicosus*, *Varicocele*.

RAMIFICA'TION, *Ramificatio*, from *ramus*, 'a branch,' and *fito*, 'to become.' A division of arteries, veins, or nerves into branches. Also, a branch itself.

RAMILLE, Ramusculus.

RAMOLLISSEMENT, Mollities — *r. du Cerveau*, Mollities cerebri — *r. du Cœur*, *Cardiomalacia* — *r. de l'Estomac*, *Gastromalacia* — *r. du Foie*, *Hepatomalacia* — *r. Gris*, see *Hepatisation* — *r. de la Moelle épinière*, Mollities medullæ spinalis — *r. Rouge*, see *Hepatisation* — *r. de l'Intestin*, *Enteromalacia* — *r. des Os*, Mollities ossium.

RAMPANT (F.), from *ramper*, 'to climb,' *Repens*, *Reptans*. That which creeps or crawls. The French *Bandage rampant* has the folds arranged spirally around the part, leaving intervals between them. It is a retentive bandage, but is easily displaced, and, therefore, not employed.

RAMPES DU LIMAÇON, *Scala* of the cochlea.

RAMPHOS, Rostrum.

RAMULUS, Ramusculus.

RAMUNCULUS, Ramusculus.

RAMUS, *Cladus*, a branch, (F.) *Rameau*. A division of an artery, vein, or nerve. Also, the male organ.

RAMUS DURIOR SEPTIME CONJUGATIONIS, Facial nerve.

RAMUS'CLUSUS, *Ram'ulus*, *Ramunculus*, *Sur'culus*, *Cladis'cos*, diminutive of *ramus*, 'a branch.' A division of a ramus. (F.) *Ramuscule*, *Ramille*.

RANA ESCULEN'TA, 'esculent frog,' (F.) *Grenouille*. This frog and the bull-frog, *Rana Tauri'na* — are eaten as delicacies. They are nutritious, and easily digested.

RANA, *Ranula*.

RANCE, Rancid.

RANCID, *Ran'cidus*, *Sapros*, (F.) *Rance*, from *ranceire*, 'to be stale.' An epithet given to fatty bodies, which have become acrid from age or the contact of air. Mild ointments may thus become very irritating, and unfit for the purposes for which they were originally intended.

RAN'DIA DUMETO'RUM, *R. Spino'sa*, *Canthium Coronatum*, *Garden'ia* seu *Posogueria Dumeto'rum* seu *Spino'sa*. A Coromandel shrub; *Ord. Cinchonacæ*: the fruit of which, bruised and thrown on the water, intoxicates, or even

kills fish. In the form of powder, it is a powerful emetic.

RANDIA SPINOSA, R. dnmeterum.

RANINE, *Rani'na*; from *Rana*, 'a frog.' The termination of the lingual artery is so called; that is, the portion of the artery which advances horizontally between the genio-glossus and lingualis muscles as far as the point of the tongue. The ranine vein follows the same course as the artery, and opens into the internal jugular or into the superior thyroid.

RANTREE, *Sorbus acuparia*.

RAN'ULA, diminutive of *rana*, 'a frog,' so called from its resemblance; *Dysphag'gia Ranula*, *Empfrag'ma salivare*, *Batrachus*, *Batrachium*, *Hydroglos'su*, *Hypoglossis*, *Hypoglossum*, *Hypoglot'tis*, *Hypoglos'sium*, *Rana*, *Frog Tongue*, (F.) *Grenouillette*. A small, soft, fluctuating, and semi-transparent tumour, which forms under the tongue, owing to the accumulation of saliva in Wharton's duct. In order to give exit to the accumulated fluid, and to establish a permanent opening for the discharge of the saliva, the cyst may be punctured, and the opening maintained by a minute cylinder, with a button at each extremity, as has been recommended by Dupuytren; or a portion of the cyst may be removed by the scissors, and the mouth be frequently washed by any astringent lotion. Sometimes, the salivary duct is found plugged by a small calculus.

RANULA LAPIDEA, see *Calculi*, salivary.

RANUNCULUS, (F.) *Renoncule*, (Sc.) *Yellow gowan*, *Ord. Ranunculaceæ*; *Sex. Syst. Polyandria Polygynia*. Diminutive of *rana*, 'a frog,' because found in marshy places where frogs abound. A genus of plants, most of the species of which, when taken internally, act as acrid poisons. See *Poison*. They are, also, acrid and vesicant, when applied to the skin, and have accordingly been often used as counter-irritants. The following species answer to this description.

RANUNCULUS ABORTIVUS, *Small-flowered Crow-foot*, *Chicken-pepper*.

RANUNCULUS ACRIS, *R. pratensis* seu *Steven'ii* seu *ru'fus* seu *sylvaticus* seu *Sic'ulus*, *Upright Meadow* or *Tall Crowfoot*, *Butter Cups*, (Prov.) *Craisey*, *Guilty Cups*, *Yellow-weed*, *Blister-weed*, *Pilewort*, *Burwort*, *Meadow-bloom*, *Yellows*, (F.) *Bouton d'or*.

RANUNCULUS ALBUS, *Anemone nemorosa*.

RANUNCULUS AQUATICUS, *R. sceleratus*.

RANUNCULUS BULBOSUS, *R. lætus*, *Ranunculus* (Ph. U. S.), *Bulbous* or *Bulbous-rooted Crowfoot*, *Butter Cups*, (F.) *Renoncule bulbeuse*, *Bassinet*.

RANUNCULUS DIGITATUS, *R. sceleratus*.

RANUNCULUS DECLINATUS, *R. flammula*.

RANUNCULUS FICARIA, *R. vernus* seu *præcox*, *Chelidonium minus*, *Scrophularia minor*, *Ficaria ranunculoides* seu *verna* seu *communis*, *Chelidonia rotundifolia minor*, *Cureuma hæmorrhoidalis herba*, *Ægolethron*, *Lesser celandine*, *Pilewort*, (F.) *Petite Chélideine*, *Petite Éclairé*, *Ficaire*, *Herbe aux hæmorrhoides*. The leaves and root have been used medicinally;—the leaves as an antiscorbutic; the root as a cataplasm in piles.

RANUNCULUS FLAMMULA, *R. declinatus*, *Flammula*, *Surrecta alba*, *Smaller Water Crowfoot*, *Lesser Spearwort*, (F.) *Petite Douve*.

RANUNCULUS ILLYRICUS.

RANUNCULUS LINGUA.

RANUNCULUS LÆTUS, *R. bulbosus* — *r. Nemorosus*, *Anemone nemorosa* — *r. Palustris*, *R. sceleratus* — *r. Pratensis*, *R. acris*.

RANUNCULUS PENNSYLVANICUS, *Bristly Crow-foot*.

RANUNCULUS PRÆCOX, *R. ficaria*.

RANUNCULUS PUBESCENS. Grows in ditches and marshes in South Africa. The expressed

juice is used by the Cape Colonists in cancerous ulcers.

RANUNCULUS REPENS, *Creeping Crowfoot*—*r. Rufulus*, *R. acris*.

RANUNCULUS SCELERATUS, *R. Palustris* seu *umbellatus* seu *digitatus* seu *aquat'icus*, *Rius A'pium*, *Herba Sardo'nia*, *Herba Scelera'ta*, *Hecato'nia palustris*, *Marsh* or *Crushed* or *Celery-leaved Crowfoot*.

RANUNCULUS SICULUS, *R. acris* — *r. Steveni*, *R. acris* — *r. Umbellatus*, *R. sceleratus* — *r. Vernus*, *R. ficaria* — *r. Virginianus*, *Lobelia syphilitica*.

RAPA NAPUS, *Brassica rapa* — *r. Rotunda*, *Brassica rapa*.

RAPE, *Brassica napus*, *Stnprum*.

RAPHANE'DON, from *ραφανος*, 'a radish, like a radish.' *Rhaphanedon*. A transverse fracture of a long bone, leaving no splinters;—what has been called, in France, *Fracture en rave*.

RAPHAN'IA, *Convul'sio Raphania*, *Raphania*, *Morbus spasmod'icus malignus* seu *popula'ris* seu *Sile'siacus*, *Eclamps'ia typho'des*, *Synclonus Raphania*. Linnæus gives this name to a convulsive disease, not uncommon in Germany and Sweden, and which has been attributed to the seeds of the *Raphanus Raphanistrum* seu *sylves'tris*, *Raphanistrum seg'etum* seu *arvenœ*, *Rapistrum*, being mixed with the corn. The convulsions are seated in the limbs, and are attended with acute pain. See *Convulsio cerealis*.

RAPHANIA MAÏZTICA, *Pellagra*.

RAPHANIS, *Raphanus hortensis* — *r. Magna*, *Cochlearia armoracia*.

RHAPHANISTRUM ARVENSE, see *Raphania*.

RAPHANUS, *R. hortensis*.

RAPHANUS HORTENSIS, *Raphanus*, *R. sativus* seu *niger*, *Raphanis*, *Raphanus*, *Radicula*, *Rhaphys*, *Raphys*, *Rhops*, *Rapys*, *Radish*, (F.) *Raifort*, *Radis*. *Ord. Cruciferae*. *Sex. Syst. Tetradynamia Siliquosa*. The root of this plant is a common esculent. It has, also, been given as a diuretic in calculous affections. The juice, made into a syrup, is exhibited to relieve hoarseness. Radishes have long been celebrated as anti-scorbutics.

RAPHANUS MARINUS, *Cochlearia armoracia* — *r. Raphanistrum*, see *Raphania* — *r. Rusticanus*, *Cochlearia armoracia* — *r. Sylvestris*, see *Raphania*.

RAPHĒ, *Rhaphē*, *ραφή*, 'a suture.' A name given to prominent lines resembling a raised stitch. Such is the *raphe* or *tramis* which divides the scrotum into two parts, and which extends from the anterior part of the anus to the extremity of the penis. The name *Raphē* seu *Raphē superior* seu *Linea Media'na* seu *Sutu'ra corporis collo'si exter'na* seu *chorda longitudinalis Lancis'ii* is, also, given to two prominent lines which are longitudinal and parallel, and are seen at the upper surface of the corpus callosum, extending from the anterior to the posterior extremity of that commissure.

RAPHEX, *Chenopodium vulvaria*.

RAPHIANKIS'TRON, from *ραφιον*, 'a needle,' and *αγκιστρον*, 'a book.' An instrument employed in the formation of artificial pupil.

RAPHION, *Needle*.

RAPHIS, *Needle*.

RAPHYS, *Raphanus hortensis*.

RAPISTRUM, see *Raphania*.

RAPON'TIC, *Rheum rhaponticum*.

RAPPORT (F.), *Relatio*, *Renuncia'tio*, 'a report.' A deposition made by a physician or surgeon, to prove the condition of a person, the nature of a disease, the existence or non-existence of pregnancy, sudden or violent death, &c

Formerly, there were the *Rapports dénonciatifs*, made at the desire of the injured or their friends, and intended to point out to the judges the details of the crime or misdemeanor,—the *Rapports provisoires*, the object of which was to obtain provisions for the injured individual, both as regarded food and medicine, and to defray the expenses of prosecution;—and *Rapports mixtes*, or those which were both *dénonciatifs* and *provisoires*. At present, reports or depositions are generally divided into *judiciary*, or those which serve to throw light on the subject matter of any civil or criminal cause; and *administrative*, which afford information on subjects relating to any branch of the public administration, as on the nuisance, or otherwise, of certain establishments, the character of any epidemic, &c.

RAPPORT, Eructation, Regurgitation.

RAPTUS POST-TERGANEUS, Opisthotonos.

RAPUM MAJUS, Brassica rapa.

RAPUNTIUM SYPHILITICUM, Lobelia siphilitica.

RÁPURE, Rasura.

RAPYS, Raphanus hortensis.

RAQUETTE, Cactus opuntia.

RAREFA'CIENS, *Rarifaciens*, *Aræoticus*, (F.) *Raréfiant*, from *rarus*, 'rare,' and *facere*, 'to make.' Medicines were so termed, which were supposed to be possessed of the power of giving more bulk or extension to the blood or other humours.

RARÉFIANT, Rarefaciens.

RARIFACIENS, Rarefaciens.

RA'RITAS, (F.) *Rareté*. Rarity; scantiness; fewness.

RARITAS DEN'TIUM. A large space between the teeth, which appear to be, and may be, too few.

RASCATIO, Excretion.

RASCETA, Carpus, Malleolus — r. Pedis, Tarsus.

RASCHA, Carpus, Malleolus.

RASETA, Carpus, Malleolus.

RASETTA, Carpus, Malleolus.

RASH, Exanthem — r. Fever, Scarlatina — r. Canker, see *Cynanche maligna* — r. Lichenous, Lichen — r. Mercurial, *Eczema mercuriale* — r. Mulberry, see *Typhus* — r. Nettle, *Urticaria* — r. Rose, *Roseola* — r. Summer, Lichen tropicus — r. Tooth, *Strophulus* — r. Wildfire, *Ignis sylvaticus*.

RASOIR, Razor.

RASO'RISM. The Italian medical doctrine of contro-stimulus, of which Rasori was the founder.

RASORIUM, Raspatorium.

RASPATO'RIUM, *Raso'rium*, *Rat'ula*, *Scalprum rosorium*, *Xyster*, *Xyste'rium*, *Xystrum*, *Rad'ula*, *Runci'na*, *Runci'na*, *Scalprum*, (F.) *Rugine*, *Grattoir*. An instrument used for rasping bones, to detach the periosteum, — either in certain surgical operations, or for anatomical purposes.

RASPBERRY, *Rubus idæus* — r. Black, see *Rubus strigosus* — r. Ground, *Hydrastis Canadensis* — r. Wild, *Rubus strigosus*.

RASPING, Eructation.

RASPS, *Rubus fruticosus*.

RASSETA PEDIS, Tarsus.

RASTETA, Carpus, Malleolus.

RASU'RA, *Xysma*, *Xysmos*, (F.) *Rápure*, from *radere*, *rasum*, 'to scrape.' A rasure, or scratch, or erosion. Also, the rasping or shaving of any substance; as *Rasu'ra Cornu Cervi*, *Hartshorn shavings*.

RASURA, Scobs.

RATAF'IA, (F.) *Alcoolé sucré*, *Saccharo-alcoolé*. A liquor prepared by imparting to ardent

spirits the flavour of various kinds of fruits, adding sugar.

RATANHY, *Krameria ratanbia* — r. of the Antilles, *Krameria ixina*.

RATE, Spleen.

RATELEUX, Spleneticus.

RÂTELIER, see *Dentier*.

RATIO, *Rationalitas*, from *reor*, *ratus*, 'to think.' A reason, a cause, an explanation, a mode or manner; as *Ratio symptom'atum*, an explanation of the symptoms, — *Ratio meden'di*, *Genus curatio'nis*, *Via curandi*; the reason, mode or manner of cure.

RATIO, Reason — r. *Medendi*, see *Ratio* — r. *Symptomatum*, see *Ratio*.

RAT'IONAL, *Rationalis*, (F.) *Rationnel*. Same etymon as *Ratio*. That which is conformable to reason. This epithet is often opposed to *empirical*; as *rational treatment*. The French, also, say *Signes rationales*, in opposition to *Signes sensibles*. See *Organic*.

RATIONALITAS, Ratio.

RATSBANE, Arsenious acid.

RATTLE, *Râle*.

RATTLES, THE, see *Râle*.

RATTLEBUSH, *Sophora tinctoria*.

RATTLESNAKE, *Crotalus horridus* — r. Leaf, *Goodyera pubescens* — r. Plantain, *Goodyera pubescens* — r. Root, *Nabalus albus*, *Polygala senega*, *Trillium latifolium* — r. Weed, *Hieracium venosum*.

RATTLESNAKE'S MASTER, *Agave Virginica*. *Liatris scariosa*, *Nabalus albus*.

RATTLEWEED, *Actæa racemosa*.

RATULA, Raspatorium.

RAUCE'DO, *Rau'citas*, *Parapho'nia rauca*, *Asper'itas Arter'ia asperæ*, *Vox rauca*, *Branchus*, *Hoarseness*, (Sc.) *Roup*, (Prov.) *Raup*, (F.) *Enrouement*, *Raucité*, from *raucus*, 'hoarse.' A change in the voice, which loses its smoothness and becomes low and obscure. It is a common symptom in diseases of the larynx and trachea.

RAUCEDO CATARRH'ALIS. Hoarseness from cold.

RAUCITAS, Rucedo.

RAUCITÉ, Rucedo.

RAUCOUS, *Raucus*. 'Hoarse,' as a *raucous* voice — *Vox rauca* seu *raucis'ona*.

RAVE, Brassica rapa.

RAVERY, Delirium.

RAWP, Rucedo.

RAY, Diarrhœa.

RAYONNÉ, Radiated.

RAYONS SOUS-IRIENS, Ciliary processes

RAZOR, *Culter Tonsor'ius*, *Macha'ris*, *Novac'ula*, *Xyrum*, *Xyrus*, (F.) *Rasoir*, from *radere*, *rasum*, 'to shave.' An instrument for shaving. Used in surgery to remove hairs, where they would interfere with any operation.

REACHING, Vomiturition.

REACT'ION, *Reactio*, from *re*, 'again,' and *agere*, *actum*, 'to act.' An action of resistance to a power applied. A species of vital movement or excitement, tending to prevent or destroy the effects of any noxious power applied to the animal economy, and which, by some, has been attributed to the *vis medicatrix nature*. It is certainly dependent on the organic instinctive actions of the frame. It is the state of activity which succeeds the action on the nervous system of certain morbid influences.

READ, Rennet.

REAL'GAR, *Realgal*, *Arlada*, *Arladar*, *Auripigmentum rubrum*, *Arsenicum rubrum facti'tium*, *Abesi*, *Sandar'acha Græcorum*, *Red Sulphuret of Mercury*. A violent poison. See *Poison*.

REAM, Cream.

REASON, *Ra'tio*, *Logos*, (F.) *Raison*. Same etymon as Ratio. The faculty or property of the mind by means of which man perceives the distinction between right and wrong, in physics as well as in morals. *Reason* is a just conclusion resulting from the comparison of two ideas, by virtue of which we form a judgment.

REBOLEA, Mummy.

REBONA, Mummy.

REBOUTEUR, *Renouveau*.

RECEIVER, *Ampulla*, (F.) *Ballon*, *Réceptient*, from *recipere*, *receptum*, (*re*, and *capere*, 'to take,') 'to take, to receive.' In pharmacy, a wide-necked globular vessel, the neck of which widens gradually outwards, to receive the tapering beak of the retort in distillation. Like the retort, the receiver may be plain or tubulated.

A *quilled receiver* is one that has a tapering tube from its lower surface, which is inserted into a graduated bottle through a cork joint, when it is desirable to know accurately the amount of fluid that has passed over.

RECEPTACULA DURÆ MATRIS, Sinuses of the dura mater.

RECEPTACULUM CHYLI, 'receptacle of the chyle;' *R. Pecqueti* seu *Pecquetianum*, *Diversorium* seu *Stagnum chyli*, *Sacculus chyli* seu *ro'riser* seu *lac'teus*, *Alveus ampull'osus* seu *ampulles'cens*, *Utriculus lacteus*, *Vesicula chyli*, *Ampulla chyli* seu *chyli*, *Cisterna lumb'ris* seu *Chyli*, *Chylocoelis*, *Chylodochium*, *Latices lactei*, *Lumbar cistern*, *Reservoir of Pecquet*, (F.) *Réservoir du chyle*, *R. de Pecquet*, *Citerne lombaire*. A considerable dilatation of the thoracic duct, in front of the lumbar region of the vertebral column. It is the commencement of the duct.

RECEPTACULUM COTUN'NII. A triangular space, formed by a separation of the two laminae of the dura mater of the internal ear, near the middle of the posterior surface of the pars petrosa of the temporal bone, where the aquæductus vestibuli terminates. It is always filled with the *Fluid of Cotugno*.

RECEPTACULUM PECQUETI, *R. Chyli*—*r. Sellæ equinae* lateribus appositum, *Cavernous sinus*.

RECEPTIVITY, *Receptiv'itas*, (F.) *Réceptivité*. Same etymon as Receiver. A word used by Tissot to express the susceptibility of certain organs to receive morbid impressions.

RECEPTUM, Prescription.

RECESSIO, Paroxysm.

RECESSUS, Abscess, Sinus—*r. Sulciformis*, see *Fovea vestibuli*.

RECHAMALCA, *Rachamelca*.

RECHUTE, see *Relapse*.

RECIDIVA MORBI, *Relapse*.

RÉCIDIVE, see *Relapse*.

REC'IPĒ, (L.) (*re*, and *capere*, 'to take,') A Latin word which signifies 'take,' (F.) *Prenez*, and with which prescriptions are commenced. It is, often, represented by R, R̄, and was formerly by ♃, the symbol of Jove. See *Abbreviation*.

RÉCIPIENT, Receiver.

RECIPROCATION, VIBRATIONS OF, see *Sound*.

RECLINATIO, *Reclination*—*r. Palpebrarum*, *Ectropion*.

RECLINATION, *Reclinatio*, from *reclinare*, *reclinatum*, (*re*, and *clinare*, 'to bend,') 'to bend back.' A mode of operating for the cataract, which consists in applying the needle in a certain manner to the anterior surface of the cataract and depressing it into the vitreous humour, in such a way, that the front surface of the cataract is the upper one and its back surface the lower one.

RECLUSOR PALPEBRARUM, *Levator palpebræ superioris*.

RECOMPOSITION, *Metasynchrisis*.

RECONVALESCENTIA, *Convalescence*.

RECORDATIO, *Memory*.

RECORDATUS, *Memory*.

RECORPORATIVUS, *Metasynchrisis*.

RECOVERY, *Restauratio*.

RECREATIO, *Restauratio*.

RECREMENT, *Recrementum*, from *re*, and *cernere*, *erectum*, 'to sift.' A humour, which, after having been separated from the blood, is again returned to it; such as the saliva, the secretion of serous membranes, &c. Such fluids are said to be *recrementitious*, (F.) *Récémentieux*, *Récémentiel*; *Humores inquin'ni*.

RECREMENTA VESICÆ, *Urine*.

RECREMENTITIAL FLUIDS, see *Recrement*.

RECREMENTO-EXCREMENTITIAL.

Applied to secreted fluids, as the saliva, bile, &c., which are in part reabsorbed and in part excreted.

RECREMENTUM, *Recrement*.

RECRUDESCENTIA, *Palinco'tesis*, *Recrudescence*, from *re*, 'again,' and *crudus*, 'raw.' An increase of a disease after a temporary remission.

RECTAL, *Rectalis*. Appertaining, or relating to, the rectum,—as '*rectal tube*.' See *Tube*, *rectal*.

RECTIFICATION, *Rectificatio*, from *rectum facere*, 'to make right.' An operation by which certain liquids are purified by distilling them, either singly or after admixture with other substances.

RECTITIS. A hybrid word, from *rectum*, and *itis*, denoting inflammation; properly *arthritis*, or *proctitis*. Inflammation of the rectum. *Proctalgia inflammatoria*.

RECTO, in composition, signifies relating or belonging to the rectum.

RECTOCELE, *Cystocele*.

RECTOSTENOSIS, *Stricture of the rectum*.

RECTO-UTERINE, *Recto-uterinus*, from *rectum*, and *uterus*. Appertaining, or relating, to the rectum and uterus.

RECTO-UTERINE FOLDS, see *Uterus*.

RECTO-VAGINAL, *Recto-vaginalis*. That which relates or belongs to the rectum and vagina.

RECTO-VAGINAL FISTULA is owing to a preternatural communication between the rectum and vagina through the above septum.

RECTO-VAGINAL SEPTUM, (F.) *Cloison recto-vaginale*, is formed by the junction—back to back—(or by what the French term *adossément*) of the rectum and vagina. It separates these two canals from each other.

RECTO-VESICAL, *Recto-vesicalis*. Having relation to the rectum and bladder; as the "*recto-vesical fold or pouch*" of the peritoneum, between the rectum and bladder. See *Urinary Bladder*.

RECTUM, from *rectus*, so called from a notion that it is straight. It is not so. *Intestinum Rectum*, *Apeuthys'menos*, *Euthyen'teron*, *Longaon*, *Longas*, *Longanon*, *Archos*, *Cys'saros*, *Princeps*, *Monocolon* [?], *Bum-gut*, (Prov.) *Jot-gut*. The third and last portion of the great intestine. It forms the continuation of the sigmoid flexure of the colon, occupies the posterior part of the pelvis, and extends from the left side of the sacro-vertebral articulation to the coccyx, before which it opens outwards by the orifice called the *anus*. It is cylindrical, but *saccated*, as it were, at its inferior portion, where it is consequently larger, and is attached to the sacrum by the mesorectum.

Like the other portions of the canal it is formed of three membranes. Towards the lower extremity, some parallel and longitudinal wrinkles are observable on its inner surface: these are the *Columnæ, Columnæ car'nææ* of the *Rectum* or of *Morgagni*, (F.) *Columnæ du rectum* ou de *Morgagni*. They are merely folds of the mucous membrane, between which is a number of *Lacunæ*. The arteries of the rectum are numerous. They proceed from the inferior mesenteric, hypogastric, and internal pudic, and are called *hemorrhoidal*. The veins open, partly into the hypogastric vein, partly into the inferior mesenteric. The nerves proceed from the sciatic and hypogastric plexuses. The rectum receives the fecal matters, as they pass from the colon, which serves as a reservoir for them.

RECTUS, 'straight.' (F.) *Droit*. A term, used in anatomy for parts that pursue a straight course; — as

RECTUS ABDOM'INIS, (F.) *Pubio-sternal, Sterno-pubien* (Ch.), *Droit de l'abdomen*. A long flat muscle, situate at the anterior part of the abdomen, and separated from that of the opposite side by the *linea alba*. It is attached, above, to the cartilages of the last three true ribs; and, below, to the pubis by a very strong tendon, the outer edge of which is continuous with the fascia transversalis. This muscle is enclosed in an aponeurotic sheath; and, in its course, has three or four transverse aponeurotic intersections. It bends the chest on the pelvis, and conversely.

RECTUS ANTERIOR BREVIS, *Rectus capitis internus minor* — r. *Anterior longus*, R. *capitis internus major* — r. *Capitis anticus longus*, R. c. *internus major*.

RECTUS CAPITIS INTERNUS MAJOR, *R. internus major* seu *anterior longus* seu *capitis anticus longus*, (F.) *Trachélo-basilaire, Grand droit antérieur de la tête*. This muscle is long in proportion to its breadth, flat, and broader above than below. It is situate at the anterior and lateral part of the neck, and arises from the transverse processes of the third, fourth, fifth, and sixth cervical vertebrae. It is inserted into the basilar process of the occipital bone.

RECTUS CAPITIS INTERNUS MINOR, *R. internus minor* seu *anterior brevis, Rev'ueus, An'nuens*, (F.) *Petit trachélo-basilaire, Petit droit antérieur de la tête*. This is situate deeper than the last. It is thin, flattened, irregularly quadrilateral, and passes from the anterior surface of the body of the first vertebra, near the origin of the transverse process, to be inserted into the basilar process.

RECTUS CAPITIS LATERA'LIS, *R. lateralis* seu *lateralis Fallo'pii, Transversalis anticus primus*, (F.) *Trachélo-atloïdo-basilaire, Atloïdo-sous-occipital* (Ch.), *Droit latéral de la tête*. There is a muscle of this name on each side of the head. It is flat, quadrilateral, and passes from the transverse process of the atlas to the occiput, behind the jugular fossa. It inclines the head to one side.

RECTUS CAPITIS POSTI'CUS MAJOR, *R. Major* seu *Capitis posticus minor* (Albinus), *Spini-axoïdo-occipitalis*, (F.) *Axoïdo-occipitale* (Ch.), *Grand droit postérieur de la tête*. A flat, triangular muscle, situate at the posterior and superior part of the neck. It extends from the spinous process of the second cervical vertebra to the external surface of the lower semicircular ridge of the occipital bone. This muscle extends the head, inclines it to one side, and causes it to experience a rotary motion, which directs the face to its side.

RECTUS CAPITIS POSTI'CUS MINOR, *R. minor*, (F.) *Tuber-atloïdo-occipital, Atloïdo-occipital* (Ch.), *Petit droit postérieur de la tête*. A flat,

triangular muscle, situate beneath the last, which passes from the posterior arch of the atlas to the occipital bone. It extends the head.

RECTUS CAPITIS POSTICUS MINOR, R. c. p. major — r. *Cruris*, R. *femoris*.

RECTUS EXTERNUS OC'ULI, *Abductor oculi, Indignabundus, Indignatorius, Iracundus, Oculum movens secundus, Orbito-ectus-scleroticien*. All the recti muscles of the eye, four in number, arise from the bottom of the orbit, and are inserted into the sclerotic coat of the eye. The *Rectus externus*, (F.) *Droit externe, Irascible* ou *Abducteur*, is divided, at its posterior extremity, into two portions, one of which is attached to the outer part of the foramen opticum, and the other to the sphenoid bone.

RECTUS FEM'ORIS, *Rectus* seu *Grac'illis anterior* seu *cruris*, (F.) *Ilio-rotulien, Droit antérieur de la cuisse*. A straight muscle, seated at the anterior part of the thigh. It extends from the anterior and inferior spine of the ilium and the cotyloid cavity of the patella. This muscle extends the leg upon the thigh, and conversely. It can, also, bend the thigh upon the pelvis or carry the pelvis forward.

RECTUS INFERIOR OC'ULI, *Depres'sor oculi, Tim'idus, Dep'rimens, Hum'ilis, Oculum movens quartus*, (F.) *Sous-optico-sphéno-scleroticien, Droit inférieur ou abaisseur de l'œil, Muscle humble*, arises below the optic foramen, from the sphenoid bone. It depresses the eye.

RECTUS INTERNUS OC'ULI, *Adducens oculi, Bibo'torius, Oculi adductor, Oculum movens primus*, (F.) *Orbito-intus-scleroticien, Droit interne de l'œil ou adducteur ou buveur*. It arises from the sphenoid at the inferior part of the foramen opticum. It turns the eye towards the nose.

RECTUS SUPERIOR OC'ULI, *Atto'lens oculi* seu *oculum, Elevator seu Elevator oculi, Superbus, Oculum movens tertius*, (F.) *Sus-optico-sphéno-scleroticien, Droit supérieur ou Élévateur de l'œil, Dédaignéus*, is attached to the circumference of the foramen opticum.

All the recti muscles are concerned in the voluntary motions of the eye. The oblique muscles have been supposed by Sir C. Bell to execute the involuntary.[?]

RECTUS INFERIOR FEMORIS, *Gracilis* — r. *Internus major*, R. *capitis internus major* — r. *Internus minor*, R. *capitis internus minor* — r. *Lateralis*, R. *capitis lateralis* — r. *Lateralis Fallopii*, R. *capitis lateralis* — r. *Major*, R. *capitis posticus major* — r. *Minor*, R. *capitis posticus minor*.

RECUBITORIUM, *Anaclinterium*.

RECU'PERATION, *Restauratio*.

RECU'PERATIVE, *Recu'peratory*, from *recuperatio*, 'recovery.' *Restorative*. Recovering. Belonging to recovery.

RECU'R'ENT, *Recu'rrens*, from *recurrere*, (*re*, and *currere*), 'to run back.' A name given to several arterial and nervous branches, which seem to re-ascend towards the origin of the trunk whence they emanate.

RECURRENT ARTERIES. This name has been given to several arteries of the forearm, and to one of the leg. In the forearm, there are, 1. The *Radial recurrent, Artère récurrente de l'épicondyle* (Ch.), which arises from the superior part of the radial, and ascends between the supinator longus, s. brevis, and the brachialis internus. 2. The *anterior cubital recurrent, A. récurrente de l'épitrachlée* (Ch.), which arises from the upper and inner part of the cubital, and ascends between the pronator teres and brachialis internus. 3. The *posterior cubital recurrent*, which arises from the preceding artery, or from the cubital itself, and ascends between the olecranon and internal tuberosity of the humerus. 4. The *posterior radial recurrent, A. récurrente olécranième*

(Cb.). It arises from the posterior interosseous, and ascends between the posterior cubital and anconeus muscles. In the leg,—the *Arteria recurrens tibialis*, *A. recurrens du genou* (Cb.), is furnished by the anterior tibial, and ascends to the tibialis anticus muscle.

RECURRENT BANDAGES are formed by convolutions of bandages, which make a kind of cap for the part—as the head—to which they are applied.

RECURVATIO, see Hump.

RECUTITUS, Apella.

REDBEAN, *Abrus precatorius*.

REDBERRY, *Arbutus uva ursi*, *Gaultheria*, *Panax quinquefolium*—*r. Bitter*, *Cornus Florida*—*r. Swamp*, *Vaccinium oxycoccos*.

REDGOWN, *Strophulus*.

RED HEAD, *Aselepias Curassavica*.

REDMAILKES, *Papaver rhœas*.

REDROD, *Cornus sericea*.

RED ROOT, *Celastrus*, *Lachnanthes tinctoria*, *Sanguinaria Canadensis*.

REDSHANKS, *Polygonum persicaria*.

RED WATER TREE, see Sassy Bark.

REDIMICULUM, *Diadema*.

REDINGOTES ANGLAISES, see Condom.

REDINTEGRATIO, Regeneration, Restoration.

REDIVIA, *Paronychia*.

RÉDONNANCE, *Plethora*.

REDOUBLEMENT, Exacerbation, Paroxysm.

REDRESSEUR UTÉRIN, Pessary, intra-uterine.

REDS, *Menses*.

REDUCTIO, Reduction, Taxis—*r. Præputii Impedita*, *Phimosis*.

REDUCTION, *Reductio*, *Repositio*, *Restitutio*, *Diapylaxis*, *Diaplasmus*, *Syntaxis*, from *reducere*, *reductum*, (*re*, and *ducere*, *ductum*, 'to lead,') 'to bring back.' A surgical operation, the object of which is to restore displaced parts to their original situation. Thus, we say the reduction of a luxation, when the displaced parts are again brought to their proper relative situation. The reduction of a hernia is the restoration of the protruded parts to the cavity of the abdomen. This is, also, called *Taxis*.

In pharmacy, the process of restoring oxides, chlorides, sulphurets, &c., to the metallic state.

REDUNDANTIA, *Plethora*.

REDUVIA, *Paronychia*.

REED MACE, *Typha latifolia*.

REFLECTIO, *Restauratio*.

REFLECTIVA, *Analeptica*.

REFLECTUS, *Restauratio*.

REFICIENTIA, *Analeptica*.

REFLECTION, *Reflexio*, (*re*, and *flecto*, *flectum*, 'to bend,') A bending or turning back. Duplicate.

REFLECTOR EPIGLOTTIDIS. A muscle, which arises from the arytenoid cartilage and inner part of the thyroid, and is inserted into the lateral edges of the epiglottis.

REFLEX MOVEMENTS, see Motion—*r. System of nerves*, see Excito-motory, and Nerves.

REFLEXIO, Reflection—*r. Palpebrarum*, *Ectropion*.

RÉFORME, *Invaliding*.

REFRACT'ION, *Refractio*, *Photocampsis*, *Diaclasis*, from *re*, and *frangere*, *fractum*, 'to break.' The change of direction which rays of light experience when they pass obliquely from one medium into another of different density. If the light passes from a rarer to a denser medium, it approaches the perpendicular raised at the point of immersion. The contrary occurs, when it goes from a denser to a rarer medium. The theory of lenses, telescopes, and of the eye, rests entirely on this property of light.

RÉFRIGÉRANT, see Alembic.

REFRIG'ERANTS, *Refrigerantia*, *Psychitica*, *Antihelma*, *Frigificientia*, (F.) *Rafracthissants*, *Réfrigératifs*, *Desaltérants*, from *re*, and *frigere*, 'to cool.' Medicines which depress the morbid temperature of the body. The chief reputed refrigerants are the Potassa Nitras [?], the Sodæ Boras [?], but chiefly the abstraction of caloric by ice and ice-drinks, cold water, cold lemonades, soda-water, and effervescing draughts internally; and externally, cool air, cold water, evaporating lotions, and frigorific mixtures.

RÉFRIGÉRATIFS, Refrigerants.

REFRIGERATOR, see Alembic.

REGENERATIO, Reproduction.

REGENERATION, *Regeneratio*, *Palingenesis*, *Redintegratio*, from *re*, and *generare*, *generatum*, 'to beget.' Reproduction of a part of the body, which has been destroyed.

REG'IMEN, (F.) *Régime*, from *regere*, 'to govern.' The rational and methodical use of food, and of everything essential to life; both in a state of health and disease. It is often restricted, in its meaning, to *Diet*. It is sometimes used synonymously with hygiene.

RÉGIME SANITAIRE and SYSTÈME SANITAIRE, mean the measures and regulations adopted to prevent the development and propagation of diseases reputed to be pestilential, — especially plague, yellow fever, and cholera.

REGINA PRATI, *Spiræa ulmaria*.

REGIO, Region.

REGIO AURICULARIS. The region of the ear.

REGIO BUCCA' LIS. The region of the cheek.

REGIO CARDIACA, Epigastric region.

REGIO CERVICA' LIS. The region of the neck. The cervical region.

REGIO EPIGASTRICA, Epigastrium.

REGIO FACIA' LIS. The facial region.

REGIO FRONTALIS. The frontal region.

REGIO GASTRICA, Umbilical region—*r. Hypogastrica*, see Hypogastrium—*r. Hypochondriaca*, *Hypochondre*—*r. Iliaca*, *Iliac region*—*r. Inguinalis*, *Inguinal region*—*r. Ischiadica*, *Ischiadic region*—*r. Jugalis*, *Jugal region*—*r. Lumbalis*, *Lumbi*—*r. Mentalis*, *Mental region*—*r. Mesogastriaca*, *Umbilical region*—*r. Nasalis*, *Nasal region*—*r. Nuche*, *Nuchal region*—*r. Nuchalis*, *Nuchal region*—*r. Occipitalis*, *Occiput*—*r. Occipitalis inferior*, *Nuchal region*—*r. Perinaei*, *Perinæum*—*r. Præcordiaca*, *Præcordial region*—*r. Pubis*, *Pubic region*—*r. Stomachalis*, *Epigastric region*—*r. Stomachica*, *Epigastric region*—*r. Temporalis*, *Temple*—*r. Umbilicalis*, *Umbilical region*.

REG'ION, *Re'gio*. Same etymon. Anatomists have called regions, determinate spaces on the surface of the body or of different organs. Thus, the abdomen has been divided into several; to which different names have been given. See Abdomen, Epigastrium, Hypochondrium, Hypogastrium.

RÉGION OMBILICALE, Umbilical region.

REGIONAL ANATOMY, see Anatomy.

RÈGLES, *Menses*—*r. Dvniés*, *Menstruation*, *vicarious*—*r. Difficiles*, *Dysmenorrhœa*.

RÉGLISSE, *Glycyrrhiza*.

RÈGNE ANIMAL, see Animal.

REG'ULAR, *Regula'ris*, from *regula*, (*regere*, 'to govern,') 'a rule.' According to rule. Applied to the types of a disease, and to the pulse, when according to rule.

REGULAR PRACTITIONER. One who practises his profession according to the rules established by law or custom.

REGULUS ANTIMONII, Antimonium.

REGURGITATION, *Regurgitatio*. The act by which a canal or reservoir throws back sub-

stances accumulated in it. *Mitral regurgitation*, for example, means the reflux of blood through the left auriculo-ventricular opening, during the contraction of the left ventricle. Regurgitation is also applied to the *puking* or *possetting* of infants; and to the *rising* of solids or fluids into the mouth in the adult.—from *re*, and *gorge*, (*gorges*), ‘the throat.’ (F.) *Rapport*. What is called “vomiting at pleasure” is regurgitation.

The substances brought into the mouth by regurgitation, the French call *Renvois*.

REIF, Psora.

REIN, Kidney.

REINE DES PRÉS, Spiræa ulmaria.

REINERZ, MINERAL WATERS OF. Reinerz is a small town in Silesia, three German miles from Glatz. The waters are acidulous chalybeates. The principal springs are the tepid drinking spring, the cold spring, and three bathing springs.

REINFORCEMENT, FASCICULUS OF, *F. Cuneatus*. A band of fibres from the *corpus innominatum*, or lateral part of the antero-lateral column of the medulla, which is continued up behind and around the corpus olivare, is lined on its inner or central surface with cineritious substance, enlarges as it ascends, passes over the upper surface of the pons Varolii, and is expanded into the optic thalamus. It thus forms, in its course, the anterior paries of the fourth ventricle, and is brought into view by brushing away the *tuberculum cinereum* or gray matter of the ventricle. The band has received these names owing to its constantly increasing as it ascends, and being mixed up with gray matter on its inner face, from which its seems to derive new fibres.

REINS, Kidneys, Lumbi.

REJECTIO, *Anagoge*, from *rejecere*, *rejectum*, (*re*, and *jacere*, ‘to cast,’) ‘to cast back.’ Every excretion by the mouth,—spitting, expectoration, regurgitation, or vomiting.

REJECTIO SANGUINIS E PULMONIBUS, Hæmoptysis.

REJUVENESCENCE, *Rejuvenescencia*, from *re*, ‘again,’ and *juvenescens*, ‘growing young’ (*juvenis*, ‘a youth’.) A renewal of youth. The state of being young again. The assumption of the characteristics of youth by the aged.

RELÂCHANT, Relaxant.

RELÂCHEMENT, Relaxation.

RELAPSE, *Hypotrophê*, *Epistrophê*, *Hypotrophê*, *Morbi recidiva*, *Hypotropiasmus*, from *re*, ‘again,’ and *labor*, *lapsus*, ‘I fall down.’ The return of a disease, during, or shortly after, convalescence. The French use *Rechute* in this sense; and *Récidive* (*Morbus recidivus*) for the return of a complaint, at a greater or less period after the complete recovery of health.

The terms *Relapsing fever*, *Short fever*, *Five-day fever*, *Seven-day fever*, *Bilious Remittent fever*, *Remitting Icteric fever*, and *Mild Yellow fever*, (F.) *Fièvre à rechute*, have been given to a form of continued fever, which has occasionally appeared epidemically, as in Edinburgh, in 1843 and 1847, and was generally attended with icteric symptoms. The main phenomena disappeared at about the end of a week; but in many cases a relapse occurred about the end of a fortnight. Few died of the affection.

RELAPSING FEVER, see Relapse.

RELATIO, *Rapport*.

RELATION, FUNCTIONS OF, see Function.

RELAXANT, *Laxans*, *Mollicium*, *Chalasticum*, *Percuticum*, (F.) *Relâchant*, from *re*, and *laxare*, ‘to loosen.’ A medicine which diminishes

the tension of organs. Mucilaginous and fatty substances are relaxants.

RELAXANTIA, Emollients.

RELAXATIO CORDIS ET ARTERIARUM, Diastole.

RELAXATION, *Relaxatio*. Same etymon. *Chalastis*, *Chalastimos*, (F.) *Relâchement*. In *Physiology*, relaxation is opposed to contraction. In *Pathology*, it means great looseness of a part.

RELÈVE-PAUPIÈRE. An instrument for raising the eyelid.

RELEVEUR DE L'ANUS, Levator ani—*r. de la Lèvre inférieure*, Levator labii inferioris—*r. du Menton*, Levator labii inferioris—*r. de l'Omoplate*, Levator scapulæ—*r. de la Prostate*, Levator prostatae—*r. de l'Urèthre*, Levator urethrae.

RELIGIOUS DISEASES, (F.) *Maladies religieuses*. Diseases affecting the nervous system, and arising from the excitement of religious emotions. See *Convulsionnaire*.

RELIQUAT, (F.) The remnant or remains of a disease.

REMAK FIBRES, see Fibres, Remak.

REMANSIO MENSIIUM, Amenorrhœa.

REMÈDE, Clyster, Medicament—*r. du Capuchin*, Liqueur hydrargyri nitrici—*r. de Durandé*, Liqueur anodynus terebinthinatus—*r. du Duc d'Antin*, Liqueur hydrargyri nitrici.

REMEDIAL, Medicinal.

REMIATE, Medicinal.

REMIABLESS, Incurable.

REMEDIUM, Juvans, Medicament—*r. Dentificium*, Dentifrice.

REMEDY, Medicament—*r. English*, Cinchona.

REMISSIO, Decline, Remission—*r. Cordis* et *Arteriarum*, Diastole—*r. Morbi*, Remission—*r. Virium*, Atony.

REMISSESION, *Remissio*, *Epanesis*, *Anesisis*, *Submissio*, *Aphesis*, *En'dosis*, *Meiosis*, from *remittere*, (*re*, and *mittere*, *missum*, ‘to send’), ‘to relax.’ In a more extensive signification, a temporary diminution of the symptoms of a disease, either acute or chronic, *Remissio morbi*. Diminution in the febrile symptoms, such as occurs in a remittent fever between the exacerbations.

REMETIC, Medicament.

REMITTENS ICTERODES, Fever, yellow.

REMITTENT, *Remittens*. Same etymon. Any disease which presents remissions.

REMITTENT OF CHILDREN, Fever, infantile remittent.

REMITTENT FEVER, *Febris remittens*, *Epanectus*, *Exacerbating*, *paroxysmal*, *sub-continual*, *endem'ic*, *endem'ial* or *endem'ial fever*, (F.) *Fièvre rémittente*, is one which strikingly exacerbates and remits, but without intermission. The ordinary bilious fever of the United States is a simple remittent—*Epanectus mitis*, (F.) *Fièvre rémittente simple*.

REMITTENT FEVER, BILIOUS, Remittent fever, see Relapse.

REMITTING ICTERIC FEVER, see Relapse.

REMORA, from *remorari*, (*re*, and *mora*, ‘delay,’ ‘to arrest.’) Stoppage, stagnation,—as of blood. Also, the name of two surgical instruments, intended to retain parts *in situ*. The one was used, formerly, in castration, to prevent the intestines from protruding at the inguinal ring; the other, called *Remora Hilda'ni*, (F.) *Arrêt d'Hildan*, *Echene'is*, was employed to maintain fractures and luxations reduced. It is not now used.

REMORA ARATRI, *Ononis spinosa*.

REN, Kidney.

RENAL, *Renalis*, from *Ren*, 'the kidney.' That which relates to the kidney.

RENAL ARTERIES, *Emulg'ent Arteries*, are very large and short, and commonly two in number—one to each kidney. They arise from the sides of the abdominal aorta, forming with it a right angle. The left is commonly a little more anterior and elevated than the right. After a short course, they arrive at the fissure of the kidney, where they divide, before entering it, into three or four very considerable branches.

RENAL CAPSULE, Capsule, renal—r. Nerve, see Splanchnic Nerves.

RENAL PLEXUSES, *Emulg'ent Plexuses*. These are two:—one on each side. They proceed from fasciculi of the solar and cœliac plexuses; from the outer side of the semilunar ganglion and the final expansion of the small splanchnic nerves. These plexuses begin by three or four ganglions, situate at the commencement of the renal artery; and they give off from their circumference many fine, straight filaments, which do not anastomose, and which enter the kidney with the divisions of the renal artery. These divisions they accompany.

RENAL VEINS, *Emulgent Veins*. These are very large. Their roots follow the same course as the arteries in the substance of the kidney. In the fissure or pelvic portion of the kidney, they unite into a single trunk, which passes transversely inwards, and opens at the side of the vena cava descendens.

RENCHUS, Snoring, Stertor.

REN'CVLUS, *Reniculus*, *Ren'ulus*, diminutive of *Ren*, 'a kidney.' A small kidney. A lobe of the kidney.

RENDES, Rennet.

RENEAL'MIA EXALTA'TA, *Alpin'ia exaltata* seu *tubulata*. A plant of British Guiana, which is possessed of diaphoretic and diuretic properties; and, in large doses, is emetic. It is much used there in dropsy, rheumatism, dysentery, &c. The bruised rhizoma is the part employed.

RENES SUCCENTURIATI, Capsules, renal.

RENICULUS, Renculus.

RENIFORM, Nephroid.

RENNES, MINERAL WATERS OF. Thermal salines in the department of Aube, France, containing carbonic acid and chloride of magnesium. Temperature 103 to 121°, of Fahr.

RENNET, *Runnet*, *Coügulum*, *πυρία*, *πυρία*, *Pytia*, *Pyet'ia*, from (G.) *gerinnen*, 'to coagulate' [?], (F.) *Caille-lait*. When the fourth stomach or *Abomasus* of the calf is salted and dried, it possesses the property of coagulating milk, when a portion of it is soaked in water, and the infusion—*Rennet*, *Rendles*, *Ronning*, (Prov.) *Earning*, *Preaser*, *Read*, *Running*, *Steep*—is added to milk.

RENNET WHEY, see Serum lactis.

RENONCULE, *Ranunculus*—r. *Bulbeuse*, *Ranunculus bulbosus*.

RENOUÉE, *Polygonum aviculare*—r. *Âcre*, *Polygonum hydropiper*.

RENOUEUR, (F.) *Rebouteur*, *Rhabilleur*, from *re*, and *nouer*, (*nodus*, 'a knot,') 'to tie or knit again.' A bone-doctor:—a bone-setter. One who makes a trade of reducing fractures and dislocations.

RENOVATIO, Ananæosis.

RENSELAERIA VIRGINICA, *Peltandra Virginia*.

RENUENS, *Rectus capitis internus minor*.

RENULUS, Renculus.

RENUM ATONIA, *Nephratonia*—r. *Paralysis*, *Nephratonia*.

RENUNCIATIO, *Rapport*.

RENVERSEMENT DE LA LANGUE, *Paraglossa*—r. *de la Matrice*, *Uterus*, inversion of the—r. *des Paupières*, *Ectropion*—r. *du Rectum*, *Proctocele*—r. *de la Vessie*, *Exocyste*, *Exstrophia* of the bladder.

RENVOIS, see Regurgitation,

REPANDATIO, Lordosis.

REPARATION, *Restauratio*.

REPAR'ATIVE, *Repar'atory*. Having the power of restoring or repairing.

REPELLENTIA, Repellents.

REPEL'LENTS, *Repellen'tia*, *Repercutient'ia*, *Apocrus'tica*, *Repercussives*, (F.) *Répercussifs*, from *re*, and *pellere*, 'to drive.' Medicines which, when applied to a tumefied part, cause the fluids, that render it tumid, to recede, as it were, from it. Astringents, cold water, ice, &c., are repellents.

RÉPERCUSSIFS, Repellents.

REPERCUSSIO, *Contra-fissura*, *Repercussion*.

REPERCUS'SION, *Repercus'sio*, *Anac'lasis*, from *re*, and *percutio*, *percussum*, (*per*, and *cutere*, 'to shake or batter,') 'I strike back.' Disappearance of a tumour or cutaneous eruption, in consequence of the application of a repellent. The action of a repellent remedy. The French writers use the term *Délitescence*, *Delitescen'tia*, for the sudden disappearance of a tumour, inflammation, eruptive disease, or purulent collection, without the disease occurring in any other part of the body: in this respect delitescence differs from metastasis: *Délitescence* of an inflammation or 'sudden disappearance' is distinguished by certain French pathologists from *Resolution*. *Repercussion* also means *Ballotement*.

REPERCUSSIVES, Repellents.

REPERCUTIENTIA, Repellents.

REPLETION, Fulness, Plethora.

REPLI LONGITUDINAL DE LA MÉNINGE, Falx cerebri.

REPOSITIO, Anaplasia, Reduction, Taxis.

REPOUSSOIR, *Punch*—r. *d'Arêtes*, *Probang*.

REPRIMENS, Pestichetics.

REPRODUCTION, *Reproduc'tio*, *Regenera'tio*, from *re*, and *producere*, *productum*, (*pro*, and *ducere*.) The function by which living bodies produce bodies similar to themselves. See Generation. As a general remark, it will be found true, that the larger animals are uniparous, and the smaller, which are more exposed to destruction, multiparous. The mammalia being of the same natural class as man, it may be useful to compare them in this respect.

COMPARATIVE TABLE OF REPRODUCTION IN THE CLASS MAMMALIA.

Species.	Age capable of engendering.	Duration of gestation.	Number of young at each birth.	Period of cessation of the function.	
<i>Primates.</i>					
Man	14 years	9 months	1 to 3	At a somewhat advanced age.	
Monkeys (large).....	3 years	7 months	Do.		
Do. (long tailed)	2 years	6 months	Do.		
<i>Carnivora.</i>					
Bear	2 years	112 days	1 to 4	25 to 30 years.	
Badger	3 to 4	20 to 25 years.	
Hedgehog	1 year	1 mo. and 10 days	3 to 5	Produces during life.	
Ferret.....	11 months	Do.	5 to 9 twice a year		
Otter.....	3 months	3 to 4	8 to 10 years.	
Pole-cat, Marten, Weasel, and Ermine, }	before 1 year	56 days	3 to 6		
Didelphus, Opossum, and Philander, }	4 to 6		
Lion	2 years	3 to 4 months	3 to 4		
Tiger, }	Do.	3 months	4 to 5		
Leopard }		
Lynx	9 weeks	3 to 4		
Wild Cat	before 1 year	56 days	4 to 6		
Wolf	2 years	73 days	5 to 9		
Dog, in the most natural state, }	10 months	63 days	3 to 6		
Fox	1 year	2 months	Do.	10 or 12 years.	
Jackall	Do.	5 to 8	Produces during life.	
Isatis	63 days	6 to 7		
Phoca	3 months (?)	2 to 3		
<i>Rodentia.</i>					
Squirrel.....	1 year	45 days	3 to 4 twice a year		Produces during life
Flying Squirrel.....	3 to 4		Do.
Ondatra	3 to 5		Lives 6 years.
Beaver	4 months	2 to 3		Lives 8 years.
Hare	1 year	30 days	{ 2 to 4 several } times a year		
Rabbit	6 months	Do.	4 to 8 do.		
Rat	Do.	5 or 6 weeks	5 to 6 do.		
Mouse	Do.	1 month	Do.		
Marmot.....	6 weeks	2 to 4		
Guinea Pig.....	5 to 6 weeks	3 weeks	5 to 8 times a year		
Dormouse	1 year	3 to 5		
<i>Edentata.</i>					
Armadilla	4 times a year	7 to 8 years. (?)	
<i>Ruminantia.</i>					
Camel.....	4 years	11 months or 1 y'r	1	40 to 50 years.	
Dromedary	Do.	Do.	1	Do.	
Buffalo	3 years	9 months	1	15 to 18 years.	
Beef.....	2 years	Do.	1 to 2	9 years.	
Lama	3 years	Do.	12 years.	
Reindeer	2 years	8 months	1	Lives 16 years.	
Buck and Doe	1½ year	Do.	1 to 2	Lives 25 or 30 years.	
Roebuck	Do.	5 months	Do.	Lives 12 or 15 years.	
Saiga (Antelope).....	1 year	Do.	Do.	Lives 15 or 20 years.	
Chamois and Wild Goat	Do.	Do.	1, 2, and 3	Lives 18 or 20 years.	
Goat	Do.	Do.	Do.	7 years.	
Musimon	1½ year	Do.	1 to 2	8 or 10 years.	
Sheep	1 year	Do.	Do.	8 years.	
<i>Solipedes.</i>					
Horse	2½ years	900 days	1 to 2	25 or 30 years.	
Ass	Do.	Do.	Do.	Do.	
Zebra	Do.	Do.	Do.	Do.	
<i>Pachydermata.</i>					
Hog	9 months or 1 year	4 months	10 to 20	15 years.	
Elephant.....	16 years (?)	9 to 11 months	1 or 2	Lives 70 years. (?)	
Rhinoceros	5 years (?)	1 or 2 (?)	Lives 60 years. (?)	
Hippopotamus	1	Lives 60 years. (?)	
Morse	9 months	1		

REPRODUCTION MÉRISMATIQUE, see Generation.

REPULSORIUM, Punch,
REPURGATIO, *Anacathar'sis*, from *re*, and *urgare*, 'to cleanse.' According to Castelli—purgation by transpiration or by excretion. Medicines producing this effect are called *Repurgantia*.

REQUIES, Acinesia.

REQUIETIO, Acinesia.

RES CONTRA-NATURAM. 'Things against nature,' (F.) *Choses contre-nature*, are those things which tend to destroy man;—as disease, and every thing connected with it.

RES CULINARIA, Culinary art—r. *Medica*, *Medicina*.

RES NATURA'LES, (F.) *Choses naturelles*. Those things, which, by their union, were conceived to constitute the nature of man; such as the elements, temperaments, humours, spirits, &c.

RES NON NATURA'LES, (F.) *Choses non-naturelles*. Those things which, anciently, formed the matter of hygiene. See Non-naturals.

RES VENEREA, Coition—r. Vestiaría, Vestitus.

RÉSEAU, Rete, Reticulum—r. *Admirable*, Rete mirabile—r. *Intermédiaire*, see Corpus spongiosum urethræ—r. *Merveilleux*, Rete mirabile.

RESECTIO, Resection—r. Articulorum, see Resection.

RESECT'ION, *Resect'io*, from *resecare*, *resectum*, (*re*, and *secare*), 'to cut off.' A name, given, especially by the French surgeons, to operations in which the carious extremities of long bones, or the unconsolidated extremities of fractured bones forming irregular joints, are removed with the saw.—*Resectio articulo'rum*, *Decapita'tio articulo'rum*.

RESECT'ION, see Amputation.

RESEDA CRISPATA—r. Luteola—r. Lanceolata—r. Luteola.

RESEDA LUTE'OLA, *R. lanceolata seu crispata*, *Lute'ola*, *Weld*, *Dyer's Weed*. A European plant naturalized in the United States, which was at one time used as a diaphoretic and diuretic.

RESERANS, Aperient,

RESERVE AIR, see Respiration.

RÉSERVOIR DE LA BILE, Gall-bladder—r. *du Chyle*, *Receptaculum chyli*—r. *des Larmes*, *Lachrymal sac*—r. of *Pequet*, *Receptaculum chyli*—r. *de Pequet*, *Receptaculum chyli*—r. of the Thymus, see Thymus.

RESIDENTIA, Sediment.

RESIDUAL AIR, see Respiration.

RESINUS, Camus.

RESIN, *Resi'na*, *Rheti'nē*, (F.) *Résine*. A vegetable product, commonly dry and concrete, more or less brittle, inodorous or slightly odorous, insipid, or of an acrid warm taste; of a smooth, glassy fracture, heavier than water, inflammable, insoluble in water, soluble in alcohol, ether, and yolk of egg, and negatively electrifiable by friction. Many resins are used in medicine; the greater part are purgative and irritating. Some act like acrid poisons.

RESIN, ACAROID, see Xanthorrhœa—r. Botany Bay, see Xanthorrhœa—r. Cayenne, Caoutchouc—r. of New Holland, see Xanthorrhœa—r. of the Spruce fir, see Pinus abies—r. of Xanthorrhœa, see Xanthorrhœa.

RESINA, Resin—r. Abietis, see Pinus abies, Pinus picea—r. Abietis humida, see Pinus abies—r. Abietis sicca, see Pinus abies—r. Acaroides, see Xanthorrhœa—r. Alba, see Pinus sylvestris—r. Alba humida, see Pinus Abies—r. Cayennensis, Caoutchouc—r. Copal, Copal—r. Elastica, Caoutchouc—r. Flava, see Pinus sylvestris—r. Fluida Canadensis, see Pinus balsamea—r. Jalapæ, *Extractum jalapæ resinosum*—r. Juniperi, *Sandarac*—r. Laricis, see Pinus larix—r. Lentiscina, see *Pistachia lentiscus*—r. Liquida pini balsameæ, see Pinus balsamea—r. Liquida pini laricis, see Pinus larix—r. Lutea Novi Belgii, see Xanthorrhœa—r. Nigra, *Colophonia*—r. Pini, see Pinus sylvestris—r. Pini pyreumatica liquida, see Pinus sylvestris—r. Pini abietis sponte concreta, see Pinus abies—r. Strobilina, see Pinus balsamea, and Pinus mughos—r. Terebinthi, see *Pistacia terebinthus*.

RESINATUM, *Rhetino'ton*. An epithet for wine impregnated with resin, and used by the ancients as a stomachic.

RÉSINE, Resin—r. *de Cayenne*, Caoutchouc—r. *Élastique*, Caoutchouc—r. *de Gaïac*, see Guaiacum—r. *Gomart*, see *Bursera gummifera*—r. *de Lierre*, see *Hedera helix*.

RESINOCE'NUM, *Rhetinoce'ron*, from *ρητιν*, 'resin,' and *κηρος*, 'wax.' A mixture of resin and wax.—Galen.

RESINOSA, in Pharmacy, resinous substances.

RÉSOLUTIFS, Discutients.

RESOLUTIO, Resolution—r. *Membrorum*, Paralysis.

RESOLUTIO MORBI. The resolution or disappearance of a disease; especially when without any critical evacuation.

RESOLUTIO ET DIABROSIS VENTRICULI, *Gastro-malacia*—r. *Nervorum*, Paralysis—r. *Ventriculi autopteica*, *Gastro-malacia*—r. *Virium*, *Dialysis*.

RESOLU'TION, *Resolut'io*, *Discus'sio*, from *resolvere*, (*re* and *solvere*, *solutum*, 'to loosen.') Removal or disappearance, as of a disease. Resolution is one of the terminations of inflammation, in which the inflamed part returns gradually, and without suppuration, to the healthy condition.

RÉSOLUTION DES MEMBRES, Paralysis.

RESOLVENTIA, Discutients.

RES'ONANCE, (F.) *Retentissement*, *Résonance*, *Résonnement*, from *re*, 'again,' and *sono*, 'I sound.' 'A return of sound.' A resounding; a reverberation of sounds. A thrilling of the voice more loud than natural; or its existence in a part where it is not heard in health,—as detected by auscultation. A thickened and hardened state of the lungs, caused either by a mass of crude tubercles, or by inflammation, is generally considered to produce this phenomenon, by rendering the lung a better conductor of the murmur of the voice in the bronchi. Hence the origin of the term *Bronchoph'ony*, from *βρογχος*, 'bronchus,' and *φωνη*, 'the voice;' (F.) *Voix bronchique*, *Voix tubaire*, *V. bourdonnaute*.

Resonance is also used in the sense of resounding; as when the chest is said to be resonant on percussion.

RESONANCE, VESIC'ULO-TYMPANIT'IC, see Vesiculo-tympanitic—r. Vibrations of, see Sound.

RESONITUS, Contra-fissura.

RESONANT, *Resonans*, *Resonus*, (F.) *Retentissant*, *Résonnant*. Resounding. See Resonance.

RÉSONNANCE, Resonance.

RESONNEMENT, Resonance.

RESORBENS, Absorbent.

RESORPTIO, Absorption. Resorption—r. Cutanea, see Absorption—r. Cutis, see Absorption.

RESORP'TION, *Resorp'tio*, from *resorbere*, *resortum*, (*re*, 'again,' and *sorbere*.) 'to absorb again.' Absorption of a fluid which has been previously deposited in a part by the exhalants, as of pus, blood, serum, &c.

RES'PIRABLE, *Respirabilis*. Same etymon as Respiration. Capable of being breathed. Adapted for respiration.

RESPIRAMEN, Respiration.

RESPIRAMENTUM, Respiration.

RESPIRATEUR, Respirator, Respiratory.

RESPIRATIO, Respiration—r. Abolita, *Apnoea*—r. Brevis, *Dyspnoea*—r. Difficilis, *Dyspnoea*—r. Stertens, *Stertor*—r. Stertuosa, *Stertor*.

RESPIR'ATION, *Respira'tio*, *Anap'nōē*, from *respiro*, (*re*, and *spiro*), 'I take breath.' *Anapneusis*, *Pneusis spiratio*, *Respira'men*, *Respiramentum*, *Respira'tus*, *Respir'itus*, *Spir'itus*. A function proper to animals, the object of which is, to place the materials of the blood—the mixture of the venous blood with lymph and chyle—in contact with atmospheric air, in order that it may acquire the vivifying qualities which belong to arterial blood. The organs for executing this function are, in the mammalia, birds, and reptiles, the lungs. In man, the respiration consists of mechanical and chymical phenomena. The mechanical are *Inspiration* and *Expiration*. The evident chymical phenomena consist in the formation of a certain quantity of carbonic acid, the absorption of a part of the oxygen of the air, and

the disengagement of a quantity of water in the state of vapour. In the healthy condition the respiration is easy, gentle, regular, and without noise. In man, the respirations are generally about 35 per minute in the first year of life; 25 during the second; 20 at puberty; and 18 in the adult age.

The air of respiration has been divided into first, the *residual air*, or that which cannot be expelled from the lungs, but remains after a full and forcible expiration, estimated at 120 cubic inches: secondly, the *supplementary or reserve air* or that which can be expelled by a forcible expiration, after an ordinary outbreathing, valued at 130 cubic inches: thirdly, the *breath, tidal or breathing air*, valued at 26 cubic inches: and fourthly, the *complementary or complementary air*, or that which can be inhaled after an ordinary inspiration, which amounts to 100 cubic inches. This estimate gives 250 cubic inches as the average volume of air which the chest contains after an ordinary expiration.

RESPIRATION BRONCHIQUE, see Murmur, respiratory.

RESPIRATION, BRONCHO-VESICULAR. A morbid modification of the respiratory murmur, having more or less of the characters of the bronchial and the vesicular respiration combined. It denotes incomplete solidification of the lung, as from the presence of tubercle. — Flint.

RESPIRATION OF THE CELLS, Murmur, respiratory — r. Cogged-wheel, Respiration, jerking — r. *Entrecoupée*, Respiration, jerking — r. *Ecogérée*, see Puerile — r. *Hypervésiculaire*, see Puerile.

RESPIRATION, JERKING, Cogged-wheel, or Wavy respiration, (F.) *R. Succadée* ou *Entrecoupée*. When the murmur of inspiration, in place of being continuous, is interrupted as by starts, it is called 'jerking.' It is a concomitant of incipient pleurisy, pleurodynia, spasmodic asthma, and tuberculous of the lung with corresponding pleuritic adhesion. — Walshe.

RESPIRATION, LUCTUEUSE, see *Luctueux* — r. Metallic, *Tintement métallique* — r. Nulle, see Murmur, respiratory.

RESPIRATION PROOF, Docimasia pulmonum.

RESPIRATION, PUERILE, see Puerile — r. *Râpeuse*, see Murmur, respiratory — r. *Rude*, see Murmur, respiratory — r. *Silencieuse*, see Murmur, respiratory — r. *Saccadée*, R. jerking — r. *Soufflante*, Murmur, respiratory — r. *Supplémentaire*, see Puerile — r. Tubal, see Murmur, respiratory — r. Wavy, Respiration, jerking.

RESPIRATOIRE, Respiratory.

RESPIRATOR, (F.) *Respirateur*. Same etymon. Various instruments, under this name, have been devised for the purpose of tempering the air before it reaches the lungs in winter. One of the best is that of Jeffrey, which is made of several layers of fine wire tissue.

RESPIRATORIUM VENTRIS, Diaphragm.

RESPIRATORIUS, Respiratory.

RESPIRATORY, Respiratorius, (F.) *Respirateur, Respiratoire*. Appertaining to respiration. An epithet applied to the murmur heard by auscultation in a healthy adult, during inspiration and expiration. It marks the entrance of the air into the cells, and its passage out of them. See Murmur.

RESPIRATORY, EXTERNAL, NERVE, see Thoracic nerves.

RESPIRATORY GANGLIA, see Encephalon.

RESPIRATORY, INTERNAL, NERVES, Diaphragmatic Nerves — r. Nerve of the face, Facial Nerve — r. Superior, nerve. Spinal Nerve.

RESPIRATORY TRACT, *Tractus respiratorius*. The middle column of the spinal marrow, described by Sir Charles Bell as that whence the respiratory nerves originate. See Nerves.

RESPIRATUS, Respiration.

RESPIRITUS, Respiration.

RESSERRÉ, (*VENTRE*), Constipation.

RESTA BOVIS, *Ononis spinosa*.

RESTAGNATIO, Eructation.

RESTAURANS, Analeptic, Corroborant.

RESTAURATIO, *Refectio, Refectus, Analep'sis, Anatrep'sis, Anacom'idè, Anale'tis, Anacete'sis, Apocatas'tasis*. Restoration of strength, after disease or great fatigue; *Epanortho'sis, Recreat'io, Redintegratio, Restauration'virium*. Return of the organs to their normal condition. *Recovery, Recuperation, Reparation*.

RESTAURATIO VIRIUM, see *Restauration*.

REST HARROW, *Ononis spinosa*.

RESTIFORMIS, from *restis*, 'a rope,' and *forma*, 'shape.' Shaped like a rope, as the 'Corpora restiformia.'

RESTIFORMIS PROCESSUS, Coracoid.

RESTITUTIO, Reduction — r. Organica, Morioplastice — r. Partium deperditarum, Morioplastice.

RESTLESSNESS, Agitation.

RESTORATION, *Restauration*.

RESTORATIVE, Analeptic, Corroborant.

RESTRICATIO INTESTINI RECTI seu ANI, Stricture of the rectum.

RESUMPTIVUS, *Resumptorius*; from *re*, 'again,' and *sumere, sumptum*, 'to take.' Causing to resume. *Resumptivum*. Any agent calculated to restore flesh and strength to one who has been reduced.

RESUMPTORIUS, *Resumptivus*.

RESURRECTION-MAN, *Resurrectionist*.

RESURRECTIONIST, *Resurrection-man, Body snatcher*: from *re*, and *urgere, surrectum*, 'to arise.' An individual who violates the sanctuary of the grave to obtain subjects for dissection.

RESUSCITATION, *Resuscitatio*, from *resuscitare*, (*re*, and *suscitare, sursum citare* seu *eiere*), 'to move up,' 'to stir up anew.' *Revivification*. The restoration of persons, apparently dead, to life. See Asphyxia and Suffocation.

RETCHING, Vomiturition.

RETE, Plexus — r. Malpighii, Corpus mucosum.

RETÈ, 'a net;' (*Retic'ulum*, 'a small net,') *Dictyon*, (F.) *Réseau*. A name given to the interlacing and decussation of blood-vessels, lymphatics, fibres, and nerves when they form a kind of network.

RETÈ has also been applied to the *epiploon*. — Castelli.

RETÈ MAJUS, Epiploon, gastro-colic.

RETÈ MIRABILÈ, (F.) *Réseau admirable, R. merveilleux*. A name given to the ramifications and anastomoses of the internal carotid and vertebral arteries at the base of the brain.

RETÈ MIRABILÈ seu **RETÈ VASCULO'SUM MALPIGHII** is the plexus formed on the cells of the lungs by the minute ramifications of the pulmonary artery.

RETÈ MUCOSUM, Corpus mucosum.

RETÈ TESTIS, *Retè Vasculo'sum Testis* seu *Halleri*. An irregular plexus or network, formed by the communication of the *Vasa recta, Tubuli* seu *Ductuli recti*, at the upper and back part of the testicle. These *Vasa recta* are sent out at the back part of the testicle, from the convoluted seminal tubes. The *Rete Vasculosum testis* sends out from twelve to eighteen straight tubes, called *Vasa efferentia*, which convey the semen from the testes to the epididymus.

RETENTIO, Retention — r. Aerea, Dyspncea — r. Alvina, Constipation — r. Bilis, Isocholia.

RETENTIO FLUXUS HÆMORRHOÏDALIS. Suppression of the hæmorrhoidal flux.

RETENTIO FÆTUS, Dystocia — r. Lactis, Isochogalactia — r. Lochiorum, Isochlochia — r. Mensium,

see Amenorrhœa—r. Spermatis, Ischospemia—r. Sudoris, Hydroschesis.

RETENTION, *Retentio*, *Apolep'sia*, *Apolep'sis*, from *retinere*, *retentum*, (*re*, and *tenere*,) 'to hold back.' Accumulation of a solid or liquid substance, in canals intended for its excretion, or in a reservoir, intended to contain it for a short period.

RETENTION OF URINE: *Paru'ria Retentio'nis vesica'lis*, *Ischu'ria vesica'lis*, *Retentio Uri'næ*, (F.) *Rétention d'urine*. A disease in which the urine accumulated in the bladder cannot be evacuated; or, at least, cannot be passed without extreme difficulty. In the former case, the retention is said to be *complete*; in the latter, *incomplete*. Many writers have distinguished three degrees of this affection, to which they have given the names *Dysury*, *Strangury*, and *Ischury*. Retention of urine may depend upon loss of contractility, paralysis of the bladder, &c., or on some obstacle to the passing of the urine, as in cases of pressure of the womb on the bladder, of tumours in its vicinity, foreign bodies in its cavity, inflammation of the urethra, swelling of the prostate, stricture, &c. The pain is extremely violent, and the bladder may be found distended above the pubis. The treatment consists in introducing the catheter, or puncturing the bladder, and in combating the cause, which has produced the retention, by particular means adapted to each case.

RETENTISSANT, Resonant.

RETENTISSEMENT, Resonance—r. *Autophonique*, see *Autophonia*.

RETIA UTERI, see *Uterus*.

RETICULAR, *Retiform*, *Reticula'ris*, *Ret'inus*, *Amphiblestroï'des*, *Dyctœ'des*, *Retifor'mis*, from *rete*, (diminutive *reticulum*,) 'a net.' That which resembles a net. An epithet applied to many structures in the body.

RETICULAR BODY, *Corpus mucosum*—r. Substance, Cellular tissue.

RETICULARIA OFFICINALIS, Lichen pulmonarius.

RETICULUM: diminutive of *rete*, 'a net.' The *Bonnet* or *Honeycomb bag* or *stomach*, (Sc.) *Kingshood*, (F.) *Bonnet*, *Réseau*—the second stomach of the ruminant animal. See also, *Epiploon*, and *Rete*.

RETICULUM CUTANEUM, *Rete mucosum*—r. *Mucosum*, *Rete mucosum*.

RETIFORM, *Reticular*.

RETINA, from *rete*, 'a net.' *Tu'nica ret'ina* seu *reticula'ris* seu *retifor'mis* seu *int'ima* seu *ner'cea oculi*, *Involucrum reti comparatum*, *Ventricula'ris membra'na*, *Amphiblestroï'des membra'na*, (F.) *Rétine*. A soft, pulpy, grayish, semi-transparent, very thin membrane; extending from the optic nerve to the crystalline, embracing the vitreous humour, and lining the choroid; without, however, adhering to either of those parts. It terminates by a defined edge—*margo dentatus*—at the posterior extremities of the ciliary processes. It is constituted, according to most anatomists, by the expansion of the optic nerve. The retina appears to be formed of several laminae; so joined together, that it is difficult to discriminate them. The one—the innermost—is medullary, and pulpy; the other—the outer—is stronger, and fibro-vascular. The retina is the essential organ of vision; on it the images of objects are impressed. Both it and the optic nerve are devoid of general sensibility. They may be punctured or lacerated without pain being experienced. The nerve of general sensibility distributed to the eye is the fifth pair.

RETINACULA, see *Retinaculum*—r. *Morgagnii*, see *Fræna* of the valve of *Bauhin*.

RETINACULUM, from *retinere*, (*re*, and *tenere*,) 'to hold back.' A surgical instrument,

formerly used in the operation of castration; and in that of hernia, to prevent the intestines from falling into the scrotum.—*Scultet*. *Retinacula* are also band-like extensions of a cellulose-membranous structure, which seem to suspend the ovum in the Follicle of *De Graaf*. They appear to correspond to the *chalazæ* of the egg of the bird.

RETINACULUM, Bride.

RETINACULUM TENDINUM PERONEORUM, *Vag'na malleolaris externa*. The ligamentous sheaths that retain in situ at the outer ankle the tendons of the peroneal muscles.

RETINAL, *Retinal'is*. Relating or appertaining to the retina.

RÉTINE, *Retina*.

RETINITIS, *Inflammat'io Retinæ*, *Amphiblestroï'dis*, *Dicty'i'tis*, (F.) *Rétinite*, from *retina* and *itis*, a suffix denoting inflammation,—a term of hybrid formation. Inflammation of the retina; an uncommon affection, except as an accompaniment of other forms of ophthalmia.

RÉTINOÏDÉ, see *Rhétinolé*.

RÉTINOLÉ, see *Rhétinolé*.

RETINOSCOPY, *Retinoscop'ia*, from *retina*, and *σκοπεω*, 'I view.' Examination of the retina.

RETINUS, *Reticular*.

RETORT, *Retor'ta*, *Botia*, *Cornu*, *Cornu'ta*, *Cornes'ta*, *Cornumusa*, (F.) *Cornue*, from *retorqueo*, (*re*, and *torqueo*, *tortum*,) 'I bend back.' A vessel, commonly of glass or earthenware, employed in distillation. It may be *plain*, or have a *tubulure* for admitting substances whilst the distillation is going on. In the latter case, it is said to be *tubulated*, (F.) *Cornue tubulée*.

RETraction, *Retract'io*, from *retrahere*, (*re*, and *trahere*, *tractum*,) 'to draw back.' State of a part, when drawn towards the centre of the body or backwards;—as retraction of the testicles. Sometimes it is used synonymously with *shortening* or *drawing up*; as in *retraction* of the thigh.

RÉTRACTION DE LA MATRICE, *Retroversio uteri*.

RETRACTOR ANGULI ORIS, *Buccinator*.

RETRAHENS AURIS, *Posterior* seu *Triceps Auris*, *Tricauda'lis*, *Retrahens Auric'ula* seu *Auriculam*, *Secun'dus propri'rum Auric'ula*, *Bicauda'lis*, *Dep'rimens Auric'ula*, *Proprius Auris externa*, (F.) *Mastoïdo-conchinien*, *Mastoïdo-oriculaire* (Cb.), *Auriculaire postérieur*. It consists of one or more small fasciculi or fleshy, thin, somewhat irregular fibres, situated behind the ear. These are attached to the mastoid process, and pass horizontally forwards, to terminate at the convexity formed by the concha of the ear. If this muscle had any use, it would carry the ear backwards.

RETRAIT VENTRICULAIRE, *Heart*, hypertrophy of the.

RÉTRÉCISSEMENT, *Arctatio*, *Stricture*—r. *de l'Urèthre*, *Urethrosthenosis*.

RETRIMENTA VESICÆ, *Urine*.

RETRIMENTUM, *Excrement*

RETROCES'SION, *Retroces'sio*, *Retroces'sus*, *Retrogres'sus*, from *retrocedere*, *retrocessum*, (*retro*, 'backwards,' and *cedere*, 'to give place.')

The act of going back. A disappearance or metastasis of a tumour, eruption, &c., from the outer part of the body to the inner.

RETROCESSUS, *Retrocession*.

RETROFLEXIO UTERI, see *Retroversio uteri*.

RETROGRESSUS, *Retrocession*.

RETROPHARYNGEAL, *Retropharynge'us*, from *retro*, 'backwards,' and *pharynx*, 'the pharynx.' Relating to parts behind the pharynx,—

as 'retropharyngeal abscess,'—an abscess behind the pharynx.

RÉTROPULSION DE LA MATRICE, *Retroversio uteri*

RETRO-UTERINE, *Retro-uteri'nis*, (F.) *Rétro-utérin*, from *retro*, and *uterus*. Behind the uterus, as *retro-uterine abscess*, (F.) *Abcès rétro-utérin*; — an abscess seated behind the uterus.

RETROVACCINATION, from *retro*, 'backwards,' and *vaccination*. Vaccination with matter obtained from the cow, after inoculating the animal with vaccine matter from the human subject.

RETROVER'SIO UTERI, (*retro*, 'backwards,' and *vertere*, *versum*, 'to turn.') *Retroversion of the Uterus*, *Edopto'sis Uteri retrover'sa*, *Anapod'isis seu Anapodis'mus Uteri*, (F.) *Rétroversion*, *Rétraction*, *Obliquité ou Rétropulsion de la Matrice*. A change in the position of the uterus, so that the fundus of the organ is turned towards the concavity of the sacrum, whilst the neck is directed towards the symphysis pubis. This displacement is commonly attended with constipation, tenesmus, and retention of urine. Its usual period of occurrence is between the third and fourth months of pregnancy; before the uterus has escaped above the superior aperture of the pelvis. In the treatment, the catheter must be regularly used twice a day, until the uterus, by its growth, rises above the pelvis. The catheter should be small, flat, and curved considerably more than common, in consequence of the distorted course of the urethra. The bowels must be kept open; and absolute rest, in a recumbent posture, be enjoined. Should it be impracticable to draw off the urine, attempts must be made to replace the uterus. The woman being on her hands and knees, the fore and middle fingers of the accoucheur's left hand are to be passed up the rectum to the fundus uteri; which they must elevate, whilst the cervix uteri is carefully depressed by two fingers of the right hand in the vagina. Should the fingers employed to elevate the fundus not be long enough to effect this object, a piece of whalebone may be substituted, having a small piece of sponge attached to one extremity as a pad.

A simple inclination, or bending of the uterus, backwards, is termed *Retroflexion of the Uterus*, *Retroflex'io Uteri*: not unfrequently, however, this is used synonymously with *Retroversion of the Uterus*.

RÉTROVERSION DE LA MATRICE, *Retroversio uteri*.

REUNIO, *Synthesis*—*r. Partium separatarum*, see *Synthesis*—*r. per Primam intentionem*, see *Intention*—*r. per Secundam intentionem*, see *Intention*—*r. Vasorum*, *Anastomosis*.

RÉUNION PRIMITIVE, see *Intention*—*r. Secondaire*, see *Intention*.

RHABDOIDES (SUTURA), *Sagittal suture*.

RHABILLEUR, *Renouer*.

RHACHETÆ, *Rachitis*.

RHACHETRUM, *Medulla spinalis*.

RHACHLÆI, *Rachitis*.

RHACHIAGRA, *Rachisagra*.

RHACHIALGIA, *Rachialgia*, *Rhachiodynia*, *Spinal irritation*.

RHACHIALGITIS, *Spinal irritation*, *Myelitis*.

RHACHIDAGRA, *Rachisagra*, *Rachialgia*, *Rhachiodynia*.

RHACHIOCPHOSIS, *Gibbositas*.

RHACHIODYN'IA, from '*ραχis*, 'the vertebral column,' and *δύνη*, 'pain;' *Rhachial'gia*. Pain in the vertebral column.

RHACHIOMYELITIS, *Myelitis*.

RHACHIOPLEGIA, *Paraplegia*.

RHACHIOSCOLIOMA, *Scoliosis*.

RHACHIOSCOLIOSIS, *Scoliosis*.

RHACHIOSTROPHO'SIS, from '*ραχis*, 'the vertebral column,' and *στρεφω*, 'I turn;' *Contortio colum'næ vertebral'is*. Deviation of the vertebral column.

RHACHIOT'OMUS, *Rhachiot'omum*, from '*ραχis*, 'the vertebral column,' and *τομή*, 'incision.' An instrument for opening the vertebral column.

RHACHIPA'GIA, *Rachipa'gia*, from '*ραχis*, 'the spine,' and *παγω*, 'I fasten.' A monstrous union of two foetuses, in which they are connected at the spine.

RHACHIPARALYSIS, *Paraplegia*.

RHACHIPHUMA, *Rachiphyma*.

RHACHIRRHŒUMA, *Lumbago*.

RHACHIS, *Vertebral column*—*r. Nasi*, see *Nasus*.

RHACHISAGRA, *Rachisagra*.

RHACHI'TÆ, from '*ραχis*, appertaining or relating to '*ραχis*, 'the vertebral column;' *Rhachia'i*, *Rachi'tæ*, *Rhache'tæ*, or *Rachia'i*. The muscles of the spine.

RHACHITES, *Medulla spinalis*.

RHACHITICUS, *Rachiticus*.

RHACHITIS, *Rachitis*—*r. Adulorum*, *Mollities ossium*—*r. Spinalis*, *Rachisagra*.

RHACHITISMUS, *Rachitis*.

RHACHOSIS, *Rachosis*.

RHACHUS, *Rhæcus*, *Rhæcus*, from '*ραγω*, or '*ρηγνυμι*, 'to break.' A wrinkle. A laceration of the skin. A lacerated ulcer—*ulcus lac'erum*.

RHACUS, *Rhæbus*, *Wrinkle*.

RHÆBOCRANIA, *Torticoollis*.

RHAG'ADES, '*ραγades*, *Rhaga'dia*, from '*ραγω* or '*ρηγνυμι*, 'to break or rend;' *Scienu'ra*, *Fissu'ra*, *Fimæ*. Ruptures, chaps, or narrow and long ulcers, which form near the origin of mucous membranes, especially around the anus, and which are generally owing to the syphilitic virus.

RHAGADES, see *Fissure*.

RHAGĒ, *Ragĕ*, '*ραγν*. Same etymon. A suffix denoting violent rupture or discharge, as in *Hemorrhage*, *Menorrhagia*, &c.

RHAGE, *Fissure*.

RHAGES, Uvæ passæ.

RHAGICUS, Rhagoides.

RHAGODEITIS, Uveitis.

RHAGOÏDES, *Rhagoïdes*, *Rhagoïdeus*, *Rhagoïdeus*, from 'ράζ', 'ράγος', 'a berry,' 'a grape.' Grape-like; as *Tunica Rhagoïdes*: the uvæ. Also, the choroid coat of the eye.

RHAGUS, Rhachus, Wrinkle.

RHAMNI BACCÆ, see *Rhamnus*—r. *Succus*, see *Rhamnus*.

RHAMNUS, 'ράμνος, *R. catharticus*, *Spina cervi*'na seu *domes*'tica seu *infecto*'ria, *Rhamnus soluti*'vus, *Cervispi*'na, *Buckthorn*, *Purging buckthorn*, (F.) *Neprun purgatif*, *Bourguépine*, *Épine de cerf*. Family, *Rhamnaceæ*. *Sex. Syst.* Pentandria Monogynia. The berries—*Rhamni Baccæ*—have a faint and disagreeable odour; and bitterish, nauseous taste. Their juice—*Rhamni Succus*—is cathartic, and apt to excite griping, which must be obviated by the use of diluents.

RHAMNUS ALATER'NUS, *R. Hispan*'icus, *Alater*'nus *latifol*'ius, *Common alaternus*, (F.) *Alaternus*. The leaves have been used as detergents and astringents, in the form of gargle especially.

RHAMNUS FRAN'GULA, *Black Alder*, *Frangula Alnus*, *Alnus Nigra*, (F.) *Aune noir*, *Bourdane*, *Bourgène*. All the parts of this tree, as well as of the common alder, are astringent and bitter. The bark is most so. The inner, yellow bark of the trunk or root acts as a cathartic. It has also been employed as an anthelmintic.

RHAMNUS HISPANICUS, *R. alaternus*—r. *Jujuba*, see *Jujube*—r. *Lotus*, see *Jujube*—r. *Ziziphus*, see *Jujube*.

RHANTER, *Canthus*, (greater.)

RHAPHANEDON, *Raphanedon*.

RHAPHANIA, *Raphania*.

RHAPHANIS, *Raphanus hortensis*.

RHAPHANUS, *Raphanus hortensis*.

RHAPHÉ, *Raphe*, *Suture*.

RHAPHOSYMPH'YSIS, from *ραφή*, 'suture,' and *συνήναι*, 'union.' Union by suture,—as of the bones of the cranium.

RHAPHYS, *Raphanus hortensis*.

RHAPONTICUM, *Rheum Rhaponticum*—r.

Vulgare, *Centaurea centaurium*.

RHAPONTIQUE, *Rheum rhaponticum*.

RHAPS, *Raphanus hortensis*.

RHAPYS, *Raphanus hortensis*.

RHATANIA, *Krameria ratanhia*.

RHAX, see *Vitis vinifera*.

RHEGE, *Cramp*, *Contusion*, *Laceration*.

RHEGMA, *Cramp*, *Contusion*, *Laceration*,

Rhexis—r. *Ligamentare*, *Apospasma*.

RHEGMUS, *Cramp*, *Contusion*, *Laceration*.

RHEMBASMUS, *Sonnambulism*.

RHEMBË, *Rhembus*, 'a wandering about,' from 'ρεμβειν,' 'to wander about.' Irregularity in the return of febrile paroxysms.

RHEMBUS, *Rhembe*.

RHENCHUS, *Rattle*, *Snoring*.

RHENXIS, *Rattle*, *Snoring*.

RHEON, *Rheum*.

RHETINE, *Resin*.

RHETINOCERON, *Resinatum*.

RHÉTINOLÉ. A name given by M. Béal to a medicine, which results from the union of a resin with other medicinal substances. The *Rhétinolé*s of Béal differ from the *Rhétinoïdes* in containing but one resin, whilst in the latter there are several.

RHÉTINOÏDES, see *Rhétinolé*.

RHETINOTON, *Resinatum*.

RHEUM, (pronounced *room*.) *Rheuma*, *ρευμα*, (F.) *Rhume*; from 'ρεω,' 'to flow.' Any thin watery discharge from mucous membranes or skin; as the thin discharge from the air passages arising from cold.

RHEUM, SALT. A popular name in the United States, like 'tetter,' for various cutaneous affections of the eczematous and herpetic forms more especially. It is at times applied to a kind of chronic psoriasis; and likewise to cutaneous affections in those who immerse the hands in metallic or acid solutions. Webster defines it "a vague and indefinite popular name, applied to almost all the non-febrile cutaneous eruptions which are common among adults, except ring-worm and itch."

RHE'UM, *Rhabar*'barum, *Rheon*, *Rha*, *Rheum*, *Lap*'athum *orienta*'le seu *Chinen*'së, *Rhabar*'barum *ve*'rum seu *Tartar*'icum seu *Siber*'icum seu *Tur*'cicum, *Rhubarb*, (F.) *Rhabarbe*, *Rhubarbe*. From *Rha*, now called *Volga*, a river in Russia from which it was first brought. *Ord.* *Polygonaceæ*. *Sex. Syst.* *Enneandria Trigynia*. The root—*Rheum*—is the part used in medicine. Its odour is aromatic, peculiar, and rather nauseous; taste, somewhat aromatic, subacrid, bitterish, and astringent. It colours the saliva and the urine yellow. It is easily pulverized, and forms a powder of a bright buff-yellow colour. Both water and spirit extract its virtues. *Rhubarb* root is purgative, stomachic and astringent. [?] It is chiefly used for the properties first mentioned. Externally, the powder is sometimes sprinkled over ulcers, to assist their granulation. Dose, ℞j to ℥ss of the powder. In a smaller dose, it is stomachic.

Numerous species of *Rheum*, *Rh. palmatum*, *Rh. undulatum*, and *Rh. compactum*, have purgative roots.

The rhubarbs most used in the United States are the *Chinese* or *India Rhubarb*—*Rheum Sinen*'së seu *Indicum*; the *Russian*, *Turkey* or *Bucharian Rhubarb*—*Rheum Rus*'sicum seu *Tur*'cicum; and *European Rhubarb*.

RHEUM COMPACTUM, *Rheum*—r. *Indicum*, see *Rheum*—r. *Palmatum*, *Rheum*.

RHEUM RHAPON'TICUM, *Rhapontic Rhubarb*; *Rhaponticum*, *Rhabar*'barum *Dioscor*'idis seu *Antiquo*'rum, (F.) *Rhapontique*, *Rhapontic*, *Rapontic*. The root of this seems to have been the rhubarb of the ancients. It is more astringent than that of the *rheum palmatum*, and less purgative; for the latter purpose, two or three drachms being required for a dose. *French Rhapontic*, or *Krimea Rhubarb*, is obtained from this species, as well as from *Rh. undulatum*, and *Rh. compactum*.

RHEUM RUSSICUM, see *Rheum*—r. *Siuense*, see *Rheum*—r. *Turcicum*, see *Rheum*—r. *Undulatum*, see *Rheum*.

RHEUMA, *Catarrh*, *Diarrhœa*, *Rheum*, *Rheumatism*. Also, inflammation of a fibrous tissue, as in rheumatism and gout.—*Fuchs*.

RHEUMA CATARRHALE, *Bronchitis*, (chronic)—r. *Epidemicum*, *Bronchitis*, *chronic*, *Catarrh*, *epidemic*—r. *Pectoris*, *Catarrh*—r. *Uteri*, *Leucorrhœa*.

RHEUMAPYRA, *Rheumatism*, *acute*.

RHEUMARTHROSIS, see *Rheumatism*, *acute*.

RHEUMARTHROSIS, see *Rheumatism*, *acute*.

RHEUMATALGIA, *Rheumatism*, *chronic*—r. *Arthritica*, see *Rheumatism*, *acute*.

RHEUMAT'IC, *Rheumat*'icus, *Rheumat*'ical, (F.) *Rhumat*'ical, *Rhumatique*. Belonging to rheumatism; as rheumatic fever. Also, applied to one affected with rheumatism; (F.) *Rhumat*'isant.

RHEUMAT'IC DIATH'ESIS, *Diath*'esis *rheumat*'ica. The special condition of the body that gives occasion to rheumatism. It may exist without presenting the usual phenomena in the joints; whilst the heart may be seriously affected.

RHEUMATICUS, *Rheumatism*.

RHEUMATISM, *Catarrh*'œa from 'ρευμα,' 'ρευματος,' 'a defluxion, catarrh.' *Dolor Rheumat*'-

icus et arthriticus, (Hoffman), *Rheumatosis Myositis*, *Rheuma*, *Myodyn'ia*, (vulg.) *Rheumatiz*, *Rheumatics*, (F.) *Rhumatisme*. A kind of shifting phlegmasia or neuralgia, sometimes seated in the muscles, sometimes in the parts surrounding the joints; and at others, within them. Hence the names *Muscular*, *Articular*, and *Synovial*, which have been applied to it. The disease may be *acute*, or *chronic*.

RHEUMATISM OF THE ABDOMEN, Coeliorrhœuma.

RHEUMATISM, ACUTE, *Rheumatismus acutus seu articulo-rum acutus seu universalis febris*: *ilis seu inflammatorius seu hyperthencus*, *Arthro'sia acuta*, *Rheumatop'gra*, *Rheumap'gra*, *Febris rheumat'ica inflammatoria*, *Syn'ocha rheumat'ica*, *Myositis*, *Myi'tis*, *Cauma* seu *Arthri'tis rheumatismus*, *Arthro-rheumatismus*, *Synovi'tis rheumatismal'is*, *Hæmo-artthri'tis*, *Rheumat'ic Fever*, (F.) *Rheumatisme aigu*, *Rh. articulaire aigu*, *Fièvre rhumatismale*, usually comes on with the ordinary symptoms of fever; soon after which, or simultaneously, or even before the appearance of febrile signs, excruciating pains are felt in different parts of the body, particularly in the larger joints, which are more or less red and swollen; the pain shifting from one to the other, at times with great rapidity. The disease rarely terminates in less than six weeks, during the greater part of which period the febrile symptoms remain severe; and what is peculiar to the disease, the skin may be covered daily with a profuse perspiration, although it feels extremely hot, and the pulse appears in no way modified by it. It is one of the essential symptoms of the affection, and consequently affords no relief. The only danger to be apprehended from acute rheumatism, notwithstanding the apparent severity of the symptoms, is the translation or extension of the disease (*metastatic rheumatism*) to some internal part, especially to the heart. This tendency must always be borne in mind. *Acute* rheumatism seldom terminates in *chronic*; they who are liable to the former are rarely so to the latter, and conversely. The disease will generally run its course in spite of treatment. The usual antiphlogistic plan had better be pursued during the first days of the disease. Blood-letting may be employed, if the vigour of the patient and of the disease seem to require it; but, although the blood is generally buffy, bleeding does not usually seem to afford much relief. The bowels must be kept open; effervescent draughts be administered, and opium be given in full doses to allay pain. This is, generally, all that is necessary during the first week; after which, advantage will usually be obtained from the exhibition of the sulphate of quinia with sulphuric acid. It does not augment the excitement, and will be found proper in almost all cases. Rheumatic inflammation is very different from other varieties, and this may account for the anomaly. After a few weeks, the disease usually goes off, but leaves the patient very liable to a recurrence on slight exposures or errors of diet. At times, acute rheumatism of the joints puts on the appearance of gout, and seems to be a complication of the two affections. It is then called *Gouty* or *Arthritic rheumatism* or *Rheumatic gout*, *Rheumat'gia arthri'tica*, *Rheumarthro'sis*, *Rheumarthri'tis*, *Arthri'tis rheumat'ica* seu *juveni'lis*.

RHEUMATISM OF THE ARM, *Brachiorrhœuma*—r. *Arthritic*, see *Rheumatism*, acute—r. of the *Bladder*, *Cystorrhœuma*—r. of the *Bowels*, *Enterorrhœuma*.

RHEUMATISM, CAP'SULAR, *Rheumatismus capsular'is*. Rheumatism seated in the lining membrane of the joints and bursæ of the tendons. The parts most liable to its attacks are the feet and hands, where it is generally easily recognised

by the enlargement of the joints; but the peculiar characters of the disease are, perhaps, most strikingly seen when it attacks the knee.

RHEUMATISM OF THE CHEST, Pleurodynia.

RHEUMATISM, CHRONIC, *Arthro'sia chron'ica*, *Rheumatismus chronicus seu nonfebrilis seu vulg'aris seu inveteratus seu habitua'lis seu frig'i'dus*, *Rheumat'gia*, *Rhumat'gia*, *Rheumatodyn'ia*, *Arthrodyn'ia*, *Arthritis urthrodyn'ia*, (F.) *Rheumatisme chronique*, *Rhumatoly'ie*. is attended with pains in the hips, shoulders, knees, and other large joints. These are at times confined to one joint; at others, shift from one to another, without occasioning inflammation, or fever. In this manner, the complaint often continues for a great length of time, and then goes off. There is no danger attendant upon it; but the patient may become lame, and is always liable to painful recurrences. Neither variety generally terminates in suppuration; but effusion of coagulable lymph is apt to occur, so as to occasion permanent thickening of the parts. The great preventive of chronic rheumatism, and one of the most valuable curative agents, is flannel, worn next the skin. The whole class of rubefacients may, also, be used with advantage. The warm bath, especially the natural warm bath, the temperature of which does not vary, is perhaps the most successful remedy of all.

RHEUMATISM OF THE EXTREMITIES, *Acorrhœuma*—r. of the *Face*, *Prosoporrhœuma*—r. *Gouty*, see *Rheumatism*, acute—r. of the *Heart*, *Cardiorrhœuma*—r. *Lead*, see *Lead rheumatism*—r. of the *Leg*, *Scelorrhœuma*—r. of a *Limb*, *Merorrhœuma*—r. *Local*, *Merorrhœuma*—r. of the *Loins*, *Lumbago*—r. *Metastatic*, see *Rh. acute*—r. of the *Neck*, *Torticollis*—r. *Partial*, *Merorrhœuma*.

RHEUMATISM, PREABDOMINAL, (F.) *Rheumatisme pré-abdominal*. Rheumatism of the muscles of the anterior and lateral portions of the abdomen; supposed by MM. Gênest and Requin to be the same as the *nervous affection of the peritoneum* of Gooch.

RHEUMATISM ROOT, Jeffersonia Bartoni.

RHEUMATISM OF THE SKIN, see *Dermalgia*—r. *Topical*, *Merorrhœuma*—r. of the *Uterus*, *Metrorrhœuma*.

RHEUMATISM, VISCERAL. Rheumatism affecting the muscular or fibrous tissues of the viscera.

RHEUMATISM WEED, *Pyrola maculata*, P. umbellata.

RHEUMATISMAL, Rheumatic.

RHEUMATISMUS ABDOMINIS, *Coeliorrhœuma*—r. *Acutus*, *Rheumatism*, acute—r. *Articularum acutus*, *Rheumatism*, acute—r. *Brachii*, *Brachiorrhœuma*—r. *Cancerosus*, *Neuralgia faciei*—r. *Cervicis*, *Torticollis*—r. *Colli*, *Torticollis*—r. *Cordis*, *Cardiorrhœuma*—r. *Cruis*, *Scelorrhœuma*—r. *Dorsalis*, *Lumbago*—r. *Extremi-tatum*, *Acorrhœuma*—r. *Faciei*, *Prosoporrhœuma*—r. *Febrilis*, *Dengue*—r. *Inflammatorius* seu *hyperthencus*, *Rheumatismus acutus*—r. *Intestinorum*, *Enterorrhœuma*—r. *Intestinorum cum ulcere*, *Dysentery*—r. *Larvatus*, *Neuralgia faciei*—r. *Localis*, *Merorrhœuma*—r. *Membrorum singulorum*, *Merorrhœuma*—r. *Non febrilis*, *Rheumatism*, acute—r. *Partialis*, *Merorrhœuma*—r. *Pectoris*, *Pleurodynia*—r. *Phlegmonodes*, *Myositis*—r. *Spurius nervosus*, *Neuralgia*—r. *Universalis febrilis*, *Rheumatism*, acute—r. *Uteri*, *Metrorrhœuma*—r. *Vesicæ urinariæ*, *Cystorrhœuma*—r. *Vulgaris* seu *inveteratus* seu *habitua'lis* seu *frigidus*, *Rheumatism*, chronic.

RHEUMATIZ, Rheumatism.

RHEUMATODYNIA, Rheumatism, chronic.

RHEUMATOPHTHALMIA, *Rheumatophthal'mia*; from *ρευμα*, *ρευματος*, 'rheumatism,' and *οφθαλμια*, 'inflammation of the eyes.' *Rheumatism ophthalmia*.

RHEUMATOPYRA, Rheumatism, acute.
 RHEUMATOSIS, Rheumatism.
 RHEUMOPHTHALMIA, Rheumatophthalmia, Scleratitis.
 RHEXIS, *ρηξις*, *Rhegma*, *Dirup'tio*, *Rup'tio*, *Ruptura*, *Rupture*. From *ῥηννυμι*, 'to break.' Rupture of a vessel or organ. Spontaneous opening of an abscess.
 RHEXIS OC'ULI. Bursting of the eye from any cause; spontaneous or excited.
 RHICNO'SIS, from *ῥικνοομαι*, 'to become wrinkled;' *Cutis corrugatio*. Wrinkling of the skin from extenuation of the body; opposed to *εγκασις*, or distension from repletion.
 RHIGOS, Rigor.
 RHIN, Nasus.
 RHINAL'GIA, *Rhinodyn'ia*, from *ῥιν*, 'the nose,' and *αλγος*, 'pain.' Pain in the nose.
 RHINAL'GIA AB INTRU'SIS. Pain in the nose from foreign bodies.
 RHINAL'GIA VERMINO'SA. Pain in the nose from worms.
 RHINAN'CHONĒ, *Rhinan'gia*, *Rhinostegno'sis*; from *ῥιν*, 'the nose,' and *αγγων*, 'narrowness.' Contraction of the nose. Snuffles.
 RHINANGIA, Rhinanchone, Snuffles.
 RHINCHOS, Rostrum.
 RHINENCEPHALIA, Cyclopia.
 RHINEN'CHYSIS, *Rhinenchys'ia*, from *ῥιν*, 'the nose,' *εν*, 'in,' and *χυνω*, 'I pour.' An infusion or injection, made into the nostrils, with a syringe called *Rhinen'chites*.
 RHINES, Nares.
 RHINI'TIS, *Nasi'tis*, from *ῥιν*, *ῥινος*, 'the nose,' and *itis*, denoting inflammation. Inflammation of the nose. Coryza.
 RHINITIS ULCEROSA, Ozaena.
 RHINOBLENNORRHŒA, Rhinorrhœa.
 RHINOC'ACĒ, *Cory'za scarlatino'sa*; from *ῥιν*, *ῥινος*, 'the nose,' and *κακος*, 'evil.' The offensive discharge from the nose, and other symptoms indicating a morbid condition of the Schneiderian membrane, that accompany the worst forms of scarlatina.
 RHINOCATARRHIUS, Coryza.
 RHINOCNES'MUS, from *ῥιν*, *ῥινος*, 'the nose,' and *κνημος*, 'itching.' Itching of the nose.
 RHINODYNIA, Rhinalgia.
 RHINOPHONIA, from *ῥιν*, *ῥινος*, 'the nose,' and *φωνη*, 'the voice.' A nasal voice, called, also, *Dyspho'nia immodulata nasalis*, *Porapho'nia nasalis* seu *res'onans*, *Pellis'mus na'sitas*, *Mycetopho'nia*, *Na'sitas*, *Vox* seu *Paralla'lia nasalis*. Speaking through the nose.
 RHINOPLAS'TIC, *Rhinoplas'tica* (ars), *Rhinoplasty*, from *ῥιν*, *ῥινος*, 'the nose,' and *πλασσω*, 'I form.' An epithet applied to the operation for forming a new nose. The *Tuliacotian operation*, so called because described by Tagliacozzi. It consists in bringing down a portion of flesh from the forehead, and causing it to adhere to the anterior part of the remains of the nose.
 RHINOPTIA, from *ῥιν*, 'the nose,' and *οπτομαι*, 'I see.' The act of seeing over the nose. Squinting over the nose.
 RHINORRHAGIA, Epistaxis.
 RHINORRHAPHY, *Rhinorrhaph'ia*, from *ῥιν*, *ῥινος*, 'nose,' and *ραφη*, 'a suture.' An operation for the removal of epicanthis, which consists in pinching up a longitudinal fold of the skin, including this fold in two elliptical incisions, removing it, and bringing together the edges of the wound by harelip suture.
 RHINORRHŒA, *Rhinoblenorrhœ'a*, from *ῥιν*, *ῥινος*, 'the nose,' and *ῥωω*, 'I flow.' A discharge of limpid mucus from the nose without any inflammatory symptom. A gleet from the nose.

RHINO'SIS, from *ῥινος*, 'a skin, leather,' or from *ρενος*, 'rugous.' The state of looseness and excess of skin observed in phthisis.—Vogel.
 RHINOSTEGNOSIS, Rhinanchone.
 RHIPTASMOS, Jactation.
 RHIPTOLUSIA, Affusion.
 RHIS, Nasus.
 RHIZA, Radix.
 RHIZAGRA, Punch.
 RHIZO'MA, *Rhizome*, from *ῥιζα*, 'a root.' The part of the root of a plant, which consists of wood or flesh, as in the carrot.
 RHIZOPH'AGUS, from *ῥιζα*, 'a root,' and *φαγω*, 'I eat.' One who lives on roots.
 RHIZOTOMIST, see Simples.
 RHIZOTOMUS, Apothecary.
 RHOA, Punica granatum.
 RHODELÆ'ON, *Oleum rosa'rum*. Oil of roses, or oil impregnated with roses.
 RHO'DIA, *Rhodi'ola ro'sea*, *Rosea*, *Rosewort*, (F.) *Rhodiola*, from *ῥοδον*, 'a rose,' owing to its odour. *Sex. Syst.* Diœcia Octandria. The root, *Roseroot*, when dry, has a very pleasant smell, and is slightly astringent. It is not used.
 RHO'DINUS, *ῥοδινος*, *Rho'dius*, *Rosa'ceus*, *Ros'eus*, *Ros'atus*, (F.) *Rosat*, *Rosy*. Formed of, or containing, roses.
 RHODIOLA ROSEA, Rhodia.
 RHODIOLE, Rhodia.
 RHODITES VINUM. Wine in which roses have been macerated.
 RHO'DIUM LIGNUM, *Rhodium* or *Rosewood*, from *ῥοδον*, 'a rose.' The wood or root of a tree supposed to be *Genis'ta Canarien'sis* of Linnæus. (F.) *Bois de rose*, *Bois de Chypre*. *Ord.* Leguminosæ. *Sex. Syst.* Diadelphia Decandria. The essential oil is a perfume, and possesses cordial and tonic virtues. Its smell is attractive to fish, rats, &c.
 RHODIUS, Rhodinus.
 RHODODAPHNE, Nerium oleander.
 RHODODAPHNIS, Nerium oleander.
 RHODODEN'DRON CHRYSANTHEMUM, *R. chrysan'thum seu an'reum seu officina'le*, *Oleander*, *Rose-bay*, *Yellow rhododendrum*, *Mountain Laurel*, (F.) *Rosage*, *R. chrysanthe*, *Rose de Sibérie*, from *ῥοδον*, 'a rose,' and *δένδρον*, 'a tree.' *Nat. Ord.* Ericacææ. *Sex. Syst.* Decandria Monogynia. This plant has been recommended in rheumatism, gout, and syphilis. In an overdose, it produces acro-narcotic symptoms.
 RHODODEN'DRON MAX'IMUM, *Great Laurel*, *American Rose-bay*. An indigenous shrub, *Ord.* Ericacææ, which flowers in July. It is stimulant and astringent, and has been used by the Indians in gout and rheumatism.
 RHODODENDRON PUNCTATUM. Indigenous; has similar properties.
 RHODOM'ELA PALMA'TA, (*ῥοδον*, 'a rose,' and *μελι*, 'honey,') *Dulse*, *Sac'charine Fucus*. One of the Algæ, eaten in large quantities throughout the maritime countries of the north of Europe, and in the Grecian Archipelago.
 RHODOMELI, Mel rosæ.
 RHODON, Rosa, Rosa centifolia.
 RHODOSACCHARUM, Confectio rosæ gallicæ.
 RHODOSTACTON, Mel rosæ.
 RHODOSTAGMA, Aqua rosæ.
 RHŒA, Punica granatum.
 RHŒAS, see Papaver rheas.
 RIOEBDESIS, Absorption.
 RHŒUM, Rheum.
 RHŒGUMOS, Rattle.
 RHOI'TES, *ῥοιτης*, a wine impregnated with the pomegranate; from *ῥοα*, the *Pomegranate*,—Dioscorides. A confection, made by boiling the

juice of the pomegranate in honey.—Paulus of Ægina.

RHOMBOÏDEUS, from *ῥομβος*, 'a rhombus,' whose sides are equal, with two obtuse and two acute angles. *Rhomboides major* and *minor*, *Rhomboides, Cervici-dorso-scapulaire*. A muscle situate at the posterior inferior part of the neck, and at the posterior part of the back. It has a rhomboidal shape, and is attached, by its inner edge, to the posterior cervical ligament, and to the spinous processes of the last cervical vertebra, and of the first four or five dorsal. By its outer edge, it is attached to the spinal or posterior edge of the scapula. It is divided into two fasciuli, constituting the *Rhomboides major* and *Rh. minor*, the latter being situate higher than the other. This muscle draws the scapula backwards and upwards, and impresses upon it a rotatory motion, which brings its inferior angle nearer to the spine; and, consequently, depresses the anterior angle and the shoulder.

RHOMBOS, *ῥομβος*. A bandage mentioned by Galen, so called on account of its rhomboidal shape.

RHONCHAL, *Rhoncha'lis*, from *rhonchus*, 'rattle.' Relating or appertaining to rhonchus;—as 'rhonchal fluctuation,' the fremitus that occurs through the influence of respiration as an attendant on cavernous rhonchi.—Walshe.

RHONCHUS, Rattle, Snoring, Stertor.—r. Cavernous, see Gurgling.—r. Cavernulous, see Gurgling.

RHONCHUS, CLICKING. A rhonchus which has been considered positively indicative of the existence of tubercles in the lungs.[?]

RHONCHUS, CREPITANS, *Râle crépissant*—r. Crepitans Redux, see Crepitant — r. Mucous, see *Râle muqueux*—r. Sibilans, see *Râle crépissant*—r. Sibilus, *Râle sibilant*—r. Sonorus, *Râle sonore*—r. Suberepitant, see *Râle muqueux*.

RHOPALISMUS, Priapismus.

RHOPALOSIS, Plica, Pupil, Uvea.

RHOPE, Congestion.

RHOTACISMUS, Rotacism.

RHUBARB, Rheum — r. Chinese, see Rheum — r. French, Rheum Rhaponticum — r. India, see Rheum — r. Krimea, Rheum Rhaponticum — r. Monk's, Rumex Alpinus, Rumex patientia — r. Poor man's, Thaliction — r. Rhapontic, Rheum Rhaponticum — r. Russia, see Rheum — r. Turkey, see Rheum — r. Wild, Convolvulus panduratus.

RHUBARBE, Rheum—r. *Fausse*, Thaliction — r. *des Indes*, Convolvulus mechoacan — r. *des Pauvres*, Thaliction — r. *Sauvage*, Rumex patientia.

RHUE, Ruta.

RHUM, Rum.

RHUMAPYRA, Rhenmatism, acute.

RHUMATALGIA, Rheumatism, chronic.

RHUMATALGIE, Rheumatism, chronic.

RHUMATIQUE, Rheumatic.

RHUMATISANT, Rheumatic.

RHUMATISMAL, Rheumatic.

RHUMATISME, Rheumatism — r. *Aigu*, Rheumatism, acute — r. *Articulaire aigu*, Rheumatism, acute — r. *Chronique*, Rheumatism, chronic — r. *Præabdominale*, Rheumatism, præabdominal — r. *d. l'Utérus*, Metrorrhœma.

RHUME, Rheum — r. *de Cerveau*, Coryza — r. *de Poitrine*, Catarrh.

RHUS COPALLINA, see *Rhus glabra*.

RHUS CORIARIA, *Adurion*, *Sumach*, *Shumach*, *Elm-leaved Sumach*, (F.) *Sumac des Corroyeurs*, *Roure*. Ord. Anacardiaceæ. Sez. Syst. Pentandria Monogynia. This is the only species of the genus *rhus* that is innocent. Both the leaves and berries have been used as astringents and tonics.

RHUS GLABRA, 'Smooth Sumach.' Indige-

nous, and officinal in the Pharmacopœia of the United States. An infusion of the fruit — *Rhus glabrum* [?] — which is acid and astringent, has been used as a cooling drink, and as a gargle. An infusion of the inner bark of the root has been recommended in mercurial ptyalism.

RHUS RADICANS, *R. vernix*, *Poison vine* (America). This plant is poisonous (see Poisons, Table of), and is extremely acrid, when applied to the skin, producing erysipelas and vesications, and has been used, like the next variety, in paralysis, and other nervous affections.

RHUS SYLVESTRIS, *Myrica gale*.

RHUS TYPHINA, *Stag's horn Sumach*, and **RHUS COPALLINA**, *Mountain Sumach*, have similar properties.

RHUS TOXICODENDRON, *Toxicodendron*, *Poison Oak* (America), (F.) *Sumac vénéneux*. This plant has been used in paralytic affections and cutaneous eruptions. It is poisonous, like the last. Dose, gr. ss. to gr. iv.

RHUS TYPHINA, see *Rhus glabra*.

RHUS VENENATA, *Poison Sumach*, and **RHUS PUMILA**, have similar properties.

RHUS VERNIX, *Rh. radicans*.

RHYAS, from *ῥεω*, 'I flow.' An ulceration of the lachrymal caruncle, with a constant flow of tears.—Blancard.

RHYPARIA, *Rupia*, *Sordes primarum viarum*.

RHYPIA, *Rupia*.

RHYPOS, *Sordes*.

RHYPTICA, Detergents.

RHYPTICUS, Abstergent.

RHYSIS, Flux.

RHYSMUS, *Rhythm*.

RHYSEMA, *Wrinkle*.

RHYTHM, *Rhythmus*, *ῥυθμος*, *Rhyemus*, (F.)

Rhythme, 'measured movement.' The order of proportion, as regards time, which reigns between the different movements of an organ — as of the organism in health and disease. Thus, rhythm is applied to the diurnal variations of the pulse; and to the paroxysmal movements of an intermittent.

RHYTHMICAL, Periodical.

RHYTHMICAL CONTRACTIONS OF MUSCLES are those that succeed one another after regular intervals.

RHYTHMUS, *Rhythm*.

RHYTIDOSIS, *Rutidosis*.

RIB, *Costa*—r. *False*, see *Costa* — r. *Floating*, see *Costa* — r. *Sternal*, see *Costa* — r. *True*, see *Costa*.

RIBES GROSSULARIA, *R. uva crispa*.

RIBES NIGRUM, *R. ol'idum*, *Grossularia nigra*, *Cassis*, *Black Currant*, *Gazel*, (F.) *Groseillier noir*. Ord. Grossulacææ. Sez. Syst. Pentandria Monogynia. The berries—*Black currants*—have been recommended in sore-throat, as diuretics. The leaves have been advised for the same purpose. They are chiefly used as preserves.

RIBES OLIDUM, *R. nigrum*—r. *Officinale*, *R. rubrum*.

RIBES RUBRUM, *R. officinal'e seu vulgare*, *Grossularia non spinosa seu rubra*, *Red currant*, (F.) *Groseillier rouge*; of which the *White* is only a variety. It is cultivated, and affords an agreeable fruit—*Red currants*, (F.) *Groseilles*. It possesses the qualities of the subacid fruits in general, and makes an excellent preserve.

RIBES UVA CRISPA, *R. grossularia*, *Common gooseberry*. The fruit—*Grossularia*, (F.) *Groseille à maquereau*, *Gooseberry*, *Feaberry*—is agreeable, and makes a good preserve.

RIBES VULGARE, *R. rubrum*.

RIBGRASS, *Plantago lanceolata*.

RIBS, *NECK OF THE*, *Collum costarum*—r. *Short*, see *Costa*.

RIBWORT, *Plantago Virginica*.

RICE, *Oryza*.—r. Disease, Cholera—r. Ground, see *Oryza*.—r. Jelly, see *Oryza*.

RICE WATER, see *Oryza*. The evacuations of cholera have been termed— from their resemblance to rice-water— 'rice-water discharges;' and in India, 'congee discharges;'— congee in Hindoostance meaning 'rice-water.'

RICE, WILD, *Zizania aquatica*.'

RICHARDSONIA, see *Ipecacuanha*.

RICHLEAF, *Collinsonia Canadensis*.

RICHWEED, *Actæa racemosa*, *Ambrosia trifida*, *Collinsonia Canadensis*, *Pilea pumila*.

RICIN, *Ricinus communis*.

RICINOIDES, *Jatropha curcas*.

RICINUS COMMUNIS, from *ricinus*, 'a tick,' which its seed resembles; *Ricinus vulgaris* seu *viridis*, *Palma Christi*, *Cataputia major*, *Faba purgatrix*, *Cerua*, *Kerua*, *Cici*, *Castor oil plant*, (F.) *Ricin*, *Fève purgatif*. Ord. Euphorbiaceæ. Ser. Syst. Monœcia Monadelphica. Castor-oil seeds, whence the oil is obtained, are inodorous; taste acrid and slightly sweetish. One or two seeds— *Sen'ina Cataputia majoris* seu *Ric'ini vulgaris*—will act as a cathartic; but the oil is alone used. It is obtained by bruising the castor-seeds, previously decorticated, and then expressing the oil without the application of heat. Recently-drawn castor oil, *Oleum de kerea* seu *kernum*, *Alker'va*, *O. Ric'ini* seu *Cie'inum* seu *Palma liquidum* seu *de Palmâ Christi*,—in the United States often called simply *Oil*, (F.) *Huile de Ricin*—is inodorous and nearly insipid. It is cathartic, operating speedily, and may be used in all cases where powerfully stimulating purgatives would be injurious. Dose, fʒj to fʒiiss. Hufeland recommends that a drop of croton oil shall be added to an ounce of the oil of poppy, and that the mixture shall be called *O'leum Ric'ini Officinale*.

At the Cape of Good Hope the oil is obtained from *Ricinus liv'idus*.

A variety of *Ricinus* at Cape Verd is employed by the inhabitants to increase the secretion of milk. It is applied in the form of poultice, made with the green leaves, to the mammæ, or of a strong decoction, with which the mammæ and the external parts of generation are washed.

RICINUS LIVIDUS, see *Ricinus communis*—r. Major, *Jatropha curcas*—r. Minor, *Jatropha manihot*—r. *Viridis*, *R. communis*—r. *Vulgaris*, *R. communis*.

RICK, *Malleolus*.

RICKETS, *Rachitis*.

RICKETY, *Rachiticus*.

RICTUS LUPINUS, see *Harelip*.

RIDE, *Wrinkle*.

RIDÉ, *Wrinkled*.

RIDING (of Bones). *Ossium superposit'io*, (F.) *Chevauchement*. Displacement of the fragments of a bone, chiefly produced by the contraction of muscles, which occasions shortening of the limb; the fractured extremities riding over each other instead of being end to end.

RIDING-BAG, *Inebus*.

RIFE, (Sax.) *rîffe*, (Prov.) *Brief*. Prevailing; as applied to diseases.

RIFT, *Eructation*.

RIGIDITAS, *Rigidity*.

RIGIDITAS ARTICULORUM, *Ancylosis spuria*. Stiffness of the joints. False ancylosis.

RIGIDITÉ, *Rigidity*—r. *Cadavérique*, see *Rigidity*.

RIGIDITY, *Rigid'itas*, from *rigere*, 'to stiffen,' (F.) *Rigidité*, *Roidenr*, *Raidenr*. Great stiffness of fibre, or want of suppleness. The stiffness of the dead body, *Cadaveric rigidity*, (F.) *Roidenr* ou *Rigidité cadavérique*, is one of the signs of the cessation of life. It may be removed, how-

ever, for a time, by the injection into the arteries of oxygenated defibrinated blood. See *Rigor mortis*.

RIGOR, *Rhigos*, *Algor*, *Coldness*, *Cheim'ia*, (F.) *Frissor*. Same etymon. Sensation of cold, with involuntary shivering or shaking of the whole body:—a symptom of fever. A slighter degree, and at times full rigor, is occasionally termed a *chill*, (Prov.) *cream*; *frigus ten'ue*, *perfrigeratio*.

RIGOR ARTUUM, *Contractura*—r. *Cadaverosus*, *Rigor mortis*—r. *Corporis mortui*, *Rigor mortis*—r. *Emortualis*, *Rigor mortis*—r. *Maxillæ inferioris*, *Trismus*.

RIGOR MORTIS, *R. corporis mortui* seu *cadaverosus* seu *emortualis*, *Necronarce'ma*, (F.) *Roidenr* ou *Raidenr* ou *Rigidité cadavérique*. 'Stiffness of death.' Death stiffening. The rigidity of limbs that occurs on dissolution. See *Rigidity*.

RIGOR NERVORUM, *Tetanus*—r. *Nervosus*, *Tetanus*.

RIMA, *Schisma*, *Schiza*; 'a fissure, a cleft;' as *Rima* seu *Rimula Glottidis* seu *Laryngis*, the opening of the glottis. *Rima* seu *R. magna vulvæ*, *Introitus*, *Sinus vulvæ*, *Scapha*, *Scaphus* seu *Fissura magna* seu *Scissura vulvæ*, *Schiza*, the opening of the vulva. See *Vulva*. *Rima oris*, the opening of the mouth.

RIMA CANALIS ORBITARII, *Suborbital fissure*—r. ad *Infundibulum*, *Vulva cerebri*—r. *Laryngis*, *Rima glottidis*—r. *Magna Vulvæ*, see *Rima*—r. *Oris*, see *Rima*—r. *Transversa Magna Cerebri*, *Fissure*, *transverse*, of the brain—r. *Vulvæ*, see *Rima*.

RIMÆ, *Rhagades*.

RIMULA GLOTTIDIS, *Rima glottidis*—r. *Laryngis*, *Rima glottidis*.

RINÆUS, *Compressor naris*.

RINCHOS, *Rostrum*.

RING, (Sax.) *hping*, *ping*, (Germ.) *Ring*, *Cricus*, (F.) *Anneau*. A name given to natural, circular, or roundish apertures, with muscular or aponeurotic parietes, which serve for the passage of some vessel or canal:—as the *umbilical ring*, *inguinal ring*, &c.

RINGS, FESTOONED, *Annuli fibro-cartilaginei*—r. *Fibro-cartilaginous*, *Annuli fibro-cartilaginei*.

RING-FINGER, *Annular finger*.

RINGMAN, *Annular finger*.

RINGWORM, *Herpes circinatus*—r. of the Scalp, *Porrigi scutulata*—r. *Ulcerative*, *Herpes excedens*—r. *Vesicular*, *Herpes præputii*.

RIO VINAIGRO, *Passambio*. A stream of some size in New Grenada, which is strongly impregnated with sulphuric acid.

RIRE ou RIS, *Risus*—r. *Canin*, *Canine laugh*—r. *Moqueur*, *Canine laugh*—r. *Sardonien*, *Canine laugh*, *Risus sardonicus*—r. *Sardonique*, *Canine laugh*.

RISAGON, *Cassuminar*.

RISIGALLUM, *Orpiment*.

RISING, see *Regurgitation*—r. of the Lights, *Cyananche trachealis*.

RISING or ELEVATION OF THE PULSE, *Pulsus elevatio*. The pulse is said to rise, when it becomes more full and frequent, as occurs in the exacerbation of acute diseases.

RISO'RIOUS NOVUS. Santorini gives this name to a portion of the platysma myoides, which passes from the cheek towards the commissure of the lips.

RISSIGALLUM, *Orpiment*.

RISUS, from *ridere*, *risum*, 'to laugh.' *Gelus*, *Laughing*, *Laughter*, *Laugh*, (F.) *Rire* ou *Ris*. An involuntary movement of the muscles of the face, and of the lips in particular, accompanied with a sonorous and interrupted respiration, commonly indicating mirth and satisfaction.

RISUS APIUM, *Ranunculus sceleratus*—r. *Caninus*, *Canine laugh*—r. *Involuntarius*, *Canine*

laugh—r. Sardonius, Canine laugh—r. Spasticus, Canine laugh.

RITA-CRISTINA. A celebrated double monster, born in Sardinia, in 1829. It lived to be nearly nine months old. Two distinct bodies were united at the pelvis. Below, the monster was single.

RIVER WEED, *Conferva rivalis.*

RIVING, Eructation.

RIZ, Oryza.

ROAN TREE, *Sorbus acuparia.*

ROB. *Roob, Robub, Rohob, Rohab,* (F.) *Extrait des fruits.* This word, of Arabic extraction, means the juice of any fruit thickened to the consistence of honey by evaporation, before it has fermented. The juice of the grape, boiled to this consistence, was called *Sapa*, and, when not quite so thick, *Defrutum.*

ROB CYNOSBATUS, *Confectio rosæ caninæ*—r. ex Moris, Diamorion—r. Nucum, Diacaryon.

ROBIN-RUN-AWAY, *Glechoma hederacea.*

ROBIN-RUN-THE-HEDGE, *Galium aparine.*

ROBINIA AMA'RA, *Ord. Leguminosæ. Ser. Syst. Diadelphia Decandria.* The roots of the *Robinia amara* of Cochinchina are bitter, and have been recommended, especially in that country, in diarrhoea and dyspepsia.

ROBINIA PSEUDO-ACA'CIA, *Pseudacacia odorata, False Aca'cia, Black Locust, Locust-tree;* native of America. The flowers are said to possess antispasmodic properties, and the bark of the root to be emetic and cathartic.

ROBORANS, Corroborant.

ROBORANTIA, Tonics.

ROBUB, Rob.

ROCELLA, *Lichen rocella*—r. *Tinctoria, Lichen rocella.*

ROCHE'S EMBROICATION FOR HOOPING-COUGH. An empirical preparation, composed of *ol. olive*, ℥xvj, *ol. succin.* ℥viij, *ol. caryoph.*, q. s. to scent it strongly.

ROCHER, see Temporal bone.

ROCHETTA ALEXANDRINA, Soda.

ROCKBRIDGE ALUM SPRINGS, see Virginia, mineral waters of.

ROCKET, GARDEN, *Brassica eruca*—r. Roman, *Brassica eruca.*

ROCK ROSE, *Helianthemum Canadense,* II. *Corymbosum.*

ROCOU, Terra Orleana.

RODDIKIN, Abomasus.

RODENS, see *Sorbus acuparia.*

RODEN-TREE, *Sorbus acuparia.*

RODSCHIEDIA BURSA PASTORIS, *Thlaspi bursa.*

ROGNE, Psora.

ROHAB, Rob.

ROHENA BARK, *Swietenia.*

ROHOB, Rob.

ROHUN, see *Strychnos nux vomica.*

ROIIDEUR, Rigidity—r. *Cadaverique, Rigor mortis.*

ROISDORFF, MINERAL WATERS OF. Alkaline waters in Germany, which contain carbonic acid and carbonate of soda.

ROLLER, Bandage, Fascia,

ROMARIN, *Rosmarinus*—r. *des Marais, Stachoe limonium*—r. *Sauvage, Ledum sylvestre.*

ROME, (CLIMATE OF.) The climate of Rome, as regards its physical qualities, is considered to be one of the best in Italy. It is peculiarly still; and, hence, has been esteemed favourable as a winter climate in pulmonary diseases, and for invalids generally, as it admits of their taking exercise in the open air at a lower temperature than they otherwise could do. In the early stages of consumption, Sir James Clark generally found the climate favourable.

ROMPEURE, Hernia.

ROMPT-PIERRE, *Pimpinella saxifraga.*

RONCE, *Rubus idæus*—r. *Blanc, Rubus cæsius*—r. *de Montague, Rubus chamaemorus*—r. *Noire, Rubus fruticosus.*

RONCHUS, Snoring, Stertor.

ROUND, Round—r. *Grand, Teres major*—r. *Petit, Teres minor.*

RONE, *Sorbus acuparia.*

RONFLEMENT, Snoring, Stertor, see Rattle—r. *de Diable, Bruit de Diabls.*

RONNACHS, *Triticum repens.*

RONNING, Rennet.

ROOB, Rob.

ROOF OF THE MOUTH, Palate.

ROOM, Pityriasis.

ROOT, Radix—r. *Ague, Aletris farinosa*—r. *Bitter, Apocynum androsæmifolium*—r. *Canada, Asclepias tuberosa*—r. *Colic, Aletris*—r. *Red, Celastrus, Lachnanthes tinctoria*—r. *Rough, Liatriis. Root of SCARCITY, Beta hybrida.*

ROOT, SQUAW, *Actæa racemosa*—r. *Sweet, Acorus calamus*—r. *Unicorn, Aletris farinosa*—r. *White, Ligusticum actæofolium*—r. *Yellow, Xanthoxia apifolia, Jeffersonia Bartoni.*

ROPE, Nannus.

ROPE BARK, *Direa palustris.*

ROQUETTE, *Brassica eruca, Soda.*

RORELLA, *Drosera rotundifolia.*

RORIFEROUS, *Rorifer,* (F.) *Rorifère,* from *ros, roris,* 'dew,' and *ferre,* 'to carry.' An epithet given to vessels which pour exhaled fluids on the surface of organs.

RORIFEROUS DUCT, Thoracic duct.

ROS, Sperm—r. *Calabrinus, Fraxinus ornus*—r. *Solis, Drosera rotundifolia.*

ROSA, (ροδον), R. centifolia—r. *Afzeliana, R. canina.*

ROSA ALBA, R. usitatissima seu leucantha. The *White Rose,* (F.) *Rosier blanc. Ord. Rosaceæ. Ser. Syst. Icosandria Polygynia.* The flowers of this species possess similar but inferior qualities to the damask.

ROSA ARMATA, R. canina—r. *Asturica,* see *Pelagragra*—r. *Austriaca, R. Gallica*—r. *Calycina, R. canina.*

ROSA CANINA, R. sylvestris seu sentico'sa seu Swartziana seu *Afzeliana* seu *armata* seu *calycina* seu *rubra vulgaris, Cynor'rhodon, Caur'ubus, Caninus Sentis, Cynocyl'isus, Cynospastum, Cynosbatus, Dog rose, Wild Briar, Hip Tree,* (F.) *Rose du chien, Eglantier de chien, E. sauvage.* The fruit of this variety, called *Heps* or *Hips, Hops,* (Sc.) *Doghip,* has a sourish taste, and is formed into a conserve. See *Confectio cynosbati.* It is seldom employed, except to give form to more active remedies; as to pills, boluses, linctuses, &c.

ROSA CENTIFOLIA, Rosa, R. Damascena seu *Pallida, Hecatophylla, Damask Rose, Hundred leaved or Cabbage rose,* (F.) *Rosier à cent feuilles, Rhodon.* The petals of this rose have an extremely fragrant odour, and sub-acidulous taste. They are laxative; but are scarcely used for any purposes except for the distillation of rose water, *Oil of Roses, Oleum Rosæ, Attar, Otto or Essence of Roses,* and the formation of a syrup.

ROSA DAMASCENA, R. centifolia.

ROSA GAL'LICA, R. Austriaca seu rubra, Red Rose, (F.) *Rosier de Provins.* The petals of this variety are astringent; and are used in infusion, conserve, &c.

ROSA LEUCANTHA, R. alba—r. *Pallida, R. centifolia*—r. *Rubra, R. Gallica*—r. *Rubra vulgaris. R. canina*—r. *Saltans, Essera*—r. *Senticosa, R. canina*—r. *Swartziana, R. canina*—r. *Sylvestris, R. canina*—r. *Usatissima, R. alba.*

ROSA'CE, Roseola.

ROSACEUS, Rhodinus.

ROSAGE, *Nerium oleander, Rhododendron chrysanthemum.*

ROSAGO, Nerium oleander.
 ROSALIA, Scarlatina.
 ROSALIÆ, Scarlatina.
 ROSAT, Rhodinus.
 ROSATUS, Rhodinus.
 ROSE, Erysipelas — r. Cabbage, Rosa centifolia — r. Campion, Lychnis githago — r. Christmas, Helleborus niger — r. Corn, Papaver rhœas — r. Damask, Rosa centifolia — r. Dog, Rosa canina — r. Dog, conserve or confection of, Confectio rosæ caninæ.
 ROSE DU CHIEN, Rosa canina.
 ROSE, HUNDRED-LEAVED, Rosa centifolia — r. Marine, Rosmarinus.
 ROSE RASH, Roseola.
 ROSE, RED, Rosa Gallica — r. Rock, Helianthemum Corymbosum.
 ROSE DE SIBÉRIE, Rhododendron corymbosum — r. Spots, Spots, red.
 ROSE, WHITE, Rosa alba.
 ROSEA, Rhodia.
 ROSEBALM, SCARLET, Monarda coccinea.
 ROSEBAY, AMERICAN, Rhododendron maximum.
 ROSE DROP, Gutta rosea.
 ROSÉE DU SOLEIL, Drosera rotundifolia.
 ROSELLINA, Roseolæ.
 ROSEMARY, Rosmarinus — r. Marsh, Statice limonium, and S. Caroliniana — r. Wild, Eriophthalmus umbellatus.
 ROSENHEIM, MINERAL WATERS OF. Rosenheim is 34 miles S. E. from Munich, in Bavaria. The waters contain sulphuretted hydrogen, carbonic acid, carbonate of lime, chlorides of calcium and magnesium, carbonate of soda, and oxide of iron. They are used as tonics.
 ROSEOLA, *Exanthe'sis Roseola*, *Rose Rash*, (F.) *Roséole*, *Éruption anomale*, *Rosace*, *Fièvre rouge*, *Éfflorescence érysipléteuse*, from *rosa*, 'the rose,' on account of the colour. An efflorescence in blushing patches, gradually deepening to a rose-colour, mostly circular or oval; often alternately fading and reviving; sometimes, with a colourless nucleus; and chiefly on the cheeks, neck, or arms. It is frequently found, as a symptom, in dentition, dyspepsia, rheumatism, &c., and is of no consequence. See *Roseolæ*, *Rubeola*, and *Scarlatina*.
 ROSEOLA ACNOSA, Gutta rosea.
 ROSEOLA ÆSTIVA. The affection which prevails in summer. The eruption is of a darker colour, and is attended with more itching.
 ROSEOLA ANNULLATA. Characterized by patches in the form of rose-coloured rays, with central areas of the colour of the skin.
 ROSEOLA FICOSA. Sycosis — r. Typhosa, Spots, red — r. Variolosa, Roseolæ.
 ROSEOLA ÆSTIVA, *Roseola*, *Roselli'na*, *Rube'ola spuria*, *False* or *French measles*, (F.) *Roséole*, *Fausse rougeole*. This name is also given by some to an acute exanthem, midway between measles and scarlatina, and which belongs to neither one nor the other, as it affords no protection against either. It is, also, termed *Rubeolæ* by some, and *Rube'oloïd*, a term, which is applicable to any eruption resembling rubeola. An eruption which often precedes that of small-pox is termed *Roseola Variolo'sa*.
 ROSÉOLE, Roseola, Roseolæ.
 ROSE PINK, Chironia angularis.
 ROSES, MILK OF. A cosmetic wash, formed, according to one method, of *subcarbonate of potass*, gr. vj; *oil of almonds*, ℥j; *essence of bergamot*, ℥ij; *aquæ rosæ*, ℥iij; *orange flower water*, ℥ij. Mix.
 ROSEUS, Rhodinus.
 ROSEWOOD, Rhodium lignum.
 ROSEWORT, Rhodia.

ROSIER BLANC, Rosa alba — r. à Cent feuilles, R. centifolia — r. de Proviens, Rosa Gallica.
 ROSIN, BLACK, Colophonia — r. Brown, Colophonia.
 ROSIN WEED, Silphium laciniatum.
 ROSIN, WHITE, see Pinus sylvestris — r. Yellow, see Pinus sylvestris.
 ROSIO STOMACHI, Cardialgia — r. Ventriculi, Cardialgia.
 ROSMARINUM, Rosmarinus.
 ROSMARI'NUS, *R. officina'lis* seu *latifolius* seu *horten'sis*, *Alchachil*, *Libano'tis corona'ria*, *Dendrolib'anus*, *Rosemary*, (F.) *Romarin*, *Rose marine*, *Eucausier*; *Ord. Labiatae*. *Sec. Syst. Diandria Monogynia*. The tops of this plant, *Rosmarinus* (Ph. U. S.), *Herba Anthos*, have a fragrant, grateful smell; and an aromatic, warm, bitterish taste, which is dependent upon an essential oil, combined with camphor. Rosemary has been recommended in nervous headaches, in the form of infusion. It is now rarely used, except for its odour. The flower is called *Anthos*, *av'os*. Its oil — *Oleum Rosmarini* — is officinal. From two to six or ten drops are given in nervous complaints, rubbed up with sugar.
 ROSMARINUS HORTENSIS, Rosmarinus — r. Latifolius, Rosmarinus — r. Officinalis, Rosmarinus — r. Stœchbadis facie, *Teucrium creticum* — r. Sylvestris, *Ledum sylvestre*.
 ROSSALIA, Scarlatina — r. Squamosa, Scarlatina.
 ROSSIGNOL. A name given, in France, to an affection to which pressmen are subject. It is a sprain, followed by tumefaction of the radio-carpal joint.
 ROSSOLIO, see Spirit.
 ROSTRUM, *Rhynchos*, *Rinchos*, *Ramphos*, 'a beak.' (F.) *Bec*. A name given to several old fowls, on account of their resemblance to the beaks of different birds. The principal were the *Rostrum corvi'num*, *anati'num*, *psittaci'num*, *vultur'num*, *cyy'neum* seu *olori'num*, *grui'num*, *lacer'ti'num*, &c.
 ROSTRUM EXTERNUM, Olecranon — r. Poreinum, Acromion — r. Posterius, Olecranon — r. Sphenoidale, *Azygos processus*.
 ROSY BETTY, *Erigeron bellidifolium* — r. Bush, *Spiræa tomentosa* — r. Drop, Gutta rosea — r. Whelk, Gutta rosea.
 ROT, Eructation.
 ROT, Grinders', Asthma, grinders'.
 ROTACISM, *Rotacis'mus*, *Rottacismus*, *Rhotacis'mus*, *Psellis'mus rhotacis'mus*, (F.) *Grassegement*. A vicious pronunciation of the Greek, *Ρ*, *Ραυ*, common in the northern parts of England; especially near Newcastle. Called, there, the *Burr* or *Burrh*.
 ROTACISMUS, *Grassegement*, Rotacism.
 ROTA'TOR, from *rotare*, *rotatum*, (*rota*, 'a wheel,') 'to turn round,' (F.) *Rotateur*. A name given to several muscles that turn the parts to which they are attached upon their axes; — such as the oblique muscles of the eyes, the pronators, supinators, &c.
 ROTATOR, Trochanter.
 ROTATOR'S DORSI. Eleven small muscles on each side of the dorsal vertebrae, which arise from the point or upper edge of each transverse process, and pass to the lower edge of the arch of the vertebra above, as far as the base of the transverse process. Their action is to rotate the individual vertebrae on each other.
 ROTATORES FEMORIS, Obturatores — r. Oculi, Oblique muscles of the eye.
 ROTCOLL, Cochlearia armoracia.
 ROTTACISMUS, Rotacism.
 ROTTLE'RA TINCTORIA. A euphorbiaceous plant of India. A powder is attached to the fruit capsule of this plant, which is brushed off and col-

leaved when the fruit is dry. It is called *Kameyala*, is used in Northern India as a vermifuge for dogs; and has proved effectual against tapeworm in man. The dose is two or three drachms, which purges.

ROTULA, Patella, Trochiscus—*r.* Genu, Patella.

ROTULAD, see Rotular aspect.

ROT'ULAR; from *rotula*, 'the patella.' Relating or appertaining to the patella.

ROT'ULAR ASPECT. An aspect towards the side on which the rotula is situated.—Barclay. *Rot'ulad* is used by the same writer, adverbially, to signify 'towards the rotular aspect.'

ROTULE, Patella.

ROTULIAN, *Rotulia'nus*, (F.) *Rotulien*. Relating or belonging to the rotula or patella.

ROTUNDUS, Round.

ROUQUO, Terra Orleana.

ROUEN, MINERAL WATERS OF. This water, known under the name, *Eau des fontaines de la Maréquerie*, is cold, and contains carbonate of iron, carbonic acid, carbonate of lime, chloride of calcium, &c. It is tonic.

ROUGE, Colcothar—*r.* d'Angleterre, Colcothar—*r.* de Prusse, Colcothar—*r.* du Sang, Hæmatin.

ROUGEOLE, Rubecula—*r.* *Fausse*, Roseolæ.

ROUGEURS, Flush.

ROUGH ROOT, Liatris.

ROUILLE, Rubiginous.

ROULEMENT DU LAMBEAU, see Flap.

ROUND, *Teres*, *Rotun'dus*, (F.) *Rond*. Anatomists have given this name to many organs whose fibres are collected in round fasciculi. See *Teres*.

ROUND FORAMEN, *Fora'men rotundum*. A foramen of the sphenoid bone, a little behind the *foramen lacrum superius*, which gives passage to the second branch of the fifth pair of nerves, called *superior maxillary*.

ROUND HEART, Thaspium atropurpureum.

ROUND LIGAMENTS OF THE UTERUS, *Ligament'a rotund'a U'teri*, (F.) *Cordons sus-pubiens* (Ch.), *Cordons vasculaires*, *Ligaments ronds de l'utérus*. Two cords, which arise from the lateral and superior parts of the uterus, whence they proceed towards the abdominal rings, which they pass through, and terminate by vanishing in the areolar tissue of the groins, mons veneris, and labia majora. These cords are whitish, flattened, and narrower in the middle than at the extremities. According to Mr. Rainey, they are composed chiefly of the striped muscular fibre.

ROUP, Cynanche trachealis, Raucedo.

ROÛRE, Rhus coriaria.

ROUTINE PRACTITIONER, Routinist.

ROUTINIST, pronounced *routeen'ist*; (F.) *Routinier*; from (F.) *routine*, 'a regular habit or practice, unvaried by circumstances.' One who practises in such an unvaried manner:—*a routine practitioner*.

ROVE, Scab.

ROVING, Delirium.

ROWLAND'S SPRINGS, see Georgia, mineral waters of.

ROWTING, Snoring.

RUBBER, INDIAN, Caoutchouc.

RUBBING SOUND, *Bruit de Frottement*.

RUBE'DO, *Rubor*, 'redness;' from *rubere*, 'to be red.' A diffused, but not spotted, redness on any part of the skin; like that which arises from blushing. Blushing.

RUBIFA'CIENT, *Erethis'ma*, *Erethis'ticum*, *Rubefa'ciens*, from *rubere*, 'red,' and *facio*, 'I make.' (F.) *Rubéfiant*. That which produces redness. A medicine which causes redness of the skin. The action is called *Rubefaction*.

RUBÉFIANT, Rubefacient.

RUBE'OLA, *Rubeola vulg'aris*, from *rubeo*, 'I am red.' *Rose'olæ*, *Exanth'e'sis Rubeola*, *Vete'ra'na*, *Blac'ciæ*, *Fersæ*, *Blactiæ*, *Bovil'læ*, *Morbil'li*, *Scarlati'na pustulo'sa seu milia'ris*, *Febris morbillo'sa*, *Typhus morbillosus*, *Phœnicis'mus*, *Ecc'hy'mata*, *Measles*, (Sc.) *Mirles*, (Prov.) *Creas*, *Crewds*, *Malls*, *Maules*, *Measings*, (F.) *Rougeole*, *Fièvre morbillense*. One of the major exanthemata; generally affecting individuals but once, and produced by specific contagion. The rash usually appears on the fourth, but sometimes on the third, fifth, or sixth day of a febrile disorder: and, after a continuance of four days, gradually declines with the fever. The disease generally commences from ten to fourteen days after the contagion has been received. The eruption first shows itself in distinct, red, and nearly circular spots, somewhat less than the ordinary areolæ of flea-bites. As these increase in number, they coalesce; forming small patches of an irregular figure, but approaching nearest to that of semi-circles or crescents. These patches are intermixed with single, circular dots and with interstices of the natural colour of the skin. On the face they are slightly raised, so as to give the sensation of inequality of surface to the finger passed over the cuticle. The disappearance of the eruption is followed by desquamation of the cuticle. Measles is not dangerous of itself; but it is liable to induce pneumonia in winter, and dysentery in summer, which are, at times, very fatal. These are apt to come on at the time of, or soon after, the disappearance of the eruption. When they supervene, they must be treated as idiopathic affections. It demands a general antiphlogistic treatment. Willan has pointed out a kind of RUBEOLA SPURIA, which he calls RUBEOLA sine CATARRHO. In this the rash runs its regular course, with little fever or catarrhal affection; affording no certain security against the common or regular disease. He also gives the name, RUBEOLA NIGRA or BLACK MEASLES, to an unusual appearance of the measles about the seventh or eighth day, when the rash becomes suddenly livid, with a mixture of yellow. It is devoid of inconvenience or danger; and is removed in a week or ten days by the mineral acids and tonics.

RUBEOLA SPURIA, Roseolæ.

RUBEOLÆ, Roseolæ.

RUBEOLOID, see Roseole.

RUB'IA, from *rubere*, 'red.' *R. Tincto'rum seu peregrin'a seu sylvest'ris seu major*, *Erythro'd'anon*, *Radix rubra*, *Dyer's Madder*, *Madder*, (F.) *Garance*. Family, Rubiaceæ. Sex. Syst. Tetrandria Monogynia. The root of this plant—*Rubia*, (Ph. U. S.)—has a bitterish, somewhat austere, taste, and a slight, not agreeable, smell. They were formerly considered deobstruent, detergent, and diuretic.

RUBIG'INOUS, *Rubigin'osus*, from *rubigo*, *rubiginis*, 'rust.' (F.) *Rouillé*. Rusty. Having the colour of rust. An epithet given to the sputa in certain cases of pneumonia.

RUBINUS VERUS, Anthrax.

RUBOR, Rubedo.

RUBR'ICA FABRILIS, from *rubere*, 'red.' A red, heavy, earthy matter, formerly employed for making drying plasters; *Hard Ruddle*, *Red Chalk*.

RUBRICA SINOP'ICA. A heavy, compact, reddish earth: formerly used in diarrhoea.

RUBRIN, Hæmatin.

RUBUS AFFINIS, *R. fruticosus*; allied to *rubus*, 'red.'

RUBUS ARCTICUS, *Shrubby Strawberry*, *Bacca Norland'icæ*. Ord. Rosaceæ. Sex. Syst. Icosandria Polygynia. The fruit is recommended by Linnæus as possessing antiseptic, refrigerant, and antiscorbatic qualities.

RUBUS BATUS, *R. cæsius*.

RUBUS CÆSIUS, *R. batus*, *Dewberry plant*, (F.) *Ronce bleue*. The fruit resembles the blackberry in appearance and properties. The bark of the root of *R. Trivialis* seu *Canadensis* seu *procumbens* seu *flagellaris*, *American Dewberry*, *Low Blackberry*, is astringent.

RUBUS CANADENSIS, see *R. cæsius*.

RUBUS CHAMÆMORUS, *Cloudberry Tree*, *Chamæmorus*, *C. Norvegica*, *Chamædryis*, *Cloudberry*, *Knot-berries*, (F.) *Ronce de Montagne*. The ripe fruit is sometimes prepared like a jam, and used in fevers, &c., to allay thirst. It has been much extolled as an antiscorbutic.

RUBUS FLAGELLARIS, see *R. cæsius*—*r. Frambæsius*, *R. idæus*—*r. Frondosus*, *R. fruticosus*.

RUBUS FRUTICOSUS, *R. affinis* seu *paniculatus* seu *niger* seu *frondosus* seu *vulgaris*; *Common Bramble*, which affords *Blackberries*, (Prov.) *Brambleberries*, *Bumblekites*, (F.) *Ronce noire*. The berries are eaten as a summer fruit, of which they form a poor variety. The bark of the root of the *Rubus villosus*, *American Blackberry*, *High or standing blackberry*, *Hairy American Bramble*, is astringent and has been used in the last stages of dysentery, and in cholera infantum.

RUBUS IDÆUS, *R. frambæsius*, *Batos*; *Raspberry*, (F.) *Framboise*, *Ronce*. The fruit of the best varieties—(Sc.) *Rasps*, (Prov.) *Hindberries*—is extremely agreeable; and is much used. It was, formerly, called *Batton moron*.

RUBUS NIGER, *R. fruticosus*—*r. Occidentalis*, see *R. strigosus*—*r. Paniculatus*, *R. fruticosus*—*r. Procumbens*, see *R. cæsius*.

RUBUS STRIGOSUS, *Wild red raspberry*, of the United States. The leaves are often used as a mild astringent, as well as those of *Rubus occidentalis*, *Black Raspberry*.

RUBUS TRIVIALIS, see *Rubus cæsius*—*r. Villosus*, see *Rubus fruticosus*—*r. Vulgaris*, *R. fruticosus*.

RUCKING, Eructation.

RUCTAMEN, Eructation.

RUCTATIO, Eructation.

RUCTUATIO, Eructation.

RUCTUOSITAS, see Eructation.

RUCTUS, Eructation—*r. Acidus*, *Oxyregmia*—*r. Nidorosus*, *Cnissoregmia*.

RUBBECKIA LACINIATA, *Cone flower*, *Thimble weed*; indigenous; Order, *Compositæ*; is diuretic, and has been given in nephritic affections.

RUDDLE, HARD, *Rubrica fabrilis*.

RUDIMENTAL, *Rudimenta'lis*, (F.) *Rudimentaire*, from *rudimentum*, 'the first beginning.' That which is but slightly developed.

RUDOLPHIA FRONDOSA, *Butea frondosa*.

RUE, *Ruta*—*r. Common*, *Ruta*—*r. de Chèvre*, *Galega officinalis*—*r. Goat's*, *Galega officinalis*—*r. Goat's*, *Virginia*, *Galega Virginiana*—*r. Meadow*, *Thalictron*—*r. des Murailles*, *Asplenium ruta muraria*—*r. des Prés*, *Thalictron*—*r. Sauvage*, *Ruta*.

RUELLES, Wrinkles.

RUFF, Eructation.

RUGA, Wrinkle.

RUGINE, *Rasporium*.

RUGISSEMENT, *Rugitus*.

RUGITUS, *Brycheth'mos*, from *rugire*, *rugitum*, 'to roar.' (F.) *Rugissement*. A Latin word, which ordinarily expresses the roaring of the lion; and which is used, by some medical writers, to designate a particular species of borborygmus compared to it.

RUGOSE, Wrinkled.

RUGOUS, Wrinkled.

RUM, *Tafia*, *Spiritu'us Jamaicenis*, *Molasses*

Spirit, (F.) *Rhum*. A spirit distilled from sugar, or molasses. See *Spirit*.

RUMA, *Mamma*.

RUMEN, *Hypogastrium*, *Ingluvies*.

RUMEX ACETOSELLA, *Sheep Sorrel*, *Field Sorrel*; indigenous; has similar virtues.

RUMEX ACETOSUS, *R. tuberosus* seu *intermedius*, *Lap'athum pratense*, *Ox'alis Acetos'a*, *Acetos'a vulgaris* seu *pratensis* seu *nostras*, *Anax'yris*, *A. arvensis*, *Sour dock*, *Sorrel*, *Common Sorrel*, (Sc.) *Docken*, (F.) *Oseille*, *Vinette*, *Aigrette*, *Suelle*. Ord. *Polygonacæ*. Sec. *Syst.* *Hexandria Trigynia*. The leaves are sour, and are used in cooking, and also as a refrigerant.

RUMEX ACUTUS, *Sharp-pointed Wild dock*, *Orylap'athum*, *Lap'athum*, *L. sylvestrè* seu *acutum*, *Rumex*, *R. paludosus* seu *pussillus*, *Lap'athos*, (F.) *Patience sauvage*. A decoction of the root has long been used in cutaneous affections. It is, sometimes, employed for the cure of the itch.

RUMEX ÆTENSIS, *R. scutatus*.

RUMEX ALPINUS, *Acetos'a Alpina*. The systematic name of the plant that affords the *Monk's Rhubarb*, (F.) *Rhabarbe des Moines*. See *Rumex patientia*.

RUMEX AQUATICUS, *Rumex hydrolapathum*—*r. Britannica*, *Rumex hydrolapathum*—*r. Confer-tus*, *R. patientia*—*r. Dignus*, *Oxyria reniformis*—*r. Glaucus*, *R. scutatus*—*r. Hastatus*, *R. scutatus*—*r. Hastifolius*, *R. Scutatus*.

RUMEX HYDROLAP'ATHUM, *Water-Dock*, (Old Eng.) *Brokeleak*, *Hydrolapathum*, *Rumex aquat'icus* seu *Britan'nica*, *Herba Britan'nica*, *Lap'athum aquat'icum*, (F.) *Parelle*, *Patience d'eau*. The leaves of this plant are subacid, and said to be laxative. The root has been used as a tonic, astringent, and antiscorbutic. It has also been employed externally in some cutaneous affections.

RUMEX INTERMEDIUS, *R. acetosus*.

RUMEX OBTUSIFOLIUS, *Lap'athum sylvestrè*, *Blunt-leaved Dock*, *Bitter dock*. The root of this, as well as of *R. CRISPUS*, *Curled*, or *Sour*, or *Yellow*, has similar virtues to those of the other species. Both have been used in decoction in the same cases as sarsaparilla.

RUMEX OXYOTUS, *R. scutatus*—*r. Paludosus*, *R. acutus*.

RUMEX PATIENTIA, *R. confer'tus*, *Lap'athum horten'sè*, *Rhabar'barum monachorum*, *Hippolap'athum*, *Patientia*, *Garden Patience*, *Monk's Rhubarb*, (F.) *Patience*, *Rhabarbe sauvage*, *Parelle*. This root, which is supposed to possess the virtues of rhubarb, but in an inferior degree, is, according to Linnæus, obtained from the *Rumex patientia*; according to Murray, from the *Rumex alpinus*.

RUMEX PUSILLUS, *R. acutus*.

RUMEX SANGUINEUS. The root of the *bloody dock* or *bloody veined Dock*, has an austere and astringent taste; and has been employed in dysentery. It is called, also, *Lap'athum sanguin'um*, (F.) *Oseille ou Patience Rouge*, *Sangdragon*.

RUMEX SCUTATUS, *R. glaucus* seu *hastifolius* seu *Athen'sis* seu *oxyotus* seu *hastatus*, *Acetos'a rotundifolia* seu *Roma'na* seu *Rotundifolia horten'sis* seu *scuto'ta*, *Lap'athum scuto'tum* seu *rotundifolia*, *Roman* or *Garden Sorrel*, *Green Sauce*, *French Sorrel*, (F.) *Oseille boucher*, *Oseille ronde*, *Petite O*. Virtues the same as those of the common sorrel.

RUMEX TUBEROSUS, *R. acetosus*.

RUMINATION, *Rumina'tio*, from *ruma* or *rumen*, 'the gullet.' *Merycis'mus*. A function peculiar to ruminating animals, by which they chew a second time the food they have swallowed. An analogous phenomenon is sometimes seen in man. One who ruminates is in French *mérycole*.

RUMMET, Pityriasis.
 RUMP, *Croupion*—r. Bone, Coccyx.
 RUNCHEs, *Sinapis arvensis*.
 RUNCINA, *Raspatorium*.
 RUNCINULA, *Raspatorium*.
 RUNKILL, Wrinkle.
 RUNKLE, Wrinkle.
 RUNNET, Rennet.
 RUNNING, *Cursus*, (F.) *Course*. A succession of leaps, executed with rapidity, to transport the body quickly from one place to another.
 RUNNING, Rennet.
 RUNSH, *Sinapis arvensis*.
 RUNUNCULA, *Raspatorium*.
 RUPES, Lips of the Vulva. See Lip.
 RUPIA, *Rhyphia*, *Ulcus aton'icium*, *Ecephly'sis Rhy'phia*, *Rhypha'ria*, from 'ρυτος, 'filth.' An eruption of large flattish blebs, which contain a fluid—at first serous, afterwards puriform, and often bloody, which rapidly concretes into crusts, at the base of which are ulcers of variable depths.
 It requires the use of tonics internally, and of stimulating ointments externally.
 RUPIA ESCHAROTICA, *Pemphigus infan'tilis seu gangran'osus*; known in Ireland under the names—white blisters, eating hive and burnt holes. An affection, which bears a close similarity to pemphigus, particularly in the absence of a thick rugous crust, whilst in its chief feature, that of ulceration, it evidently belongs to Rupia.
 RUPTIBILITAS, Fragilitas.
 RUPTIO, Rhexis.
 RUPTORIUM, *Cauterium*—r. *Commune*, *Potassa fusa*.
 RUPTURA, *Erexis*, *Hernia*, *Laceration*, *Rhexis*—r. *Cornæe*, *Ceratorrhexis*—r. *Herniosa*, *Hernia*—r. *Ovarii*, *Oariorrhexis*—r. *Uteri*, *Uterus*, *rupture of the*—r. *Vaginæ*, *Colporrhexis*.
 RUPTURE, *Hernia*, *Rhexis*—r. *du Cœur*, *Cardiorrhexis*—r. of the Groin, *Bubonocœle*—r. *de la Matrice*, *Uterus*, *rupture of the*—r. *Wort*, *Herniaria glabra*.
 RUPTURED, see *Hernial*.
 RUSCUS, *R. aculeatus*, *Bruscus*, *Orymyr'rhinë*, *Ocymyr'sinë*, *Myrtacanth'a*, *Catun'gelos*, *Myacan'tha*, *Scop'ia ve'gia*, *Wild Myrtle*, *Centromyr'inë*, *Butcher's Broom*, (Prov.) *Knee-holly*, (F.) *Petit house*, *Fragon*, *Ord. Smilacæe*. *Sec. Syst.* *Dioecia Monadelphia*. The root has been recommended as an aperient and diuretic.
 RUSCUS ACULEATUS, *Ruscus*.

RUSCUS HYPOGLOS'SUM, *Uvula'ria*, *Hypoglossum*, *Hippoglossum*, *Bistin'gua*, *Bonifa'cia*, *Laurus Alexandri'na angustifo'lia*, (F.) *Laurier Alexandrin*, *Langue de cheval*. Formerly used against relaxed uvula.

RUSH, SWEET, *Acorus calamus*, *Juncus odoratus*.

RUSMA, see *Orpiment*.

RUSPINI'S STYPTIC, see *Styptic*, *Ruspini's*.

RUSPINI'S TINCTURE FOR THE TEETH. An empirical preparation, composed of *Florentine orris* ʒvii, cloves ʒj, rectified spirit Oij, ambergris ʒj. RUT, Heat.

RUTA, 'ρυτη, *R. graveolens* seu *horten'sis* seu *altera*, *Peg'anum*, *Besa'sa*, *Common Rue*, (F.) *Rue*, *Rhue*, *Rue sauvage*, *Herbe de grace*; *Ord. Rutacæe*. *Sex. Syst.* *Decandria Monogynia*. The plant has a strong, ungrateful odour, and bitter pungent taste. It is acrid, so as to blister the skin. Its properties are reputed to be tonic, stimulant, antispasmodic, and emmenagogue. Dose, gr. xv to ʒij. The leaves are officinal—*Ruta*. (Ph. U. S.)

Oleum Rutaë, distilled Oil of Rue, is antispasmodic; and, externally, rubefacient. Dose, gtt. ij to ʒj.

RUTA ALTERA, *Ruta*—r. *Capraria*, *Galega officinalis*—r. *Graveolens*, *Ruta*—r. *Hortensis*, *Ruta*—r. *Muraria*, *Asplenium ruta muraria*.

RUTABULUM, *Penis*.

RUTA'CEUM, from *Ruta*, 'rue.' Vinegar of rue.

RUTIDOMA, see *Rutidosis*.

RUTIDO'SIS, *Rytido'sis*, *Rhytido'sis*, from *ρυτιδω*, 'I wrinkle.' The act of wrinkling; as *Rutido'ma* means a shrivelled or wrinkled body. A destruction or atrophy of the eye. Corrugation and subsidence of the cornea.

RUYSCHIA'NA TU'NICA, (F.) *Lame* on *Membrane Ruyschienne*. According to Ruysch, and the greater part of his disciples, the choroid coat of the eye is formed of two laminæ. His son gave to the inner the name *Tunica Ruyschia'na* or *Membrana Ruyschia'na* seu *Ruysch'i'i*.

Tunica Cellulosa Ruyschia'na is the areolar substance under the peritoneal covering of the stomach. It is not numbered among the coats of that organ.

RYE, *Secale*—r. *Horned*, *Ergot*—r. *Robbin's*, *Polytrichum juniperinum*—r. *Spurred*, *Ergot*.

RYTIDOSIS, *Rutidosis*.

RYTIS, *Wrinkle*.

S.

S. A. &c., see *Abbreviation*.
 SAAG, *Urine*.
 SABADILLA, *Veratrum sabadilla*, see *Veratrina*.
 SABADILLIN, see *Veratrina*.
 SABATILLA, *Veratrum sabadilla*.
 SABBATIA, *Chironia angularis*—s. *Angularis*, *Chironia angularis*.
 SABINA, *Juniperus sabina*.
 SABINE, *Juniperus sabina*.
 SABLÉ, *Maëulo'sus*, 'sanded,' from *sabulum*, 'sand.' Having the appearance as if strewed with sand. The terms *sablé* and *piqueté* are sometimes applied to the brain, when a slice of it exhibits red points as if it had been strewed with red sand. Such is the case in cerebral hyperæmia.

SABOT DE VÉNUS JAUNE, *Cypripedium*, *Inteum*.

SABUCUS, *Sambucus*.

SAB'ULOUS, *Sabulo'sus*, *Areno'sus*, *Psammo'des*, from *sabulum*, 'sand.' The sandy deposit often seen in the urine.

SABULUM CONARII, see *Pineal gland*.

SABURA, *Saburra*.

SABUR'RA, *Sabu'ra*, *Sordes*. This word signifies, by derivation, 'coarse sand, or ballast.' In its common acceptation, it means *foulness of the stomach*, as it is sometimes called;—vitiated matters supposed to be retained and accumulated in the stomach—the result of imperfect digestion—and which have been sometimes considered as a morbid product of the mucous secretion of that organ, or of the biliary secretion; at others, as a residuum from alimentary substances badly di-

gested. The *Saburral state*, *Colluvies gastrica*, *Cruditates ventriculi*, *Gastrismus*, (F.) *Embarras gastrique*, *État saburral*, is an accumulation of saburrae in the stomach, (F.) *Saburres gastriques*, which the Humourists considered to be the cause of a number of diseases.

SABURRA VERMINOSA, Helminthiasis.

SABURRAL, *Saburralis*. Relating or appertaining to saburrae,—as the 'saburral state.'

SABURRATIO, Arenatio.

SABURRES GASTRIQUES, see Saburra.

SAC, see Sack — *s. Herniaire*, Hernial sac — *s.* of the Omentum, see Epiploon, gastro-hepatic.

SACCADÉ, see Respiration, jerking.

SACCATUS, Encysted.

SACCHAR, Saccharum.

SACCHARHYDROLÉ, Syrup.

SACCHARI FÆX, Melasses.

SACCHARINA, *Saccharolés*.

SACCHARO-ALCOOLÉ, Ratafia.

SACCHAROLÉ LIQUIDE, Mellitum, Syrup — *s. Mou*, Conserva, Electuarium — *s. Solide*, see Pastel, and Tabella.

SACCHAROLÉS (F.), *Sacchari'na*, from *saccharum*, 'sugar.' A name given by MM. Henry and Gubourt to medicines which have sugar or honey for excipient, or for predominant principle. M. Béral so calls an exact mixture of pulverized sugar with other substances also in powder, but in less quantity.

SACCHAROMETER, (F.) *Saccharomètre*, *Pèse-sirop*, from *saccharum*, 'sugar,' and *perpov*, 'measure.' A hydrometer adapted for determining the density of syrups. The marginal figure is graduated to Baumé's scale. See Areometer.

SACCHAROMYCES, *Torula cerasiæ*.

SACCHARORRHŒA, Glycyrrhœa — *s. Cutanea*, *Sudor dulcis*.

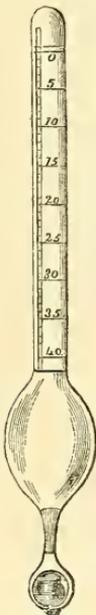

SACCHARORRHŒA LACTEA, *Galactorrhœa saccharata*. A secretion of unusually sweet milk.

SACCHARORRHŒA PULMONALIS, *Sputum dulcè* seu *saccharatum*. The copious expectoration of unusually sweet matter from the lungs.

SACCHARORRHŒA URINOSA, *Diabetes mellitus*.

SACCHARUM, *Sacchar*, *सख्खार*, from Arabic, or rather Sanserit, *Sakar*, 'white earth.' *Sachar*, *Suechar*, *Sutter*, *Zuehar*, *Zu'caro*, *As'sakur*, *Tigala*, *Zac'charum*, *Zozar*, *Zu'charum*, *Zuc'carum*, *Zuehra*, *Mel arundinæum*. *Sugar*, (F.) *Sucre*. The produce of the juice of *Sac'charum officinatum* seu *officinale* of Linnæus, *Cal'amus Indicus* seu *Saccharinus*, *Sugar Cane*, (F.) *Canne à Sucre*, *Cannamele*; *Arun'do saccharifera* of Sloane; *Ord.* Graminæ; *Sex. Syst.* Triandria Digynia, and also of the beet, maple, &c.

Saccharometer.

True Sugars are those with which alcoholic fermentation may be effected, by the addition of yeast and water. They are:—

Species.

Varieties.

- | | |
|--------|--|
| 1..... | { Hard sugar of the cane, maple, beet, chestnut, &c.
Liquid sugar, sugar of malt, of the sweet potato, melasses, honey, &c.
Hard sugar of the grape, ripe fruits, starch, diabetes, &c.
Hard sugar of the mushroom. |
| 2..... | |
| 2..... | |
| 4..... | |

Imperfect sugars are those in which alcoholic fermentation cannot be effected by means of yeast and water.

Species.

Varieties.

- | | |
|--------|-------------------------|
| 1..... | Manna. |
| 2..... | Sugar of Milk. |
| 3..... | Sugar of jelly or glue. |
| 4..... | Liquorice. |
| 5..... | Pieromel. |

Sugar is prepared from the expressed juice of the sugar-cane, boiled with the addition of quicklime or common vegetable alkali. It is used, in pharmacy, for the preparation of syrups, conserves, lozenges, &c. It is nutritious, and is employed as an aliment, and as a eutrophic demulcent and antiseptic. Dissolved in small quantities in water, as in tea, it is apt to disagree with dyspeptics; an evil which does not always occur when the same substance is taken more largely.

Liver or Hepatic Sugar, (F.) *Sucre du Foie*, has been recently found to be a normal secretion of the liver. It is more readily assimilated than other varieties of sugar. See Glucose.

SACCHARUM ACER'NUM, *S. Canaden'se*, *Maple Sugar*, is often used as a demulcent.

SACCHARUM ALBUM, *S. purificatum*, *Saccharum* (Ph. U. S.), *Sal Indus*, *White Sugar*, *Refined Sugar* is the *Loaf Sugar*. *Double-refined Sugar* has been called *Tabarzet*.

SACCHARUM ALUMINATUM. Equal parts of white sugar and alum, powdered. Used as a styptic.

SACCHARUM CANDIDUM, *S. candum* seu *cantum* seu *canthum*, *Al'phenic*, *Nabot*, *Sugar candy*, *Sugar candian*, (F.) *Sucre Candi*, is the crystallized juice of the cane.

SACCHARUM CANDUM, *S. Candidum* — *s. Cantum*, *S. Candidum* — *s. Canthum*, *S. Candidum* — *s. Commune*, *Saccharum non-purificatum*.

SACCHARUM HORDEATUM, *Barley Sugar*, (Prov.) *Sugar barley*, *Penides*, *Penid'ium*, *Sac'charum penid'ium*, is a variety of sugar candy.

SACCHARUM LACTIS, *Sugar of milk*.

SACCHARUM NON-PURIFICATUM, *Muscovado*, *raw*, *brown* or *moist sugar*, is the *S. commune*, *S. rubrum*, *Mel cannae*, or *coarse sugar*.

SACCHARUM OFFICINARUM, see *Saccharum* — *s. Penidium*, *Hordeatum* — *s. Rosaceum*, *Confectio rosæ gallicæ* — *s. Saturni*, *Plumbi superæctas*.

SACCHARURE, from *saccharum*, 'sugar.' A medicine resulting from the intimate union of sugar with the medicinal principles of alcohol or ethereal tinctures. — Béral.

SACCULATED, Encysted.

SACCULATUS, Encysted.

SACCULI ADIPOSI, *Fatty vesicles* — *s. Chalicophori*, see *Lacunæ of Bone* — *s. Laryngei*, *Ventricles of the larynx*.

SACCULI MEDICINABLES. Bags containing medicinal substances.

SACCULI MEDULLARES, see *Medullary membrane*.

SACCULUS, diminutive of *sacculus*, 'a little sac.' This name has been given to two sacs formed by the membranous vestibule, which open into each other, and contain the *otolithes* and *otoconies*: one of these is termed the *sacculus vestibuli*, the other *sacculus*. See *Semicircular canals*.

SACCULUS, Marsupium — *s. Cephalicus*, *Cucupha* — *s. Chylifer* seu *rorifer*, *Receptaculum chyli* — *s. Cordis*, *Pericardium* — *s. Ellipticus*, see *Semicircular canals* — *s. Lactiferus*, see *Lactiferous vessels*.

SACCULUS LARYNGEIS. A cæcal pouch, of variable size, formed by the mucous membrane in the ventricles of the larynx.—Hilton.

SACculus MEDICINALIS, Pulvinar medicatum —s. Sphericus, see Semicircular canals.—s. Vesical, see Bladder, sacculated —s. Vestibuli, Semicircular canals, see Sacculus.

SACCUS, Sac —s. Coli, Cæcum —s. Cordis, Pericardium—s. Herniosus, Hernial sac—s. Epiploicus, Epiploon —s. Intestini crassi, Cæcum —s. Lacrymalis, Lacrymal sac —s. Lactens, Receptaculum chyli —s. Mucosus, see Bursæ mucosæ —s. Peritonæi retro-ventricularis, see Epiploon, gastro-hepatæ —s. Pleuræ, Pleura—s. Venarum cavarum, Sinus dexter cordis —s. Venarum pulmonalium, Sinus pulmonalis.

SACER, Sacral —s. Ignis, Herpes zoster —s. Morbus, Epilepsy —s. Musculus, Transversalis dorsalis.

SACERDOTIS PENIS, Arum maculatum.

SACHET (F.), *Sacculus*, 'a little sac.' A small bag containing perfumes to be placed among clothes to communicate to them an agreeable odour. The following is a formula for the powder they contain. *Powdered cloves and powdered cassia*, each one ounce; *powdered orris root*, an ounce and a half; *powdered yellow sandal wood*, one drachm; *otto of roses*, twenty-four drops; *oil of lavender, oil of bergamot*, each one drachm; *musk*, six grains. A scent-bag.

SACK, (F.) *Sec*, 'dry.' A dry wine used by our ancestors; *Vin sec*. Probably *Sherry*.

SACK, *Saccus*, *Seclusorium*; Sax. *rac*. A bag or pouch.

SACK, **HERNIAL**, *Saccus herniosus*, (F.) *Sac herniaire*. An envelope or pouch, formed by the serous membrane of the cavity, whence a viscus has escaped. We distinguish, in a hernial sac, its *orifice* or the opening by which it communicates with the great cavity lined by the serous membrane: its *cervix* or *neck*, (F.) *Collet*, the narrow portion on the outside of the orifice, where strangulation sometimes occurs: the *body*, (F.) *Corps*, which is the round prominent part; and the *fundus* or *bottom*,—the part opposite to the orifice.

SACK POSSET; from *sack*, 'the wine,' and *posset*. A posset made of sack, milk and other ingredients.

SACK, **SEROUS**. The shut cavity formed by any serous membrane, as by the pleura or peritoneum.

SACK WHEY, Wine Whey.

SACRAD, see Sacral aspect.

SACRA FISTULA, Vertebral column.

SACRAL, *Sacer*, (F.) *Sacré*. That which belongs or relates to the sacrum. A name given to several parts.

SACRAL ARTERIES are distinguished into, 1. The *anterior or middle sacral, Median Artery of the Sacrum* of Chaussier, which arises from the posterior part of the abdominal aorta, in front of the 4th lumbar vertebra. It descends, in a serpentine manner, upon the sacro-vertebral articulation, and on the anterior surface of the sacrum. It furnishes many lateral branches, which unite with the lateral sacral arteries, and enter the anterior sacral foramina, to be distributed to the membranes of the marrow, &c. 2. The *lateral sacral arteries*, which are two in number; one on each side. They arise from the hypogastric, from the ilio-lumbar, or from the gluteal; and descend before the anterior sacral foramina, anastomosing in an arched manner, towards the coccyx, with the middle sacral. They give off *external and posterior branches*, which enter the sacral foramina; and *internal branches*, which are distributed to the pyramidalis, sacrum, &c.

SACRAL ASPECT. An aspect towards the region where the sacrum is situated.—Barclay. *Sacrad*

is used by the same writer adverbially to signify 'towards the sacral aspect.'

SACRAL EXTREMITIES. The lower limbs.

SACRAL GROOVES, (F.) *Gouttières sacrées*. Two longitudinal excavations, slightly marked, at the posterior surface of the sacrum; which appear to terminate the vertebral grooves or gutters.

SACRAL NERVES, (F.) *Nerfs sacrés*, are generally six in number. They arise from the termination of the spinal marrow. The first, united with the great cord which descends from the lumbar plexus, concurs with the three others in the formation of the sacral or sciatic plexus. The third and fourth, with branches of the great sympathetic, from the hypogastric plexus. The fifth and sixth (*coecygeal nerve*) are distributed to the ischio-coecygeus muscle, and to the sphincter and levator ani.

SACRAL PLEXUS, *Sciatic plexus*,—the *sacral portion of the crural plexus* of Chaussier, constituted as just mentioned, is situate in front of the pyramidalis. It gives off, backwards, two branches, called the *pubic*, (F.) *honteux*, and the *lesser sciatic*. It terminates in the great sciatic nerve.

SACRÉ, Sacral.

SACRO, in composition, relating or belonging to the sacrum.

SACROCOCCYGEAL, *Sacro-coecygeus*. Relating to the sacrum and coccyx.

SACROCOCCYGEAL ARTICULATION is that of the lower extremity of the sacrum with the superior *facette* of the coccyx. It is closed by two ligaments;—an *anterior* and a *posterior sacro-coecygeal*.

SACRO-COSTALIS, *Sacro-lumbalis*—s. *Fémoral*, *Glutæus major*.

SACROCOXAL'GIA, from *sacro*, *coxa*, 'the hip,' and *algos*, 'pain,' a hybrid term. Some authors have called thus a rheumatic affection of the sacro-iliac symphysis.

SACROÏL'IAC, *Sacro-iliacus*. That which relates to the sacrum and ilium.

SACROÏLIAC ARTICULATION, SYMPHYSIS or **SYNCHONDROSIS**, *Ilio-sacral articulation, symphysis or synchondrosis*, is the union of two surfaces;—two inclined planes, broader above than below; one formed by the sacrum, the other by the ilium. Both surfaces are incrustated by an articular cartilage. The bands which strengthen them are the two *sacro-sciatic ligaments*, the *sacro-spinal*, a *sacro-iliac* ligament, and some irregular fibres. The *sacro-iliac* ligament is a very thick assemblage of short, dense, irregular fibres, occupying the space which the sacrum and ilium leave between them, behind their articular surface. Some authors have termed some irregular fibres, situate in front of the sacro-iliac articulation, *anterior sacro-iliac ligaments*, in opposition to the preceding fasciæ, which they call *posterior sacro-iliac*.

SACROÏSCHIATICUS, *Sacro-sciatic*.

SACROLOMBAIRE, *Sacro-lumbalis*.

SACROLUMBAR, *Sacro-lumbalis, Sacro-lombaire*. That which belongs to the sacrum and loins.

SACROLUMBAR, *Sacro-lumbalis, Sacro-lumbalis Muscle, Sacro-costalis, Dorso-trachelium portion of the Sacro-spinal* of Chaussier, (F.) *Lombocosto-trachélien, Sacro-lombaire*, is seated at the posterior part of the trunk; is thick and triangular below; flat and thin in the remainder, and terminates in a point at its upper extremity. It is attached to the posterior surface of the sacrum; to the corresponding portion of the crista ili; to the extremities of the transverse processes of the lumbar vertebra; to the angles of the eleven inferior ribs; to the tuberosity of the first, and the

posterior tubercle of the transverse processes of the last five cervical vertebrae. The sacro-lumbalis straightens the vertebral column when bent forwards, and maintains it straight. By means of its insertion into the ribs, it can elevate or depress these bones, according as it contracts from above to below, or from below to above. It acts, consequently, sometimes as an inspiratory, at others as an expiratory muscle.

From six or eight of the lower ribs arises an equal number of fleshy portions, which terminate at the inner side of this muscle, and are called *Musculi Accessorii seu Additamentum ad Sacro-lumbalem*, (F.) *Accessoires du Sacro-lombaire*.

From the upper part of the sacro-lumbalis, a fleshy slip, called *Cervicalis descendens*, *Cervicalis descendens Dienerbroeckii*, *Transversalis collateralis colli*, *Accessorius ad Sacro-lumbalem*, (F.) *Transversaire grêle*, runs up, to be fixed to the transverse processes of the fourth, fifth, and sixth cervical vertebrae, by three distinct tendons. These last parts, though separated by some anatomists, belong to the sacro-lumbalis.

SACROSCIATIC, *Sacro-ischiaticus*. That which belongs to the sacrum and ischium.

SACROSCIATIC LIGAMENTS are two ligaments, which assist in securing the sacro-iliac articulation. The *great or posterior sacro-sciatic ligament* extends from the crista illi and the sides of the sacrum and coccyx to the tuberosity of the ischium. The *less or anterior sacro-sciatic ligament* arises from the same point, and terminates in the spine of the ischium.

SACROSPINAL, Dorso-trachelian portion of the sacro-lumbalis.

SACROSPINALIS. That which relates to the sacrum and spine. Under this name, Chaussier describes the sacro-lumbalis, longissimus dorsi, transversalis, transversospinalis, and intertransversalis muscles. He divides it into three portions.

SACROTROCHANTÉRIEN, Pyramidalis.

SACROVERTÉBRAL, *Sacro-vertebralis*. That which relates to the sacrum and the vertebrae.

SACROVERTÉBRAL ARTICULATION is the junction of the last vertebrae of the loins with the sacrum. The angle which these two bones form at the anterior part has been called the *Promontory of the Sacrum*, or the *Sacro-vertebral Angle*.

SACROVERTÉBRAL LIGAMENT is a strong ligament, which passes from the anterior part of each of the transverse processes of the last lumbar vertebra to be attached to the base of the sacrum. Its use is to maintain the articulation of those two bones *in situ*.

SACRUM, *Os sacrum seu basilare seu Alagus seu latum seu clunium*, *Lus*, *Luz*, *Vertebra magna*, *Albagiazi*, *Hi'erou ost'leon*, *Clunis*, *Subvertebra*, *Subvertebrum*, *Vet'ala*; from *sacer*, 'sacred;' because it contributes to protect the genital organs, which were considered sacred, or because it was offered in sacrifice. The bone, which forms the posterior part of the pelvis, and is a continuation of the vertebral column. The sacrum is symmetrical and triangular, situate at the posterior part of the pelvis, and concave anteriorly. It has,—1. A *pelvic or anterior surface*, which corresponds to the pelvic cavity, and has four transverse furrows, that point out the parts where the primitive portions of the bone were separated from each other. On each side there are four foramina, called *anterior sacral*; these are oblique, and decrease in size, from above downwards. Through them pass the anterior branches of the sacral nerves. 2. A *spinal or posterior surface*, which is convex, rough, and covered by muscles. Upon the median line are four horizontal, tubercular eminences, forming a

continuation of the spinous processes of the vertebrae; and below, a triangular notch, where the *sacral canal* terminates. On each side of the surface are four foramina, called *posterior sacral*, which are smaller than the anterior, and give passage to the posterior branches of the sacral nerves. 3. The *vertebral surface or base*. Its greatest extent is transversely. It is articulated with the last lumbar vertebra. On it is seen the orifice of the *sacral canal*, of a triangular shape, which decreases in width from above downward; terminates the vertebral canal; is lined by a prolongation of the cerebral membranes; contains the fasciculi of the sacral nerves; communicates, externally, by the sacral foramina; and terminates at the triangular notch on the posterior surface of the bone. At the sides of the upper orifice of the sacral canal are two articular processes, which receive the articular processes of the last lumbar vertebra. The projection, formed by the union of the base of the sacrum with the last lumbar vertebra, is called the *Promontory*, *Promontorium Ossis Sacri*, *Great Angle of the Sacrum* or *Sacro-vertebral Angle*. 4. A *coecygeal face or apex*, (F.) *Face coecygienne ou Sommet*, which is very narrow, and is articulated with the coccyx. 5. *Two lateral margins*, which have, above, a broad, oblique surface, articulated with the ilium.

The sacrum is developed by 30 to 36 points of ossification.

SADDLE, TURKISH, *Sella Turcica*.

SÆPES, *Sepes*.

SAFFLOW, *Carthamus tinctorius*.

SAFFLOWER, *Carthamus tinctorius*.

SAFFRON, *Crocus*—s. *Bastard*, *Carthamus tinctorius*—s. *Dyers*, *Carthamus tinctorius*.

SAFFRON FLOWER, *Carthamus tinctorius*.

SAFFRON, MEADOW, *Colchicum autumnale*.

SAFRAN BÂTARD, *Carthamus tinctorius*, *Colchicum autumnale*—s. *des Indes*, *Curcuma longa*—s. *de Mars apéritif*, *Ferri subcarbonas*—s. *de Mars astringent*, *Colcothar*—s. *des Prés*, *Colchicum autumnale*—s. *Racine de*, *Curcuma longa*.

SAFRANUM, *Carthamus tinctorius*.

SAFRE, *Smalt*.

SAGA, *Sago*.

SAGAPENUM, *Sag'apin*, *Serapi'non*, (F.) *Gomme sérapihique*. A gum-resin, supposed to be obtained from the *Ferula Persica*. Ord. Umbelliferae. *Secr. Syst.* Pentandria Digynia. Its odour is fetid and alliaceous; taste pungent, bitterish, nauseous. It is in small, agglutinated masses of a yellow colour; tenacious; breaking with a horny fracture. It is a reputed antispasmodic and emmenagogue. Dose, gr. x to ʒss.

SAGAPIN, *Sagapenum*.

SAGE, *Salvia*—s. *Indian*, *Eupatorium perforiatum*—s. *Jerusalem*, *Pulmonaria*.

SAGE TREE, *Lantana*.

SAGE, WILD, *Salvia Africana*, *S. Lyrata*.

SAGE-FEMME, *Midwife*.

SAGENA, *Epiploon*.

SAGESSE DES CHIRURGIENS, *Sisymbrium Sophia*.

SAGIMEN VITRI, *Soda*, subcarbonate of.

SAGITTAL, *Sagittalis*, *Sagitta'tus*, from *sagitta*, 'an arrow.'

SAGITTAL FURROW, *Sagittal Groove*, (F.) *Gouttière sagittale*, is a channel on the median line of the inner surface of the skull-cap. It is excavated in the os frontis, in the two parietal and occipital bones, and extends from the crista galli to the internal occipital protuberance. It lodges the longitudinal sinus, which has been called the *sagittal sinus*.

SAGITTAL SUTURE, *Obelæa sutu'ra seu Raphæ*, *Sutura Virga'tu seu juga'tis seu Rabbod'ides*,

Rhabdoïdes, *Rhabdoïdes*, *Rhabdoïdeus* seu *Biparietalis* seu *Interparietalis*. The suture which unites the two parietal bones, and which extends, from before to behind, on the median line, from the coronal suture to the lambdoidal. It is so called, from *sagitta*, 'an arrow,' because it seems to meet the coronal suture as an arrow meets the string of a bow.

SAGITTARIA VARIABILIS. From *sagitta*, 'an arrow,' owing to the prevalent form of the leaves. *Arrowhead*, *Arrowleaf*, *Arrow weed*, *Wapata* of Oregon; *Nat. Ord.* Alismaceæ. Esculent, yielding fecula like arrow-root. The roots are cooling and sub-astringent, and are at times applied to the feet in cases of yaws and dropsical swellings of the legs. The leaves are applied to the breasts to dispel milk.

SAGITTARIUM ALEXIPHARMACUM. *Malaëcæ radix*, *Canna Indica*, *Arundo Indica*. A root cultivated in the West Indies, and supposed to be a remedy for wounds by poisoned arrows.

SAGITTATUS, Sagittal.

SAGO, *Sagus*, *Saga*, *Sagu*, *Segu*, *Amylum pal-maceum*, (F.) *Sagon*, *Sague*. A fecula, obtained from the pith of the *Sagus rumphii*, *Cycas circina-lis*, *C. revoluta*, &c., growing in the Moluccas, Philippine Isles, &c., and which is brought to us in small grains. The same substance is, also, obtained from the West Indies, but it is inferior to that from the East. By boiling in water or milk, sago becomes soft and transparent, and forms an agreeable and nutritious food in febrile, calculous, and other disorders. It is made palatable by sugar, lemon-juice, or wine, where the last is not contra-indicated.

To make sago into a proper mucilage for the sick, a tablespoonful of it should be macerated in a pint of water for two hours, and then boiled for fifteen minutes, stirring assiduously. Care must be taken, that the grains are perfectly dissolved by long boiling and constant stirring.

Sago posset is made by putting *sago*, ℥ij, into water, Oij; boiling until the mucilage is formed: then rubbing *sugar*, ℥ss, on the rind of a lemon, and putting it with *tincture of ginger*, fʒj, into *sherry*, Oss; adding this mixture to the mucilage, and boiling for five minutes.—It is a good restorative.

SAGO, FRENCH, see *Solanum tuberosum*, and *Arrow-root*, common — *s.* Portland Island, see *Arum maculatum*.

SAGOU, Sago.

SAGU, Sago.

SAGUE, Sago — *s. Petit*, see *Solanum tuberosum*.

SAGUERUS GOMUTO, see *Toddy* — *s.* *Rumphii*, see *Toddy* — *s.* *Saccharifer*, see *Toddy*.

SAGUS, Sago — *s.* *Rumphii*, see *Sago*.

SAHARA, *Insomnia*.

SAIDSCHÜTZ WATER, *Seidschütz water*.

SAGNÉE, *Blood-letting* — *s. Spoliative*, *Spoliativa phlebotomia*.

SAGNEMENT DU NEZ, *Epistaxis*.

SAILORS, DISEASES, &c., OF. Sailors, by nature of their occupation, are liable to many diseases. Several of these may, however, be warded off by proper attention to cleanliness and ventilation.

SAIN BOIS, *Daphne gnidium* — *s. Doux*, *Adeps preparatus*.

SAIN AMAND, MINERAL WATERS OF. Sulphuretted waters, in the department of Du Nord, France. They contain carbonic and sulphohydric acids. The *Boue* or deposit contains sulphohydric acid, and salts of iron and magnesia. Temperature, 64° to 82° Fahr.

SAIN ANTHONY'S FIRE, *Erysipelas*.

SAIN AUGUSTINE, CLIMATE OF. This

sea-port of Florida is a frequent retreat during the winter season for the valetudinarian from the more northern parts of the United States. The climate is certainly comparatively mild and equable; but it is liable to frequent north-east storms. There are only a few days, however, in winter, in which the invalid cannot take exercise in the open air. Tampa Bay, and Pensacola, in Florida, and Mobile, in Alabama, which are sometimes visited by the consumptive, are less liable to the storms in question.

SAIN CATHERINE'S SPRINGS, see Canada, *Mineral waters of*.

SAIN CHARLES'S ROOT, *Carlo Sancto* (Radix).

SAIN CROIX, *Santa Cruz*.

SAIN JAMES'S WORT, *Senecio Jacobææ*, *Thlaspi bursa*.

SAIN JOHN'S DANCE, see *Mania*, dancing. — *St. John's Wort*, *Hypericum perforatum*.

SAIN KITTS, see *West Indies*.

SAIN LEONARD'S, CLIMATE OF. This place, which is situate about a mile to the westward of Hastings, in Sussex, England, is less sheltered than it, and is therefore a less favourable retreat, during the winter months, for the phthical valetudinarian.

SAIN MYON, MINERAL WATERS OF. Some cold, acidulous waters at *Saint Myon*, near *Riom*, in the department of *Puy-de-Dôme*. They contain free carbonic acid, subcarbonate of soda, chloride of sodium, and carbonate and sulphate of lime.

SAIN NECTAIRE, MINERAL WATERS OF. Springs in the department of *Puy-de-Dôme*, France. They contain carbonic acid, bicarbonate of soda, and chloride of sodium. Temperature, 75° to 103° Fahr.

SAIN PARDAUX, MINERAL WATERS OF. Chalybeate springs in the department of *Allier*, France. They contain carbonic acid and iron.

SAIN SAUVEUR, MINERAL WATERS OF. Sulphurous waters in the department of *Hautes-Pyrénées*, France. Temperature, 76° to 93° Fahr.

SAIN VINCENT'S, see *West Indies*.

SAIN VITUS'S DANCE, *Chorea*, see *Mania*, dancing — *s.* *Vitus's Dance of the Voice*, *Balbuties*.

SAIR, *Ulcer*.

SAIRE, *Essera*.

SAL, Salt — *s.* *Absinthii*, *Potassæ subcarbonas*, see *Potash* — *s.* *Acetosellæ*, *Potassæ oxalate of* — *s.* *Acetosus ammoniacalis*, *Liquor ammoniæ acetatis* — *s.* *Acidum benzoës*, *Benjamin* — *s.* *Aëratum*, see *Potassæ carbonas* — *s.* *Albus*, *Soda*, *muriate of* — *s.* *Alembroth*, *Alembroth salt* — *s.* *Alkali*, *Soda*, *subcarbonate of* — *s.* *Alkalinus fixus fossilis*, *Soda* — *s.* *Amarum*, *Magnesiæ sulphas* — *s.* *Ammoniacæ volatile*, *Ammoniacæ carbonas* — *s.* *Ammoniacum*, *Ammoniacæ murias* — *s.* *Ammoniacum martiale*, *Ferrum ammoniatum* — *s.* *Ammoniacum secretum Glauberi*, *Ammoniacæ sulphas* — *s.* *Ammoniacum tartareum*, *Ammoniacæ tartras* — *s.* *Ammoniacum vegetabile*, *Liquor ammoniæ acetatis* — *s.* *Ammoniacus nitrosus*, *Ammoniacæ nitras* — *s.* *Ammoniacæ murias* — *s.* *Anglicanum*, *Magnesiæ sulphas* — *s.* *Antiepilepticus of Weissman*, *Cuprum ammoniatum* — *s.* *Antimonii*, *Antimonium tartarizatum* — *s.* *Ammoniacum*, *Ammoniacæ murias* — *s.* *Armoniacum*, *Ammoniacæ murias* — *s.* *Artis*, *Alembroth salt* — *s.* *Asphaltitis*, *Bit noben* — *s.* *Catharticus amarum*, *Magnesiæ sulphas* — *s.* *Catharticus Glauberi*, *Soda*, *sulphate of* — *s.* *Communis*, *Soda*, *muriate of* — *s.* *Cornu cervi volatile*, *Ammoniacæ carbonas* — *s.* *Culinaris*, *Soda*, *muriate of* — *s.* *Digestivus Sylvii*, *Potassæ murias* — *s.* *Diureticus*, *Potassæ acetis* — *s.* *de Duobus*, *Potassæ sulphas* — *s.* *Ebsdamense*, *Magnesiæ sulphas* — *s.* *Enix-*

SALAAM CONVULSION, see Convulsion, Salaam.

SALAB, Salep.

SALACITAS, Satyriasis —s. Vulvæ, Nymphomania.

SALAD, CORN, Valeriana dentata.

SALAP, Salep.

SALCOMBE, (CLIMATE OF.) A small place —the Montpelier of Huxham —which is one of the warmest spots on the S. W. coast of England, and, therefore, in this respect adapted for the phthisical invalid as a winter retreat.

SALEP, *Saloop'* (so pronounced.) *Salab, Salap.* The prepared bulb of the *Orchis mas'cula* and other species of *Orchis*. The salep of Cachemere is from a species of *Euloph'ia*. Salep is in small, irregular, hard masses. In its composition in relation to water, it is closely analogous to tragacanth. It is possessed of similar virtues with sago, tapioca, &c. The mucilage is prepared by dissolving the powdered salep in hot water, with assiduous stirring, and adding to the solution sugar and milk.

SALEP, Otaheite, Arrow-root, (Tahiti).

SALER'NUM, (SCHOOL OF.) An ancient school of medicine at Salerno in Italy. It was established by Charlemagne, in 802; and was the first Christian university at which medicine was taught. It was much celebrated, especially in the 12th century. The work on hygiene, "*De Conservandâ Valetudine*," which bears its name, has passed through several editions in various

languages. It is supposed to have been written by John of Milan, in 1100, and is in Leonine verses.

SALICARIA, *Lythrum salicaria*.

SALICINE, see *Salix*.

SALICORNIA ARABICA, &c., see *Soda*.

SALINE', *Salin'us, Salina'cus, Salinae'cidus, Salin'us, Salsus, Halin'us, Halny'rus, ἁλινοος, Halio'edes, Sali'nous*, from *sal*. That which contains a salt, or has the properties of a salt.

SALINE DRAUGHT or MIXTURE. This may be made as follows:—*Potass. carbon. ℥j, acid. citric. seu tartar. gr. xv seu succ. limon. recent. ℥ss, aquæ f3 viij, syrup. eujusvis ℥j. M.* Given in divided doses as a febrifuge.

SALINE EFFERVESCING DRAUGHT or MIXTURE is made by adding a due proportion of either of the acids above mentioned, or of lemon-juice, to the proper proportion of the carbonate of soda or potassa. About 25 grains of the acid saturate 30 grains of the carbonate. See *Powders, soda*.

SALINES, see *Kentucky, mineral waters of*.

SALINOUS, *Saline*.

SALIS AMMONIACI FLORES, *Ammonia carbonas*.

SALITIO, *Leap*.

SALITUS, *Saline*.

SALIUM, *Saliva*.

SALIUNCA, *Valeriana celtica*.

SALIVA, *Sal'on, Si'elon, Sialo'ma, Pty'sma, Pty'alon, Pty'elon, Salivum, Sputa'men, Sputa'mentum, Sputum, Spittle*, (Old. Eng.) *Spaul*, (Prov.) *Spat*. An inodorous, insipid, transparent, slightly viscid fluid; secreted by the parotid, submaxillary and sublingual glands, and poured into the mouth by the ducts of Steno, Wharton, and Rivinus; the use of which is to mix with the alimentary bolus, and to serve in the process of digestion. It is composed, according to Berzelius, of 992.2 parts of water, 2.9 of a particular animal matter, soluble in water, and insoluble in alcohol, *pty'aline, principium salivale, materia salivina, Casein of the salivæ, Salivary albumen*, of 1.4 of mucus, 1.7 of chlorides of potassium and sodium, 0.9 of lactate of soda and animal matter, and 0.2 of soda.

SALIVÆ FLUXUS CIBO VISO, see *Salivation*.

SALIVAIRE, *Anthemis pyrethrum, Salivary*.

SALIVAL, *Salivary*.

SALIVANS, *Sialogogue*.

SALIVANT, *Sialogogue*.

SALIVARIS, *Salivary* —s. *Herba, Anthemis pyrethrum*.

SALIVARY, *Saliva'rius, Saliva'ris, Salivo'rus, Saliv'al, Sali'vus*, from *saliva*, (F.) *Salivaire*. That which belongs to the saliva.

SALIVARY ALBUMEN, see *Saliva*—s. *Calculi, see Calculi, salivary*.

SALIVARY FIS'TULÆ, *Syalosyrin'ges*, are such as depend upon an accidental opening into the excretory ducts of the salivary glands. Fistulæ are most commonly met with in the duct of Steno.

SALIVARY GLANDS, *Secreting organs of the saliva, Salival glands*, are situate symmetrically, to the number of four, on each side of the face. Their form is very irregular, and their extent varies according to individuals. Their excretory ducts—*Ductus Saliva'rii*, (F.) *Canaux ou Conduits salivaires*—carry the saliva directly into the mouth, without pouring it into any intermediate reservoir, as happens in the case of some of the other glands. The salivary glands have been distinguished into,—1. *The parotid*; 2. *The submaxillary*; 3. *The sublingual*; and 4. *The intra-lingual or lingual*, seated at the inferior surface of the tongue, where the mucous membrane forms a fringed fold.

SALIVATIO, Salivation—s. Mercurialis, Salivation, mercurial.

SALIVA'TION, *Saliva'tio*, *S. cal'ida*, *Epiph'ora ptyalis'mus*, *Sialis'mus*, *Sputum Oris*, *Sial'achus*, *Stelismos*, *Sialorrhœ'a*, *Sialoze'mia*, *Ptyalis'mus*, *Pty'alism*, *Fluxus salivæ*, (F.) *Flux de Bouche*, *Flux salivaire*, *Ptyalisme*; from *Saliva*. A superabundant secretion of saliva; occasioned either locally, by the use of irritating masticatories, or under the influence of some cause which acts on the whole economy, and especially of mercurial preparations. In this last case it is accompanied by a coppery taste in the mouth, by swelling of the gums, and sometimes by looseness of the teeth. Salivation may usually be diminished by the use of astringents, laxatives, &c.

Ptyalismus acutus sympathet'icus, *Salivæ fluxus cibo viso*, *Mouth watering*, the increased flow of saliva produced by the sight, smell, or thought of agreeable food, is a species of ptyalism, as well as the *Ptyalismus acutus mellitus*, *Apoceno'sis ptyalis'mus mellitus*, *Dulce'do Sputato'rum*, or *Sweet spittle*. In this, the saliva has a sweet or mucilaginous taste.

SALIVATION, MERCURIAL, *Saliva'tio mercurial'is*, *Sialoze'mia* seu *Ptyalis'mus mercurial'is*, *P. hydrargyrat'us*, (F.) *Ptyalisme mercuriel*, *Salivation mercurielle*. Salivation produced by mercury. The stomatitis that accompanies it is termed *mercurial*, *Hydrar'gyro-stomatit'is*, (F.) *Stomatite mercurielle*.

SALIVATION MERCURIELLE, Salivation, mercurial.

SALIVATUM, Sialagogue.

SALIVOSUS, Salivary.

SALIVOUS, Salivary.

SALIX. The *Willow*, *I'tea*, (Prov.) *Sally*, *Sally-witly*, (Sc.) *Sauch*, *Sough*, *Willan*, (F.) *Saule*. A genus of plants in the Linnæan system. Ord. Salicacæ.

SALIX FRAG'ILIS, *S. pen'dula* seu *decipiens* seu *amygdali'na* seu *persicifo'lia* seu *Russeli'dna* seu *pippph'aëfolia* seu *Trevira'nii*, or Crack willow (Ph. D.) SALIX ALBA, *S. cœr'u'lea* seu *viteli'na*, or White willow (Ph. D. and Ph. U. S.), (F.) *Osier*. SALIX LATIFO'LIA, or broad-leaved willow. SALIX CA'PREA, *S. Sphacela'ta* seu *toment'osa*, or Great round-leaved willow (Ph. L.) SALIX PENTAN'DRIA seu HERMAPHRODIT'ICA. SALIX HU'MILIS, Low bush willow, Speckled willow. SALIX VITULI'NA, SALIX ENJOEPI'ALA. The bark of each of these has a slightly aromatic odour, and a bitter astringent taste, which is nearly the same in all the species. It is tonic and astringent, and has been used in intermittents, and in cases of dyspepsia, worms, &c. The active principle has been separated, and called *Salicine*. It has been found in about fourteen species of salix and eight species of *Populus*; is like the quinia in medicinal efficacy. Dose, ℞j to ʒj of the powder. Dose of *Salicine* from 4 to 6 grains.

SALIX ÆGYPTIACA, Calaf.

SALLENDERS, Malandria.

SALLIS, Adeps.

SALLOW, Lurid.

SALLY, Salix.

SALLY-WITHY, Salix.

SALMIAC, Ammoniz murias.

SALOOP, Salep. Also, sassafras tea flavored with milk and sugar. Under this name a tea is sold in the streets of London which consists of an infusion of the wood of *Laurus Sassafras* with the addition of milk and sugar—*Sas'safras Tea*.

SALPETRA, Potassæ nitras, Soda, nitrate of.

SALPINGEMPHRAX'IS, from *σαλπιγξ*, *σαλπιγγος*, 'a tube,' and *εμφραξις*, 'obstruction.' Ob-

struction of the Eustachian tube; — a cause of deafness.

SALPINGIT'IS, from *σαλπιγξ*, *σαλπιγγος*, 'a tube,' and *itis*, 'denoting inflammation.' Inflammation of the Eustachian tube.

SALPINGOCYE'SIS, *Paracye'sis tuba'ria*, *Graviditas tuba'ria*, from *σαλπιγξ*, *σαλπιγγος*, 'a tube or trumpet,' and *κρησις*, 'pregnancy.' Tubal pregnancy.—See Pregnancy, tubal.

SALPINGOMALLËEN, Tensor tympani.

SALPINGOPHARYNGË'US, from *σαλπιγξ*, *σαλπιγγος*, 'a trumpet,' and *φαρυγξ*, 'the pharynx.' Valsalva and Douglas have given this name to a bundle of fibres, which passes from the Eustachian tube to the pharynx.

SALPINGOSTAPHYLINUS, Circumflex muscles—s. *Staphylinus internus*, *Levator palati*.

SALPINGOSTENOCH'ORIA, from *σαλπιγξ*, *σαλπιγγος*, 'a tube,' *στενος*, 'narrow,' and *χωρα*, 'space.' Narrowness or stricture of the Eustachian tube.

SALPINX, Tuba.

SALSAMENTUM CRUDUM, Omotarichos.

SALSAPARILLA GERMANICA, Sarsaparilla Germanica.

SALSEDO MUCRUM, Potassæ nitras.

SALSEPAREILLE, *Smilax sarsaparilla* — s. *d'Allemagne*, *Sarsaparilla Germanica*—s. *du Brésil*, s. *Coraque*, s. *de Honduras*, s. *de Pérou*, and s. *de Portugal*, see *Smilax sarsaparilla*.

SALSIFI, *Tragopogon porrifolium*.

SALSILAGO, Muria.

SALSOLA DECUMBENS, S. Kali.

SALSO'LA KALI, *S. Decumbens*, *Kali soda* seu *spinosum cochlea'tum*, *Prickly Saltwort*, *Tragus* sive *Tragus Matth'oli*. Ord. Chenopodiacæ; from *sal*, 'salt,' owing to its saline properties. This plant, as well as *Salsola sati'va* and *Salsola soda* seu *longifo'lia*, *Kali iner'mis*, *Herba vitri*, produces the alkaline salt, commonly called *Barilla*, *Soda*, or *Kelp*.

SALSOLA LONGIFOLIA, S. Kali—s. *Sativa*, &c., see S. Kali, and Soda—s. Soda, see S. Kali.

SALSUGINOSUS, Halmyrodes.

SALSUS, Saline.

SALT, *Sal*, *Hal*, *Hals*, *αλς*, (F.) *Sel*. A name formerly given to a considerable number of substances of very different nature. At present, chymists apply the term *Salts* exclusively to the combination of an acid with one or more bases. *Neutral salts* are those in which the acid and base reciprocally saturate each other. *Acid salts* or *supersalts*, (F.) *Sur-sels*, are those in which the acid predominates over the base. *Alkaline salts* or *subsals*, (F.) *Sous-sels*, those in which the base is, on the contrary, predominant. The different denominations of the salts are compounded, 1. Of the name of the acid; the termination of which is changed into *ite*, when the name of the acid is in *ous*; — *ate*, when it is in *ic*. Thus the salts formed by the sulphurous acid are *sulphites*; those by the sulphuric, *sulphates*. 2. This name is followed up by that of the oxyd, which enters into the composition of the salt. Thus, the *sulphate of protoxyd of iron* is a combination of sulphuric acid with the protoxyd of that metal. Frequently, to shorten the name, the word *oxyd* is suppressed; and *proto*, *dento*, *trito*, &c., put before the acid:—as *protosulphate of iron*. *Simple salts* are those resulting from the combination of an acid with a single base; *double salts* with two different bases; *triple* with three, &c. A *haloid salt* is one constituted after the type of common salt, or which contains a metal and a *salt-radical*, as chlorine, iodine, &c. An *oxysalt* is formed from the combination of an acid with an oxide.

When *salt* is used in an abstract sense, it means the chloride of sodium.

SALT, APERIENT, OF FREDERICK, Soda, sulphate of—s. Baker's, Ammonia carbonas—s. of Barilla, Soda, subcarbonate of—s. Bay, Soda, muriate of—s. Bitter purging, Magnesia sulphas—s. Common, Soda, muriate of—s. Epsom, Magnesia sulphas—s. Glauber's, Soda, sulphate of—s. Glauber's, Lymington, see Soda, sulphate of—s. Preston, see Ammonia carbonas—s. Rochelle, Soda, tartrate of—s. Rock, Soda, muriate of—s. Sea, Soda, muriate of—s. Secondary, Neutral salt—s. Seignette's, Soda, tartrate of—s. Smelling, Ammonia carbonas—s. of Soda, Soda, subcarbonate of—s. Sore-throat, Potassæ nitras fusus sulphatis paucillo mixtus.

SALT OF TARTAR, see Potassæ subcarbonas, and Potash.

SALT, TASTELESS PURGING, Soda, phosphate of.

SALT OF URINE, Ammonia carbonas.

SALT, WHITE, Soda, muriate of.

SALT OF WOODSOOT, Ammonia carbonas—s. of Wormwood, see Potash.

SALTANS ROSA, Urticaria.

SALTATIO, Dancing—s. Sancti Viti, Chorea.

SAL'TERTON. A village about four miles to the eastward of Exmouth, England, frequented as a winter abode by invalids. It is in a small, open valley on the seashore; and is well protected from winds, particularly the northerly.

SALTISH, Halmiroides.

SALTPETRE, Potassæ nitras.

SALTUS, Leap, Vulva—s. Tendinum, Subsul-tus tendinum.

SALTWORT, PRICKLY, Salsola kali.

SALUBRIOUS, Salutary.

SALUBRIOUSNESS, Salubrity.

SALUBRIS, Salutary.

SALUBRITY, *Salubritas*, *Salubrioness*, (F.) *Salubrité*, from *salus*, 'health.' Any thing which contributes to the health of individuals or of communities. Situations differ materially from each other in this respect; and the cause of the difference is often an interesting topic of inquiry.

SALUS, Sanitas.

SALUTAIRE, Salutary.

SALUTARY, *Periesticos*, *Salutaris*, *Saluber*, *Salubris*, *Hygieinus*, *Hygiasticus*, *Hygie-rus*, *Salubris*, (F.) *Salutaire*, *Salubre*. Same etymon. Healthy. That which is favourable to health. Some diseases have been considered salutary; but this is doubtful.

SALUTIFEROUS, *Salutifer*; from *salus*, *salutis*, 'health,' and *fero*, 'I bear.' Bringing health; health-bearing.

SALVATELLA; same etymon, [?] *Vena salvatella*, is situate on the back of the hand, near its inner margin. It begins on the posterior surface of the fingers and dorsal surface of the hand, by a plexus, formed of a number of radicles, frequently anastomosing with each other; it then ascends to the inner part of the forearm, where it takes the name—*posterior cubital*. The ancients recommended this vein to be opened in certain diseases, as in melancholic and hypochondriacal affections; and they attributed to such abstraction of blood considerable efficacy in the cure of disease: hence its name.

SALVE, BLISTERING, Unguentum lyttæ—s. Deshler's, Ceratum resinæ compositum—s. Eye, Unguentum oxidii zinci impuri—s. Eye, Single-ton's, Unguentum hydrargyri nitrico-oxidi—s. Healing, Cerate of calamine.

SALVIA, (from *salveo*, 'to be sound,' owing to its reputed healing qualities;) *S. officinalis* seu *hortensis* seu *vulgaris* seu *minor*, *Elelis-pnacos*, *Sage*, *Save*, (F.) *Sauge*, *Petite Sauge*, *Thé d'Europe* ou *de France*. Ord. Labiatae. Ser. Syst. Diandria Monogynia. Sage leaves, *Salvia* (Ph. U. S.), have a peculiar, aromatic odour, and a warm, aromatic, bitterish taste. Their virtues

depend upon an essential oil. They are tonic, stimulant, and carminative. In the form of a weak infusion, Sage is occasionally used as a diluent, and as a wash for sore mouth. Dose, gr. xv to xxx or more.

SALVIA AFRICA'NA, *Wild Sage*, a South African species, has the same medical properties as *Salvia*.

SALVIA COLORATA, *Salvia*.

SALVIA HORMI'NUM, *S. colorata*, *Horminum*, *H. coloratum* seu *sativum*, (F.) *Sauge-hormin*, of the Pharmacopœias, is used in similar cases.

SALVIA HORTENSIS, *Salvia*.

SALVIA LYRA'TA, *Wild Sage*, *Cancer Weed*; indigenous. The fresh leaves, bruised, are used to destroy warts. It has been supposed to be of use in cancer.

SALVIA MINOR, *Salvia*—s. *Officinalis*, *Salvia*.

SALVIA SCLA'REA, *Scleara*, *Gallitrichum*, *Ethiopsis*, *Biscermas*, *Colus Jovis*, *Common Clary*, (F.) *Sauge sclarée*, *Grand sauge*, *Orvale* ou *Toute-bonne*. The leaves have been recommended as corroborants and anti-spasmodics.

SALVIA VITÆ, *Asplenium ruta muraria*—s. *Vulgaris*, *Salvia*,

SAMADE'RA IN'DICA, Ord. Simarubæ, furnishes the *Niepa bark*, which is possessed of antiperiodic properties.

SAMBU'CUS, from *σαμβυχη*, an ancient musical instrument, said to have been made of its wood. *Sambucus*, *Sambucus nigra* seu *vulgaris* seu *arborescens*, *Actæ*, *Infelix lignum*; *Elder*, *Ellen-tree*, *Ellen-tree*, *Ellarne*, (Sc.) *Boartree*, *Bortree*, *Bountree*, (Prov.) *Bottry tree*, *Burtree*, *Ellet*, *Elren*, *Scaw*, (F.) *Sureau commun*. Ord. Caprifoliaceæ. Ser. Syst. Pentandria Digynia—(the flower and bark were formerly called *Cano-pium*). The flowers, berries, and bark of the elder have been used in medicine. The flowers have been reputed diaphoretic and discutient; the berries, aperient and sudorific; the bark, purgative, and, in small doses, deobstruent. The flowers are sometimes used in fomentations, and to form a cooling ointment.

SAMBU'CUS ARBOREA, *Sambucus*—s. *Chamae-actæ*, *S. ebulus*.

SAMBU'CUS EB'ULUS, *S. Chamaeactæ* seu *helion* seu *humilis* seu *herbacea*, *Ebulus*, *Chamaeactæ*, *Od'ocos*, *Dwarf-elder*, *Danewort*, (F.) *Hièble*, *Yèble*. The root, interior bark, leaves, flowers, *Sambucus* (Ph. U. S.), berries, (*Bacca* seu *Grana Actes*.) and seeds, have all been given in moderate doses as resolvents and deobstruents; and in large doses as hydragogues. The berries of *Sambucus Canadensis*, the *Common Elder* of America, are made official in the Pharmacopœia of the United States. A distilled water of the flowers, *Aqua Sambuci*, *Elder Water*, is official in the London and Edinburgh Pharmacopœias.

SAMBU'CUS HELION, *Sambucus ebulus*—s. *Herbacea*, *S. ebulus*—s. *Humilis*, *S. ebulus*—s. *Nigra*, *Sambucus*.

SAMBU'CUS PUBENS, *S. pubescens* seu *racemosa*, *Red-berried Elder*; indigenous. The bark, in decoction, is said to be a valuable hydragogue cathartic.

SAMBU'CUS RACEMOSA, *S. pubens*—s. *Vulgaris*, *Sambucus*.

SAMI TERRA, *Samian Earth*. An argillaceous earth, found in the island of Samos, to which were ascribed virtues similar to those of the Terra Lemni.—Galen, Dioscorides.

SAM'IUS LAPIS. A stone found in the Isle of Samos, which the ancients believed to be astrigent and refrigerant.

SAMPHIRE, *Crithmum maritimum*.

SAMPSON, BLACK, *Echinacea purpurea*.

SAMPUSUCHUS, *Thymus mastichina*.

SAMPUSUCUS, *Origanum majorana*.

SAMPSYCH'INON, *Sampsu'chinum*, An ointment composed of *σαμψυχον*, which was perhaps marjoram. — Dioscorides.

SANABILIS, Curable.

SANABLE, Curable.

SANAMUNDA, Geum urbanum.

SANATIO, Curation, Cure.

SANATIVE, Curative.

SANATORIUM, Sanitarium.

SANATORY, Curative.

SAN GIULIANO, MINERAL WATERS OF.

At the foot of the mountain San Giuliano, a league and a half from Pisa, are several mineral springs; temperature from 84° to 107° Fahr.

The spring, *Pozzetto*, contains carbonic acid, sulphates of soda, lime, and magnesia; chlorides of sodium and magnesium; carbonates of lime and magnesia; and argil and silica. — Santi.

SAND, see Gravel — s. Brain, see Pineal gland — s. Pineal, see Pineal gland.

SANDALUM CÆRULEUM, *Gulandina moringa* — s. Rubrum, *Pterocarpus santalinus*.

SANDARAC, *Sandaracha*, *Gum Juniper* or *Sendarach*, *Pounce*, *Gummi Juniperi*, *Sandaracha*, *Vernix sicca*, *Resina Juniperi*, (F.) *Sandarague*, *Gomme de Genévrier*. A name given, by the Arabs, to an odorous resin, that flows from the *Thuya aphylla*. Ord. Coniferæ. Sex. Syst. Monœcia Monadelphia. It is stimulant, like all the resins; but is very little used.

SANDARACHA GRÆCORUM, Realgar.

SAND-BLIND, nearly blind. A defect of vision, in which small particles seem to fly before the eyes. See Metamorphopsia.

SANDERS, see Saunders.

SANDIVER, see Vitrum.

SANDIX, *Plumbi oxydum rubrum*.

SANDYX, *Plumbi oxydum rubrum*.

SANG, Blood — s. *Artériel*, Arterial blood — s. *Dragon*, *Rumex sanguineus* — s. *Dragon*, see *Calamus rotang* — s. *Globules du*, Globules of the blood — s. *Perte de*, Hæmorrhagia.

SANGAREE'. Wine and water, sweetened and spiced.

SANGLLOT, Sob.

SANGSUE, *Hirudo*.

SANGUIDUCTUS DURÆ MATRIS, Sinuses of the dura mater.

SANGUIFICATIO, Hæmatisis — s. *Debilit*, *Hyp hæmatisis*.

SANGUIFLUXUS, Hæmorrhagia — s. *Uterinus*, *Metrorrhagia*.

SANGUIMOTION, Circulation.

SANGUIMOTORY, Circulatory.

SANGUIN, (*Vaisseau*) Blood-vessel.

SANGUINALIS CORRIGIOLA, Polygonum aviculare.

SANGUINARIA, from *sanguis*, *sanguinis*, 'blood,' owing to the colour of its juice. *S. Canadensis* seu *acaulis*, *Bloodroot*, *Bloodwort*, *Puccoon*, *Red Puccoon*, *Red Root*, *Indian Paint*, *Turmeric*. Nat. Ord. Papaveraceæ. Sex. Syst. Polyandria Monogynia. A North American plant, the rhizoma, *Sanguinaria* (Ph. U. S.), and seeds of which are used in medicine. They are emetic. Dose of the powder, 8 to 20 grains. They are said to reduce the velocity of the pulse, like digitalis.

SANGUINARIA, Polygonum aviculare.

SANGUINE, *Sanguin'cus*, *Sanguinosus*, *Hæmat'icus*, *Hæmato'des*, *Hæmato'rus*, *Hæmat'us*, *Hæmo'des*, *Hæmo'ides*, *Sanguin'ceus*, *Hæmat'ic*, (F.) *Sanguin*. From *sanguis*, *sanguinis*, 'blood.' Bloody, blood-like; having the colour of blood, as 'a sanguine countenance.' Relating to, or containing blood — as 'sanguine temperament.' Plethoric.

SANGUINEA, Potassæ nitras.

SANGUINENESS, Plethora.

SANGUINEOUS, Plethoric, Sanguine.

SANGUINEUS, Sanguine.

SANGUINIS ABSORPTIO, Hæmorrhophesis — s. *Congestio*, *Congestion* — s. *Dissolutio*, *Hæmatelys* — s. *Fluor*, *Hæmoptysis* — s. *Fluor Vesicæ*, *Cystorrhagia* — s. *Ictus*, *Apoplexy* — s. *Missio*, *Blood-letting* — s. *Profluvium copiosum*, *Hæmorrhagia* — s. *Profluvium ex Ore*, *Stomatorrhagia* — s. *Stagnatio*, *Hæmostasis*.

SANGUIN'OLENT, *Sanguinolentus*, from *sanguis*, *sanguinis*, 'blood.' Tinged with blood. An epithet applied, particularly, to the sputa when so tinged. Bloody.

SANGUINOSUS, Sanguine.

SANGUIPURGIUM, from *sanguis*, 'blood,' and *purgare*, 'to cleanse.' Purgation of the blood. A name given by some authors to mild fevers, from an idea that they purged the blood of noxious matters.

SANGUIS, Blood, Sperm — s. *Concretus*, *Coagulum* — s. *Draconis*, see *Calamus rotang* — s. *Hirci siccatus*, see *Blood* — s. *Menstruus*, see *Menses* — s. in *Urinâ*, *Hæmaturia* — s. *Virginis primum menstruate*, see *Menses*.

SANGUISORBA CANADEN'SIS, *Canada Burnett*. From *sanguis*, 'blood,' and *sorbere*, 'to absorb.' A tall indigenous plant — Ord. Rosaceæ — with white, sometimes purple, flowers, which appear from August to October. It has the same virtues as SANGUISORBA OFFICINA'LIS, *S. carnea* seu *rubra*, *Italian Pimpinell*, *Pimpinella Italica* seu *officina'lis*, (F.) *Pimpinelle noire*. It was formerly used as an astringent and tonic, in hemorrhages, dysentery, &c.

SANGUISUGA, *Hirudo*.

SANGUISUGUM, from *sanguis*, 'blood,' and *sugere*, 'to suck.' A barbarous term, to denote too great an accumulation of blood in the heart. — Bonetus.

SANICLE, *Sanicula*, *S. Marilandica* — s. *Americana*, *Heuchera cortusa* — s. *de Marilandia*, *Sanicula Marilandica* — s. *Yorkshire*, *Pinguicola vulgaris*.

SANICULA, (from *sano*, 'I heal,') *Saxifraga granulata*.

SANICULA, *S. Europæa* seu *officina'rum* seu *mar*, *Astrantia diapiensia*, *Caucalis Sanicula*, *Cucullata*, *Dodeca'theon*, *Symphytum petraeum*, *Diapiensia*, *D. cortusa*, *Sanicle*, *Wood March*, (F.) *Toute-saine*. Ord. Umbelliferae. Sex. Syst. Pentandria Digenia. This herb was formerly used as a mild astringent. It is bitterish, and somewhat austere.

SANICULA Eboracensis, *Pinguicola vulgaris* — s. *Europæa*, *Sanicula*.

SANICULA MARILAN'DICA, *San'icle*, *Ma'ryland Sanicle*, *Black Snakeroot*, (F.) *Sanicle de Mariland*. This indigenous plant grows in marshes, or low and shaded ground. It is possessed of tonic virtues; and the powdered root is employed in popular practice as a favourite remedy in intermittent fever. It has been recommended, also, in chorea.

SANICULA MONTANA, *Pinguicola vulgaris* — s. *Officinarium*, *Sanicula*.

SANIDO'DES, *Sanio'des*, 'resembling a board,' from *σavis*, gen. *σavidος*, 'a board,' and *ειδος*, 'resemblance.' One whose thorax is narrow, and, as it were, contracted.

SANIE, *Sanies*.

SANIES, *Ichor*, *Tabum*, *Virus*, *Pus maig'num* seu *corrosivum*, (F.) *Sanie*, corrupted from *sanguis*, 'blood.' A thin, serous fluid, presenting some of the qualities of pus and blood, and commonly exhaled at the surface of ulcers.

SANIEUX, *Ichorous*.

SANIODES, *Saniododes*.

SANIOSUS, *Ichorous*.

SANIOUS, *Ichorous*.

SANITARIUM, *Sanato'rium*. Same etymon. as the next. A retreat selected for valetudina-

rians, in consequence of its salubrity. Also, an establishment for the treatment of the sick.

SANITARY, *San'atory*, from *sanitas*, 'health,' (F.) *Sanitaire*. That which relates to health, and especially to public health; as *établissement sanitaire*, *police sanitaire*.

SANITAS, from *sanus*, 'healthy,' *Hygi'ea*, *Hyge'a*, *Hygias'is*, *Hygi'asis*, *Integ'ritas*, *Prosper'itas* *Valetu'dinis*, *Sulus*, *Hygiei'a*, *Valetu'do*, *Vai'tu'do*, *Valetu'do bona* seu *secun'da* seu *com'moda*, *Hyge'na*, *Euzoödyna'mia*, *Health*, (Sc.) *Heil*, *Heyle*, *Heal*, (F.) *Santé*, from *sanus*, 'sound.' Health has been defined,—a state, in which all the functions are exerted with regularity and harmony. A person may, however, be in health, although certain functions are not performed. A blind man, for example, has health when all his functions, except sight, proceed with regularity. *Sanity* is often used for soundness of mind.

SANITAS, Cure.

SANITY, *Sanitas*.

SANKIRA, *Smilax* China.

SANS PAIRE, (*Veine*.) *Azygos* vein.

SANTA CRUZ, (CLIMATE OF.) This West India island is frequently selected as a winter retreat for the phthisical valetudinarian from the United States; but it does not seem entitled to any preference, in such cases, over the other islands of the West Indies, whilst its general salubrity is said to be less than that of many.

SANTAL BLANC, *Santalum album*—*s. Rouge*, *Pterocarpus santalinus*.

SANTALUM, see *Pterocarpus santalinus*.

SANTALUM ALBUM, *S. cit'rinum* seu *pallidum* seu *myrtifolium*, *Sir'ium myrtifolium*, *Yellow Saunders*, (F.) *Santal blanc*. Ord. *Santalaceæ*. *Sex. Syst.* Tetrandria Monogynia. The virtues of the wood of the white saunders reside in a volatile oil and resinous principle. The odour is fragrant, and resembles a mixture of ambergris and roses. It has been used as a stimulant and sudorific, but it is not now employed. The saunders woods are called, collectively, in French, *Santaux*.

SANTALUM MYRTIFOLIUM, *S. album*—*s. Rubrum*, *Pterocarpus santalinus*.

SANTÉ, *Sanitas*.

SANTONICUM, *Artemisia santonica*.

SANTONINE, *San'tonin*, *Cinin*. A peculiar crystalline substance obtained from *Artemisia Santonica*. It possesses the anthelmintic properties of the plant. Dose, five or six grains.

SANTORINI, FISSURES OF, (F.) *Incisures* ou *Scissures de Santorini*. Clefts at the upper and back part of the fibro-cartilaginous portion of the external ear.

SANTORINI, TUBERCLES OF. Small cartilaginous projections at the top of the arytenoid cartilages, which support the ligaments of the glottis. See *Corniculum Laryngis*.

SANVE, *Sinapis*.

SAORIA, *Saurja*. The ripe and dried fruit of *Maesa* seu *Bacob'otrys picta*, an Abyssinian tree, which is administered in its native country, in powder, in doses of from 32 to 44 grammes, as a tæniifuge.

SAP, Sax. *ræpe*. (G.) *Saft*, *Ar'borum Succus* seu *Lympha*, (F.) *Sève*. The circulating fluid of the vegetable, which corresponds to the blood of the animal.

SAPA, see *Rob*.

SAPHA'DA. Paracelsus has given this name to reddish scales adherent to the hair in some eruptions of the hairy scalp.

SAPHENA, *Saphena*.

SAPHENA, *Sapha'na*, from *σαφης*, 'manifest,' 'evident.' (F.) *Saphène*. A name given to two subcutaneous veins of the lower limb. These

are: 1. The GREAT SAPHENA VEIN, *S. interna*, *Tibio-malleolar* (Ch.), (F.) *Grande Veine Saphène* ou *Saphène interne*. Its radicles occupy the inner part of the great toe, and form a transverse arch on the back of the foot, which unites with the saphena externa, and receives at its convex part, which is turned forwards, a number of branches coming from the toes. These radicles, when united, ascend before the inner ankle, and form a trunk, the size of which is farther increased by several branches that proceed from the region of the tarsus, and that of the metatarsus. This trunk ascends vertically at the inner part of the leg; passes behind the inner condyle of the femur; proceeds along the inner part of the thigh; receives other subcutaneous veins, such as the abdominal subcutaneous, the external pudic, &c., and passes through the inferior opening of the crural canal to empty itself into the femoral vein. 2. The LESSER VENA SAPHENA or *Saphena externa*, *Perone'o-malleolar Vein* of Chaussier, (F.) *Petite Veine Saphène* ou *Saphène externe*, commences by several roots, which are spread over the dorsum and outer side of the foot, and embrace the outer ankle. Behind this, they unite into a single trunk, which ascends obliquely, approaching the tendo Achillis, and proceeds vertically towards the ham to open into the popliteal vein.

SAPHÈNE, *Saphena*.

SAPHE'NOUS, *Sapheno'sus*; from *Saphena*. Of or belonging to the saphena.

SAPHE'NOUS NERVES are two in number, and are branches of the crural or femoral nerve. They are the short saphenous—*nervus cutaneus internus*; and the long saphenous—*nervus cutaneus internus longus*.

The external saphenous, formed by the union of the communicans poplitei and communicans peronei, passes down the leg by the side of the external saphenous vein of the foot.

SAPID, *Sap'orvus*, *Sap'idus*, (F.) *Savoureux*, from *sapere*, 'to taste.' Possessed of sapidity. Having the power of affecting the organs of taste.

SAPID'ITY, *Sap'idness*, *Sap'orosity*, *Sapor*, (F.) *Sapidité*. The quality of bodies that gives them taste.

SAPIN COMMUN, *Pinus picca*.

SAPIN'DUS, (*sapo*, and *Indus*, 'Indian soap,') *S. Saponaria*, *Saponaria*, *Soap Tree*, (F.) *Savonne commun*. Ord. *Sapindacæ*. The name of the plant that affords the *Soap Nuts*, *Saponaria Nu'culæ*, *Bac'æe Bermuden'ses*, *Soap-berries*. A spherical fruit about the size of a cherry, the cortical part of which is yellow, glossy, and so transparent as to show the spherical black nut that rattles within, and includes a white kernel. The cortical part of this fruit, which has similar effects with soap in washing, has been recommended in chlorosis, and as a stomachic and deobstruent.

SAPO, *Soap*, Sax. *ræpe*, *Smegma*, (F.) *Savon*. A product obtained by treating fatty bodies with caustic alkalis dissolved in water. In the Pharmacopœia of the United States, it means Soap made with soda and olive oil. See *Sapo medicinalis*.

YELLOW SOAP is formed of turpentine, oil, and alkali.

Castile Soap, being made of fine olive oil, is generally used internally. The yellow and soft soaps are the most stimulating; and are, consequently, best adapted for particular cutaneous eruptions.

Internally, soap is purgative and diuretic; externally, it is detergent and stimulant. Soapy water is used with the greatest success, in cases

of poisoning by acids. It is mostly applied externally to bruises and sprains. In *Pharmacy*, it is used to favour the solution of resins.

SAPo AC'IDUS, Acid Soap, is a combination of a fixed oil with an acid.

SAPo AMMONIACALIS, Liniumentum ammoniæ fortius — s. *Ammoniacæ oleaceus, Liniumentum ammoniæ fortius* — s. *Amygdalinus, Sapo medicinalis* — s. *Cacaotinus, Sapo cocconus* — s. *Calcarinus, Liniumentum aquæ calcis* — s. *Castiliensis*, see *Sapo medicinalis*.

SAPo COCO'NEUS, Sapo cacaoti'nus, Soap of Cocoa-Nut Oil, (F.) *Savon de cacao*, has been much used in Germany in herpetic affections.

SAPo DURUS, S. medicinalis — s. *Hispanicus*, see *S. medicinalis*.

SAPo KALICUS, S. Mollis.

SAPo LIQ'UIDUS, Liquid Soap, Lotio saponacea, is a cosmetic which is composed of olive oil $\frac{3}{4}$ iv, ol. tartari per deliquium $\frac{3}{8}$ ss. Rub together, and add aquæ rosarum $\frac{3}{4}$ xij.

SAPo MEDICINA'LIS, Sapo amygdali'nus, Medicinal Soap, (F.) *Savon médicinal*, is made with oil of sweet almonds and half its weight of caustic alkali, or, like the *Sapo Hispanicus* seu *Castiliensis*, Spanish or Castile soap, *Sapo durus, Sapo* (Ph. U. S.), (F.) *Savon dur*, of olive oil and soda.

SAPo MOLLIS, S. vir'idis seu *niger* seu *kallicus, Common or Soft Soap*, (F.) *Savon mou ou noir*, is made of potass and oil or tallow. The *Sapo vulgaris* or 'common soap' of the Pharm. U. S. is made with soda and animal oil.

SAPo NIGER, Black Soap, Melanosmeg'ma, is a composition of train oil and an alkali: and **GREEN SOAP, Sapo vir'idis**, of hempseed, linseed, or rape oil, with an alkali. See *Sapo mollis*.

SAPo VEGETABILIS, Pulvis gummosus alkalinus — r. *Viridis, Sapo mollis* — r. *Vulgaris*, see *Sapo mollis*.

SAPONA'CEOUS, Saponaceus, (F.) *Saponacé*, from *sapo, saponis*, 'soap.' Soapy. Containing soap, as *Liniumentum saponaceum, Soap liniment*.

SAPONAIRE, Saponaria.

SAPONA'RIA, from *Sapo*, 'soap,' the juice forming a lather with water. *Soap-wort, Bruise-wort, Bouncing Bet, Struthium, Lana'ria, Lychnis officinalis* seu *sylvestris, Ibis'uma, Boot'ia vulgaris*, (F.) *Saponaire, Savonnière*. Ord. Caryophyllaceæ. Scr. Syst. Decandria Digynia. A decoction of the leaves of this plant has been recommended in scrofula, cancer, old syphilis, cutaneous eruptions, jaundice, visceral obstructions, &c. It is hardly ever used.

SAPONARIA, Sapindus saponaria.

SAPONARILÆ NUCULÆ, see *Sapindus saponaria*.

SAPONÉ. Soap, to which are added substances capable of communicating to it new properties, without affecting its own.—Béral.

SAPONEA. A pectoral medicine, prepared with sweetened syrup of violets, and oil of sweet almonds.

SAPONULES, Saponuli, (F.) *Saponules*. Same etymon. Combinations of volatile or essential oils with different bases.

ACID SAPONULES are combinations of such oils with different acids.

SAPONULÉ. A tincture (*alcoolé*), sufficiently charged with soap to cause it to assume a gelatinous shape.—Béral.

SAPONURE. A medicine, formed of soap, in powder, and of resinous or extractive matters.

SAPOR, Sapidity, Savour.

SAPOROSITY, Sapidity.

SAPOROUS, Sapid.

SAPOTA, S. Alchras, Achras Sapota seu *australis* seu *Zapota, El nispero, Oval-fruited Sapota*, (F.) *Sapotier, Sapotillier, Sapotilla*. Fam.

Sapotaceæ. Sex. Syst. Hexandria Digynia. A tree which grows in the Antilles, and particularly at St. Domingo. Its fruit is much esteemed. It resembles the marmalade of quinces; and hence has been called *natural marmalade*. The seeds make an emulsion, which has been given in nephritic affections. The bark has been recommended as a febrifuge.

SAPOTA ALCHRAS, Sapota.

SAPOTIER, Sapota.

SAPOTILLA, Sapota.

SAPOTILLIER, Sapota.

SAPROPYRA, Typhus gravior.

SAPROS, Putrid. Rancid.

SAPROS'TOMUS, from *σαπρος*, 'foul, of a bad odour,' and *στομα*, 'mouth.' One who has an offensive breath.

SAPROTÉS, Putrefaction.

SAR'APUS, Sarapous. One who has a large foot; whose toes are largely separated, or whose feet are much asunder in walking; from *σαρῶ*, 'I grin,' and *πους*, 'the foot.' See *Kylosis*.

SARATOGA, MINERAL WATERS OF. The Saratoga springs in New York are ten miles north-east from Ballston. They contain the same ingredients as those of the latter place; and are much frequented by visitors from every part of the United States. The following analysis has been given of the *Congress spring*. In a wine gallon — *gaseous contents*: carbonic acid, 311 cubic inches; atmospheric air, 7. *Solid contents*: chloride of sodium, gr. 385; iodide of sodium, gr. 3.5; bicarbonate of soda, gr. 8.982; bicarbonate of magnesia, gr. 95.788; carbonate of lime, gr. 98.098; carbonate of iron, gr. 5.075; silica, gr. 1.5; bromide of potassium, a trace. Total, gr. 597.943. — Steel.

The *Walton* or *Iodine spring* contains chloride of sodium, carbonate of magnesia, and iodide of sodium.

SARCEPIPOCELE, Sarcœpiipocele.

SARCEPIPLOMPHALOCELE, Sarcœpiplomphalocele.

SARCEPIPLOMPHALUS, Sarcœpiplomphalus.

SARCIDIUM, Caruncle.

SARCINA, Fœtus.

SAR'CINA VENTRIC'ULI, S. Goodsir'ii, L. Sarcina, 'a pack, a woolpack;' *Merismopœ'dia ventriculi* (Robin). A microscopic cryptogamous plant found in the fluid of waterbrash.

SARCION, Caruncle.

SARCITES, Anasarca — s. *Flatusus, Emphysema*.

SARCITIS, Myositis.

SARCOCE'LÉ, Hernia carno'sa, Scirrhus Testiculi, from *σαρξ, σαρκος*, 'flesh,' and *κρηνη*, 'a tumour;' *Sarcœ'ma scroti*, (F.) *Hernie charnue*. Scirrhus or cancer of the testicle. This disease affects adults particularly; and appears most commonly after an inflammatory swelling of the testicle. Sometimes it is dependent upon a blow; at others, it makes its appearance without any appreciable cause. It is well known by a hard, heavy, ovoid or spherical swelling of the testicle, which is, at first, slightly, or not at all painful, and merely causes an unpleasant traction on the spermatic cord. There is no heat or change of colour of the skin; the spermatic cord is swollen, and participates in the affection; very painful shootings occur; the lymphatic glands of the abdomen become swollen, and form a tumour, which may, at times, be felt through the abdomen; and the patient, at length, dies with every sign of the cancerous diathesis. The prognosis is very unfavourable. The only means, indeed, that can save life, is the extirpation of the testicle.

SARCOCOL'LA, (F.) Colle-chair, from *σαρξ*,

'flesh,' and *κόλλα*, 'glue.' A resinous matter, obtained from *Penæa Sarcocolla*, *P. mucronata*, and other species of *Penæa*; an African shrub, which has been so called from a belief that it facilitates the consolidation of flesh. It is in the form of small, oblong, semitransparent globules, of a yellowish or reddish hue, and smells like aniseed. It was once employed as an astringent and detergent.

SARCODES, Carneous.

SARCOËPIPLOCELE, *Sarcepiplocelê*, from *σαρξ*, *σαρκος*, 'flesh,' *επιπλοον*, 'the epiploon,' and *κηλη*, 'a tumour.' Epiplocele, complicated with sarcoma or sarcocele.

SARCOËPIPLOM'PHALUS, *Sarcepiplom'phalus*, *Sarcepiplomphalocelê*, from *σαρξ*, *σαρκος*, 'flesh,' *επιπλοον*, 'the epiploon,' and *ομφαλος*, 'the navel.' Umbilical hernia, formed by scirrhus epiploon or complicated with sarcoma.

SARCOHYDROCELE, Hydro-sarcocele.

SARCOLEM'MA, *Sarcole'ma*, from *σαρξ*, *σαρκος*, 'flesh,' and *λεμμα*, 'a coat.' The sheath which surrounds the fibrils of muscle that form a fibre. It is quite distinct from the areolar membrane that binds the fibres into fasciculi.—Bowman. See Perymisium.

SARCOLOGIA, Myology, Sarcology.

SARCOL'OGY, *Sarcolog'ia*, from *σαρξ*, *σαρκος*, 'flesh,' and *λογος*, 'a discourse.' The part of anatomy which treats of the soft parts. It comprises myology, angiology, neurology, and splanchnology.

SARCO'MA, *Emphy'ma Sarcoma*, *Sarcom'a-tous tumour*, *Sarco'sis*, *Porrus*, *Sarcophy'ia*, *Ecarco'e'ma*, *Ecarco'o'ma*, *Tumor car'neus*, *Exrescent'ia carno'sa*, *Pollypus carno'sus*, from *σαρξ*, *σαρκος*, 'flesh.' Any species of excrescence having a fleshy consistence.

SARCOMA, CARCINOMATOUS, Scirrhus—s. Cercosis, see Cercosis—s. Epulis, Epulis—s. Gelatinous, see Tumour, fibro-cellular—s. Mastoid, Mammary sarcoma—s. Medullare, see Encephaloid—s. Medullary, Encephaloid, Hæmatodes fungus—s. Pulpy, Hæmatodes fungus—s. Scroti, Sarcocele.

SARCOMA, COMMON VAS'CLULAR OR OR'GANIZED of Abernethy, *Emphy'ma Sarcoma Vasculo'sum*, is vascular throughout: texture simple: when bulky, napped on the surface with arborescent veins. Found over the body and limbs generally.

SARCOMATEUX, Sarcomatous.

SARCOMATODES, Sarcomatous.

SARCOMATOSUS, Sarcomatous.

SARCOM'ATOUS, *Sarcomato'sus*, *Sarcoma-to'des*, (F.) *Sarcomateux*. Belonging to, or having the characters of sarcoma.

SARCOM'PHALUM, Sarcophthalmus.

SARCOM'PHALUS, *Sarcom'phalum*, from *σαρξ*, *σαρκος*, 'flesh,' and *ομφαλος*, 'the navel.' A scirrhus or fleshy tumour, developed at the navel.

SARCOMYCES, Sarcospongius.

SARCOPHAGUS, Carnivorous, Catheretic.

SARCOPHYIA, Excrescence, Sarcoma.

SARCOPSYLLA PENETRANS, *Chique*.

SARCOPTÉ, Acarus.

SARCOPTES, SCABIEI, see Psora.

SARCOPYO'DES, from *σαρξ*, *σαρκος*, 'flesh,' *πυον*, 'pus,' and *ειδος*, 'resemblance.' Having the appearance of pus mixed with flesh. An epithet given to certain excreted matters, and particularly to the sputa of those labouring under consumption.

SARCO'SIS, from *σαρξ*, *σαρκος*, 'flesh.' The formation of flesh. Also, sarcoma.

SARCO'SIS BULBI, *Exophthal'mia fungo'sa* seu *sarcoma'tica*. A fleshy growth from the globe of the eye.

SARCOSIS UTERI, Metrauxie.

SARCOSPONG'US, *Sarcomyces*, from *σαρξ*, *σαρκος*, 'flesh,' and *σπογγος*, 'fungus.' A fleshy fungus.

SARCOSTOSIS, Osteo-sarcoma.

SARCOTIC, Incarnans.

SARCOUS, from *σαρξ*, *σαρκος*, 'flesh.' Of or belonging to, flesh or muscle—as '*sarcous tissue*.'

SARCOUS ELEMENTS, *Prim'itive particles*. The elementary particles, which, by their union, form the mass of muscular fibre.—Bowman.

SARDIASIS, Canine laugh, Risus sardonius.

SARDONIA HERBA, Ranunculus sceleratus.

SARDONIASIS, Canine laugh, Risus sardonius.

SARDONIUS RISUS, Canine laugh.

SARE, Essera.

SARRACENIA, *Side-saddle plant*, *Flytrap*. The root of *Sarracenia flava* and *S. variol'aris* is bitter and astringent, and has been used in South Carolina, as a domestic remedy in dyspepsia.

SARRASIN, Polygonum fagopyrum.

SARRÊTE, Trismus infantum.

SARRIETTE, *Satureia hortensis*—s. *de Crète*, *Satureia capitata*.

SARSA, Smilax sarsaparilla.

SARSAPARILLA, (S.) *Zarza*, 'a briar,' and *parilla*, 'a little vine.' *Menispermum Canadense*, Smilax S.

SARSAPARILLA, FALSE, *Aralia nudicaulis*.

SARSAPARILL'A GERMAN'ICA, *Gramen major seu rubrum*, *Salsaparill'a Germanica*, *Carex Aren'aria*, (F.) *Luiche*, *L. des Sables*, *Salseparille d'Allemagne*, *Chiendent rouge*. Ord. Cyperacæ. *Sex. Syst.* Monœcia Triandria. A plant, which grows plentifully on the sea-coasts of Europe. It has been recommended in some mucous affections of the trachea, in rheumatism, gout, &c.

SARSAPARILLA, INDIAN, *Hemidesmus Indicus*—s. Wild, *Aralia nudicaulis*.

SARTAPARILLA, Smilax sarsaparilla.

SARTO'RIOUS, from *sartor*, 'a tailor,' because used in crossing the legs. *Suto'rius*, *Longi'si-mus Fem'oris*, *Fasci'dis*, *F. Longus* seu *suto'rius*, (F.) *Pilo-eresti-tibial*, *Pilo-prétibial* (Ch.), *Couturier*. A muscle situated at the anterior part of the thigh. It is long, small, and flattened, and extends, obliquely, from the anterior and superior spine of the ilium to the superior and inner part of the tibia. This muscle can, also, bend the pelvis on the thigh, and conversely.

SARX, Flesh, Pulp.

SARZA, Smilax sarsaparilla.

SASSA GUM. A gum, occasionally carried into the European markets from the East, and answering exactly to Bruce's description of the product of a tree, which he calls *Sassa*. It has considerable resemblance to Gum Tragacanth.

SASSAFRAS, *Laurus sassafras*, *Nectandra cymbarum*—s. Medulla, see *Laurus sassafras*—s. Nut, see *Pichurim beans*—s. *Radici's cortex*, see *Laurus sassafras*.

SASSAFRAS, SWAMP, *Magnolia glauca*.

SASSAFRAS TEA, Saloop.

SASSY BARK, A poisonous bark of a large tree—*Genus*, *Erythrophleum*, *E. Judicia'te*; *Nut. Ord.* Fabacæ; *Red water tree* of Sierra Leone—growing in Western and Central Africa, used in an ordeal to which persons, suspected of witchcraft, secret murder, and other crimes, are subjected, to test their innocence or guilt. Hence it is called, in Congo, *ordeal bark*, and in Ashantee and Liberia, *doom bark*.

SAT'ELLITE, *Satelles*, genitive *Satellit'is*. That which guards. That which is placed near.

SATELLITE VEINS are those that accompany arteries.

SATHE, Penis.

SATIES, Satiety.

SATIETAS, Plesmone, Satiety.

SATIETY, *Sati'etas, Sati'ritas, Sa'ties, Sa-tura'tio, Plethos, Plesmonē*, from *satiare* (itself from *satis*, 'enough'), 'to give enough.' Disgust for food; commonly produced by repletion.

SATIN, *Lunaria rediviva*.

SATURANS, Absorbent (medicine.)

SATURATIO, Satiety, Saturation.

SATURA'TION, *Satura'tio*, from *saturare, saturatum, (satis, 'enough')*, 'to satiate.' The state of a compound in which its elements are combined in such proportions that a fresh quantity of either cannot be added without producing excess.

SATUREIA CAPITA'TA, from *Σατυροι*, 'the Satyrs'; owing to its presumed power of exciting to venery. *Ciliated Sa'tu'ry, Thymus, T. sylves-tris seu capitatus seu Cre'ticus, Cuni'la, (F.) Sarriette de Crète. Ord. Labiate. Sex. Syst. Didynamia Gymnospermia*. Possesses similar properties to thyme.

SATUREIA HORTEN'SIS, *Satureia, S. sati'va, Cuni'la sativa Plin'ii, Thymbra, Summer Sa'tu'ry, (F.) Sarriette*. An aromatic plant, cultivated for culinary purposes. It has been used, as an excitant, in anorexia, anaphrodisia, &c.

SATUREIA ORIGANOIDES, *Cunila mariana* — *S. Sativa, S. hortensis*.

SATURITAS, Satiety.

SATURNI DULCEDO, *Plumbi superacetas*.

SATURNINE, *Saturni'nus*, from *saturnus*, 'lead.' Containing, or caused by, lead.

SATURNINE BREATH. The peculiar odour of the breath in one labouring under Saturnism.

SATURNISM'US, *Intoxica'tio seu Cachec'ia seu Dyscrasia saturni'na, Molybdoacachec'ia*, from *saturnus*, 'lead.' Poisoning by lead; lead-poisoning; saturnine cachexy.

SATURNUS, *Plumbum*.

SATYRI'ASIS, from *Σατυρος*, 'a Satyr;' because the Satyrs were greatly addicted to venery. *S. furens, Satyriasis' mus, Satyris' mus, Priapis' mus, Salac'itas, Brach'na, Aros'con, Lagne'sis Salac'itas, L. furor masculi'nus, Lagne'ia, Lagne'ia, Lagne'sis, Lasciv'ia, Lasciv'itas, Tent'igo vere'tri*. An irresistible desire, in man, to have frequent connexion with females, accompanied by the power of doing so without exhaustion. The causes are commonly obscure. Sometimes, the abuse of aphrodisiacs has occasioned it. The principal symptoms are:—almost constant erection; irresistible and almost insatiable desire for venery; frequent nocturnal pollutions. Cold lotions; the cold bath; a mild diet; active exercise, &c., are the only means that can be adopted for its removal.

SATYRIASIS FURENS, *Satyriasis*.

SATYRIASMUS, *Satyriasis*.

SATYRION, *Orchis mascula*.

SATYRISMUS, *Satyriasis*.

SATYRIUM, *Goodyera pubescens*.

SAUARJA, *Saoria*.

SAUCE-ALONE, *Alliaria*.

SAUCE, GREEN, *Rumex scutatus*.

SAUCH, *Salix*.

SAUER KRAUT, (G.), 'sour cabbage,' (F.) *Chou-croûte*. A culinary preparation, made with chopped cabbage, left to attain an incipient state of acetous fermentation. It is reputed by the Germans to be salubrious, easy of digestion, and eminently antiscorbutic.

SAUGE, *Salvia* — *s. des Bois, Teucrium scor-dium* — *s. Grande, Salvia sclarea* — *s. Hormin, Salvia horminum* — *s. de Jérusalem, Pulmonaria* — *s. Petite, Salvia* — *s. Sclarée, Salvia sclarea*.

SAUGH, *Salix*.

SAULE, *Salix*.

SAUMURE, *Muria*.

SAUNDERS, RED, *Pterocarpus santalinus* — *s. Tree, Pterocarpus santalinus* — *s. Yellow, Santalum album*.

SAURA, *Lizard*.

SAURURUS CER'NUUS, from *σαυρος*, 'a lizard,' and *οψα*, 'a tail.' *Lizard's Tail, Breast weed*. Indigenous; *Order, Saururaceæ*; flowering in June. It has been used in lumbago. The bruised root is emollient, and is a popular application to inflamed tendons.

SAUSAGE POISON, *Allantotoxium*.

SAUT, *Leap*.

SAUTEUSES, see *Convulsioinaire*.

SAUVE-VIE, *Asplenium ruta muraria*.

SAVE, *Sage*.

SAVEUR, *Savour*.

SAVINE, *Juniperus sabina*.

SAVINIER, *Juniperus sabina*.

SAVON. Sapo — *s. Ammoniacal, Linimentum ammoniæ fortius* — *s. Cacao, Sapo coconeus* — *s. Calcaire, Linimentum aquæ calcis* — *s. Dur, Sapo durus* — *s. Médicinal, Sapo medicinalis* — *s. Mou, Sapo mollis* — *s. Noir, Sapo mollis*.

SAVONNIER COMMUN, *Sapindus saponaria*.

SAVONNIÈRE, *Saponaria*.

SAVONULE, *Saponulus*.

SAVONULUS, *Saponulus*.

SAVORY, CILIATED, *Satureia capitata* — *s. Summer, Satureia hortensis*.

SAVOUR, *Sapor, Taste, (F.) Saveur*. Quality of bodies, by which they act upon the sense of taste. Chymists, at times, avail themselves of this quality to analyse an unknown substance.

SAVOUREUX, *Savoury*.

SAVOURY, *Sap'idus, (F.) Savoureux*. An epithet given to bodies that have taste; and particularly to those that excite a very agreeable impression on the organ of taste.

SAVOYAN, *Galium verum*.

SAW, *Prion, Serra, (Da.) Sawe, (Sax.) řaga, (F.) Scie*. A surgical instrument, made like a common saw; and used for sawing the bones in amputations, or for removing exostoses, &c. Saws of different sizes and shapes are used in surgery. The crown of the trepan is nothing more than a species of circular saw.

SAW, AMPUTA'TION, *Serra amputato'ria*. The saw used in amputation.

SAW, HEY'S. An instrument used by Mr. Hey, of Leeds, in fractures of the cranium. It consists of a long handle, to which a small saw with a convex or straight edge is attached, and by which a piece of bone of any shape may be removed. With the trephine, the saw must always be circular.

SAW PALMETTO, *Chamærops serratula* — *s. Wort, Liatris*.

SAXIFRAGA, from *saxum*, 'a stone,' and *frango*, 'I break.' *Pimpinella saxifraga* — *s. Anglica, Peucedanum silaus*.

SAXIFRAGA CRASSIFOLIA. *Ord. Saxifragaceæ. Sex. Syst. Decandria Digynia*. The root of this species of saxifrage has been extolled by Pallas, as pre-eminently antiseptic.

SAXIFRAGA GRANULA'TA, *S. alba, Sanic'ula, Sedum, White sax'ifrage, (F.) Saxifrage granulée*. Recommended as diuretic and lithontriptic; but not used.

SAXIFRAGA RUBRA, *Spiræa filipendula* — *s. Vulgaris, Peucedanum silaus*.

SAXIFRAGE, BURNET, *Pimpinella saxifraga* — *s. Granulée, Saxifraga granulata* — *s. Meadow, Peucedanum silaus* — *s. White, Saxifraga granulata*.

SAXIFRAGUS, *Lithontriptic*.

SAXONICUS PULVIS. A powder, prepared with the roots of the wild and cultivated ange-

lica; the *asclepias vincetoxicum*, &c. It was considered formerly as an antidote.

SCAB, *Scabies*, from *scabere*, 'to dig.' *Scall*, (Prov.) *Rove*. An incrustation, which forms upon a sore, owing to the concretion of the fluid discharged from it. An eschar.

SCABBY or SCABBED. Covered or diseased with scabs.

SCABIES, *Psora* — s. *Agria*, *Lichen* — s. *Capitis*, *Porrigo lupinosa*, *Porrigo scutulata* — s. *Capitis favosa*, *Porrigo favosa* — s. *Crustosa*, *Radzyge* — s. *Fera*, *Ecthyma*.

SCABIES FERINA, *Itch of animals*, *Mange*, (pronounced *Maynge*.) A cutaneous disease, which affects almost all domestic animals, but especially the horse, sheep, dog, and cow. It is said to have been transmitted to man; but this is questionable.

SCABIES FERINA, *Psoriasis* — s. *Norwegica* *Boeckii*, *Radzyge* — s. *Papuliformis*, *Prurigo* — s. *Sicca*, *Lichen*, *Psoriasis* — s. *Veneria contagiosa*, *Scherlievo*.

SCABIEUSE ORDINAIRE, *Scabiosa*.

SCABIOLA, *Scabies*.

SCABIOSA, *S. arvensis*, *Tri'chera arvensis*, *Field Scabious*, (Sc.) *Eusting wort*, (F.) *Scabieuse ordinaire*. *Ord. Dipsacæ. Sez. Syst. Tetrandria Monogynia*. From *scaber*, 'rough,' owing to its rough hairy surface.' The plant is bitter and sub-astringent, and was formerly used in the cure of leprous affections and diseased lungs.

SCABIOSA ARVENSIS, *Scabiosa* — s. *Carduifolia*, *Echinops*.

SCABIOSA SUCCISA, *Succisa*, *S. pratensis*, *Aste-roceph'alus succisa*, *Morsus Diab'oli*, *Devil's bit*, (F.) *Mors du Diable*, has similar properties.

SCABIOUS, *Erigeron Philadelphicum* — s. *Field*, *Scabiosa* — s. *Sweet*, *Erigeron heterophyl-lum*.

SCABISH, *Eriothera biennis*.

SCABRITIES, *Lichen*, *Trachoma*.

SCALA, 'a ladder.' A machine formerly used for reducing dislocations of the humerus.

SCALE OF THE COCH'LEA, *Gyri seu Ductus spi-ra'les seu Cana'les cochlea*, (F.) *Rampes* ou *Échelles du Limaçon* — are the cavities in the cochlea, separated from each other by the spiral septum. The one — *Scala inter'na seu poste'rior seu inferior coch'lea*, *S. tym'pani* — would communicate with the *cavitas tympani* by the *fenestra rotunda*, were it not for the membrane that closes it. The other — *Scala exter'na seu ante'rior seu superior coch'lea*, *S. vestib'uli* — opens into the cavity of the vestibule. The scale communicate with each other by an opening at the top of the partition.

SCALE ANTERIOR COCHLEÆ, see *Scala* — s. *Clausula*, see *Scala* — s. *Externa cochleæ*, see *Scala* — s. *Inferior cochleæ*, see *Scala* — s. *Interior cochleæ*, see *Scala* — s. *Posterior cochleæ*, see *Scala* — s. *Superior cochleæ*, see *Scala* — s. *Tympani*, see *Cochlea*, and *Scala* — s. *Vestibuli*, see *Cochlea*, and *Scala*.

SCALDRICKS, *Sniparis arvensis*.

SCALE, Sax. *scale*, from *scylan*, 'to divide, separate;' (G.) *Schale*, 'shell, peel;' *schälen*, 'to shell, to peel.' *Squama*, *Lepis*, (F.) *Escaille*, *Écaille*. An opaque and thickened lamina of cuticle, commonly produced by some degree of inflammation of the true skin, over which it is formed.

SCALE, DRY, *Psoriasis*.

SCALÈNE ANTÉRIEUR, *Scalenus anticus* — s. *Postérieur*, *Scalenus posticus*.

SCALE'NUS, *σκαλῆνος*, 'irregular or unequal.' Geometers employ this word to designate a triangle whose three sides are unequal. Anatomists

have given the name to two muscles. 1. *SCALENUS ANTI'CUS*, *Portion of the Costo-trachelian* (Ch.), (F.) *Scalène antérieur*, is situate at the internal and inferior parts of the neck. It is long and triangular; and is inserted, below, at the upper surface of the first rib; and, above, at the anterior tubercle of the transverse processes of the 3d, 4th, 5th, and 6th cervical vertebræ. This muscle bends the neck, and draws it to its side. It can also raise the first rib. 2. *SCALENUS POSTI'CUS*, (F.) *Scalène postérieur*, *Portion of the Costo-trachelian* (Ch.), is situate behind the last. It is, also, long and triangular; but more bulky than the *S. anticus*. It is attached, below, to the outer surface of the first two ribs; and terminates, above, at the summit of the transverse processes of the last six vertebræ of the neck. This muscle bends the neck laterally, and can elevate the first two ribs. Some anatomists, as *Albinus* and *Sömmering*, have described five *scaleni* muscles on each side, and have called them *Scalenus prior*, *S. min'imus*, *S. latera'lis*, *S. me'dius*, *S. posti'cus*. *Riolan* and *Chaussier* only describe one *scalenus* muscle on each side. *Cowper* and *Douglas*, and the generality of the English anatomists, admit three, *S. anti'cus*, *me'dius*, and *posti'cus*; or, *primus*, *secun'dus*, and *ter'tius*; *Winslow*, *Boyer*, and many of the French anatomists, — two, as above described.

SCALING — same etymon as *Scale* — in dentistry, is an operation, which consists in removing the tartar from the teeth.

SCALL, ((Sc.) *Skav*,) *Impetigo*, *Scab* — s. *Asbestos*, see *Eczema* of the hairy scalp — s. *Crusted*, *Impetigo* — s. *Dry*, *Psoriasis* — s. *Honeycomb*, *Porrigo favosa* — s. *Humid*, *Eczema* — s. *Milky*, *Porrigo larvalis* — s. *Papulous*, *Ecthyma* — s. *Running*, *Eczema*, *Impetigo* — s. *Vesicular*, *Eczema capitis* — s. *Washerwoman's*, *Psoriasis diffusa*.

SCALLARD, *Porrigo*.

SCALLED HEAD, *Porrigo*, *P. scutulata*.

SCALP, Teut. *Schelp*e, 'a shell.' (Old Eng.) *Scop*. The integuments covering the head. The hairy scalp is called, also, *Capillit'ium*, *Tricho'ton*, *Cæsari'is*, (F.) *Chevelure*, *Coir chevelu*.

SCALPEL, *Scalpel'um*, *Scalpel'us*, *Culter*, *Inciso'rium*, *Smi'leon*; from *scalpo*, 'I cut.' A cutting instrument, formed of a blade of well-tempered steel, very sharp, of variable shape and size, and fixed solidly in a handle. Its use is to divide the soft parts in operations, dissection, &c.

SCALPELLUM, *Scalpel* — s. *Lenticulare*, *Phacops*.

SCALPELLUS, *Bistouri*, *Scalpel*.

SCALPEUM, *Bistouri*.

SCALPRUM, *Raspatorium* — s. *Chirurgicum*, *Lancet*.

SCALPRUM DENTA'RIUM, *Lima denta'ria*. A tooth-file. A dental file or file used by the dentist.

SCALPRUM RASORIUM, *Raspatorium*.

SCALY, *Squamous*.

SCALY DISEASES or SQUAMÆ, *Lepido'ses*, form the second order in *Willan* and *Bateman's* system of cutaneous diseases.

SCAMMA, *Fossa*.

SCAMMONÉE D'ALEP, *Convolvulus scammonia*.

SCAMMONIUM, see *Convolvulus scammonia* — s. *Syriacum*, *Convolvulus scammonia*.

SCAMMONY, *Convolvulus scammonia*.

SCAMMONY, *BOURBON*. The concrete juice of *Periploca Mauritiana*.

SCAMMONY, *GERMANY*. The concrete juice of *Convolvulus sepium*.

SCAMMONY OF MONTPELLIER, *Cynanchum Monspeliacum*.

SCAMNUM HIPPOCRAT'ICUM, (*scamnum*,

'a bench.') *Bathron Hippocrat'ion* of Galen, (F.) *Banc d'Hippocrate*. A machine invented by Hippocrates for reducing fractures. It was a sort of bed, six feet long, on which the patient was fixed. Straps were attached above and below the fracture or luxation, and extension and counter-extension were effected by a winch. It is described in Galen, Oribasius, Scultetus, &c. See *Bathron*.

SCANDIX, *S. cerefolium*.

SCANDIX BULBOCASTANUM, *Bunium bulbocastanum*.

SCANDIX CEREOFOLIUM, *Scandix, Scandyx, Pecten Ven'eri's, Cerefolium, Daucus Seprin'ius, Chærophyllum, Ch. Sati'vum seu Cerefo'lium, Anthriscus cerefolium, Chærefo'lium, Chervil, (F.) Cerfeuil. Ord. Umbelliferae. Sex. Syst. Pentandria Digynia*. A culinary herb, which is slightly aromatic and grateful. It is said to be gently aperient and diuretic.

SCANDIX ODORATA, *Sweet Cic'ely*. Properties the same as the other. Also, *Chærophyllum odoratum*.

SCANDULARIUS MUSCULUS, *Parathenar, Transversus pedis*.

SCANDYX, *Scandix cerefolium*.

SCAPHIA, *Scaphus*, 'a skiff or cock-boat,' from *σκαπη*, 'I make hollow.' The excavation or cavity of the external ear, between the helix and anthelix. The meatus auditorius externus. The rima vulvæ. Also the name of a bandage for the head, mentioned by Galen, and called, likewise, *Tholus Diocle'us*.

SCAPHIA, *Nates*.

SCAPHION, *Cranium, Papaver (Capsule)*.

SCAPHIUM OCULARE, *Pelvis Ocularis, Eye-glass, (F.) Bassin on Gondole oculaire, Œillière*. A small porcelain, glass or metallic vessel, used for applying lotions to the eye.

SCAPHO-CARPO-SUPER-PHALANGEUS POLLICIS, *Abductor pollicis brevis*.

SCAPHOID, *Scaphoï'des*, from *σκαφη*, 'a skiff,' and *εἶδος*, 'form.' A name given to several parts.

SCAPHOID FOSSA, *Fossa Scaphoï'des, (F.) Enfoncement Scaphoï'de*. A small cavity at the upper part of the internal ala of the pterygoid process, in which the peristaphylinus internus is attached.

SCAPHOID BONE OF THE HAND, *Os Scaphoï'des Manûs seu navicula'rè seu cymbifor'mè, Boat-like bone, (F.) Scaphoï'de de la main*. The first bone of the first row of the carpus. The upper surface is convex, and articulated with the radius. The under and outer surfaces are also convex,—to be articulated with the trapezium and trapezoides. Between the upper and under cartilaginous surfaces there is a *rough fossa* for the insertion of the capsular ligament. The anterior and inner surface has an *oval cavity*, where it is articulated with the *os magnum*, which gives name to the bone. There is a *process* on the outer end of the bone, for the attachment of part of the anterior transverse ligament of the wrist.

SCAPHOID BONE OF THE FOOT, *Os Scaphoï'des Pedis seu navicula'rè seu cymbifor'mè, Boat-like bone, (F.) Scaphoï'de du Pied*. This bone is situate at the forepart of the astragalus and inner part of the foot. The *posterior surface* forms a cavity, somewhat like that of a boat, for receiving the head of the astragalus. There is a prominence at the inner side of the bone, for the insertion of tendons, muscles, and strong ligaments. The forepart of the bone is convex, and divided into three articular surfaces for articulation with the *ossa cuneiformia*. Between the *os naviculare* and astragalus, the foot has its principal lateral and rotary motions; although each of the other joints of the tarsus contributes a little. Part of the *tibialis posticus* is inserted into it.

SCAPHOÏDE DE LA MAIN, *Os scaphoides manûs—s. du Pied, Os scaphoides pedis*.

SCAPHOÏDO-ASTRAG'ALAN, *Scaphoïdo-astragala'nus*. That which relates to the scaphoid bone and astragalus. The articulation of these bones is so called; and the ligament which strengthens it is termed the *Scaphoïdo-astragalan ligament*.

SCAPHOÏDO-CUBOID, *Scaphoïdo-cuboidæ'nus*. That which relates to the scaphoid and cuboid bones. The articulation of those bones is so called.

SCAPHULA, *Navicularis fossa*.

SCAPHUS, *Auditory canal, external, Rima vulvæ, Scapha*.

SCAP'ULA, *Scap'ulum, Plata, Omopla'ta, Homopla'ta, Scap'tula, Epino'tion, Latit'udo hu'meri, Omop'latz, Os latum hu'meri, Scutum thora'cis seu cordis, Spath'ula, Pteryg'ium, Cheloni'um, Spat'ula; Blade-bone, Shoulder-blade, (Prov.) Shield-bone, Plate-bone, Spade-bone, (F.) Omoplate*. An irregular, broad, flat bone, of a triangular shape, situate at the posterior part of the shoulder. It has, 1. A *posterior or dorsal surface* or *Dorsum, Testu'do scapu'læ*, divided transversely into two parts, by a triangular process, called *Spine of the Scapula*; which terminates by a considerable eminence, called *Acromion*. Above the spine, is the *Fossa supra-spinata*; below it, the *F. infra-spinata*. 2. An *anterior or costal surface* or *venter*, forming the *Fossa subscapularis*. 3. A *superior or cervical edge*, which is thin, and terminates, anteriorly, by a strong, curved apophysis, called the *coracoid process*. 4. A *posterior or vertebral edge*, called, also, the *base*. 5. An *outer or axillary or inferior edge*, having a thick, truncated angle, in which is the *glenoid cavity*. With this is articulated the head of the humerus. The glenoid cavity is separated from the body of the bone by a narrow part called the *cervix* or *neck*. The edges or margins are, also, called *costæ*. The scapula has three angles—*an inferior, superior, and anterior*.

SCAPULA, *Humerus*.

SCAPULÆ NASI, *Partes laterales nasi*. The lateral parts of the nose.

SCAPULAL'GIA; from *scapula*, 'the shoulder-blade,' and *algos*, 'pain.' Arthralgia of the shoulder-joint.

SCAP'ULAR, *Scap'ulary, Scapula'ris, (F.) Scapulaire, from scapula, 'the shoulder-blade.'* That which relates or belongs to the scapula.

SCAPULAR APONEURO'SIS. A broad, thin aponeurosis, with decussating fibres; which is attached, *above*, to the spine of the scapula; *below*, to a crest between the *teres major* and *infra-spinatus*; *within*, to the spinal edge of the scapula; and which, at its middle, unites with the thin aponeurosis that covers a part of the external surface of the deltoid.

SCAPULAR ARTERIES. These are several. a. The *Superior scapular, Superficial scapular* of Sömmering, *Dorsalis scapulae superior, Transversalis scapulae, T. Hu'meri*. This arises from the subclavian; and often from the inferior thyroid, or from a trunk common to it and the *posterior scapular* or *transverse scapular* or *cervical*. It passes behind the clavical, above the superior edge of the scapula, and buries itself between the dorsal surface of that bone and the muscles inserted into it. b. The *inferior scapular* or *common scapular* or *internal scapular* or *subscapular artery, A. Thorac'ica axilla'ris seu ala'ris* is of considerable size. It arises from the inferior part of the axillary artery, behind the brachial plexus—gives off several branches to the armpit, and divides into two branches:—the one, *Scapula'ris*

interna, and the smaller of the two, is distributed, almost entirely, to the serratus major anticus, and latissimus dorsi; the other, the larger of the two, the *Dorsalis Scapulae inferior* seu *Circumflexa Scapularis*, which distributes its branches to the subscapular and supra-spinal, and infra-spinal regions.

SCAPULAR NOTCH, see Notch, scapular.

SCAPULAR VEINS follow the same course as the arteries, which they accompany.

SCAPULARE, Scapulary.

SCAP'ULARY, *Scapula'rē, Fascia Scapula'ris*, from *scapula*. A broad, linen bandage, divided into two tails for three quarters of its length, the undivided extremity of which is attached to the posterior and middle part of a bandage carried round the body; the tails passing over the shoulders; and being attached to the anterior part of the body bandage, to prevent it from slipping down.

SCAPULODYN'IA, from *scapula*, and *ὄδυν*, 'pain.' A hybrid word, signifying pain or rheumatism of the shoulder.

SCAP'ULO-HUM'ERAL. An epithet given to the shoulder-joint. It is an orbicular articulation, resulting from the reception of the head of the humerus into the glenoid cavity of the scapula. To keep the bones in connexion, there are: 1. A very strong, conoidal capsular ligament; passing from the circumference of the glenoid cavity around the neck of the humerus. 2. A *fibro-cartilaginous ring*, called the glenoid ligament, and a synovial capsule.

SCAPULO-HUMÉRAL, *Teret major*—*s. Huméro-olécrani*, *Triceps extensor cubiti*—*s. Hyoidien*, *Omohyoideus*—*s. Radial*, *Biceps flexor cubiti*—*s. Trochitérien*, *grand*, *Infra-spinatus*.

SCAPUS, Penis, see Hair.

SCAR, Cicatrix.

SCAR, *Seam*. To mark with a cicatrix or seam;—as *scarred*, (*Sc.*) *arred*, means marked with a cicatrix or seam.

SCARABÆOLUS HEMISPHERICUS, *Coccus cacti*.

SCAR'BOROUGH, MINERAL WATERS OF. *Scarborough Spa*. A celebrated English chalybeate, at Scarborough, in Yorkshire. One of the springs is a simple, carbonated chalybeate, like that of Tunbridge; the other has an admixture of purging salt. Scarborough, having the additional advantage of sea-bathing, is much frequented by invalids.

SCAR'CHT, *Hermaphrodite*.

SCARDAMYG'MUS, *Scardamyx'is*, (*F.*) *Clignement*, from *καρδαμυσσειν*, 'to wink.' Winking.

SCARFSKIN, Epidermis.

SCARIFICA'TION, *Scarifica'tio, Amyx'is, Schasis, Catacas'mus, Catachas'mus, Amyg'mus, Schasmus, Encharax'is*, from *καρριφαραι*, 'to make a slight scratch.' The act of scarifying. Also, a small incision, *Am'yche*, made into the skin with a lancet, bistoury, or scarificator, for different therapeutical purposes,—as to draw blood, or to discharge some effused fluid. When the scarifications are very superficial, and do not go farther than the skin, they are termed by the French, *Mouchetures*.

SCARIFICA'TOR, *Scarificato'rium, Schaste'rium*. Same etymon. An instrument for making scarifications. It consists of a small brass box, of a cubical shape, in which 10 or 12 lancet points turn upon a common pivot. By means of a spring, all these blades can be made to issue at once, and make as many scarifications.

SCARIFICATORIUM, Scarificator.

SCARIOLA, *Cichorium endivia, Lactuca scariola*.

SCARIOLE, *Cichorum endivia*.

SCARLATA, *Scarlatina*.

SCARLATI'NA, from (*L.*) *scarlatte*, 'a deep red.' *Scarlat*, *Enonthe'sis Rosa'lia, Rosa'lia, Rossa'lia, R. squamo'sa, Rosa'lia, Rube'olæ*, of some, *Morbil'l'i ignei seu confuent'es, Morbus scarlatino'sus, Febris scarlatino'sa seu rubra, Gutturis morbus epidem'icus Forest'i, Pur'pura, Typhus scarlati'nus, Porphyris'mus, Porphyris'ma, Scarlet* or *Rash-fever*, (*F.*) *Fièvre rouge, F. pourprée*. The characteristic symptoms of scarlatina are:—a scarlet flush, appearing about the second day of fever on the face, neck, and fauces; and progressively spreading over the body; terminating about the 7th day. Two great varieties may be reckoned:—the *S. simplex* seu *febris seu benigna* seu *sine anginâ*, in which the fever is moderate and terminates with the efflorescence; prostration of strength being trifling, and the contagious property slight;—and the *S. Angino'sa* seu *Paristhmica* seu *Cynanchica* seu *mit'ior*, in which the fever is severe; the throat ulcerated; the eruption later in its appearance, and less extensive; often changing to a livid hue; the fever being highly contagious. *Scarlati'na maligna* seu *gravior*, has been reckoned a variety of this, in its worst degree. It agrees with the *Cynanche maligna* of Cullen.

Scarlatina belongs to the *Major exanthemata*, and is a disease, chiefly, of children. The eruption differs from that of measles, in being an efflorescence not raised above the cuticle. Measles, too, is attended with catarrhal symptoms, whilst the complication, in scarlatina, is cyanche. The treatment of simple scarlatina need not be much. It must be antiphlogistic. If the throat be very much ulcerated, acid gargles and counter-irritants must be employed; and if the affection become manifestly typhoid, and the sore throat of a malignant character, the case must be treated like typhus gravior; with antiseptic gargles of bark, acid, &c. Anasarca sometimes supervenes on scarlatina, and requires attention. Purgatives are here demanded as well as the use of sorbefacients, such as mercury and squill, &c.

SCARLATINA ANGINOSA, see Scarlatina—*s. Benigna*, see Scarlatina—*s. Cynanchica*, see Scarlatina—*s. Febris*, see Scarlatina—*s. Gravior*, see Scarlatina—*s. Miliaris, Rubeola*—*s. Mitior*, see Scarlatina—*s. Paristhmica*, see Scarlatina—*s. Pustulosa, Rubeola*—*s. Rheumatica, Dengue*—*s. Sine Anginâ*, see Scarlatina—*s. Urticaria, Urticaria*.

SCARLATI'NOUS, *Scarlati'nal, Scarlatino'sus*. Relating or appertaining to scarlatina.

SCARLET BERRY, *Solanum dulcamara*.

SCARLET FEVER, *Scarlatina*.

SCATACRASIA, *Scoracrasia*.

SCATACRATIA, *Scoracrasia*.

SCAW, *Sambucus*.

SCEAU DE SALOMON, *Convallaria polygonatum*.

SCELLAL'GIA, from *σκελος*, 'the leg,' and *αλγος*, 'pain.' Pain of the leg.

SCELALGIA ANTICA, *Neuralgia femoro-pretibialis*—*s. Postica, Neuralgia femoro-poplitea*—*s. Puerperarum, Phlegmatia dolens*.

SCELETEU'SIS. Mummification. Also, the mode of making a skeleton, *Skeletopæ'a, Syntax'is*.

SCELETOLOGIA, *Skeletology*.

SCELETON, *Skeleton*.

SCELETOPŒA, *Sceletusis*.

SCELETUM, *Skeleton*—*s. Artificiale*, see *Skeleton*—*s. Naturale*, see *Skeleton*.

SCELONCUS, *Phlegmatia dolens*.

SCELORRHEU'MA, *Rheumatis'mus cruris*, from *σκελος*, 'the leg,' and *ρευμα*, 'defluxion, rheumatism.' Rheumatism of the leg.

SCELOS, *Leg*.

SCELOTYRBE, Choreia, Porphyra nautica — s. Febrilis, see Subsultus tendinum — s. Festinans, Paralysis agitans — s. Tarantismus, Choreia.

SECAPARNON, Amnios, Asia.

SCEPASTERIUM, *Couvrechef*.

SCEPASTRUM, *Couvrechef*.

SCEPTRUM, Penis.

SCHASIS, Scarification.

SCHASMUS, Scarification.

SCHASTERION, Fleam, Lancet, Scarificator.

SCEBA ARABUM, Artemisia santonica.

SCHEDULA, Prescription.

SCHERBET', *Sherbet*, *Serbet*, *Tscherbet*. *Sorbetum*, *Sorbetum*, *Sorbetum*. A drink prepared by the Turks, Persians, Egyptians, &c., with sugar and the juice of acid fruits.

SCHERLIEVO, *Skerljevo*, *Male di Scherlievo*, *Male di Breno*, *Male di Fiume*, *Male di Scarlievo*, *Male scabioso venereo*, *Margaretizza*, *Morbus Croatus seu fluminien'sis*, *Frambœ'sia Illyrica*, *Scabies venerea contagiosa*, *Veneræal Itch*. A name given to a particular form of syphilis, observed in Illyria. It is said to be capable of being communicated without immediate contact; and, that its principal symptoms are: — pains in the bones, ulceration of the fauces, pustules, and fungous growths in different parts of the body.

Affections, known by this name, as well as by those of *Male di Breno*, *Falcadi'na*, *Boala* and *Frenga*, prevail in the frontier countries of the Austrian empire, and are generally regarded as contagious, of syphilitic origin, and as having been introduced from a surrounding country. The terms appear, however, in the course of time, to have been applied to a variety of ulcers, eruptions, and other morbid conditions in no way connected with syphilis, so that they lost their peculiar signification. — Signund.

SCHERO'MA. A dryness of the eye from the want of lachrymal secretion. — Dictionaries.

SCHIAS, Neuralgia femoro-poplitea.

SCHIATICUS, Sciatic.

SCHIDAKE'DON, *Schidacæ'dum*, *Schindacæ'dum*, *Schindal'amus*, *Schindal'mus*, from *σχιζω*. 'I cleave.' A longitudinal fracture of a bone. — Galen.

SCHINDACEDUM, *Schidakedon*.

SCHINDALAMUS, *Schidakedon*, *Schindylesis*.

SCHINDALESIS, *Schindylesis*.

SCHINDALMUS, *Schidakedon*, *Schindylesis*.

SCHINDYLE'SIS, *Schindal'sis*, *Schindal'amus*, *Schindal'mus*. An articulation of bones — by furrowing, as it were; as in that of the vomer, which constitutes, in part, the septum narium. Also, the act of splitting into small pieces: from *σχιζω*, 'I split into small pieces.' — Hippocrates.

SCHINELÆ'ON, from *σχινος*, 'the mastic tree,' and *ελαιον*, 'oil;' *Oleum lentis'cinum*. Oil of mastic. — Dioscorides.

SCHINOCEPHALUS, *Scillocephalus*.

SCHINOS, *Scilla*.

SCHINZNACH or HAPSBURG, MINERAL WATERS OF. These springs are situate three leagues from Baden, and are amongst the most celebrated bathing-places in Switzerland. The waters are of the saline sulphurous kind; and have a high reputation in cutaneous and rheumatic affections, visceral obstructions, and glandular enlargements. They contain sulphate of lime, sulphate of soda, chloride of sodium, chloride of magnesium, sulphate of magnesia, sulphate of lime, carbonate of magnesia, and oxide of iron; sulphohydric acid, and carbonic acid gases.

SCHISMA, Fissure, Rima.

SCHISTOCEPH'ALUS, from *σχιστος*, 'cleft,

separated,' and *κεφαλη*, 'head.' A monster having some part of the head cleft or fissured. — Gurlt.

SCHISTOCOR'MUS, from *σχιστος*, 'cleft, separated,' and *κορμος*, 'trunk.' A monster having some part of the trunk cleft or fissured. — Gurlt.

SCHISTOM'ELUS, from *σχιστος*, 'cleft, separated,' and *μελος*, 'a limb.' A monster whose limbs are fissured.

SCHISTORRHACHIS, *Hydrorachis*.

SCHISTOSO'MUS, from *σχιστος*, 'cleft,' and *σωμα*, 'body.' A malformation of the abdomen, in which the fissure and eventration extend over the entire length of the abdomen; the lower extremities being absent, or very little developed, so that the body appears as if truncated inferiorly. — Vogel.

SCHIZA, Rima, Rima vulvæ.

SCHIZATRICH'IA, *Trichos'chisis*, *Schizotrich'ia*, from *σχιζω*, 'I split,' and *τριξ*, *τριχος*, 'a hair.' The splitting of the hairs at their extremities. — J. P. Frank.

SCHLANGENBAD, MINERAL WATERS OF. *Schlangenbad* is a much-frequented watering-place in Germany. The waters contain a little carbonic acid, and carbonate of soda. Temperature 86° Fahrenheit.

SCHNAPPS, SCHIEDAM, see Gin.

SCHNEIDERIAN MEMBRANE, Pituitary membrane.

SCHÖENANTHUS, *Juncus odoratus*.

SCHOLA, School.

SCHOLLERA OXYCOCCOS, *Vaccinium oxycoccos*.

SCHOOL, *Schola*, (F.) *École*. A place of education. In Europe the large Medical Schools are usually attached to the universities. In England, however, there has been no medical school of celebrity at either of the universities of Oxford or Cambridge; owing greatly to their provincial situation. Of late, two schools have existed in London, attached to the London University — University College and King's College. Excellent private schools have, however, long existed in that metropolis. The medical schools of Europe which have been most celebrated, are those of Edinburgh, Leyden, Berlin, Halle, Tubingen, Paris, Montpellier, Bologna, Padua, Pavia, and Pisa. In the United States, the medical schools are numerous; at this time not fewer, perhaps, than 40. Those most numerously attended, are Jefferson Medical College of Philadelphia, the medical department of the University of Pennsylvania, and the University of Nashville.

SCHOOLEY'S MOUNTAIN, MINERAL WATERS OF. The waters of this New Jersey Spring are a carbonated chalybeate. According to Dr. McNevin, they contain extractive, chloride of sodium, chloride of calcium, chloride of magnesium, carbonate of lime, sulphate of lime, carbonate of magnesia, silex, and carbonate, and oxide of iron.

SCHORBUS, Purpura.

SCHOUSBÆA COCCINEA, *Cacocia cocinea*.

SCHWALBACH or LANGEN-SCHWALBACH, MINERAL WATERS OF. *Schwalbach* is a town of Germany, seated on the Aa, 32 miles west of Frankfort. The waters contain chloride of sodium, carbonates of lime and magnesia, iron, sulphate of lime, carbonic acid, oxygen, &c. Employed as a tonic.

SCHWANN, WHITE SUBSTANCE OF, see Substance, white, of Schwann.

SCHWENDECK, MINERAL WATERS OF. These waters are about 5 leagues from Munich, in Bavaria. They contain carbonic acid; carbonate and sulphate of lime, chloride of calcium; chloride of magnesium; carbonate of soda, and

oxide of iron, and are much used for cutaneous affections.

SCIATIC, *Sciaticus*, *Ischiatic*, *Ischiaticus*, *Schiaticus*, (F.) *Sciatique*, from $\sigma\chi\iota\omega\nu$, 'the haunch.' A word formed by contraction from *ischiatric*, which latter is still used. See *Ischiatic*.

SCIATIC NERVE, GREAT, *Nervus ischiadicus*, *Great femoro-popliteal* (Ch.), (F.) *Grand nerf sciatique*, ought to be esteemed a continuation of the sacral plexus. It issues from the pelvis between the pyramidalis and superior gemellus; descends along the posterior part of the thigh; and after having given branches to the gemini, quadratus, obturator externus, glutæus maximus, semi-membranosus, semi-tendinosus, biceps and third abductor muscles, it divides, about the inferior third of the thigh, into two branches; the one, named the *external popliteal*; the other, the *internal*.

SCIATIC NERVE, LESSER, *Inferior glutæal branch of the sacral plexus*, *Lesser femoro-popliteal nerve* (Ch.), (F.) *Nerf petit sciatique*, which seems especially formed by the 2d and 3d sacral, is given off from the lower part of the plexus, and escapes from the pelvis beneath the pyramidalis muscle. It gives branches — *nervi cutanei clunium inferiores* — to the glutæus maximus; a *sciatic branch or infra-pelvic cutaneous or perineal cutaneous*, *Pudenda'lis longus inferior*, which passes under the tuberosity of the ischium, and furnishes filaments to the glutæus maximus, and to the muscles of the perinæum, urethra, penis, scrotum, &c.; and a *posterior femoral cutaneous branch* — *middle posterior cutaneous nerve* — the filaments of which traverse the femoral aponeurosis, to be distributed on the skin of the posterior part of the thigh. The principal branch of the lesser sciatic nerve divides, near the ham, into two or three filaments, which descend under the integuments almost as far as the inferior part of the leg.

SCIATIC NOTCH, GREAT, *Sciatic Foramen*, *Incisura ischiadica major*, (F.) *Grande échanerure sciatique ou grand trou sciatique*, is a large notch at the posterior edge of each os innominatum, below the posterior and inferior iliac spine, which is converted into a foramen by the sacrum and sacro-sciatic ligaments. The *lesser sciatic notch*, *Incisura ischiadica minor*, *Luna Albi'ni*, (F.) *Petite échanerure ischiatique*, is much smaller than the last, from which it is separated by the sciatic spine. It gives passage to the tendon of the obturator internus, and to the internal pudic vessels and nerves.

SCIATIC REGION, *Ischiadic region*.

SCIATIC SPINE, *Spine of the Ischium*, *Spinosa Proc'ess of the Ischium*, is a short, flat, pyramidal eminence on the os innominatum, above the preceding foramen; which gives insertion to the lesser sacro-sciatic ligament.

SCIATICA, *Neuralgia femoro-poplitea*.

SCIATIQUE, *Neuralgia femoro-poplitea*, *Sciatic*.

SCIE, *Saw*.

SCIENTIA HERMETICA, *Alchymy* — s. *Mendi*, *Medicina* — s. *Medica*, *Medicina*.

SCIERO'PIA, from $\sigma\kappa\iota\epsilon\pi\omicron\varsigma$, 'shady,' and $\omega\gamma$, 'the eye.' A defect of vision, in which all objects have a darker hue than natural.

SCILLA, $\sigma\kappa\iota\lambda\lambda\alpha$, from $\sigma\chi\iota\zeta\omega$, 'I cleave, I split' [?]. *Scilla* *sea Squilla maritima*, *Scylla*, *Aschil*, *Schinus*, *Oculus Typho'nis*, *Ornithog'alum maritimum* seu *squilla*, *Stella'ris* seu *Urgin'ea scilla*, *Cepa maritima scilla*, *Squilla*, *Squill* or *sea onion*, *Eye of Typhon*, (F.) *Ognon marin*. *Ord.* *Liliaceæ*. *Sex. Syst.* *Hexandria Monogynia*. Native of Spain, Austria, &c. The bulb or root of the squill has a bitter, nauseous taste, and is extremely acrid; inflaming the skin when

rubbed on it. Its acrimony, on which its virtues depend, is destroyed by heat, drying, and keeping. It is extracted by vinegar, spirit, and water. In large doses, squill is emetic and purgative; in small doses, diuretic and expectorant. Its active principle has been called *scillitine*. Dose, gr. j to v of the dried root, united or not with mercury.

SCILLA ESCULEN'TA, *Phalan'gium esculentum*, *Eastern Quamash*, *Wild Hy'acinth*; indigenous; flowering in May. An article of diet amongst the Western Indians. It is made into bread and poultices for inflamed breasts.

SCILLITIC, *Scilliticus*, (F.) *Scillitique*, from *scilla*, 'squill.' Containing squill.

SCILLOCEPH'ALUS, *Schinoceph'alus*, from $\sigma\kappa\iota\lambda\lambda\alpha$, 'the squill,' and $\kappa\epsilon\phi\alpha\lambda\eta$, 'head.' One who has a large bulbiform head.

SCINCUS, $\sigma\kappa\iota\gamma\kappa\omicron\varsigma$ or $\sigma\kappa\iota\gamma\gamma\omicron\varsigma$. A species of *Saurus* or *Lacerta*, common in Egypt, and much extolled by the ancients as alexipharmic and aphrodisiac.

SCINTIL'LA VEN'ERIS, 'a spark, a relic of Venus.' A name given, by Paracelsus, to the impotence and loss of power in the limbs, produced by syphilis.

SCINTILLEMENT DE L'ŒIL, *Confusio*.

SCIOM'ACHY, *Skioma'chia*, *Skiamachia*; from $\sigma\kappa\iota\alpha$, 'a shade,' and $\mu\alpha\chi\eta$, 'a fight.' A gymnastic exercise with the ancients, which consisted in a mock encounter at boxing and jumping with one's own shadow.

SCIRHUS, *Scirrhus*.

SCIRPUS PALUSTRIS, *Eleocharis palustris*.

SCIRRHE, *Scirrhus*.

SCIRRHOBLEPHARONCUS, see *Scleriasis*.

SCIRRHOCLE, *Orcheocle scirrhosa*.

SCIRRHOGAS'TRIA, *Scirrhus ventriculi*, (F.) *Squirrogastrie*; from *scirrhus*, and $\gamma\alpha\sigma\tau\eta\rho$, 'stomach.' Scirrhus of the stomach.

SCIRRHOID, *Scirrho'id*, *Scirrho'des*, from $\sigma\kappa\iota\rho\omicron\varsigma$, 'scirrhus,' and $\epsilon\iota\delta\omicron\varsigma$, 'resemblance.' Resembling scirrhus.

SCIRRHOMA, *Scirrhus*.

SCIRRHOPHTHAL'MIA, *Sclerophthal'mia*, from *scirrhus*, and $\phi\theta\alpha\lambda\mu\omicron\varsigma$, 'the eye.' *Cancer oculi*. Cancer of the eye.

SCIRRHOPHTHALMIA PALPEBRARUM, see *Scleriasis*.

SCIRRHOSARCA NEONATORUM, *Induration of the cellular tissue*.

SCIRRHOSIS, *Scirrhus*.

SCIRRHUS, *Scirrho'sus*, (F.) *Squirrheux*, from *scirrhus*. Of or belonging to scirrhus.

SCIRRHUS SARCO'MA OF AB'ERNETHY, *Empy'ma sarco'ma scirrho'sum*. Hard, rigid, vascular infarction of glandular follicles; indolent, insentient, glabrous; sometimes shrinking and becoming more indurated. Found in glandulous structures.

SCIRRIUS, *Scirhus*, *Squirrhus*, *Skirrhus*, *Scirrho'ma*, *Scirrho'sis*, *Cancer scirrho'sus*, *Carcino'ma simplex* seu *fibro'sum*, *Induratio maligna*, *Sclerus*, *Carcinom'atous sarco'ma*, *Hard or Fibrous cancer*; from $\sigma\kappa\iota\rho\omicron\varsigma$, 'hard,' 'indurated;' (F.) *Squirrhe*, *Squirre*, *Schirre*, *Skirre*, *Cancer dur* ou *squirrheux* ou *fibreux*. A disease, so called from the hardness that characterizes it. It is a state of induration, of a peculiar kind, affecting glandular structures generally, but capable of occurring in other textures. It usually precedes carcinoma, of which it may, indeed, be considered as the first stage. Scirrhus must not be confounded with the induration which succeeds inflammation, although the two states are often complicated, and may stand, occasionally, in the relation of cause and effect to each other. Scirrhus is ordinarily accompanied by violent shooting pains. It is also irregular on its surface;

and when cut into has a bluish or grayish white colour. When the surgeon is satisfied of the existence of scirrhus, he had better remove it at once. No other treatment seems to possess much advantage.

Galen uses the term *Scirrho'sis* for a livid excrescence caused by inflammation.

SCIRRHUS ET CARCINOMA VENTRICULI, see Gastrosthenosis cardiaca et pylorica—s. Hepatis, Hepatoscirrhos—s. Intestinorum, Enteropathia cancerosa—s. Palpebrarum, see Scleriosis—s. Testiculi, Sarcocoele—s. Uteri, Metroscirrhos—s. Ventriculi, Gastroscirrhus.

SCISSION, see Generation.

SCISSIPARITÉ, see Generation.

SCISSORS, *Scissor*, 'a carver,' from *scindere*, *scisum*, 'to cut.' *Forfec*, *Forpex*, *Psalis*, *Tomis*, (F.) *Ciseaux*. A well-known instrument in common use, and often employed in surgery. Scissors are composed of two cutting blades, crossing each other and moving upon an axis. They are straight or curved. Sometimes the curve is on the flat side, when they are called, in France, *Ciseaux à cuiller*; at others, on their edges. The scissors, bent so that the blades make an obtuse angle with the handles are also much used. They are called in France *Ciseaux coudés*. Scissors are used for dividing soft, loose, isolated parts, which it would be difficult to reach and to cut with the bistoury. They are employed, likewise, in the operation for harelip, and for removing warts, fungous excrescences, &c.

SCISSURA, Fissure—s. Vulvæ, see Rima.

SCISSURÆ, Rhagades.

SCISSURE DE GLASER, Fissure, glenoid—s. *Grand médiane du Cervelet*, Valley—s. *de Santorini*, Santorini, fissure of.

SKERLJEVO, Scherlievo.

SCLAREA, *Salvia sclarea*.

SCLEREMA, Induration of the cellular tissue.

SCLÉRÈME, Induration of the cellular tissue.

SCLEREMIA, Induration of the cellular tissue.

SCLERENCEPHALIA, *Induratio cer'ebr'i*,

from *σκληρος*, 'hard,' and *εγκεφαλον*, 'the brain.' (F.) *Endurcissement du cerveau*. Induration of the brain.

SCLERIA, Scleriosis.

SCLERIASIS, *Sclero'ma*, *Sclero'sis*, *Scler'ia*, *Sclerys'mus*, *Seph'irus*, from *σκληρος*, 'hard.' Any kind of hardness or induration. Sometimes hardness of the eyelids, *Callositas* seu *Scirrhophtalmia* seu *Scirrhus palpebrarum*, *Scirrhophtalaroncus*; at others, hardness of the genital organs of the female; probably synonymous with scirrhos.—Galen. Paulus. Hardness of bones, *Fragilitas Ossium*.

SCLERITIS, Sclerotitis.

SCLERODERMA, Induration of the cellular tissue.

SCLERODES, Sclerotic.

SCLERO-IRITIS, Inflammation of the sclerotic and iris.

SCLEROMA, Induration of the cellular tissue, Scleriosis.

SCLEROMENINX, Dura mater.

SCLERONYXIS, Scleroticonyxis.

SCLEROPHTHALMIA, Hordeolum, Scirrhophtalmia.

SCLEROS, Hard.

SCLEROSARCO'MA, from *σκληρος*, 'hard,' and *σαρκωμα*, 'a fleshy tumour.' A hard, fleshy tumour, seated on the gums, and resembling a cock's comb.

SCLEROSIS, Induration of the cellular tissue, Scleriosis.

SCLEROSTENOSIS CUTANEA, Induration of the cellular tissue.

SCLEROTIC, *Sclerotic'a*, from *σκληρος*, 'I harden.' *Cornea opa'ca*, *Sclero'des*, *Tunica dura* seu *albugin'ea* seu *du'rior* et *crass'ior* seu *ext'ima* seu *alba* seu *can'dida* seu *innomina'ta* *oculi*, *Sclero'tis*, (F.) *Sclérotique*. A hard, resisting, opaque membrane, of a pearly white colour and fibrous nature, which covers nearly the posterior four-fifths of the globe of the eye, and has the form of a sphere truncated before. It is strengthened by the expansion of the muscles of the eye, to which expansion many anatomists have given the name *Tunica albugin'ea*. It forms the white of the eye, *Albu'men* seu *Album oculi*, *Lon'chades*, *Log'ades*, *Loch'ades*, *Len'cades*. The sclerotic is penetrated posteriorly by a round opening, for the passage of the optic nerve; and, anteriorly, it has a much larger opening, into which the transparent cornea is received. There are, besides, many small oblong apertures in it for the passage of nerves and vessels, proceeding to the interior of the eye. Its inner surface is of a light brown colour, owing to a delicate areolar tissue containing brown pigment cells; and hence called *Membra'na* seu *Lam'ina fusca*. In the fœtus, the sclerotic may be separated into two very distinct laminae.

SCLEROTICA CERATOIDES, Cornea.

SCLEROTICITIS, Sclerotitis.

SCLEROTICONYX'IS, *Scleronyx'is*, *Sclerotomyx'is*, from *sclerotica*, and *νυξις*, 'puncturing.' Perforation of the sclerotica in the operation for cataract by depression.

SCLEROTICUS, Indurans.

SCLÉROTIQUE, Sclerotic.

SCLEROTIS, Sclerotic.

SCLEROTITIS, *Inflammat'io Sclerotic'æ*, *Leucit'is*, *Lonchadit'is*, *Logadit'is*, *Sclerit'is*, *Sclerocit'is*, *Rheumat'ic ophthal'mia*, *Ophthal'mia arthrit'ica*, from *sclerotica*, and *itis*, denoting inflammation. Inflammation of the sclerotic coat of the eye.

SCLEROTIUM CLAVUS, see Ergot.

SCLERUNTICUS, Indurans.

SCLERUS, Induration, Scirrhos.

SCLERYNTICUS, Indurans.

SCLERYS'MA, from *σκληρος*, 'hard.' Induration; also, induration of the liver.

SCLERYSMUS, Scleriosis.

SCLIRUS, Scirrhos.

SCLOPETA'RIOUS, from *sclopetum*, 'a gun.' Relating to a gun. Hence, *Aqua sclopetaria*, a water for gunshot wounds. *Vul'nera sclopetaria*, gunshot wounds, &c.

SCLOPETOPLAGÆ, Wounds, gunshot.

SCOBS, *Prisma*, *Xysma*, *Ramen'tum*, *Rasu'ra*. A shaving; also, an alkali; and the scoria of any metal.

SCENANTHUM, *Juncus odoratus*.

SCOLECESIS, Helminthiasis.

SCOLECIASIS, Helminthiasis.

SCOLEX, *Ascaris lumbricoides*.

SCOLIOMA, Scoliosis.

SCOLIO'SIS, *Scolio'ma*, *Skolio'sis*, *Rhachio-scolio'ma*, from *σκολιος*, 'crooked.' A distortion of the spine to one side. See Hump.

SCOLOPENDRA, *Asplenium scolopendrium*.

SCOLOPENDRIA, *Asplenium ceterach*, and *A. scolopendrium*.

SCOLOPENDRIUM LINGUA, *Asplenium scolopendrium*—s. *Officinatum*, *Asplenium scolopendrium*—s. *Phyllitis*, *Asplenium scolopendrium*—s. *Ruta muraria*, *Asplenium ruta muraria*—s. *Vulgare*, *Asplenium scolopendrium*.

SCOLOPOMACHÆ'RION, from *σκολοπαξ*, 'the woodcock,' and *μαχαίρα*, 'a knife;' so called because it is bent a little at the extremity like a woodcock's bill. A sort of blunt-pointed bistoury.—Scultetus.

SCOLYMUS SATIVUS, *Cynara scolymus*.
 SCOOP, Teut. Schoepe, *Cochlea'ræ*, (F.) *Curette*. A surgical instrument of the shape of a spoon, which is used for the extraction of certain foreign bodies. The scoop is often employed to extract balls impacted in the soft parts; to remove calculi from the urinary bladder in lithotomy, &c. A small scoop is sometimes used to extract foreign bodies from the meatus auditorius externus, nasal fossæ, &c.
 SCOP, Head, Scalp.
 SCOPA REGIA, Ruscus.
 SCOPARIUS, see *Spartium scoparium*.
 SCOPE, *σκηπη*, *Scopy*, *Scop'ia*, *Scopos*, from *σκοπεω*, 'I look around.' A common suffix to words meaning 'view, inspection,' as *cranioscropy*, *stethoscropy*, &c.
 SCOPOLINA ATROPOIDES, *Hyoscyamus scopolia*.
 SCOPTULA, *Scopula*.
 SCOPULA, Brush.
 SCOR, Excrement.
 SCORACRAT'IA, *Scoracra'sia*, *Seatacra'sia*, *Seatacrati'a*, *Copracra'ti'a*, *Copracra'sia*, *Incontinent'ia Alvi*, from *σκαρ*, 'excrement,' and *ακρατια*, 'want of control.' Want of power to retain the fæces. Involuntary evacuation of the fæces.
 SCORBUT, *Porphyra nautica*, *Purpura hæmorrhagica*—*s. des Alpes*, *Pellagra*—*s. de Terre*, *Purpura hæmorrhagica*.
 SCORBUTIC, *Scorb'uticus*, (F.) *Scorb'utique*, From *scorbutus*, 'scurvy.' That which belongs to scurvy. One affected with scurvy.
 SCORBUTUS, *Purpura*—*s. Alpinus*, *Pellagra*—*s. Nauticus*, *Porphyra nautica*—*s. Oris*, *Cancer aquaticus*.
 SCORDINEMA, *Carebaria*, *Pandiculation*.
 SCORDINISMUS, *Carebaria*, *Pandiculation*.
 SCORDIUM, *Teucrium scordium*.
 SCORDON, *Allium*.
 SCORDOSMINE, *Oxyd*, *cystic*.
 SCORITH, *Sulphur*.
 SCORIUM, *Scrotum*.
 SCORODON, *Allium*.
 SCORPIODEX'IS, from *σκορπιος*, 'the scorpion,' and *δελξίς*, 'bite.'—more properly, *SCORPIOSTIG'MA*; from *σκορπιος*, and *στιγμα*, 'puncture.' The sting of the scorpion.
 SCOR'PION, *Scor'pio*, *Scorpius*, from *σκορπιος*, 'I enrage.' A genus of insects having a sting at the extremity of their tail, with which they make dangerous wounds. An *Oil of Scorpion* was once made from them, which is not now used.
 SCORPIOSTIG'MA, *Scorpiodexis*.
 SCORPIUS, *Scorpion*.
 SCORTUM, *Scrotum*.
 SCORZONE'RA, *S. hu'milis* seu *lan'ta* seu *nerv'o'sa*, *Escorzone'ra*, from *scurzo*, old Spanish for a viper, *Vipera'ria*, *Serpenta'ria Hispan'ica*, *Offic'inal viper's grass*, *Viper's grass*, *Goat's grass*. *Family*, *Cichoracææ*. *Sex. Syst.* *Syngenesia Polygamia*. The roots have been used as alexipharmics, and in hypochondriacal disorders and obstructions of the viscera. The root of the *Scorzonera Hispan'ica* is esculent, but inefficacious as a drug.
 SCOTAS'MA, *Scoto'ma*, *Scoto'dia*, *Scoto'sis*, *Scotos*; from *σκαρος*, 'darkness.' Obscurity of vision, darkness, *Suffu'sio ra'dians*. Also *Scotodinia*.
 SCOTCH FIDDLE, *Psora*.
 SCOTODIA, *Scotasma*, *Scotodinia*.
 SCOTODIN'IA, *Scoto'ma*, *Dinus Scoto'ma*, *Scotodi'në*, *Tenebrio'sa verti'go*, *Scotos*, *Scotas'ma*, *Scoto'sis*, *Scot'omy*, from *σκαρος*, 'darkness,' and *δύω*, 'I turn round.' Giddiness, with impaired sight, often succeeded by headach. See *Vertigo*.
 SCOTOMA, *Scotasma*, *Scotodinia*.
 SCOTOMY, *Scotodinia*.

SCOTOS, *Scotasma*, *Scotodinia*.
 SCOTOSIS, *Scotodinia*.
 SCOTT'S ACID BATH, *Nitro-muriatic acid bath*. A bath of dilute aqua regia, employed by Dr. Scott, of India, as a remedy in hepatic diseases. Three pints by measure of muriatic acid, and two of nitric acid, are mixed to form the aqua regia. In preparing this for use, a pint of it is mixed with an equal quantity of water. The acid bath consists of three ounces of this dilute acid to every gallon of water.
 SCOUR, *Diarrhoea*.
 SCOURING, *Diarrhoea*.
 SCRAT, *Hermaphrodite*, *Psora*.
 SCRATCH, *Psora*.
 SREATUS, *Excretion*.
 SCRIPLUM, *Seruple*.
 SCRIPTIUM, *Seruple*.
 SCRIPTULUM, *Seruple*.
 SCRIPULUM, *Seruple*.
 SCRIPULUS, *Seruple*.
 SCRIVENER'S CRAMP, *Cramp*, *writers'*.
 SCROBIC'ULUS, *Scrobic'ulum*, (F.) *Fossette*. A little ditch or furrow; diminutive of *scrobs*, 'a ditch.'
 SCROBIC'ULUS CORDIS, *Anticar'dium*, *Procar'dium*, (F.) *Fossette du cœur*, *Avant-cœur*, *Anticœur*. The pit of the stomach. The depression at the anterior part of the abdomen, below the xiphoid cartilage.
 SCROBICULUS VARIOLÆ, *Pockmark*.
 SCROFFLE, *Scrofula*.
 SCROF'ULA, *Scroph'ula*, *Scroph'ulæ*; from *scrofa*, 'a sow;' as *Chæras* is from *χοιρος*, 'a hog,' because swine were presumed to be subject to a similar complaint. *Scrophulo'sis*, *Morbus scrophulo'sus*, *Vit'ium scrophulo'sum*, *Cacochym'ia seu Cachex'ia* seu *Dyscras'ia scrophulo'sa*, *Pæda troph'ia glandulo'sa*, *Struma*, *Chæras*, *Coiras*, *Tabes Glandulæ'ris*, *Adeno'sis scrofulo'sa*, *Seroffæ*, *King's evil*, *The Evil*, *Quince*, *Cruels* (*Scotticë*), (F.) *Scrophules*, *Scrofules*, *Strumes*, *Ecrovelles*, *Humeurs froides*, *Tubercules des glandes lymphatiques*, *Mal du Roi*. A state of the system characterized by indolent, glandular tumours, chiefly in the neck; suppurating slowly and imperfectly, and healing with difficulty; the disease ordinarily occurring in those of a sanguine temperament, with thick upper lip, &c. The tumours, after suppuration, degenerate into ulcers; which, in process of time, cicatrize, leaving scars. The internal organs are apt to be attacked in those disposed to scrofula; hence they are often the subjects of phthisis and mesenteric affections. *Scrofula* is hereditary; and is frequently excited by insufficient or improper regimen, and by a close, confined air during the first years of existence. The best treatment is:—to strengthen the system by animal diet; pure air, and exercise, cold bathing, or sea-water bathing, &c.
 SCROFULA ABDOMINALIS INTERNA, *Physconia strumosa*.
 SCROFULAIRE, *Scrophularia nodosa*—*s. Aquatique*, *Scrophularia aquatica*.
 SCROFULARIA, *Scrophularia*.
 SCROFULES, *Scrofula*.
 SCROFULEUX, *Scrofulous*.
 SCROF'ULOUS, *Scrophulo'sus*, *Scrophula'rius*, *Strumous*, *Strumo'sus*, (F.) *Scrofuloux*, *Strumeux*. Suffering from, or relating to, *scrofula*.
 SCROOBY-GRASS, *Cochlearia officinalis*.
 SCROOF, *Scarf*.
 SCROOP-LEGGED, *Cnemosclosis*.
 SCROPHULA, *Scrofula*—*s. Mesenterica*, *Tabes mesenterica*—*s. Moleucana*, *Framboesia*.
 SCROPHULÆ, *Scrofula*—*s. Gonorrhœicæ*, *Gonorrhœa impura*.

SCROPHULARIA, from *scrofula*, against which it has been employed. S. Nodosa.

SCROPHULARIA AQUATICA, *Betonica aquatica*, *Ficaria*, *Ferraria*, *Castrangula*, *Greater Water Figoort*, *Water Bet'ony*, (F.) *Scrofulaire aquatique*. Ord. Scrophulariaceæ. The leaves are celebrated as correctors of the bad flavour of senna. They were at one time regarded as eminently antiscrofulous, stomachic, and carminative.

SCROPHULARIA FETIDA, *Scrophularia nodosa* — s. *Lanceolata*, S. *Nodosa* — s. *Marilandica*, S. *Nodosa* — s. *Minor*, *Ranunculus ficaria*.

SCROPHULARIA NODOSA, S. *fœtida* seu *vulgaris* seu *lancoleta* seu *Marilandica*, *Millemorbis*, *Scrophularia*, *Figoort*, *Kennelwoort*, *Holmesweed*, *Heal-all*, (F.) *Scrofulaire*, *Herbe aux écrouelles*. The root and leaves of this plant have been celebrated, both as an internal and external remedy, against inflammations, piles, scrofulous tumours, ulcers, &c.

SCROPHULARIA VULGARIS, *Scrophularia nodosa*. SCROPHULARIUS, Scrofulous.

SCROPHULES, Scrofula — s. *Mésentériques*, *Tabes mesenterica*.

SCROPHULOSIS, Scrofula.

SCROPHULOSUS, Scrofulous.

SCROTAL, *Scrotalis*; from *scrotum*. Relating to the scrotum, — as *Hernia scrotalis*, scrotal hernia.

SCROTAL NERVE, see Genito-crural Nerve.

SCROTOCELE, Oscheocele, Oschocele. A hybrid term; from (L.) *scrotum*, and *κηλη*, 'a tumour.' *Hernia Scrotalis*, *Scrotal hernia*. Inguinal hernia, descending into the scrotum.

SCROTUM, from *scorteus*, *scortium*, 'made of leather' [?]. *Scorium*, *Oschē*, *Os'cheus*, *Os'chus*, *Oscus*, *Os'cheon*, *Och'eus*, *Perin*, *Scortum*, *Marsul'pus*, *Burs'ula*, *Bursa testium* seu *viril'is*, *Cap'ulus* [?], *Orchas*, *Follic'ulus genit'alis*, *Her'nia*, *the Purse*, *the Cod*, (F.) *Les bourses*. The integuments which cover the testes. These are nothing more than a prolongation of the skin of the inner part of the thighs, perinæum, and penis. The skin is remarkable for its brown colour, for the numerous rugæ, especially when the scrotum is contracted; for the great number of sebaceous follicles it contains; and for the long and few hairs which issue from it in the adult. The scrotum is divided into two equal parts by a raphe, which extends from the anus to the root of the penis. Its organization is similar to that of the skin of other parts of the body, except that the orhorion is thinner.

SCROTUM CORDIS, Pericardium — s. *Pendulum*, *Rhachosis*.

SCRUBIE, *Purpura nautica*.

SCRUBIE-GRASS, *Cochlearia officinalis*.

SCRUPLE, *Diob'olon*, *Gramma'rium*, *Scrup'ulus*, *Serup'ulum*, *Script'ulus*, *Script'ulum*, *Script'ulum*, *Script'ulum*, *Script'ulum*, *Script'ulum*. A weight of twenty grains, Troy; twenty-four grains, Poids de marc.

SCUDAMORE'S MIXTURE, see Mixture, Scudamore's.

SCULL, Cranium — s. *Cap*, *Calvaria*.

SCURF, Sax. *scurf*, Teut. *Schorft*; (Prov.) *Seroof*, *Furfura*. Small exfoliations of the cuticle are so called.

SCURFY, Furfuraceous.

SCURVY OF THE ALPS, *Pellagra* — s. *Land*, *Purpura hæmorrhagica* — s. *Petechial*, *Purpura simplex* — s. *Sea*, *Porphyra nautica*.

SCURVY GRASS, *Sisyrinchium Bermudianum* — s. *Grass*, common, *Cochlearia officinalis* — s. *Grass*, lemon, *Cochlearia officinalis* — s. *Grass*, wild, *Cochlearia coronopus*.

SCUTELLA, Cup.

SCUTELLARIA CAROLINIANA, S. *integrifolia*.

SCUTELLARIA GALERICULA'TA, from *scutella*, 'a cup,' in allusion to the form of the calyx. *Cass'ida galericula'ta*, *Tertiaria'ria*, *Skull-cap*, (F.) *Casside bleue*, *Toque*. Ord. Labiatae. *Sev. Syst.* *Didynamia Angiosperma*. This plant has a bitter taste and a garlic smell. It has been esteemed especially serviceable in tertian ague.

SCUTELLARIA HYSSOPIFOLIA, S. *integrifolia*.

SCUTELLARIA INTEGRIFOLIA, S. *hyssopifolia* seu *Caroliniana*, — another indigenous variety, — is an intense bitter.

SCUTELLARIA LATERIFLORA, *Skull-cap*, *Mad-dog skullcap*, *Madweed*, *Hoodwort*, *Blue Pimp'ernel*. An indigenous plant, which grows in all parts of the United States in moist places. It was at one time esteemed a preventive of hydrophobia, but is probably possessed of little virtue of any kind. By some, however, it is regarded as a good nervine.

SCUTICULA DIGITORUM MANÛS, Phalanges of the fingers.

SCUTTER, Diarrhœa.

SCUTULE DIGITORUM MANÛS, Phalanges of the fingers.

SCUTUM, Thyroid cartilage — s. *Cordis*, *Scapula*, *Sternum* — s. *Genu*, *Patella* — s. *Pectoris*, *Sternum*, *Thorax*.

SCUTUM STOMACH'ICUM. A large plaster, applied to the breast or stomach.

SCUTUM THORACIS, Scapula.

SCYB'ALA, plural of *σκυβαλον*, 'dung.' *Enterol'ithus Scyb'ulum*, *Excrementa Alvi sicco'ra*, *Fæces indurata*. Hard fecal matters discharged in round lumps.

SCYLLA, Scilla.

SCYPHOPHORUS PYXIDATUS, Lichen pyxidatus.

SCYPHUS AUDITORIUS, Infundibulum of the cochlea — s. *Cerebri*, Infundibulum of the brain — s. *Viousseni*, Infundibulum of the cochlea

SCYRUS, Callosity.

SCYTALIDES DIGITORUM MANÛS, Phalanges of the fingers.

SCYTHICA, (RADIX.) Glycyrrhiza.

SCYTHROPASMUS, from *σκυθος*, 'gloomy;' *σκυθροπαζειν*, 'to look gloomy;' *Vultus tet'ricus et mœstus*. A gloomy, depressed countenance, of bad augury in serious diseases

SCYTITIS, Cytitis.

SCYTODEPSIUM, Tannin.

SEA AIR. The air in the neighbourhood of the sea contains saline particles commingled with it, which render it a valuable change for scrofulous and debilitated individuals. The sea and sea-coast are usually, also, more equable in their temperature than places inland.

SEA SICKNESS, *Nausea marina*.

SEA-WARE, see *Pila marina* — s. *Water*, see *Water*, sea.

SEAL, GOLDEN, *Hydrastis Canadensis* — s. *Solomon's*, *Convallaria polyconatum* — s. *Solomon's*, great, *Convallaria canaliculata* — s. *Solomon's*, smaller, *Convallaria pubescens*.

SEAM, Cicatrix.

SEARCHER, Body searcher.

SEARCHING, *Sounding*; from (F.) *chercher*, 'to seek.' The operation of ascertaining, by the introduction of a metallic instrument, whether there is a stone in the bladder.

SEASONING, Acclimation — s. *Fever*, *Fever*, *stranger's*.

SEAT, Anus — s. *Bone*, *Ischion*.

SÉBACÉ, Sebaceous.

SEBA'CEOUS, *Sebaceous*, (F.) *Sébocé*; from *sebum*, 'suet.' That which has the nature of suet.

SEBACEOUS FLUX, Stearrhœa.

SEBACEOUS, SEBIP'AROUS or SEBIF'EROUS GLANDS, *Sebaceous Follicles* or *Crypts*, *Folliculi sebacei*, *Cryptæ sebaceæ*, Oil or *Miliary glands*, are small hollow organs, of a rounded or pyriform shape, seated in the substance of the skin, and opening on its surface by a small, excretory duct; furnishing a yellow, unctuous humour, *Smegma cutaneum*, *Sebum cutaneum*, having some analogy with suct, which is destined to lubricate the surface of the body. Follicles of a similar nature exist around the corona glandis of the male, and under the skin of the labia majora and nymphæ of the female. They secrete a sebaceous matter, which emits a peculiar odour; and hence, after the name of those who described them, have been called *Glandulæ odoriferæ Tysoni*, *G. Tysoni*, *Glandulæ Littriana* seu *Littrii*, *Tyson's glands*, (F.) *Glandes de Littræ*; and, also, *Glandulæ odoriferæ* seu *sebaceæ glandis*, *G. coronæ penis*, *Folliculi sebacei coronæ glandis*, *Glandulæ odoriferæ præputii*.

SEBASTOMA'NIA, from *σεβαστος*, 'worshipped,' and *mania*. Religious insanity, Demonomania.

SEBESTE'NA, *Cordia myxa* seu *sebeste'na* seu *Africa'na* seu *domes'tica* seu *obli'qua*, *Sebeste'na officinalis*, *Seb'esten*, *Sebsten*, *Myxa*, *Cornus sanguinea*, *Prunus sebestina*, *Smooth-leaved Cordia*, *Assyrian plum*, (F.) *Sebestier myxa*. Ord. Cordiaceæ. The dark, black fruit of the *Sebestina* possesses glutinous and aperient qualities, and is exhibited, in decoction, in various diseases of the chest.

SEBESTIER MYXA, *Sebestena*.

SEBIFEROUS, see Sebaceous.

SEBIPAROUS, see Sebaceous.

SEBORRHAGIA, Stearrhœa.

SEBORRHŒA, Stearrhœa.

SEBSTEN, *Sebestina*.

SEBUM, *Pinguedo*, *Sevum*—s. *Cutaneum*, see Sebaceous glands—s. *Palpebrale*, *Chassie*—s. *Præputiale*, *Smegma præputii*.

SECA'LE, *S. cereale* seu *barbatum*. The Rye plant. (F.) *Seigle*. Ord. Gramineæ. Rye is chiefly used as an article of diet, particularly in the northern parts of Europe, where a spirit is also extracted from it. The grain is disposed to acescency: and hence its internal use at first generally produces a laxative effect.

SECALE BARBATUM, *Secale*—s. *Cornutum*, *Ergot*—s. *Luxurians*, *Ergot*—s. *Maternum turgidum* seu *temulentum*, *Ergot*.

SÉCALIS MATER, *Ergot*.

SÉCATEUR DES AMYGDALES, *Amygdalotome*.

SECCERNENT, *Secreting*.

SECCERNING, *Secreting*—s. Substance of the kidney, see *Kidney*.

SECESSIO FÆCUM, *Defecation*.

SECESSUS NIGER, *Melæna*.

SËCHE, *Sepia*.

SECLUSORIUM, *Sac*.

SEC'ONDARY, from *secundus*, 'the second.' Something that acts subordinately to another; as the *secondary symptoms* of a disease; that is, those which supervene on the *primary*. A *secondary amputation* is one performed after the constitutional effects of an injury have mainly passed away. See *Fever*, *secondary*; and *Hæmorrhagia*, for *Secondary Hemorrhage*.

SECONDINES, *Secundines*.

SECRETA. Same etymon as *Secretion*. Things or matters secreted or separated from the blood.

SECRE'TING, *Secreto'rius*, *Secer'ning*, *Secern'ent*, *Excer'nent*, (F.) *Sécréteur*, *Sécrétoire*. Same etymon as *Secretion*. That which secretes, — as a *secreting organ*.

SECRETIO, *Secretion*—s. *Lactis*, *Galactosis*—s. *Lotii*, *Uropoësis*—s. *Urinæ*, *Uropoësis*—s. *Vicaria*, see *Vicarious*.

SECRET'ION, *Secre'tio*, *Apoc'risis*; from *seceruere*, *secretum*, 'to separate.' An organic function, which is chiefly executed in the glands, and consists in an elaboration or separation of the materials of the blood, at the very extremities of the arterial system, or rather of the vascular secretory system; and which differs in each organ according to its particular structure; hence the formation of different fluids;—bile, saliva, urine, milk, &c. The secretions are of three kinds:—*exhalant*, *follicular*, and *glandular*. Simple secretions are those which exist ready-formed in the blood, and pass out of the vessels by an act of exosmosis, whilst the more complicated are formed from the liquor sanguinis by cell-agency. The latter, alone, are, by some, called *Secretions*.

SÉCRÉTOIRE, *Secreting*.

SECRETORIUS, *Secreting*.

SECT, *METHODICAL*, *Methodists*.

SEC'TIO, *Section*. The act of cutting. A *division*.

SECTIO ALTA, see *Lithotomy*—s. *Anatomica*, *Dissection*—s. *Cadaveris*, *Autopsia cadaverica*—s. *Cadaveris legalis*, *Autopsia cadaverica*—s. *Cæsarea*, *Cæsarean section*—s. *Franconiana*, see *Lithotomy*—s. *Hypogastrica*, see *Lithotomy*—s. *Lateralis*, see *Lithotomy*—s. *Legalis*, *Autopsia cadaverica legalis*—s. *Mariana*, see *Lithotomy*—s. *Nympharum*, *Nymphotomy*—s. *Perinæalis*, *Perineal section*—s. *Rectovesicalis*, see *Lithotomy*—s. *Renalis*, *Nephrotomy*—s. *Tendinum*, *Tenotomy*—s. *Vagino-vesicalis*, *Colpocystotomia*—s. *Vesicalis*, *Lithotomy*.

SECTION, *Sectio*—s. *Sigaultian*, *Symphysotomy*.

SECUNDÆ, *Secundines*.

SECUNDINÆ, *Secundines*.

SEC'UNDINES, *Hystera*, *Deuter'ion*, *Metra*, *Secun'dæ*, *Secundinæ*, *After-birth*, (F.) *Arrière-faix*, *Secundines*, *Déliore*, from *secundare*, (*secundus*, 'second,') 'to follow.' All that remains in the uterus after the birth of the child, —viz., the placenta, a portion of the umbilical cord, and the membranes of the ovum. These are commonly not expelled till some time after the birth of the fetus; hence their name. See *Délivrance*.

SECUNDUS PROPRIORUM AURICULÆ, *Retrahens auris*.

SEDANTIA, *Sedatives*.

SED'ATIVES, *Sedati'va*, *Pauon'ta*, *Sedan'tia*, *Adec'ta*, *Catastalt'ica*, *Deprimen'tia*, (F.) *Sédatifs*, *Calmants*, *Tempérants*, from *sedare*, *sedatum*, 'to settle or assuage.' Medicines which directly depress the vital forces, and which are consequently employed whenever it is necessary to diminish preternaturally increased action. The chief reputed sedatives are: *Acidum Hydrocyanicum*, *Acidum Hydro-sulphuricum*, *Tabacum*, *Missio Sanguinis*, and certain gases by inhalation, as *azote*, *carbonic acid* [?], *carburetted and sulphuretted hydrogen*.

SEDEM ATTOLLENS, *Levator ani*.

SEDES, *Anus*, *Excrement*—s. *Cruentæ*, *Dysentery*, *Hæmatochezia*—s. *Lactescentes*, *Cœliac flux*—s. *Procidua*, *Proctocele*.

SEDHEE, *Bangue*.

SED'IMENT, *Sedimen'tum*, *Lemma*, *Residen'tia*. Same etymon. (F.) *Dépôt*. A deposit formed by the precipitation of some one or more of the substances held in solution or suspension by a liquid. That which is formed in urine, at the time of cooling, has been called *Hypostasis*, *Hypostema*, *Residentia*, *Subsidentia*, (F.) *Dépôt de l'urine*. This sediment or deposit varies in different states of the system. In calculous affec-

tions, it is one of the most important objects of attention.

SEDIMENTUM, Sediment — s. Urinæ lateri-
cium, see Lateritious — s. Urinæ pityroides, see
Furfuraceous.

SEDITIA, Nates.

SEIDLITZ, MINERAL WATERS OF, *Seid-
litz water*. Springs in Bohemia, near Prague,
which are simple salines. They contain sulphate
and carbonate of magnesia, chiefly chloride of
magnesium, sulphates of potassa, soda, and lime,
carbonic acid and carbonate of lime. They are
employed as purgatives in a multitude of diseases.

ARTIFICIAL SEIDLITZ POWDERS, in no respect,
however, resembling the natural ingredients, are
formed of *Sodæ et Potassæ tartras* ʒij, *Sodæ car-
bon.* ʒij, in one paper; *Acid tartaric.* gr. xxxv,
in another. For half a pint of water.

SÉDON BRÛLANT, Sedum — s. *Reprise*,
Sedum telephium.

SEDUM, *S. acrè* seu *glaciâlè* seu *minus* seu
vermicula'rè, from *sedeo*, 'I sit,' owing to its at-
tachment to rocks and walls. *Illec'ebra*, *Hel-
lec'ebra*, *Illec'ebrium*, *Vermicula'rè*, *Vermicula'-
ris*, *Piper nura'lè*, *Sempervivum acrè*, *Aci'chry-
son*, *Æo'nion*, *Wall pepper*, *Jack of the But'tery*,
Pricket, *Bird's bread*, *Stone crop*, *Biting Stone
crop*, *Small Houseleek*, (F.) *Joubarbe acre*, *Orpin
brûlant*, *Vermiculaire brûlante*, *Sédon brûlant*.
*Ord. Crassulaceæ. Ser. Syst. Decandria Penta-
gynia.* In its recent state it is very acrid, and
proves both emetic and cathartic. Externally,
in the form of cataplasm, it produces vesications
and erosions. It has been recommended in can-
cerous and malignant ulcers.

SEDUM, *Saxifraga granulata* — s. *Glaciale*, *Sedum*
— s. *Majus*, *Sempervivum tectorum* — s. *Minus*,
Sedum.

SEDUM TELEPHIUM, *S. telephoïdes*, *Faba crassa*,
Cras'sula, *C. Major*, *Illec'ebra major*, *Tele'phium*,
Faba'ria cras'sula, *Faba crassa*, *Anacamp'seros*,
A. albicans seu *triphyll'a* seu *vulga'ris*, *Orpine*,
(F.) *Sédon reprise*, *Grand orpin*, *Fève épaisse*,
Joubarbe des vignes, &c. Formerly used as a
cataplasm in cuts, hemorrhoids, corns, whitlows,
&c.

SEDUM TELEPHOÏDES, *S. Telephium* — s. *Vermi-
culaire*, *Sedum*.

SEED, Sperm.

SEGMENTA CARTILAGINEA, see Trachea.

SEGMENTA'TION, *Segmenta'tio*, from Lat.
segmentum, 'a segment,' itself from *seco*, 'to cut.'
The act of being divided into segments or por-
tions. (F.) *Segmentation*, *Fractionnement*, *Sillon-
nement*. A term applied to the division of the
vitellus or yolk into 'segments,' each containing
a transparent vesicle, which may be a descendant
of the primordial or germ cell.

SEGNIT'IA, *Segnit'ies*, from *segnis*, 'slug-
gish.' Sluggishness or torpor in the exercise of
a function: — as *SEGNITIES ALVI*, Torpor of the
bowels; *SEGNITIES VIRUM*, Languor.

SEGNITIES, Segnitia.

SEGRAY, MINERAL WATERS OF. Near
Pithiviers, in Gâtinais, in the French department
of Loiret, there is a chalybeate spring, which has
some reputation.

SEGU, Sago.

SEIDLITZ, Sedlitz.

SEIDSCHÛTZ, SEYDSCHÛTZ or SAID-
SCHÛTZ, MINERAL WATERS OF. Bitter
springs, in the neighbourhood of those of Püllna
and Sedlitz, in Bohemia, which contain chiefly
sulphate, nitrate, muriate, and carbonate of
magnesia, sulphates of potassa, soda, and lime;
carbonate of lime, iron and manganese. The
water is an excellent cathartic, and is well known
in Europe.

SEIGLE, Secale — s. *Cornu*, Ergot — s. *Cor-
rompu*, Ergot — s. *à Éperon*, Ergot — s. *Ergotée*,
Ergot — s. *Ergotisé*, Ergot — s. *Faux*, Ergot.

SEIN, Uterus, see Mamma.

SEIRIASIS, *Comp de Soleil*.

SEIZURES, HIDDEN, see Hidden seizures.

SEKISKAYAVODKA, see Spirit.

SEL, Salt — s. *Admirable de Lémery*, *Magnesia
sulphas* — s. *Admirable perlé*, Soda, phosphate of
— s. *Ammoniac*, *Ammonia murias* — s. *Arméniac*,
Ammonia murias — s. *Arsenical de Mucquer*, Ar-
seniate of protoxide of potassium — s. *de Cuisine*,
Soda, muriate of — s. *de Déroisie*, *Narcotine* — s.
d'Égra, *Magnesia sulphas* — s. *de Lait*, Sugar of
Milk — s. *Marin*, Soda, muriate of — s. *d'Opium*,
Narcotine — s. *d'Oseille* *Potassæ oxalæ* — s. *de
Saturne*, *Plumbi superacetæ* — s. *de Verre*, see
Vitrum — s. *Volatil d'Angleterre*, *Ammonia car-
bonas*.

SELAGO, *Camphorosma Monspelica*, *Lycopodium
selago*.

SELENE, Moon, see Nail.

SELENTIASIS, Somnambulism.

SELENTIASMUS, Somnambulism.

SELENOBLETUS, Lunatic.

SELENOGAMIA, Somnambulism.

SELERY, Apium graveolens.

SELF-ABUSE Masturbation.

SELF-HEAL, Prunella.

SELF-LIMITED. An epithet applied to dis-
eases which appear to run a definite course, but
little modified by treatment, — small-pox, for
example.

SELF-POLLUTION, Masturbation.

SELI'BRA, *Semili'bra*, *Sembella*, 'half a
pound.' Six ounces, Troy; eight Avoirdupois.

SELINI'TES, *σελινιτης*. Wine impregnated
with the seeds of the *σελινον* or *smallage*. — *Dios-
corides*.

SELINUM ANGELICA, *Angelica Sylvestris*
— s. *Galbanum*, *Bubon galbanum* — s. *Impera-
toria*, *Imperatoria* — s. *Lactescens*, *Peucedanum
palustre* — s. *Marsh*, *Peucedanum palustre* — s.
Opoponax, *Pastinaca opoponax* — s. *Oroselinum*,
Athamanta aureoselinum — s. *Ostruthium*, *Impera-
toria* — s. *Palustre*, *Peucedanum palustre* — s.
Pastinaca, *Pastinaca sativa* — s. *Peucedanum*, *Peu-
cedanum* — s. *Pubescens*, *Angelica sylvestris* — s.
Sylvestre, *Angelica sylvestris*, *Peucedanum palus-
tre* — s. *Thysselinum*, *Peucedanum palustre*.

SELLA, *S. Turcica* — s. *Equina*, *S. Turcica* —
s. *Familiarica*, *Lasanum* — s. *Obstetricia*, *Diphrys*
— s. *Sphenoidalis*, *S. Turcica*.

SELLA TURCICA, *Ephipp'ium*, *Fossa Pituita-
ria*, *Sella*, *S. equina* seu *sphenoidalis*, *Pituitary
fossa*, *Turkish Saddle*, (F.) *Selle Turcique* ou
du Turc. A depression at the upper surface of
the sphenoid bone, which is bounded, anteriorly
and posteriorly, by the clinoid processes, and
lodges the pituitary gland. It is so called from
its resemblance to a *Turkish saddle*. The broad
rough plate, behind, and somewhat overhanging
the *Sella Turcica* is the *Dorsum Ephippii*.

SELLA TURCICA, Pituitaria fossa.

SELLE TURCIQUE, *Sella Turcica* — s. *du
Turc*, *Sella Turcica*.

SELS NEUTRES, Neutral salts.

SELTZ or SELTZER, MINERAL WATERS
OF. Cold, acidulous springs, the source of which
is at Seltz, nine leagues from Strasburg, and in
the Department of the Bas-Rhin. They contain
carbonates of lime, magnesia, and soda, chloride
of sodium, and much carbonic acid. They are
refrigerant, tonic, diuretic, and aperient.

ARTIFICIAL SELTZER WATER may be made
from *muriat. acid.* gr. xxxv, *water* Oj, *white mar-
ble* gr. ij. Stop up till dissolved. Add *carbonate
of Magnesia*, gr. v, and, after some time, *subcar-
bonate of soda*, gr. xxxij. Close it till used.

SEMBELLA, Selibra.

SEMECARPUS ANACARDIUM, Avicennia tomentosa.

SEMEIOGRAPHY, *Semeiograph'ia*, *Semiography*, *Semiograph'ia*, *Symptomatology*, from *σμεῖον*, 'a symptom,' and *γραφία*, 'a description.' A description of symptoms or signs of disease.

SEMEIOLOGY, *Semeiologicē*, *Semiology*, *Semioticē*, *Phænomenolog'ia*, from *σμεῖον*, 'a symptom,' and *λόγος*, 'a discourse.' (F.) *Séméiotique*. The branch of pathology whose object is the doctrine of the symptoms or signs of disease.

SEMEION, Sign—s. Boethematicum, Indication.

SEMEIOSIS, *Semeiology*.

SÉMÉIOTIQUE, *Semeiology*.

SEMEN, Sperm—s. Badian, *Illicium anisatum*—s. Cinæ, see *Artemisia santonica*—s. Contra, see *Artemisia santonica*—s. *Contra d'Alep*, *Artemisia santonica*—s. Contra vermes, *Artemisia santonica*—s. Masculinum seu virile seu genitale, Sperm—s. Muliebres, Sperm (of the female)—s. Sanctum, see *Artemisia santonica*—s. Santonici, see *Artemisia santonica*—s. Zedoariæ, see *Artemisia santonica*.

SEMENCE, Sperm.

SEMENTINA, *Artemisia santonica*.

SEMI, from *ἡμιον*, 'half.' *Semi* or *semi*, in composition, universally signifies 'half;' both in French and English.

SEMIANIMIS, *Semimor'tuus*, *Sem'inex*, *Semiviv'vus*; from *semi*, 'half,' and *animus*, 'soul.' Half-living. Half-dead.

SEMI-BULB OF THE FEMALE, *Bulbus vestibuli*.

SEMICANALICULUS, *Suleus*.

SEMICANALIS, *Sulcus*.

SEMICEPHALUS, *Hemiecephalus*.

SEMICIRCULI OSSEI, *Semicircular canals*.

SEMICIRCULAR, *Semicircula'ris*. From *semi*, and *circulus*, 'a circle.' (F.) *Demicirculaire*. That which represents the half of a circle.

SEMICIRCULAR CANALS, *Canal'es seu Ductus semicircula'ris seu tubaform'es seu circula'ris*, *Semicirculi ossei*, *Funes seu Canaliculi semiannula'ris labyrinthi*, (F.) *Canaux demicirculaires*. are seated in the pars petrosa of the temporal bone, and open into the vestibule, behind which they are situate. They are three in number, of which one is superior or vertical, *canalis semicircula'ris verticalis superior*; another posterior or oblique, *canalis semicircula'ris verticalis posterior*, and the third exterior or horizontal, *canalis semicircula'ris horizontalis*. Their parietes are formed of a bony, compact, hard plate. Their uses in audition are not known: at their termination they have the elliptical arrangements called *ampullæ*; and by both extremities they open into the vestibule, in the sac at its superior part—the *Sacculus Ellipticus*, *Alveus seu Utriculus* seu *Sinus communis*, *Sinus seu Alveus utriculosus*, *Sacculus vestibuli* or *Median sinus*, *Utriculus*. In front of the S. ellipticus, nearer the cochlea, and opposite the foramen ovale, is the *Sacculus sphaericus*, or *Sacculus*.

SEMICIRCULUS EXSCULPTUS, *Hiatus diaphragmatis aorticus*.

SEMICONGIUS. Half a gallon, or four pints.

SEMICUBIUM, *Semicupium*, *Inses'sio*, *Inces'sio*, *Eucathis'ma*, *Excathis'ma*, (F.) *Demibain*, from *semi*, and *cubare*, 'to lie down.' A half-bath, or such as receives only the hips or extremities.

SEMICUPIUM. Bath, half, Semi-cubium.

SEMI-FIBULÆUS, *Peronæus brevis*.

SEMI-INTEROSSEUS INDICIS, *Abductor indicis*.

SEMI-INTEROSSEUS POLLICIS, *Opponens pollicis*.

SEMILIBRA, *Selibra*.

SEMILLA DEL GUACHARO. Various kinds of hard and dry fruits, found in the stomachs of the young Guacharoes, a sort of nocturnal bird. The fruits are a celebrated South American remedy in Ague.

SEMILUNAR, *Semiluna'ris*, (F.) *Demilunaire* ou *Semilunaire*, from *semi*, and *luna*, 'the moon.' Having the shape of a half-moon.

SEMILUNAR CARTILAGES, *Semilunar fibrocartilages*, *Sigmoid cartilages*, *Cartilag'ines sigmoideæ* seu *semiluna'ris*, are two fibro-cartilages, which exist between the condyles of the os femoris and the articular surfaces of the tibia. The innermost, which is longer from before to behind than transversely, is nearly semicircular. The outermost forms almost an entire circle; an arrangement, in both cases, corresponding to the different surfaces of the tibia. They are thicker at their outer circumference, which is convex, than at the inner, which is concave and very thin. Both are inserted, before and behind, into the spine of the tibia, by means of fibrous fasciæ.

SEMILUNAR GANGLION, — *Ganglion abdominale* seu *splanchnicum* seu *transversum* seu *solarè*, *G. surréal*, (Ch.), belongs to the great sympathetic. These ganglia present considerable variety, and are deeply situate in the abdomen, above and behind the supra-renal capsules. They correspond, posteriorly, to the pillars of the diaphragm and the aorta. They have the shape of a crescent reversed, often surrounded by other ganglia of a smaller size. From their periphery numerous filaments proceed, which go to the formation of the solar plexus.

SEMILUNAR NOTCH OF THE STERNUM, *Fourchette*—s. Valves, *Sigmoid valves*.

SEMILUNULA UNGUIUM, see *Nail*.

SEMI-MAS, *Eunuch*.

SEMIMASCULATUS, *Eunuch*.

SEMIMASCULUS, *Eunuch*.

SEMIMEMBRANEOUS, *Semimembranosus*.

SEMIMEMBRANOSUS, *Semimembraneus*, (F.) *Ischio-popliti-fémoral*, *Ischio-popliti-tibial*, (Ch.) *Deminembraneus*. A muscle situate at the posterior part of the thigh. It is flat, thin, narrow, and aponeurotic in its upper third; broader and fleshy in the middle, and tendinous below. It is attached above to the tuberosity of the ischium; and below—by a tendon, which has three divisions—to the outer condyle of the femur, and to the posterior and inner part of the internal tuberosity of the tibia. This muscle is a rotator inwards, and a flexor of the leg. It can also bend the thigh upon the leg. In standing it maintains the pelvis in position, and can even draw it downwards.

SEMIMORTUUS, *Semianimis*.

SEMINA CATAPUTLE MAJORIS, see *Ricinus communis*.

SEMINA FRIGIDA MAJORA. The greater cold seeds. The ancients gave this name to the emulsive seeds of the cucumber, melon, gourd, and water-melon.

SEMINA FRIGIDA MINORA. The lesser cold seeds. The ancients gave this name to the seeds of the lettuce, purslane, endive, and chichory.

SEMINA RICINI VULGARIS, see *Ricinus communis*.

SEMINAL, Spermatic—s. Filaments, Spermatozoa—s. Fluid, Sperm—s. Granules, see *Granule*.

SEMINALE MEMBRUM, *Penis*.

SEMINALIS, Spermatic.

SEMINERVOSUS, *Semi-tendinosus*.

SEMIORBICULARIS, *Orbicularis oris*.

SEMIPESTIS, *Typhus*.

SEMINEX, *Semianimis*.

SEMINIA MORBORUM, *Predisposition*.

SEMINIFEROUS, from *semen*, *seminis*, 'sperm,' and *fero*, 'I carry.' *Spermatoph'orous*.

An epithet given to the vessels which secrete and convey the seminal fluid.

SEMINIST, Animalculist.

SEMINIUM, Sperm.

SEMIOGRAPHY, Semeiography.

SEMIOLGY, Semeiology.

SEMIION, Sign.

SEMIOTICE, Semeiotice — s. Faciei, Physiognomy.

SEMIPLÉGIA, Hemiplegia.

SEMISEXIMUM, Hemiecton.

SEMICILICUS. A weight of one drachm or three scruples. — Rhodius.

SEMISSIDERATIO, Hemiplegia.

SEMISSIDERATUS, see Hemiplegia.

SEMISSOMNIS, Coma.

SEMISSOPORUS, Coma.

SEMISSPECULUM. An instrument used for dilating the incision made into the neck of the bladder in the operation of lithotomy. — Fabricius Hildanus.

SEMISSPINALIS COLLI, *Semispinalis seu transverso-spinalis seu spinalis seu transversalis colli*, *Articulo-spinalis*, *Spinalis cervicis*, *Transverso-spinalis*, (F.) *Demi-épineux ou transversaire-épineux du cou*. This muscle arises from the transverse processes of the six uppermost dorsal vertebrae, by an equal number of distinct tendons, which run obliquely under the complexus, and is inserted in the spinous processes of all the cervical vertebrae, except the first and last. Its *action* is, to extend the neck obliquely backwards and to one side.

SEMISSPINALIS DORSI, *Semi-spinalis externus*, *Transverso-spinalis dorsi*, *Semi-spinatus*, (Riolan), *Transverso-spinalis*, (F.) *Demi-épineux du dos*, *Transversaire-épineux du dos*. This muscle arises from the transverse processes of the seventh, eighth, ninth, and tenth dorsal vertebrae, by as many distinct tendons, which soon grow fleshy; and then again become tendinous, and are inserted into the spinous processes of the sixth or seventh uppermost dorsal, and two lowest cervical vertebrae, by as many tendons. Its *action* is, to extend the spine obliquely backwards.

SEMISSPINALIS EXTERNUS, *Semi-spinalis dorsalis*. Internus, *Transversalis dorsi* — s. *Spinatus*, Longissimus dorsi, *Semi-spinalis dorsi*.

SEMISSPINATUS COLLI, *Semispinalis colli*. SEMISSIS, *Semis*. The half of a pound, ounce, drachm, &c.

SEMITENDINOSUS, *Semi-nervosus*, (F.) *Ischio-cræti-tibialis*, *Ischio-prætibialis*, (Ch.) *Demitendineux*, *Deminerveux*. This muscle is situate at the posterior part of the thigh. It extends obliquely, downwards and inwards, from the tuberosity of the ischium — to which it is attached by a flat tendon, common to it and the biceps — as far as the posterior and inner part of the tibia, to which it is attached by means of another round tendon. Its fibres are commonly interrupted by an aponeurosis. Its *uses* are the same as those of the semimembranosus.

SEMITERTIANA, Hemitritæa.

SEMIUNCIA, Hemiunction.

SEMIVIR, Eunuch.

SEMIVIVUS, Semianimis.

SEMOLA, BULLOCK'S; a farinaceous article of diet, which is recommended as highly nutritious and easily digestible, consequently well adapted for infants and invalids, is said to consist of the gluten of wheat, with a small proportion of starch. Semola and Semolina resemble each other greatly. They appear, indeed, to be identical.

SEMOLINA, *Maana croup*. This may be made by grinding wheat in an apparatus, separating the flour from the middlings, dressing the

latter four different times in a bolting mill, and sifting through parchment sieves, until the product is perfectly freed from bran. In Poland, it is called *Cracow groats*.

Semolina is generally imported into England from the Baltic, and in Russia is said to be manufactured from buckwheat. It has a granular form like some kinds of oatmeal, a dingy white colour, a farinaceous, somewhat insipid, taste, and is well adapted for the diet of children affected with derangement of the bowels. A recent analysis makes it consist of the gluten of wheat with a certain proportion of the starch, part of the latter having been removed.

SEMPERVIVUM ACRE, Sedum.

SEMPERVIVUM TECTO'RUM, *S. majus seu tectorum*; from *semper*, 'always,' and *vivo*, 'I live,' because always green, *Aizöön*, *Beihalalen*, *Buphthalmus*, *Barba Jovis*, *Agriosin'ara*, *Andrachahara*, *Chrysospermum*, *House-Leek*, *Senegreen*, *Fewes*, *Fouets*, (Prov.) *Cyphel*, *Jupiter's Beard*, (F.) *Joubarbe des toits*. The leaves have a mild, subacid austerly, and are often applied to bruises and old ulcers.

SEMUDA, Betula.

SEMNUNCIA, Hemiunction.

SENA, Cassia senna.

SÉNÉ, Cassia senna — s. *d'Amérique*, Cassia Marilandica — s. *Faux*, Colutea — s. *Indigène*, Colutea — s. *des Prés*, *Gratiola officinalis*.

SENEBIERA CORONOPUS, *Cochlearia coronopus*.

SENECA OIL, Petroleum, (New York.)

SENE'CIO, *S. vulgaris*, from *senex*, 'an old man,' in allusion to the grayish down on many species; *Erig'erum*, *Cortalon*, *Erigeron*, *Groundsel*, *Fireweed*, (Sc.) *Groundie Swallow*, (F.) *Senecio commun.* Ord. Compositæ. *Sex. Syst.* Syngenesia Polygamia Superflua. A common plant in Europe; frequently applied, bruised, to inflammations and ulcers, as refrigerant and antiscorbutic.

SENE'CIO AU'REUS, *Golden ragweed*, *Wild valerian*, *Life root*, *Squaw root*; indigenous. Is an excitant, diaphoretic, and diuretic. The dried plant is used in decoction; — $\frac{3}{4}$ ss to Oj of water.

SENECIO HIERACIFOLIUS, *Erechthites hieracifolius*.

SENECIO JACOBÆ'A, *Jacobæ'a*, *St. James's Wort*, *Ragwort*, (Sc.) *Bunwede*, *Weebo*, (F.) *Jacobée*. The leaves have a roughish, bitter, subacid, and extremely nauseous taste. A decoction has been used in dysentery. A poultice of the leaves has been recommended in rheumatic affections; and a decoction of the root has often been employed in cases of wounds and bruises.

SENECON COMMUN, *Senecio*.

SENECTA, *Senectus*.

SENECTA AN'GIUM. The cast skin of a serpent. A decoction of it is said to cure deafness!

SENECTA DECREPITA, *Decrepitude* — s. *Extrema*, *Decrepitude* — s. *Summa*, *Decrepitude* — s. *Ultima*, *Decrepitude*.

SENECTUS, *Senectus*, from *senex*, 'an old man'; *Geras*, *Senium*, *Ætas senilis seu proccæta seu mala*, *Old age*, *Senility*, (F.) *Viellesse*. The last period of life, commencing, according to some, at 60 years of age, — according to M. Flourens at 70, — but varying according to numerous circumstances. It is characterized by progressive diminution of the physical and moral faculties.

SENECTUS ULTIMA, *Decrepitude*.

SENEGA, *Polygala senega*.

SENEGAL, GUM, *Gummi Senegalen'se seu Seneca seu Senega seu Senica*. The exudation from *Acacia seu Mimosa Senegal.* — Ord. Leguminosæ. *Sex. Syst.* Polygamia Monœcia — which grows in the country of Africa through

which the river Senegal runs. It is in loose or single drops, much larger than gum Arabic, or the gum which exudes from the cherry tree; and is much more difficult of solution than the former.

SENEGINE, see Polygala senega.

SÉNÉGRAIN, Trigonella fœnum.

SENEKA, Polygala senega.

SÉNEVÉ, Sinapis.

SENGREEN, Sempervivum tectorum.

SENILE, *Seni'lis*, from *senex*, 'an old man.' Relating or belonging to old age: — as '*senile delirium*;' dotage.

SENILITY, Senectus.

SENNA, *Cassia senna*—s. Alexandrina, *Cassia senna*—s. American, *Cassia Marilandica*—s. Bladder, *Colutea arborescens*—s. Essence of, prepared, Selway's, see *Infusum sennæ compositum*—s. Germanica, *Colutea*—s. Italica, *Cassia senna*—s. Prairie, *Cassia chamæcrista*—s. Wild, *Cassia chamæcrista*, *Cassia Marilandica*.

SENS, Sense — s. *Genital*, Appetite, venereal.

SENSA'TION, *Sensa'tio*, from *sentire*, *sentium*, 'to feel;' *Æsthe'ma*. The consciousness or cognition by the brain of an impression caused by an external body on the organs of the senses. (F.) *Sentiment*. It is not necessarily, however, confined to bodies external to us; for we can receive an impression by touching any part of our own body. The body which communicates the impressions needs but to be external to the part impressed. Sensations are divided into *external*, *internal*, and *morbid*. The *external* are communicated by the five organs of the senses. The *internal* are such as occur within the body, and arise from some alteration in the function of the part, for the time being. Hunger and thirst are internal sensations, as well as all the natural wants. *Morbid* sensations may be either internal or external. *Objective sensations* are produced by impressions on the peripheral nerves; as in vision, audition, &c. *Subjective sensations*, are such as originate centrally, or in the encephalon,—as tinnitus aurium.

SENSATIONAL, Sentient.

SENSE, *Sensus*, *Sen'sio*, *Æsthe'sis*, (F.) *Sens*. Same etymon as Sensation. A faculty, possessed by animals, of appreciating impressions from external objects. The senses are five in number; sight, hearing, smell, taste, and touch. Of these, the first two and the last administer more to the intellect; and, hence, have been called by some, the *intellectual senses*; the other two seem more destined for the nutrition of the body: and, hence, have been termed *corporeal* or *nutritive senses*. Other senses have been suggested — as the intense sensation experienced during the venereal act; a sense of heat and cold; a muscular sense, a common sense or cœnæsthesia, &c.

SENSES, NERVOUS SYSTEM OF THE, Medulla oblongata.

SENSIBILITAS, Sensibility—s. Anomala, see Irritable — s. Aucta, see Irritable — s. Morbosa, see Irritable.

SENSIBIL'ITY, *Sensibil'itas*. Same etymon as Sensation; *Æsthe'ma*. The faculty of receiving and transmitting impressions, and having the consciousness of them. It thus includes three secondary properties, *impressibility*, (F.) *impressibilitié*, *transmissibility*, and *perceptibility*. Bichat defines it as the property possessed by living bodies, of receiving impressions, whether the individual be conscious of them or not. In the former case, where conscious, he calls the sensibility *animal*: in the latter, where not, he terms it *organic*. This last is common to vegetables and animals, and presides over nutrition, absorption, exhalation, secretion, &c. The other does

not exist in vegetables: it is the origin of the sensations—olfaction, vision, gustation, audition, thirst, hunger, pain, &c. There are few parts of the animal body, but what are sensible — if not in health—in disease. The free extremities of the hair and nails, and the epidermis, are not so. See Insensibility.

SENSIFEROUS, Sentient.

SENSIO, Sense.

SENSORIUM, Sensorium.

SENSORI-VOLIT'IONAL. A term applied to nervous fibres which pass to and from the cerebro-spinal axis, and are respectively concerned in sensation and volition.

SENSO'RIAL, Sentient.

SENSORIAL POWER, according to Dr. Wilson Philip, is composed of the two functions of sensation and volition. Dr. Darwin included in it the power of muscular contraction; but it ought not to be extended to acts in which there is not consciousness.

SENSO'RIUM, *S. communē*, *Or'ganon senso'rium internum*, *Sensito'rium*, *Empo'rium spirituum*, *Æsthet'e'rium*, *Sen'sory*. Same etymon. The common centre of sensations.

SENSORY, Sensorium, Sentient.

SENSORY GANG'LIA. A name given by Dr. Carpenter to a series of ganglionic masses at the base of the brain, which are in direct communication with the nerves of sensation—as the *olfactory*, *optic*, *auditory*, and *gustatory*.

SENSORY NERVES, *Nerves of sensation*, are so called in contradistinction to *Motor* nerves. There are *general sensory nerves* — as those connected with the posterior part of the spinal marrow, and the fifth pair; and *special sensory*, as those of the senses.

SENSUS ÆGRITUDINIS, Indisposition — s. Osmometricus, Olfaction — s. Perversus, Pseudæsthesia.

SENTIENT, *Sen'tiens*, *Sen'sory*, *Ideäg'enous*, *Senso'rial*, *Sensa'tional*, *Sensif'erosus*. Same etymon. Feeling, causing feeling.

SENTIENT EXTREMITIES OF NERVES are their minute terminations in the organs.

SENTINA, Pituitary gland.

SENTIENT, see Sensation.

SEPARATO'RIUM, from *separare*, *separatum*, 'to separate.' A surgical instrument, for separating the pericranium from the skull.

A *Separatory*, *Vitrum Hypoclepticum*, is a pharmaceutical vessel for separating fluids of different densities from each other.

SEPEDOGENESIS, Sepedonogenesis.

SEPEDON, Putrefaction.

SEPEDONODES, Putrid.

SEPEDONOGEN'ESIS, *Sepedogen'esis*, from *σηπεδων*, 'putrescency,' and *γενεσις*, 'generation.' A septic disposition or tendency; such as is met with in typhus gravior.

SEPEs, *Sæ'pes*, 'a hedge,' 'a row;' as *Sepes* seu *Se'pries* seu *Pecten dentitium*: — a row of teeth.

SEPEs DENTIUM, see Sepes.

SEPHIRUS, Scleriasis.

SE'PIA, *σηπια*, *S. officina'lis*, *Se'pium*, *Cuttle-Fish*, (Sc.) *Hose-Fish*, *Slieve-Fish*, (F.) *Sèche*. *Class* Cephalopoda. The osseous part of the cuttle-fish; (F.) *Os de Sèche*—*Præcipitans magnum*—has been used as an absorbent, and is often added to tooth-powders.

SEPLASIA'RIOUS. A name formerly given to one who sold perfumes, ointments, &c. It is derived from *Seplasia*, the name of a public place at Capua, where such preparations were frequently sold. A druggist.

SEPSICHYMIA, Septochymia.

SEPSIS, Putrefaction.

SEPTÆ'MIA; from *σηπτος*, 'rotten,' and *αίμα*,

'blood.' A morbid condition of the blood produced by septic or putrid matters.

SEPTAL, *Septalis*, from *Septum*. Relating, or appertaining to, a septum: as 'septal walls of the heart'—those that separate the cavities from each other.

SEPTANA FEBRIS, Fever, septan.

SEPTENARY, *Septenarius*, (F.) *Septénaire*, from *septem*, 'seven.' 'Consisting of seven.' The septenary years of the old believers in critical periods were times at which, it was supposed, important changes might be expected to take place. The grand climacteric was fixed at 63, and it was considered that if a person passed that age, he had well-founded expectations that his life might be protracted to 90.

SEPTENNIAD, Climacteric, (years.)

SEPTERIUS, Septic.

SEPTFOIL, UPRIGHT, *Tormentilla*.

SEPTIC, *Septicus*, *Septus*, *Septerius*, from *σηπεν*, 'to rot,' *σηπτος*, 'rotten.' That which produces putrefaction. A substance which corrodes and disorganizes the soft parts without causing much pain.

SEPTIC POISON, see Poison.

SEPTICÆMIA, Septæmia.

SEPTIMESTRIS FÆTUS, see Fœtus septimestris.

SEPTINERVIA, *Plantago*.

SEPTOCHYMIA, *Sepsichymia*; from *σηψις*, 'putrefaction,' and *χυμος*, 'juice.' Putrefaction or putrescency of the humours.

SEPTON, Azote.

SEPTOPYRA, Typhus gravior.

SEPTULUM; diminutive of *septum*. A division between small spaces or cavities— as the *septula* or fibrous cords given off by the *mediastinum testis* to be inserted into the inner surface of the *tunica albuginea*.

SEPTUM, (F.) *Cloison*, 'a partition,' from *sepio*, *septum*, 'I fence in.' A part destined to separate two cavities from each other, or to divide a principal cavity into several secondary cavities.

These septa are numerous in the human body. The chief are the following:—

SEPTUM ATRIORUM, *S. Auricularum*. The septum or partition between the auricles of the heart.

SEPTUM ATRICULARUM, *S. Atriorum*—s. *Cerebelli*, *Falx cerebelli*—s. *Cerebri*, *Falx cerebri*—s. *Cochlæe auditoriæ*, *Lamina spiralis*.

SEPTUM CORDIS, *Septum medium cordis*. The partition which separates the two ventricles of the heart.

SEPTUM ENCEPHALI, *Tentorium*.

SEPTUM LUCIDUM seu *pellucidum* seu *ten'ue* et *pellucidum* seu *medium*, *Speculum*, *S. lucidum*, *Lapis specularis*, *Mediastinum* seu *Diaphragma ventriculorum laterali'um cerebri*, (F.) *Septum median* (Ch.), *Cloison transparente*. The soft portion or medullary substance, which separates the two lateral ventricles of the brain from each other. This septum is composed of two laminae; between which a small cavity exists, filled by a serous fluid, *ventriculus septi pellucidi*, see *Ventricles of the Brain*. The brothers Wenzel are of opinion that this cavity is lined by a peculiar membrane.

SEPTUM MËDIAN, *S. lucidum*—s. *Median du cerevet*, *Falx cerebelli*—s. *Medium cerebri*, *S. lucidum*.

SEPTUM NARIUM, *Interseptum* seu *Dissepimen'tum* seu *Interj'ctum* seu *Diser'men* seu *Imbrex* seu *Diaphrag'ma narium*, (F.) *Cloison des Fosses nasales*. The partition between the nares. It is formed by the vomer, the perpendicular plate of the ethmoid bone, and a cartilage of a triangular shape. These parts are lined by the pituitary

membrane, which receives a considerable number of nerves and vessels.

SEPTUM NASI, see *Nares*.

SEPTUM PARVUM OCCIPITALE, *Falx cerebelli*—s. *Pectiniforme*, see *Cavernous bodies*—s. *Pellucidum*, *S. lucidum*—s. *Scalæ*, *Lamina spiralis*—s. *Staphylin*, *Velum pendulum palati*—s. *Tenuè* et *pellucidum*, *S. lucidum*—s. *Thoracis*, *Mediastinum*—s. *Transverse*, *Tentorium*—s. *Transversum*, *Diaphragm*—s. *Vestibuli nervoso-membranaceum*, see *Labyrinth*.

SEPTUS, Septicus.

SEPMUM, *Sevum*.

SEQUES'TRUM, "the depositing of a disputed thing in the hands of a third person!" The portion of bone, in necrosis, which is dead, and separated from the living bone; acting, whilst retained, as an extraneous body. When the sequester is superficial and small, it is called *Exfoliation*. The portion of bone surrounding it is the *Cap'sula sequestralis*.

SERAPEUM, Syrup.

SERAPINON, *Sagapenum*.

SERAPIUM, Syrup.

SERBET, Scherbet.

SËREUX, Serous.

SËRICO-CARPUS TORTIFOLIUS, *Com'za bifoliata*, *Aster tortifolius*; indigenous; *Order*, *Compositæ*: is said to be diuretic.

SËRICUM, *Silk*; from *Seres*—the Thibetans probably—from whom it was first obtained. (F.) *Soie*. The thread spun by the *Bombyx Mori* or *Silkworm*. Silk is used by surgeons for ligatures, &c.

SËRICUM ANGLICUM, see *Sparadrapum adhæsivum*.

SERIES DENTIUM, see *Sepes*.

SËRIEUX, Serious.

SERINGUE, Syringe.

SERIOLA, *Cichorium intybus*.

SËRIOUS, *Serius*, (F.) *Sérieux*, *Grave*. A term applied to a disease, *Dyspathia*, *Morbis gravis*, and to a symptom that is attended with danger.

SERIS, *Cichorium intybus*.

SERMOUNTAIN, *Laserpitium album*.

SERO-COLITIS, see *Colitis*.

SERO-CYSTIC, *Sero-cysticus*. An epithet for tumours of the female breast, which consist, in the first stage, of one or more membranous cysts, produced perhaps by dilatation of portions of the lactiferous tubes.

SERO-HEPATITIS, see *Hepatitis*.

SËROLIN, from *serum* and *olein*. A peculiar fatty matter detected in the blood by BouDET, Lecanu, Sanson, and others.

SËROSITÉ, Serum.

SËROSITY, Serum.

SËROUS, *Sero'sus*, (F.) *Sérieux*; from *serum*. Thin; watery. Relating to the most watery portion of animal fluids, or to membranes that secrete them. See *Serum*.

SËROUS LAYER, see *Tache embryonnaire*—s. *Membranes*, *Membranes*, serous.

SERPEDO, Psoriasis.

SERPENT, *Serpens*, *Anguis*, *Ophis*; from *serpo*, 'I creep.' A snake.

SNAKE BROTH was, at one time, recommended as a restorative.

Many serpents are venomous; and the bites of some fatal. See *Poisons*, table of.

SËRPENTAIRE NOIRE, *Actæa racemosa*—s. *Rouge*, *Polygonum bistorta*.

SËRPENTARIA, *Aristolochia serpentaria*—s. *Gallorum*, *Arum dracunculæ*—s. *Hispanica*, *Scorzonera*—s. *Minor*, *Arum maculatum*—s. *Nigra*, *Actæa racemosa*.

SERPENTARIÆ BRAZILIENSIS RADIX, Caineæ radix.

SERPENTIN, see Alembic.

SERPENTINE, Ophites.

SERPENTINUS, Ophites.

SERPES, Herpes.

SERPIG'INOUS, from *serpere*, 'to creep.' An epithet given to certain affections, which creep, as it were, from one part to another,—'*Serpiginous* erysipelas,' (F.) *Erysipèle serpigineux*.

SERPIGO, Herpes circinatus, Lichen psoriasis.

SERPILLUM, *Thymus serpyllum*.

SERPOLET, *Thymus serpyllum*.

SERPULLUM, *Thymus serpyllum*.

SERPYLLUM, *Thymus serpyllum*—s. Citra-um. see *Thymus serpyllum*.

SERRA, Saw—s. Amputatoria, Saw, amputa-tion—s. Versatilis, Trepan.

SERRAT'ULA AMAR'A, from *serra*, 'a saw,' owing to its serrated leaves. *Family*, Cynarocéphaleæ. *Sex. Syst.* Syngenesia Polygamia æqualis. A species of *Sawwort*, recommended in ague.

SERRATULA BEHEN, *Centaurea behen*.

SERRATUS, Dentate—s. Anticus Minor, Pec-toralis minor.

SERRA'TUS MAGNUS. So called from its serrated appearance; from *serra*, 'a saw.' *Serratus major anti'cus*, *S. major*, (F.) *Costo-basi-scapulaire*, *Costo-scapulaire* (Ch.), *Grand dentelé*. A very broad (especially anteriorly), thin, flat, irregularly quadrilateral muscle, situate at the sides of the thorax. It is attached, before, to the external surface of the first 8 or 9 ribs, by as many distinct digita-tions; and, behind, to the spinal edge of the scapula. The superior fibres are almost horizontal; the lower become gradually more and more oblique upwards and backwards. This muscle carries the scapula forwards, and causes it to execute a movement of rotation, which directs its inferior angle forwards, and the anterior upwards. When the shoulder is fixed, it raises the ribs.

SERRATUS MAJOR, *Serratus magnus*—s. Major anticus, *Serratus magnus*.

SERRATUS POSTI'CUS INFERIOR, (F.) *Dorso-lombo-costal*, *Lombo-costal* (Ch.), *Petit dentelé postérieur et inférieur*. A broader and thinner muscle than the following, but nearly of the same shape. It is situate obliquely at the lower part of the back; and extends from the spinous processes of the last two or three dorsal vertebrae, and the first two or three lumbar, to the inferior margin of the last four false ribs. This muscle depresses the ribs, and thus concurs in expiration. It is an antagonist to the next.

SERRATUS POSTI'CUS SUPERIOR, (F.) *Cervici-dorso-costal*, *Dorso-costal*, (Ch.) *Petit dentelé supérieur*. A flat, thin, quadrilateral muscle; situate obliquely at the posterior inferior part of the neck, and the superior part of the back. It passes from the posterior cervical ligament, the spinous process of the last cervical vertebra; from the spinous processes of the first two or three dorsal, to the second, third, fourth, and fifth ribs; into which it is inserted by as many digitations. It raises the ribs, and is, consequently, an inspiratory muscle.

SERRE-ARTÈRE, *Presse-artère*.

SERRE-COU (F.), from *serrer*, 'to squeeze,' and *cou*, 'the neck.' An instrument, invented by Chabert, for compressing the jugular vein, in bleeding from that vessel. It surrounds the neck like a collar, and, by means of a pad, exerts the necessary pressure.

SERRE-FINE, (F.), from *serrer*, 'to squeeze,' and *fin*, 'fine.' A small spring forceps, invented by M. Vidal. It is formed of a wire of metal, turned in the middle into two spirals, one in front of the other. This constitutes the spring. Each branch describes nearly the letter S; and one ex-

tremity forms the spiral, the other lays hold of the parts to be united.

SERRE-NŒUD (F.), from *serrer*, 'to squeeze,' and *nœud*, 'a knot.' This name has been given to various instruments, employed by the surgeon for tightening a ligature passed round a pedicu-lated tumour, or any part which has to be de-stroyed by ligature slowly and gradually. Thus, there is the *serre-nœud* of Roderic, the *constrict-eur* of Herbinaux, the *serre-nœud* of Desault, &c.

SERRE NŒUD DE DESCHAMPS, *Presse-artère*.

SERTULA CAMPANA, *Trifolium melilotus*.

SERUM, Sperm.

SERUM, 'whey.' *Orrhos*, *Oros*, *Seros'ity*, (F.) *Sérosité*. The most watery portion of animal fluids, exhaled by serous membranes. It is a constituent part of blood, milk, &c.

SERUM OF THE BLOOD, *Hæmydor*, *Orrhos*, *Serum* seu *Ichor sanguinis*, (F.) *Sérum du Sang*, is the liquid which separates from the blood, when coagulated at rest. It is of a greenish-yellow colour; viscid, slightly coagulable by heat, acids, and alcohol. It is composed of water; chloride of sodium; certain phosphates; and albumen, constantly united to soda, almost in a saponaceous combination.

The fluid which exudes from the albumen of the serum of the blood, when coagulated by heat, is by some called *seros'ity*.

SÉRUM DU SANG, S. of the blood.

SERUM LACTIS, *Aqua Lactis*; *Serum of Milk*, *Whey*. (Prov.) *Whig*, (F.) *Sérum du lait*, *Petit lait*. That part of milk from which the butter and caseous matter have been separated. It is a transparent, citrine-coloured liquid, containing sugar of milk, mucilage, acetic acid, phosphate of lime, and some other saline substances. It is used as a slightly nutritious diluent and refrig-erant. The French have magistral formulæ, the basis of which is whey. They are called *Petits-laits*, or 'wheys.'

SERUM LACTIS HOFFMAN'NI, (F.) *Petit-lait d'Hoffmann*, is a name given to the liquid re-sulting from treating with boiling water milk which has been evaporated to an almost solid consistence. It is not much used.

RENNET WHEY is made thus: *milk* 2 pints; *rennet* ʒss, infused in a little hot water; mix and keep in a gentle heat for some hours, then strain.—Gray.

SERUM SANGUINIS, Serum of the blood.

SERUM OF SEROUS MEMBRANES, *Serum mem-branarum serosarum*, *Water of Dropsy*, (F.) *Sérum des membranes séreuses*, *Eau des hydro-piques*. It resembles the serum of the blood,—especially in cases of hydrocele. The water of hydrothorax and ascites contains much less al-bumen:—sometimes enough to coagulate on the application of heat: at others, not.

SERVICE, MOUNTAIN, *Sorbus acuparia*.

SERVICE TREE, *Sorbus domestica*.

SERVIETTE EN CARRÉ, *Couvrechef*.

SÉSAME, Sesamum orientale.

SESAMOID, *Sesamoïdes*, *Sesamo'des*, *Sesa-moïdeus*, from *σάσαυ*, 'a grain of sesamum,' and *αἶδος*, 'resemblance.'

SESAMOID BONES, *Ossa* seu *Ossic'ula sesamoï-dea*, are small bones, situate in the substance of tendons, near certain joints. Their number is various. They are commonly more in the male than female. Two are constantly met with beneath the metatarso-phalangeal articulations of the great toe. Sometimes, the articulations of other bones of the metatarsus with the phalanges of the toes have them likewise. In the hand, there are two before the metacarpo-phalangeal joint of the thumb. At times, they are

met with in the other metacarpo-phalangeal articulations. Occasionally, two exist behind the condyles of the femur, in the tendons of the gastrocnemii muscles. A considerable os sesamoidem is also met with in the tendon of the peroneus longus. These bones are commonly round, and flattened only on one surface, which is incrustated with cartilage. Their size is very variable, according to the joints in which they exist. Traces of sesamoid bones are not observed in infants: in them, they are replaced by small, cartilaginous concretions. They are developed by a single point of ossification: and are, like the patella (which is a true sesamoid bone,) composed of much cellular substance, covered by a thin layer of compact tissue. The use of these bones is,—to allow the tendon to be inserted into the lever at a greater angle; and thus enable the power to act more advantageously.

Riolián has given the name *Ossa sesamoidea* to two bony points sometimes met with;—the one at the outer side of the carotid canal of the temporal bone; and the other at the edge of the cavernous sinus, at the side of the internal carotid artery.

SESAMUM, see *Sesamum orientale*.

SESAMUM ORIENTALE, *S. edulē* seu *oleiferum* seu *In'dicum*, *Bennē*, *Oily Grain*, (F.) *Sésame*, *Jugolīne*. Ord. Bignoniaceæ. The seeds of this African plant are cultivated in Georgia and South Carolina, where the negroes use them with Indian corn as an article of food. They yield a larger proportion of oil than any other vegetable; one hundred weight producing ninety pounds of oil, which is, at least, equal to Florence oil.

Benne oil, *Oleum Sesami*, is used in the Southern States as a laxative. The leaves—*Sesami folia*, (Ph. U. S.)—afford, by infusion, an excellent mucilage.

SESCUN'CIA, *Sesquinc'cia*, *Hemio'ion*. An ounce and a half. See *Sesqui*.

SESELI, *Laserpitium siler*—s. *Egopodium*, *Lignisticum podagraria*—s. *Annuum*, *S. tortuosum*—s. *Carum*, *Carum*—s. *Carvi*, *Carum*—s. *Creticum*, *Tordylium officinale*—s. *Fœniculifolium*, *Sison ammi*—s. *Graveolens*, *Apium graveolens*—s. *Meum*, *Æthusa meum*—s. *Patens*, *S. tortuosum*—s. *Pratense*, *Peucedanum silaus*—s. *des Prés*, *Peucedanum silaus*.

SESELI TORTUOSUM, *S. Massiliensē* seu *annuum* seu *patens*, *Euanthē strid'ra rig'ida*, *Hartwoort of Marseilles*. The seeds have a warm taste; and a greater degree of pungency than those of *Laserpitium siler*, which is the *Seseli* of the Pharmacopœias.

SESELIS, *Laserpitium siler*, *Seseli*.

SESQUI. This word, joined with any number, weight, measure, &c., signifies one and a half; as *sesquigranum*, 'a grain and a half.'

SESEQUIUNCIA, *Sescuncia*.

SETA EQUI'NA, 'horse-hair.' *Hairworm*, *Helminthus Gor'dii*. A kind of worm, found in stagnant water, from 4 to 6 inches long, and twisted into various knots and contortions; colour pale-brown, with dark extremities. It is common in the intestines of the Laplanders; causing the *Col'ica Laponica*, in which the gripings are, at times, exceedingly severe.

SETA'CEUM, *Seto*, *Seton*, from *seta*, 'a bristle.' A long strip of fine linen or cotton twist, passed through the skin and areolar membrane, to keep up an issue; or through suppurating cavities, between the fragments of fractured bones, &c., to fulfil certain indications. The term is, also, applied to the issue so established. The operation is simple. It consists in laying hold of a fold of skin, and passing a seton-needle through it, with the thread attached. Every day a fresh

portion of the thread is drawn through the sore. Setons are established in many diseases;—in obstinate ophthalmia, cephalalgia; epilepsy, thoracic and abdominal affections, &c.; but they are not as much used as formerly.

SETARIA ROCCELLA, *Lichen roccella*.

SETFAST, see *Furunculus*.

SETO, *Setaceum*.

SETON, *Setaceum*.

SETTERWORT, *Helleborus fœtidus*.

SEVADILLA, *Veratrum sabadilla*.

SEVATIO, *Seatoma*.

SEVE, *Sap*.

SEVENBARK, *Hydrangea arborescens*.

SEVRAGE, *Wearing*.

SEVUM, *Pinguedo*.

SEVUM, *Sebum*, *Sepum*, *Stear*, *Adeps ovilli*, *Sevum vervecinum*. Suet, mutton suet; Pinguedo.

SEVUM PRÆPARATUM, *Sevum* (Ph. U. S.).—*Ovilli Sevum Præparatum*, *Prepared Suet*, (F.) *Graisse de Mouton*, *Suif*, is formed by cutting suet in pieces; melting over a slow fire, and straining through linen. It is emollient, and is sometimes boiled in milk (ʒij to Oj), and is used in diarrhoea and dysentery. Its principal employment is in the formation of plasters.

SEVUM VERVECINUM, *Sevum*.

SEX, *Sexus*, *Genos*, *Physis*. The physical difference between male and female in animals and vegetables:—as the *Male sex*, *Sexus potior* seu *fortior* seu *virilis*; and the *Female sex*, *Sexus sequior*, *S. muliebris*, *Alter Sexus*, 'The Sex.'

SEXTANS, from *sextus*, 'the sixth;' *Sexta pars libra*. The sixth part of a pound.—Galen.

SEXTARIUS. Same etymon. An ancient measure for liquid and solid substances; the sixth part of a congius. See *Weights and Measures*.

SEX'TULA. Same etymon. *Hex'gium*, 'εξαγίον'. The sixth part of an ounce.

SEX'UAL, *Sexualis*, from *sexus*, 'sex.' That which relates to the sex; which characterizes the sex.

SEXUAL DISEASES, *Morbi sexual'es*, are the diseases of the genital organs; as *SEXUAL FUNCTIONS* are the genital functions.

SEXUAL INTERCOURSE, *Coitio*—s. *Organs*, *Genital organs*.

SEXUS, *Sex*—s. *Alter*, see *Sex*—s. *Fortior*, see *Sex*—s. *Muliebris*, see *Sex*—s. *Potior*, see *Sex*—s. *Sequior*, see *Sex*—s. *Virilis*, see *Sex*.

SEYDSCHÜTZ WATER, *Seidenschütz water*.

SHACKLE, *Carpus*.

SHACKLE-HAMMED, see *Cnemosciosis*.

SHADDOCK. The fruit of *Citrus decumana*, called after the captain of a vessel who first took it to the West Indies from China. It is large; but inferior to the orange in flavour. It keeps, however, longer; and, hence, is useful on long voyages.

SHAKERS, see *Convulsionnaire*.

SHAKES, *Intermittent*.

SHAKING, *Intermittent*, see *Rigor*.

SHALLOT, *Echalotte*.

SHAMPOO'ING, *Champooing*, *Massing*, (F.) *Massage*, *Massement*. A Hindoo process, which consists in pressing the body of the bather in a peculiar manner; cracking the various joints, and employing blows and friction.

'Kneading' consists in pressing alternately upon a part of the body to arouse the muscles to more energetic action. It is employed at times in dyspepsia.

SHAMROCK, INDIAN, *Trillium latifolium*—s. *Water*, *Menyanthes verna*.

SHANKER, *Chanere*.
 SHANNONDALE SALINE SPRINGS. These are within a few miles of Charlestown, Jefferson County, Virginia. They are mildly aperient and diuretic.
 SHARON SPRINGS, NEW YORK. These springs, which are situated about 10 or 12 miles south of Canajoharie, N. Y., and 45 miles west of Albany, are much frequented. They contain, according to the analysis of Dr. Chilton, sulphate of magnesia, sulphate of lime, chloride of sodium, chloride of magnesium, sulphohydrate of sodium, sulphohydrate of calcium, vegetable extractive matter, and free sulphohydric acid gas. Their temperature is 48° Fahr.
 SHEATH, Vagina.
 SHEDDING OF THE TEETH, see Dentition.
 SHEEP POISON, *Kalmia latifolia*.
 SHELLBARK, see Hickory.
 SHELL FLOWER, *Trillium latifolium* — s. Liquid, see Calcei murias — s. Membrane, *Membrana testæ*.
 SHEPHERD'S PURSE, *Thlaspi bursa* — s. Sun dial, *Anagallis arvensis*.
 SHERBET, Scherbet — s. Orange, see Syrupus aurantii.
 SHERMAN'S WORM LOZENGES, see Worm lozenges, Sherman's.
 SHERRY, Sack, see Wine.
 SHIELD-BONE, Scapula.
 SHIELD, WATER, *Nelumbium luteum*.
 SHILDER, Humerus.
 SHIN, *O'crea*, *Crista tib'ia*, Sax. *reina*. The spine or anterior part of the tibia or leg. It is, also, called *Anticne'mion*, and *Crea*.
 SHINBONE, Tibia.
 SHINGLES, Herpes zoster.
 SHINLEAF, *Pyrola*.
 SHINLOCK, *Brassica eruca*.
 SHIP FEVER, see Typhus.
 SHITABED, *Leontodon taraxacum*.
 SHIVERING, see Rigor.
 SHOCK, see Concussion.
 SHOCK, NERVOUS, *Vital Shock*, *Vital Depression*, *Nervous Depression*, *Fatal Sinking*. Sudden or instantaneous depression of organic, nervous, or vital power, often with more or less perturbation of body and mind, passing either into reaction, or into fatal sinking, occasioned by the nature, severity or extent of injury, or by an overwhelming moral calamity. — Copland.
 SHOCK, VITAL, Shock, nervous.
 SHOOT, Crick-in-the-neck.
 SHORT, Sax. *reoprt*, from *reipan*, 'to cut, to shear,' shored, *shor'd*, short, (F.) *Court*. A word used, by anatomists, in opposition to long; and to distinguish parts from each other that have otherwise the same name.
 SHORT BONES, for example, are those in which the three dimensions—length, breadth, and thickness—are nearly alike; such are the vertebræ, bones of the carpus, tarsus, &c.
 SHORT-OF-PUFF, Short-winded — s. Ribs, see Costa.
 SHORTSIGHTED, Myopic.
 SHORTSIGHTEDNESS, Myopia.
 SHORTWINDED, Pury.
 SHOTBUSH, *Aralia spinosa*.
 SHOTT, Pleurodynia.
 SHOULDER, Humerus — s. Blade, Scapula — s. Bone, Humerus.
 SHOUP, Hanneh.
 SHOVEL PICKEREL WEED, *Unisema deltofolia* — s. Pond, *Unisema deltofolia*.
 SHOW, see Parturition.
 SHOW-CHOO, see Spirit.
 SHOWER-BATH, see Bath.
 SHRUB, perhaps, from Arabic, *sharab*, 'syrup.' A compound of spirits, lemon-juice, and sugar.

SHRUB, SWEET, *Calycanthus* — s. Sweet-scented, *Calycanthus*.
 SHRUMP-SHOULDERED, see Hump.
 SHUD'DERING, *Fren'itus*, *Phryag'ma*, from (G.) Schauder, Schauer, (F.) *Frémissement*, *Tressaillement*. A peculiar sensation, felt either externally or internally; and which seems to be the result of a spasmodic movement of the parts in which it occurs. A slight feeling of cold sometimes accompanies it. It is, at times, the result of a moral cause, and is often the precursor of shivering.
 SHULL-BANE, Humerus.
 SHUMAC, *Rhus coriaria*.
 SIAGANTRITIS, from *σιαγων*, 'the jaw,' *αντρον*, 'a cavity,' and *itis*, denoting inflammation. Inflammation of the lining membrane of the antrum of Highmore.
 SIAGON, Maxillary bone.
 SIAGO'NAGRA, from *σιαγων*, 'the jaw,' and *αγρα*, 'a seizure.' *Arthritis maxilla'ris*. A gouty or rheumatic affection of the joint of the lower jaw.
 SIALACHUS, Salivation.
 SIAL'AGOGUE, *Sialogo'gus*, *Sial'ogogue*, *Pty-al'ogogue*, *Ptyas'magogue*, *Saliv'eans*, *Saliva'tum*, *Sialocinet'icus*, *Arophlegmat'ians per os*, (F.) *Salivant*; from *σιαλον*, 'saliva,' and *αγω*, 'I expel.' That which provokes the secretion of saliva. Pyrethrum and mercury are sialogogues. Sialogogues may be of two kinds, those which act through the circulation, and those which act immediately on the salivary organs. Mercury belongs to the former, — pyrethrum to the latter class. The chief sialogogues are armoracia, calamus, mezereum, pyrethrum, tabacum, and zingiber.
 SIAL'ICA, from *σιαλον*, 'saliva.' Medicines, which affect the salivary glands.—Pereira.
 SIALISMUS, Salivation.
 SIALOCINETICUS, Sialogogue.
 SIALOLITHI, Calculi, salivary.
 SIALOLOG'IA, from *σιαλον*, 'saliva,' and *λογος*, 'a discourse.' A treatise on saliva.
 SIALOMA, Saliva.
 SIALON, Saliva.
 SIALORRHŒA, Salivation.
 SIALOS'CHESIS, from *σιαλον*, 'saliva,' and *σχεσις*, 'retention.' Retention or suppression of the saliva.
 SIALOSYRINGES, Salivary fistule.
 SIALOZEMIA, Salivation — s. Mercurialis, Salivation, mercurial.
 SIAMESE TWINS, see Twins, Siamese.
 SIBARE, Phrenitis.
 SIBBENS, *Sivens*, *Frambæ'sia Scottica*. An infectious disease in the mountainous parts of Scotland, viewed to be of the venereal kind. *Sivin*, in the Keltic, means raspberry; and it is said that, in this affection, fungi appear like raspberries. From *sivin*, the inhabitants have made *sievin*, *sibben*, *sibbens*, and *sivvens*. By some, this affection is regarded as a complication of the venereal and itch. In the Orkneys, *sibbens* means itch. — Jamieson.
 SIB'ILANT, *Sib'illus*, *Sib'ilians*, from *sibilo*, 'I hiss, I whistle.' Making a hissing or whistling sound. See *Rale sibilant*.
 SIBILISMUS AURIUM, Tinnitus aurium.
 SIBILUS AURIUM, Tinnitus aurium.
 SICCAN'TIA, from *sicare*, 'to dry.' *Xeran'tica*, (F.) *Siccatis*. Drying medicines. See Desiccative.
 SICCATIFS, Siccantia.
 SICCATIO, Drying.
 SICCHA'SIA, *σικχασια*, 'disgust.' A distressing disgust for food; such as is experienced by women with child.

SICILICUM. A Roman weight of about two drachms.

SICK, Sax. *reoc*, *Æger*, *Ægro'tus*, *Nos'eros*, *Noso'des*, *Jacens*, *Laborio'sus*, *Labo'rans*, (F.) *Malade*. Labouring under disease; *Diseas'ed*, *Distemp'ered*, *Ill*, *Ailing*, *Disor'dered*. Such is its acceptance in old English, and generally in the United States. In most parts of the United States, if a patient is affected with a slight indisposition, he is said to be *sick*; if with one more severe, he is said to be *ill*; (Prov.) *bad*, *badly*. In England, it most commonly means,—affected with disorder of the stomach, or nausea.

A sick person, *Æger*, *Ægro'tus*, (F.) *Malade*, who is under the charge of a physician is said to be a *patient*, or the patient of the physician. At times, but rarely, patient is used for a sick person in the abstract.

SICK STOMACH, Milk sickness.

SICKLY, *Morbo'sus*, *Valetudina'rius*, *Adyn'atos*, *Nosac'eros*, *Noso'des*, *Morbose*, *Mor'bulent*, *Unhealth'y*, (Sc.) *Hough*, (F.) *Maladif*. Subject to be sick, or in feeble health. Ailing.

SICKNESS, Disease, Plague — s. Falling, Epilepsy — s. Mountain, Puna — s. River, Milk sickness — s. Sea, Nausea marina — s. of the Stomach, Vomiting — s. Swamp, Milk sickness.

SICLIUM, Sicilium.

SICUA, Cupping-glass.

SICULA, Beta, Penis.

SICYEDON, Cauldron.

SIDA ABUTILON, Abutilon Avicennæ.

SIDE, PAIN IN THE, Pleurodynia.

SIDERATIO, *Syderatio*, *Sideratio*, from *sidas*, *sideris*, 'a star,' because the condition was thought to be produced by the influence of the stars. The state of one struck suddenly, without apparent cause, and as if by the influence of the stars or planets — *Planet-struck*. The ancients comprised under this name, different morbid conditions, such as paralysis, apoplexy, and gangrene.

SIDERATIO, Apoplexy, Asphyxia, Phrenitis — s. Ossis, Spina ventosa.

SIDERATION, Astrobolismos, Sideratio.

SIDERION, Ferramentum.

SIDERITES, Magnet.

SIDERITIS, Magnet, Teucrium chamæpitys.

SIDEROKRENÆ, Water, mineral, (chalybeate.)

SIDEROPEGÆ, Water, mineral (chalybeate).

SIDEROX, Ferrum.

SIDEROXYLON, Chrysophyllum cainito.

SIDE-SADDLE-PLANT, Sarracenia.

SIDHEE, see Gunjah.

SIDMOUTH (CLIMATE OF). Sidmouth is in Devonshire, England, on the sea-beach, at the mouth of the Sid. It is much frequented by invalids, both during the summer and winter. The climate is, however, damp, and subject to sea-fogs.

SIËGE, Anus.

SIELISMOS, Salivation.

SIELON, Saliva.

SIEVE, see Cribration — s. Drum, see Cribration.

SIFFLEMENT (F.), from *siffler*, 'to whistle.' Whistling.

SIFFLEMENT MODULÉ, *Chant des artères*, *Bruit musical*, 'modulated whistling, or music of the arteries.' A kind of sound heard on auscultation, resembling, at times, the humming of certain insects. Various musical sounds, (F.) *Bruits musicaux*, are described from fancied resemblances:—as *Bruit de piaulement*, resembling the clucking of the hen;—*Bruit de jappement*, resembling the barking or yelping of a young dog, &c.

The sound is chiefly met with in those labouring under chlorosis.

SIGAULTIAN SECTION, Symphysectomy.

SIGE, Taciturnity.

SIGH, Suspirium.

SIGHT, Vision — s. Askew, Dysopia lateralis — s. False, Metamorphopsia, Pseudoblepsia — s. Feebleness of, Amblyopia.

SIGILLUM SALAMONIS, Convallaria polygonatum — s. Virginitatis, Hymen.

SIGMATOID, Sigmoid.

SIGMOID, *Sigmoid'al*, *Sig'matoid*, *Sigmoï'des*, *Sigmo'des*, *Sigmoï'deus*; from *sigma* and *eidos*, 'resemblance.' That which has the form of the Greek S or C.

SIGMOID CARTILAGES, Semilunar cartilages.

SIGMOID CAVITIES OR FOSSEÆ OF THE ULNA, (F.) *Cavités* ou *Fosses sigmoïdes*, are two notches at the upper part of that bone,—one for the reception of the humerus; the other for that of the radius.

SIGMOID FLEXURE OF THE COLON, *Fleau'ra sigmoï'dea* seu *ill'aca*, is a turn the colon takes immediately before its termination in the rectum.

SIGMOID FOSSA (of the temporal bone), Fossa sigmoidea.

SIGMOID or SEMILUNAR VALVES, *Valvulæ Sigmoï'dea*, *Proces'sus Sigmoï'des*, (F.) *Valvules sigmoïdes* ou *semilunaires*, are three valvular folds, at the commencement of the pulmonary artery and aorta. These valves have the form of a crescent, when applied against the parietes of the vessel. When the blood is sent from the ventricles by their contraction, the valves are applied against the sides of the vessel; but, during the diastole of the ventricle, they are depressed, and prevent the blood from returning to the heart. At the middle of the convexity of each valve is a small, hard, triangular granulum, called *Corpus'culum* seu *Glob'ulus Aran'tii*, which completely closes up the passage. It is, also, called *Corpusculum Morgagn'i* and *C. Sesamoï'deum*, (F.) *Globule d'Arantius*.

SIGN, *Signum*, *Sem'ion*, (F.) *Signe*. Any present or past circumstance, afforded by the examination of a patient, or of matters concerning him, whence a conclusion may be drawn regarding the nature and seat of his disease. The phenomena which precede the disease are called *anames'tic* or *comment'orative signs*;—those which accompany it are termed *diagnost'ic*, if they reveal the nature or seat of the disease,—*prognos'tic*, when they indicate its probable duration and termination. See Symptom.

SIGNA ASSIDENTIA, see Assidens.

SIGNATURE, *Signatu'ra*, *Signatio*, from *signum*, 'a sign,' *Episphagism'os*. This term was applied in the Eastern countries, in the middle ages, to mystic characters of good or bad augury, with which it was pretended that every one was marked by the star under which he was born.

SIGNATURES OF PLANTS meant certain peculiarities in their external formation or colour, which indicated that they were adapted for particular diseases:—as in the case of the *Lungwort*, *Liverwort*, &c.

SIGNES AVANT-COUREURS, Precursory signs—s. *Précurseurs*, Precursory signs.

SIGNUM, see Parturition — s. Characteristicum, see Pathognomonic — s. Conjunctum, see Pathognomonic — s. Diacriticum, see Diacritica signa — s. Morbi essentialia, see Pathognomonic.

SILACH, *Silac*. An Arabic word, used to designate thickening of the eyelids, *Crassit'ies Palpebrarum*; and, also, *Alopecia*.—Forestus, Stephanus.

SILENCE, see Murmur, respiratory.

SILENE CRASSIFOLIA, Cucubalus behen—

s. Inflata, Cucubalus behen — s. Thorei, Cucubalus behen.

SILE'NĒ VIRGIN'ICA, *Ground Pink, Wild Pink, Catch Fly.* Ord. Caryophyllacæ. The root has been employed in decoction, as an efficacious anthelmintic.

SILENE PENNSYLVAN'ICA probably has the same properties.

SILER LANCIFOLIUM, *Laserpitium siler* — s. Montanum, *Laserpitium siler*.

SIL'IQUA, *Ceratiön*; the carat. A weight of about four grains. A pod.

SIL'IQUA ARABICA, *Tamarindus* — s. Araci aromatici, see Vanilla — s. Banillæ, see Vanilla — s. Dulcis, *Ceratonium siliqua* — s. Vanigliæ, see Vanilla — s. Vanilliæ, see Vanilla.

SIL'IQUASTRUM PLINII, *Capsicum annum.*

SILK, *Sericum.*

SILK GRASS, *Yucca filamentosa* — s. Weed, *Asclepias Sullivantii*, *Asclepias tuberosa* — s. Weed, common, *Asclepias Syriaca* — s. Weed, flesh-coloured, *Asclepias incarnata* — s. Weed, swamp, *Asclepias incarnata* — s. Worm, see *Sericum*.

SILLON, Sulcus — s. *Horizontal de la veine ombilicale*, see Liver — s. *Transversale*, see Liver — s. *de la Veine porte*, see Liver.

SILLONNEMENT, Segmentation.

SILU, Camus.

SILPHIUM, *Laserpitium.*

SILPH'UM LACINIATUM, *Rosin weed, Compass plant, Polar plant.*

SILPHIUM PERFOLIATUM, *Cup Plant, Turpentine Sun Flower*, and

SILPHIUM TEREBINTHINACEUM, *Prairie Burdock*; *Nat. Order*, Compositæ; indigenous in Ohio and Michigan, and flowering from July to September; yield a fragrant gum which is esteemed stimulant and antispasmodic.

SILURUS GLANIS, see *Icthyocolla*.

SILUS, Camus.

SILVER, Argentum — s. Ammonio-chloride of, see Argentum — s. Chloride of, see Argentum — s. Chloruret of, see Argentum — s. Cyanide of, see Argentum — s. Cyanuret of, see Argentum — s. Iodide of, see Argentum — s. Ioduret of, see Argentum.

SILVER LEAF, *Magnolia macrophylla.*

SILVER, MURIATE OF, see Argentum — s. Nitrate of, Argentum nitras — s. Oxide of, see Argentum.

SILVER AND AMMONIA, CHLORIDE OF, see Argentum — s. and Ammonia, chloruret of, see Argentum — s. and Soda, Hyposulphite of, Sodæ et argenti hyposulphis.

SILYBUM, *Carduus marianus* — s. *Maculatum*, *Carduus marianus* — s. *Marianum*, *Carduus marianus*.

SIMA'BA CEDRON. *Nat. Fam.* Simarubacææ. A South American tree, the seeds of which — *cedron seeds* — have been used as an antidote for snake-bites. They have, also, been proposed in mental diseases and in epilepsy. The scrapings of the wood have been used as a substitute for sulphate of quinia.

SIMABA QUASSIOIDES, *Nima quassioides.*

SIMAROUBA, *Quassia simarouba* — s. Bitter, *Quassia simarouba* — s. *Faux*, *Malpighia mourella.*

SIMARUBA, *Quassia simarouba.*

SIMARUBA OFFICINALIS, *Quassia simarouba.*

SIMILATIO, Assimilation.

SIMITIUM, *Plumbi subcarbonas.*

SIMO, Camus.

SIMONEA FOLLICULORUM, *Acarns folliculorum.*

SIMOTRACHELUS, *Bysauchen.*

SIMPLER'S JOY, *Verbena hastata.*

SIMPLES. Medicinal herbs. One skilled in simples is called a *Simplist*, a *Rhizotomist*.

SIMPLIS, see *Simplex*.

SIMULATED DISEASES, *Feigned diseases.*

SIMULATI MORBI, *Feigned diseases.*

SIMUS, Camus.

SINA LEVANTICA, *Artemisia santonica.*

SINAPELÆ'ON, from *σιναι*, 'mustard,' and *ελαον*, 'oil.' Oil impregnated with mustard.

SINAPI, *Sinapis.*

SINA'PIS, *S. nigra* seu *cer'nua* seu *Olivieria'na*, *Bras'sica nigra*, *Napus*, *Eru'ca*, *Sina'pē*, *Sina'pi*, *Sine'pi*, *Na'pium*, *Napy*, *Common Black Mustard*, (F.) *Moutarde noire ou grise*, *Sénévé*, *Sauve*. Ord. Cruciferae. Sec. Syst. *Tetradynamia Siliquosa*. The seeds are inodorous, when entire; but, when bruised, the colour is very pungent; taste bitterish and acrid. They yield their virtues to water, and afford a bland oil by expression. The seeds are stimulant, diuretic, emetic, and rubefacient. They are sometimes recommended to be swallowed whole, in dyspepsia, torpor of the bowels, &c. Externally, they are applied in the form of cataplasm. See *Sinapism*.

SINAPIS ALBA, *S. folio'sa*, *Bonannia officina'lis*, *Napus Leuco-sina'pis*, *White Mustard*, is also used medicinally. It is somewhat less pungent than the black. The distilled oil—*Oleum Sinapis*—is a powerful stimulant and rubefacient. In the pharmacopœias of the United States and London, *Sinapis* is the seeds of *Sinapis nigra* and *Sinapis alba*.

Whitehead's Essence of Mustard consists of oil of turpentine, camphor, and a portion of spirit of Rosemary: to which is added a small quantity of flour of mustard. It is a celebrated embrocation for rheumatism, &c.

Whitehead's Essence of Mustard Pills consist of yellow resin and balsam of tolu enough to make into pills.

Mustard Whey is made by taking bruised mustard seeds $\frac{3}{4}$ ss, and milk Oj. Boil together until the milk is curdled, and strain.

This whey is used in dropsy.

SINAPIS ARVEN'SIS, *S. Timoric'na*, *Charlock*, *Wild Mustard*, *Garlock*, *Chadlock*, *Rush*, (Sc.) *Runches*, *Saldricks*, *Skelloch*, *Skellie*. The seeds are sometimes substituted for black mustard.

SINAPIS CER'NUA, *Sinapis* — s. *Eruca*, *Brassica eruca* — s. *Foliosa*, *S. alba* — s. *Nigra*, see *Sinapis alba* — s. *Oliveriana*, *Sinapis* — s. *Tamoriana*, *S. arvensis* — s. *Tuberosa*, *Brassica rapa*.

SINAPISIS, *Bole Armenian.*

SIN'APISIM, *Sinapis'mus*, from *sinapis*, 'mustard.' A cataplasm, of which mustard forms the basis, which is used for exciting redness, and acting as a counter-irritant. It is prepared by mixing flour of mustard and vinegar together to the due consistency. See *Cataplasm sinapis*.

SIN'CIPIUT, *Sincipital Region*, *Syn'ciput*, *Hemiccephal'um*. The French use it synonymously with *vertex*, *Mesocranium*, *Mesocranium*. By some, it is applied to the frontal region or forehead, or forehead of the cranium, *Hemiccephal'um*, *Hemiccephalum*. The parietal bones have been called *sincipital bones*, *Ossa sincip'itis*, (F.) *Ossa du sinciput*.

SINDON, *σινδων*, very fine linen. A small piece of rag, or round pledget, supported by a thread at the middle, and introduced into the opening in the cranium made by the trephine.

SINEPI, *Sinapis.*

SINEW, *Tendon.*

SINGLETON'S GOLDEN OINTMENT is formed of sulphuret of arsenic (realgar,) and lard or spermaceti ointment.

SINGULT'OUS, *Lygmo'des*, *Lygo'des*, *Lyngo'des*, *Lynggo'des*, (F.) *Singultoux*, from *singultus*, 'hicough.' Relating to or affected with hicough.

SINGULTUS, *Lynx, Lygmus, Spasmolyg'mus, Clonus* seu *Pneustis singul'tus, Hiccough, Hiccup, (Prov.) Heuks, Yoke, (Sc.) Eskin, Eeskin, (F.) Hoquet.* A noise made by the sudden and involuntary contraction of the diaphragm, and the simultaneous contraction of the glottis, which arrests the air in the trachea. It is a symptom of many morbid conditions, and especially of gangrene, but occurs, frequently, in persons otherwise in good health.

SINISTRAD, from *sinister*, 'to the left hand.'

A term used by Dr. Barclay, adverbially, to signify 'towards the sinistral aspect.' See *Mesial*.

SINISTRAL ASPECT, see *Mesial*.

SINKING, FATAL, Shock, nervous.

SINUEUX, Sinuous.

SINUOSITAS, Sinus.

SINUOUS, *Sinu'o'sus, (F.) Sinueux*, from *sinus*, 'a bay or curve.' An epithet given to certain ulcers, and especially to certain fistulæ, which are tortuous.

SINUS, *Sinu'o'sitas, Colpos, Abscon'sio, Eury-cho'ria, Reces'sus, (F.) Golfe*, 'a cavity.' Any cavity, the interior of which is more expanded than the entrance. In this sense, anatomists have applied the term to cavities in certain bones of the head and face. It has been, also, applied to certain venous canals, into which a number of vessels empty themselves; such as the sinuses of the dura mater and of the spine; the sinus of the vena porta; uterine sinuses, &c.;—and to the bosom.

In *surgery*, it means a long, narrow, hollow track, leading from some abscess, diseased bone, &c. (F.) *Clapier*.

Sinuses of bones form part of the nasal cavities. They are the frontal, sphenoidal, maxillary, &c. The name has also been given, occasionally, to the ethmoid and mastoid cells.

SINUS ACUSTICUS, Auditory canal, internal—*s. Ampullaceus, Cavitas elliptica*—*s. Aortici, Sinus of Valsalva*—*s. Arteriosus, S. pulmonalis*—*s. Basilar, Sinus transversus*—*s. Caverneux, Cavernous sinus*—*s. Cavernosi uteri, Sinus uterini*—*s. Cavernosus, Cavernous sinus*—*s. Cerebri, Ventricles of the brain*—*s. Choroidien, S. quartus*—*s. Circular, of Ridley, Sinus coronarius*—*s. Circularis, S. coronarius*—*s. Communis*, see *Semicircular canals*—*s. Coronaire du cœur*, see *Cardiac veins*.

SINUS CORONARIUS, *S. circula'ris* seu *circula'ris Rid'leyi, Circular sinus of Ridley, Coronary sinus*. A venous canal, which surrounds, in a more or less regular manner, the pituitary fossa and gland, emptying itself into the corresponding cavernous sinus by each of its extremities.

SINUS, CORONARY, *Sinus coronarius*—*s. Coronary of the heart, Sinus coronary, venous*.

SINUS CORONARY, VENOUS, *Coronary sinus of the heart*. A name given, on account of its great size, to that portion of the great coronary vein which embraces the left auriculo-ventricular furrow.

SINUS COXE, see *Cotyloid*—*s. Droit, S. quartus*.

SINUS DEXTER CORDIS, *S. vena'rum cava'rum* seu *veno'sus, Saccus vena'rum cava'rum*. The right auricle of the heart:—*Atrium cordis dextrum*. See *Auricula*.

SINUSES OF THE DURA MATER, *S. seu Fis'tula* seu *Cavita'tes* seu *Ventriculi* seu *Tubuli* seu *Sanguiductus* seu *Receptacula Dura matris*, are formed by a separation of the layers of the dura mater, which acts as a substitute for the outer membrane of veins. Bichat admits only four great sinuses, of which all the others seem to be dependencies;—the *two lateral sinuses*, the *straight sinus*, and the *longitudinal sinus*. To the lateral sinuses belong,—the *petrous sinuses*, superior and inferior; the *transverse sinus*; the

cavernous sinuses; the *coronary sinus*, and the *occipital sinuses*. To the straight sinus belongs the *inferior longitudinal*. The longitudinal sinus, properly so called, has no sinus under its dependence.

SINUS FALCIFORMIS INFERIOR, *S. longitudinalis inferior*—*s. Falciformis superior, S. longitudinalis superior*—*s. Fourth, Torcular Herophili*—*s. Genæ pituitarius, Antrum of Highmore*—*s. of the Jugular vein*, see *Jugular veins*—*s. Lacrymalis, Lachrymal sac*—*s. Lactiferus*, see *Lactiferous vessels*.

SINUSES OF THE LARYNX, *Ventricles of the larynx*.

SINUSES, LAT'ERAL, *Sinus transver'si, S. magni, S. latera'les, (F.) Sinus lateraux*. Each of these sinuses, distinguished into right and left, begins at the torcular Herophili or confluence of the sinuses, and terminates at the sinus of the jugular vein.

SINUS LATÉRAUX, *Sinuses, lateral*.

SINUSES, LONGITUDINAL, *S. Longitudinal'es*.

These are two in number. 1. **SUPERIOR LONGITUDINAL SINUS**, *S. falciformis superior* seu *triangularis. Sinus median, (Ch.)* A long, triangular canal; convex above, concave below; which occupies the whole of the upper edge of the falx cerebri. It is broad behind, and much narrower before, where it commences by a *cul-de-sac*, at the crista galli of the ethmoid bone. It passes along the frontal or coronal crest, sagittal suture, and the vertical groove of the occipital bone. It receives several veins from the dura mater; and all those that are spread over the convex and plain surfaces of the two hemispheres of the brain. It discharges itself into the upper part of the torcular Herophili. 2. **INFERIOR LONGITUDINAL SINUS**, *S. falciformis inferior, Vena falcis cerebri*. This is much narrower than the last, and occupies the inferior edge of the falx cerebri, from its anterior third to the tentorium cerebelli, where it terminates, commonly by two branches, in the straight sinus.

SINUS MAGNI, *Sinuses, lateral*—*s. Maxillary, Antrum of Highmore*—*s. Median, Sinus longitudinal superior*—*s. Median*, see *Semicircular canals*—*s. Muliebris, Vagina*.

SINUS, OCCIP'ITAL, *Sinus occipita'lis*. These sinuses commence at the sides of the foramen magnum ossis occipitis, and ascend—becoming broader and nearer each other—into the substance of the falx cerebelli, where they frequently unite. Each opens into the inferior part of the torcular Herophili. They receive the veins of the falx cerebelli, of the dura mater which lines the fossæ cerebelli, and of the posterior part of the cerebellum. Haller and Sömmering have given them the name of *posterior occipital sinuses*, to distinguish them from the transverse sinus, which they have called *anterior occipital sinus*.

SINUS OCCIPITALIS ANTERIOR, *Sinus transversus*—*s. Ophthalmic*, see *Cavernous sinus*—*s. Perpendicularis, S. quartus*—*s. Ovatius*, see *Crista vestibuli*—*s. Pituitarii frontis, Frontal sinuses*—*s. Pœularis*, see *Ejaculatory ducts*—*s. Polymorphus, Cavernous sinus*—*s. Portarum*, see *Liver*—*s. Prostatæ*, see *Ejaculatory Ducts*—*s. Pudenti, Vagina*—*s. Pudoris, Vagina, Vulva*—*s. Pulmonales, Sinuses of Valsalva*.

SINUS PULMONAL'IS, *S. sinis'ter cordis* seu *vena'rum pulmonalium* seu *arterio'sus, Saccus vena'rum pulmonalium, Atrium cordis sinis'trum*. The left auricle of the heart. See *Auricula*.

SINUS OF THE PULMONARY VEINS, *Auricle, left*.

SINUS QUARTUS, *S. perpendicular'is, Straight sinus, (F.) Sinus choroidien (Ch.), Sinus droit*. This sinus—triangular throughout; wide posteriorly; narrower anteriorly; slightly oblique downwards and backwards—passes along the base of the falx

cerebri, from the termination of the inferior longitudinal sinus to the torcular Herophili. It receives the inferior longitudinal sinus, the veins of the lateral ventricles or *venæ Galeni*, the superior cerebellous veins, &c.

SINUS RENUM, Pelvis of the kidney—s. Rhomboides, see Ventricles of the brain—s. Rotundus, see Crista vestibuli—s. of the Septum lucidum, Ventricle, fifth—s. Sinister cordis, S. pulmonalis—s. Sphenoidal, Cavernous sinus—s. Straight, S. quartus—s. Superciliares, Frontal sinuses—s. Terminalis, Circulus venosus—s. Transversi, Sinuses, lateral.

SINUS TRANSVER'SUS, *S. occipitalis anterior, Basilar sinus*. This sinus lies transversely at the anterior part of the basilar process of the occipital bone. It forms a communication between the two petrous sinuses, and the cavernous sinus of one side, and those of the other. Its breadth is commonly very great. It is situate between two layers of the dura mater, and presents, internally, a kind of cavernous tissue.

SINUS TRIANGULARIS, S. longitudinal, superior—s. Urogenitalis, Urogenital sinus.

SINUS, UTERINI, *S. cavernosi Uteri, Uterine sinuses*. A name given to cavities, formed by the uterine veins in the substance of the uterine parietes. They are very large during pregnancy.

SINUS UTRICULOSUS, see Semicircular canals—s. *des Vaisseaux séminifères*, Corpus Highmori.

SINUSES OF VALSALVA are three depressions in the aorta—*Sinus aortici*,—and pulmonary artery—*Sinus pulmonales*—immediately opposite the semilunar valves. Their use is to leave the edges of the valves free, so that they can be caught by the reflux blood. Where the aorta is about to send off the first of its large branches, at the top of the thorax, it is of great size, and has been called the *Large sinus of Valsalva*.

SINUS OF THE VENA CAVA, Auricle, right—s. Venarum cavarum, S. dexter cordis—s. Venarum pulmonalium, S. pulmonalis—s. Venosus, S. dexter cordis.

SINUSES, VERTEBRAL, (F.) *Sinus vertebraux*. Two great venous sinuses, different from those of the dura mater, which extend the whole length of the vertebral canal, from the occipital foramen to the end of the sacrum, behind the bodies of the vertebrae, before the dura mater, and at the sides of the posterior vertebral ligament. At their inner side they communicate with each other by means of branches, which form true *transverse sinuses*. They are situate at the middle of the body of each vertebra, passing under the posterior vertebral ligament. They receive, at their middle part, the veins that arise in the spongy tissue of the vertebrae. By their external side, the vertebral sinuses communicate with the posterior branches of the vertebral, intercostal, and lumbar veins. At their posterior side they receive the veins, which creep on the prolongation of the dura mater that envelops the marrow.

SINUS VULVÆ, Rima vulvæ.

SIPeERI, Bebeeru.

SIPeERINE, see Bebeeru.

SIPHAR, Peritoneum.

SIPHILIS, Syphilis.

SIPHITA, Somnambulism—s. Prava, Choreia.

SIPHO, Siphon—s. Urinæ, Diabætes.

SIPHON, *Sipho, σίφων*, 'a tube.' A bent tube, whose limbs are of unequal length, employed in pharmacy for transferring liquids from one vessel to another. With this view, the shorter limb is plunged into the liquid; and air is sucked from the extremity of the lower limb. The pressure of the atmosphere forces the fluid through the tube; and the flow will continue as long as the extremity of the longer limb is below the level

of the fluid in which the shorter limb is immersed.

An exhausting syringe is, at times, attached to the longer extremity of the siphon, by means of which the air can be drawn from it.

SIPHON, PLUNGING. An instrument, used in pharmacy for obtaining a specimen,—at times, a measured specimen,—of any liquid. With this view, the instrument is immersed into liquid, and allowed to remain there until full. The opening at the top is then closed with the thumb; and the contents, thus removed, are allowed to flow out by removing the thumb and permitting the entrance of air. It is a form of the *pipette*.

SIPHONIA CAHUCHU, see Caoutchouc—s. Elastica, see Caoutchouc.

SIPHUNCULUS, Syringe.

SIRA, Orpiment.

SIRENS, Symmeles.

SIRIASIS, *Coup de Soleil*, Insolation, Phrenitis—s. *Ægyptiaca, Coup de Soleil*.

SIRIUM MYRTIFOLIUM, Santalum album.

SIRIUS, Canicula.

SIRUP, Syrup—s. *de Capillaire*, see Adiantum capillus veneris—s. *de Coralline*, see Corallina Corsicana—s. *Simple*, Mel despumatum.

SIRUP, Syrup.

SISON AMMI, *Æthusa ammi, Cnidium tenuifolium, Pimpinella laterifolia, Seseli fœniculifolium*. Ord. Umbelliferae. Sex. Syst. Pentandria Digynia. The plant that affords the *Ammi verum* of the shops; (F.) *Ammi des Boutiques*. The seeds—*Semen Ammius cretici seu veri*—were once used as a carminative.

SISON AMOMUM, (F.) *Anome faux*, is considered to be excitant and diuretic. It is the *field honewort*.

SISON ANISUM, Pimpinella anisum—s. Podagraria, Ligusticum podagraria.

SISTENS, Epischeticus.

SISYMBRIUM ALLIARIA, Alliaria—s. Barbara, Erysimum barbara—s. Erucastrum. Brassica eruca—s. Menthastrum, Mentha aquatica.

SISYMBRIUM NASTURTIUM, *Nasturtium aquaticum seu officinale, Liver odoratum, Cratægisium, Cressi, Cardaminæ fontana seu nasturtium, Water Cress*, (F.) *Cresson de fontaine*. Ord. Cruciferae. Sex. Syst. Tetradynamia Siliquosa. Water-cresses are commonly used in salad. They have obtained a place in the materia medica for their antiscorbatic qualities.

SISYMBRIUM OFFICINALE, Erysimum—s. Parviflorum, S. sophia.

SISYMBRIUM SOPHIA, *S. parviflorum, Herb Sophia, Sophia Chirurgorum, Flux or Flux-weed*, (F.) *Sagees de Chirurgiens*. It was once reputed to be anthelmintic, and valuable in hysterical affections. It is not used.

Other species of *Nasturtium*, as N. PALUSTRE, *Marsh water-cress*; and N. AMPHIBIUM, *Water-radish*, possess similar virtues with *Nasturtium officinale*.

SISYRINCHIUM BERMUDIANUM, *Blue-eyed Lily, Physic or Scurvy grass*; indigenous; Order, Iridaceæ; flowering from June to August. Used as a cathartic by the Thompsonians. A decoction of the root is acrid and cathartic.

SITICULOSUS, Dipsodes, see Alterative.

SITIENS, Dipsodes.

SITIS, Thirst—s. Intensa, Polydipsia—s. Morbosa, Polydipsia.

SITKA, MINERAL WATERS OF. See Archangel, New, mineral waters of.

SITOS, Aliment.

SITUS ALIENUS, Ectopia—s. Anomalus seu perversus intestinum, Splanchnectopia—s. Mutatus, Ectopia, see Monster—s. Perversus, Ectopia.

SITZBATH, see Bath, half.

SIUM, *S. nodiflorum* seu *angustifolium* seu *Ber'ula* seu *erec'tum* seu *inci'sum*, *A'pium sium*, *Heliosciad'ium nodiflorum*, *Ber'ula angustifolia*, *Ber'ula*, *Creeping Water-parsnep*, (F.) *Berle nodiflore*. Ord. Umbelliferae. Sez. *Syat*. Pentandria Digynia. It is stimulant, and supposed to be diuretic and lithontriptic. It is, sometimes, employed in cutaneous eruptions.

SIUM ANGUSTIFOLIUM, *S. nodiflorum*—s. *Apium*, *Apium graveolens*—s. *Berula*, *S. nodiflorum*—s. *Bulboecastanum*, *Bunium bulboecastanum*—s. *Carvi*, *Carnu*—s. *Erectum*, *S. nodiflorum*—s. *Graveolens*, *Apium graveolens*—s. *Incisum*, *S. nodiflorum*.

SIUM LATIFOLIUM is the common *Water-parsnep* of the United States. It is said to be poisonous.

SIUM LUNA'RĒE. The root is eaten by the Chepwyans. It has an agreeable nutty flavour. By the Canadians, it is called *Queue de Rat*. The poisonous roots of *Cicuta virosa*, *C. maculata*, and *C. bulbifera*, are often mistaken for it.—Sir J. Richardson.

SIUM NINSI. The plant whose root is called *Radic Ninsi*, *Ninuzin*, *Nindsin*. This root was long supposed to be the same as ginseng, and it possesses similar, though weaker properties. See *Panax schinseng*.

SIUM NODIFLORUM, *Sium*—s. *Silaus*, *Peucedanum silaus*.

SIUM SIS'ARUM, *Skirret*, (F.) *Chervi*, *Givole*, is used as a salad in Europe; and has been thought a useful diet in chest affections.

SIUM VULGARE, *Ligusticum podagraria*.

SIVVEN, *Rubus idæus*.

SIVVENS, Sibbens.

SKAW, Scall.

SKEELY, Strabismus.

SKELETIA, Emaciation.

SKELETOL'OGY, *Sceletolog'ia*, (F.) *Squeletologie*, from *skeleton*, and *logos*, 'a discourse.' A treatise on the solid parts of the body. This part of anatomy comprehends *Osteology* and *Syndesmology*.

SKEL'ETON, *Scel'etum*, *Skeleton*, *Cadaver exsiccatum*; (Old Eng. and Prov.) *At'omy*, *Anat'omy*, (Sc.) *Spaig*, (F.) *Squelette*, *Charpente osseuse*: (*σκελετος*, 'dried up,' from *σκληω*, 'I dry.') A dried body. The aggregate of the hard parts of the body, or the bones. A skeleton is found in almost all animals, although it may not always be formed in the same manner. In some, as in the crustacea and testacea, it is wholly or partly external, *Eco-skeleton*, *Dermo-skeleton*. In others, as in birds, the mammalia, &c., it is internal, *Endo-skeleton*, *Neuro-skeleton*. It serves as a support for other organs. On it the general shape of the body and of its various parts is greatly dependent. When the bones are united by their natural ligaments, the skeleton is said to be natural, *Scel'etum naturallē*; when articulated by means of wires, artificial or articulated, *Scel'etum artificia'le*.

SKELETOPŒ'IA, *Sceletopœ'a*, *Sceletu'sis*, from *skeleton*, and *ποιω*, 'I make.' The part of practical anatomy which treats of the preparation of bones, and the construction of skeletons. Bones are prepared to exhibit their conformation, structure, chymical composition, mode of development, and changes; the different cavities formed by their union; and to demonstrate their connexions, relations, modes of union, &c.

SKELLIE, *Sinapis arvensis*, Strabismus.

SKELLOCH, *Sinapis arvensis*.

SKEVISCH, *Erigeron Philadelphicum*.

SKEVISH, FLEABANE, *Erigeron Philadelphicum*.

SKEW-SIGHT, *Dysopia lateralis*.

SKIN. Cutis—s. Bronzed, see Capsule, renal.

SKIN-BIND, Induration of the cellular tissue.

SKIN-BOUND DISEASE, Induration of the cellular tissue.

SKIN, SCARF, Epidermis.

SKIN-TIGHT, Induration of the cellular tissue.

SKIOMACHIA, *Sciomachy*.

SKIRRET, *Sium sisarum*.

SKIRRHUS, *Scirrhus*.

SKIRSE, *Scirrhus*.

SKITER, *Diarrhœa*.

SKOKE, *Phytolacca decandra*.

SKOLEMORA FERNAMBUCENSIS, *Geof-frœa vermifuga*.

SKOLIOSIS, *Scoliosis*.

SKUE-SIGHT, *Dysopia lateralis*.

SKULL, Cranium.

SKULL-CAP, *Calvaria*, *Scutellaria galericulata*—s. *Cap*, *maddog*, *Scutellaria laterifolia*.

SKUNK-CABBAGE, *Dracontium fœtidum*.

SKUNK-WEED, *Dracontium fœtidum*.

SLAB, *Torticollis*.

SLABBERING, Slavering.

SLATE, IRISII, *Hibernicus lapis*.

SLATERS, *Onisci aselli*.

SLATKALA TRAVA, see Spirit.

SLAVERING, *Slab'bering*, *Slob'bering*, *Driv'elling*, (Old E.) *Piriling*, from *saliva*. *Ptyalis'imus iners*, (F.) *Bave*. Involuntary flow of saliva, from sluggishness of deglutition, without increased secretion. It is seen in the infant, the aged, and the idiot.

SLEEP, Sax. *rlap*: *Somnus*, *Sompnus*, *Sopor*, *Dormit'io*, *Hypnos*, (F.) *Sommeil*. Temporary interruption of our relations with external objects. A repose of the organs of sense, intellectual faculties, and voluntary motion.

The act of quitting this condition is called *awaking*, (F.) *Évigation*, *Réveil*. Sometimes this is progressive and natural; at others, sudden and starting; (F.) *Réveil en sursaut*,—as in nightmare, affections of the heart, hypochondriasis, &c.

SLEEP, MAGNET'IC, *Hypno'sis biomagnet'ica*, is the sleep induced by the so-called animal magnetism. See Magnetism, animal.

SLEEP, NERVOUS, see Magnetism, animal.

SLEEPLESSNESS, *Insomnia*.

SLEEP-WALKING, *Somnambulism*.

SLIACS, MINERAL WATERS OF. Sliacs is a favourite bathing-place in Hungary, a few miles from Neusohl. Some of the waters are cold; others, thermal: the former are carbonated chalybeates; the latter are much used in the same cases as thermal springs in general.

SLIDING OF THE FLAP, see Flap.

SLIEVE-FISH, *Sepia*.

SLING, (G.) *Schlinge*, *Mittel'la*, *Mit'rrium*, (F.) *Écharpe*. A bandage employed to keep the forearm bent on the arm, in cases of injury done to those parts, in fracture of the clavicle, injury of the hands, &c. A handkerchief is often sufficient for this purpose. It must be folded diagonally, and be tied, by the extremities, round the neck. The French surgeons have used many varieties of *Écharpes* or *slings*; as the *Grande écharpe*, *Écharpe moyenne*, *Petite écharpe*, *Écharpe de J. L. Petit*, &c.

SLIPPERS, *Impatiens*.

SLIT AND TAIL BANDAGE, *Invaginated bandage*.

SLOBBERING, Slavering.

SLOE, *Viburnum prunifolium*.

SLOE-TREE, *Prunus spinosa*.

SLOKE, GREEN, *Ulva latissima*.

SLOUGH, *Eschar*.

SLOVEN WOOD, *Artemisia abrotanum*.

SLOWS, Milk-sickness.

SLUG, Limax—s. *Sea*, *Biche de Mer*.

SLUMBER, *Somnolency*.

SMALLAGE, *Apium graveolens*.

SMALL-POX, Variola—s. Modified, Varioloid.
 SMALT, *Pratox'ide of Cobalt, Smaltum, Safre, Zaffre, Azur, Blue Starch*. This oxyd has been given in rheumatism, in the dose of ten to twenty grains. A larger quantity excites vomiting.
 SMARAG'DUS, *σμαραγδος*, (F.) *Émeraude*. The emerald. It was formerly regarded as a tonic.
 SMARTWEED, *Polygonum hydropiper*, P. punctatum.
 SMECTICA, Detergents.
 SMECTIS, Cimolia terra.
 SMECTRIS, Cimolia terra.
 SMEGMA, *σμηγμα*, from *σμηγεω*, 'to wipe, to rub off.' Soap, grease, a salve, a liniment. Also, the secretion from the sebaceous follicles of the skin.
 SMEGMA ARTICULARE, Synovia—s. Cutaneum, see Sebaceous glands.
 SMEGMA PRÆPUTII, *Sebum præputiæ*. The fatty secretion from the sebaceous follicles of the glans penis.
 SMEGMATORRHŒA, Stearrhœa.
 SMEGMORRHŒA, Stearrhœa.
 SMELL SENSE OF, Olfaction.
 SMELLING, Olfaction.
 SMELLOME'S OINTMENT FOR THE EYES, Ceratum resinæ.
 SMILACINA RACEMOSA, *False Spikenard*; indigenous; Ord. Liliaceæ; is said to be alterative, diuretic and diaphoretic.
 SMILAX, *σμιλαξ*, *Taxus baccata*—s. *Aspera* Chinensis, *Smilax China*—s. *Aspera* Peruviana, *Smilax sarsaparilla*—s. *Canellæfolia*, *S. pseudo-China*.
 SMILAX CHINA, *S. aspera* *Chinensis*. Ord. Smilacæ. *Sex. Syst.* Dicoica Hexandria. The root—*China, Ch. orientalis* seu *ponderosa* seu *vera*, *Sankira, Gauquava, China root*, (F.) *Squine, Esquine, Racine de Chine*. Formerly much used in cutaneous and venereal affections.
 SMILAX GLAUCA; indigenous; has similar virtues to those of *S. Sarsaparilla*.
 SMILAX HEDEREFOLIA, *S. pseudo-China*—s. *Indica* *Spinosa*, *Smilax pseudo-China*—s. *Officinalis*, *Smilax sarsaparilla*.
 SMILAX PSEUDO-CHINA, *S. Indica* *spinosa* seu *canellæfolia* seu *hederæfolia*, *China occidentalis* seu *spuriæ* *nodosæ*, *American* or *West India China*. In scrofulous disorders, the root has been often preferred to the oriental kind. In other cases, it possesses similar virtues.
 SMILAX SARSAPARILLA, *S. officinalis*, *Sarsaparilla*, *Sartaparilla*, *Smilax aspera* *Peruviana*, *Sarza*, *Sarsa*, *Carivillan'di*, *Tea* *Pecan'ga*, *Macapatti*, *Zarsa*, *Zarzoparilla*, (F.) *Salsepareille*. The root of this and other species of *Smilax* is inodorous; taste bitterish, feculaceous, and fibrous; of a dark colour externally; white within. It is possessed of diuretic and demulcent properties, and has been often employed in the sequelæ of syphilis; when, after a mercurial course, nocturnal pains, ulcerations, &c., continue. It has, also, been advised in scrofula, chronic rheumatism, &c.; but its efficacy is, to say the least of it, a matter of doubt. Dose, ℞j to ℞j of the powder.
 It is obtained from Honduras, Brazil, and Peru—the varieties being called respectively, *Honduras*, (F.) *Salsepareille de Honduras*; *Brazil*, (F.) *S. de Brésil* ou *de Portugal*, and *Peruvian Sarsaparilla*, (F.) *S. de Pérou* ou *caraque*.
 SMILAX TAMNOIDES; indigenous; has similar properties.
 SMILĒ, *σμιλη*. A curved, two-edged bistoury. A knife.
 SMILEON, Scalpel.
 SMIT, see Contagion.

SMITTLE, see Contagious.
 SMYRNA, Myrrha.
 SMYRNISMOS, Embalming.
 SMYRNIUM OLUSA'TRUM, *Smyr'num*, from *σμυρα*, 'myrrh,' the odour of the seeds resembling that of myrrh; *Hipposeli'num*, *Macerona*, *Macedonis'ium*, *Herba Alexandri'na*, *Gri-elum*, *Agrioseli'num*, *Alexan'ders*, *Alsanders*. A plant formerly cultivated for culinary purposes. The seeds are bitter and aromatic, and the roots more powerfully bitter. They have been recommended as resolvents, diuretics, emmenagogues, &c.
 SNAGGLE-TEETH, *Odontoparallaxis*.
 SNAGREL, *Aristolochia serpentaria*.
 SNAIL, *Limax*—s. *Shell*, *Cochlea*.
 SNAKEHEAD, *Chelone glabra*.
 SNAKEROOT, *Garuleum bipinnatum*—s. *Birthwort*, *Aristolochia serpentaria*—s. *Black*, *Actæa racemosa*, *Sanicula Marilandica*—s. *Button*, *Fryngium aquaticum*, *Liatriis spicata*—s. *Canada*, *Asarum Canadense*—s. *Dewitt*, *Prenanthes*—s. *Evergreen*, *Polygala pauciflora*—s. *Heart*, *Asarum Canadense*—s. *Virginiana*, *Aristolochia serpentaria*—s. *White*, *Eupatorium age-ratoides*.
 SNAKEWEED, *Aristolochia serpentaria*, *Helenium autumnale*, *Polygonum bistorta*—s. *American*, *Cienta maculata*.
 SNEEZING, from Sax. *niejan*, (G.) *Niesan*, (probably an example of onomatopœia), *Clonus Sternutatio*, *Sternutatio*, *Sternutamentum*, *Sternumentum*, *Ptarmos*, (Sc.) *Neesing*, (F.) *Éternement*. A convulsive motion of the expiratory muscles, by which the air is driven rapidly, and rushes sonorously, through the nasal fossæ, carrying with it the mucus and foreign bodies which adhere to the pituitary membrane, and have occasioned the movement.
 SNEEZEWORD, *Achillea ptarmica*, *Helenium autumnale*.
 SNIRRELS, Nares.
 SNOB, Nasal mucus.
 SNORING, *Snore*, (Sax.) *Ἰνορα*, *Rhenchus*, *Renchus*, *Rhenxis*, *Ronchus*, *Rhonchus*, *Stertor*, (Sc.) *Rowling* (probably a case of onomatopœia), (F.) *Ronflement*. Noise made in the posterior part of the mouth and nasal fossæ during the movements of inspiration, particularly in sleep, both when the person is in health, and in disease, as in apoplexy. In certain affections of the chest—in some cases of pulmonary catarrh—a kind of snoring may be distinctly heard by applying the ear or the stethoscope to the chest.
 SNOT, Nasal mucus.
 SNOTH, Nasal mucus.
 SNOUT, Nasus.
 SNOW, Sax. *Ἰναβ*, *Nix*, *Chion*, (F.) *Neige*. Water in a solid state, which falls from the atmosphere in white flakes. It is used externally as a tonic and discutient.
 SNOWBALL, *Cephalanthus occidentalis*.
 SNOWBERRY, *Symphoricarpos racemosus*.
 SNOWDROP TREE, *Chionanthus Virginica*.
 SNOW-BLINDNESS, Blindness produced by the reflection of the solar light from snow. As a preventive, *Snow Eyes* are used by the Esquimaux. These are made of extremely light wood, with a bridge resting on the nose like spectacles, and a narrow slit for the passage of the light.
 SNOW EYES, see Snow Blindness.
 SNUFF, CEPHALIC, *Pulvis asari* compositus.
 SNUFFLES, Teut. *Snuffeln* (probably an example of onomatopœia), *Grav'do neonatorum*, *Rhinan'gia*, *Rhinanch'onē*. Breathing hard through the nose, often owing to accumulation of the mucous secretions,—an affection to which

infants are liable, and which is relieved by oiling the interior of the nostrils.

SNURLE, Coryza.

SNURLES, Nares.

SOAP, Sapo — s. Acid, see Sapo.

SOAP BERRIES, Sapindus saponaria.

SOAP, BLACK, see Sapo — s. Castile, Sapo durus.

SOAP OF THE COCOA-NUT OIL, see Sapo.

SOAP, COMMON OR SOFT, see Sapo — s. Liquid, see Sapo — s. Medicinal, see Sapo — s. Spanish, Sapo durus — s. Yellow, see Sapo.

SOAPWORT, Saponaria.

SOB, from Sax. *reopjan*, 'to grieve,' (probably an example of onomatopœia); (F.) *Sanglot*. A spasmodic, sudden, and momentary contraction of the diaphragm, immediately followed by relaxation, by which the little air, that the contraction has caused to enter the chest, is driven out with noise. It is an evidence of corporeal or mental suffering.

SOBBY, Corpulent.

SOBOLES, Epigone.

SOBRIETAS, Temperance.

SOCIA PAROTIDIS, see Parotid.

SOCIETY, *Societas*, (F.) *Société*, from *socius*, 'a companion.' An association for the promotion of some common object.

SOCIETIES, MEDICAL. Associations of medical gentlemen for the promotion of science have been numerous, and productive of valuable results. In the United States, societies exist in many of the States, possessing the power of examining into the qualifications of every one who may be desirous of practising within their particular jurisdiction. In some of the States, however, the qualified and unqualified are permitted to exercise their profession with equal privileges and immunities.

Amongst the medical associations that have issued from time to time useful transactions or publications, are the following: IN AMERICA, — The *Massachusetts Medical Society*; the *Physico-medical*, and *Medical Societies of the State of New York*; the *College of Physicians of Philadelphia*, and the *American Medical Association*. IN EUROPE, — The *Association of Fellows and Licentiates of the King's and Queen's College of Physicians of Ireland*; the *Medico-Chirurgical and Phrenological Societies of Edinburgh*; the *College of Physicians*, the *Medico-Chirurgical the Medical* and the *Sydenham Societies of London*; the *Associated Apothecaries and Surgeon Apothecaries of England and Wales*, and the *Provincial Medical and Surgical Association*; the *Royal Academy of Surgery*, the *Royal Society of Medicine*, the *Société Médicale d'Émulation*, the *Société de Médecine*, the *Royal Academy of Medicine*, the *Société Médicale d'Observation*, and the *Société de Biologie*, of Paris; the *Medico-Chirurgical Academy of Vienna*; the *Medical Societies of Berlin and Copenhagen*, &c., &c. IN ASIA, — The *Medical and Physical Society of Calcutta*.

Valuable medical essays are likewise contained in the published *Transactions of the American Philosophical Society*; the *Royal Societies of London, Edinburgh, Göttingen*, &c.; the *Imperial Academy of Sciences of Paris*; the *Imperial Society of Sciences of St. Petersburg and Vienna*; the *Royal Academy of Sciences of Turin*; the *Academia Imperialis Leopoldina Naturæ Curiosorum*, &c.

SOCORDIA, Hallucination.

SODA. An Arabic word. *Protoxide of sodium*, (F.) *Soude*, is obtained by adding caustic lime to a solution of carbonate of soda. The soda in solution may be obtained by evaporation as hydrate of soda. Its action is like that of potassa; but it is not official.

Soda impura, Barilla, Bari'lia, Baril'lor,

Soda Hispanica, Anatron, Natron, Anaton, Nitrum Antiquorum, Kelp, Aphronitron, Sal alkalinus fixus fossilis, Car'bonus Sodæ impurus, Subcar'bonus Sodæ impura, Anachron. The mineral alkali is obtained from several sources; — naturally, in Egypt: artificially, from the incineration of marine plants; and from the decomposition of sulphate of soda, &c. It is principally, however, derived from plants growing on the sea-coast; — as the *Salsola sativa*, *S. soda*, *S. tragus*, *Salicornia herba'cea*, *Salicornia Arabica*, &c. The *Barilla ashes* are from the ashes of the *Salicornia Europæa*: the *Kelp, Soude de Varec*, from the *Fucus vesiculosus* and other varieties; — the *Turkey Barilla, Roquette, Cendre du Levant, Rochet'la Alexandrina*, from the *Mesembryanthemum Copticum*; — the *Alicant Barilla, Soda Alicanti'na seu Alonensis*, from the *Mesembryanthemum nodiflorum*; — and the *Cartage'na Barilla*, from the *Salicornia* and *Salsola*.

Impure subcarbonate of soda, (F.) *Soude du commerce*, consists of subcarbonate of soda, potash, chloride of sodium, clay and other earthy substances. It is chiefly used for preparing the pure subcarbonate.

SODA, Cardialgia, Cephalalgia, Pyrosis.

SODA ACETATA, *Sodæ Acetas, Ac'etate of Soda, Terra foliata mineralis*, (F.) *Acétate de soude*. This salt is used in similar cases with the acetate of potass.

SODA AÉRATA, *Sodæ carbonas* — s. *Alonensis, Soda* — s. *Biborate of Borax* — s. *Bicarbonate of Sodæ carbonas* — s. *Bilate of Picromel* — s. *Borate of Borax* — s. *Boraxata, Borax*.

SODA, CARBONATE OF, *Sodæ Car'bonas seu Bicar'bonas, Carbonas Natricum, Soda Aëra'ta, Bicar'bonate of Soda, Carbonate of protoxide of Sodium*, (F.) *Carbonate de Soude, S. effervescente ou aérée ou erageuse*. (*Sodæ subcarb. 3j, aqua destill. Oijj*. Dissolve the subcarbonate of soda, and pass carbonic acid through the solution; set it aside to crystallize.) Its use is the same as the subcarbonate, than which it is less caustic, and better adapted for effervescing draughts.

SODA CAUSTICA, *Protoxide of Sodium, Caustic Soda*, (F.) *Soude caustique, S. à la Chaux, Soude pure*. The impure subcarbonate, treated by quicklime, and consequently deprived of its carbonic acid. It may be used as a caustic like the *Potassa fusa*, and is even preferable to it, as it does not deliquesce and run.

SODA, CHLORIDE OF, *S. Chlorinata, Sodæ Chloridum seu Chlorure'tum, Chlorinated Soda, Natrium Oxymuriaticum, Oxymuriate of Soda*, (F.) *Chlorure de Soude, Chlorure d'oxide de Sodium*. This salt is used as a disinfecting agent; both to remove offensive smells in chambers, and to alter the condition of fetid ulcers. See *Liquor Sodæ Chlorinate*.

SODA, CHLORINATED, *Soda, chloride of* — s. *Hispanica, Soda* — s. *Hydrochlorate of Soda, muriate of*.

SODA, HYPOSULPHITE OF, *Sodæ hyposulph'is*, (F.) *Hyposulfite de Soude*. This salt has been lately extolled in chronic cutaneous, and serofulous affections. It is given in syrup.

SODA, LITHATE OF, *Urate of soda* — s. *Mephitic of Soda, subcarbonate of*.

SODA, MURIATE OF, *S. muria'ta seu muriat'ica, Alkali mineral'le sul'num, Sodæ murias, Sul communis seu culina'ris seu fontium seu gemmæ seu marinis seu albus seu fossilis seu lucidum, Mur'ia, Natron muriat'um, Natrum muriaticum, Hydrochlor'inas Natricus, Chlorure'tum Sodii, Sodii Chloridum, Common salt, Sea salt, Rock salt, Bay salt, White salt, Quadrichloruret of Sodium, Hydrochlorate of protoxide of Sodium, Hydrochlorate of Soda, Chloride of Sodium, (F.) *Chlorure de Sodium, Sel marin, Sel de Cuisine*.*

In an impure state, this salt is one of the most abundant of natural productions. It is soluble in 3 parts of water, and is tonic, purgative, and anthelmintic. Externally, stimulant. It is a well-known and useful culinary substance. It has been greatly recommended as an antiperiodic in the dose of \mathfrak{z} ss or \mathfrak{z} i.

SODA, NITRATE OF, *Sodæ Nitras*, *Natron seu Natrum nitricum*, *Nitras natricus*, *Alkali mineralē nitratum*, *Nitrum Rhomboidālē seu cubicum*, *Nitras Natricum*, *Salpētra*, *Nitrate of protoxide of Sodium*, *Protonitrate of Sodium*, *Cubic Nitre*. Its virtues are similar to those of the nitrate of potass, for which it has been substituted.

SODA, OXYMURIATE OF, *Soda*, chloride of.

SODA, PHOSPHATE OF, *S. Phosphorata*, *Sodæ phosphas*, *Phosphas Natricus*, *Natrum Orthophosphorodes*, *Sal mirabilē perlātum*, *Alkali mineralē phosphoratum*, *Subphosphate of protoxide of Sodium*, *Subprotophosphate of Sodium*, *Subphosphate of Soda*, *Tribasic phosphate of Soda*, *Tasteless purging salt*, (F.) *Phosphate de Soude*, *Sel admirable perlē*. (Bone burnt to whiteness and powdered, ℥x; Sulphuric acid, ℥vj; Carbonate of soda, q. s. Mix the bone with the acid in a covered vessel, add a gallon of water, and stir. Digest for three days, occasionally adding a little water to that lost by evaporation, and frequently stirring the mixture. Pour in now a gallon of boiling water, and strain through linen, gradually adding more boiling water, until the liquor passes nearly tasteless. Set the strained liquor by, that the dregs may subside; from which pour off the clear solution, and boil down to a gallon. To this solution, poured off from the dregs and heated in an iron vessel, add by degrees the carbonate of soda previously dissolved in hot water, until effervescence ceases, and the phosphoric acid is completely neutralized; then filter the liquor, and set it aside to crystallize. Having removed the crystals, add, if necessary, a small quantity of carbonate of soda to the liquor, so as to render it slightly alkaline; then alternately evaporate and crystallize so long as crystals are produced. Lastly, preserve the crystals in a well stopped bottle.—Ph. U. S.) Cathartic, in the dose of from \mathfrak{z} ss to \mathfrak{z} j.

SODA, PHOSPHATE OF, TRIBASIC, *S. Phosphate of—s.* Powders, see Powders, *Soda—s.* Springs, see Water, Mineral (gaseous).

SODA, SUBCARBONATE OF, *Sodæ Subcarbonas*, *S. Carbonas* (Ph. U. S.), *Natron preparatum*, *Sal Sodæ*, *S. alkali*, *Flos Salis*, *Sagimen Vitri*, *Salt of Soda or of Barilla*, *Subcarbonate of protoxide of Sodium*, *Mephite of Soda*, (F.) *Sous-carbonate de Soude*. The impure carbonate, dissolved in water; the solution filtered and crystallized. Soluble in two parts of water at 60°. It is much used as an antacid; and also as a deobstruent in serofulous and other affections. Dose, gr. x to \mathfrak{z} ss.

The dried Subcarbonate of Soda, *Sodæ Subcarbonas exsiccata*, *Sodæ carbonas exsiccatus*, (Ph. U. S.) *Carbonas Sodæ siccatum*, (F.) *Sous-carbonate de Soude desséché*, is employed as an antacid and lithontriptic. Dose, gr. x to xv.

SODA, SUBPHOSPHATE OF, *S. Phosphate of.*

SODA, SULPHATE OF, *Sodæ Sulphas*, *Natron vitriolatum*, *Sal cathartica seu mirabilis*, *Alkali vitriolēri*, *Alkali mineralē sulphuricum*, *Natrum sulphuricum*, *Soda vitriolata*, *Sulphas natricus*, *Aperient Salt of Frederick*, *Glauber's Salts*, (F.) *Sulfate de Soude*. Obtained from the salt that remains after the distillation of muriatic acid; the superabundant acid being saturated with subcarbonate of soda. It is soluble in three parts of water at 60°; is purgative, and, in small doses, diuretic. Dose, \mathfrak{z} vj to \mathfrak{z} x.

The *Lyngington Glauber's Salts* is a Sulphate

of *Magnesia and Soda*, and is obtained from the mother liquor of sea-water, or by dissolving Epsom salt in a solution of Glauber's salt.

SODA, TARTRATE OF, *Tartrate of potass and Soda*, *Tartratised Soda*, *Rochelle or Seignette's Salt*, *Soda Tartarizata*, *Sal Rupellen'sis seu Polychrestum Seignetti seu Seignetti*, *Natron tartarizatum*, *Tartris potassæ et Sodæ*, *Sodæ et Potassæ Tartras* (Ph. U. S.), *Sodæ potassio-tartras*, *Tartras Potassæ et Sodæ*, (F.) *Tartrate de potasse et de Soude*. (*Sodæ carb.* ℥i; *potass. bitart.* in pulv. \mathfrak{z} xvj, *Aq. bullient.* Ov. Dissolve the carbonate in water; and add, gradually, the bitartrate. Filter the solution and crystallize.—Ph. U. S.) It is a gentle cathartic. Dose, \mathfrak{z} ss to \mathfrak{z} j.

SODA, URATE OF, *Urate of Soda—s.* *Vitriolata*, *S. sulphate of.*

SODA WATER, Acidulous water, simple.

SODA AND SILVER, HYPOSULPHITE OF, *Sodæ et Argenti Hyposulphitis*.

SODÆ ACETAS, *Soda*, acetate of—*s.* *Arsenias*, *Arseniate of soda—s.* *Biboras*, *Borax—s.* *Bicarbonas*, *Soda*, carbonate of—*s.* *Boras*, *Borax—s.* *Boras alcalescens*, *Borax—s.* *Boras supersaturus*, *Borax—s.* *Carbonas*, *Soda—s.* *Carbonas*, *Soda*, subcarbonate of—*s.* *Carbonas exsiccatus*, see *Soda*, subcarbonate of—*s.* *Carbonas impurus*, *Soda—s.* *Chloras*, *Soda*, chlorate of—*s.* *Hyposulphitis*, *Hyposulphite of soda—s.* *Murias*, *Soda*, muriate of—*s.* *Nitras*, *Soda*, nitrate of—*s.* *Phosphas*, *Soda*, phosphate of—*s.* *Potassæ tartras*, *Soda*, tartrate of—*s.* *Potassio-tartras*, *Soda*, tartrate of—*s.* *Subboras*, *Borax—s.* *Subcarbonas impura*, *Soda*.

SODÆ ET ARGENTI HYPOSULPH'IS, *Hyposulphite of soda and silver*, (F.) *Hyposulphite de Soude et d'Argent*. This salt is formed by pouring a solution of *hyposulphite of soda* over *oxide of silver* recently precipitated by *potassa*, until the oxide is entirely dissolved. Crystals are afforded by evaporation. A solution of it is used in the same cases as one of the nitrate of silver.

SODII AURO-TERCHLORIDUM, see *Gold—s.* *Chloridum*, *Soda*, muriate of—*s.* *Chloruretum*, *Soda*, muriate of.

SODII IOD'IDUM, *Iodide of sodium*. This salt has been prescribed in the same cases as the iodide of potassium.

SODIUM, *Natrium*, *Natro'nium*. The metallic basis of soda.

SODIUM, CARBONATE OF PROTOXIDE OF, *Sodæ carbonas—s.* *Chloride of Soda*, muriate of—*s.* *Chlorure de Soda*, muriate of—*s.* *Chlorure d'Oxide de Soda*, chloride of—*s.* *Protonitrate of Soda*, nitrate of—*s.* *Protoxide of Soda—s.* *Protoxide of hydrochlorate of Soda*, muriate of—*s.* *Protoxide of nitrate of Soda*, nitrate of—*s.* *Protoxide of phosphate of Soda*, phosphate of—*s.* *Protoxide of subcarbonate of Soda*, subcarbonate of—*s.* *Quadri-chloruret of Soda*, muriate of—*s.* *Subborate of protoxide of Borax—s.* *Subprotoborate of Borax—s.* *Subprotophosphate of Soda*, phosphate of.

SODOMA GALLORUM, Syphilis.

SODOMIA, Buggery.

SODOMY, Buggery.

SOFTENING, Mollities.

SOI-POUR-SOI, Homœoözygy.

SOIE, Sericum.

SOIE', Thirst—*s.* *Excessive*, Polydipsia.

SOL, Gold.

SOL-LUNAR, *Sol-lunaris*; from *sol*, 'the sun,' and *luna*, 'the moon.' An epithet applied to a fancied influence exerted by the sun and moon on man in a state of health and disease.

SOLAMEN INTESTINORUM, *Pimpinella anisum—s.* *Scabiosorum*, *Fumaria*.

SOL'ANOID, *Solanoides*; a hybrid word, from

solanum, 'the potato,' and εἶδος, 'resemblance.' Resembling a potato; potato-like. An epithet applied to a form of cancer, which appears to be intermediate between scirrhous and encephaloid, increasing more rapidly than the former, yet approaching it in firmness.

SOLA'NUM, *S. nigrum* seu *vulga'rē* seu *vulga'tum*, Common or Garden Nightshade, (F.) Morelle à fruit noir. Family, Solanacæ. Sex. Syst. Pentandria Monogynia. A narcotic poison. The Huile de Morelle is made, by macerating in oil, for several days, the leaves and fruit of this plant. The oil is anodyne and discutient.

SOLANUM CAROLINEN'SĒ, *Horse nettle*; indigenous. The juice of the berries has been employed successfully in idiopathic tetanus. [?]

SOLANUM DULCAMA'RA, *S. scandens* seu *ligno'sum*, *Dulcamara*, *D. flexuo'sa*, *Glycipi'eros*, *Amara dulcis*, Σρυγγος of Theophrastus, *Bittersweet*, *Woody Nightshade*, *Bittersweet Nightshade*, *Bittersweet Vine*, *Nightshade Vine*, *Violet bloom*, (F.) *Douce-amère*, *Morelle grimpante*, *Vigne de Judée*. The taste of the stalks is bitter, followed by sweetness; hence its name. It has been used in many diseases, as a diuretic and sudorific, especially in chronic rheumatism, humoral asthma, dropsy, various skin diseases, scrofula, and jaundice. Dose, in powder, ℞j to ℥i.

SOLANUM ESCULENTUM, *S. tuberosum* — s. *Fœtidum*, *Datura stramonium* — s. *Furiosum*, *Atropa belladonna* — s. *Hortense nigrum*, *Atropa belladonna* — s. *Humboldtii*, *S. Lycopersicum* — s. *Lethale*, *Atropa belladonna* — s. *Lignosum*, *S. dulcamara*.

SOLANUM LYCOPER'SICUM; *Lycoper'sicon esculentum*, *L. pomum amo'ris* seu *Humboldtii* seu *pseudolyco'persicum*, *Malum lycoper'sicum*, *Love-apple plant*. The fruit of this, called *Toma'ta*, *Toma'to* or *Love-apple*, (F.) *Pomme d'Amour*, is much eaten in the United States; and, with the French, Spaniards, Portuguese, &c., forms an esteemed sauce.

SOLANUM MAGNUM VIRGINIANUM RUBRUM, *Phytolacca decandra* — s. *Maniacum*, *Atropa belladonna*, *Datura stramonium* — s. *Melanocerasus*, *Atropa belladonna*.

SOLANUM MELON'GENA, *Melongenæ*, *Egg-plant*, *Mud Apple plant*; (F.) *Aubergine*. A native of Asia, Africa, and America. Its oblong, egg-shaped fruit, *Pomum Melon'genæ*, *Malum insid'num*, is prepared in soups and sauces in those countries, like the tomato.

SOLANUM NIGRUM, *Solanum*.

SOLANUM NIV'EUM. A South African plant, the leaves of which, applied to foul ulcers, cleanse them. The fresh juice of the berries and leaves, made into an ointment with lard or fat, is used by the farmers for the same purpose.

SOLANUM PARMENTERII, *S. tuberosum* — s. *Pseudolyco'persicum*, *S. Lycopersicum* — s. *Quadrifolium*, Paris — s. *Racemosum Americanum*, *Phytolacca decandra*.

SOLANUM SANCTUM; *Palestine Nightshade*. The fruit of this is globular, and is much eaten in the countries where it is a native.

SOLANUM SCANDENS, *S. Dulcamara*.

SOLANUM TUBEROSUM, *S. esculentum* seu *Parmenterii*, *Lycoper'sicum tuberosum*, *Papas Americana*, *Pappus Americana*, *America'num Tuberosum*, *Batta'ta Virginia'na*, *Bata'tas*; the *Pota'to*, (F.) *Pomme de Terre*. A native of Peru. A nutritious and wholesome vegetable; one of the most useful, indeed, that exists. One hundred pounds of potatoes afford ten pounds of starch, which is equal to arrow-root, as a nutrient and demulcent. It is called *Potato Flour*, *P. Starch*, *French Sago*, *Petit Sague*, *Common Arrow-root*, &c.

SOLANUM URENS, *Capsicum annuum* — s. *Vesicarium*, *Physalis*.

SOLANUM VIRGINIA'NUM; indigenous; is said to resemble *Solanum nigrum* in its properties.

SOLANUM VULGARE, *Solanum*.

SOLAR, *Sola'ris*, from *sol*, *solis*, 'the sun.' Relating to the sun; having rays like the sun.

SOLAR PLEXUS, *Plexus sola'ris*, *Centrum communē*, *Cer'ebrum abdomina'le*. A collection of ganglions and filaments, interweaving and anastomosing with each other repeatedly, and belonging to the system of the great sympathetic. This vast plexus, lying on the vertebral column, the aorta, and the pillars of the diaphragm, has a very irregular shape. The ganglions and filaments composing it are soft, reddish, and almost all issue from the semilunar ganglions. It receives, also, branches from the pneumogastrics. It seems to be chiefly intended for the aorta, and accompanies all its branches; furnishing many secondary plexuses, which are called the *infra-diaphragmatic*, *cœliac*, *superior mesenteric*, *inferior mesenteric*, *renal* or *emulgent*, *spermatie*, &c.

SOLDANELLA, *Convolvulus soldanella*.

SOLDIER'S WEED, *Matico*.

SOLE, *Solum*, *S. pedis*, *Solea*, *Basis corporis*, *Ichnus*, *Superfici'es planta'ris pedis*, *Peti'na*, *Vestig'ium*, *Pe'dion*, *Peza*, *Pelna*, *Planta'ris superficies pedis*, *Fa'cies conca'va* seu *inferior* seu *Planum* seu *Concavum* seu *Pars inferior* seu *Plani'ties* seu *Planta* seu *Vola pedis*, (F.) *Plante du Pied*. The sole of the foot; the under surface of the foot.

SOLEA, Sole — s. *Ipecacuanha*, see *Ipecacuanha*.

SOLE'AIRE, *Soleus*.

SOLEN, *Cradle*, see *Vertebral column*.

SOLENA'RIMUM, from σωλην, 'a canal, a pipe.' An instrument of surgery, representing a kind of gutter, in the cavity of which the penis was placed, like a limb in a *cradle*. The word *Solen* itself — σωλην, *Canalis* — was used, in antiquity, for a grooved channel or cradle, in which a fractured limb was placed.

SOLENOSTEMMA ARGEL, *Cynanchum oleæfolium*.

SOLE'US, *Gastrocnemius inter'nus*, *Tibioalcantian*, (Ch.;) (F.) *Sola'ire*, from *solea*, 'a sole of a shoe,' owing to its shape. A muscle situate at the posterior part of the leg. It is broad, flat, and almost oval; and is attached, above, to the posterior edge of the fibula, to the oblique line on the posterior surface, and to the inner edge of the tibia. It terminates, below, by a large tendon, which unites to that of the *gastrocnemius externus*, to form the *tendo Achillis*. This muscle extends the foot on the leg, and conversely.

SOLID, *Sol'idus*, *Ste'ros*, from *solum*, 'the ground.' A body whose integrant molecules are so united by the force of cohesion, that they will not separate by their own weight. The solids, in the human body, are the bones, cartilages, tendons, muscles, ligaments, arteries, veins, nerves, membranes, skin, &c. The anatomy, or rather study of the solids, is called *Stereology*, from στερεος, 'solid,' and λογος, 'a discourse.'

SOLIDA'GO, from *solido*, 'I make firm,' in allusion to its properties as a vulnerary. See *Solidago vigeurea*.

SOLIDAGO SARACENICA, *S. virgaurea*.

SOLIDA'GO RIG'IDA, *Rigid Goldenrod*, *Bones'typtic*; indigenous; of the Composite family, flowering in August and September; is astringent and tonic.

SOLIDA'GO VIRGAU'REA, *S. vulga'ris* seu *Saracenicæ*, *Virga aurea*, *Herba do'rea*, *Cony'za coma aurea*, *Sym'phytum Petra'um*, *Eli'chrysum*, *Consol'ida*, *Saracenicæ*, *Golden rod*, (F.) *Verge*

d'or, Herbe des juifs. The leaves of *Solida'go odora*—*SOLIDA'GO* (Ph. U. S.)—*Fragrant or Sweet-scented Golden-rod*—and the flowers have been recommended as aperients and tonics, in urinary diseases, and in internal hemorrhage.

SOLIDAGO VULGARIS, S. virgaurea.

SOLIDISM, Patholog'ia solida'ris. The doctrine of those physicians who refer all diseases to alterations of the solid parts of the body. To the believers in this doctrine, the appellation *Solidists* has been given. The solidists think that the solids alone are endowed with vital properties; that they alone can receive the impression of morbid agents, and be the seat of pathological phenomena. Solidism has been the prevalent doctrine. It is scarcely necessary to say, that in all our investigations, the condition of both solids and fluids must be regarded.

SOLIUM, Boignoire, Tania solium.

SOLUBILITY, Solubilitas, from *solvere, solutum*, 'to dissolve.' That property of a body by virtue of which it can be dissolved in a menstruum.

TABLE OF THE SOLUBILITY OF SOME SUBSTANCES IN WATER.

NAMES OF SALTS.	Solubility in 100 parts water.	
	at 60°	at 212°
<i>Acids.</i>		
Benzoic.....	0.208	4.17
Citric.....	133	200
Oxalic.....	50	100
Tartaric.....	very soluble	
<i>Salts.</i>		
Acetate of Potassa.....	100	
Soda.....	35	
Bitartrate of Potassa.....	1.5	3.3
Borate of Soda.....	8.4	16.8
Carbonate of Ammonia.....	50	
Magnesia.....	2	
Potassa.....	25	
Soda.....	50	
Chlorate of Potassa.....	6	40
Soda.....	35	35
Chloride of Calcium.....	200	
Magnesium.....	100	
Potassium.....	33	
Sodium.....	35-42	36-16
Muriate of Ammonia.....	33	100
Nitrate of Potassa.....	14-25	100
Soda.....	33	100
Phosphate of Soda.....	25	50
Sulphate of Ammonia.....	50	100
Copper.....	25	50
Iron.....	50	100
Magnesia.....	100	133
Potassa.....	6.25	20
Soda.....	37	125
Supersulphate of Potassa.....	5.0	100
Tartrate of Potassa.....	25	
Potassa and Soda.....	20	
Antimony & Soda.....	6.6	33

SOLUM, Solc—s. *Pedis, Metatarsus, Sole.*

SOLUTÉ, Solution.

SOLUTIO, Solution—s. *Alexiteria Gaubiana,* see *Disinfection*—s. *Ammonia subcarbonatis, Liquor ammonia subcarbonatis*—s. *Arsenicalis, Liquor arsenicalis*—s. *Arsenicata, Liquor arsenicalis*—s. *Arsenitis Caliceæ, Liquor arsenicalis*—s. *Calcis, Liquor calcis*—s. *Camphoræ ætherea, Tinctura ætherea camphorata*—s. *Camphoræ oleosa, Linimentum camphoræ*—s. *Continii, Solution of continuity*—s. *Cupri ammoniati, Liquor Cupri ammoniati*—s. *Ferri nitratis, Liquor Ferri nitratis*—s. *Guaiaci gummosa, Mistura guaiaci*—s. *Muriatis barytæ, Baryta, muriate of*—s. *Muriatis calcis, see Calcis murias*—s. *Muriatis ferri ætherea, Tinctura seu alcohol sulfurico-æthereus ferri*—s. *Muriatis hydrargyri oxygenati, Liquor hydrargyri oxy muriatis*—s. *Potassii iodidi iodureta, Liquor iodini compositus*—s. *Resinæ guaiaci*

aquea, Mistura guaiaci—s. *Solventis Mineralis, Liquor Arsenici chloridi*—s. *Subcarbonatis ammoniaci spirituosæ, Spiritus ammoniacæ.*

SOLUTIO SULPHATIS CUPRI COMPOSITA, Aqua vitriolica carulea, Sydenham's Styptic Water, (*Sulph. cupri, ℥ij, Adam's, acid. sulph., āā ℥ij, aquæ, ℥viij*: dissolve, and filter.) A styptic, and, largely diluted, an astringent collyrium.

SOLUTION, Solutio, Lysis, (F.) Dissolution, from *solvere, solutum*, 'to dissolve.' An operation which consists in dissolving a solid body in a menstruum. Likewise, the product of such operation—*Solutum, (F.) Soluté.* It means, also, with many, the termination of a disease:—with others, a termination accompanied by critical signs;—and, with others, again, it is synonymous with crisis.

SOLUTION OF ACETATE OF AMMONIA, Liquor ammonia acetatis—s. of Acetate of morphia, *Liquor morphiæ acetatis*—s. Alkaline, see *Fulgokali*—s. of Alkaline iron, *Liquor ferri alkalini*—s. of Alum, compound, *Liquor aluminis compositus*—s. of subcarbonate of Ammonia, *Liquor ammonia subcarbonatis*—s. of Ammoniated copper, *Liquor cupri ammoniati*—s. Arsenical, *Liquor arsenicalis*—s. Arsenical, De Valangin's, *Liquor Arsenici chloridi*—s. of Carbonate of Soda, *Liquor sodæ carbonatis*—s. of Charcoal, concentrated, see *Tinctura catechu*—s. of Chlorinated soda, *Liquor sodæ chlorinatæ*—s. of Chloride of Arsenic, *Liquor Arsenici chloridi*—s. of Chloride of Zinc, see *Burnett's disinfecting liquid*—s. of Citrate of Ammonia, *Liquor ammonia citratis*—s. of Citrate of Magnesia, see *Magnesia citras*—s. of Citrate of Potassa, *Liquor potassæ citratis*—s. of Continuity, see *Continuity*—s. of Corrosive sublimate, *Liquor hydrargyri oxy muriatis*—s. De Valangin's, *Liquor arsenici chloridi*—s. Donovan's, see *Arsenic and Mercury, Iodide of*—s. Fowler's, *Liquor arsenicalis*—s. Gannal's, see *Alumina sulphas*—s. of Gutta percha in Chloroform, see *Gutta percha*—s. Heineck's, see *Arseniate of Soda.*

SOLUTION, GOADBY'S, called after the proposer, is made of bay salt, corrosive sublimate or arsenious acid, and water. It is employed to preserve animal substances.

SOLUTION OF HYDRIDATE OF POTASS, Liquor potassæ hydriodatis—s. of Iodide of iron, *Liquor ferri iodidi*—s. of Iodine, compound, *Liquor iodini compositus*—s. of Iron, nitrated, *Liquor ferri nitratis*—s. Labarraque's, *Eau de Javelle*—s. of Lime, *Liquor calcis*—s. Lugol's, *Liquor iodinii compositus*—s. of Magnesia, condensed, *Magnesia, fluid*—s. of Monro, *Liquor of Mouro*—s. of Nitrate of iron, *Liquor ferri nitratis*—s. of Oxymuriate of mercury, *Liquor hydrargyri oxy muriatis*—s. *Par les huiles, Olea medicinalia*—s. Pearson's, see *Arseniate of soda*—s. Plenk's, see *Hydrargyri oxydum cinereum*—s. *de Potassæ, Liquor potassæ*—s. of Potassa, *Liquor potassæ*—s. of Sesquinitrate of iron, *Liquor ferri nitratis*—s. of Soda, *Liquor sodæ*—s. of Subacetate of lead, *Liquor plumbi subacetatis*—s. of Subacetate of lead, diluted, *Liquor plumbi subacetatis dilutus*—s. of Subcarbonate of potass, *Liquor potassæ subcarbonatis*—s. of Sulphate of morphia, *Liquor morphiæ sulphatis*—s. of Tartarized antimony, *Vinum antimonii tartarizati*—s. of Ternitate of sesquioxide of iron, *Liquor ferri nitratis*—s. of Van Swieten, *Liquor hydrargyri oxy muriatis.*

SOLUTIVUS, Laxative.

SOLUTUM, Solution.

SOLVENS, Solvent—s. *Minerale, Liquor arsenicalis.*

SOLUTION, Solvens, (F.) Fondant, from *solvere*, 'to dissolve.' A medicine supposed to possess the property of dissolving or removing obstruc-

tions and extraneous substances. Thus we have solvents of the stone in the bladder, &c. See Dissolventia.

SOLVENT, MINERAL, Liquor arsenicalis.

SOMA, Body, Corpus.

SOMASCETICS, Gymnastics.

SOMASCÉTIQUE, Gymnastics.

SOMATIC, *Somat'icus*; from *σωμα*, *σωματος*, 'the body.' That which concerns the body;—as somatic death, or death of the body, in contradistinction to molecular death or the death of a part.

SOMATODYM'IA, from *σωμα*, *σωματος*, 'the body,' and *δύω*, 'I enter into.' A double monstrosity in which the trunks are united. Of this, there are several varieties:—*Vertebrody'mia*, where the union is by the vertebræ; *Ischiody'mia*, by the ossa ischii; *Sternody'mia*, by the sternum; *Supraomphalody'mia*, (F.) *Sus-omphalodymie*, by the super-umbilical regions; *Supra et infra-omphalody'mia*, by the superior and inferior umbilical regions; and *Sterno-omphalody'mia*, where the union is by both the sternal and the umbilical regions.—Cruveilhier.

SOMATOL'OGY, *Somatolog'ia*, from *σωμα*, *σωματος*, 'the body,' and *λογος*, 'a discourse.' A treatise on the human body. Anatomy.

SOMATOTOMY, Anatomy.

SOMMEIL, Sleep.

SOMNAMBULATION, Somnambulism.

SOMNAMBULISM, *Somnambula'tio*, *Hypnotab'esis*, *Hypnotaba'tis*, *Hypnota'tia*, *Hypnotad'isis*, *Rhenbas'mus*, *Lunatis'mus*, *Hypnonergi'a*, *Selenoga'mia*, *Nyctobate'sis*, *Autonyctoba'tia*, *Seleni'asis*, *Nyelatis'mus*, *Somnambulis'mus*, *Nyctob'asis*, *Noctambula'tio*, *Noctambulis'mus*, *Nyctoba'tia*, *Nyctoba'tia*, *Siph'ita*, *Syph'ita*, *Paroni'ria ambulans*, *Noctisur'gium*, *Oneirodyn'ia acti'va*, *Cenospu'dia*, *Somno-vigil*, *Somnambula'tion*, *Sleep-walking*, from *somnus*, 'sleep,' and *ambulare*, 'to walk.' A condition of the brain which occasions the individual to execute, during sleep, some of those actions that commonly take place when awake. It has been imagined that the somnambulist is guided solely by his subjective sensations; but there are many facts which induce the belief that the external senses are not always entirely suspended. The causes of somnambulism are very obscure; and the principal indication of treatment is,—so to arrange the bed-chamber of the somnambulist, that he cannot get out of it during sleep; and to avoid suppers, as well as all bodily and mental excitement.

SOMNAMBULISM, MAGNETIC, MESMERIC, or ARTIFICIAL, *Somnambulis'mus artificialis*, *Cataph'ora magnet'ica*, *Somnip'athy*, is that peculiar condition, into which individuals are thrown by the *Animal Magnetizer*. It occurs only in those of weak nervous temperament; in hysterical females, &c.

SOMNAMBULISMUS, Somnambulism—s. Artificialis, Somnambulism, magnetic.

SOMNAMBULIST, *Somnam'bulus*, *Hypnob'ates*, *Hypnob'ates*, *Noctam'bulus*, *Lunat'icus*, *Noctam'bulus*, *Somnam'bulus*. A sleep-walker.

SOMNAMBULIS'TIC, Relating or appertaining to somnambulism,—as the '*somnambulis'tic state*.'

SOMNAMBULO, Somnambulist.

SOMNIA'TIO, from *somnium*, 'a dream.' The act of dreaming.

SOMNIATIO MORBOSA, Oneironosus—s. in Statu vigili, Hallucination.

SOMNIF'EROUS, *Som'nifer*, *Sopor'ifer*, *Hypnot'icus*, *Hypnopœ'us*, *Soporat'ivus*, *Soporif'ic*, *Soporif'erosus*, (F.) *Assoupissant*; an epithet for a medicine which causes sleep, from *somnus*, 'sleep,' and *fero*, 'I carry.'

SOMNII'QUIST; same etymon as the next. One who talks in his sleep.

SOMNIO'QUIUM, *Somniloquis'mus*, *Somnil'oquism*, from *somnus*, 'sleep,' and *loquor*, 'I speak.' Talking in the sleep.

SOMNOPATHY, Somnambulism, magnetic.

SOMNIUM, *Enyp'nion*, *Insom'nium*, *a Dream*, (Sc.) *Sveuin*, *Sveving*, *Svevynng*, *Svenyng*, (F.) *Rève*, *Songe*. A confused assemblage, or accidental and involuntary combination of ideas and images, which present themselves to the mind during sleep. Dr. S. Mitchell, of New York, used the word *Somnium* to signify the state between sleeping and waking, in which persons perform acts of which they are unconscious.

For 'waking dreams,' see Hallucination.

Those distressing dreams which occur during a state of half sleep, are called, by the French, *Réveasseries*.

SOMNO-VIGIL, Somnambulism.

SOMNOLENCY, *Somnolen'tia*, *Hypnæsthe'sis*, *Hypno'dia*, *Dormita'tio*, *Carus* *Lethar'gus* *Cataph'ora*, *Cataphora*, *Coma* *Somnolen'tum*, *Caro'sis*, *Slumber*, *Heav'iness*, (F.) *Assoupissement*; from *somnus*, 'sleep.' Sleepiness. Also a state intermediate between sleeping and waking. It is often a symptom of disease.

SOMNUS, Sleep.

SOMPNUM, Sleep.

SON, Furfur, Sound.

SONCHUS, *συχος*, *S. Olera'ceus*, *Hiera'cium olera'ceum*, *Cicer'bita*, *Sow Thistle*, *Swine-thistle*, (F.) *Laiteron doux*. Ord. Cichoracææ. Most of the species of *Sonchus* abound with a milky juice, which is very bitter, and said to possess diuretic virtues.

SONCHUS FLORIDANUS, Mulgedium Florida-num.

SONDE, Sound, Specillum—s. *Cannelée*, Director.

SONDE D'ANEL. A very fine stylet of silver, awl-shaped at one end. It is used for probing the lachrymal passages through the punctum lacrymale.

SONDE DE BELLOC. An instrument invented by Belloc for plugging the nasal fossæ, in cases of hemorrhage. It consists of a curved silver canula, open at both ends, and furnished with a button. The instrument is passed through the nares to the throat; and a plug is attached to the button, so that, when the instrument is drawn forwards through the nose, the posterior nostril is stopped.

SONDE BRISÉE (F.), *Eyed probe*. A long, straight stylet, composed of two parts, which may be screwed to each other; blunt at one end, and furnished at the other with an eye, so that it may be used either as a probe for punctured wounds, or for a seton needle.

SONDE À CONDUCTEUR (F.). A modification of the ordinary catheter;—to facilitate the changing of catheters, without the fear of making false passages. It is a common catheter, open at its beak. The *Stylet* or *Mandrin* is one half longer than that of the ordinary catheter. To use the instrument, the stylet is pushed into the cavity of the bladder through the catheter. The latter is then withdrawn by slipping it over the stylet, which is kept in its place, and serves as a guide to a fresh catheter.

SONDE À DARD, see Lithotomy (high operation).

SONDE DE LAFOREST. A small, crooked canula, used for probing the nasal duct from below upwards, and for throwing injections into it.

SONDE ou PINCE DE HUNTER. A cylindrical silver canula; of the size of a common catheter; open at both extremities, and contain-

ing a wire of iron, one of the ends of which is split into two parts; each being terminated by a small silver scoop, and separating from each other by virtue of their elasticity, when pushed out by the canula, and again approximating when drawn in. It has been used for laying hold of small calculi in the urethra.

SONDE DE VARECQ. Soda.

SONGE, Somnium.

SONITUS AURIUM, Tinnitus aurium — s. Fluidi, Hygrecinema — s. Hepaticus, Hepatechema — s. Intestinalis, Enterechema — s. Stomachicus, Gasterechema.

SONOROUS RHONCHUS, *Râle sonore*.

SONUS, Sound — s. Vocis, Accent.

SOOJA, see Dolichos.

SOOJIE, BASTER'S, a farinaceous article of diet, is said to consist of wheat flour sweetened with sugar.

SOOL, Gastroperiodiodynia.

SOOT, Fuligo — s. Tea, see Fuligokali — s. Wart, Cancer, chimney-sweeper's.

SOPHIA, Sisybrium sophia — s. Chirurgorum, Sisybrium sophia.

SOPHISTICATIO, Falsification.

SOPHORA HEPHAPHYL'LA, *Anticholer'ica*. Ord. Leguminosæ. Sex. Syst. Decandria Monogynia. The root and seeds of this shrub are intensely bitter, and are said to have been found useful in cholera, colic, dysentery, &c.

SOPHORA TINCTO'RIA, *Baptis'ia* seu *Podaly'ria* *Tincto'ria*, *Indigo'fera*, *Wild Indigo*, *Indigo Weed*, *Broom*, *Indigo Broom*, *Horsefly Weed*, *Yellow Broom*, *Clover Broom*, *Rattle Bush*, *Yellow Indigo*. An American plant, the taste of whose root is unpleasant, sub-acrid, and nauseous—very similar to that of ipecacuanha. In a large dose, the bark of the root acts both as an emetic and cathartic. It has been considered antiseptic and febrifuge, and has been used, in the form of fomentation or cataplasm, in phagedenic and gangrenous ulcers. A liniment, prepared by simmering the cortical part of the root in cream, has been found an efficacious application to sore nipples and to ulcerated breasts.

Baptis'ia *Leuca'ntha*, *Tall white false Indigo*, an indigenous plant, has the same properties.

SOPHRONISTÆ DENTES, see Dentition.

SOPHRONISTERES DENTES, see Dentition.

SOPHROSYNE, Temperance.

SOPHIENS, Paregoric.

SOPIO, Opium.

SOPOR. A profound sleep, from which the person can be roused with difficulty. It is a symptom in many of the neuroses.

SOPOR CAROTICUS, Carus.

SOPORARIE ARTERIÆ, Carotids.

SOPORATIVUS, Somniferous.

SOPORIFEROUS, Somniferous.

SOPORIFIC, Somniferous.

SO'POROUS, *So'porus*, (F.) *Soporeux*, from *sopor*, 'sleep.' Sleepy; causing sleep.

SORA, Essera.

SORB TREE, *Sorbus domestica*.

SORBASTRELLA, *Pimpinella saxifraga*.

SORBEFA'CIENT, *Sorbefa'ciens*, from *sorbere*, 'to suck in,' and *facere*, 'to make.' A remedy that promotes absorption.

The following are the chief sorbefaciens or modifiers of nutritive action — *entrophics*: — *Acida Vegetabilia*; *Alkalia*; *Ammoniacum*; *Brominium*; *Galbanum*; *Hydrargyri Præparata*; *Iodinium*; *Liquor Calcii chloridi*; *Spongia usta*; *Compression*, (methodical); *Friction*; *Mental Sorbefaciens*, (Imaginational, Emotions.)

SORBETHUM, Scherbet.

SORBETHUM, Scherbet.

SORBETHUM, Scherbet.

SORBIER DES OISELEURS, *Sorbus aucuparia*.

SORBITIO, Jus.

SORBITIO CARNIS seu EX CARNE. Broth or soup made of meat.

SORBITUM, Jus.

SORBUM, see *Sorbus domestica*.

SORBUS, *Cratægus aria*, S. *domestica*.

SORBUS AUCUP'RIA seu AUCUPA'RIA, *Mes'pilus*, *M. aucup'ria*, *Mountain Service*, *Mountain Ash*, *Quicken tree*, *Roan tree*, *Witchen*, *Witch hazel*, *Witch wood*, (Sc.) *Roden tree*, *Roun tree*, *Rowan tree*, *Rone*, (Prov.) *Kcer*, *Rantrce*, (F.) *Sorbier des Oiseleurs*, *Frêne sauvage*. Ord. Rosacææ. The berries — (Sc.) *Rodens* — of this tree are employed for similar purposes as the last.

SORBUS ALPINA, *Cratægus aria*.

SORBUS AMERICA'NA, *Pyrus Americana*, *American Mountain Ash*. The bark resembles that of the Wild Cherry, and might be used in the same cases.

SORBUS ARIA, *Cratægus aria* — s. *Aucuparia*, S. *aucuparia* — s. *Cydonia*, *Pyrus cydonia*.

SORBUS DOMESTICA, *Sorbus*, *Pyrus domestica*, *Mes'pilus domestica*, *Oie*, *Service* or *Sorb Tree*, (F.) *Cormier*. Family, Rosacææ. Sex. Syst. Icosandria Trigynia. The fruit of this tree, *Sorbium*, is astringent, and has been recommended in diarrhœa and dysentery. It is given in the form of rob. A kind of cider is made from it, and also brandy.

SORBUS MALUS, *Pyrus malus*.

SORDES, *Rhypos*, 'filth.' A dirty-looking sanies, discharged from ulcers. Also, accumulations of the secretions of the mouth, on the teeth in adynamic fevers more especially, and of foul matters in the stomach — *Sordes prima'rum viarum*, *Rhypha'ria*. The French call an ulcer, exhibiting such an appearance, *sordid*. Also dirt of any kind.

SORDES, Ichor, Saburra — s. *Acidæ*, *Acidities* — s. *Aurium*, *Cerumen* — s. *Primarum viarum* *Embarras gastrique*, see *Sordes* — s. *Ventris*, *Excrement*.

SORDICULÆ AURIUM, *Cerumen*.

SORE, Ulcer.

SORE, BAY. A disease which Mosely considers to be a true cancer. It is endemic in the Bay of Honduras.

SORE MOUTH, Stomatitis — s. *Gangrenous*, *Cancer aquaticus* — s. *Throat*, *Cynanche* — s. *Throat*, *Clergyman's*, *Pharyngitis*, *follicular* — s. *Throat*, *inflammatory*, *Cynanche tonsillaris* — s. *Throat*, *putrid*, *Cynanche maligna* — s. *Throat*, *tubercular*, *Pharyngitis*, *follicular* — s. *Throat*, *ulcerous*, *Cynanche maligna*.

SORENESS, Sax. *ropf*, 'vexed, molested.' *Paraps'is acris teneritu'do*. Painful uneasiness or tenderness, local or general, on being touched with a pressure that does not usually excite distressing feeling. Often, a febrile symptom. Also, the tenderness of a wound, ulcer, &c.

SORGHUM, *Panicum Italicum*.

SOROCCO, Puna.

SOROCCHE, Puna.

SORORIA'TIO, from *sorores*, 'sisters,' *sororio*, 'to grow up or swell together.' The period at which the breasts of the female become developed. The act of becoming thus developed. A young maiden, whose mammae begin to show, — *sororiantes mammae* — was formerly called *sororians virgo*. — *Plantus*.

SORREL, COMMON, *Rumex acetosus* — s. *Field*, *Rumex acetosella* — s. *French*, *Rumex scutatus* — s. *Garden*, *Rumex scutatus* — s. *Mountain*, *Oxalis acetosella*, *Oxyria reniformis* — s. *Salt of Potass*, *oxalate of* — s. *Roman*, *Rumex scutatus* — s. *Sheep*, *Rumex acetosella*.

SORREL TREE, *Andromeda arborea*, *A. mariana*.
 SORREL, WELSH, *Oxyria reniformis*—*s.* White,
Oxalis acetosella—*s.* Wood, Yellow, *Oxalis stricta*.
 SOSTRUM, *Sotrum*; from *σωζωω*, 'to save,'
σωτηρ, 'a preserver.' A reward given to one who
 saves the life of another. A physician's fee or
honorarium, (F.) *Honoraire*.

SOTERIA DOCTRINA, *Medicina*.

SOTERIE AQUÆ, Waters, mineral.

SOTIREL'LA, Ancient name of a medicine
 composed of opium and other narcotics, nutmeg,
saffron, camphor and soot. It was used in cer-
 tain diseases of the teeth.

SOTRUM, *Sostrum*.

SOUBRESAUT, *Subsultus tendinum*.

SOUCHERLOON, Bit noben.

SOUCHET DES INDES, *Curcuma longa*—
s. *Odorant*, *Cyperus longus*—*s.* *Rond*, *Cyperus*
rotundus.

SOUCI, *Calendula officinalis*, *Panophobia*—
s. *des Alpes*, *Arnica montana*—*s.* *des Champs*,
Calendula arvensis—*s.* *Ordinaire*, *Calendula offi-*
cialis.

SOUDE, Soda—*s.* *Acétate de*, Soda, acetate
 of—*s.* *Aéré*, *Sodæ carbonas*—*s.* *Borate de*, *Bor-*
ax—*s.* *Borate sursaturé de*, *Borax*—*s.* *Carbonate*
de, *Sodæ carbonas*—*s.* *Caustique*, *Soda caustica*
—s. *à la Chaux*, *Soda caustica*—*s.* *Chlorure de*,
Soda, chloride of—*s.* *du Commerce*, *Soda*—*s.*
Crayeuse, *Sodæ carbonas*—*s.* *Effervescente*, *Sodæ*
carbonas—*s.* *Hyposulfite de*, *Soda*, hyposulphite
 of—*s.* *Phosphate de*, *Soda*, phosphate of—*s.* *et de*
Potasse, *Tartrate de*, *Soda*, tartrate of—*s.* *Pure*,
Soda caustica—*s.* *Sousborate de*, *Borax*—*s.* *Sous-*
carbonate de, *Soda*, subcarbonate of—*s.* *Sulfate*
de, *Soda*, sulphate of.

SOUFFLE, see Murmur, respiratory—*s.* *Am-*
phorique, see *Cavernous respiration*—*s.* *Bron-*
chique, see Murmur, respiratory—*s.* *Métallique*,
 see *Cavernous respiration*—*s.* *Placentaire*, *Bruit*
placentaire—*s.* *Trachéal*, see Murmur, respiratory
 —*s.* *Tubaire*, see Murmur, respiratory—*s.* *Utérin*,
Bruit placentaire—*s.* *Voilé*, see *Cavernous respi-*
ration.

SOUFFLE, WHISPERING. A bellows' sound heard
 over solidified lung and excavations when the
 patient whispers.—*Flint*.

SOUFFRE, Sulphur—*s.* *Carburé*, *Carbonis sul-*
phuretum—*s.* *Iodure de*, *Sulphuris iodidum*—*s.*
Sublimé, *Sulphur sublimatum*—*s.* *Végétal*, *Lycop-*
odium.

SOULLURE, Pollution.

SOULA'MEA AMA'RA, *Rex amaro'rum*. A
 shrub of the Moluccas; Order, Polygalacæ; all
 the parts of which are of great bitterness—"hor-
 renda amarities." It is employed by the Malays,
 and, it is said, with success in cholera and pleu-
 risy; and as a febrifuge.

SOUND, *Specillum*, *Stylus*, *Exploratorium*,
Radi'olus, (F.) *Sonde*. An instrument used by
 surgeons to discover whether there be a stone in
 the bladder. It is usually made of highly pol-
 ished steel, and is shaped like the catheter. The
 operation is termed sounding.

The French *Sonde* has, however, a more ex-
 tensive signification. It means different instru-
 ments introduced into cavities of certain organs,
 or into wounds, fistulas, &c., to investigate their
 condition, or to fulfil some therapeutical indica-
 tion. See *Sonde*.

SOUND, *Sonus*, *Echos*, *Noise*, (F.) *Son*, *Bruit*.
 The sensation produced on the auditory nerve by
 the vibrations of a sonorous body. Sounds may
 be propagated in three modes. 1. By *reciproca-*
tion or *consonance*, as when a sounding body, of
 a definite pitch, produces a musical tone when
 another body of the same pitch is sounded near
 it. 2. By *resonance*, as when a sounding body
 is placed in connection with another, one or more

of whose parts may be thrown into reciprocal vi-
 bration; and 3. By *conduc'tion*, as when the vi-
 brations are transmitted through fluid, liquid, or
 solid media.

SOUND, Catheterize, Syncope—*s.* *Auricular*,
Apyromele—*s.* *Bellows*, friction, rasp, saw, lancet,
 &c., see *Bruit*—*s.* *Cracked pot*, *Bruit de pot fêlé*
 —*s.* *Crumpling*, pulmonary, *Froissement pulmo-*
naire—*s.* *Laryngeal*, *Laryngeche*.

SOUND, UTERINE, *Uterine bougie*, (F.) *Sonde*
utérine. An instrument, somewhat similar to a
 small male catheter, to be introduced into the
 cavity of the uterus, in the diagnosis of diseases
 of that viscus. When notched on the stem, it
 enables the size of the uterine cavity to be ap-
 preciated, and becomes a good *hysterometer*.

SOUNDING, Searching, see *Sound*.

SOUNDNESS OF MIND, *Sanity*.

SOUPIR, Sigh.

SOUR BERRY, see *Oxyantha Galeni*, *Vaccini-*
um oxycoccos—*s.* *Dock*, boreal, *Oxyria reni-*
formis—*s.* *Leaf*, *Andromeda arborea*—*s.* *Tree*
Andromeda arborea—*s.* *Wood*, *Andromeda ar-*
borea.

SOURCIL, *Supercilium*.

SOURCILIER, *Corrugator supercilii*, *Super-*
ciliary.

SOURD, Deaf.

SOURDS-MUETS, see *Mutitas surdorum*.

SOUR-MILK, *Buttermilk*.

SOUR-SOP, *Bromelia ananas*.

SOURWOOD, *Andromeda mariana*.

SOUS-ACROMIO-CLAVI-HUMÉRAL, *Del-*
toïd—*s.* *Atloïdien*, *Subatloïdien*—*s.* *Acroïdien*,
Subaxoïdien—*s.* *Azotate de Bismuth*, *Bismuth*,
subnitrate of—*s.* *Clavier*, *Subclavius*—*s.* *Costaux*,
Intercostal—*s.* *Cutané*, *Subcutaneous*—*s.* *Épi-*
neux, *Infra-spinatus*—*s.* *Lingual*, *Sub-lingual*—*s.*

maxillary—*s.* *Maxillo-Labial*, *Depressor anguli*
oris—*s.* *Mental*, *Submental*—*s.* *Métacarpo-latéri-*
phalangien, *Prior annularis*—*s.* *Optico-sphéno-*
sclérotic, *Rectus inferior oculi*—*s.* *Orbitaire*,
Suborbital—*s.* *Pubio-coecygien*, *Levator ani*—*s.*
Pubio-crêti-tibial, *Gracilis*—*s.* *Pubio-prétibial*,
Gracilis—*s.* *Pubio-trochantérien-externe*, *Obtura-*
tor externus—*s.* *Pubio-trochantérien-interne*, *Ob-*
turator internus—*s.* *Scapulaire*, *Subscapularis*—*s.*
Scapulo-trochinien, *Subscapularis*—*s.* *Sels*, see
Salt.

SOUTH CAROLINA, MINERAL WATERS
 OF. *Glenn's Springs*, in *Spartanburg District*,
 are highly charged with salts of lime, and, not
 far from them, is a chalybeate. *West's Spring*,
 and *Chick's Springs*, a few miles from *Greenville*,
 resemble *Glenn's Springs*.

SOUTHERNWOOD, *Artemisia abrotanum*—
s. *Field*, *Artemisia campestris*—*s.* *Maritime*, *Ar-*
temisia maritima—*s.* *Tartarian*, *Artemisia sant-*
onica.

SOWBREAD, *Arthanita*, *Cyclamen*.

SOWENS, *Flummary*.

SOY, see *Dolichos soja*.

SOYMIDA FEBRIFUGA, *Swietenia febrifuga*.

SPA, MINERAL WATERS OF. A town
 seven leagues southeast of *Liège*, where there
 are several springs, possessing a sharp acidulous
 taste; containing much carbonic acid, carbonates
 of iron, lime, and magnesia; carbonate of soda,
 and chloride of sodium. The water is much used
 as a tonic.

SPA WATER, ARTIFICIAL. *Sodæ subcarb.*, gr.
 vij; *magnesiæ carbon.*, ℥j; *limat. ferri.*, gr. iij;
sodii chlorid., gr. j; *Æj*, Oijj. Impregnate
 with gas from *marble powder* and *sulph. acid.*,
 āā ℥x.

SPACE, INTERPEDUNCULAR, see *Inter-*
peduncular—*s.* *Perforated*, anterior, *Locus per-*

oratus anticus — s. Perforated, posterior, see Tarini pons.

SPADE-BONE, Scapula.

SPADO, Castratus, Eunuch, Spasm.

SPAGYRIA, Chymistry.

SPAGYRISTS, from *σπασω*, 'I separate,' and *γυρωω*, 'I assemble,' because they reduced compounds into elements, and formed the latter into compounds [?]. A set of physicians, who pretended to account for the changes that occur in the human body in health and disease, in the same manner as the chymists of their day explained those of the inorganic kingdom. *Medicina Paracelsistica* seu *Spagyrica*, was likewise called *Hermetica*, because it was believed that the means of cure adopted in it had been found in the books of Hermes.

SPAG, Skeleton.

SPANÆMIA, from *σπαςος*, 'poor,' and *αιμα*, 'blood.' Poverty of the blood. Diminution in the quantity of fibrin and red corpuscles of the blood, — as where bleeding has been carried beyond certain limits. — Simon.

SPANÆMIC, *Spanæmicum* (remedium), *Dysplasiticum*, *Plastilyticum* et *erethilyticum*, *Hæmatolyticum*, *Dyscrasicum*. Same etymon as the last. Relating to spanæmia.

A medicine whose protracted use is said to impoverish the blood, — as iodine, bromine, &c.

SPANDARAPUM, Sparadrapum.

SPANING, Weaning.

SPANISH FLY, *Cantharis* — s. Juice, Extractum glycyrrhizæ.

SPANNADRAPUM, Sparadrapum.

SPANOPOGON, from *σπαςος*, 'rare,' and *πωγων*, 'beard.' One who has lost his beard, or has a thin beard.

The Greeks called those who had little beard, or who had lost it, *Spanopogones*.

SPADRAPA, Sparadrapum.

SPADRAPIER. The name of a machine for spreading sparadraps. A *Plaster machine*. It consists of a table, with two raised pieces, movable, and furnished with points, by which the cloth can be stretched, and of a lamina or blade of metal to extend the plaster over it.

SPADRADRA'PUM, *Spadradra'pa*, *Sparadrappum*, *Tela emplastica* seu *emplastrica*, *Spandara'pum*, *Spannadrappum*, (F.) *Sparadrap*. Any adhesive plaster spread upon linen or paper. The chief sparadraps are the following: —

SPADRADRA'PUM ADHÆSIVUM, *Adhesive Plaster*. A spread plaster of the *Emplastrum adhesivum*. It is also called *Strapping*.

English Court Plaster is a Sparadrap, (F.) *Taffetas agglutinatif*, *T. gommé*, *Taffetas d'Angleterre*, *Ser'icum Anglicum*, *Emplastrum Anglicum*. *E. Anglicanum*, *E. Adhæsivum Woodstockii*, *E. Ichthyocol'la telæ indnetum*, *E. Glutin'sum*, *Tela Ichthyocol'la glutinans*, *Isinglass Plaster*. It is made by stretching black silk, and brushing it over with a solution of *isinglass* \mathfrak{z} j, in *proof spirit* \mathfrak{z} xj, to which *tinct. benzoin* \mathfrak{z} ij, are added. When dry, this is repeated five times; after this, two coats are given it of a solution of *tereb. Chia* \mathfrak{z} iv, in *tinct. benz.* \mathfrak{z} vj, which render it less liable to crack.

Liston's Isinglass Plaster is made by spreading several coats of strong solution of isinglass in weak spirit over oiled silk, or, still better, over animal membrane previously prepared for the purpose from the peritoneal coat of the cæcum of the ox.

SPADRADRA'PUM PRO FONTIC'ULIS, *Issue Plaster*, is sometimes made of *simple dinchylon*, lbj; *Burgundy pitch* and *sarcocolla*, each \mathfrak{z} iv; *common turpentine*, \mathfrak{z} j. Spread upon linen and polished with a moistened calendering glass rubber.

SPADRADRA'PUM seu TELA GALTERI, *Defensive*

Plaster, (F.) *Toile de Gautier*. This is made of *olive oil*, lbss; *suet*, \mathfrak{z} iv; *wax*, \mathfrak{z} x; *litharge*, *common turpentine*, *thus*, and *mastic*, aa, \mathfrak{z} ij; *bole armeniac*, *flour*, aa \mathfrak{z} j. Pour it, while liquid, upon cloth, and spread. Used for issues and to keep on dressings.

SPADRADRA'PUM VESICATO'RIMUM. Several substances have been introduced as substitutes for blistering plaster, (see *Emplastrum Lyttæ*), under the names, *Tela vesicatoria*, *Blistering Tissue*, &c., and other forms of which are the *Taffetas vesicant* ou *épispastique*, *Papier épispastique*, *Charta vesicatoria*. They are made of an ethereal or alcoholic extract of cantharides, or of cantharidin, mixed with wax, and spread, in a very fine layer, on silk or paper previously oiled or waxed. They are efficient agents.

SPADRADRA'PUM VIR'IDE, *Corn Plaster*. This may be made of *yellow wax*, lbj; *Burgundy pitch*, \mathfrak{z} xij; *common turpentine*, \mathfrak{z} vj; *verdigris*, \mathfrak{z} ij; spread on cloth and polished.

Kennedy's Corn Plaster is made of *yellow wax*,

lbj; *Venice turpentine*, \mathfrak{z} ij; *verdigris*, \mathfrak{z} j.

SPADRADRAPUS, Sparadrapum.

SPARAGMA, Laceration.

SPARAGMOS, Spasm.

SPARAGUS, Asparagus.

SPARAL'LIUM, *Clyster uteri'nis*. An injection into the vagina. — Ruland and Johnson.

SPAREDIA. A ligature covered with the white of egg. — Paracelsus.

SPARGA'NIUM RAMO'SUM, *Great Bur-reed*, from *Sparganon*, owing to the ribbon-like leaves. Indigenous: *Order*, Typhaceæ; flowering in July and August. The roots are subastringent, but esulent; yielding a fine fecula, similar to salep. They are sometimes made into a poultice for inflamed mammæ.

SPARGA'NON, *Sparganium*, from *σπαργω*, 'I swathe,' 'I wrap.' 'Swathing clothes;' a kind of bandage, with which children were formerly surrounded. — Pöësius. Also, a fascia.

SPARGANO'SIS, *Spargo'sis*, *Intumescen'tia lactea mammarum Mastodyn'ia polyg'ala*, from *σπαργω*, 'I am ready to burst.' Extreme distension of the breasts by milk. Sparganosis also means the wrapping of a child in swathing clothes.

SPARGANOSIS PUERPERARUM, *Phlegmatia dolens*.

SPARGANUM, Sparganon.

SPARROWGRASS, Asparagus.

SPARSUS, Sporadic.

SPARTIUM JUN'CEUM, *Spanish broom*.

Ord. Leguminosæ. A small European shrub, cultivated in the gardens of the United States, on account of its yellow flowers. The seeds are diuretic and tonic, in small doses; emetic and cathartic in large. They have been used in dropsy — 10 or 15 grains three times a day.

SPARTIUM SCOPA'RIMUM, *Cyt'isus scopari'us*, *Genis'ta*, *G. scoparia* seu *hirsu'ta*, *Cytisogenista*, *Broom*, (F.) *Génêt à balai*. *Broom Tops*, *Spartii Cucumina*, *Scopari'us*, (Ph. U. S.) have a bitter taste, and are possessed of diuretic properties. They have been used in dropsies. Dose, of the powder, \mathfrak{z} j to \mathfrak{z} ss. All the genistæ have similar virtues. A decoction of genista, along with the cauterization of the pustules under the tongue, has been recommended in hydrophobia.

SPARTIUM TINC'TORIUM, *Genista tinctoria*.

SPASM, *Spasmus*, *Sparag'mos*, *Synol'cè*, *Spado*, from *σπασω*, 'I draw.' The Greeks gave this name to all kinds of convulsions. It is now usually applied to involuntary muscular contractions; and these, again, have been divided into *tonic spasm*, *Paroton'ia*, which consists in permanent rigidity and immobility of the muscles that are the seat of it (see *Tetanus*); and *clonic spasm*,

which consists in alternate contractions and relaxations (see Convulsion).

Cullen has a class, *Spasmi*—the *neurospasmi* of Fuchs.

SPASM, CLONIC, Convulsion—s. Cynic, see Canine laugh.

SPASM OF THE GLOTTIS, Asthma thymicum.

SPASM, HISTRIONIC, OF THE FACE, see Tic.

SPASM OF THE LARYNX, Asthma thymicum.

SPASM, MASTICATORY, OF THE FACE, Trismus.

SPASM WITH RIGIDITY, Tetanus.

SPASM, WRITERS'. Involuntary spasms of the muscles of the thumb and index finger, observed, at times, in those who are much accustomed to writing. See Cramp, writers'.

SPASMATICUS, Spasmodicus.

SPASMATODES, Spasmodicus.

SPASME DE LA GLOTTE ET' DU THORAX, Asthma thymicum—s. *de la Vessie*, Cystospasmus.

SPASMI, see Spasm.

SPASMODES, Convulsive.

SPASMODIC, Spasmodicus.

SPASMOL'OGY, *Spasmolog'ia*, from *σπασμος*, 'spasm,' and *λογος*, 'a treatise.' A treatise on spasms.

SPASMOLYGMUS, Singultus.

SPASMOT'ICUS, *Spasmat'icus*, *Spasmat'odes*, *Spas'ticus*, *Spastic*, *Spasmod'ic*, (F.) *Spasmodique*, *Spastique*, from *σπασμος*, 'spasm.' Anything relating to spasm. Also, an antispasmodic.

Morbi constrict'o'rii, *M. spasmod'ici*, &c., are diseases accompanied with spasm.

SPASMUS, Convulsion, Spasm—s. Aurium, Otagia—s. Bronchialis, Asthma—s. Caninus, see Canine laugh—s. Clonicus, Convulsion—s. Cynicus, see Canine laugh—s. Facialis, Tic—s. Glottidis, Asthma thymicum—s. Linguae, Glosso-spasmus—s. Maxillae inferioris, Trismus—s. Muscularis, Cramp—s. Muscularum Faciei, Canine laugh—s. Nutans, Convulsion, salaam—s. Periphericus, Horrida cutis—s. Universalis, Synclonus—s. Ventriculi, see Cardialgia—s. Vesicae, Cystospasmus.

SPAS'NIA, same etymon as Spasm. [?] A term used by Mercurialis to designate the lancinating pain produced, at times, in the chest by violent fits of coughing.

SPASTIC, Spasmodicus, Tonic spasm.

SPASTICUM, Tetanic.

SPATHA, Hypaleiptron.

SPATHES'TER, from *σπασω*, 'I draw.' A surgical instrument, used for drawing the prepuce over the glans, when too short.—P. Amman.

SPATHOMELE, Spatula.

SPATHULA, Scapula, Spatula—s. Fœtida, Iris fœtidissima.

SPATHYEMA FœTIDA, Dracontium fœtidum.

SPATIA INTERLOBULARES, Interlobular fissures.

SPAT'ILĒ, *σπατιλη*, 'human excrement.' A liquid fecal evacuation. Excrement.—Hippocrates.

SPATIUM ORIS, Mouth—s. Trigonum, Lyra.

SPATTERDOCK, Nuphar advena.

SPAT'ULA, *Spath'ula*, diminutive of *Spatha*, *σπαθη*, 'a broad-sword.' *Spathome'lē*, *Specill'um latum*. An instrument used for spreading plasters, stirring ointments, holding down the tongue, &c. Also, the scapula.

SPATULA PRO ORE, Glossospatha.

SPAUD, Humerus.

SPAU, Saliva.

SPAUT-BONE, Humerus.

SPAW-BONE, Humerus.

SPAYING, see Castration.

SPEANING-BRASH, Brash, weaning.

SPEARWORT, Ranunculus flammula.

SPEAUTER, Zinc.

SPECIAL, see Specific.

SPEC'IALIST, (F.) *Spécialiste*. One who devotes himself to a specialty; as to diseases of particular parts, as of the eye, ear, chest, &c.

SPECIES, (F.) *Espèces*, *Spécialités*, *Thés composés*. Official mixtures of substances cut or bruised. Sometimes used for compound powders, as it always appears to have been formerly. See Pulvis.

SPECIES AROMATICÆ, Pulvis cinnamomi compositus—s. Diacinnamomi, Pulvis cinnamomi compositus—s. Diaeretæ, Pulvis cretæ compos.—s. Diajalapæ, Pulvis jalapæ compositus—s. Diambræ sine odoratis, Pulvis cinnamomi compositus—s. Diatrageanthæ frigidæ, Pulvis trageanthæ compositus—s. Hieræ pieræ, Pulvis aloes cum canellâ—s. Lætificantes Rhazis, Pulvis cinnamomi compositus—s. e Scordio cum opio, Pulvis cretæ compositus cum opio—s. e Scordio sine opio, Pulvis cretæ compositus.

SPECIF'IC, *Spécific'us*, *Nosocrat'ic*, (F.) *Spécifique*, from *species*, 'a form or fashion,' and *facere*, 'to make.' A substance to which is attributed the special property of removing some particular disease. Probably no such remedy exists. Mercury in syphilis, and sulphur in the itch, have been regarded as the strongest examples. The word is also used adjectively in the sense of *special*; as "mercury has a *specific* or *special* action on the salivary glands."

SPECIFIC OF HERRNSCHWAND. A once celebrated German vermifuge. It is said to have consisted of 10 grains of *Gamboge*, with 20 of *Carbonate of Potassa*. It is affirmed, that mercury and arsenic have also been found in it.—Paris.

SPECIFICUM PARACELSI, Potassæ sulphas.

SPECIL'LUM, *Mclē*, *Stylus*, *Explorato'rium*, from *specio*, 'I examine,' *Specul'rio*, a probe, (F.) *Styilet*, *Sonde*. A surgical instrument, employed for examining wounds, fistulas, and for passing setons, &c. It is usually formed of silver; and is terminated, at one end, by an olive-shaped button. The *eyed probe* has an aperture at the other extremity.

SPECILLUM, Everriculum, Hypaleiptron, Sound—s. Auricularium, Apyromele—s. Cereum, *Bougie*—s. Excavatum, Stylus excavatus—s. Latum, Spatula—s. Minus, Melotus.

SPÉCIOLE, Species.

SPECKS OF THE CORNEA, see Caligo.

SPECLARION, Specillum.

SPECTACLES, from *spectare*, 'to behold,' *Conspicill'a*, (Sc.) *Breels*, (F.) *Besicles*, *Lunettes ordinaires*, *Conserres*. Glasses to assist the sight; arranged so as to be adapted to both eyes. These glasses are more or less *concave* or *convex*, according as the sight is more or less short, (*myopic*) or long, (*presbyopic*.) When the glass is adapted to one eye, it is called an *Eyeglass*, *Conspicill'um*, *Perspicill'um*, *Vitrum ocula'rē*.

SPECULA'RIS LAPIS. A transparent mineral, but of what nature is not clear, which was formerly employed in epilepsy. In old times it was used for glass.—Pliny.

SPEC'ULUM, *Catop'ter*, *Catop'tron*, *Diop'tron*. In Latin, 'a mirror;' from *specio*, 'I see.' In surgery, it means different instruments for dilating cavities, and facilitating their examination. See Dilator. There are various instruments of this kind,—the *S. Ani*, *S. Auris*, *S. Vaginae*, (*Colpeurynt'er*, *Elytreurynt'er*), *S. Matric'is*, *S. Oculi*, *S. Oris* ((F.) *Bâillon*), *S. Gutturis*, *S. Vesicae*.

SPECULUM CITRINUM, Orpiment—s. Indicum, Ferri limatura—s. Lucidum, Septum lucidum—s.

Oris, Glossocatochus—s. Veneris, Achillea millefolium.

SPECUS, Vulva—s. Cordis, Ventricle of the Heart—s. Pro medullâ spinali, see Vertebral column—s. Vertebralis, see Vertebral column.

SPEDALSKE, see Radzyge.

SPEDALSKHED, see Radzyge.

SPEECH, Voice, articulated.

SPEECHLESSNESS, Mutitas.

SPEEDIMAN'S PILLS, see Pilulæ aloes et myrrhæ.

SPEEDWELL, BROOKLIME, Veronica beccabunga—s. Female, Antirrhinum elatine—s. Official, Veronica—s. Purslain, Veronica peregrina—s. Water, Veronica beccabunga.

SPELL-BONE, Fibula.

SPELTRUM, Zincum.

SPERAGE, Asparagus.

SPERAGUS, Asparagus.

SPERM, σπέρμα, σπερματος, from σπείρω, 'I sow.'

Spermatic fluid or liquor, Seminal fluid, Seed, Semen, S. viri'lè seu muscul'num seu genita'lè, Semin'ium, Genita'lè, Medull'æ, Ros, Sanguis, Serum, Humor genita'lis seu semina'lis seu venere'us, Uri'na genita'lis, Genita'ra, Sperma, S. viri'lè, Sperm'ium, Tho'rè, Tho'rus, Lac maris, Lagne'a, Lagnu'a, Lagne'uma, Germen, Vita'lè virus, Male's milk, Prop'agatory or genital liquor, Vital or quickening venom, (F.) Semence, Fluide séminal. A whitish, viscid fluid, of a peculiar smell, secreted by the testicles, whence it is carried by the vasa deferentia to the vesiculæ seminales, to be thrown into the vagina, during coition, through the ejaculatory ducts and the urethra. It is the fecundating fluid, and must come into actual contact with the germ of the female. The *Aura sem'inis, Gonau'ra*, is incapable of effecting fecundation. The semen, at the time of emission, is composed of two different fluids; the one liquid and transparent, which is considered to be the secretion of the prostate,—the other, white, and as thick as mucilage; the product of the testicular secretion. The sperm contains, according to Vauquelin, 900 parts of water, 50 of animal mucilage, 10 of soda, and 30 of calcareous phosphate. The animal matter is peculiar, and by some termed *spermatin*.

Microscopic observations show that it contains *spermatozo'a*, or more properly *spermatozo'ids*; for their animalcular nature is not demonstrated. They are produced in cells—*sperm-cells*—and have probably no more title to be considered animalcular, than the cilia of the ciliated epithelium. By careful examination, other minute, round, granulated bodies may almost always be detected, which are in all cases much less numerous than the spermatozoa. These bodies are the *seminal granules, gran'ula sem'inis*. Pure sperm, in its most perfect state, consists principally of spermatozoids and seminal granules; both of which are enveloped in a small quantity of fluid, *liquor sem'inis, spermatic liquor*.

It has been imagined, but erroneously, that during coition there is a secretion of female sperm—*Semen mulie'brè, Thelygonum*. The increased secretion that takes place is chiefly from the glands of Duverney.

Sperm also means spermaceti.

SPERM CELL, see Sperm.

SPERMA, Sperm—s. Mercurii, Hydrargyrus acetatus.

SPERMA RANA'RUM, *Sperni'ola seu Sperni'olum seu Sperni'ola seu Sperni'olum rana'rum*. Frog's spawn. Once used in medicine.

SPERMACETI, Cetaceum—s. Whale, see Cetaceum.

SPERMACRASIA, Spermatorrhœa.

SPERMATACRASIA, Spermatorrhœa.

SPERMATACRATIA, Spermatorrhœa.

SPERMATIC, *Spermat'icus, Semina'lis, Sem'inal, (F.) Spermaticque*, from σπέρμα, σπερματος. That which relates to the sperm. A name given to different parts connected with the organs of generation.

SPERMATIC ARTERIES, *Arteriæ Spermaticæ seu præparan'tes, (F.) Artères testiculaires, A. de l'ovaire (Ch.)*, are two in number—one on each side—and arise from the sides of the aorta, sometimes from the renal arteries. They descend, almost vertically, at the sides of the vertebral column, and are distributed differently in the two sexes. In man, the spermatic artery, situate at the side of the vas deferens, issues by the abdominal ring; gives numerous ramifications to the spermatic cord, and divides into fasciuli of branches, one of which goes to the testicle,—the other to the epididymis. In the female, the spermatic artery, *ova'rian artery*, dips into the pelvis, and passes to the ovarium, Fallopian tube, and round ligament.

SPERMATIC CORD, OR CHORD, *Testic'ular Cord, Funic'ulus Spermaticus, Corpus varico'sum, (F.) Cordon spermaticque ou testiculaire*. The vascular and nervous chord, by which the testicle is suspended. It is composed of the spermatic artery and veins; of other small vessels; of lymphatics; of nervous filaments from the spermatic plexus, and from the genito-crural branch of the lumbodorsal plexus; of the vas deferens, and, very often, of a fibro-cellular cord, which unites the peritoneum to the upper part of the tunica vaginalis, and in which encysted hydrocele of the spermatic cord occurs. All these parts are united together by a very lax, areolar tissue, and surrounded by coats, which, reckoning from without, are:—1. The skin and areolar membrane. 2. A fibro-cellular membrane, formed by the fascia superficialis. 3. A very thin layer, formed by fibres of the cremaster muscle, united archwise before, and often also behind, the cord. 4. The proper sheath of the spermatic vessels, or the tubular prolongation furnished by the fascia transversalis to the chord, on a level with the superior orifice of the inguinal canal. The spermatic cord is commonly shorter on the right side than on the left; and of a different size in different individuals. It ascends, almost vertically, from the superior margin of the testicle as far as the lower orifice of the inguinal canal; passes through this canal and enters the abdomen, crossing the epigastric artery. Here it forms an evident elbow, directing its course backward. At this part, also, the organs composing it separate from each other:—the vas deferens descending into the pelvis to pass behind the bladder;—the blood-vessels and lymphatics ascending towards the lumbar region, &c.

SPERMATIC FILAMENTS, Spermatozoa—s. Fluid, Sperm.

SPERMATIC GANGLION. A large ganglion, formed by branches from the hypogastric ganglion, and from the spermatic plexus. It supplies the fundus uteri. Besides these ganglia, Dr. Robt. Lee describes *ves'ical* and *vag'inal ganglia*, and anterior and posterior *subperitone'al ganglia* and *plexuses*, which communicate with the preceding, and constitute an extensive nervous rete over the entire uterus.

SPERMATIC LIQUOR, Liquor seminis, see Sperm.

SPERMATIC PASSAGES OR WAYS, *Via Spermaticæ*, are the canals concerned in the excretion of semen. See Testicle.

SPERMATIC PLEXUSES OF NERVES, *Plexus testiculares*, are two in number, and are furnished by the renal plexuses. Their filaments, called *Spermatic nerves*, follow the arteries of the same name to the testicle in man; and to the ovary and Fallopian tube in the female,—*ova'rian nerves*. They

cannot be traced into the substance of these organs.

SPERMATIC VEINS are two or three in number on each side. They accompany the spermatic artery, and open — those of the right, into the vena cava inferior; those of the left, into the corresponding renal vein. These veins form, above the testicle, a kind of venous network, called, by some, the *Spermatic Plexus*; and another plexus before the psoas muscles, called the *Corpus pampiniforme*.

SPERMATIN, see Sperm.

SPERMATIS'MUS, *Emis'sio sem'inis*, from *σπερμα*, *σπερματος*, 'sperm.' The emission of sperm. *Spermatis'm* or *Animal'culism* is the doctrine, which maintains that the embryo is produced by the, so called, spermatic animalcules.

SPERMATIST, Animalculist.

SPERMATOCOC'CI, Spermatozoa.

SPERMATOCE'LE, *Hernia semina'lis scroti*, *Oscitoece'le semina'lis*, *Gonocoe'le*, from *σπερμα*, *σπερματος*, 'sperm,' and *κληη*, 'a tumour.' The ancients gave this name to certain swellings of the testicle which were regarded as produced by an accumulation of sperm in the organ. Also, varicocele.

SPERMATOCLEMMMA, see Pollution.

SPERMATOCLEPSIS, see Pollution.

SPERMATOCYSTIDORRHAG'IA, *Cantlorrhag'ia ejaculato'ria*, *Hæmatu'ria ejaculato'ria* seu *semina'lis*, from *σπερμα*, *σπερματος*, 'sperm,' *κυστις*, 'bladder,' and *ραγη*, 'a breaking forth.' A discharge of blood from the urethra, or the act of ejaculation of sperm.

SPERMATODES, Gonoides.

SPERMATOGON'IA, *Spermogon'ia*, *Spermatopœ'a*, *Spermatopœ'sis*, *Spermi'um*, from *σπερμα*, *σπερματος*, 'sperm,' and *γεννω*, 'to beget.' The preparation or secretion of sperm.

SPERMATOID, Gonoides.

SPERMATOLEPSIS, see Pollution.

SPERMATOLIPSIS, see Pollution.

SPERMATOL'OGY, *Spermatolog'ia*, from *σπερμα*, *σπερματος*, 'sperm,' and *λογος*, 'a discourse.' A treatise on sperm.

SPERMATOPH'OROUS, *Seminif'erosus*, from *σπερμα*, *σπερματος*, 'sperm,' and *φωω*, 'I carry.' Sperm-bearing. The cells or granules in the sperm have been so called.

SPERMATOPŒA, Spermatozoia.

SPERMATOPOESIS, Spermatozoia.

SPERMATOPOETIC, Spermatozoæus.

SPERMATOPŒ'US, *Spermatopœ'ticus*, *Spermatopœ'tic*, *Gonepœ'tus*, *Gonepœ'ticus*, *Gonopœ'ticus*, from *σπερμα*, *σπερματος*, 'sperm,' and *ποιωω*, 'to make.' Food, to which has been attributed the property of augmenting the secretion of semen; and, consequently, of exciting the venereal act. Very succulent and very nutritious substances have been so considered.

SPERMATORRHŒ'A, *Spermorrhœ'a*, *Spermacra'sia*, *Spermatozœ'mia*, *Spermatocra'sia*, *Gonacra'sia*, *Gonacrat'ia*, *Gonozœ'mia*, *Gonozœ'mia*, *Spermatocrat'ia*, *Gonorrhœ'a vera*, (F.) *Flux de Sperme*, *Pollutions*, *Pertes séminales*: from *σπερμα*, *σπερματος*, 'sperm,' and *ρωω*, 'I flow.' An emission of sperm, without copulation. See Gonorrhœa, and Pollution.

SPERMATORRHŒA ATONICA, *Gonorrhœa laxo-rum*.

SPERMATOS'CHESIS, from *σπερμα*, *σπερματος*, 'sperm,' and *σχειωω*, 'retention.' Retention or suppression of the spermatic secretion.

SPERMATOZEMIA, Spermatorrhœa.

SPERMATOZO'A, *Zoosper'mata*, from *σπερμα*, *σπερματος*, 'sperm,' and *ζωων*, 'animal.' *Animal'cula semina'lia* seu *spermat'ica*, *Fila spermat'ica*, *Corpuseula sem'inis*, *spermatococ'ci*, *Ver-*

mic'uli spermat'ici, *Spermatozo'ids*, *Sem'inal* or *spermat'ic fil'aments*, *Spermat'ic* or *seminal animal'cules* [?], (F.) *Zoöspermes*, *Spermatozoaires* Reputed animalcules seen in the sperm; by most physiologists supposed to be the formative agents in generation. See Sperm.

SPERMJATOZOAIRES, Spermatozoa.

SPERMATOZOIDS, Spermatozoa.

SPERMIO'LUM RANARUM, *Sperma rana-rum*.

SPERMIIUM, Sperm, Spermatozoia.

SPERMOBOLE, see Ejaculation, Spermatis-mus.

SPERMOEDIA CLAVUS, Ergot.

SPERMOGONIA, Spermatorrhœa.

SPERMORRHŒA, Spermatorrhœa.

SPERNIOLUM RANARUM, *Sperma rana-rum*.

SPEWING, Vomiting.

SPHAC'ELATED, *Sphacelatus*, (F.) *Spha-célé*, Struck with sphacelus.

SPHACELATION, Mortification.

SPHACÈLE, Sphacelus — *s. de la Bouche*, Cancer aquaticus.

SPHACELIA SEGETUM, see Ergot.

SPHACELISMUS, Sphacelus — *s. Cerebri*, Phrenitis.

SPHAC'ELUS, *σφακελος*, *Gangræ'na Sphacelus*, *Sphacelis'mus*, *Cold mortification*, (F.) *Sphacèle*, *Gangrène froide*, from *σφαζω*, 'I slay.' This word is used, by some, synonymously with gangrene; by others, with gangrene when it occupies the whole substance of a limb. Commonly, it means the disorganized portion, in cases of mortification, *anthraconecro'sis*, which must be thrown off, — or is, in other words, totally dead. The foul disorganized portion of an ulcer—called the *slough*—must be considered a kind of sphacelus.

Sphacelus was formerly used to denote excessive pain; and for agitation from excessive pain, or violent emotion.

SPHACELUS CEREALIS, Ergotism — *s. Nosocomialis*, Hospital gangrene.

SPHŒRA, *Pila* — *s. Marina*, *Pila marina* — *s. Thalassia*, *Pila marina*.

SPHŒRANTHUS INDICUS, Adaca.

SPHŒ'RIA SINEN'SIS, (*σφαيرا*, 'a globe,') *Hia Tsao Tom Tchom*, *Hia Tsao Tong Tchong*, *Totsu Kaso*, *Summer plant winter worm*. A fungus which projects from the neck of a lepidopterous insect. It is highly esteemed by the Chinese as a tonic, like ginseng.

SPHŒRIDION, *Pilula*

SPHŒRION, *Globule*, *Pilula*.

SPHŒROCEPHALA ELATIOR, Echinops.

SPHŒROCOCCUS CRISPUS, *Fucus crispus* — *s. Helminthochortus*, *Corallina Corsicana* — *s. Lichenoides*, *Fucus amylicus*.

SPHŒRULA GALENI, *Pilula*.

SPHŒRULÆ SANGUINIS, *Globules of the blood*.

SPHAGE, *Throat*.

SPHENDONE, *Funda*.

SPHENO, in the composition of anatomical terms, usually means, belonging or relating to the sphenoid bone.

SPHENOCEPHALIA, from *σφηη*, 'a wedge,' and *κεφαλη*, 'head.' Monstrosity, in which the head is wedge shaped, owing to the projection of the anterior fontanel region.

SPHÉNO-ÉPINEUSE, (*Artère*), Meningeal artery, middle.

SPHENOID, *Sphenoides*, *Spheno'des*, *Sphenoïdes*, *Sphenoïda'lis*, (F.) *Sphénoïde*, from *σφηη*, 'a wedge,' and *ειδος*, 'resemblance.' Wedge-shaped. Hence,

SPHENOID BONE, *Sphenoïdes os*, *Os basilarē seu cuneifor'mē* seu *cu'nco comparat'um* seu *sphē-*

sphenoïdālē seu *multifor' mē* seu *az'ygōs* seu *papilla'rē* seu *polymor'phon* seu *paxilla'rē* seu *baxilla'rē* seu *alaf'or'mē* seu *sphenoïdēum* seu *vespif'or'mē* seu *inconjugat'um* seu *pterygoïdeum* seu *alāt'um* seu *colato'rū*, *Pterygoïd bone*. An zygous bone, situate on the median line, and at the base of the cranium. It articulates with all the other bones of that cavity; supports them, and strengthens their union. Its form is singular, and resembles a bat with its wings extended. It has, 1. An *inferior* or *guttural surface*, on which is situate the *crista*, that joins the vomer; a channel, which concurs in forming the pterygo-palatine foramen; the pterygoid process; the pterygoid fossa; the scaphoid depression; the Vidian or pterygoid canal; the foramina—*ovale*, *spinale*, &c. 2. A *superior* or *cerebral surface*, on which are:—The clinoid processes; the pituitary fossa; the *foramina* (*ovale*, *rotundum*, and *spinale*); the *Apophysis of Ingrassias* or *lesser wing*; the foramen opticum, &c. 3. An *occipital* or *posterior surface*, which is articulated with the basilar process of the occipital bone. 4. An *anterior* or *orbital nasal surface*; having, anteriorly, a *crista* to unite with the ethmoid bone; and, on each side, a round aperture, which leads into two cavities in the substance of the bone, separated by a middle septum, and called the *sphenoïdal sinuses*. 5. Two *zygomatico-temporal* or *external surfaces*, which correspond to the temporal and zygomatic fossæ.

Some divide the sphenoid into *body* or *middle portion*; and *alæ*, which are four in number, and are subdivided into *great* (*Temporal Plates* or *Wings*, *Alæ magnæ*) and *little* (*Apophyses of Ingrassias*, *Alæ minores*, *Processus ensiformes*).

The *Sphenoïd suture* surrounds the bone.

SPHENOÏD, SPINOUS PROCESS OF THE, Sphenoid spine.

SPHENOÏDAL, *Sphenoïdalis*. That which belongs or relates to the sphenoid bone.

SPHENOÏDAL COR'NUA, *Cor'nuā Sphenoïdalia*, (F.) *Cornets sphenoïdalia* ou *de Bertin*, *Osselets de Bertin*, *Ossic'ula Bertini*, *Ossa triangul'aria*, *Pyr'amids of Wistar*. Two small, thin, and curved bones, situate between the sphenoid and ethmoid, with which they are confounded in the adult. They have the shape of a hollow pyramid, with the base turned backwards; and are developed by a single point of ossification. They are articulated with the sphenoid, ethmoid, palate bone, and vomer.

SPHENOÏDAL OR SUPERIOR ORBITARY FISSURE, *Fora'men lac'terum superius*, (F.) *Fente sphenoïdale*, is a large fissure, situate between the great and little ala of the sphenoid. It is seen at the upper and back part of the orbit between which and the cranium it is a means of communication, and transmits the third, fourth, and sixth pair of nerves, and the first branch of the fifth pair, to the eye and its appendages.

SPHENOÏDAL SPINE, *Spina* seu *Crista sphenoïdalis*, (F.) *Épine sphenoïdale*, *Spinous Process of the Sphenoid*;—1. A projecting crista at the inferior surface of the sphenoid-bone, for articulation with the vomer. 2. A triangular process, *Apophyse sous-temporale* (Ch.), met with near the posterior margin of the same bone, behind the foramen spinale. At the point of the spinous process, a *styloid process* is frequently met with.

SPHENOÏDES, Cuneiform, Sphenoid—s. Os, Sphenoid bone.

SPHENOÏMAXILLARY, *Spheno-maxillaris*. That which relates to the sphenoid and maxillary bones.

SPHENOÏMAXILLARY FISSURE, *Inferior orbital Fissure*, (F.) *Fente spheno-maxillaire ou orbitaire inférieure*; called, also, *Fora'men lac'terum inferius* seu *spheno-maxilla'rē*, is situate at the

posterior part of the angle formed by the union of the internal and inferior parietes of the orbit. It is constituted, above, by the sphenoid bone; below, by the superior maxillary and palate bones; and, before, by the malar bone. It is narrower at the middle than at the extremities, and forms a communication between the orbital cavity and the zygomatic fossa.

SPHENOÏMAXILLARY FOSSA is a name given by some anatomists, to a depression at the union of the sphenomaxillary and pterygomaxillary fissures.

SPHENO-ORBITAR. A name given by Béclard to the anterior part of the body of the sphenoid bone, which is developed by a variable number of points of ossification.

SPHENOÏPALATINE, *Sphenoïpalatinus*. That which relates to the sphenoid and palate bones.

SPHENOÏPALATINE ARTERY, *Large lateral nasal A.*, is the termination of the internal maxillary. It enters at the posterior part of the superior meatus of the nose, through the sphenopalatine foramen, and spreads its numerous branches on the pituitary membrane covering the septum, the cornua, and the meatus.

SPHENOÏPALATINE FORA'MEN is a round aperture, formed by the vertical portion of the os palati and the sphenoid. It establishes a communication between the nasal fossæ and the zygomatic fossa.

SPHENOÏPALATINE GANGLION, *Ganglion of Meckel*, *Sphenoïdal G.* (Ch.) A small, nervous, cordiform, or triangular ganglion, of variable size, situate without the foramen sphæno-palatinum, in the pterygomaxillary fissure. It seems suspended by several nervous filaments to the trunk of the superior maxillary nerve, and gives off *internal* or *sphenoïpalatine filaments*, *inferior* or *palatine filaments*, and a *posterior filament*, which is the *Vidian* or *pterygoïd nerve*.

SPHENOÏPALATINE NERVES, *Lateral nasal nerves*, arise from the ganglion—just described—at its inner part, and enter the nasal fossæ by the sphenopalatine foramen. They are five or six in number, and distribute their filaments to the outer and inner parietes of the nasal fossæ. One of the most remarkable branches is the *Naso-palatine*.

SPHENOÏPALATINUS, Levator palati.

SPHENOÏPARIETAL, *Spheno-parietalis*. That which belongs or relates to the sphenoid and parietal bones.

SPHENOÏPARIETAL SUTURE is formed by the articulation of the extremity of the greater ala of the sphenoid with the anterior and inferior angle of the parietal bone.

SPHENO-PTERYGO-PALATINUS, *Circumflexus*—s. *Salpingostaphylinus*, *Circumflexus*—s. *Salpingo-mallien*, *Laxator tympani*.

SPHENOÏSIS, see *Wedged*.

SPHENOÏSTAPHYLINUS, Levator palati.

SPHENOÏTEMPORAL, *Spheno-temporalis*. That which belongs to the sphenoid and temporal bones.

SPHENOÏTEMPORAL SUTURE is the suture at the articulation of the great alæ of the sphenoid bone with the squamous portion of the temporal. Béclard gives the name *sphenoïtemporal* to the posterior part of the body of the sphenoid, which is developed by distinct points of ossification.

SPHINX, Wasp.

SPHINCTER, *σφιγκτήρ*, *Constrictor*, *Musculus constrictorius*, from *σφιγγω*, 'I constrict.' A name given to several annular muscles, which constrict or close certain natural openings.

SPHINCTER ANI, *Annul'aris Ani*. Many anatomists have described two sphincter muscles of the anus:—1. The *S. externus* seu *cutaneus*, *Æ-*

pidis'cos, Coccygio-cutanē-sphincter, Orbicularis Recti, Constrictor Ani, Coccygio-anal, (Ch.) It is situate around the anus; it is elliptical from before to behind; flattened, and pierced at its middle. Its fibres describe concentric arcs, which are attached, behind, to the extremity of the coccyx, by a dense, areolar substance; and are confounded, anteriorly, with the bulbo-cavernosi and transversi perinæi muscles. This muscle contracts and closes the anus. 2. The *inner or internal Sphincter Ani, Sphincter intestinalis* of Winslow, is by many anatomists considered as the termination of the circular fibres of the rectum. It is annular, and situate around the inferior extremity of the rectum, to the extent of about a finger's breadth. It has the same uses as the other.

SPHINCTER GULÆ, Constrictores pharyngis — s. Ilei, Bauhin, valve of — s. Intestinalis, Sphincter ani internus — s. Labiorum, Orbicularis oris — s. Oculi, Orbicularis palpebrarum — s. Palpebrarum, Orbicularis palpebrarum — s. Pylori, see Pylorus — s. Vaginæ, Constrictores cunni — s. Ventriculi, Pylorus.

SPHINCTER VESI'CÆ, Sphincter of the bladder. Some anatomists have given this name to whitish, elastic, and circular fibres; which surround the neck of the bladder, but do not constitute a particular muscle. Morgagni has given the name **PSEUDO-SPHINCTER** to the anterior fibres of the levator ani, which pass beneath the neck of the bladder, and, by their contraction, close that opening. See Compressor urethræ.

SPHONDYLIIUM, Heracleum spondylium.
SPHONGUS, Fungus, Spongia.
SPHRAGIDONYCHARGOCOME'TA, from σφραγίς, 'a seal,' οὐζ, οὐζυχος, 'a nail,' ἀργός, 'white,' or perhaps ἀργυρός, 'silver,' and κομῶ, 'I adorn.' A charlatan who adorned his fingers to the very nails with rings.—Aristophanes, Hippocrates.

SPHYGMA, Pulse.
SPHYGMIC, Sphygmicus, (F.) Sphygmique, from σφυγμός, 'pulse.' Relating to the pulse: — pulsatory.

SPHYGMIC ART, Ars Sphygmica. The art of judging by the pulse, in health or disease.

SPHYGMICA DOCTRINA, Sphygmologia.
SPHYGMICUS, Throbbing.
SPHYGMOCEPHALUS, Crotaphe.
SPHYGMODES, Throbbing.
SPHYGMOLEGIUM, Pulsilegium.
SPHYGMOGRAPH; from σφυγμος, 'the pulse,' and γραφῶ, 'I describe.' An instrument which, when applied over an artery, indicates the character of the pulse as to force and extent of undulations.—Vierordt.

SPHYGMOLOG'IA, Sphygmology, Sphygmica Doctrina, Ars Sphygmica, from σφυγμος, 'the pulse,' and λογος, 'a description.' The doctrine of the pulse.

SPHYGMO-METER, Pulsilegium.
SPHYGMOS, Pulsation, Pulse.
SPHYGMOSCOPIUM, Pulsilegium.
SPHYRA, Malleolus.
SPHYXIS, Pulsation.
SPICA, Lavandula Spica.

SPICA, Fascia repens, Spica bandage, (F.) Épine. A bandage so called in consequence of its somewhat resembling a *spike* of barley. The turns of the bandage cross like the letter V; — each leaving a third of the roller uncovered. It is distinguished into *ascending* and *descending*. It may be applied over various parts of the body, and in a different manner in each case: thus, there is the *Spica seu Fascia inguinæ*, *Spica inguinæ duplex*, the spica for the shoulder, and another for the thumb.

SPICA, Lavandula Spica — s. Alpina, Valeriana

Celtica — s. Celtica, Valeriana Celtica — s. Indica, Nardus Indica — s. Nardi, Nardus Indica.

SPICEBERRY, Gaultheria, Laurus Benzoin.
SPICEBUSH, Laurus Benzoin.
SPICES, FOUR, see Myrtus pimenta.
SPICEWOOD, Laurus Benzoin.
SPICILLUM, Speillum.
SPIDER, see Araneæ tela.
SPIDERWORT, Liliago, Tradescantia Virginica.

SPIGELIA, S. Marilandica.
SPIGELIA ANTHELMIA, Demerara Pinkroot, a native of South America and the West India Islands, has properties like the

SPIGELIA MARILANDICA, S. Lonic'era, Anthelmia, Lonic'era Marilandica, Perennial Wormgrass or Indian Pink, Carol'ina Pink, Starbloom, Wormroot. Nat. Ord. Gentianaceæ. Class, Pentandria. Order, Monogynia. Indigenous. The root — *Spigeliu* (Ph. U. S.) *Pinkroot* — is celebrated as an anthelmintic, particularly in cases of lumbrici.

It is, also, asserted to have been found serviceable in remittent fever. It is a narcotico-acrid. Dose, gr. x to ℥ss.

SPIGNEL, Ethusa meum.
SPIKENARD, Conyza squarrosa, Nardus Indica — s. American, Aralia racemosa — s. False, Smalacina racemosa — s. Small, Aralia nudicaulis — s. Tree, Aralia spinosa.

SPILANTHIS ACMELLA, Spilanthus acmella.

SPILANTHUS ACMELLA, S. ciliata seu fimbriata, Spilanthes acmella, from σπῖλος, 'a spot,' and ἀνθος, 'a flower,' owing to its dotted or speckled flower, *Bidens acmella, Achmella, Ac-mella, A. Mauritiana, Verbesina acmella, Balm-leaved Spilanthus. Ord. Compositæ. Sex. Syst. Syngenesia Polygamia æqualis.* This plant possesses a glutinous, bitter taste, and fragrant smell. The herb and seed are said to be diuretic and emmenagogue. They have been used in dropsies, jaundice, fluor albus, and calculous complaints; given in infusion.

SPILANTHUS, BALM-LEAVED, Spilanthus acmella — s. Ciliata, S. acmella — s. Fimbriata, S. acmella.

SPILANTHUS OLERA'CEUS, Spear-leaved Spilanthus, (F.) Cresson de Para. A tincture of the plant has been recommended in toothach.

SPILL, see Nævus.
SPILOMA, see Nævus.
SPILOSIS, Epichrosis — s. Ephelis, Ephelides — s. Poliosis, Poliosis.

SPILSBURY'S ANTISCORBUTIC DROPS. An empirical preparation, formed of *hydrary. oxymur., rad. gentian., cort. aurant. sic. aa ʒij; antimon. crud., santal. rubr. aa ʒj; spiritus vini rectif., aquæ, aa ʒviiij.*

SPINA, 'a thorn; Spine, (F.) Épine. A process on the surface of a bone, which has been compared to the spines or thorns on certain vegetables. The chief processes of this name are: — the *nasal spine, the spine of the scapula, the spine of the ischium, the four iliac spines, the palatine spine, the maxillary, the sphenoid, &c.* The *spine of the back* is the collection of vertebræ constituting the vertebral column.

SPINA, Penis — s. Acidia, Oxyacantha Galeni — s. Egyptiaca, see Acaciæ gummi — s. Alba, Carduus marianus, Mespilus oxyacantha, Onopordum acanthium — s. Bifida, Hydrocæchis — s. Cervina, Rhamnus — s. Domestica, Rhamnus — s. Dorsi, Vertebral column, see Nasus — s. Dorsi introrsum Flexa, Lordosis — s. Ferrea, Pin — s. Helmontii, Aiguillon — s. Hirei, Astragalus verus — s. Infectoria, Rhamnus — s. Nodosa, Rachitis — s. Sphenoidalis, Sphenoidal spine.

SPINA VENTOSA, Spina ventositas, Tere'do,

Ostiarthroacæ, Fungus seu Tumor fungosus articuli, *Lu'pia juncturae*, *Hyperspongia*, *Flatus spinæ*, *Arthroacæ*, *Pædarthroacæ*, *Sideratio Ossis*, *Cancer seu Gangræna Ossis*, *Exostosis*, *White Swelling* (of some). A term of no definite meaning, as is obvious from these various words having been considered its synonymes. By some, it is defined to be — a disease of the osseous system, in which the texture of the bone dilates, seeming to be distended with air, and constituting a variety of osteo-sarcoma. By others, it is considered to be a tumour arising from an internal cavity of a bone; occurring most frequently in the carpus or tarsus. The term itself is a translation from the Arabic of Rhazes. See, also, *Hydrarthrus*, and *Mollities Ossium*.

SPINA VERTEBRALIS, Vertebral column.

SPINACH, Spinacia.

SPINACHIA, Spinacia.

SPINA' CIA, *Spina'chia*, *Spina'cia olera'cea*, *Spin'age*, *Spinach*, (F.) *Épinard*. Ord. Chenopodiaceæ. Sex. Syst. Diœcia Pentandria. A plant which resembles the cabbage in its dietetic powers. The leaves boiled, with the addition of oil, form a good emollient cataplastm. It has been used in phthisical complaints; but its medicinal properties, if it have any, are not now regarded.

SPINACIA OLERACEA, Spinacia.

SPINÆ, Spinous processes — s. *Ventositas*, *Spina ventosa*.

SPINAGE, Spinacia.

SPINAL, *Spina'lis*, *Spino'sus*, *Spina'tus*, *Rachid'ian*, (F.) *Épinière*, *Rachidiën*, from *spina*, 'the spine.' That which relates to the vertebral column.

SPINAL ARTERIES, *Arteriæ spinales*, are two in number, viz: 1. The *posterior spinal*, *Artère médiane postérieure du Rachis*, (Ch.) It arises from the vertebral, near the corpora pyramidalia, and descends on the posterior surface of the spinal marrow, distributing its ramifications to it. 2. The *anterior spinal artery*, *A. médiane antérieure*, (Ch.) is larger than the last, and arises, also, from the vertebral. It descends, in a serpentine manner, upon the anterior surface of the marrow; furnishes ramusculi to it, and unites with that of the opposite side, opposite the foramen magnum occipitis. A very tortuous branch arises from this union, which descends as far as the inferior extremity of the marrow, to which it sends numerous divisions.

The term *Spinal Arteries* or *Rachidian Arteries* is also given, in the abstract, to all the arteries of the spinal marrow and vertebral canal. The same may be said of the veins and nerves.

SPINAL CORD, *Medulla spinalis*.

SPINAL FORAM'INA, (F.) *Trous rachidiens*, in the abstract, are the foramina formed by every two contiguous vertebrae, through which the spinal nerves issue. See *Vertebral*. The term *Foramen Spinale* seu *spino'sum* is especially applied, however, to a small foramen, in front of the spinous process of the sphenoid bone, through which the middle artery of the dura mater enters the cranium. It is, likewise, called *Foramen sphenospino'sum*, (F.) *Trou Sphéno-épineux* ou *petit rond*, *Trou épineux*.

SPINAL GANGLION, see *Encephalon*.

SPINAL IRRITATION, *Rhachialgi'tis*, *Rhachial'gia*, *Neural'gia spina'lis*, *Notal'gia*. A modern pathological view, which refers most nervous diseases to irritation of the spinal cord. This irritation is presumed to be indicated by tenderness on pressure over the spinous process of one or more vertebrae, or over the nerves proceeding from the cord and distributed to the parts at the sides of the spine. Such tenderness, however,

by no means indicates the pathological condition in question, as it is often met with in those enjoying perfect health. The treatment advised is cupping and counter-irritation on each side of the spine, which may be beneficial in such diseases, no matter what part of the frame may be in a morbid state, by exciting a new and revellent impression on a very sensible portion of the cutaneous surface.

SPINAL NERVE, *Ac'cessory of the Par vagum* or *8th pair*, *Accessory nerve of Willis*, *Spinal Accessory*, *Superior res'piratory N.*, *Eleventh pair of encephalic nerves*, (F.) *Spino-cranio-trapézien*, *Trachélo-dorsal* (Ch.), arises from the medulla spinalis, within the vertebral canal, between the anterior and posterior roots of the cervical nerves, at a greater or less distance from the cranium. The roots unite to form the nerve, which ascends into the cranium through the foramen magnum of the occipital bone, and issues by the foramen lacerum posterius, crossing the sterno-cleido-mastoideus, to which it gives filaments, and losing itself entirely on the trapezius muscle. The pneumogastric and spinal accessory nerves together — *nervus vagus cum accessorio* — resemble the spinal nerves; the former, with its ganglion, being the posterior root; the latter, the anterior.

SPINAL NERVES, Vertebral nerves — s. *Prolongation*, *Medulla spinalis*.

SPINAL SYSTEM OF NERVES, see *Nerves*.

SPINALES COLLI MINORES, *Interspinales colli* — s. et *Transversales lumborum*, *Transversalis dorsi*.

SPINALIS CERVICIS, *Semi-spinalis colli* — s. *Colli*, *Semi-spinalis colli*.

SPINALIS DORSI, *Spinalis Dorsi major*, (F.) *Grand épineux du dos*. Winslow calls thus some fleshy fasciuli, which are situate on the lateral surfaces of the spinous processes; from the third dorsal vertebra to the first or second lumbar; and which form part of the transversospinalis of most authors. The same anatomist calls — *Spinalis Dorsi minor*, *Petit épineux du dos* — some small, fleshy fibres, situate on each side of the interspinal ligament. They are short, flat, and pass from one spinous process to the other. Like the preceding, they form part of the transversospinalis. All these fleshy fasciuli strengthen the vertebral column.

SPINATI, *Interspinales colli*.

SPINATUS, *Spinal*.

SPINDLE TREE, *Euonymus Americanus*.

SPINE, Vertebral column — s. *Curvature of the*, *Gibbositas* — s. *Hæmal*, *Sternum* — s. *Neural*, *Spinous process*.

SPINGEL, *Anethum*.

SPINI-AXOIDO-OCCIPITALIS, *Rectus capitis posticus major* — s. *Azoido-trachéli-atloidiën*, *Obliquus inferior capitis*.

SPINITIS, *Myelitis*.

SPINNICK, *Nanus*.

SPINO-DORSITIS, *Myelitis*.

SPINOLA, see *Hydrorachis*.

SPINOSUS, *Spinal*.

SPINOUS, *Spino'sus*, (F.) *Épineux*, from *spina*, 'a thorn.' Having the shape of a spine or thorn.

SPINOUS PROC'ESSES OR APOPH'YSES of the *Vertebrae*, *Acan'thæ*, *Spinae*, *Cynol'ophoi*, *Neural Spines* of Mr. Owen, (F.) *Apophyses épineuses*, are situate at the posterior part of each vertebra, and afford attachment to the muscles, whose office it is to extend the spine. See *Vertebra*.

SPINTHEROPIA, *Confusio*.

SPINULA, *Pin*.

SPIRAC'ULA, (F.) *Spiracules*, from *spiro*, 'I breathe,' 'Breathing-holes.' Respiratory pores of the skin.

SPIRÆ CEREBRI, *Convulsions*, *cerebral*.

SPIRÆA DENUDATA, S. ulmaria.

SPIRÆA FILIPENDULA, *Filipendula*, *Saxifraga rubra*, *Dropwort*, (F.) *Filipendule*. Ord. Rosaceæ. *Sex. Syst.* Icosandria Pentagynia. The root of this plant is said to possess astringent and lithontriptic virtues.

SPIRÆA LOBATA, *S. Palma'ta*, *Queen of the Prairie*, *American Meadowsweet*. An oil, resembling oleum gaultheriæ, is obtained from the roots and stems.

SPIRÆA OPULIFOLIA, *Opulus-leaved Spiræa*, *Nine Bark*, has similar properties.

SPIRÆA PALMATA, *S. lobata*.

SPIRÆA TOMENTOSA, *Hardhack*, *Red meadowsweet*, *Steeple bush*, *Rosy bush*, *White leaf*. The root of this indigenous species, *Spiræa* (Ph. U. S.), which is abundant in the northern States of the Union, is tonic and astringent; and is usually administered either in the form of extract or decoction, (*Spiræa* ʒss; *aque* Oj.)

SPIRÆA TRIFOLIATA, *Gillenia trifoliata*.

SPIRÆA ULMARIA, *S. denudata*, *Ulmaria*, *U. palus tris*, *Regi'na Prati*, *Barba capræ*, *Bar'bula capr'na*, *Meadow Sweet*, *Queen of the Meadows*, (F.) *Ulmaire*, *Spirée ulmaire*, *Reine des Prés*, *Vignette*, *Herbe aux Abeilles*. The leaves have been recommended as mild astringents and diuretics—the flowers as antispasmodics and diaphoretics.

SPIRAMENTA PULMONUM, see Pulmo.

SPIRAMENTUM ANIMÆ, Pulmo.

SPIRAMINA PALPEBRARUM, Lachrymal puncta—s. Pulmonum, see Pulmo.

SPIRATIO, Respiration.

SPIRÉE ULMAIRE, *Spiræa ulmaria*.

SPIRIT, *Spir'itus*; from *spirare*, 'to breathe, to exhale;' (F.) *Espirit*, *Alcoholat*. A name given to every liquid product of distillation. Spirits were formerly distinguished into—*inflammable*, *acid*, and *alkaline*; and consequently a number of substances were crowded together, which often resembled each other in no other property than in being volatile. The term is now confined to alcoholic liquors, of which the following are the chief:

Arrack. Distilled from coarse palm sugar, named *jaggery*, fermented with the bark of the *Mimosa leucophlea*; also from rice and the fermented juice of the Palm; made in India. Its varieties are:—

1. *Makwah Arrack*. Made in India from the flowers of the Madhuca tree, *Bassia butyracea*.

2. *Tuba*. Made from palm wine, in the Philippine Islands.

Araka. Distilled, by the Tartars, from koumis, fermented mares' milk.

Araki. Distilled from dates, by the Egyptians.

Arika. A variety of koumis, distilled from fermented mares' milk, in Tartary and Iceland.

Brandy. Distilled from wine, figs, peaches, persimmon, apple, mulberries, and sometimes other fruits, in Europe, Asia, North and South America, wherever wine is made. The best brandy is that of Cognac; the next, that of Bordeaux and Rochelle. The varieties are—

1. *Aguardiente*, (S.) In Peru, the common brandy obtained from grapes is the *Aguardiente de Pisco*, so called, because shipped at the port of Pisco. Another kind, much dearer, and of excellent flavour, is made from Muscatel grapes, and is called *Aguardiente de Italia*. It is sometimes seen in the United States.

2. *Lan*. Made from rice, in Siam.

3. *Rakia*. Made in Dalmatia from the husks of grapes mixed with aromatics.

4. *Rossolio*. Made at Dantzic, from a compound of brandy, rossolis, and other plants.

5. *Troster*. Made on the Rhine, from the husks of grapes, fermented with barley and rye.

6. *Sekis-kayavodka*. Made from the lees of wine and fruit at Scio.

Geneva, Hollands, (*genièvre*, French for juniper.) Distilled from malted barley and rye, rectified on juniper berries, in Holland. Its variety is—

Gin. Made in England, from malted barley, rye, potatoes; rectified with turpentine.

Goldwasser. Distilled at Dantzic, from wheat, barley, and rye, rectified with aniseed, cinnamon, and other spices.

Kirschwasser. Distilled from the Malachoberry, in Switzerland.

Maraschino. Distilled from the Macarska cherry, at Zara, the capital of Dalmatia.

Rum, (supposed to be derived from the terminal syllable of the word *saccharum*: but the aboriginal Americans call this liquor Rum.) Distilled, in the West Indies and South America, from cane-sugar and molasses, and in North America from maple-sugar. Its variety is—

Slatkaia trava. Made in Kamtschatka, from a sweet grass.

Show-choo. Distilled, in China, from the lees of mandarin, a wine made from boiled rice.

Whisky, (supposed to be derived from *usque*, the first two syllables of *usquebagh*, the original name in Ireland.) Distilled, in Scotland and Ireland, from malted and raw barley, rye, oats, and potatoes; and in the south of France, from sloes. In Ireland it was called *buil-ceann*, or madness of the head. The best Scotch whisky is *Glenlivet*, the best Irish, *Emmishoven*.

Y-uer-a. Distilled, in the Sandwich Islands, from the root of the Tee-root, baked, pounded, and fermented.

To these may be added an intoxicating liquor made by the Afghanistans, from ewes' milk; and that made in Kamtschatka, from a species of mushroom, named *muchumer*.

SPIRIT OF AMMONIA, FETID, *Spiritus ammoniæ foetidus*—s. of Ammonia, succinated, *Spiritus ammoniæ succinatus*—s. of Aniseed, *Spiritus anisi*.

SPIRIT, BATHING, FREEMAN'S, see Liniamentum saponis compos.—s. Bathing, Jackson's, see Liniamentum saponis compos.—s. Bezoardic of Busius, see Bussii spiritus Bezoardicus—s. Bone, *Liquor volatilis cornu cervi*.

SPIRIT OF BURRHUS, *Burri spiritus matricialis*—s. of Camphor, *Spiritus Camphoræ*—s. of Carraway, *Spiritus carui*—s. of Colchicum, ammoniated, *Spiritus colchici ammoniacus*—s. of Cinnamon, *Spiritus cinnamomi*—s. of Ether, aromatic, *Spiritus ætheris aromaticus*.

SPIRIT, FUMING, OF BEGUIN, *Ammonia sulphuretum*—s. Fuming, of Boyle, *Ammonia sulphuretum*.

SPIRIT OF HARTSHORN, *Liquor volatilis cornu cervi*—s. of Horseradish, compound, *Spiritus armoraciæ compositus*—s. of Juniper, compound, *Spiritus juniperi compositus*—s. of Lavender, *Spiritus lavandulæ*—s. of Lavender, compound, *Spiritus lavandulæ compositus*—s. of Mindererus, *Liquor ammoniæ acetatis*—s. of Nitre, sweet, *Spiritus ætheris nitrici*—s. of Nitric ether, *Spiritus ætheris nitrici*—s. of Pennyroyal, *Spiritus pulegii*—s. of Peppermint, *Spiritus menthæ pipéritæ*—s. of Pimento, *Spiritus pimentæ*.

SPIRIT, PROOF, *Spiritus tenuior*—s. Pyroxylic, *Spiritus Pyroxylicus*.

SPIRIT OF ROSEMARY, *Spiritus rosmarini*—s. of Salt, *Muriaticum acidum*—s. of Scurvygrass, golden, see *Spiritus armoraciæ compositus*—s. of Spearmint, *Spiritus menthæ viridis*—s. of Sulphuric ether, *Spiritus ætheris sulphurici*—s. of Sulphuric ether, compound, *Spiritus ætheris sulphurici compositus*—s. of Turpentine, *Oleum terebinthinæ rectificatum*.

SPIRIT, VERDIGERIS, Aceticum acidum.
SPIRIT OF VITRIOL, Sulphuric acid—s. of Wine,
Spiritus rectificatus — s. of Wine and camphor,
Spiritus camphoræ.

SPHIRT, Wood, Spiritus Pyroxylicus.

SPIRITS, ANIMAL, Nervous fluid.

SPIRITUOUS, Alcoholic.

SPIRITUS, Breath, Life, Respiration, Spirit
—s. Æthereus nitrosus, Spiritus ætheris nitrici
—s. Æthereus vitriolicus, Spiritus ætheris sulphurici.

SPIRITUS ÆTHERIS AROMATICUS, *Æther Sulphuricus cum alcoholè aromaticus, Elix'ir vitrioli dulcè, Sweet Elix'ir of Vitriol, Vigu'ni's Elix'ir of Vitriol, Aromatic Spirit of Æther.* (Cinnam. cort. contus. ℥ij, cardam. sem. contus. ℥iiss, piperis longi fruct. cont., zingib. rad. concis., sing. ℥j, spiritus ætheris sulphurici. Oj. Macerate, for 14 days, in a stopped glass vessel and strain. *Ph. L.*) It is used as a stimulant in nervous affections. Dose, f℥ss to f℥j.

SPIRITUS ÆTHERIS COMPOSITUS, Spiritus Ætheris sulphurici compositus — s. Ætheris hydrochlorici, Spiritus Ætheris muriatici.

SPIRITUS ÆTHERIS MURIATICI, *Sp. Æ. Hydrochlorici, Sp. Muriatici ætheris, Sp. Salis dulcis, Æther Muriaticus alcoholicus, Spirit of hydrochloric or muriatic ether, Dulcified marine acid.* An old preparation, made by adding one part of muriatic acid to three parts of rectified spirit, and distilling. Its action is like that of the spiritus ætheris nitrici.

SPIRITUS ÆTHERIS NITRICI, *Sp. Ætheris nitrosi seu nitri dulcis seu Æthereus nitrosus, Æther nitricus alcoolisatus, A'cidum Nitri dulcificatum, Sweet Spirit of Nitre, Nitre drops, Spirit of Nitric Ether, (F.) Æther azoteux alcoolisé, Liqueur anodine nitreuse.* (Nitrate of Potassa, in coarse powder, ℔ij, Sulphuric acid, ℔iiss; Alcohol, Oixss; Diluted Alcohol, Oj; Carbonate of Potassa, ℥j. Mix the nitrate of potassa and the alcohol in a large glass retort, and having gradually poured in the acid, digest with a gentle heat for two hours; then raise the heat, and distil a gallon. To the distilled liquor add the diluted alcohol and carbonate of potassa, and again distil a gallon.—*Ph. U. S.*) It is refrigerant, diuretic, antispasmodic, and diaphoretic. Dose, gtt. xxv to f℥j. Specific gravity, 0.834.

SPIRITUS ÆTHERIS OLEOSUS, Spiritus Ætheris sulphurici compositus, Oleum æthereum.

SPIRITUS ÆTHERIS SULPHURICI, *Æther Sulphuricus cum Alcoholè, Liquor Æthereus Sulphuricus, Spiritus Vitrioli dulcis, S. Ætheris vitriolici, Liquor Sulphuricus alcoholisatus, Spirit of Sulphuric Ether.* (*Æther sulphuric.* Oss; *sp. rect.* Oj. Mix. *Ph. L.*) Stimulant, diaphoretic, diuretic, and antispasmodic. Dose, f℥ss to f℥ij.

SPIRITUS ÆTHERIS SULPHURICI COMPOSITUS, (*Ph. U. S.* 1842), *S. ætheris vitriolici compositus seu Ætheris compositus* (*Ph. U. S.* 1851) seu *Spiritus æthereus oleosus, Liquor anodynus seu anodynus mineralis Hoffmanni, Compound Spirit of Sulphuric Ether, Hoffmann's Anodyne Liquor, (F.) Æther hydrique alcoolisé, Æther sulfurique alcoolisé, Esprit d'Æther sulfurique, Liqueur anodine d'Hoffman.* (*Æther Sulphuric.* Oss; Alcohol, Oj; *Ol. Æther.* f℥ij. *Ph. U. S.* *Ph. L.*) Mix. A stimulant and antispasmodic. Specific gravity, 0.816.

SPIRITUS ÆTHERIS VITRIOLICI COMPOSITUS, Spiritus ætheris sulphuric. comp.

SPIRITUS AMMONIÆ, *Alkali ammoniacum spirituosum, Al'cohol ammoniatum, Sp. salis ammoniaci, Sp. salis ammoniaci vinosus, L. ammoniac spirituosus, Li-*

quor ammoniacalè vinosum, Solutio subcarbonat'is ammoniaci spirituosæ, (F.) Esprit d'ammoniaque. (*Ammon. muriat.* in pulv. subtilissim., calcis, āā ℔j; alcohol. f℥xx; aquæ, f℥ix. The water is employed to slake the lime; the muriate of ammonia is then well mixed with it, and by means of heat, the ammonia is made to pass into the distilled water contained in a quart bottle. *Ph. U. S.*) Stimulant and antispasmodic. Dose, f℥ss to f℥j.

SPIRITUS AMMONIÆ AROMATICUS, *Alcohol ammoniatum aromaticum, Spiritus salis volat'ilis oleosus seu volatilis aromaticus seu ammoniac compositus, Sal volatile oleosum Sylvii, Tinctura aromatica ammoniata, Liquor oleosus Sylvii, Lixiv'ium ammoniacalè aromaticum, Aromatic ammoniated Alcohol, Sal volat'ilè Drops.* (*Ammon. muriat.* ℥v; *Potass. carb.* ℥viiij; *cinnam. cont., caryophyll. cont.* āā ℥ij; *Limon. cort.* ℥iv; alcohol., aquæ āā, Ov. M. *Distil Ovijs.* Stimulant. Dose, f℥ss to f℥j.

SPIRITUS AMMONIÆ COMPOSITUS, Spiritus aromaticus.

SPIRITUS AMMONIÆ FETIDUS, *Sp. volat'ilis fetidus, Al'cohol ammoniatum fetidum, Tinctura asufetidæ ammoniata, Fetid Spirit of Ammonia, Fet Drops.* (*Ammon. muriat.* ℥x, *Potass. carb.* ℥xvj. *Sp. rectificat., Aquæ* āā Oij, (Imp. meas.) *Assuffitid.* ℥v, *Distil.* Oij, (Imp. meas.) Macerate for 12 hours, and distil Oiss. *Ph. L.*) Stimulant and antispasmodic. Dose, f℥ss. to f℥j.

SPIRITUS AMMONIÆ SUCCINATUS, *Sp. Ammoniacæ cum Succino, Sp. Salis Ammoniaci lactescens seu lacteus, Tinctura ammoniacæ composita, Ammoniacum succinatum, Aqua Lixiv'ia, Liquor ex Ammonia et Oleo Succini, L. ex'citans, Succinated Spirit of Ammonia, Common Eau de Luce.* (*Mustich.* ℥ij, *sp. rect.* f℥ix, *ol. Lavand.* gtt. xiv, *ol. succin.* gtt. iv, *liq. ammon.* f℥x. Macerate the mastich in the alcohol, and pour off the clear tincture: add the rest and shake. *Ph. L.*) Stimulant and antispasmodic. Dose, gtt. x to f℥ss, or f℥j.

SPIRITUS ANIMALES, see Nervous fluid.

SPIRITUS ANISI, *Sp. Anisi compositus, Aqua anisi fortis, A. Sem'inum Anisi composita, Spirit of Aniseed, (F.) Esprit d'anis.* (*Anisi sem. cont.* ℔ss, *spirit tenuior. cong., aquæ quod satis sit ad prohibendum empyreuma.* *Ph. L.*) Carminative. Dose, f℥ss to f℥ss. In the compound spirit, angelica is usually an ingredient.

SPIRITUS ANTHOS, Spiritus rosmarini.

SPIRITUS ARMORACIÆ COMPOSITUS, *Sp. Raphani compositus, Aqua Raphani composita, Compound Spirit of Horseradish, (F.) Esprit de raifort composé.* (*Armorac. rad. recent. concis., quant. cort. exsicæ,* sing. ℔j, *myrist. nuc. contus.* ℥ss, *spirit. ten. cong., aquæ q. s. ad prohibendum empyreuma.* *Ph. L.*) Stimulant and antiscorbatic. [*?*] Dose, f℥j to f℥ij.

The Golden Spirit of Scurvy grass — an empirical preparation — is formed by adding gamboge ℥vij, to one gallon of the *sp. armoraciæ compositus*.

Greenough's Tincture for the teeth is formed of amygd. amar. ℥ij, *liq. Bresil., cassia bacæ,* āā ℥iv, *irid. Florent.* ℥ij, *coccinell., sal. acetosellæ, alum.* āā ℥j, *sp. vin. rect.* Oij, *sp. armoraciæ comp.* f℥ss.

SPIRITUS BEGONIAS, Ammoniac sulphuretum — s. Bellidis, see Osunitopsis asteriscoides.

SPIRITUS CAMPHORÆ, *Sp. Camphoratus seu vinosus camphoratus, Tinctura Camphoræ* (*Ph. U. S.*), *Spirit of Wine and Camphor, Spirit of Camphor, (F.) Esprit de Camphre, Alcool camphré, Eau de Vie camphrée.* (*Camphor.* ℥iv, alcohol. Oij. Dissolve.) Stimulant, anodyne and discutient. Used only externally.

SPIRITUS CAR'UL, *Sp. Cari Carui, Aqua Sem'-inum Carui fortis seu Sem'-inum Carui, Spirit of Car'away, Strong Carui Waters*, (F.) *Esprit de Carui*. (*Carui sem. cont. Biss, Sp. tenuior. cong., aquæ q. s.* Distil a gallon. *Ph. L.*) Carminative. Dose, fʒj to fʒss.

SPIRITUS CINNAMOMI, *Sp. Lauri Cinnamomi, Aqua Cinnamomi fortis seu Cinnam. spiritu'sa, Spirit of Cin'namon, Strong Cinnamon Water*, (F.) *Esprit de Cannelle*. (*Cort. cinnam. ʒv, sp. rect. Oivss.*) Stimulant and carminative. Dose, fʒj to fʒss.

SPIRITUS COL'CHICI ANNONIA'TUS, *Tinctu'ra Colechici Compos'ita, Ammoniated Spirit of Colchicum, Compound Tincture of Colchicum*. (*Sem. colechic. cont. ʒij, sp. ammon. aromat. Oj. Ph. L.*) Narcotic, cathartic, and diuretic. Used in gout, rheumatism, and dropsy. Dose, from grt. xxx to fʒj.

SPIRITUS CORNU CERVI, *Liquor volatilis C.C.*—s. Fortior, see Alcohol—s. Fumans Beguini, Ammonia sulphuretum—s. Genitalis, Aqua seminis—s. Jamaicensis, Rum.

SPIRITUS JUNIP'ERI COMPOS'ITUS, *Aqua Junip'eri composita, Compound Spirit of Juniper*, (F.) *Esprit de genévère composé*. (*Ol. junip. ʒis, Ol. carvi, Ol. fœnicul., āā ʒx; Alcohol dilut. cong. Solve. Ph. U. S.*) Stimulant and diuretic. Dose, fʒj to fʒss.

SPIRITUS LAURI CINNAMOMI, Spiritus cinnamomi.

SPIRITUS LAVAN'DULÆ, *Sp. Lavandulæ spica seu Lavand. simplex, Lavender Water*, (F.) *Esprit de Lavande*. (*Lavand. recent. ʒij. Alcohol. cong., aquæ Oij.* Distil a gallon. *Ph. U. S.*) Usually made by adding the oil to rectified spirit. Used as a perfume chiefly.

SPIRITUS LAVANDULÆ COMPOS'ITUS, *Tinctu'ra Lavandulæ composita, Red Hartshorn, Lavender drops, Compound Spirit of Lavender*, (F.) *Esprit de Lavande composé*. (*Sp. Lavand. Oijj, sp. ros-marini. Oj, cinnam. contus. ʒj, myristic. cont. ʒss, earyophyll. cont. ʒij, santali concis. ʒijj.* Macerate for 14 days, and filter through paper. *Ph. U. S.*) Stimulant. Dose, grt. xl to fʒij.

SPIRITUS LETHALIS, Carbonic acid—s. Lumbricorum, Liquor volatilis cornu cervi.

SPIRITUS MENTHÆ PIPERIT'Æ, *Sp. Menthæ piperit'idis, Aqua Menthæ piperit'idis spiritu'sa, Spirit of Peppermint*, (F.) *Esprit de Menthe poivrée*. (*Olei. menth. pip. ʒvss, sp. rectific. Oivss, aquæ, q. s.* Distil a gallon. *Ph. L.*) Carminative and stimulant. Dose, fʒss to fʒij.

SPIRITUS MENTHÆ SATIVÆ, Spiritus menthæ viridis.

SPIRITUS MENTHÆ VIR'IDIS, *Spiritus menthæ sativæ, Aqua Menthæ vulg'aris spiritu'sa, Spirit of Spearmint*, (F.) *Esprit de Menthe vert.* (*Olei Menth. virid. ʒvss, sp. rectific. Oivss, aq. q. s.* Distil a gallon. *Ph. L.*) Like the last in properties and dose.

SPIRITUS MILLEFEDARUM, Liquor cornu cervi—s. Muriaticus æthereus, Spiritus Ætheris muriatici.

SPIRITUS MYRSITICÆ, *Sp. Myrsiticæ Moschat'æ seu Nucis Moschate, Aqua Nucis Moschate seu Nephrit'ica, Nutmeg Water*, (F.) *Esprit de Muscade*. (*Myrist. cont. ʒij, Alcohol. dil. cong., aquæ Oj.* Distil a gallon.) Cordial and carminative. Dose, fʒj to fʒiv.

SPIRITUS MYRTI PIMENTÆ, Spiritus pimentæ—s. Nitri acidus, Nitric acid—s. Nitri dulcis, Spiritus ætheris nitrici—s. Nitri duplex, Nitric acid—s. Nitri fumans, Nitric acid—s. Nitri Glauberi, Nitric acid—s. Nitri simplex, see Nitric acid—s. Nitri vulgaris, see Nitric acid—s. Nucis moschate, Spiritus myrsiticæ—s. Ophthalmicus Mindereri, Liquor ammonia acetatis.

SPIRITUS PIMENTÆ, *Sp. Myrti Pimentæ seu Pimento, Aqua Mirabilis, Spirit of Pimento*. (*Ol. Pimento. f. ʒij, Alcohol. dilut. cong. Solve. Ph. U. S.*) Cordial and carminative. Dose, fʒj to fʒiv.

SPIRITUS PULE'GII, *Aqua Pulegii spiritu'sa, Spirit of Pennyroyal, Spirituous Pennyroyal Water*, (F.) *Esprit de Poubiot*. (*Olei pulegii ʒvij, sp. rect. Oivss, aquæ, q. s.* Distil a gallon. *Ph. L.*) Same as spirit of spearmint in properties and dose.

SPIRITUS PYRO-ACETICUS, Acetone.

SPIRITUS PYROXYLICUS, *Pyroxylic spirit, Wood spirit, Wood alcohol, Pyroxylic alcohol, Methylic alcohol, Hydrated oxide of methyle, Bihydrate of Meth'ylene*, (F.) *Esprit pyroxylique, Esprit de bois*. This substance is by some supposed to have been the article given in phthisis, by Dr. Hastings, under the names *Naphtha* and *Wood Naphtha*. It was probably, however, the *Pyro-acetic spirit*. See Acetone. When wood is subjected to destructive distillation, about one per cent. of an inflammable volatile liquid, along with other products, passes over, which, when separated and purified, constitutes pyroxylic spirit. It is given in the same cases and doses as Acetone.

SPIRITUS RECTIFICA'TUS, *Sp. Vini rectificatus seu vino'sus rectificatus, Cœnosta'gma, Cœnela'm, Pyra'enus, Al'cohol, A. Vini, Spirit of Wine*, (F.) *Esprit de Vin rectifié*. Rectified spirit is much used in Pharmacy to dissolve resinous and other substances. It is seldom exhibited internally; although it exists in the diluted state in all vinous and spirituous liquors. Externally, it is employed as a discutient.—S. g., according to the London Pharmacopœia, 0·838; according to that of Dublin, 0·840; of Edinburgh and United States, 0·835, (see Alcohol), and of Paris, 0·819 to 0·827.

SPIRITUS RECTOR, Aroma—s. Raphani compositus, Spiritus armoraciæ compositus—s. Roriferus, Gaz sanguinis.

SPIRITUS ROSMARI'NI, *Sp. Rosmarini officina'lis, Sp. Anthos, Spirit of Rosemary, Hungary Water*, (F.) *Esprit de Romarin*. (*Ol. rosmarinii fʒiv, Alcohol. cong. Solve. Ph. U. S.*) Stimulant. Dose, fʒj to fʒiv.

SPIRITUS SALIS ACIDUS seu FUMANS, Muriaticum acidum—s. Salisammoniaci, Spiritus ammoniae—s. Salis ammoniaci aquosus, Liquor ammoniae—s. Salis ammoniaci lactescens seu lacteus, Spiritus ammoniae succinatus—s. Salis ammoniaci sulphuratus, Ammonia sulphuretum—s. Salis dulcis, Spiritus ætheris muriatici—s. Salis Glauberi, Muriaticum acidum—s. Salis marini, Muriaticum acidum—s. Salis marini coagulatus, Potassæ murias—s. Salis volatilis oleosus, Spiritus ammoniae aromaticus—s. Sulphurico-æthereus camphoratus, Tinctura ætherea composita—s. Sulphurico-æthereus martialis, Tinctura seu Alcohol sulphurico-æthereus ferri—s. Sulphuris, Sulphurous acid—s. Sulphuris per campanam, Sulphurous acid—s. Sulphuris volatilis, Ammonia sulphuretum—s. Sulphurous volatilis, Sulphurous acid.

SPIRITUS TENU'IOR, *Alcohol dilu'tum, Spiritus vino'sus tenu'ior, Proof Spirit*, (F.) *Esprit de vin délayé*. Generally made for pharmaceutical purposes, by mixing equal parts of rectified spirit and water. S. g. Lond. 0·920; Edinb. and United States, 0·935. It is employed in the same cases as those in which the alcohol is used;—chiefly, as a solvent of vegetable matters, in the form of tinctures.

SPIRITUS VENERIS, Aceticum acidum—s. Vini Gallici, Brandy—s. Vini rectificatus, Spiritus rectificatus—s. Vinosus camphoratus, Spiritus camphoræ—s. Vinosus tenuior, Spiritus tenuior—s.

Vitalis, Nervous fluid — s. Vitrioli, Sulphuric acid — s. Vitrioli acidus Vogleri, Sulphuricum acidum dilutum — s. Vitrioli coagulatus Mynsichti, Potassa sulphas — s. Vitrioli dulcis, Spiritus ætheris sulphurici — s. Vitrioli phlogisticatus, Sulphurous acid — s. Volatilis aromaticus, Spiritus ammoniæ aromaticus — s. Volatilis fœtidus, Spiritus ammoniæ fœtidus.

SPIROID CANAL, Aquæductus Fallopii.

SPIROMETER; a hybrid term, from *spiro*, 'I breathe,' and *μετρον*, 'a measure: — properly *Anapnom'eter*, *Pneusom'eter*, *Pneumom'eter*, *Pneumatom'eter*, *Pulmom'eter*, *Pneumonom'eter*. Any instrument for measuring the quantity of air concerned in respiration, and, consequently, the capacity of the lungs. This mode of measurement has been called *Spirom'etry*, as it was formerly called *Pulmon'etry*. The term spirometer is now usually applied to a kind of gasometer introduced by Dr. Hutchinson to estimate the quantity of air contained in, or, rather, expelled from the lungs under different circumstances.

SPIROPTERA HOMINIS, see Worms.

SPISSANTIA, Incrassantia.

SPIT, Sputum.

SPITAL, Hospital.

SPIT'AL, MINERAL WATERS OF. The village of Spital is situate on the south side of the Tweed, near Tweedmouth. The springs there contain chloride of calcium, sulphate of soda, sulphate and carbonate of lime. They act as saline cathartics.

SPITH'AMA, *σπιθαμη*, *Dodrans*. A measure of twelve fingers' breadth, or about nine inches.

SPITTING, Exspuition.

SPITTLE, Saliva — s. Sweet, see Salivation.

SPLANCHNA, Entrails.

SPLANCHNECTOP'IA, *Splanchnodius'tasis*, *Situs perver'sus* seu *anom'alus intestino'rum*; from *σπλαγγων*, 'an intestine,' *εκ*, 'out of,' and *τοπος*, 'place.' Misplacement or ectopia of the intestines.

SPLANCHNELMINTHA, Worms,

SPLANCHNEURYS'MA, from *σπλαγγων*, 'an intestine,' and *ευρνω*, 'I dilate.' Morbid dilatation of the intestines.

SPLANCHNIC, *Splanchn'icus*, *Vis'ceral*, (F.) *Splanchnique*, from *σπλαγγων*, 'a viscus.' Relating or belonging to the viscera.

SPLANCHNIC CAVITIES are the three great cavities of the body;—those of the cranium, chest, and abdomen.

SPLANCHNIC NERVES belong to the great sympathetic, and are two in number on each side. They are distinguished into:—1. The great *splanchnic nerve*, (F.) *Grand surrénal* (Ch.), Its roots—four or five in number—come from the 6th, 7th, 8th, 9th, and sometimes the 10th, thoracic ganglia. They descend inwards, on the sides of the vertebral column, beneath the pleura, and unite into a single trunk, which enters the abdomen through a separation of the fleshy fibres of the pillars of the diaphragm; passes behind the stomach, and divides into several branches, which pass into the semilunar ganglion. 2. The lesser *splanchnic nerve*, *Renal nerve*, (F.) *Splanchnique accessoire* of Walther, *Petit surrénal*, (Ch.,) is composed of two distinct branches, proceeding from the 10th and 11th thoracic ganglia, which unite on the 12th dorsal vertebra into a cord, that pierces the diaphragm singly; enters the abdomen, and divides into two branches, one of which anastomoses with the greater splanchnic nerve, whilst the other sends its filaments to the renal and solar plexuses.

SPLANCH'NICA. Medicines adapted to diseases of the bowels. Also, the 2d order of the class

Cœliaca of Good; defined,—diseases affecting the collatitious viscera, and characterized by disquiet or diseased action in the organs auxiliary to the digestive process, without primary inflammation.

SPLANCHNODIASTASIS, Splanchnectopia.

SPLANCHNOD'YNE, from *σπλαγγων*, 'a viscus,' and *δσνη*, 'pain.' Pain in the bowels.

SPLANCHNOGRAPHIA, Splanchnography.

SPLANCHNOG'RAPHY, *Splanchnograp'hia*, from *σπλαγγων*, 'a viscus,' and *γραφη*, 'a description.' The part of anatomy which treats of the viscera.

SPLANCHNOLITHIASIS; from *σπλαγγων*, 'a viscus,' and *λιθος*, 'a stone.' The formation of a calculous concretion in any viscus.

SPLANCHNOL'OGY, *Splanchnolog'ia*, from *σπλαγγων*, 'a viscus,' and *λογος*, 'a discourse.' A treatise on the viscera:—also, Splanchnography.

SPLANCHNOPATHI'A, from *σπλαγγων*, 'a viscus,' and *παθος*, 'suffering.' A disease of the intestines.

SPLANCHNOSCLERO'SIS, from *σπλαγγων*, 'a viscus,' and *σκληρος*, 'hard.' Induration of a viscus.

SPLANCHNOT'OMY, *Splanchnotom'ia*, *Splanchnot'omē*, from *σπλαγγων*, 'a viscus,' and *τεμνω*, 'I cut.' Dissection or anatomy of the viscera.

SPLAT-FOOT, see Kyllosis.

SPLAYFOOT, see Kyllosis.

SPLEEN, *σπλην*, *Lien*, *Hepar sinis'trum* seu *adulteri'num*, *Fomes ventric'uli*, *Milt*, (Sc.) *Melt*, (F.) *Rate*. A soft, spongy, parenchymatous organ; of a more or less deep violet red, situate deeply in the left hypochondrium, below the diaphragm, above the colon, between the great tuberosity of the stomach and the cartilages of the false ribs, and above and anterior to the kidney. Its ordinary length is $4\frac{1}{2}$ inches; its thickness $2\frac{1}{2}$; and its weight 8 ounces. Its parenchyma, which is bathed in blood, contains a multitude of grayish, soft, and semi-transparent granulations—*splenic corpuscles* or *Malpighian bodies* of the spleen. It is covered by a serous membrane, furnished by the peritoneum; and by a proper coat, of a fibrous nature, which is intimately united with it, and transmits into its interior delicate, solid, and very elastic prolongations—*trabeculae*. At its inner edge is a fissure, *Hilus* seu *Porta lie'nis*, by which the vessels and nerves enter the organ. The functions of the spleen are unknown. The best opinion is, that it appertains to hæmaturia, and acts as a diverticulum to the vascular system.

SPLEEN, Hypochondriasis—s. Malpighian bodies of the, see Spleen—s. Supernumerary, Lienculus.

SPLEENWORT, Asplenium, A. filix femina, Asplenium scolopendrium—s. Bush, Comptonia asplenifolia.

SPLEN, Spleen.

SPLENAL'GIA, *Neural'gia lie'nis*, *Sple'nica*, *Splenodyn'ia*, from *splen*, and *αλγος*, 'pain.' Pain in the spleen.

SPLENALGIA BENGALENSIS, see Cachexia, splenic—s. Phlegmonodea, Splenitis—s. Subinflammatoria chronica, Splenoncus.

SPLENATROPHI'A, *Atroph'ia lie'nis*, from *splen*, and *atroph'ia*, 'atrophy.' Wasting or atrophy of the spleen.

SPLENAUXE, Splenoncus.

SPLENECTAMA, Splenoparectama.

SPLENECTASIS, Splenoparectama.

SPLENECTOMI'A, *Splenec'tomē*, from *splen*, *εκ*, 'out of,' and *τεμνω*, 'I cut.' Extirpation of the spleen.

SPLENECTOP'IA, *Disloc'io* seu *Ectop'ia lie'nis* seu *splenis*, *Anomosplēnotopie*—Piorry; from *splen*, and *εκτοπος*, (*εκ*, and *τοπος*,) 'out of

place.' Dislocation of the spleen. Not a common occurrence.

SPLENEMPHRAX'IS, *Splenophrax'ia*, from *splen*, and *εμφρασσω*, 'I obstruct.' Obstruction of the spleen.—Vogel. See Splenoncus.

SPLENES, Hypochondriasis.

SPLENET'ICUS, *Sple'nicus*, *Splenit'icus*, *Lieno'vus*, (F.) *Rateleux*. That which relates to the spleen: one labouring under diseased spleen. A medicine adapted for diseases of the spleen.

SPLENIC, *Sple'nicus*, *Sple'nius*, (F.) *Splénique*, from *splen*. That which relates to the spleen.

SPLENIC ARTERY. It arises from the cœliac; and passes from right to left, forming many windings along the upper edge of the pancreas, which lodges it in a special groove. It reaches the fissure of the spleen, and divides into several branches that enter the organ. In its course it furnishes the pancreatic, left gastro-epiploic, and the *vasa brevia*.

SPLENIC CACHEXIA, see Cachexia splenica—s. Corpuscles, see Spleen.

SPLENIC PLEXUS is a nervous network, which proceeds from the cœliac plexus, and accompanies the splenic artery, sending secondary plexuses to each division.

SPLENIC VEIN, *Vena sple'nica*, *V. lienalis*, arises from the spleen, and accompanies the splenic artery; proceeding from left to right, to unite with the superior mesenteric vein, and to form, with it, the abdominal vena porta. In its course, it receives veins corresponding to the *vasa brevia*, the right and left gastro-epiploic, the duodenal, pancreatic, coronaria ventriculi, and inferior mesenteric veins.

SPLENICA, Splenalgia. Also, medicines which affect the spleen.—Pereira.

SPLENICUS, Spleneticus, Splenic.

SPLENIOLA, Compress.

SPLENIS TUMOR, Ague cake.

SPLENISATION, Splenization.

SPLENISCUS, Compress.

SPLENITICUS, Splenic.

SPLENI'TIS, from *splen*, and *itis*, denoting inflammation. Inflammation of the spleen. *Empres'ma splenitis*, *Inflamma'tio lie'nis*, *I. splenis*, *Splenalg'ia phlegmono'dea*, *Lienit'is*, (F.) *Splénite*, *Inflammation de la Rate*. A rare disease, characterized by local pain, swelling, and heat, which sometimes terminates by suppuration. It generally affects the capsule—*Episplenit'is*, *Perisplenit'is*—and must be treated like other inflammations.

SPLENIUM, Compress—s. *Corporis Callosi*, see *Corpus callosum*—s. *Cruciatum*, *Croix de Malte*.

SPLENIUS, *S. Cap'itis* seu *Colli*, (F.) *Cervico-dorso-mastoïdien et dorso-trachélien*, *Cervico-mastoïdien* (Ch.), *Posterior mastoid muscle*. So called from its resemblance to the spleen of certain animals. A muscle situate at the posterior part of the neck, and upper part of the back. It is much broader above than below, where it terminates in a point. It is attached, by its inner edge, to the spinous processes of the first five dorsal vertebrae; to that of the 7th cervical, and to the inferior part of the posterior cervical ligament. By its upper extremity, it is attached to the transverse processes of the first two cervical vertebrae, to the mastoid process, and to the posterior surface of the occipital bone. Some have considered this muscle to be formed of two portions, which they have called *Splenius colli*, and *Splenius cap'itis*. The splenius extends the head, inclines it, and rotates it. If the splenii of each side act together, they extend the head.

SPLENIZAT'ION, *Splenizatio*, *Splenifica'tion*, *Splenifica'tio*, (F.) *Splénisation*, from *splen*. A

term applied to the state of the lung in the first or second stage of pneumonia, in which its tissue resembles that of the spleen.

SPLENOCE'LE, *Her'nia lienalis*, from *splen*, and *κληη*, 'a tumour.' Hernia formed by the spleen.

SPLENODYNIA, Splenalgia.

SPLENOG'RAPHY, *Splenograph'ia*, from *splen*, and *γραφη*, 'a description.' A description of the spleen.

SPLENOHÆ'MIA, (F.) *Splénohémie*, from *splen*, and *αίμα*, 'blood.' Congestion or hyperæmia of the spleen, a common phenomenon in many diseases, especially in typhoid and intermittent fevers.

SPLENOID, *Splenoi'des*, *Spleno'des*, from *splen*, and *εἶδος*, 'resemblance.' Spleen-like. Having the appearance of the spleen.

SPLENOL'OGY, *Splenolog'ia*, from *splen*, and *λογος*, 'a discourse.' A treatise on the spleen.

SPLENOMALA' CIA, *Lienomala'cia*, from *splen*, and *μαλακος*, 'soft.' Morbid softening of the spleen.

SPLENONCIE, Splenoncus.

SPLENO'CUS, *Megalosple'nia*, *Hypertroph'ia* seu *Supernutrit'io splenis* seu *lie'nis*, *Intumescen'tia* seu *Infarc'tus* seu *Physco'nia lienis*, *Splenalg'ia subinflammato'ria chron'ica*, *Splenemphrax'is*, *Splenaux'è*, *Hypersplenotroph'ia*, *Lien ingens*, (F.) *Splénocnie*, *Hypertrophie de la Rate*; from *splen*, and *ογκος*, 'a tumour.' Tumefaction of the spleen. See Ague cake.

SPLENOPAREC'TAMA, *Splene'ctama*, *Spleno'parec'tasis*, *Splene'ctasis*, from *splen*, and *παρεκταμα*, 'excessive volume.' Excessive enlargement of the spleen.—Ploucquet.

SPLENOPARECTASIS, Splenoparectama.

SPLENOPHRAXIA, Splenemphraxis.

SPLENORRHAG'IA, from *splen*, and *ραγη* 'rupture.' Hemorrhage from the spleen.

SPLENSCIR'RHUS, from *splen*, and *σκιρρος*, 'hardness.' Scirrhus or cancer of the spleen.

SPLENOT'OMY, *Splenotom'ia*, *Splenoi'omē*, from *splen*, and *τομω*, 'I cut.' Dissection of the spleen.

SPLINT, Teut. Splinter, from *splijten*, 'to split'; *Hastell'a*, *Asser'culum*, *Plag'ula*, *Narthex*, *Fer'ula*, (F.) *Attelle*, *Éclisse*. A flexible and resisting lamina of wood, used in the treatment of fractures, to keep the fragments in apposition, and prevent their displacement. Splints are made of iron, wood, bark of trees, leather, gutta percha, pasteboard, &c. They are generally padded, and are fixed by a roller or by tapes, according to circumstances.

SPLINTER, (F.) *Esquille*. Same etymon. This term is sometimes applied to a small portion of wood, which occasionally enters the skin, and gives occasion to much irritation, until it is removed.—*Aculeus lig'neus*, (F.) *Écharde*.

It is also applied to fragments that separate from a fractured or diseased bone.

SPLITCLOTH, *Linteum scissum*. A bandage for the head, consisting of a central part, and six or eight tails. The *single split cloth* has four tails. It is regarded as the most convenient bandage for the head, face and jaws.

SPLITROCK, *Heuchera cortusa*.

SPOAT, Saliva.

SPODIUM GRÆCORUM, Album græcum.

SPOLIARIUM, Apodyterium.

SPOLIATIVE, *Spoliat'iva*, from *spoliare*, *spoliatum*, 'to take away.' (F.) *Spoliatif*. *Phlebotom'ia spoliati'va*, (F.) *Saignée spoliative*. Blood-letting, used for the purpose of diminishing the mass of blood.

SPOLIATORIUM, Apodyterium.

SPONDLES, Vertebrae.

SPONDYLAL'GIA, *Spondylodynia*, from *σπονδυλος*, 'a vertebra,' and *αλγος*, 'pain.' Pain in the vertebræ. *Cacorrhachitis*. See Vertebral Disease.

SPONDYLARTHRI'TIS, from *σπονδυλος*, 'a vertebra,' *αρθρον*, 'a joint,' and *itis*, denoting inflammation. Gouty or rheumatic inflammation of the spinal column.

SPONDYLARTHRO'CA'CE, Vertebral disease.

SPONDYLI, Vertebræ.

SPONDYLIS, Coccyx.

SPONDYLI'TIS, *Inflammatio vertebræ*, from *σπονδυλος*, and *itis*, denoting inflammation. Inflammation of the vertebræ.

SPONDYLIUM, Coccyx, *Heracleum spondylium*.

SPONDYLO'CA'CE, Vertebral disease.

SPONDYLODY'NIA, Spondylalgia.

SPONDYLOPATHI'A, from *σπονδυλος*, 'a vertebra,' and *παθος*, 'a disease.' A disease of the vertebral column.

SPONDYLOPYOSIS, Vertebral disease.

SPONDY'YLUS, *σπονδυλος*. A vertebra. Also, the vertex.

SPONGE, BASTARD, *Acyonium*.

SPONGI. The tumefied glands of the neck.

SPONGIA, *S. officinalis* seu *Mari'na*, *Spongos*, *Sphongus*, *Sponge*, (F.) *Éponge*. An organized marine substance, of the Class *Porifera*, met with in many seas, but especially in the Mediterranean and Arabian. It is supple, elastic, porous, and capable of absorbing fluids in which it may be placed, and of thus increasing in size. It is employed in *surgery*, for cleansing or washing; for absorbing acrid discharges from ulcers; suppressing hemorrhage when the mouth of the vessel can be compressed by it, and for forming tents for dilating wounds; in which case, the sponge is immersed in melting wax, and cooled before being used. It is then called *Spongia cera'ta*, *Waxed*, *Cera'ted* or *Prepared Sponge* or *Sponge Tent*.

SPONGIA ASSA, *S. Usta*—*s. Cerata*, see *Spongia* — *s. Cynosbati*, *Bedegar*.

SPONGIA USTA, *S. Assa*, *Carbo spon'giae*, *Burnt Sponge*, contains carbonate and phosphate of lime, carbonate of soda, charcoal, and iodine. It is used in bronchocele, scrofulous affections, and herpetic eruptions; and its good effects seem to be dependent upon iodine. It is made by cutting sponge into pieces, and heating it, that any extraneous matter may be separated; burning it in a close iron vessel until it becomes black and friable, and, lastly, rubbing it into very fine powder.—Ph. U. S. Dose, \mathfrak{zj} to \mathfrak{zij} .

SPON'GLE LAPIS. A name given to small friable stones found in sponge. They were formerly esteemed lithontriptic.

SPONGIODES, Spongoid.

SPONGIOLE, *Spon'giolum*, *Spon'giola*, *Spon'get*; from *σπογγιον*, 'a small sponge.' The soft succulent extremity of the fibrils or true roots of a plant, by which it absorbs or sucks up fluid. Similar spongioles have been supposed to exist at the terminations of the absorbents in animals.

SPON'GION. Ancient name of an epithem made of goats' dung; and also of a malagma, which was considered capable of absorbing the serum in dropsies, like a sponge.—*Paulus*, *Goræus*.

SPONGIO-PILINE, from *spongia*, 'sponge,' and *pilus*, 'a hair.' A fabric, composed of sponge and wool, felted together in three layers, and coated, on one of its surfaces, with caoutchouc, which renders it impermeable. It is of great service as a cataplasm, fomentation, vehicle for lotions, liniments, &c.

SPONGIOSUM (OS), Ethmoid bone.

SPONGIOSUS, Spongoid.

SPONGOID, *Spongoï'des*, *Spongio'des*, *Spongio'sus*, *Spongy*, from *σπογγια*, 'sponge,' and *ειδος*, 'resemblance.' Resembling sponge. Of the nature of sponge.

SPONGOID INFLAMMATION, *Hæmatodes fungus*.

SPONGOID TISSUE, (F.) *Tissu spongoïde*. An adventitious spongy tissue, found in cases of rickets.—*Guérin*.

SPONGOS, Tonsil.

SPONGY, Spongoid.

SPONGY TISSUE, see Bone.

SPONSA SOLIS, *Calendula officinalis*.

SPONTA'NEOUS, *Sponta'neus*, (F.) *Spontanée*, from *sponte*, 'voluntarily.' That which occurs of itself, or without any manifest external cause. Evacuations are termed *spontaneous*, which are not produced by medicine. *Sponta'neous las'situde* is that which is not the result of fatigue. Diseases are also *spontaneous* which supervene without apparent cause. *Sponta'neous Amputa'tion* is the separation of a limb from the fetus in utero.

SPONTANEOUS EVOLUTION, see Evolution — *s. Version*, Evolution, spontaneous.

SPONTÉPARITÉ, Generation, spontaneous.

SPON, Umbilicus.

SPOONWOOD, *Kalmia latifolia*, *Tilia Americana*.

SPORADIC, *Spor'ades*, *Sporad'ici*, *Morbi disper'si* seu *spar'si*, (F.) *Maladies sporadiques*, from *σπειρω*, 'I spread.' Diseases which supervene indifferently in every season and situation, from accidental causes, and independently of any epidemic or contagious influence.

SPORE, *Spor'ule*, *Sporum*, *Spor'ulum*, from *σπειρω*, 'I sow.' The reproductive body in cryptogamous plants, which is analogous to the seed of phanerogamous plants.

SPORIDIUM; same etymon. The reproductive body in algaecious plants, which resembles the spore of other plants.

SPORULE, Spore.

SPORUM, Spore.

SPOTS, CEREBRAL, *Taches cérébrales* — *s. Germinal*, see *Molecule* — *s. Meningitic*, *Taches méningitiques*.

SPOTS, RED, (F.) *Taches rouges*, *Rose spots*, *Rose'ola* seu *Pap'ule typh'o'sæ*. Small red spots which appear in typhoid fever, from the 8th to the 15th day of the disease. They are most frequently seen on the lower and middle portions of the chest, and upper part of the abdomen.

SPOTS, ROSE, Spots, red.

SPRAIN, corrupted from *strain* [?]*—Subluxa'tio*, *Distor'tio*, *Dias'trophé*, *Dia'strem'ma*, *Luxa'tio imperfec'ta*, *Exarthre'ma*, *Exarthro'sis*, *Strema*, *Thlasma Stremma*, *Wrench*, (Sc.) *Wramp*, (Prov.) *Keuch*, *Keak*, (F.) *Détorse*, *Eutorse*, *Fou-lure*. A violent straining or twisting of the soft parts surrounding the joints. According to the degree of the sprain, the fibrous parts of the joint may be simply stretched, or they may be ruptured. This affection, which has been regarded as incomplete luxation, occurs, particularly, in the ginglymoid joints; — as in the foot, wrist, knee, &c. The violence causes an afflux of blood; the serum of the blood is poured out, and often the blood itself, owing to the rupture of vessels; and inflammation arises, which ends in resolution or induration. Local, antiphlogistic applications are required, with perfect rest; and, when the inflammatory action has subsided, cold pumping and friction, with the application of a plaster and bandage, will afford support till the parts affected recover their due tone.

SPRAT, YELLOW-BILLED, *Clupea thryssa*.

SPRUCE BEER, *White Spruce Beer*. A beer made as follows: To 10 gallons of water, add 6 pounds of sugar, and 4 oz. of essence of spruce.

Add yeast, and bottle, when ready. It is grateful and antiscorbutic.

SPRUCE BEER POWDERS may be formed of *white sugar*, ℥j, and ℥ij; *sodæ subcarb.*, gr. xxvj; *essence of spruce*, gr. x, in each blue paper; and *acid of tartar*, ℥ss in each white paper. For half a pint of water.

SPUITIO, Exspuition.

SPUMA ARGENTI, Plumbi oxydum semivitreum—s. *Cerevisiæ*, Yest—s. *Trium draconum*, Antimonium muriatum.

SPUMEUX, Frothy.

SPUMOSUS, Frothy.

SPUNK, *Boletus igniarius*.

SPUR, Sax. *rpur*, (F.) *Éperon des Artères*. The angle at which the arteries leave a cavity or trunk.

SPUR, Ergot.

SPURBLIND, Myopic.

SPURGE, **CAPER**, *Euphorbia lathyris*—s. *Cypress*, *Euphorbia Cyparissias*—s. *Flax*, *Daphne gnidium*—s. *Flowering*, large, *Euphorbia corollata*—s. *Garden*, *Euphorbia lathyris*—s. *Greater*, *Euphorbia palustris*—s. *Ipecacuanha*, *Euphorbia ipecacuanha*.

SPURGE LAUREL, *Daphne laureola*.

SPURGE MARSH, *Euphorbia palustris*.

SPURGE OLIVE, *Cneorum tricoccum*, *Daphne mezereum*.

SPURGE, PETTY, *Euphorbia peplus*—s. *Sea*, *Euphorbia paralias*—s. *Spotted*, *Euphorbia maculata*—s. *Sun*, *Euphorbia helioscopia*—s. *Wartwort*, *Euphorbia helioscopia*.

SPUTA, PRUNE JUICE, see *Prune Juice*.

SPUTAMEN, *Saliva*, *Sputum*.

SPUTAMENTUM, *Saliva*, *Sputum*.

SPUTATIO, Exspuition.

SPUTATION, Exspuition.

SPUTATORIUS, Expectoant.

SPUTUM, plural *Sputa*, *Apochrem'ma*, *Chrem'ma*, *Emptys'ma*, *Sputa'men*, *Pty'elion*, *Pytis'ma*, *Spit*, from *spuere*, *sputum*, 'to spit.' (F.) *Crachat*. The secretions ejected from the mouth in the act of spitting. It is composed of saliva, and of the mucus secreted by the mucous membrane of the nasal fossæ and fauces, and often by the membrane of the larynx and bronchia. The sputa are, sometimes, called *eru'ginous*, when of a greenish-yellow colour; *gummy*, when they resemble a thick solution of gum; *frothy*, (F.) *mousseux*, when covered with froth; *rubig'inous*, (F.) *rubiginoux* ou *rouillés*, when of a reddish-yellow; and *streaked*, (F.) *striées*, when mixed with lines of blood. Also, saliva.

SPUTUM CRUENTUM, *Hæmoptysis*—s. *Dulce*, *Saccharorrhœa pulmonalis*—s. *Oris*, *Salivation*—s. *Saccharatum*, *Saccharorrhœa pulmonalis*—s. *Sanguinis*, *Hæmoptysis*.

SQUALLING, *Vagitus*.

SQUAMA, *Scale*, *Squamous portion*, *Table*.

SQUAMÆ, *Scaly diseases*.

SQUAMARIA, *Plumbago Europæa*.

SQUAMEUX, *Squamous*.

SQUAMIFORMIS, *Squamous*.

SQUAMOUS, *Squamo'sus*, *Lepidoi'des*, *Lepido'des*, *Squamifor'mis*, *Scaly*; from *squama*, 'a scale.' That which relates to or resembles a scale.

SQUAMOUS PORTION of the temporal bone, (F.) *Portion squameuse* ou *écailleuse du Temporal*, is the upper part of the temporal, so called from a fancied resemblance to a scale. See *Temporal Bone*.

SQUAMOUS SUTURE, *Sutu'ra squamo'sa* seu *mendo'sa* seu *lepidoi'des* seu *lepidoides* seu *cran'ni squamo'sa*, (F.) *Suture squameuse* ou *écailleuse*. The suture which unites the squamous portion of the temporal bone to the parietal.

Certain *scaly* cutaneous affections are also called *squamous*, (F.) *squameux*. See *Scale*.

SQUARE STALK, *Monarda coccinea*.

SQUARRA TONDENS, *Porrigio decalvanæ*.

SQUATTING PILLS, *Pilulæ opiatæ*.

SQUAW-MINT, *Hedeoma*.

SQUAW-ROOT, *Actæa racemosa*, *Caulophyllum thalictroides*, *Senecio aureus*.

SQUAW-WEED, *Erigeron Philadelphicum*.

SQUEAMISHNESS, *Fastidium cibi*.

SQUEASINESS, *Nausea*.

SQUELETTE, *Skeleton*.

SQUELETTELOGIE, *Skeletology*.

SQUILL, *Seilla*—s. *Vinegar of*, *Acetum seillæ*.

SQUILLA, *Seilla*.

SQUINANCIE, *Cynanche*, *Cynanche tonsillaris*.

SQUINANCY, COMMON, *Cynanche tonsillaris*.

SQUINANTHIA, *Cynanche*.

SQUINANTHUS, *Juncus odoratus*.

SQUINE, *Smilax China*.

SQUINSEY, *Cynanche tonsillaris*.

SQUINT-EYED, see *Strabismus*.

SQUINTER, see *Strabismus*.

SQUINTING, *Strabismus*.

SQUINZEY, *Cynanche tonsillaris*.

SQUIRRE, *Scirrhus*—s. *en Cuirasse*, see *Ligneus*.

SQUIRRHE, *Scirrhus*.

SQUIRREL CORN, *Dicentra Canadensis*.

SQUIRREUX, *Scirrhus*.

SQUIRROGASTRIE, *Scirrhogastria*.

SQUIRRUS, *Scirrhus*.

SQUIRT, *Syringe*.

STACHELBERG, MINERAL WATERS OF. *Stachelberg Springs* are far down in the valley of the Linth, in Switzerland. The waters are sulphureous, and are much visited by gouty and rheumatic invalids.

STACHYS FETIDA, *Galeopsis*.

STACTE, *Myrrha*.

STADE, *Stage*.

STADIUM, *Period*, *Stage*.

STADIUM ACMES seu **STA'SEOS**. The period of the height of a disease.

STADIUM ANNIHILATIO'NIS seu **CONVALESCENTIE** seu **RECONVALESCENTIE**. The period of recovery from disease.

STADIUM AUGMENTI seu **INCREMENTI MORBI**. The period or stage of increase of a disease.

STADIUM CALORIS, *Stage*, (hot)—s. *Convalescentiæ*, *S. annihilationis*.

STADIUM DECREMENTI. The period or stage of decrease of a disease.

STADIUM FRIGORIS, *Stage*, (cold)—s. *Incrementi Morbi*, *S. Augmenti morbi*—s. *Latentis Contagii*, *Prodromus*—s. *Opportunitatis*, *Prodromus*—s. *Prodromorum*, *Prodromus*—s. *Reconvalescentiæ*, *S. Annihilationis*.

STAFF, (D.) *Staf*. An instrument of great importance in lithotomy,—being the director for the gorget or knife. It is made of steel; and the handle is flat and rough, in order that it may be more securely held. The groove is on its convex surface.

STAFF TREE, CLIMBING, *Celastrus scandens*.

STAFFA, *Stapes*.

STAG'S PIZZLE, see *Cervus*.

STAGE, *Sta'dium*, (F.) *Estage*, *Étage*, *Stade*. The period or degree of a disease; especially the period of an intermittent:—as the *cold stage*,—*sta'dium fr'i'goris*—*hot stage*, &c.

STAGGERBUSH, *Andromeda mariana*.

STAGGERWEED, *Delphinium*.

STA'GIUM. The sixth part of an ounce.

STAGMA, from *σταζω*, 'I distil;' *Stalag'ma*. Any distilled liquid or liquor.

STAGMA, *Gutta*.

STAGNATION, *Stagna'tio*, from *stagnare*, stagnatum, 'to form a pond,' (*stagnum*, 'a pond.')

Accumulation and retardation of fluids in any part of the body.

STAGNUM CHYLI, *Receptaculum chyli*.

STAHLIAN. One who follows the doctrine of Stahl.

STAHLIANISM. The doctrine of Stahl, which considered every vital action under the direction and presidency of the soul. See *Ani-mist*.

STALAGMA, *Stagma*.

STALAGMI'TIS CAMBOGIOÏDES, *S. Cambog'ia*, from *σταλαγμα*, 'a drop'—the gum exuding by drops. Gamboge was long ascribed to this fancied Ceylonese plant. It is now known, that the name was given by Murray to specimens of two distinct trees of different genera. See *Cambogia*.

STALAGMOS, *Distillation*.

STALE, *Urine*.

STALTI'CUS, *Incarnans*.

STAMMERING, *Balbuties*—s. of the *Fingers*, *Cramp*, *writers'*.

STAMP, *Cachet*—s. *Medicine*, *Cachet*—s. *Ocu-list*, *Cachet*.

STAMPING MILL, see *Pulverization*.

STANG, see *Throbbing*.

STANGOS, *Tin*.

STANNI MURIAS, *Tin*, *muriate of*—s. *Oxy-duli murias*, *Tin*, *muriate of*—s. *Pulvis*, see *Tin*.

STANNIOLUM, *Tin foil*.

STANNUM, *Tin*—s. *Cinereum*, *Bismuth*—s. *Foliatum*, *Tin foil*—s. *Glaciale*, *Bismuth*—s. *Granulatum*, see *Tin*—s. *Indicum*, *Zincum*.

STAPÉDIEN, *Stapedius*.

STAPE'DIUS, *Stapes*, (F.) *Stapédien*, *Pyramidal-stapédien*. A muscle of the middle ear, which draws the stapes obliquely upwards.

STAPES, genitive *Stap'edis*, (*sto* and *pes*,) *Stapha*, *Staffa*, 'a stirrup,' (F.) *Étrier*. The innermost of the small bones of the ear, so called because it resembles a *stirrup*. It is situate horizontally in the cavity of the tympanum. Its head, which is directed outwards, is articulated with the os orbiculare. Its base faces inwards, and is applied to the fenestra ovalis, which it closes imperfectly, and to the membrane of which it is united. Its branches are one anterior, and the other posterior. They are curved; and the space between them is parabolic. Surgeons have given the name *Stapes* to a bandage used in bleeding from the foot; which forms a figure of 8 around the ankles.

STAPHA, *Stapes*.

STAPHIS, *Delphinium staphisagria*.

STAPHISAGRIA, *Delphinium staphisagria*.

STAPHISAIGRE, *Delphinium staphisagria*.

STAPHYLEMATO'MA, from *σταφυλη*, 'the uvula,' and *hæmatoma*. A tumour formed by effusion of blood beneath the mucous membrane of the uvula.

STAPHYLAGRA, *Staphylepartes*.

STAPHYLE, *Uvula*, see *Vitis vinifera*.

STAPHYLEPAR'TES, from *σταφυλη*, 'the uvula,' and *επαίρω*, 'I lift up.' *Staph'ylagra*. An instrument for laying hold of, and removing the uvula.—*Paulus*.

STAPHYLINI, see *Azygos muscle*—s. *Medii*, see *Azygos muscle*.

STAPHYLINO-PHARYNGEUS, *Palato-pharyngeus*.

STAPHYLINUS EXTERNUS, *Circumflexus*.

STAPHYLIS, *Nipple*.

STAPHYLITIS, *Uvulitis*.

STAPHYLIUM, *Nipple*.

STAPHYLODIALYSIS, *Cionis*, *Staphylo-*

STAPHYLOEDE'MA, from *σταφυλη*, 'the uvula,' and *œdema*. *Angi'na uvula'ris*, *Dysphag'gia uvu-lo'sa*, *Hypostaph'yle*, *Hypostaph'ylitis*, *Staphylo-dial'ysis*, *Prolapsus seu Propto'esis seu Casus seu Œdema u'vulae*, *Himas*, *Himant'o'ma*, *Himant'o'esis*, *Staphylon'eus*, *Staphylon'eia*, *Productio uvulae à pituità*, *U'vula decid'ua seu relaxa'ta*, *Cros-pedon*. Relaxation and tumefaction of the uvula, which, either from inflammation or infiltration, hangs down so as to occasion difficult deglutition, cough, &c. Scarification, astringent gargles, and, if necessary, excision, constitute the treatment.

STAPHYLO'MA, from *σταφυλη*, 'a grape.' *Uva'tio*, *Myoceph'alon*, *Myioceph'atum*, *Parop'sit Staphylo'ma*, *Staphylo'esis*, *Polygro'ma*. A name given to different tumours of the anterior surface of the globe of the eye.

STAPHYLOMA CONICUM, *Staphyloma of the cornea*—s. *Pellucidum conicum*, *Staphyloma of the cornea*.

STAPHYLOMA OF THE CORNEA, *Sugar-loof Cornea* or *Con'ical Cornea*, *Con'ical hydrophthal'mia*, *Staphylo'ma con'icum seu pellu'idum con'icum*, *Conophthal'mia*, *Prolap'sus cor'neæ*, *Ceraton'eus*, *Hypercerato'esis*, *Hypercer'asis*, is an unequal, embossed, bluish or whitish, round or conical tumour; of variable size; formed by the projection of the transparent cornea, which is sometimes attenuated and distended, at others thickened.

STAPHYLOMA OF THE IRIS is the disease described by Scarpa under the name *Procidencia Iridis*. It is hernia of the iris, through an accidental opening of the cornea. Also, *iridauxesis*.

STAPHYLOMA OF THE SCLEROTIC, *Staphyloma sclerot'ica*, differs from the last, in the prominence existing on a part of the eye covered by the sclerotic, which is much thinner.

STAPHYLOMA UVEÆ, *Iridauxesis*.

STAPHYLONCIA, *Staphyloedema*.

STAPHYLONCUS, *Staphyloedema*.

STAPHYLOPLAS'TIC, *Staphyloplas'ticus*, from *σταφυλη*, 'the uvula,' and *πλασσω*, 'I form.' An epithet applied to the operation for replacing the soft palate, when it has been lost. *Staph'ylo-plasty*, *Pal'atoplasty*, a word of hybrid formation, is the operation for closing the palatine vault.

STAPHYLOR'RAPHY, *Velosynth'esis*, *Staphylo'r'rha'phia*, *Kionorrha'phia*, *Cionorrha'phia*, *Uranor'rha'phê*, *Uranorrha'phia*, *Uraniscorrha'phia*, *Uraniscor'rha'phê*, from *σταφυλη*, 'the uvula,' and *ραφή*, 'a suture.' The operation for uniting a cleft palate. It consists in paring the edges of the cleft; passing ligatures through them, and bringing them together.

STAPHYLOSIS, *Staphyloma*.

STAPHYLOT'OMY, *Staphylo'tom'ia*, from *σταφυλη*, 'the uvula,' and *τομή*, 'incision.' Amputation of the uvula.

STAR APPLE, **BROAD-LEAVED**, *Chryso-phylum cainito*—s. *Blazing*, *Aletris farinosa*—s. *Bloom*, *Spigelia Marilandica*—s. *Grass*, *Aletris farinosa*, *Hypoxys erecta*.

STAR, **KNAP-WEED**, *Centaurea calcitrapa*.

STAR OF THE NORTH, *Geum urbanum*.

STAR STROKE, *Coup-de-soleil*—s. *Wort*, *Aletris farinosa*—s. *Wort*, *golden*, *Bubonium*—s. *Wort*, *water*, *Callitriche verna*.

STARBECK SPA. A chalybeate spring at Harrogate.

STARCH, *Sax. ræpe*, 'rigid, stiff,' *Amylum*.

STARCH, **ANIMAL**, *Corpora amylacea*—s. *Blue*, *Smalt*—s. *Canna*, *Tous-les-mois*.

STARCH CORPUSCLES, *Corpora amylacea*.

STARCH, **IODIDE OF**, *Iod'idum seu Iodure'tum Am'yl'i*, *Am'ylum ioda'tum*, (F.) *Iodure d'Amidon*; prepared by triturating iodine and starch, is said to have the eutrophic effects of iodine; but, by some, is esteemed inert. Dose, four to six grains.

STARCH, POTATO, see *Solanum tuberosum*.
 STARCH SUGAR, Glucose.
 STARCH, TACCA, Arrowroot, Tahiti.
 STARKEY'S PILLS, see *Pilulæ ex helleboro et myrrhâ*.

STASE, Stasis.
 STASIS, *στᾱσις*, from *στᾱω*, 'I stop,' (F.) *Stase*. This word has nearly the same signification as stagnation. Stagnation, however, sometimes includes a morbid condition of the fluids, — Stasis never.

STASIS, Station.
 STATE MEDICINE, Medicine, state.
 STATIC, *Statical*, *Staticus*, (F.) *Statique*. Same etymon. An epithet applied to the physical phenomena presented by organized bodies in contradistinction to the organic or vital.

STATICA SEPTI NARIUM, *Appendix cutanea septi narium*. The cutaneous appendage to the septum narium.

STATICAL, *Static*.
 STATICE CAROLINIANA, of the United States, (*στατικός*, 'restraining,') *American* or *Seaside Thrift*, *Marsh Rosemary*, *Marsh Root*, *Ink-root*, *Sea Lavender*, *Ord.* *Plumbaginaceæ*, is considered to be a mere variety of the *Statice limonium*. The root is the *Statice* — (Ph. U. S.).

STATICE LIMONIUM, *S. Maritimum*, *Behen rubrum*, *Limonium*, *L. majus* seu *vulgarè*, *Behen*, *Behnen Ackmar*, *Sea Lavender*, *Red Behen*, *Marsh Rosemary*, *Lavender Thrift*, (F.) *Behen rouge*, *Romarin des marais*, *Lavande triste* ou *de mer*. The roots have been esteemed astringent, tonic, and eminently antiseptic.

STATICE MARITIMUM, *S. limonium* — s. *Vulgare*, *S. limonium*.

STATION, *Statio*, *Stasis*, *Status*, from *stare*, *statum*, 'to stand.' The act of standing.

STATIONARY, *Stationarius*, (F.) *Stationnaire*. Same etymon. A name given by Sydenham and Stoll to certain diseases, which depend upon a particular state of the atmosphere; and which prevail in a district for a certain number of years, and then give way to others.

STATISTICS, MEDICAL, *Vital Statistics*, *Biostatistics*, (*Status*, 'a state,') (F.) *Statistique médicale*. That part of medicine which relates to details — *medico-statistical* — connected with the mortality, salubrity, &c., of different countries and situations.

It has, also, been used in a wider sense to signify the same as *Numerical method*, (F.) *Méthode numérique*; which is applied to the systemization of medical facts, or to the use of numbers in the investigation of disease.

STATISTICS, VITAL, *Statistics*, *medicæ*.

STATURE, *Statura*, *Meg'ethos*, *Magnitudo corporis*, from *sto*, *statum*, 'to stand.' The height of the human figure. The following table exhibits the results of several admeasurements, with the heights of some of the monkey species, on the authority of Mr. Lawrence.

	STATURE.	
	Feet.	In.
An Englishman	6	4½
		to
	5	00
An Englishwoman		to
	5	00
European male skeleton		5
Do.	5	5
A Negro at the Lunatic Hospital, Liverpool	5	10½
Another from Virginia		5
Another from the Gold Coast	5	8
Another	5	00

	STATURE.	
	Feet.	In.
Negro skeleton	4	11
Another	5	7½
A Lascar	5	4
Venus de Medici	5	00
Tyson's Chimpanse (<i>Simia Troglodytes</i>)	2	2
Mr. Abel's Orang Utang	2	7
Camper's Do.	less than 30	
Mr. White's Monkey	2	2

STATUS, *Acme* — s. *Cruditatis*, *Crudity* — s. *Erethiticus*, *Nervous diathesis* — s. *Gastricus*, *Embaras gastrique* — s. *Nervosus*, *Nervous diathesis* — s. *Parturienti*, *Parturition* — s. *Sthenicus*, *Sthenia* — s. *Verminosus*, *Helminthiasis*.

STAVESACRE, *Delphinium staphisagria*.

STAXIS, *στᾱξις*, *Apostax'is*. A slight epistaxis or nasal hemorrhage. — *Hippocrates*.

STEAM-DOCTOR. A term applied to one who treats all or most diseases by steam.

STEAR, see *Fat*, *Sevum*.

STÉARATÉ, *Emplastrum*.

STEARIN, see *Fat*.

STEARINUM CETACEUM, *Cetaceum*.

STÉAROLÉ, *Pomatum* — s. *Solide*, *Emplastrum*.

STEAROSIS, *Steatosis*.

STEARRHŒA, *Steatorrhœa*, *Seborrhœa*, *Seborrhag'ia*, *Smegmatorrhœa*, *Smegmorrhœa*, *Fluxus sebaceus*, *Sebaceous Flux*, from *σταιρ*, 'suet,' and *ῥῶα*, 'I flow.' Augmentation of secretion from the sebaceous follicles of the skin.

STEARRHŒA NIGRICANS. A term used by Dr. Nelligan, of Dublin, for a black discoloration of the face, observed in young females affected with derangement of the catamenia, and which, in his opinion, is owing to a dark secretion from the cutaneous sebaceous glands.

STEATITES, *Polysarcia*.

STEATOCELE, from *σταιρ*, *σταιρος*, 'suet,' and *κῆλη*, 'a tumour.' A tumour formed by a collection of steatomatous matter in the scrotum.

STEATOMA, *Tumor lar'vus*, from *σταιρ*, *σταιρος*, 'suet.' *Seratio*, *Emphy'ma encyst'is steatoma*. An encysted tumour, whose contents are similar to fat.

STEATOPYGA, from *σταιρ*, *σταιρος*, 'fat,' and *πυγή*, 'buttocks.' *Buttock-hump*. Fat buttocks; such as exist in the *Hottentot* female.

STEATORRHŒA, *Stearrhœa*.

STEATOSIS, *Stearosis*. Fatty degeneration of a part, or unusual deposition and accumulation of fat in its adipose tissue.

STEATOSIS CORDIS, *Degeneratio adiposa cordis*, *Cardiomyoliposis* and *Cardiomyoliposis* (*Piorry*), *Fatty heart*. Unusual deposition of fat on the heart:—by some presumed to be occasionally a true adipous degeneration of the substance of the heart.

STEATOSIS HEPATICA, *Adiposis hepatica*.

STEATOZOON FOLLICULORUM, *Acarus folliculorum*.

STEEL, *Chalybs*.

STEEP, *Rennet*.

STEEPLE-BUSH, *Spiræa tomentosa*.

STEER'S OPODELDOCH, see *Opodeldoch*, *Steer's*.

STEGMONTH, see *Parturient*.

STEGANOPODES, *στανονοδες*, *Planipedes*. They who have flat feet, or are web-footed, from *στανος*, 'covered,' and *πους*, 'foot.'

STEGNOSIS, *Steno'sis*, *Constipatio*, *Stipatio*, *Condensatio*, *Obstruc'tio*, from *στανω*, 'I constrict.' Constriction or narrowness of the pores and vessels. *Stricture*. *Constipation*. *Suppression of the evacuations*. See *Aretatio*.

STEGNOTICA, *Astringents*.

STEIROSIS, Sterilitas.

STELENGIS, Stridor dentium.

STELLA, *Fascia stellata*. (F.) *Étoile*. A bandage, improperly compared to a star, because it is crossed like the letter X. This bandage is applied upon one or both shoulders. In the first case, it is called *simple*; in the second, *double*. It was employed in fractures of the sternum, clavicle, and scapula; in luxations of the humerus, &c.

STELLA TERRE, *Plantago coronopus*.

STELLARIA MEDIA, *Alsine media*—s. *Scilla*, *Scilla*.

STELLATA RUPINA, *Centaurea calcitrapa*.

STELL'ULE VERHEEYEN'IL, (*stella*, 'a star,' *stellula*, 'a little star,') *Substantia stellata serpentina* seu *radia'ta*, *Ellychnia*. A stelliform plexus of veins at the surface of the kidney, which gives origin to the interlobular veins.

STELOCHITIS, *Osteocolla*.

STENAGMUS, *Susprium*.

STENAXIS, *Susprium*.

STENIA, *Sthenia*.

STENICUS, *Activa*.

STENOBRERMATE, see *Cranium*.

STENOCARDIA, *Angina pectoris*, *Cardiostenosis*.

STENOCHORIA, *Stenochori'asis*, from *στενος*, 'narrow,' and *χωρα*, 'space.' *Angustia*. Employed by some for contraction of the vagina.

STENOCHORIA INTESTINI RECTI, *Stricture of the rectum*—s. *Œsophagi*, *Dysphagia constricta*.

STENOMYCE'RIA, from *στενος*, 'narrow,' and *μυκτηρ*, 'nose.' Contraction of the nasal passages.

STENOSIS, *Stegnosis*.

STENOSTEGNOSIS, *Stenostenosis*.

STENOSTENO'SIS, *Stenostegno'sis*, from *Steno*, and *στενωσις*, 'contraction.' *Obstruc'tio ductus Stenoni'ni*. Narrowness or contraction of the duct of *Steno*.

STENOSTOM'IA, from *στενος*, 'narrow,' and *στομα*, 'mouth.' Contraction of the mouth.

STENOTHORAC'ES, from *στενος*, 'narrow,' and *θωραξ*, *θώρακος*, 'the chest.' They who have narrow chests.

STENTOROPHO'NUS, from *στεντορ*, *Stentor*, a Greek of powerful voice in the army before Troy; and *φωνη*, 'voice.' One who has a strong voice.

STEPHANE, *Crown*.

STEPHENS, MRS., REMEDY FOR THE STONE. This consisted of lime, prepared by calcining the shells of eggs and snails, made into pills with soap. A decoction was, also, administered, consisting of chamomile, fennel, parsley, and burdock, with a portion of Alicant soap. Its virtues were dependent upon the lime and the tonic properties of the decoction. Hales, Hartley, Kirkpatrick, Lobb, and others, wrote in favour of this nostrum; and it was ultimately bought by the British parliament for £5000—about \$25,000.

STEPHENSA ELONGATA, *Matico*.

STEPMOTHER'S BLESSING, *Hangnail*.

STERA, *Uterus*.

STERCORA'CEOUS, *Stercorarius*, *Diachoreticus*, *Ster'coral*, from *stercus*, *stercoris*, 'dung,' *Fæcal*, *Fæcal*, (F.) *Stercoraire*, *Stercoral*.

The French use the term *Fistules stercoraires* for those which are kept up by the constant passage of fecal or *stercora'ceous matter*. The name *Stercoraires* is sometimes given, in derision, to those physicians who are fond of purging their patients: à posteriori has been similarly used.

STERCORAIRE, *Stercoraceous*.

STERCUS, *Excrement*, *Fimus*—s. *Anseris*, *Fimus anseris*—s. *Caninum album*, *Album Græcum*—s. *Diaboli*, *Asafœtida*—s. *Equi non castrati*, *Fimus*.

STERCUS HUMA'NUM, *Homerda*. Human excrement.

STERCUS LACERTÆ, *Crocodylia*.

STEREOCYST'IS, from *στερος*, 'hard,' and *κυστις*, 'cyst.' A hard encysted tumour.

STEREOS, *Solid*.

STEREOSCOPE, *Stereoscop'ium*, from *στερος*, 'solid,' and *σκοπω*, 'I view.' A physical instrument by means of which plane pictures of an object are made on each retina, and so blended as to appear as one in relief. Also, an instrument for detecting a calculus in the bladder, and foreign bodies in the soft parts. It resembles a common catheter, having an expanded free extremity.

STEREOT'ICA, from *στερος*, 'hard.' Fortuitous lesions or deformities affecting the hard parts. The 2d order, class *Tychica* of Good.

STER'ILE, *Ster'ilis*, *A'gonos*, *Aph'orus*, *Aphor'icus*, *Ablast'es*, *Infecun'dus*, *Barren*, (F.) *Stérile*. Same etymon as *Sterilitas*. Not producing fruit; *infecund*.

STERILIS, *Sterile*.

STERILITAS, *Agonia*, *Steiro'sis*, *Stiro'sis*, *Ageme'sia*, *Ageme'sis*, *Infecun'ditas*, *Steril'ity*, *Acy'e'sis*, *Bar'renness*, *Infecun'dity*, *Apho'ria*, *Ate'nia*, *Atoc'ia*, from *στερος*, or *στερος*, 'hard, barren.' Quality of that which is barren. Sterility may be *absolute* or *relative*. The former depends upon some vicious conformation of the genital organs, apparent or concealed, and occasionally admits of cure. Sterility is *relative* when a female does not conceive with one individual, but does with another. Sterility in females is often dependent upon a condition of the uterus characterized by membranous menstruation.

STERNAL, see *Sternal*.

STERNAL, *Sterna'lis*, from *sternum*, 'the breast bone.' Relating or appertaining to the sternum or breast bone.

STERNAL ASPECT. The aspect of the body where the sternum is situate.—Barclay. *Sternad* is used by the same writer adverbially to signify towards the sternal aspect.

STERNALGIA, *Angina pectoris*.

STERNO, in composition, belonging, or relating to, the sternum or breast bone.

STERNO-CLAVIC'ULAR, *Sterno-clavicula'ris*. That which relates to the sternum and clavicle.

STERNO-CLAVIC'ULAR ARTICULA'TION is the union of the inner extremity of the clavicle with a round facette at each side of the superior extremity of the sternum. In this articulation there are, besides the incrusting cartilages, two radiated *sterno-clavicular*, (F.) *Sterno-claviculaires rayonnées*; one anterior, and one posterior—an *inter-clavicular ligament* extending between the two clavicles, and two synovial capsules, separated by an *inter-articular fibro-cartilage*. The costo-clavicular ligament may also be considered to belong to this articulation.

STERNO-CLAVIO-MASTOÏDIEN, *Sterno-cleido-mastoideus*—s. *Cleido-hyoideus*, *Sterno-hyoideus*.

STERNO-CLEIDO BRACHIALIS, *Pectoralis major*.

STERNO-CLEIDO-MASTOÏDEUS, *Sterno-mastoideus*, *Cleido-mastoideus*, *Mastoideus*, *M. anterior*, *Nuta'tor cap'itis*; (F.) *Sterno-clavio-mastoïdien*, *Sterno-mastoïdien*; from *στερον*, 'the sternum,' *κλας*, 'the clavicle,' and *μαστος*, 'the mastoid process.' A muscle situate at the anterior and lateral part of the neck. It is long and flattened: simple, above; and divided into two portions below; where it is inserted into the anterior and superior part of the sternum, and the inner quarter of the clavicle. Above, it terminates at the mastoid process, which it embraces, at the neighbouring part of the temporal bone, and at the outer third of the upper curved line

of the occipital bone. It carries the head forward; inclines, and rotates it to one side. When both contract, they bend the head directly forwards.

STERNO-COSTAL. *Triangularis sterni* — *s. Costo-clavio-huméral*, *Pectoralis major* — *s. Huméral*, *Pectoralis major*.

STERNO-HYOÏDES, *Sterno-cleido-hyoïdes*, *Sterno-hyoïdes*, *Hyoïdes primus*; from *στερνον*, 'the sternum,' and *υοιδης*, 'the os hyoides.' A muscle situate at the anterior part of the neck; inserted, above, at the inferior edge of the body of the hyoid bone; below, into the upper part of the posterior surface of the sternum; — at the posterior part of the sterno-clavicular articulation, and sometimes into the cartilage of the first rib. It depresses the os hyoides.

STERNO-MASTOÏDIEN, *Sterno-cleido-mastoïdes* — *s. Pubien*, *Rectus abdominis*.

STERNO-THYROÏDES, *Sterno-thyroïdes*, *Brouchius*. A muscle, situate at the anterior part of the neck. It is attached, above, to the oblique line seen on the outer surface of the thyroid cartilage; and terminates, below, at the upper part of the posterior surface of the sternum, and the cartilage of the second rib. When it contracts, it depresses the thyroid cartilage and os hyoides by the medium of the thyro-hyoid membrane.

STERNODYNIA, see *Stomatodynia* — *s. Syn-copalis*, *Angina pectoris* — *s. Syn-copica et Palpitans*, *Angina pectoris*.

STERNO-OMPHALODYMIA, see *Somatodymia*.

STERNOPA'GIA, from *στερνον*, 'the breast bone,' and *παγω*, 'I fasten.' A monstrous union of fœtuses, in which they are attached at the sternum.

STERNUM, *Sternon*, from *στερπος*, 'solid,' *Pectus*, *Os asser seu pectoris seu xiphoides seu gladioli seu ensiforme*, *Scutum cordis seu pectoris*, *Breast Bone*, *Hæmal Spine* of Owen. An azygous symmetrical bone, situate at the fore-part of the chest. It is flat; broad above; narrower in the middle; and terminates, below, by a pointed cartilage — the xiphoid. It has an anterior or cutaneous surface, a posterior or mediastinal — a superior or clavicular extremity, and an inferior or abdominal. It is articulated with the clavicles and the seven upper ribs on each side, by means of their cartilages. According to Bèclard, it is formed of six principal bones, which he names, from their position, 1. *Primi-sternal* or *clavi-sternal*: 2. *Duo-sternal*: 3. *Tri-sternal*: 4. *Quarti-sternal*: 5. *Quinti-sternal*: 6. *Ultimi-sternal* or *ensi-sternal*.

STERNUMENTUM, Sneezing.

STERNUTAMENTORIA, *Achillea ptarmica*.

STERNUTAMENTUM, Sneezing.

STERNUTATIO, Sneezing.

STERNUTATOIRE, *Sternutatory*.

STERNUTATORY, *Sternutato'rius*, from *sternutare*, *sternutum*, 'to sneeze,' *Sternutamentum*, *Errhinum*, *Ptar'micum*, *Anarrhinum*, (F.) *Sternutatoire*. A substance which provokes sneezing; as tobacco, &c. — See *Errhine*.

STERTEUR, *Stertor*.

STERTOR, *Ronchus* or *Rhouchus*, *Renchus*, *Rhencus*, (F.) *Sterteur*, *Ronflement*, from *stertere*, 'to snore.' The deep snoring which accompanies inspiration in some diseases, particularly in apoplexy. Such respiration is said to be *stertorous*, (F.) *Stertoreux*; *Respiratio stertuosa seu stertens seu stertorosa*.

STERTOROUS, see *Stertor*.

STETHÈMIA, *Hyperæmia Pulmonum seu Pectoris*, (F.) *Hyperémie ou Congestion des Poumons*; from

σθηθος, 'the chest,' and *αίμα*, 'blood.' *Hyperæmia* of the lungs. Congestion or accumulation of blood in the pulmonary vessels.

STETHOCATHARSIS, *Expectoration*.

STETHOCHYSIS, *Hydrothorax*.

STETHODESMIS, *Corset*.

STETHODESMIUM, *Corset*.

STETHODESMUS, *Corset*.

STETHOMETER, from *σθηθος*, 'the chest,' and *μετρον*, 'measure.' An instrument, proposed by Dr. Richard Quain, for measuring the extent of movement of the walls of the chest, as a means of diagnosis in thoracic diseases. It consists of a flat case, not unlike a watch-case, having on its upper surface a graduated dial and index, which is acted on by a simple mechanism. A silk cord, long enough to surround one-half the chest, passes through an aperture in the case. The dial is graduated into fifty equal parts, each of which represents the 1-200th of an inch. In using the instrument, the dial is placed firmly against the spine, and the point of the tape over the sternum, or at any other spot according to the part to be examined. The extension of the string, as indicated by the dial, shows the amount of elasticity of the parietes of the thorax.

Under the name *Thoracom'eter*, Dr. Sibson has described an instrument of his invention, which is employed with a similar view as the stethometer of Dr. Quain. — *Med. Chir. Transact.*, vol. xxxi.

STETHOPARALYSIS, *Paralysis nervorum thoracis, phrenicorum, &c.*; from *σθηθος*, 'the chest,' and *παράλυσις*, 'paralysis.' Palsy of the muscles of the chest.

STETHORRIEUMA, *Pleurodynia*.

STETHOSCOPE, *Stethoscop'ium*, *Stethos-copium*, *Echoscop'ium*, *Psophom'eter*, *Thoracoscop'ium*, from *σθηθος*, 'the chest,' and *σκοπεω*, 'I examine.' An instrument invented by Laënnec, of Paris, for exploring the chest. The stethoscope, sometimes called *Pectoriloque*, is a cylinder of wood, from four inches to a foot long; pierced through and through by a longitudinal canal about a quarter of an inch in diameter. The longer are generally composed of two portions, that fit together by means of a screw, one of which is hollowed at the extremity, in the shape of a funnel. These two portions being screwed to each other, the physician lays hold of the instrument, as he would of a pen, puts the funnel-shaped extremity on the chest of the patient, and applies his ear to the other. To explore the pulsations of the heart, the funnel is plugged up by a piece of the same kind of wood accurately adapted to it, and pierced by a canal of the same width as that in the body of the instrument. Stethoscopes are sometimes flexible, like the flexible ear-trumpet.

This mode of examining affections of the chest, *Stethoscopy*, *Stethoscop'ia*, &c., is what Laënnec terms *Auscultation médiate*, *Mediate Auscultation*.

STETHOSCOPIA, see *Auscultation*, and *Stethoscopy*.

STETHOSCOPIC, *Stethoscop'icus*, (F.) *Stéthoscopique*. Same etymon as *Stethoscope*. Furnished by stethoscopy or auscultation, — as a 'stethoscopic sign.'

STETHOSCOPY, see *Stethoscope*.

STETHUS, *Thorax*.

STEW, *Stove*.

STHENIA, *Steni'a*, *Diathesis sthen'ica*, *Status sthen'icus*, *Vis aucta*, from *σθενος*, 'strength,' 'power.' Excess of strength; excitement of the organic actions. A word used, especially by the Brunonians, as well as *Asthenia*, — its antitheton. *Sthenic* or *dynamic diseases* are such as depend upon excessive excitement.

STHENICUS, *Active*.

STHENOPYRA, *Synocha*.

STIBI, Antimonium.

STIBIALIS, Antimonial.

STIBIALISM, *Stibialis'mus*, from *stibium*, 'antimony.' The aggregate phenomena produced by antimonials, when given in large quantities:—antimonial intoxication or poisoning.

STIBIATUS TARTRIS LIXIVIÆ, Antimonium tartarizatum.

STIBII BUTYRUM, Antimonium muriatum—s. Deuto-murias sublimatus, Antimonium muriatum—s. et Potassæ deuto-tartras, Antimonium tartarizatum—s. Hydrosulphuretum rubrum, Antimonii sulphuretum rubrum—s. Oxidum acido muriatico oxygenato paratum, Algaroth—s. Oxidum album mediante nitro confectum, Antimonium diaphoreticum—s. Oxidum præcipitando paratum, Algaroth—s. Oxodes album, Antimonium diaphoreticum—s. Oxodes sulphuretum, Antimonii sulphuretum præcipitatum—s. Oxydi sulphurati hydro-sulphuretum luteum, Antimonii sulphuretum præcipitatum—s. Oxydulati sulphuretum, Antimonii sulphuretum præcipitatum—s. Oxydulum vitreatum, Antimonii vitrum—s. Oxydum semivitreum, Antimonii vitrum—s. Oxydum sulphuratum, Oxydum stibii sulphuratum—s. Subhydrosulphas, Antimonii sulphuretum rubrum—s. Submurias præcipitando paratum, Algaroth—s. Sulphurati hydrosulphuretum rubrum, Antimonii sulphuretum rubrum—s. Sulphuretum nigrum, Antimonium—s. Vitrum, Antimonii vitrum.

STIBIO-DERMIC, see Unguentum antimonii. STIBIOSUM HYDROSULPHURETUM CUM SULPHURE, Antimonii sulphuretum præcipitatum—s. Oxidum, Antimonium diaphoreticum.

STIBIUM, Antimonium.

STICHAS ARABICA, *Lavendula stœchas*.

STICKWORT, Agrimony.

STICTA PULMONACEA, *Lichen pulmonarius*.

STIFF JOINT, MUSCULAR, Contractura.

STIFF JOINTS, Milk sickness.

STIFNECK, Torticollis.

STIGMA, Cicatricula.

STIGMATA, see *Nævus*. The breathing pores of insects are so called.

STIGMATA OVARIO-RUM, *Cicatri'ces Ovario-rum*. The cicatrices left in the ovary after the escape of ova.

STILBOMA, Cosmetic.

STILL, Alembic.

STILLA, Gutta.

STILLATIO SANGUINIS E NARIBUS, Epistaxis.

STILLBORN, (F.) *Mort-né*. Born still or lifeless, — dead born.

STILLICIDIUM, *Substil'ium*, from *stilla*, 'a drop.' This term is often used synonymously with *Strangury*. It means the flow of any fluid—particularly the urine—drop by drop. Also a kind of embrocation, *Stillicid'ium supra partem*, effected by dropping a liquid upon a part.

STILLICIDIUM LACRYMARUM, Epiphora—s. Narium, Coryza—s. Sanguinis e naribus, Epistaxis—s. *Supra partem*, see *Stillicidium*.

STILLING'GIA, *S. sylvat'ica*, *Queen's Root*, *Queen's delight*, *Yau root*, *Mar'cory*, *Cocksp hat*. An indigenous plant, which grows in pine barrens, from Virginia to Florida. *Ser. Syst.* Monœcia Monadelphica. *Nat. Ord.* Euphorbiaceæ. The root—*Stillingia*, Ph. U. S.—is said to be used in syphilis, obstinate cutaneous affections, &c., like *sarsaparilla*.

STIMATO'SIS, *Stymatosis*, *Hæmorrhag'ia Penis*, *Stymatorrhag'ia*, *Phalloorrhag'ia*, *Caulorrhag'ia*, from *στυπα*, 'priapism,' itself from *στυειν*, 'to erect.' Hemorrhage from the male organ, accompanied or not with priapism.

STIMMI, Antimonium.

STIM'ULANT, *Stim'ulans*, *Exc'itans*, *Inci'tans*, *Incent'ivum*, *Irrit'ans*, *Exc'itant*, *Inci'tant*, *Hyperthentic*, *Pyretogenetic*, from *stimulare*, 'to goad.' A medicine which has the power of exciting the organic action of the different systems of the economy. Some stimulants are *diss'ussible*, — that is, have a prompt but temporary action; others are *permanent* or *persistent*. The action of stimulants is called *Stimula'tion*, *Stimula'tio*, *Inci'tatio*.

The chief stimulants are the following: Æther Sulphuricus, Ammonia, Asafoetida, Brucia, Camphora, Capsicum, Castoreum, Cinnamonum, Copaiba, Cubeba, Guaiacum, Hydrargyri Præparata, Iodinium, Nux Vomica, Olea Essentia, Opium (in small dose), Piper, Sinapis, Strychnia, Zingiber, — Alcohol, Caloric, Electricity, Mental Emotions, (the Impetuous.)

STIM'ULUS, 'a goad.' *Inci'tamentum*, *Irrita'tamen*, *Irritamentum*, *Poten'tia Irrit'ans*. Anything which excites the animal economy.

STINE, Hordeolum.

STINK POKE, *Dracontium foetidum*—s. Weed, Chenopodium antheminticum, Datura stramonium, Polanisia graveolens.

STIPATIO, Stenosis.

STIPATIO TELEÆ CELLULO'SÆ INFANT'UM. Induration of the cellular tissue of children.

STIROISIS, Sterilitas.

STITCH, same root as *stick*, Sax. *ƿiclian*, (G.) *stecken*, (Sc.) *Stomad*, (Prov.) *Dag*, (F.) *Point*, (L.) *Punctum*; (from *pingere*, *punctum*, 'to prick or sting.') An acute lancinating pain, like that produced by the puncture of a sharp needle.

STITCH, COMMON, Suture, common—s. Royal, see Suture—s. in the Side, Pleurodynia.

STIZOLOBIUM, *Dolichos pruriens*.

STLENGIS, Stridor dentium.

STOBÆA RUBRICAU' LIS. A South African plant, *Nat. Ord.* Compositæ. A tincture of the brised roots is diuretic, and of great service in gravel.

STOCKING, LACED, (F.) *Bas lassé*. A bandage used by surgeons, which consists of a stocking made of firm cloth or dog-skin, admitting of being tightly laced anteriorly. It is employed in varices and ulcers of the legs.

STÛCHAS ARABICA, *Lavendula stœchas*.

STÛCHIOLOG'Y, *Stœchiolog'ia*, (F.) *Stœchiologie*; (from *στυχειον*, 'element,' and *logos*, 'a discourse.' A treatise, or the theory, of elements; hence of the elementary parts of organized substances.

STOICHEION, Element.

STOMA, Mouth.

STOMAC'ACË, *Stomatoc'acë*, *Stomal'gia*, *Labisul'cium*, *Cheiloc'acë*, *Uloc'acë*, *Cheilomala'cia*, *Stomatoma*, *Stomatonecro'sis*, *Cancer Oris*, *Canker*, from *στομα*, 'the mouth,' and *kakos*, 'evil.' Pætor of the mouth with a bloody discharge from the gums. (F.) *Cancer aquaticus*; see *Cancer Aquaticus*. Also, Scurvy.

STOMAC'ACË, *Porphyræ nautica*—s. *Gangrænosum*, *Cancer aquaticus*—s. *Universale*, *Purpura hæmorrhagica*.

STOMACAL, Stomachal.

STOMACALGIA, Cardialgia.

STOMACH, *Stom'achus*, *Ventric'ulus*, *Nedys*, *Anocœ'lia*, *Gaster*, *Gluttu'patens*, *Maw*, (of animals), (Sc.) *Kyte*, *Pechan*, (Prov.) *Warison*, (F.) *Estomac*, from *στομα*, 'a mouth.' One of the principal organs of digestion. It is a musculo-membranous reservoir; continuous, on the one side, with the œsophagus; on the other, with the duodenum. It is situate beneath the diaphragm, between the liver and the spleen; and occupies the epigastrium and a part of the left hypochondrium. In it the food is converted into chyme.

When viewed externally, the stomach has, 1. An anterior face, which looks a little upwards. 2. An inferior face, directed downwards. 3. An inferior or colic margin, which is convex and extensive, and is called the greater curvature, (F.) *Grand courbure*. It gives origin to the omentum majus. 4. A superior or diaphragmatic margin, which is shorter, concave, and is called the lesser curvature, (F.) *Petit courbure*. The lesser omentum is attached to this. 5. A left or œsophageal orifice, called, also, the *cardia*, *Os ventriculi* or upper orifice. 6. A right or intestinal, or inferior orifice, called the *pylorus*. 7. A considerable dilatation, situate to the left of the *cardia* and greater curvature—the *great tuberosity* or *great cul-de-sac* or *fundus* of the stomach; and, 8. A less extensive dilatation, situate to the right of the greater curvature,—the *lesser tuberosity* or *lesser cul-de-sac*, *Antrum Pylori*. The inner surface of the stomach is of a reddish-white colour, and has a marbled appearance. It is constantly covered by thick mucus, and is lined by a mucous membrane, which presents numerous wrinkles. The parietes of the stomach consist of three membranes in superposition. The outermost is serous, and is an extension of the peritoneum. The middle coat is muscular,—some of its fibres running longitudinally; others, transversely, and others obliquely. The innermost membrane is of a mucous nature, *Crusta villosa ventriculi*, *Gastro-mycod'eris*, but not exactly a continuation of the membrane that lines the œsophagus. The mucous and muscular membranes form, at the pylorus, a valve, called the *Pyloric valve*. These three coats are united by a dense, close, areolar membrane; and, between the mucous and muscular coats, along the two curvatures especially, is a quantity of muciparous glands, called *Glands of Brunner*. The arteries of the stomach are very numerous, and proceed from the coronaria ventriculi, the pyloric, splenic, and right and left gastro-epiploic. The veins have the same name, and pursue the same course as the arteries. They pour their blood into the trunk of the vena porta. Its lymphatic vessels are very numerous, and pass into ganglia, situate along the two curvatures. The nerves of the stomach proceed from the pneumogastric, and three divisions of the cœliac plexus.

STOMACH CELL, see *Favulus*—s. Disease, Limosis.

STOMACH, FIRST, *Ingluvius*.

STOMACH PUMP, *Gastren'chyta*, *Anli'a gastrica*, (F.) *Pompe pour l'estomac*. A useful instrument for conveying fluids to the stomach, when deglutition is impracticable, and for pumping out the contents of that organ. It consists of a forcing syringe, to the bottom and nozzle of which flexible tubes can be attached. When the object is to force fluids into the stomach, the stomach-tube must be attached to the nozzle, and passed down the throat,—the tube connected with the bottom of the syringe being placed in the fluid to be injected. To empty the stomach, the stomach-tube must be attached to the bottom of the instrument. This instrument has been of great service where poisons have been taken. The antidote, when any exists, and is at hand, should be administered immediately prior to its use.

The stomach pump was first employed in America by Dr. Physick, in the year 1812.

STOMACH, SECOND, *Proventriculus*—s. Sick, Milk sickness—s. Third, *Ventriculus callosus*.

STOMACH TUBE, see *Tube*, œsophageal.

STOMACHAL, *Stomach'ic*, *Stomach'ical*, *Cardi'acus*, *Stomach'icus*, *Stomacha'tis*, *Viscera'tis*, (F.) *Stomacal*, *Stomachique*. That which belongs to the stomach; that which is good for the sto-

mach; which strengthens the stomach. A medicine that gives tone to the stomach.

STOMACHALGIA, *Cardialgia*.

STOMACHI RESOLUTIO, *Dyspepsia*.

STOMACHIC, *Stomachal*.

STOMACHICAL, *Stomachal*.

STOMACHIQUE, *Stomachal*.

STOMACHUS, from *στομα*, 'mouth.' This word has been used in several different acceptations; for example, for the œsophagus, for the cardiac orifice of the stomach, (see *Cardia*.) and for the stomach itself. Hippocrates calls the neck of the bladder *στομαχος κυστιως*; and the neck of the uterus *της μητρας στομαχος*.

STOMALOGIA, *Stomatal'gia*, *Stomatodyn'ia*, from *στομα*, 'mouth,' and *αλγος*, 'pain.' Pain in the mouth.

STOMAPYRA, *Aphthæ*—s. *Aphtha*, *Aphthæ*.

STOMATALGIA, *Stomalgia*.

STOMATEL'CIA, *Stomatel'cosis*; from *στομα*, *στοματος*, 'the mouth,' and *ελκος*, 'an ulcer.' Ulceration of the mouth.

STOMAT'IA, *Stomatopath'ia*; from *στομα*, *στοματος*, 'the mouth.' Disease of the mouth.

STOMAT'IC, *Stomat'icus*, from *στομα*, *στοματος*, 'mouth.' A medicine used in diseases, &c., of the mouth. Dentifrices, masticatories, &c., are stomatics.

STOMATITE APHTHEUSE, *Stomatitis*, *aphthous*—s. *Charbonneuse*, *Cancer aquaticus*—s. *Couenneuse*, *Stomatitis*, pseudo-membranous—s. *Crèmeuse putacée*, *Aphthæ*—s. *Folliculeuse*, *Stomatitis*, *aphthous*—s. *Gangrèneuse*, *Cancer aquaticus*—s. *Mercurielle*, see *Salivation*, *mercurial*—s. *Ulcéreuse*, *Stomatitis*, *aphthous*.

STOMATITIS, from *στομα*, *στοματος*, 'the mouth,' and *itis*, denoting inflammation. (F.) *Inflammation de la Bouche*; Inflammation of the mouth.

STOMATITIS, APHTHOUS, *S. follicular* or *ulcéreus*, *Em'phlysis Aphtha*, *A. Adulto'rum*, (F.) *Stomatite*, *S. aphtheuse* ou *folliculeuse* ou *ulcéreuse*. An inflammation of the follicles of the mouth, constituting the aphthæ of the adult, which is generally accompanied by cephalic, gastric, and general disturbance. It may be either discrete or confluent, and requires general and local treatment, adapted to the case.

STOMATITIS, ERYTHEM'ATOUS. Simple inflammation of the mouth.

STOMATITIS, EXSUDATIVA, *Aphthæ*—s. *Follicular*, *S. aphthous*—s. *Gangrenous*, *Cancer aquaticus*—s. *Materna*, *Stomatitis* of nursing women.

STOMATITIS, MERCURIAL, *S. mercurial'is*, *Hydrargyrostom'atis*, *Hydrargyrostomat'itis*. Inflammation of the mouth induced by mercury.

STOMATITIS OF NURSING-WOMEN, *S. Nutri'cum* seu *Mater'na*, appears to be a variety of *S. aphthous*.

STOMATITIS NUTRICUM, *Stomatitis* of nursing-women.

STOMATITIS, PSEUDOMEMBRANOUS, (F.) *Stomatite couenneuse*, *Diphthérite buccale*, *Pseudo-membranous inflammation of the mouth*;—in its worst form, *Stomatyphus*, (F.) *Fégarite*. Inflammation of the mouth accompanied by the exudation of a false membrane,—a disease which is rarely seen except in large founding establishments.

STOMATITIS, ULCEROUS, *S. aphthous*—s. *Vesiculosa infantum*, *Aphthæ*.

STOMATOCACE, *Stomacace*.

STOMATODYNIA, *Stomalgia*.

STOMATO-GASTRIC, *Sto'mato-gas'tricus*, *Stomo-gastric*, *Stomo-gas'tricus*, from *στομα*, *στοματος*, 'the mouth,' and *γαστρικ*, 'the stomach.' Appertaining to the mouth and stomach,—as the *stomato-gastric* ganglia of the lower animals. See *Encephalon* and *Nerves*.

STOMATOMALACIA PUTRIDA, Cancer aquaticus.

STOMATONECROSIS, Cancer aquaticus, Stomacace.

STOMATONOMA, Stomacace.

STOMATOPANUS, from *στομα*, *στοματος*, 'the mouth,' and *πανος*, 'a glandular tumour.' *Stomatophyma glandulosum*, *Panus Favicium*. Tumefaction of the glands of the mouth.

STOMATOPHYMA, from *στομα*, *στοματος*, 'the mouth,' and *φυμα*, 'a swelling.' A swelling in the mouth.

STOMATOPHYMA GLANDULOSUM, Stomatopanus.

STOMATOPLASTIC, *Stomatoplasticus*; from *στομα*, *στοματος*, 'the mouth,' and *πλασσω*, 'I form.' An epithet for the operation of forming a mouth, where the aperture has been contracted from any cause. *Stomatoplasty*.

STOMATORRHAGIA, *Stomatorrhœa*, *Hæmorrhag'ia oris* seu *fav'cium*, *Son'guinis profusurium ex Orē*, *Hæmorrhōides Oris*, *Stomat'osis*, *Stomatorrhag'ia*, (F.) *Hæmorrhagie buccale*, from *στομα*, *στοματος*, 'the mouth,' and *ρηννυμι*, 'I break out.' Hemorrhage from the mouth.

STOMATORRHAGIA ALVEOLORUM, Phatnorrhagia—s. Gingivarum, Ulorrhagia.

STOMATORRHŒA, Stomatorrhagia.

STOMATOSCOPE, from *στομα*, *στοματος*, 'mouth,' and *σκοπεω*, 'I view.' Any instrument for keeping the mouth open, so as to permit the parts within to be inspected; *Speculum oris*.

STOMATOSEPSIS, Cancer aquaticus.

STOMATOSIS, Stomatorrhagia.

STOMATOSPASMUS, Trismus.

STOMATYPHUS, Stomatitis, pseudomembranous.

STOMENCEPHALUS, Stomocephalus.

STOMOCEPHALUS, *Stomenceph'alus*, (F.) *Stomocéphale*, *Stomencéphale*; from *στομα*, 'mouth,' and *κεφαλη*, 'head.' A genus of monsters, having two contiguous eyes, or a double eye occupying the median line; the nasal apparatus atrophied and forming a tube (*trompe*); the jaws rudimental; and the mouth imperfect or wanting.—I. G. St. Hilaire.

STOMOMANICON, *Platysma myoides*.

STOMORRHAGIA, Stomatorrhagia.

STONE IN THE BLADDER, *Calculi*, vesical—s. *Binder*, *Osteocolla*—s. *Crop*, *Sedum*—s. *Crop*, *biting*, *Sedum*—s. *Mint*, *Cunila mariana*—s. *Pock*, *Acne*—s. *Root*, *Collinsonia Canadensis*.

STONES, THE, Testes.

STOOL, Dejectio.

STOOL, CALOMEL, see Calomel.

STORAX, *Styrax*—s. *Liquida*, *Liquidambar styraciflua*.

STOREY'S WORM CAKES. An empirical preparation, formed of calomel ℞j, jalap ℥j, zingib. ℞ij, sacch. ℥j, cinab. antim. q. s. to colour them; *syrrup. simpl.* q. s. to make into cakes.

STORKBILL, *Geranium maculatum*.

STOUND, Stitch.

STOVE, *Estuar'rium*, *Stupha*. Old French, *Estuve*; a *Stew*, (F.) *Étuve*. A limited space, warmed artificially, and in which the air is slowly renewed. It is used for drying various substances, as plants, extracts, conserves, &c., or for taking vapour baths. In this case, the *stew* or *stove* is said to be *wet* or *humid*; in the opposite case, it is said to be *dry*, (F.) *èche*. The latter, which is used by the Turks, is the *Laconicum* or *Calidarium* of the Romans. The former is their *Tepidarium* or *Vaporarium*. These kinds of baths greatly excite the cutaneous transpiration; and are valuable agents in rheumatic and other affections.

STRABI, see Strabismus.

STRABILISMOS, Strabismus.

STRABISMUS, *Strabilis'mos*, *Parop'sis Stra-*

bismus, from *στραβος*, 'twisted,' 'one who squints;' *Strabos'itas*, *Loxophthal'mus*, *Distor'sio*, *Lus'citas*, *Illo'sis*, *Illo'sis*, *Helo'sis*, *Squinting*, *Cross eye*, (Prov.) *Doyle*, *Glecing*, (Sc.) *Skellie*, *Sheely*, (F.) *Strabisme*, *Vue louche*, *Louchement*. Want of concordance of the optic axes. It may be dependent upon natural or acquired inequality in the action of the motor muscles of the eye; on a convulsive state of one of those muscles; a difference in the sensibility of the two eyes; or a cerebral affection. In the treatment, if the disease seem to depend upon an excess of strength in one of the motor muscles, we must endeavour to give tone to that which is too weak, by placing before the eye a mask having a small aperture on the side to which it is necessary to direct the pupil; or by wearing glasses, provided with a piece of looking-glass, on the side to which the eye is vitiously turned; so that the reflection may be inconvenient, and occasion the organ to be turned in an opposite direction; or by putting a black patch on the angle opposite to that to which the eye is turned. If owing to weakness, the organ must be strengthened by being exerted alone, and by leaving the other at rest. If the disease be symptomatic of cerebral affection, attention must, of course, be directed to the latter.

Strabismus may be *single*, or affect one eye only, or *double*, and it may be *convergent* or *divergent*.

Those affected with Strabismus are called *Strabi*, *Strabones*, *Straboni*, *Strebli*, *Illi*, *Il'ides*, *Squint'ers*, *Squint-eyed*, (Sc.) *Gleyed*, (F.) *Louche*, *Bigles*. A slight deviation is generally called a *Cut* in the *Eye*, and, sometimes, a *Cock-eye*.

STRABISMUS, CONVERGENT, see Strabismus—s. Divergent, see Strabismus—s. Double, see Strabismus—s. Single, see Strabismus.

STRABONES, see Strabismus.

STRABONI, see Strabismus.

STRABOSITAS, Strabismus.

STRABOTOMY, *Strabotom'ia*, from *στραβος*, 'one who squints,' and *τομη*, 'incision.' The operation for the removal of squinting by the division of the muscle or muscles that distort the eye-ball.

STRAE-DEATH, see Death.

STRAIN, Sprain.

STRAIN, *colore*, (F.) *couler*, from *σπαγγω*, *stringere*, (F.) *estreindre*, 'to constrict or squeeze.' To pass deceptions, infusions, &c., forcibly through linen; also, to exert an effort. This is accomplished by fixing firmly the parts where the muscles to be exerted originate, in order that their full power may be developed.

STRAINING, Nisus.

STRAITS OF THE PELVIS, see Pelvis.

STRAMOINE, *Datura stramonium*.

STRAMONIA, *Datura stramonium*.

STRAMONIUM, *Datura stramonium*—s. *Fœtidum*, *Datura stramonium*—s. *Majus album*, *Datura stramonium*—s. *Spinosum*, *Datura stramonium*—s. *Vulgatum*, *Datura stramonium*.

STRANGALIDES, from *σπαγγω*, 'I compress.' Small, hard tumours, which form, as in the breast when the milk does not find issue.

STRANGALION, Tubercle.

STRANGALIS, Tubercle.

STRANGALISMUS, Strangulation.

STRANGERS' FEVER, see Fever, strangers'.

STRANGULATIO, Orthopnoea, Strangulation—s. *Uterina*, *Angone*.—s. *Vulvæ*, *Hysteria*.

STRANGULATION, *Strangula'tio*, *Pnix*, *Pnig'mos*, *Strangalis'mus*, (F.) *Étranglement*, *Strangulation*. From *σπαγγω*, 'I constrict or squeeze.' State of a part too closely constricted. Thus we say that there is *strangulation* of an in-

testinal hernia, when the opening that gives passage to the portion of protruded intestine contracts, so as to intercept the continuity of the digestive canal. In *Legal Medicine*, it means the forcible obstruction of the air passages, by a ligature or by the hand, for criminal purposes. See Suffocation.

STRANGULATOR, see Lycopoides.

STRANGURIA, Enuresis—s. Cruenta, Cystorrhagia.

STRANGURIE, Strangury—s. Menstruelle, Dysmenorrhœa.

STRANGURIOS; same etymon as the next. Affected with, or of the nature of, strangury.

STRANGURY, *Strangu'ria, Paru'ria stilla-ti'tia*, from *σπαγγειν*, 'to squeeze,' and *ουρον*, 'urine.' *Dysu'ria, Uri'næ Stillicid'ium* seu *Substillum*, (F.) *Strangurie*. Extreme difficulty in evacuating the urine, which issues only drop by drop, and is accompanied with heat, pain, tenesmus at the neck of the bladder, &c. See Ischuria, and Retention.

STRAPPING, WATER, see Water-dressing—s. Wet, see Water-dressing.

STRATHEPPER, MINERAL WATERS OF. A sulphuretted water, at Strathpeffer, a few miles west from Dingwall, in Ross-shire, Scotland. It contains sulphate of soda, sulphate of lime, chloride of sodium, sulphate of magnesia, and sulpho-hydric acid.

STRATIOTES, *Achillea millefolium*.

STRATUM BACILLATUM, see Tunica Jacobi—s. Corneum, Epidermis—s. Malpighii, Corpus mucosum—s. Pigmentum, see Choroid—s. Proligerum, Proligerous disc.

STRAWBERRY, *Fragaria*—s. Bush, *Euonymus Americanus*—s. Shrubby, *Rubus arcticus*—s. Tree, *Euonymus Americanus*—s. Wild, *Fragaria Virginiana*.

STREAK, PRIMITIVE. Groove, primitive.

STREATHAM, MINERAL WATERS OF. Streatham is a village near London. The waters are saline and cathartic.

STREBLI, see Strabismus.

STREBLOSIS, Luxation.

STREMA, Luxation, Sprain.

STREPITOUS MORBUS. 'Noisy disease.' A kind of flatulent disease, said by Sorbait to be not uncommon in the Austrian Alps, in which emphysematous tumours form on different parts of the body,—accompanied by sonorous excretion of gas by the mouth and anus.

STREPITUS AURIUM, Tinnitus aurium.

STRETCHING, Pandeuction.

STRIE, Vibices—s. Ciliares, Ciliary processes—s. Corneæ, Tenia semicircularis—s. Longitudinales Lancisii, see Corpus callosum—s. Medulares, see Processes teretes—s. Retinæ subjectæ ligamento ciliari, Halo signatus—s. Semilunares, Tenia semicircularis—s. Terminales, Tenia semicircularis—s. Transversales Willisii, see Corpus callosum.

STRiated MUSCULAR FIBRE, see Muscular fibre.

STRiATUS, *Cannelé*, Grooved, see Corpora striata.

STRIBILIGO, Efflorescence.

STRiCTURA, Stricture—s. Ani, Stricture of the rectum—s. Intestini recti, Stricture of the rectum—s. Intestini recti spasmodica, Stricture of the rectum, spasmodic—s. Œsophagi callosa, Dysphagia constricta—s. Œsophagi spasmodica, Œsophagismus—s. Pharyngis seu Œsophagi vera, Dysphagia constricta—s. Præputii, Phimosis—s. Urethræ, Urethrostenosis—s. Ventriculi, Stricture of the stomach.

STRiCTURE, *Strictu'ra*, from *stringere*, *stric-tum*, 'to tie hard.' *Coarctat'io*, *Stegno'sis*, (F.) *Rétrécissement*. A diminution or contracted con-

dition of some tube or duct, as the œsophagus, rectum, urethra, &c. This must be dilated by appropriate bougies. Strictures may, also, occur in the intestines: they are unmanageable, with the exception of those of the rectum, which admit of topical applications.

STRiCTURE OF THE ŒSOPHAGUS, *Dysphagia constricta*—s. of the Pharynx, *Dysphagia constricta*.

STRiCTURE OF THE RECTUM, SPASMOD'IC, *Stric-tu'ra Intesti'ni Recti spasmod'ica*, *Obstruc'tio Recti spas'tica*. An affection occurring in the nervous especially, which subsides spontaneously, after a longer or shorter continuance.

Stricture of the rectum, *Strictu'ra Ani* seu *Intesti'ni Recti*, *Archostegno'na*, *Rectostenosis*, *Euthyenterostenoma*, *Archostegno'sis*, *Archostenosis*, *Proctoœcnclis'sis*, *Angusta'tio* et *Restric'tio intestini recti seu ani*, *Stenochoria* *intestini recti*, *Proctostenosis organ'ica*, occurs also organically, and is a very serious affection; being generally dependent upon scirrhus.

STRiCTURE OF THE STOMACH, *Gastrostenosis*, *Coarctat'io* seu *Strictu'ra ventriculi*. See Gastrostenosis cardiaca, &c.

STRiCTURE OF THE URETHRA, Urethrostenosis—s. of the Urinary bladder, Cystostenochoria—s. Vesicæ urinariæ, Cystostenochoria.

STRIDOR DENTIIUM, Brygmus.

STRiGA CARTILAGINOSA CORDIS, Isthmus of the fossa ovalis.

STRIGIL, *Strig'ilis*, *Sten'gis*, *Stelen'gis*. A flesh-brush. Also, an instrument, anciently used in the baths, for scraping off the sweat.

STRIPED MUSCULAR FIBRE, see Muscular fibre.

STRIBILIT'ITES, from *στροβίλος*, *stro'bilus*, 'a cone of the pine.' Wine impregnated with the cones of the pine.

STROEMIA, Cadaba.

STROKE, APOPLEC'TIC. An apoplectic seizure.

STROKE, BACK, OF THE HEART, Impulse, diastolic.

STROKE, PARALYT'IC. A sudden attack of encephalo-spinal paralysis.

STROMA, *Strag'ulum*, *Stramentum*; *στρομα*, 'a bed or couch,' from *στρομνωω*, *στρομνωμι*, 'to spread out; to cover.' The bed or foundation-texture of an organ,—as the stroma of the ovary. Applied, also, to the bed or base of any deposit—as the 'amorphous stroma' of serofulous deposits.

STROMBULCUS, Forceps (bullet.)

STRONGLE, Strongylus—s. *Géant*, Strongylus gigas.

STRON'GYLUS, from *στρογγυλος*, 'round.' Hippocrates, Chabert, and others, mean the *As-caris lumbrico'id'es* by this term. The *Strongylus Gigas*, *Eustron'gyllus gigas*, *As-caris viscera'tis* seu *rena'lis*, *Fusa'ria viscera'lis* et *rena'lis*, (F.) *Strongle*, *S. géant*, is, however, distinct. It has an obtuse, flat head; mouth surrounded with six flattish papillæ: the whole bursa of the male truncated: the tail of the female rounded. It is sometimes met with,—five inches, a foot, a foot and a half, and even three feet long,—and from two lines to half an inch in diameter. It is occasionally found in the human kidney; rarely in other viscera, and still more rarely in the intestinal tube.

STRONGYLUS, Teres.

STROPHOS, Tormina.

STROPHULE, Strophulus.

STROPH'ULUS, *Licheni'asis stroph'ulus*, *Ebullit'io*, *Exanthe'ma* seu *Ero's'ia strophulus*, *Red Gum*, *Red Gown*, *Tooth Rash*, *White Gum*, *Milk-spots*, (F.) *Strophule*, *Feux de dents*. It consists of an eruption of red, or sometimes

whitish pimples, occurring in early infancy, chiefly about the face, neck, and arms, surrounded by a reddish halo; or interrupted by irregular patches of cutaneous blush. All the varieties under this genus arise in consequence of the extreme vascularity and irritability of the skin at this period of life, when the constitution is liable to be disturbed by irritation, either in the alimentary canal, gums or other parts. None of these eruptions are of any importance, and no medical treatment is usually necessary. If the stomach seem at all disordered, a little rhubarb and magnesia may be administered occasionally. Willan and Bateinan reckon five species, — *Strophulus intertinctus*, Red gum or gown; *S. albidus*, white gum; *S. confertus*, rank red gum, Tooth rash; *S. volaticus* or *Erythema volaticum*, and *S. can didus*.

STROPHULUS SYLVESTRIS, Ignis sylvaticus—s. Volaticus, Ignis sylvaticus.

STROPHUS, Tormina.

STRUCTIO, Structura.

STRUCTURAL; same etymon as the next. Of, or belonging to, structure.

STRUCTURE, *Structura*, *Structio*, *Conformatio*, *Cataseuē*, from *struere*, *structum*, 'to build.' The arrangement of the different tissues or organic elements of which animals and vegetables are composed. See Tissue.

STRUMA, Bronchocele, Scrofula.

STRUMA ADIPO'SA, *Obesitas colli*. Fatty neck. Prominence of the neck from obesity.

STRUMA FUNGOSA, Encephaloid.

STRUMES, Scrofula.

STRUMEUX, Scrofulous.

STRUMOSIS CEREBRI, Encephalophymata—s. Pulmonum, Tubercles of the lungs.

STRUMOSUS, Scrofulous.

STRUMOUS, Scrofulous.

STRUTHIOPH'AGUS, from *στροθιον*, 'a young ostrich,' and *φαγω*, 'I eat.' Struthiophagous tribes still exist in some parts of Africa.

STRUTHIUM, Saponaria.

STRUVE'S LOTION FOR HOOPING-COUGH, see Lotion, Struve's, for hooping-cough.

STRYCHNIA, *Strychnina*, *Strychnine*, *Strychninum*, *Strychnium*, *Vauqueline*, *Tellanine*. An alkaline principle; solid, crystalline, inodorous, bitter, and excessively poisonous, which has been found in *Strychnos nux vomica*, *S. Colubrina*, *S. Tienté*, *Ignatia amara*, *Cerbera Thevetia*, and *C. Aho'vai*. (*Nucis vomica*. rasur. ðiv: calcis pulv. ℥vj; acid. muriat. ℥iij; alcohol. acid. sulphuric. dil., liquor. ammonia, carbon. animal. purif., aqua, āā q. s. Digest the nux vomica in two gallons of water, acidulated with a fluidounce of muriatic acid, for 24 hours: then boil for two hours, and strain with expression through a strong linen bag. Boil the residuum twice successively in the same quantity of acidulated water, each time straining as before. Mix the decoctions, and evaporate to the consistency of thin syrup; then add the lime previously mixed with a pint of water, and boil for ten minutes, frequently stirring. Pour the mixture into a double linen bag, and having washed the precipitate well with water, press, dry, and powder it. Treat the powder repeatedly with boiling alcohol, until deprived of its bitterness; mix the liquors, and distil off the alcohol by means of a water-bath. Mix the residue with water, and having applied heat, drop in sufficient diluted sulphuric acid to neutralize and dissolve the strychnia; then add purified animal charcoal; boil for a few minutes, filter, evaporate, and crystallize. Dissolve the crystals in water, and add sufficient solution of ammonia to precipitate the strychnia. Lastly, dry the precipitate on bibulous paper. Ph. U. S.) The action—therapeutical and toxic—of strychnia on

man and animals is exactly like that of the alcoholic extract of nux vomica. It is, however, more active. An eighth of a grain is sufficient to kill a large dog; and a quarter of a grain produces marked effects on the human body, when in health. It has been given in paralysis and other cases like the nux vomica. Dose, one-sixteenth to one-twelfth of a grain.

STRYCHNIA, ACETATE OR, *Strychnia acetata*—s. Hydriodate of, *Strychnia hydriodas*—s. Iodate of, *Strychnia iodas*—s. Iodide of, *Strychnia hydriodas*.

STRYCHNIA, IODIDE OF IODHYDRATE OF, (F.) *Iodure d'Iodhydrate de Strychnie*, is made by pouring a solution of ioduretted iodide of potassium into a solution of a salt of strychnia; treating the precipitate with boiling alcohol, and crystallizing. Used in the same cases as strychnia. Dose, a tenth to a sixth of a grain.

STRYCHNIA, MURIATE OF, *Strychnia murias*—s. Nitrate of, *Strychnia nitras*—s. Sulphate of, *Strychnia sulphas*.

STRYCHNIA AND ZINC, DOUBLE IODIDE OF, Zinc and Strychnia, double iodide of.

STRYCHNIAE ACETAS, *Strychnium seu Strychninum aceticum*, *Acetas strychnii seu strychnicus*, *Ac'etate of Strychnia* or *Strychnine*. This salt is formed by the direct combination of strychnia with acetic acid. It is given in the same cases as pure strychnia.

STRYCHNIAE HYDRIO'DAS, *S. iodhydricas*, *Strychnium hydroiodicum*, *Hydriodas seu Iodhydricas strychnicus*, *Hydriodate* or *Iodide of Strychnia*, is prepared by mixing a solution of iodide of potassium with a concentrated solution of acetate of strychnia.

STRYCHNIAE IODAS, *Strychninae Iodas*, *Strychnina Ioda'ta*, *Strychnium seu Strychninum Iodicum*, *Iodas Strychnii seu Strychnicus*, *Iodate of Strychnia* or *Strychnine*. This salt may be formed by adding a concentrated solution of iodide acid to strychnia; treating with boiling alcohol; filtering, and leaving it to spontaneous evaporation.

STRYCHNIAE MURIAS, *Muriate of Strychnia*. (The product of the union of muriatic acid and strychnia.) Used in the same cases as strychnia.

STRYCHNIAE NITRAS, *Strychninum nitricum*, *Nitrate of Strychnia* or *Strychnine*, (F.) *Nitrate* or *Azotate de Strychnine*. (The product of the union of nitric acid and strychnia.) Used in the same cases as strychnia.

STRYCHNIAE SULPHAS, *Strychnium sulphuricum*, *Sulphate of Strychnia* or *Strychnine*. Has the same properties.

STRYCHNINA, Strychnia.

STRYCHNINE, Strychnia—s. Azotate of, *Strychnia nitras*.

STRYCHNINUM, Strychnia.

STRYCHNISM, see *Strychnos nux vomica*.

STRYCHNIUM, Strychnia—s. Aceticum, *Strychnia acetata*—s. Nitricum, *Strychnia nitras*—s. Sulphuricum, *Strychnia sulphas*.

STRYCHNOS, *Solanum dulcamara*—s. *Colubrina*, see *Strychnia*, and *S. Nux vomica*—s. *Guianensis*, see *Curare*—s. *Ignatii*, *Ignatia amara*.

STRYCHNOS NUX VOMICA, *Nux Vomica*, *Metellia*, *Caniram*, *Koochla tree*. *Nat. Ord. Loganiaceae*. *Sex. Syst. Pentandria Monogynia*. (F.) *Vomiquier*. A tree of the family *Strychnoides*, which grows in India, and the seeds of which have been long sold in the shops, under the names, *Nux Vomica*, *Vomic* or *Poison nut*, *Bachelors' buttons*, &c., (F.) *Noix vomique*. For a long time, these seeds were used only for poisoning rats; but subsequently an alcoholic extract was prepared from them, which has been administered in paralytic affections, in small doses. Dose of the *Alcoholic Extract*, *Extractum nucis*

vom'icæ spirituo'sum seu nucis vomicæ resin'o'sum seu nucis vom'icæ alcohol'icum, (F.) *Extrait alcoolique de noix vomique*, one or two grains. It produces a kind of tetanic convulsion in the paralyzed parts, when given to the requisite extent. It has, also, been administered in chronic diarrhœa and dysentery. When taken to such an extent as to induce toxic phenomena — *Strychnism* — it causes, at first, or when given in a smaller dose, greatly augmented excitability of the spinal nervous system, with slight transient paroxysms of spasms of the limbs, and hurried respiration. In larger doses, the excitability is still more developed, with paroxysms of prolonged general tetanic convulsions, laryngismus or contraction of the glottis, violent efforts of respiration, apoplexy, and asphyxia.

The following is the formula for the preparation of the *EXTRACTUM NUCIS VOMICÆ* of the Pharm. U. S. Take of *Nux vomica*, ℞j; *Alcohol*, a sufficient quantity. Expose the *Nux Vomica* to steam till it is softened; then, having sliced and dried it, grind it into powder. Introduce it into an apparatus for displacement, and pour alcohol upon it gradually, until the liquid passes without bitterness. Distil off the greater part of the alcohol from the filtered liquor, and evaporate the residue to the proper consistence.

The bark is the *false angustura* or false *cusparia bark*; *Rohun*. See *Brucea antidyenterica*.

The wood of *STRYCHNOS COLUBRINA*, *Modira caniram*, an Indian tree, which contains strychnia, was formerly considered a specific against the bites of venomous animals; and was recommended by Boerhaave in intermittents. It is the *Lignum Colubrinum*, (F.) *Bois de Couleuvre*.

Under the names *στρογγη*, and *στρογγυος*, different kinds of nightshade are described by Dioscorides.

STRYCHNOS IGNATII, *Ignatia amara*.

STRYCHNOS POTATORUM, *Clearing nut*. The fruit of a large tree of Silhet, which, when ripe, is sold in the markets of India, and has been introduced into those of London, under the name *Nirmullees* or *Nirmillies*. One of them is well rubbed for a minute or two around the inside of a vessel containing water, which it purifies by causing the impurities, which the fluid contains, to be deposited through its albumen and casein it is supposed.

STRYCHNOS PSEUDOQUI'NA, *Quina do Campo*, of Brazil, is used by the natives as a substitute for cinchona.

STRYCHNOS TIEUTÉ, see *Strychnia*, and *Upas* — s. *Toxicaria*, see *Toxifera*, and *Curare*.

STRYPHNA, *Astringents*.

STRYPHOS, *Acerb*.

STUDIOSUS MEDICINÆ, *Philiatrics*.

STUDIUM INANE, *Aphelxia otiosa*.

STUDY, *BROWN*, *Aphelxia otiosa*.

STUFF, see *Medicament*.

STUFFING, *Cynanche trachealis*.

STULTITIA, *Fatuitas*.

STUMP, (G.) *Stumpf*, (D.) *Stomp*, 'a stump;' also, 'blunt.' (F.) *Moignon*. The part remaining from which a limb or other part has been amputated or removed in any manner. Also, the portion of a tooth remaining in the alveolus, after the corona has been removed, (F.) *Chicot*.

STUMPOOT, *Kyllosis*.

STUNNED. Old French, *Estonné*, (F.) *Étonné*, (L.) *attonitus*, 'astonished.' An epithet, applied to one who, in consequence of a fall or other accident, has received such a concussion of the brain as to deprive him, for a time, of his mental manifestations.

STUPA, *στυπη*, *Stupha*, *Stuppa*, *στυπηη*, *Stupeion*. Tow, used in certain surgical apparatuses

and dressings, (F.) *Étoupe*. Also, a *Stupe*, that is, cloth or tow used in fomentations. A flannel or other article wrung out of hot water, plain or medicated, applied to a part, is a *stupe*. The act of applying such stupe is called *stuping*.

STUPE, *Stupa*.

STUPEFACIENTIA, *Narcotics*.

STUPEFACTIFS, *Narcotics*.

STUPEFACTIO, *Narcosis*.

STUPEFLIANTS, *Narcotics*.

STUPEION, *Stupa*.

STUPEUR, *Stupa*.

STUPHA, *Stove*, *Stupa*.

STUPIA, *Tin*.

STUPIDITAS, *Idiotism*, *Imbecility*.

STUPING, see *Stupe*.

STUPOR, *Eplex'is*, *Eplex'ia*, *Consternatio*, (Sc.) *Swarff*, *Swerf*, (F.) *Stupeur*, from *stupere*, 'to be stupefied.' Diminished activity of the intellectual faculties, often amounting to lethargy. It occurs in many affections, especially in the neuroses.

STUPOR, *Narcosis* — s. *Artium*, *Obdormitio* — s. *Dentium*, *Hæmodia* — s. *Formicans*, *Formication* — s. *Mentis*, *Fatuitas* — s. *Vigilans*, *Catalepsy*.

STUPPE, *Stupa*.

STUPRATIO, *Stuprum*.

STUPRUM, *Rape*, *Stupr'ation*, (F.) *Défloration*, *Viol*. Forcible and illicit enjoyment of a married or unmarried female. When committed upon the latter, which is most commonly the case, it is also called, *Défloration*, *Défloratio*, *Devirginatio*, *Vitiatio*, *Apanthis'mus*, &c. In judging whether rape has been committed under such circumstances, the state of the genital organs; the age of the individual; and the possibility of accidents and diseases of the parts, will have to be considered. It will be necessary, also, to be acquainted with the evidences of virginity; and to determine, — if signs of virginity no longer exist, — whether its loss be attributable to copulation, or to the introduction into the vagina of any other body than the male organ, &c. *Recent deflowering* can, of course, be much more readily distinguished than that which has taken place some time.

STUTTERING, *Balbuties*.

STYAN, *Hordeolum*.

STYE, *Hordeolum*.

STYGMATES. M. J. Cloquet has proposed this word, or *Stigmates*, from *στυγμα*, 'a mark,' to designate the marks, in form of cicatrices, which remain on the peritoneum after the obliteration of the neck of a hernial sac. They are, commonly, radiated folds, of a whitish appearance, more or less thick, and of a fibrous or fibro-cartilaginous nature.

STYLET, *Specillum*.

STYLI, *Styloid processes*.

STYLIFORM, *Styloid*.

STYLO, in composition, relating or belonging to the styloid process of the temporal bone.

STYLO-CERATOIDES, *Stylo-hyoideus* — s. *Cerato-hyoideus*, *Stylo-hyoideus*.

STYLO-CHONDRO-HYOÏDEUS. A name given, by Douglas and Albinus, to a fleshy fasciculus which the stylo-hyoid muscle sometimes presents, and which is attached to the lesser cornu of the os hyoides. It is the same fasciculus which Santorini calls *Stylo-hyoïdes novus*, *Stylo-hyoïdeus alter*.

STYLO-GLOSSUS. A muscle situate at the anterior and superior part of the neck. It is narrow behind, much broader before; is attached to the styloid process of the temporal bone, and to the stylo-maxillary ligament; and is inserted into the side of the tongue. It raises the base of the tongue and carries it backwards.

STYLO-HYOÏDEUS, *Stylo-cer'ato-hyoïdens*, *Stylo-ceratoï'des*, *Stylo-hyoïdes major*, (F.) *Stylo-hyoïdien*. A muscle, situate at the superior, anterior, and lateral part of the neck. It is thin and narrow,—especially posteriorly: anteriorly, it opens to give passage to the tendon of the digastricus. It is attached to the styloid process of the temporal bone, and to the body of the os hyoides. It raises the os hyoides, and carries it backwards.

STYLO-HYOID LIGAMENT is a fibrous, flattened cord, which passes from the styloid process to the lesser cornu of the os hyoides.

STYLO-HYOID NERVE is the second branch given off by the facial nerve.

STYLOID, *Styliform*, *Styloï'des*, *Graphioï'des*, *Graphoï'des*, *Graphioï'des*, *Graphidoï'des*, *Belonoï'des*, from *στυλος*, 'a style,' 'a peg,' 'a pin,' and *αἶδος*, 'shape.' Shaped like a peg or pin.

STYLOID CORNUA, see *Hyoides os*.

STYLOID PROC'ESSES, *Pencil-like Processes*, *Processus Beloïdes* seu *Belennoides* seu *Belonoï'des* seu *Graphioïdes* seu *Graphoï'des*, *Styli*, are, 1. A long and slender process of the temporal bone, to which are attached the stylo-glossus, stylo-pharyngeus, and stylo-hyoïdeus muscles, and the stylo-hyoid and stylo-maxillary ligaments. 2. Two slender and pyramidal processes at the inferior extremities of the radius and ulna.

STYLO-MASTOID, *Stylo-mastoides*. That which relates to the styloid and mastoid processes.

STYLO-MASTOID ARTERY arises from the posterior auricular, and, in some subjects, from the occipital. It enters the stylo-mastoid foramen; passes along the aqueduct of Fallopius, and spreads its ramifications on the mucous membrane of the tympanum, and in the mastoid cells, and semi-circular canals; and terminates by anastomosing with a branch of the *Arteria meningæa media*, which enters by the *Hiatus Fallopii*. Murray has given the name—*Stylo-mastoid*—to the posterior auricular artery itself.

STYLO-MASTOID FORAMEN, *Foramen Stylo-mastoidem* seu *Aqueductus Fallopii*, (F.) *Trou anoyne*, is situate at the inferior surface of the petrous portion of the temporal bone, between the styloid and mastoid processes. It terminates the aqueduct of Fallopius, and gives passage to the facial nerve.

STYLO-MAX'ILLARY, *Stylo-maxilla'ris*. That which relates to the styloid processes and jaw.

The **STYLO-MAXILLARY LIGAMENT** is a ligamentous, flat cord, extending between the styloid process and the angle of the jaw.

STYLO-PHARYNGEUS, (F.) *Stylo-thyropharyngien*. A muscle, situate at the anterior and lateral part of the neck. It is slender; thin above; attached to the styloid process of the temporal bone, and terminates in the parietes of the pharynx, as well as at the posterior margin of the thyroid cartilage. It raises the pharynx and carries it backwards. Professor Chaussier has united, under the name *Stylo-pharyngien*, the three constrictor muscles of the pharynx, the stylo-pharyngeus, and palato-pharyngeus.

STYLOPH'ORUM DIPHYL'LUM, *Meconopsis diphylla*, *Chelidonium diphyllum*, *Celandine* or *Horn Poppy*, *Bruiſe root*. An indigenous plant, of the family *Papaveraceæ*, growing from western Pennsylvania to Wisconsin, which flowers from May to August. The juice is fetid and narcotic. Infused in wine, it has been given internally in gravel: and has been applied externally to contusions, &c.

STYLO-THYRO-PHARYNGIEN, *Stylo-pharyngæus*.

STYLUS. Sound.

STYLUS EXCAVATUS, *Specillum excavatum*. A hollow sound.

STYMA, Erection, Priapismus.

STYMATOSIS, Stimatosis.

STYMATATA, from *στυμμα*, *στυμματος*, 'that which constricts or thickens.' The most solid ointments. Also, the ingredients proper for increasing their consistence.

STYPSIS, Astriction, Constipation.

STYPTERIA, Alumen, Styptics.

STYPTIC, see *Styptics*.

STYPTIC, BINELLI'S, *Aqua Binellii*—s. Brocchieri's, *Aqua Brocchierii*.

STYPTIC, EATON'S. A name first given to *Helvetius's Styptic*, when introduced into Great Britain. It is now usually made of calcined green vitriol, ζj ; *proof spirit*, tinged with a little oak bark, Oij.

STYPTIC, HELVETIUS'S, see *Ferrum tartarizatum*, and *Styptic, Eaton's*.

STYPTIC, PAGLIARI'S, *Hæmostatic, Pagliari's*.

STYPTIC, RUSPINI'S, *Liquor Stypticus Ruspini*. A nostrum, said to consist of *gallic acid*, a small quantity of *sulphate of zinc* and *opium*, dissolved in a mixture of *alcohol* and *rose-water*, which has had much reputation as an internal and external astringent.

STYPTICS, Contrahentia, Constrictiva Medicamenta, Constringentia, Anostaltica, Catastaltica, Stypteria, (F.) *Styptiques*, from *στυπτω*, 'I constringe.' Sometimes used synonymously with astringent, but generally applied to a substance employed to arrest hemorrhage.—*Enæ'mon*. A *mechanical styptic* is one that arrests the flow of blood, by being applied immediately to the mouth of the bleeding vessel, or by inducing a coagulum, *mechanically*, in it. A *chymical styptic* is one which coagulates, *chymically*, the blood around a bleeding orifice.

STYRAC'INUM O'LEUM. Oil obtained by boiling storax in good olive oil.

STYRAX, *στυραξ*. A resin obtained from *Styrax officinalis* and *S. calamita*. It is the *solid storax*;—*officinal storax*. There are two kinds of storax met with: 1. *Red Storax, Gum Storax, Thus Judæorum, Styrax rubra, Styracis balsamum, Balsamum styracis officinalis*, which is obtained by incision from the *Styrax officinalis*, and perhaps from the *Liquidambar Orientalis*. The purest is in tears; but it has lost some of its smell in drying. 2. *Common Storax, Styrax calamita*. That which has been received in reeds or vessels, and has had saw-dust added immediately to thicken it. The odour of storax is fragrant; the taste aromatic. It is considered, like the other balsams, to be stimulant and expectorant, but is rarely used long.

PURIFIED STYRAX, *S. cola'ta* seu *purifica'ta*, *S. prepara'ta*, *Extractum styracis*, is prepared by dissolving storax in alcohol; straining the solution; then distilling off the alcohol with a gentle heat, until the storax acquires the proper consistence.—Ph. U. S. Dose, gr. x to xxx.

STYRAX ALBA, see *Myroxylon Peruiferum*—s. *Benzoïn*, see *Benjamin*—s. *Calamita*, see *Styrax*—s. *Liquida, Liquidambar styraciflua*—s. *Officinalis*, see *Styrax*.

STYSIS, Erection, Priapismus.

SUAVEOLENS, Beneolens.

SUB. A common Latin prefix, often signifying 'beneath,' or 'a lower degree.'

SUBACIDUS, Acidulous.

SUBAC'TIO, *Chiro'sis, Cheiro'sis*, from *subigo, subactum*, (*sub*, and *ago*), 'to subject, to prepare.' The operation of making plasters, extracts, &c., with the hand, or with the pestle and mortar.

SUBAFFECTIO, Hypodpathia.

SUBAGITATRIX, *Tribade*.

SUB-ATLOÏDEUS, *Infra-atloïdeus*, (F.) *Sous-atloïdien*. That which is situate beneath the

atlas or first cervical vertebra. Chaussier has given this name to the second pair of cervical nerves.

SUB-AXOÏDEUS, *Infra-axoïdeus*, (F.) *Sous-axoïdien*. That which is below the *axis* or *vertebra dentata*. Chaussier has given this name to the third pair of cervical nerves.

SUBAZOTAS BISMUTICUS, Bismuth, subnitrate of.

SUBBORAS NATRICUM, Borax.

SUBCARTILAGINEUM, Hypochondre.

SUBCLAVIAN, *Subclavins*, *Subclavicula'ris*, from *sub*, and *clavis*, 'the clavicle.' That which is under the clavicle.

SUBCLAVIAN ARTERIES, (F.) *Artères sous-clavières*, are situate at the upper part of the chest, and the lateral and lower parts of the neck. The right arises at the corresponding side of the trachea, and comes off from the arteria innominata or brachio-cephalic trunk. The left leaves the aorta at the end of the arch. Both extend as far as the superior surface of the first rib, in the space between the scaleni muscles, beyond which they take the name *axillary arteries*. The subclavian arteries run, for some distance, without sending off any branch. In the neighbourhood of the first rib, however, they give off, 1. *Upwards*, the *vertebral* and *inferior thyroïdeale*. 2. *Downwards*, the *internal mammary* and *superior intercostal*. 3. *Outwards*, the *transverse cervical* or *posterior scapular*, the *superior scapular*, and the *posterior cervical* or *profunda*.

SUBCLAVIAN or **SUBCLAVIUS MUSCLE**, *Subclavia'nus*, (F.) *Costo-claviculaire* (Ch.), *Sous-clavier*, is situate at the superior and anterior part of the chest. It is attached, by its inner extremity, to the superior surface of the cartilage of the first rib; and by its superior margin and outer extremity to the inferior surface of the clavicle. This muscle depresses the clavicle, and carries it forward. When the shoulder is fixed, it can raise the first rib.

SUBCLAVIAN VEINS, (F.) *Veines sous-clavières*, are continuations of the axillary, and extend from the inferior extremity of the scalenus anticus, in front of which they pass, to the vena cava superior, which they form by their union. The right subclavian vein is very short; the left, longer and broader. These veins receive the mouths of the internal and external jugulars, vertebral and superior intercostal. The left subclavian receives two veins more than the right,—the left internal mammary and left inferior thyroid. The thoracic duct opens into the left subclavian:—the corresponding great lymphatic vessel into the right.

SUBCLAVIC'ULA, from *sub*, and *clavicula*, 'the clavicle.' The first rib.

SUBCLAVICULARIS, Subclavian.

SUBCLAVIUS, Subclavian muscle.

SUBCRUEN'TUS, 'somewhat bloody;' from *sub*, and *cruentus*, 'bloody;' *Hyphe'mos*. That which has the colour and nature of blood. An epithet given to certain excreted substances, which are mixed with blood, or have the appearance of blood.

SUBCRURÆI, see *Cruræus*.

SUBCUTA'NEOUS, *subcutaneus*, from *sub*, and *cutis*, 'the skin;' *Intercuta'neus*, (F.) *Sous-cutané*. That which is placed immediately under the skin.

SUBCUTANEOUS SECTION, Hypodermatomy.

SUBCUTANEOUS COLLI, *Superficialis colli*—s. *Malæ* (Nervus), Orbital nerve.

SUBDELIRIUM, Typhomania.

SUB'DITA, *Subditiv'ia*, from *subdere*, (*sub*, and *dare*), 'to put under;' *Pros'theta*. Medicines introduced into some one of the natural apertures:—as suppositories, pessaries, &c.

SUBDITITIA, Subdita.

SUBDUCTIO, Dejection.

SUBER, *Cork*:—the bark of the *Quercus Suber* or *Cork Tree*, (F.) *Liège*. *Family*, Amentaceæ. *Sex. Syst.* Monoecia Polyandria. *Cork*, when burnt, is applied as a mechanical styptic to bleeding piles, &c. Surgeons use it for making tents; and it has been recommended to be worn as an amulet to suppress the secretion of milk!

SUBETH, Coma.

SUBFRONTALIS SUTU'RA, from *sub*, and *frons*, *frontis*, 'the forehead.' A suture resulting from the articulation of the *os frontis* with the nasal process of the superior maxillary bone, and the proper bones of the nose.

SUBGRONDATION, Depression.

SUBHUMERATIO, Catonismos.

SUBIGITATRIX, Tribas.

SUBINFLAMMATIO, Subinflammation—s. *Hepatis*, *Hepatitis*, chronic.

SUBINFLAMMATIO, *Subinflamma'tio*, from *sub*, and *inflammatio*. *Inflammati'culo*, *Hypophlegma'sia*. A mild degree of inflammation, so slight as hardly to deserve the name *inflammation*. Broussais understood by the term, an augmentation in the vital phenomena of the vessels that convey white blood. There are, however, no such vessels. Lymphatic engorgements, serofula, herpes, and cancer be considered subinflammations.

SUBINTRAN'TES FEBRES, from *sub*, and *intrare*, 'to enter.' *Communican'tes febres*. Fevers primarily intermittent, whose paroxysms approximate, so that one paroxysm begins before that which preceded it has gone through its stages.—L. Bellini.

SUBJECTIVE SENSATIONS, see *Sensation*.

SUBJEE, Bangué.

SUBLIGACULUM, Truss.

SUBLIGATURA, Truss.

SUBLIMENTUM, Enæorema.

SUBLIMATE, **CORROSIVE**, *Hydrargyri oxymurias*.

SUBLIMA'TION, *Sublima'tio*, *Meteoris'mus*, *Hypso'sis*, from *sublimis*, 'exalted.' An operation by which dry and solid matters are volatilized and condensed at the upper part of a subliming apparatus. Calomel, sal ammoniac, &c., are commonly obtained by sublimation. The product of sublimation is a *Sub'limata Sublimata*, (F.) *Sublimé*.

SUBLIMATUM CORROSIVUM, *Hydrargyri oxymurias*.

SUBLIMATUS CORROSIVUS, *Hydrargyri oxymurias*.

SUBLIME, *Sublimis*.

SUBLIMÉ, Enæorema, *Sublimate*—s. *Corrosif*, *Hydrargyri oxymurias*.

SUBLIMIS, (F.) *Sublime*, 'high, elevated, superficial.' Anatomists have given the name *sublimis* to certain muscles, which are situate more superficially than their kindred muscles. These last they have called *profundi*. Of the former, the *flexor sublimis digitorum* is an example.

The French use the term *respiration sublime* for the respiration which is accompanied by considerable elevation of the ribs, and with separation of the *alæ nasi* at the time of inspiration.

SUBLINGUA, Uvula.

SUBLIN'GUAL, *Sublingua'lis*, (F.) *Souslingual*, from *sub*, and *lingua*, 'the tongue.' That which is seated under the tongue.

SUBLINGUAL ARTERY, with some, is the *Lingual*. With others, it is a branch given off by the lingual opposite the genio-glossus muscle, which is distributed particularly to the sublingual gland, to the mylo-hyoid, and genio-glossus muscles, &c.

SUBLINGUAL GLAND, *Glan'dula sublingua'lis* seu *Bartholinia'na* seu *Rivinia'na*, is seated in the substance of the inferior paries of the mouth.

beneath the anterior part of the tongue. It is smaller than the submaxillary, of which it frequently seems to be only a prolongation. It is oblong, flattened, amygdaloid, and is covered by the mucous membrane of the mouth, beneath which it projects. This gland has 10 or 12 excretory ducts—*Ductus Rivinici* seu *Waltheriani*—some of which open beneath the frænum lingue, joining Wharton's duct, whilst others pierce the mucous membrane of the mouth separately. It has the same structure as the parotid.

SUBLINGUIUM, Uvula.

SUBLINGUIUM, Epiglottis.

SUBLOB'ULAR, *Sublobularis*; from *sub*, and *lobus*, 'a lobe,' *lobulus*, 'a little lobe.' That which is placed under a lobe.

SUBLOBULAR VEINS OF THE LIVER. The veins in which the intra-lobular veins terminate. By their union, the sublobular veins form the hepatic veins.

SUBLUXATIO, Sprain.

SUBMAMMARY, *Submammaris*, (F.) *Sous-mammaire*, from *sub*, and *mamma*, 'the breast.' Under the mamma or breast:—hence, '*submammary* inflammation,' inflammation of the areolar tissue beneath the mamma.

SUBMAXILLARY, *Submaxillaris*, *Infra-maxillaris*, (F.) *Sous-maxillaire*, from *sub*, and *maxilla*, 'the jaw.' That which is seated beneath the jaw.

SUBMAXILLARY GANGLION is a small nervous ganglion, situate opposite the gland. It seems to be formed by the superior branch of the Vidian nerve, and communicates with the lingual nerve of the inferior maxillary. Its filaments form a plexus which penetrates the submaxillary gland.

SUBMAXILLARY GLAND, *Maxillary Gland*, *Hypognath'aden*, *Hyposial'aden*, is a salivary gland, less than the parotid, seated at the inner side of the ramus and body of the inferior maxillary bone, in the triangular space between the two bellies of the digastricus. Irregularly ovoid, and flattened on three surfaces, it has the same aspect and organization as the other salivary glands. Its excretory duct is called *Wharton's Duct*, and terminates at the side of the frænum lingue; by a very small orifice. It is also called *Ductus inferior*.

SUBMENTAL, *Submentalis*, (F.) *Sousmental*, from *sub*, and *mentum*, 'the chin.' Situate under the chin.

SUBMENTAL ARTERY is furnished by the facial, near the base of the jaw. It passes forwards along the attachment of the mylo-hyoideus, to which it furnishes branches that cross it to anastomose with those of the sublingual. Near the median line it bifurcates, to be distributed to the chin and muscles of the infra-hyoid region.

SUBMENTAL VEIN, which accompanies the artery, opens into the labial.

SUBMERSION, *Submersio*, from *sub*, and *mergere*, *mersum*, 'to plunge.' The act of plunging, or being entirely plunged, in a liquid.

Asphyxia by submersion, *A. Immersorum*, *Drowning*, is not owing to a certain quantity of liquid being introduced into the alimentary or air-passages; but simply to the interception of air, and of the respiratory phenomena. It is a case of suffocation, the signs of which, on dissection, are equivocal, without circumstantial evidence.

SUBMISSIO, Remission—s. Cordis, Systole.

SUBMU'COUS, *Submucosus*; from *sub*, and *mucos*. Under a mucous membrane,—as the '*submucous* areolar tissue.'

SUBMURIAS AMMONIACO-HYDRARGYRICUS, *Hydrargyrum præcipitatum*.

SUBMUS'CLAR, *Submuscularis*; from *sub*,

and *musculus*, 'a muscle.' Seated beneath muscles or a muscular layer.

SUBOCCIPI'TAL, *Suboccipitalis*; from *sub*, and *occiput*. That which is situated under the occiput.

SUBOCCIPI'TAL NERVE, Occipital nerve.

SUBORBITAR, *Suborbitarius*, *Infra-orbitar*, *Infra-orbitalis*, *Infra-orbitaria*, (F.) *Sous-orbitaire*, from *sub*, and *orbita*, 'the orbit.' That which is seated beneath the orbitar cavity.

SUBORBITAR ARTERY, *Infra-orbitar A.*, proceeds from the internal maxillary, from which it separates near the anterior and superior part of the zygomatic fossa. It enters the infra-orbitar canal, and passes through it, giving branches to the anterior and superior dental canal; issues by the foramen infra-orbitarium; and divides, in the fossa canina, into a number of branches, which lose themselves in the neighbouring parts. The infra-orbitar vein follows the same course.

SUBORBITAR CANAL, *Infra-orbitar Canal*, (F.) *Canal ou Conduit sous-orbitaire*, is a small canal, which runs obliquely through the substance of the inferior paries of the orbit. It begins, behind, by a simple gutter, and divides, anteriorly, into two branches, one of which descends into the anterior paries of the maxillary sinus, whilst the other passes out, in the canine fossa, by an orifice, called *Foramen-infra-orbitarium*, (F.) *Trou sous-orbitaire*. The infra-orbitar artery and nerve pass along it.

SUBORBITAR FISSURE, *Infra-orbitar Fissure*, *Fissura infra-orbitalis*, *Rima canalis orbitarii*. A fissure in the superior maxillary bone; the superior commencement of the suborbitar canal.

SUBORBITAR FOSSA, Canine fossa.

SUBORBITAR NERVES, *Infra-orbitar Nerves*, seem to terminate the superior maxillary. They issue from the infra-orbitar canal by the foramen of the same name, and spread out in a radiated manner in the fossa canina, to divide into *superior* or *palpebral filaments*, *inferior* or *labial*, *internal* or *nasal*, and *external* or *buccal*.

SUBPERITONE'AL, *Subperitonealis*; from *sub*, and *peritoneum*. That which lies under the peritoneum.

SUBPERITONEAL APONEUROSIS, Fascia, subperitoneal—s. Ganglia, see Spermatic ganglion.

SUBPLACENTA, Decidua membrana.

SUBPOPLITE'US, Popliteus muscle.

SUBPUBIC ARCH, *Arcus subpubicus*, from *sub*, and *pubis*. A strong arch of the superior pelvic aponeurosis, which completes the posterior orifice of the obturator or subpubic canal.

SUBPUBIC MEMBRANE, Obturator membrane.

SUBPUBIO-FEMORALIS, Abductor brevis—s. Prostaticus, Compressor prostatae.

SUBPURATIO, Suppuration.

SUBPUTRIS, Hyposaprus.

SUBSCAP'ULAR, *Subscapularis*, (F.) *Sous-scapulaire*, *Sous-scapulo-trochiniën*, from *sub*, and *scapula*, 'the shoulder-blade.' That which is beneath the scapula.

SUBSCAPULAR FOSSA, *Fossa Subscapularis*. A considerable excavation at the anterior surface or venter of the scapula, in which the subscapularis is seated.

SUBSCAPULAR MUSCLE, *Subscapularis Muscle*, *Immersus*, *Infra-scapularis*, (F.) *Sous-scapulo-trochiniën* (Ch.), *Porte-feuille*, *Muscle-sous-scapulaire*. A muscle situate in the above-mentioned fossa. It is flat, broad, and triangular; is attached, by its base, to the subscapular fossa and to the anterior lip of the edge of the spine of the scapula, and is inserted into the lesser tuberosity of the humerus. It carries the arm in rotation inwards. It can also depress it, and bring it towards the body.

SUBSCAP'ULAR NERVES are two in number.

One arises from the brachial plexus above the clavicle; the other from the posterior aspect of the plexus within the axilla. They are distributed to the subscapularis muscle.

SUBSEROUS, *Subserosus*; from *sub*, and *serous*. Under a serous membrane,—as the 'subserous areolar tissue.'

SUBSIDENTIA, Sediment.

SUBSTANCE ÉMAILLÉE DES DENTS, Enamel of the teeth — s. Horny, see Tooth.

SUBSTANCE, HYALINE, Cytoblastema — s. Inter-cellular, Cytoblastema — s. *Vitrée des Dents*, Enamel of the teeth.

SUBSTANCE, WHITE, OF SCHWANN. A hollow cylinder within the tubular nervous fibre, which differs in composition and refracting power from the matter that occupies the centre of the tube.

SUBSTANTIA ADAMANTINA DENTII, Enamel.

SUBSTANTIA FERRUGIN'EA, *Locus cinereus*. An ash coloured substance, produced by the existence of well marked pigmentary matter in the floor of the ventricle or *rhomboïd fossa*.

SUBSTANTIA FILAMENTOSA DENTII, Enamel — s. *Grisea Centralis*, see *Medulla spinalis* — s. *Hyalina*, Cytoblastema — s. *Nigra pedunculi*, see *Peduncles of the brain* — s. *Ossa dentium*, see *Tooth* — s. *Ostoides*, see *Tooth* — s. *Perforata anterior*, *Locus perforatus anticus*.

SUBSTANTIA PERFORATA MEDIA. When the pia mater has been removed from the space between the crura cerebri, termed the *intercrural* or *interpuncular*, the surface appears cribriform from the perforations of the numerous minute vessels which penetrate it. This is the *substantia perforata media* of Vicq d'Azyr.

SUBSTANTIA PERFORATA POSTERIOR, see *Tarini pons* — s. *Pulposa Dentis*, *Dental pulp* — s. *Radiata*, *Stellula Verheyenii* — s. *Rhomboidea*, *Corpus dentatum* — s. *Spongiosa Urethrae*, *Corpus spongiosum urethrae* — s. *Stellata serpentina*, *Stellula Verheyenii* — s. *Vitrea dentium*, *Enamel of the teeth* — s. *Vitrea*, *Cytoblastema* — s. *Vitrea dentium*, *Enamel*.

SUBSTANTIVE, *Substantivus*; from *sub-stare*, (*sub*, and *stare*), 'to stand under or subsist.' An epithet applied by Dr. Paris to aliments which are nutritious, in contradistinction to *adjective* aliments, which are themselves not possessed of nutritive virtues, but impart to the digestive organs greater energy, so as to enable them to extract more nutriment from the substantive aliments. Meat, for example, is a *substantive* aliment: the condiment, as mustard, eaten with it, an *adjective* aliment.

SUBSTILLUM, *Sillucidium*.

SUBSULTIO, *Palpitation*.

SUBSULTUS TENDINUM, *Saltus tendinum*, *Clonus subsultus*, *Subsultus*, *Carpolog'ia spasmodica*, *Myopal'mus*, *Twitching of the Tendons*, (F.) *Soubresaut*, from *subsilio*, *subsultum*, (*sub* and *salio*) 'to make short leaps.' Twitching, communicated to the tendons by the involuntary and instantaneous contraction of the muscular fibres. It is more observable at the wrist than elsewhere; and is an evidence of great cerebral irritability, and debility, when it occurs at an advanced period of fever.

The muscular agitations or twitchings observed in febrile diseases, especially of children, have been termed *Convulsibilitas*, *Scleroty'bbē febrilis*, and *Irritabilitas morbo'sa*.

SUBSURDITAS, *Deafness*.

SUBUBERES, from *sub*, and *ubera*, 'the breasts.' *Infantes sugetes*, *Sucking children*. Infants at the breast, in contradistinction to *Ecu'beres*, *αρογαλακτοι*, or those which have been weaned.

SUBUNGUAL, *Subungual*, *Subunguical*, (F.) *Sous-ungéale*, from *sub*, and *unguis*, 'a nail.' Belonging to parts under the nail;—as *subunguical exostosis*, (F.) *Exostose sous-ungéale*, an exostosis under the nail of the great toe especially.

SUBVERSIO STOMACHI, *Vomiturition*.

SUBVERTEBRA, *Sacrum*.

SUBVERTEBRUM, *Sacrum*.

SUBVOLA, *Hypothénar*.

SUC, *Succus* — s. *de Citron*, see *Citrus medica* — s. *Gastrique*, *Gastric juice* — s. *de Kino*, *Kino* — s. *Médullaire*, *Marrow* — s. *du Limon*, see *Citrus medica* — s. *Nourricier*, *Liquor sanguinis* — s. *Pancréatique*, see *Pancreas*.

SUCCA'GO, from *succus*, 'juice.' The inspissated juice of plants; robs, jellies, &c.

SUCCÉDANÉ, *Succedaneum*.

SUCCEDA'NEUM, *Succida'neum*, *Substitutum*, *Antiballem'enum*, *Surroga'tum*, *Antenballo'enum*, *Quid pro quo*, from *succedere*, (*sub*, and *cedere*), 'to go under, to come in place of another.' (F.) *Succédané*. An epithet for medicines that may be substituted for others possessing similar properties. Also, used, in dentistry, for an amalgam for filling teeth.

SUCCENTURIA'TUS, from *succenturiare*, (*sub*, and *centuria*), 'to supply a soldier to fill a vacancy;' and hence, 'to substitute or put in the room of.' That which is a substitute for another; as *Renes succenturiati*, *Ventriculus succenturiatus*, &c.

SUCCHAR, *Saccharum*.

SUCCIDANEUM, *Succedaneum*.

SUCCIN, *Succinum*.

SUCCINCTURA, *Diaphragm*.

SUCCINCTUS, *Diaphragm*.

SUCCINI RESINA, *Musk*, *artificial*.

SUCCIN'IC ACID, *Ac'idum Succ'ini*, *A. Succin'icum*, *Acor Succin'eus*, *Sal Succini*, *Sal volat'ilè Succini*, has been considered antispasmodic and diaphoretic, in the dose of from five to twenty grains.

SUC'INUM, *Electrum*, *Ambra*, *Ambrom*, *Ampar*, *Beren'ice*, *Amber*, *Yellow Amber*, (F.) *Succin*, *Ambre jaune*, from *succus*, 'juice,' because at one time supposed to exude from a tree. This kind of fossil resin, which is found on the shores of the Baltic, is composed of a resinous matter, of essential oil, and an acid *sui generis*. It is inodorous, except when heated or rubbed; insipid; in fragments of a pale golden-yellow colour, transparent, and has a shining lustre. S. g. 1.08; insoluble in water, and slightly acted on by alcohol. It is used for affording its essential oil — the *O'leum seu Balsanum Succ'ini*, (F.) *Huile de Succin*. This oil possesses stimulant, antispasmodic, diuretic, and rubefacient properties.

The *O'leum Succ'ini rectificatum*, *Rectified Oil of Amber*, is made as follows:—*Oil of Amber*, Oj; *water*, Ovj. Mix in a glass retort, and distil until Oiv of the water have passed with the oil into the receiver; separate the oil from the water, and keep it in well-stopped bottles.—(Ph. U. S.)

The *White amber*, *Leucelectrum*, (F.) *Ambre blanc*, is a variety.

SUCCINUM CINEREUM, *Ambergris* — s. *Griseum*, *Ambergris*.

SUCCION, *Sucking*.

SUCCISA, *Scabiosa succisa* — s. *Pratensis*, *S. succisa*.

SUCCOCOLLATA, *Chocolate*.

SUCCOLATA, *Chocolate*.

SUCCORY, *WILD*, *Cichorium intybus*, *Chironia angularis*.

SUC'COTASH, *Suck'atash*. A term of Indian derivation. A favorite dish in New England, formed of *green Indian corn* and *beans* boiled together.

SUC'CUBUS, from *sub*, and *cubare*, 'to lie.' Some authors have used this word synonymously with nightmare. Others mean by it a female phantom, with which a man in his sleep may believe he has intercourse; — as *Incubus* has been applied to the male phantom, with which a female may dream she is similarly situate.

SUCCUS, *Chylus*, *Opos*, *Opis'ma*, *Chylis'ma*, *Eechylo'ma*, *Apothlim'ma*, *Juice*, (F.) *Suc*, from *sugere*, *suctum*, 'to suck.' The fluid obtained by pressing plants, flesh, &c.; *Succus expressus*, *Opolé* (official), *Opolide* (magistral), according to Chéreau. It is, also, applied to certain animal fluids, as *S. Gastricus*, &c.

SUCCUS ACACLE GERMANICÆ INSPISSATUS, see *Prunus spinosa* — *s. Acaciae nostratis*, see *Prunus spinosa* — *s. Arborum*, *Sap* — *s. Cicutæ spissatus*, *Extractum conii* — *s. Cyrenaicus*, *Laserpitium*.

SUCCUS ENTERICUS, *S. Intestinalis*, *Liquor intestinalis seu entericus*, *Intestinal Juice*. The fluid copiously secreted from the lining membrane of the small intestines.

SUCCUS EXPRESSUS, *Apothlimma* — *s. Gastricus*, *Gastric juice* — *s. Glycyrrhizæ*, *Extractum glycyrrhizæ* — *s. Hypocistidis*, see *Cytinus* — *s. Intestinalis*, *Succus entericus* — *s. Japonicus*, *Catechu* — *s. Limonis*, see *Citrus medica* — *s. Liquiritiæ*, *Extractum glycyrrhizæ* — *s. Nervous*, *Nervous fluid* — *s. Nutritius*, *Chyle* — *s. Orni concretus*, see *Fraxinus ornus* — *s. Pancreaticus*, see *Pancreas* — *s. Spissatus Aconiti Napelli*, *Extractum aconiti* — *s. Spissatus atropæ belladonnæ*, *Extractum belladonnæ* — *s. Spissatus conii maculati*, *Extractum cicutæ* — *s. Spissatus hyoseyani nigri*, *Extractum hyoseyani* — *s. Spissatus lactuæ sativæ*, *Extractum lactuæ*.

SUCCUS'SION, *Succus'sio*, *Hippocrat'ic Succus'sion*, from *succutio*, *succussum*, (*sub*, and *quatio*), 'I shake from beneath.' A mode of ascertaining the existence of a fluid in the thorax, (*fluctuation by succussion*;) by giving the body one or more slight shakes.

SUCCUSSIO, *Ballotement*.

SUCHOR, *Saccharum*.

SUCKATASH, *Sucotash*.

SUCKING, *Suc'tio*, *Suctus*, *Athelæ'is*, *Bdalsis*, *Myzæ'sis*, (F.) *Succion*, from *sugere*, *suctum*, 'to suck.' The act of drawing liquid into the mouth, by forming a vacuum with the tongue acting as a piston, during inspiration.

SUCKING BOTTLE. A bottle so formed, that, when filled with milk, it can be sucked from instead of the breast.

SUCKING CHILD, *Lactens*. A suckling.

SUCKLE, *Lactare*, *γαλακτορροφειν*, *τιθησκειν*, (F.) *Allaiter* ou *Alaiter*. Same etymon. To give suck. To nurse.

SUCKLING, *Lactation*, *Lonicra periclymenum*, *Sucking child*.

SUC'ERE, *Saccharum* — *s. Candi*, *Saccharum candidum* — *s. du Foie*, see *Saccharum* — *s. de Lait*, *Sugar of milk* — *s. de Saturne*, *Plumbi superacetat* — *s. Tors*, *Penidium*.

SUCTIO, *Exsuctio*, *Sucking*.

SUCTION POWER. The force exerted on the blood in the veins, by the active dilatation of the heart. See *Derivation*.

SUCTO'RIA, from *sugere*, *suctum*, 'to suck.' Animals provided with mouths for sucking. Also, organs for sucking or adhesion, — hence termed *suctorial* — as *suctorial oscula*.'

SUCTORIAL, see *Suctoria*.

SUCTUS, *Sucking*.

SUDAM'INA, *Hydro'ata*, *Hidro'ta*, *Pap'ula sudoral'es*, *Sufferæ'uræ*, *Aihæ'sef*, *Planta noctis*, *Boa*, from *sudor*, 'sweat.' Small vesicles, which appear upon the skin, especially in the summer time, in hot countries, and in diseases attended

with much sweating. It is a miliary eruption. See *Miliary fever*.

SUDAMINA, *Desudatio*, *Échauboulures*, *Lichen tropicus*.

SUDARIUM, *Achicolum*.

SUDATIO, *Ephidrosis*.

SUDATIUNCULA, *Ephidrosis*.

SUDATORIA, *Hidrosis* — *s. Maligna*, see *Sudor Anglicus*.

SUDATORIUM, *Achicolum*.

SUDATORY, *Achicolum*.

SUDOR, *ἰδρωσ*, *Hidros*, (F.) *Sueur*, 'sweat.' The product of cutaneous transpiration, when visible on the surface of the body. It is colourless; of an odour more or less strong and variable; and of a saline taste. It is composed, according to Berzelius, of water, lactic acid, lactate of soda united with a little animal matter, chloride of sodium, and a little chloride of potassium, an atom of earthy phosphate, and some oxyd of iron.

SUDOR, *Miliary fever*.

SUDOR AN'GLICUS, *Hidron'osus*, *Hidrop'ya*, *Hidropyr'etos*, *Febris* seu *Miliaris sudatoria*, *Sudor miliaris*, *Morbus sudatorius*, *Ephem'era maligna* seu *sudatoria* seu *Britan'nica* seu *An'glica pestilens*, *Pestis Britannica*, *Sudatoria maligna*, *Sweating Sickness*, *Sweating Fever*, (F.) *Suette*, *S. Miliare*, *S. Epidémique*, *Sueur Anglaise*. A very severe epidemic disease, characterized by profuse sweating, which appeared in England in 1486; and recurred, at different times, until about the middle of the 16th century. It was accompanied with coldness, excessive prostration of strength, palpitation, frequency and inequality of the pulse, &c., and terminated favourably or unfavourably in the course of 24 hours. The French have given the name *SUETTE DE PICARDIE*, *Suette des Picards*, *Fèvre suante*; *Miliaris sudatoria*, *Sudor Picard'icus*, to an epidemic disease, which has appeared several times in that province; the principal symptoms of which were profuse sweats and a miliary eruption. The disease recurred in 1821, and has been described, at length, by M. Rayer, who considers it to consist of a simultaneous state of inflammation of various tissues; and proposes to class it with variola, scarlatina, and measles.

A form of it, in which the perspiration was of a black colour, was called *Sudor An'glicus niger*, *Melanephidrosis*, *Black English Sweating sickness* or *fever*.

SUDOR COLLIQUATIVUS, *S. Profusus*.

SUDOR CRUEN'TUS, *S. sanguin'us*, *Hæmatidros'is*, *Hæmathidros'is*, *Ephidros'is cruen'ta*, *Hæmorrhag'ia per Cutem*, (F.) *Hématidrose*, *Sueur de Sang*; *Sweating of blood*, *Bloody sweat*, *Hæmorrhage from the skin*. Cutaneous perspiration intermixed with blood: — a very uncommon affection.

SUDOR DULCIS, *Saccharorrhœ'a cuta'nea*, *Ephidros'is sacchar'ita*. A discharge of saccharine matter by perspiration.

SUDOR LOCALIS, *Meridrosis* — *s. Miliaris*, *Miliary fever*, *Sudor Anglicus* — *s. Partialis*, *Meridrosis*.

SUDOR PROFU'SUS, *S. Colliquati'vus*. A profuse or immoderate sweat.

SUDOR SANGUINEUS, *Sudor cruentus* — *s. Universalis*, *Panhidrosis*.

SUDORIFER, *Sudoriferous*, *Sudorific*.

SUDORIF'EROUS, *Sudor'ifer*, *Hydroph'orus*, from *sudor*, and *fero*, 'I carry.' That which carries sweat, as the *sudoriferous* ducts or glands.

SUDORIF'IC, *Sudorificum*, *Sudor'ifer*, *Hidrot'icum*, *Hidrot'erium*, *Hidrotop'um*, *Hidropoët'icum*, (F.) *Sudorifique*, from *sudor*, and *facio*, 'I make.' A medicine which provokes sweating. See *Diaphoretic*.

FOUR SUDORIFIC WOODS, *Quat'vor ligna sudorifica*, were, formerly, *guaiacum*, *perfumed cherry*, *sarsaparilla*, and *sassafras*.

SUDORIPAROUS, see Perspiration.

SUDORIS NULLITAS, Anidrosis — s. Privatio, Anidrosis — s. Suppressio, Ischidrosis.

SUET, Sebum.

SUETTE, Sudor Anglicus — s. *Epidémique*, Sudor Anglicus — s. *Miltaire*, Sudor Anglicus — s. *de Picardie*, Sudor picardicus — s. *des Picards*, Sudor picardicus.

SUEUR, Sudor — s. *Anglaise*, Sudor Anglicus — s. *d'Expression*, Expression, sweat of — s. *de Sang*, Diapedesis, Sudor cruentus — s. *Urineuse*, Uridrosis.

SUFFERSURÆ, Sudamina.

SUFFIMEN, Suffimentum.

SUFFIMENTUM, *Hypocapnis'ma*, *Suffi'men*, *Thymia'ma*, *Suffi'tus*, *Suffumigatio*, *Suffumigatio*, (F.) *Parfum*; from *suffio*, 'I perfume.' A perfume; suffumige; fumigation.

SUFFITIO, Fumigation.

SUFFITUS, Fumigation, Suffimentum.

SUFFLATIO, Puffiness.

SUFFOCATIO, Suffocation, Orthopnoea — s. *Hypochondriaca*, *Hypochondriasis* — s. *Hysterica*, *Angone* — s. *Stridula*, *Cynanche trachealis* — s. *Uterina*, *Angone*.

SUFFOCATION, *Suffocatio*, *Præfocatio*, *Apopnæ'is*, *Asphyx'ia*, *Melanæ'ma*, from *sub*, and *falx*, pl. *fauces*, 'the jaws.' Death, or suspended animation from impeded respiration, whether caused by the *inhalation of noxious gases*, *drowning*, *hanging*, *strangling*, or *smothering*. The principal morbid appearances in such cases are: — the lungs of a deep-blue colour, with the blood extravasated in the air-cells; right auricle and ventricle filled with dark blood, as well as the neighbouring veins; lividity of the countenance, turgescence, and, perhaps, rupture of the vessels of the brain.

Treatment of suspended animation by suffocation in general. The patient must be conveyed into a room not too warm. Blood-letting must be used, if at all, with caution; — friction must be employed with salt, or warm flannels; stimulating fluids, in a dilute state, be poured into the stomach by means of a tube, and attempts be made to inflate the lungs. Laryngotomy, if necessary.

SUFFOCATION, *Pnigoph'bia*, (F.) *Étouffement*, is used, as *strangling* is, for threatened suffocation. It means the state of dyspnoea and oppression experienced when a sufficient quantity of air does not enter the lungs, or when the chemical phenomena of respiration are imperfectly executed; as in cases of asthma.

SUFFOCATION UTÉRINE, *Angone*, *Hysteria*.

SUFFRAGO, Poples.

SUFFUMIGATION, Suffimentum.

SUFFUMIGE, Suffimentum.

SUFFUMIGIUM, Fumigation.

SUFFUMINATIO, Fumigation.

SUFFUSIO, Pseudoblepsia — s. *Auriginosa*, *Icterus* — s. *Bilis*, *Icterus* — s. *Colorans*, *Chromopsia* — s. *Dimidians*, *Hemiopia* — s. *Exclarans*, *Oxyopia* — s. *Fellis*, *Icterus* — s. *Lentis crystallinæ*, *Cataract* — s. *Metamorphosis*, *Metamorphopsia* — s. *Multiplicans*, see *Diplopia* — s. *Myodes*, *Metamorphopsia* — s. *Nigra*, *Amaurosis* — s. *Oculi*, *Cataract*, *Pseudoblepsia* — s. *Oculorum*, *Metamorphopsia* — s. *Radians*, *Scotasma* — s. *Sanguinis*, *Eechymona*.

SUGAR, Saccharum — s. *Barley*, *Penidium*, *Saccharum hordeatum*.

SUGAR CANDY, *Saccharum candidum* — s. *Cane*, see *Saccharum*.

SUGAR, DIABETIC, Glucose — s. *Fruit*, *Glucose*

— s. *Grape*, *Glucose* — s. *Hepatic*, see *Saccharum* — s. *Honey*, *Glucose*.

SUGAR OF LEAD, *Plumbi superacetat*.

SUGAR, LIVER, see *Saccharum*.

SUGAR, MAGNETIC, *Saccharum Magnet'icum*. A quack preparation, said to be composed of sugar and cannabis. It is given in nervous cases.

SUGAR OF MILK, *Saccharum lactis*, *Galactosaccharum*, *Lactose*, *Lactine*, (F.) *Sucre de Lait*, *Sel de Lait*, is obtained from whey by evaporation and crystallization. It possesses the demulcent properties of the sugars.

SUGAR, MUSCLE, *Inosite*.

SUGAR PINE, see *Arrowroot* — s. *Starch*, *Glucose*.

SUGAR, URINARY, *Glucose*.

SUGARS, VARIOUS, see *Saccharum*.

SUGARBERRY, *Celtis occidentalis*.

SUGILLATION, *Sugillatio*, *Livor*, *Œdema cruentum*, *Sugillation*, *Bruise*; from *sugillare*, *sugillatum*, 'to beat black and blue.' By most authors used synonymously with *ecchymosis* and *ecchymoma*. It is, also, applied to the spots, or *ecchymoses* which occur in consequence of intrinsic causes, — in disease and in incipient putrefaction. It is common in dead bodies; *Livor seu macula emortualis*. To this last case it is, indeed, restricted by some medico-legal writers; and an interesting question sometimes arises: — Whether the appearance have been induced before death or afterwards? Whether it be a case of *ecchymosis* or of *sugillation*? In the former, the extravasated blood will usually be coagulated; not so in the latter. It is often, however, difficult to form a correct judgment without reference to the history of the case.

SUGGRUNDIUM, perhaps from *suggredi*, (*sub*, and *gradior*), 'to go or come up to.' The eave of a house.

SUGGRUNDIUM OCULI, *Superciliary arch* — s. *Superciliorum*, *Frontal protuberance*.

SUCIDA, *Autochir*.

SUCIDAL INSANITY, *Suicide*.

SUCIDE, *Suicidium*: from *sui cædes*, 'murder of one's self.' The act of killing one's self. *Autoch'ria*, *Autocton'ia*, *Idiocton'ia*, *Autophon'ia*. *Suicide* is very frequently the result of disease of the mind: the individual seeming, at times, to be irresistibly impelled to self-destruction. — *Melancholia Suicidium* seu *autoch'ria*, *Suicidal Insanity*. Also, one who commits self-murder.

SUIE, Fuligo.

SUIF, Sebum.

SUITES DE COUCHES, *Lochia*.

SULCATUS, *Cannelé*, *Grooved*.

SULCI, plural of *Sulcus*.

SULCI CILIARES, *Halo signatus*.

SULCULUS LABII SUPERIORIS, *Lacuna Labii superioris*.

SULCUS, *Semicanal'is*, *Semicanal'ulus*. A furrow. A groove. (F.) *Sillon*. Anatomists have given this name to grooves on the surface of bones and other organs. See *Anfractuosity*.

French writers on anatomy often use the term *Sillons* for the grooves which lodge the arteries and creep on the surface of bones; whilst those that receive veins are called *gouttières*, 'gutters.' Also, the vulva.

SULCUS ANTERO-POSTERIOR JECORIS, see *Liver* — s. *Labii superioris*, *Lacuna Labii superioris*.

SULCUS, LATERAL, ANTERIOR, OF THE SPINAL MARROW. A mere trace on the marrow, marked only by the attachment of the filaments of the anterior roots of the spinal nerves.

SULCUS, LATERAL, POSTERIOR, OF THE SPINAL MARROW, corresponds with the attachment of the posterior roots of the spinal nerves.

SULCUS RETRO-GLANDULARIS, see *Glands* — s. *Sinus lateralis*, *Fossa sigmoidea* — s. *Transversalis*, see *Liver* — s. *Umbilicalis*, see *Liver*.

SULFATE D'AMMONIAQUE, Ammoniac sulphas.

SULFIDUM CARBONII, Carbonis sulphuretum.

SULFUR, Sulphur.

SULFURE DE CARBON, Carbonis sulphuretum.

SULPHAS ALUMINARIS, Alumen—s. Ammoniacæ Cupratus, Cuprum ammoniatum—s. Cadmicus, Cadmii Sulphas—s. Kalico-aluminium, Alumen—s. Natricus, Soda, sulphate of—s. Zincicum, Zinci sulphas.

SULPHUR, *Sulphur*, *Scorith*, *Thei'on*, *Thion*, *Averich*, *Terra falciata*, *Fumus citrinus*, *Aquila*, *Brimstone*, (F.) *Soufre*. Native Sulphur is called *Rock and Black Sulphur*, *Sulphur vivum* seu *nigrum*. Sulphur, as we meet with it, is in rolls, *Sulphur in rotulis* seu *rotundum*, *Roll Brimstone*. It is a volcanic production, and is obtained, in large quantities, from Solfatara, in Italy. *Roll Sulphur* is impure sulphur, melted, and run into moulds. It is unpleasantly inodorous, when heated or rubbed; insipid; solid, and brittle. S. g. 1.99. Fusible at 226°; volatilizable by heat, and condensing unchanged.

SULPHUR ANTIMONIATUM, Antimonii sulphuretum precipitatum—s. Caballinum, see Sulphure sublimatum—s. Carburet of, Carbonis sulphuretum—s. Chloratum, Sulphur, chloride of.

SULPHUR, CHLORIDE OF, *Sulphuris Chloridum* seu *Dichloridum*, *Sulphur chloratum*, *Hypochloratum sulphurosum*, *Chlorum hypersulphuratum*, *Dichloride* or *Protochloride* or *Hypochloride* or *Subchloride* of Sulphur, *Bisulphuret of Chlorine*, is obtained by passing dry chlorine gas over washed and dried flowers of sulphur, until they are for the most part dissolved, and distilling the decanted fluid from the excess of dissolved sulphur. One drachm of the liquid to an ounce of lard has been used in lepra, psoriasis, and other chronic cutaneous diseases. Ten drops, dissolved in ether, have been given in adynamic fever.

SULPHUR, DICHLORIDE OF, Sulphur, chloride of—s. Hypochloride of, Sulphur, chloride of—s. Iodatium, *Sulphuris iodidum*—s. Iodide of, *Sulphuris iodidum*—s. Ioduret of, *Sulphuris iodidum*—s. Liver of, *Potassæ sulphuretum*.

SULPHUR LOTUM, *Sulphur sublimatum lotum*, *Washed Sulphur*, *Magisterium Sulphuris*, *Sulphuris Flores loti*, is prepared by pouring boiling water on sublimed sulphur, so as to wash away any acid it may contain, and then drying it.

SULPHUR NIGRUM, *Sulphur vivum*, see Sulphur sublimatum.

SULPHUR PRÆCIPITATUM, *Lac Sulphuris*, *Milk of Sulphur*, *Precipitated Sulphur*, (F.) *Crème de Soufre*, is prepared by boiling sublimed sulphur and lime together, and adding muriatic acid to precipitate the sulphur.

SULPHUR, PROTOCHLORIDE OF, Sulphur chloride of—s. Subchloride of, Sulphur, chloride of.

SULPHUR SUBLIMATUM, *Sulphur*, (Ph. U. S.) *Sublimed Sulphur*, *Flowers of Sulphur* (F.) *Soufre sublimé*, *Fleurs de Soufre*, is the sulphur of commerce, sublimed in close vessels.

Sulphur is possessed of stimulant, laxative, and diaphoretic properties. As a laxative, it is used in hemorrhoidal and other affections. In the itch, applied externally and taken internally, it has been considered as a specific [?], and it is a valuable remedy in most cutaneous affections that are local. Dose, ℥ss to ℥ij.

The feces or dregs, left in the purification or sublimation of sulphur, are called *Horse Brimstone*, *Dregs of Sulphur vivum*, *Sulphur caballinum* seu *vivum*, *Sulphuris vivi recementa*. They are very impure, and are only used externally.

SULPHUR, VEGETABLE, *Lycopodium*—s. Wort, *Peucedanum*.

SULPHURATUS, Sulphureous, Sulphurated. **SULPHUREOUS**, *Sulphurosus*, *Sulphurarius*, *Sulphuratus*, *Sulphureted*. Possessing the properties of, or relating to, or containing sulphur.

SULPHURETTED, Sulphureous—s. Hydrogen, see Hydrogen, sulphuretted.

SULPHURETUM AMMONIACÆ, Ammoniac sulphuretum—s. Ammoniac hydrogenatum, *Liquor fumans Boylei*—s. Kalicum, *Potassæ sulphuretum*—s. Lixivia, *Potassæ sulphuretum*.

SULPHURIC ACID, *Ac'idum Sulphuricum* seu *Sulphuricum*, *Oleum Vitrioli*, *Spir'itus Vitrioli* seu *vitrioli fortis*, *Acidum vitriolicum*, *A. Vitrioli dephlogisticatum*, *Oil of Vitriol*, *Spirit of Vitriol*, *Vitriolic Acid*, *Acor Sulphuris*, (F.) *Acide Sulphurique* ou *Sulphurique*. Sulphuric acid is inodorous; has a strong acid taste, and is corrosive. S. g. 1.845 (Ph. U. S.) It is escharotic, stimulant, and rubefacient. Mixed with lard, it is sometimes used in local pains, and certain cutaneous affections.

SULPHURIC ACID, AROMATIC, *Ac'idum Sulphuricum Aromaticum*, *A. vitriolicum aromaticum*, seu *vitriolicum alcohol'ic aromaticum*, *Elizir vitrioli* seu *vitrioli aromaticum* seu *vitrioli Mysneski* seu *vitrioli Edinburgensium* seu *vitrioli cum tinctura aromaticis* seu *vitrioli dulcè* seu *acidaromaticum*, *Alcohol cum aromaticis sulphuricatus*, *Tinctura acidi sulphurici*, is formed of sulphuric acid, f ℥ijss; ginger, bruised, ℥j; cinnamon, bruised, ℥iiss; Alcohol, Oij.—Ph. U. S. Dose, gtt. x to xxx. Its properties are like those of the next preparation, than which it is more frequently employed, being more agreeable.

SULPHURIC ACID, DILUTED, *Ac'idum Sulphuricum Dilutum*, *A. vitriolicum dilutum*, *Elizir vitrioli*, *Spir'itus vitrioli ac'idus Vogle'ri*, *Elizir of Vitriol*, (F.) *Acide sulphurique déloyé*, is formed, according to the Pharmacopœia of the United States, by adding *aq. destillat.* f ℥xiiij, to *acid. sulph.* f ℥j. It is tonic, astringent, and refrigerant. Dose, gtt. x to xx, largely diluted. When used as a gargle, half a drachm may be added to ℥vj of water.

Very dilute sulphuric acid was formerly termed *Phlegma vitrioli*.

SULPHURIS CARBURETUM, Carbonis sulphuretum.

SULPHURIS CHLORIDUM, Sulphur, chloride of—s. Dichloridum, Sulphur, chloride of.

SULPHURIS IODIDUM, *S. Ioduretum*, *Sulphur Iodatium*, *Ioduret* or *Iodide of Sulphur*, (F.) *Soufre Ioduré*, *Iodure de Soufre*. It is thus directed to be prepared in the Pharmacopœia of the U. S. (*Iodin.* ℥iv; *sulphur.* ℥i.) Rub the iodine and sulphur together in a glass, porcelain, or marble mortar, until they are thoroughly mixed. Put the mixture into a matrass, close the orifice loosely, and apply a gentle heat, so as to darken the mass without melting it. When the colour has become uniformly dark throughout, increase the heat so as to melt the iodide; then incline the matrass in different directions, in order to return into the mass any portions of iodine which may have condensed on the inner surface of the vessel: lastly, allow the matrass to cool, break it, and put the iodide into bottles, which are to be well stopped.

SULPHURIUS, Sulphureous.

SULPHUROSUM, Sulphureous.

SULPHUROUS, Sulphureous.

SULPHUROUS ACID, *Ac'idum sulphurosicum* seu *sulphuris volat'ile* seu *Sulphurosum* seu *Sulphurosium*, *Spir'itus sulphuris* seu *sulphurosus volat'ilis* seu *sulphuris per campanam* seu *vitrioli phlogisticatus*, *Gas sulphuris*, (F.) *Acide Sulfureux*, *Air Acide Vitriolique*. Obtained by treating mercury with concentrated sulphuric acid, or by burning sulphur. It is sometimes

used in the gaseous, — at others, in the liquid, state. Sulphurous acid gas is used to disinfect clothes, confined air, letters coming from infected places, &c. It is also exhibited, with great success, in the form of fumigation, in the treatment of certain chronic cutaneous affections, and of sciatic and rheumatic pains in general. If respired pure, it acts in the manner of violent irritants; and is not long in producing death.

SULTZMALT, MINERAL WATERS OF. Sultzmalt is a village in the department of the Upper Rhine; where are several sources of cold, acidulous waters, which seem to contain carbonic acid, subcarbonate of soda, subcarbonate of lime, sulphate of lime, and a little bitumen. They are refrigerant, aperient, and alterative.

SUMAC DES CORROYEURS, *Rhus coriaria* — *s. Vénéneux*, *Rhus toxicodendron*.

SUMACH, *Rhus coriaria* — *s. Mountain*, *Rhus copallina* — *s. Poison*, *Rhus venenata* — *s. Stag's Horn*, *Rhus typhina*.

SUMBUL. The name of a root, *Sumbuli radix*, *Jatamansi*, *Musk-root*, presumed to belong to the Umbelliferae family, much employed in Russia and Germany against cholera. Its exact botanical history is not determined. It contains a strongly odorous principle like that of musk; and is regarded as an antispasmodic.

SUMBULI RADIX, Sumbul root.

SUMEN, Hypogastrium.

SUMMER COMPLAINT. A popular name in the United States, for diarrhoea occurring in summer. It is often, also, made to include dysentery and cholera infantum. With some it means cholera infantum only.

SUMMER DISEASES, see Estival — *s. Plant winter worm*, *Sphæria Sinensis* — *s. Rash*, *Lichen tropicus*.

SUMMITAS CUTIS, Epidermis.

SUMMUS HUMERUS, Acromion.

SUN BURN, *Ephelides* — *s. Dew*, *Drosera rotundifolia* — *s. Flower, false*, *Helonium autumnale* — *s. Flower, swamp*, *Helonium autumnale* — *s. Flower, tickweed*, *Corcopsis trichosperma* — *s. Flower, turpentine*, *Silphium perfoliatum* — *s. Pain*, see *Hemicrania* — *s. Rash*, *Lichen* — *s. Stroke*, *Coup de Soleil* — *s. Stroke*, Egyptian, *Coup de Soleil*.

SUPELLECTILE DIOGENIS, Palm.

SUPELLEX ANATOMICA, Museum anatomicum — *s. Diogenis*, Palm.

SUPER. A common Latin prefix; in composition, signifying 'above.'

SUPERBŪS, *Rectus superior oculi*.

SUPERCHLORIDUM FORMYLICUM. Chloroform.

SUPERCILIARIS, *Corrugator supercilii*.

SUPERCILIARY, *Superciliaris*, from *super*, and *cilium*, 'the edge of the eyelid.' That which relates to the supercilia or eyebrows. (F.) *Sourcilier* ou *Surcilier*.

SUPERCILIARY ARCHES, *Superciliary Ridges*, *Arcus superciliaris*, *Suggrundia oculo-rum*, (F.) *Arcades sourcilières*, are two slightly projecting apophyses, situate at the anterior surface of the os frontis, above the superior margin of the orbits. They are separated by the nasal *bosse*, and covered by the superciliaris muscle, to which they give attachment.

SUPERCILIARY RIDGES, *Superciliary arches*.

SUPERCILIUM, *Ophrys*, *Ophrya*, *Vallum*, (F.) *Sourcil*. Same etymon. The *eyebrows* (Sc.) *Brees*, (Prov.) *Eye-breen*, are two arched eminences, — convex above, and more or less prominent, according to the individual, — which lie on the superciliary arch of the os frontis, above the eyelids, and extend from the sides of the root of the nose to the temple. Their inner extremity or *head* is more prominent than the outer or *tail*. The eyebrows are covered with short and stiff

hairs, which are directed, obliquely, from within outwards, and are, commonly, of the colour of the hair. The skin in which these hairs are implanted, rests on the *orbicularis palpebrarum*, *frontalis*, and *superciliaris* muscles, which move the eyebrows in different directions. The eyebrows serve as an ornament to the countenance; and by covering the eye defend it from the impression of too strong a light. They direct the perspiration also from the eye.

SUPERCILIUM ACETAB'ULLI. The edge of the cotyloid cavity of the os innominatum.

SUPERCONCEPTION, see Superfoetation.

SUPEREVACUATIO, Hypercrisis.

SUPERFECUNDATIO, see Superfoetation.

SUPERFIBRINATIO, Hyperinosis.

SUPERFICIALIS COLLI, *Subcutaneus Colli*.

A nerve formed by communicating branches from the second and third cervical nerves. It is distributed to the superficial parts of the neck.

SUPERFICIES ORBITALIS, see Maxillary bone (superior) — *s. Plantaris Pedis*, Sole.

SUPERFŒCUNDATIO, Superfoetation.

SUPERFŒCUTATIO, Superfoetation.

SUPERFŒTATIO, *Superfœtatio*, *Epicyesis*, *Hypercyesis*, *Hypercyema*, *Superimpregnatio*, *Epig'one*, *Superfœcundatio*, *Superfecundatio*, *Superimpregnatio*, from *super* and *fœtare*, 'to breed.' Conception of a fœtus — *epicyema* — in a uterus which already contains one. The impregnation of a female already pregnant. The possibility of this has been denied; but there is abundant evidence to show, that it is possible at a very early period of pregnancy. Twin cases may be of this kind of *superconception*.

SUPERGEMINALIS, Epididymis.

SUPERGENUALIS, Patella.

SUPERHUMERALE, Epomis.

SUPERIMPREGNATIO, Superfoetation.

SUPERIOR AURIS, *Attollens aurem* — *s. Rotundus clitoridis*, *Ischio-cavernosus*.

SUPERLABIA, Clitoris.

SUPERLIGAMEN, Epidesmus.

SUPERLIGULA, Epiglottis.

SUPERNUMERARY FINGER, *Digitus supernumerarius*.

SUPERNUTRITIO LIENIS, *Splenoncus* — *s. Splenis*, *Splenoncus*.

SUPEROXALAS KALICUM, Potass, oxalate of.

SUPERPURGATIO, Hypercatharsis.

SUPERSCAPULARIS, *Supraspinatus* — *s. Inferior*, *Infra-spinatus*.

SUPINATEUR COURT ou **PETIT**, *Supinator radii brevis* — *s. Grand* ou *long*, *Supinator radii longus*.

SUPINA'TION, *Supinatio*, from *supinus*, 'lying on the back.' The movement in which the forearm and hand are carried outwards, so that the anterior surface of the latter becomes superior.

In Pathology, *Supination*, *Supinatio*, *Hyptiasma*, *Hyptiasmus*, means the horizontal position on the back, with the head thrown back, and the legs and arms extended. It is often a sign of great weakness in disease.

SUPINA'TOR. Same etymon. That which produces supination. A name given to two muscles of the forearm.

SUPINATOR BREVIS seu **MINOR**, *Supinator radii brevis* — *s. Longus* seu *major*, *Supinator radii longus*.

SUPINATOR RADII BREVIS, *S. brevis* seu *minor*, (F.) *Epicondylo-radial* (Ch.), *Supinateur court* ou *petit supinateur*. A muscle, seated at the outer and back part of the forearm. It is flattened, triangular, and curved upon itself, in such a manner that it embraces the superior extremity of the radius. It is attached, on the one hand, to the external tuberosity of the humerus, and to

a small portion of the posterior surface of the ulna, and is inserted into the upper third of the outer and upper surfaces of the radius. It produces, by contracting, the motion of supination.

SUPINATOR RADII LONGUS, *S. longus* sive *major*, *Bra'chio-radialis*, (F.) *Húmero-sup-radialis* (Ch.), *Long on grand supinateur*, is seated at the anterior and outer part of the forearm. It arises from the inferior part of the outer edge of the os humeri, and from the external intermuscular aponeurosis; and is inserted, by a long tendon, into the outer edge of the radius, near the base of the styloid process. It causes the supination of the forearm, which it can likewise bend on the arm.

SUPPEDANEA, Hypopodia.

SUPPLANTALIA, Hypopodia.

SUPPLEMENTA EPIPLOICA, Appendiculae pinguedinosæ.

SUPPLEMENTARY AIR, see Respiration.

SUPPORTER, ABDOMINAL, Belt, Russian —s. Utero-Abdominal, see Belt, Russian.

SUPPOSITION DE PART, Pregnancy, pretended.

SUPPOSITOIRE, Suppositorium.

SUPPOSITORIUM, Suppository — s. Uterinum. Pessary.

SUPPOSITORY, *Suppositorium*, *Hypothleton*, *Bacillus*, *Balanis'nis*, *Balanus*, *Glans*, *G. subdidit'ia*, *Nodulus intestinalis*, from *supponere*, *suppositum*, (*sub* and *ponere*, 'to put,') 'to put under,' (F.) *Suppositoire*. A solid medicine, in the form of a cone or cylinder, intended to be introduced into the rectum; — either for the purpose of favouring intestinal evacuations, or to act as an anodyne. Purgative suppositories are made of soap, aloes, or any other irritating substance.

SUPPRESSIO ALVI, Constipation — s. Lochiorum, Ischlochia —s. Lotii, Ischuria —s. Mensium, Amenorrhœa —s. Menstruationis, Amenorrhœa — s. Sudoris, Ischidrosis.

SUPPRESSION DU FLUX MENSTRU-EL, Amenorrhœa —s. *de Part*, see Parturition —s. *d'Urine*, Ischuria.

SUPPURANS, Suppurative.

SUPPURARE, Suppurate.

SUPPURATE, *Suppurarē*, (F.) *Suppurer*, (Prov.) *Beal* (vulgarly). To form or secrete pus.

SUPPURATION, *Suppuratio*, *Subpuratio*, *Ecpyema*, *Purulentia*, *Pyosis*, *Pyel'is*, *Diapye'ma*, *Diapye'is*, *Pyogen'ia simplex*, *Purulence*, *Purulency*, *Gath'ering*, (F.) *Abontissement*. Formation or secretion of pus, (see, also *Pyogen'ia*.) from *sub*, 'under,' and *pus*, *puris*. It is a frequent termination of inflammation, and may occur in almost any of the tissues. This termination is announced by slight chills; by remission of the pain, which, from being lancinating, becomes heavy; by a sense of weight in the part, and, when the collection of pus can be easily felt, by fluctuation. When pus is thus formed in the areolar membrane, and is collected in one or more cavities, it constitutes an *abscess*. If it be formed from a surface exposed to the air, it is an *ulcer*: and such ulcers we are in the habit of establishing artificially in certain cases of disease.

SUPPURATIVE, *Suppurans*, *Suppurativus*, *Diapye'ticus*, *Ecpyoticus*, *Ecpyecon'tus*, (F.) *Suppuratif*. Same etymon. That which facilitates suppuration. Suppuratives are, generally, vesicants mixed with lard.

SUPPURER, Suppurate.

SUPRA. A common Latin prefix; in composition, signifying 'above.'

SUPRA-COSTALES, *Levato'res Costarum*, (F.) *Sur-costaux*, from *supra*, and *costa*, 'a rib.' A name given to twelve small, fleshy fasciuli, which are flattened, triangular, and with radiating fibres. They pass from the transverse processes of the dorsal vertebræ to the superior mar-

gin of the rib beneath. Spigelius, Cowper, Boyer, Chaussier, and others, consider them to form part of the intercostales externi.

SUPRA-HEPATIC VEINS, see Hepatic veins.

SUPRA-OMPHALODYMIA, see Somatodymia — s. et Infra-omphalodymia, see Somatodymia.

SUPRA-ORBITAR, *Supra-orbitalis*, *Supra-orbitarius*, (F.) *Sus-orbitaire*, from *supra*, and *orbita*, 'the orbit.' That which is situate above the orbit.

SUPRA-ORBITAR FORA'MEN, *F. Supra-orbitarium* seu *orbitarium superius*, (F.) *Trou sus-orbitaire ou orbitaire supérieur*, is a foramen or notch completed by a ligament at the inner third of the orbital arch. It gives passage to the *supra-orbitar* or *superciliary artery*, a branch of the ophthalmic, which ascends the forehead, and is distributed thereto.

SUPRA-PU'BIAN, *Supra-pubic*, *Supra-pub'iana*, from *supra*, and *pubes*. That which is seated above the pubis.

SUPRA-PUBIAN NERVE, (F.) *Nerf sus-pubien*, is the internal ramus of the inguino-cutaneous branch of the first lumbar nerve. It is the *genito-crural* branch of Bichat. It descends almost vertically before the psoas muscle; and, near the crural arch, divides into two branches. One of these accompanies the spermatic cord, and is distributed to the cremaster, scrotum, and integuments on the inner part of the thigh. The other issues from the pelvis with the femoral filaments; traverses the aponeurosis of the thigh, and is distributed to the integuments of the upper and anterior part of the limb.

SUPRA-RENAL, *Supra-renal'is*, (F.) *Surrénal*, from *supra*, and *ren*, 'the kidney.' Seated above the kidney — as the *supra-renal* capsule.

SUPRA-SCAP'ULAR; *Supra-scapular'is*, from *supra*, and *scapula*. Seated above the scapula; — as

SUPRA-SCAPULAR NERVE. This arises from the fifth cervical; passes through the supra-scapular notch, and is distributed to the supra-spinatus and infra-spinatus muscles.

SUPRA-SCAPULARIS, *Supra-scapular*, and *Supra-spinatus* muscle.

SUPRA-SEMIORBITULARIS, *Orbicularis oris*.

SUPRA-SPINA'TUS, *Supra-spino'sus*, (F.) *Sur-épineux*, *Sus-épineux*, from *supra*, and *spina*. That which is seated above the spine.

SUPRA-SPINATA FOSSA, (F.) *Fosse sus-épineuse*, is a triangular depression above the spine of the scapula.

SUPRA-SPINATUS MUSCLE, *Super-scapular'is*, *Supra-scapular'is*, (F.) *Sus-spino-scapulo-trochitérien*, *Petit sus-scapulo-trochitérien* (Ch.), is situated in the fossa supra-spinata. It is elongated, thick, and triangular, and is attached, on the one hand, to the two inner thirds of the fossa supra-spinata; and terminates, on the other, at the anterior part of the great tuberosity of the humerus. This muscle raises the arm.

SUPRA-SPINO'SA LIGAMENTA, *Supra-spinal ligaments*, are two in number. 1. The *Dorso-lumbo-supra-spinal ligament*, (F.) *Ligament sur-épineux dorso-lombaire*, extending above the spinous processes of the dorsal and lumbar vertebræ from the 7th cervical as far as the median crista of the sacrum. 2. *Cervical-supra-spinal ligament*, (F.) *Ligament sur-épineux cervical*, which extends above all the cervical spinous processes, and is attached, above, to the outer occipital protuberance.

SUR, *Supra*. A French prefix, signifying 'above.'

SURA, *Gastrocnem'æ*, *Gastrocnem'ia*, *Gastrocnem'ium*; *Calf of the leg*, (F.) *Mallet*, *Gras de*

Jambe. The projection, formed at the posterior part of the leg by the gastrocnemii muscle. Also, the fibula.

SURCILIER, *Corrugator supercilii*, *Superciliary*.

SURCOSTAUX, *Supracostales*.

SURCULATION, see *Generation*.

SURCULI FELLEI, *Pori biliarii*.

SURCULUS, *Ramusculus*.

SURDENT (F.), from *sur*, and *dens*, 'a tooth.'

When a milk-tooth does not fall out at the period of the second dentition, but is merely forced to one side by the new tooth, it is called a *surdent*.

SURDI-MUTITÉ, *Mutitas surdorum*.

SURDITAS, *Cophosis*, *Deafness*.

SURDITÉ, *Cophosis*, *Deafness*.

SURDOMUTITAS, *Deaf-dumbness*.

SURDUS, *Deaf*.

SUREAU COMMUN, *Sambucus*.

SURELLE, *Oxalis acetosella*, *Rumex acetosa*.

SURÉPINEUX, *Supra-spinatus*.

SUR-EXCITATION, see *Excitement*, and *Super-excitation*.

SURFEIT, *Acrasia*, *Colica crapulosa*.

SURGEON, *Chirurgæon*: *Chiro'nax*, *Chirurgus*, *Vulnerum medicus*, *Cheirid'ter*, *Chiria'ter*, *Iätros*, (F.) *Chirurgien*, old French, *Surgien*, from *χειρ*, 'the hand,' and *εργον*, 'work.' One who practices surgery. The surgeon, says Celsus, ought to be young, or, at all events, not advanced in life. His hand must be steady, expert, and never tremulous: he must use the right or left with equal facility: his sight must be clear and penetrating: his mind intrepid; and, although unmoved when he proceeds to operate, he must not be in haste, nor cut less than is necessary, but finish his operation, as if the cries of the patient made no impression upon him.

In the middle ages, the Universities of Italy and Spain sent out educated surgeons, as well as physicians, under the name *chirurgi-physici*.

SURGEON-APOTHECARY. One who unites the practice of surgery with that of the apothecary. A *general practitioner*. He is the ordinary medical man or family medical attendant in England. See *Apothecary*.

SURGEON-DENTIST, *Dentist*.

SURGEONCY. The office of a surgeon.

SURGERY, *Chirurg'gia*, *Chiriatri'a*, *Cheiric'is*, *Chir'risis*, *Chir'is*, *Chir'is'mus*, *Metacheiria'is*, *Metachir'risis*, *Metachir'is'mus*, *Tractatio manua'ria*, *Medicina operati'va seu efficax*, (F.) *Chirurgie*. Same etymon as surgeon. The part of the healing art which relates to external diseases; their treatment; and, especially, to the manual operations adapted for their cure. Also, the office of a surgeon.

SURGERY, ANAPLASTIC, Morioplastice — s. *Autoplastic, Morioplastice* — s. *Conservative, Surgery, salvation* — s. *Dental, Dentistry*.

SURGERY, MILITARY, Chirurg'gia milita'ris, (F.) *Chirurgie militaire*, is that which relates to the operations to be performed on the field of battle, or subsequently; — with the attention to be paid to the wounded, &c.

SURGERY, OP'ERATIVE, is termed *Aciur'gia*, *Acur'gia*, and *Acidur'gia*, (F.) *Médecine opératoire*.

SURGERY, PLASTIC, Morioplastice.

SURGERY, SALVATION, Conservati'vè Sur'gery, is that which looks rather to the preservation of a limb for example than its removal. One, who is addicted to operating in almost all cases, is sometimes called a *knifesman*.

SUR'GICAL, Chirurg'gicus, (F.) *Chirurgical, Chirurgique*. Same etymon. That which relates to surgery; as *surgical anatomy, surgical operations, surgical instruments, &c.*

SURGIEN, *Surgeon*.

SURINAMINE, see *Geoffræa Surinamensis*.

SUR-IRRITATION, see *Irritation*.

SURNUMÉRAIRE (Doigt), *Digitus supernumerarius*.

SUROXYGÉNÈSES. From *sur* and *oxygen*. A name given by Baumes to diseases attributed by him to superabundance of oxygen.

SURPEAU, *Epidermis*.

SURRECTA ALBA, *Ranunculus flammula*.

SUR-RÉNAL, *Supra-nal*.

SURROGATUM, *Succedaneum*.

SURSELS, see *Salt*.

SURTOUTS LIGAMENTEUX DE LA COLONNE VERTÉBRALE, *Vertebral ligaments*.

SURUMPE (S.) A disease to which the traveller in the Cordilleras is liable. It consists of a violent inflammation of the eyes, caused by the reflection of the bright rays of the sun. The conjunctiva is highly inflamed, and the lids swell and bleed. The pain is intense, and frequently induces delirium. — Tschudi.

SURVIE, *Survivorship*.

SURVIVORSHIP, (F.) *Survie*, from *super-vivere*, (*super*, and *vivere*,) (F.) *survivre*, 'to live longer.' In *legal medicine*, this word means the probability that any individual has survived others in an accident, which has been fatal to all. This is often an important question, connected with the inheritance of property, and on which physiology can rarely afford more than presumptive grounds for conclusion.

SUS, SUSUM, (F.) *Sus*, same as *Sursum*, 'above.' A French prefix, signifying 'above,' as in

SUS-ACROMIO-HUMÉRAL, *Deltoid*.

SUS-CARPIEN; *sus*, and *carpe*, 'the wrist.' Above the wrist. An epithet given by Chaussier to the dorsal artery of the wrist — *Artère sus-carpienne* — a branch of the radial.

SUS-ÉPINEUX, *Supra-spinatus* — s. *Maxillo-labial*, *Levator anguli oris* — s. *Maxillo-labial, grand*, *Levator labii superioris alæque nasi* — s. *Maxillo-labial moyen*, *Levator labii superioris proprius* — s. *Maxillo-nasal*, *Compressor naris* — s. *Omphalodymie*, see *Somatodymia* — s. *Optico-sphéno-scléroticien*, *Rectus superior oculi* — s. *Orbitaire*, *Supra-orbitar* — s. *Phalangien du pouce*, *Abductor pollicis brevis* — s. *Pubio-fémoral*, *Pectinalis* — s. *Scapulo-trochitérien le plus petit*, *Teres minor* — s. *Scapulo-trochitérien petit*, *Supra-spinatus* — s. *Spino-scapulo-trochitérien*, *Supra-spinatus*.

SUSCEPTIBILITY, facile suscipiens, (*sus*, and *capio*, 'I take,') 'easily taking, or undertaking.' Sensibility, in its most enlarged acceptation. Impressibility. This term, with the epithet *nervous*, is sometimes used for that increase in the moral sensibility which is particularly observed in nervous affections.

SUSCEPTIO INTESTINORUM, *Intussusceptio*.

SUSPENDICULUM, *Cremaster*.

SUSPENSÀ, *Enœorema*.

SUSPENSEUR, *Suspensory*.

SUSPENSIOIRE, *Suspensory*.

SUSPENSORIUM, *Suspensory* — s. *Hepatis*, *Suspensory ligament of the liver* — s. *Testis*, *Cremaster*.

SUSPENSORY, Suspenso'rius, from *suspendere*, (*sus*, and *pendere*, 'to hang,') 'to hang up.' (F.) *Suspenseur*. That which sustains or suspends.

SUSPENSORY BANDAGE, Suspenso'rium, Suspensoir or *Suspensoire*, is a bandage intended to support the scrotum, in cases of diseases of the testicle or of scrotal hernia. It consists of a kind of bag, fixed above to a cincture, and retained

below by strings passing between the thighs, and fixed to the cincture behind.

SUSPENSORY LIGAMENT OF THE LIVER, *Ligamentum latum*, *Suspensorium hepatis*, *Perpendiculum hepatis*, is a triangular duplicature of the peritoneum, between the inferior surface of the diaphragm and the upper surface of the liver, which is continuous with the great falcx of the umbilical vein.

SUSPENSORY LIGAMENT OF THE PENIS is a fibrocellular fascia, of a triangular shape, which extends from the anterior part of the symphysis pubis to the corpus cavernosum, which it sustains. A similar ligament belongs to the clitoris.

SUSPENSUM, Enæorema — s. Urinæ, Enæorema.

SUSPIRATION, Suspirium.

SUSPIRATUS, Suspirium.

SUSPIRITUS, Suspirium.

SUSPIR'IUM, *Suspira'tio*, *Suspira'tus*, *Suspir'itus*, from *sus*, and *spiro*, 'I breathe;' *Myg-mus*, *Mych'mus*, *Mychthis'fus*, *Stenag'mus*, *Stenax'is*, *Sigh*, *Suspira'tion*, (F.) *Soupir*. A short breathing. A slow, voluntary contraction of the diaphragm and intercostal muscles, the effect of which is to restore the due relation between the circulation and respiration, or to free ourselves from an inconvenient sense of weight felt in the chest, when we are much depressed, — a weight, which appears to be chiefly dependent on the functions of the heart being disturbed through the moral influence. The sigh differs from the sob: — the latter being involuntary and spasmodic. Sighing, occurring in fevers to a great extent, indicates considerable depression. When accompanied with a vocal sound, it constitutes a *groan*.

SUSPIRIUM CARDIACUM, Angina pectoris.

SUSTENTACULUM, Aliment.

SUSTENTATOR CLITORIDIS, Erector clitoridis — s. Penis, Erector penis.

SUSURRATION, Whispering.

SUSURRUS, *Bourdonnement* — s. Aurium, Tinnitus aurium.

SUTELA, Suture.

SUTERBERRY, *Xanthoxylum fraxineum*.

SUTORIUS, Sartorius.

SUTTER, Saccharum.

SUTURA ABDOMINALIS, Gastroraphy — s. Arcualis, Coronal suture — s. Biparietalis, Sagittal suture — s. Clavata, Suture, quilled — s. Corporis callosi externa, see Raphe — s. Cranii squamosa, Squamous suture — s. Dentata, see Suture — s. Frontoparietalis, Coronal suture — s. Interparietalis, Sagittal suture — s. Jugalis, Sagittal suture — s. Lambdoidalis, Lambdoid suture — s. Limbosa, see Suture — s. Lepidoides, Squamous suture — s. Mendosa, Squamous suture — s. Notha, see Suture — s. Obelæa, Sagittal suture — s. Ossium Spuria, Harmony — s. Proræ, Lambdoid suture — s. Punctata, Suture, common — s. Puppis, Coronal suture — s. Rhabdoides, Sagittal suture — s. Serrata, see Suture, Sagittal suture — s. Spuria, see Suture — s. Squamosa, see Suture — s. Vera, see Suture.

SUTURAL, *Sutura'lis*; same etymon as the next. Relating to a suture.

SUTURE, *Sut'ra*, *Sute'la*, *Armē*, *Rhaphē*, from *suere*, *sutum*, 'to stitch'; *Dove-tail joint*, (F.) *Engrenure*. A kind of immoveable articulation, in which the bones unite by means of serrated edges, which are, as it were, *dove-tailed* into each other. The articulations of the greater part of the bones of the skull are of this kind. The coronal, lambdoidal, and sagittal sutures are called *true sutures*, *suturæ veræ*, the two temporal are called *false sutures*, *suturæ nothæ* seu *spuriæ* seu *squamo'sæ*.

A *dentated suture* — *Sut'ra denta'ta* — is one in which the processes are long and dentiform,

as in the interparietal suture. In a *serrated suture* — *sut'ra seu syntax'is serrata* — the indentations and processes are small and fine, like the teeth of a saw, as in the suture between the two portions of the frontal bone. In the *sut'ra limbo'sa* there is along with the dentated margins a degree of bevelling of one, so that one bone rests on the other, as in the occipito-parietal suture.

SUTURE, in *Surgery*, *Rhaphē*, means an operation which consists in stitching the lips of a wound to procure their union. The suture was, at one time, largely employed; but, in modern times, its use has been wisely restricted. There are few wounds in which the edges may not be brought together by adhesive plaster appropriately applied. This kind of union, by adhesive plaster simply, has been absurdly termed *Sutura sicca* or *dry suture*, in opposition to the *Sutura cruenta* or suture properly so called. The suture is generally performed with waxed thread and straight or curved needles, according to the arrangement of parts.

The chief sutures are the *interrupted suture*, the *quilled suture*, the *glover's suture*, and the *twisted suture*. 1. The **INTERRUPTED SUTURE**, (F.) *Suture à points séparés*, *Suture entrecoupée*, is performed by passing a needle, armed with a ligature, through the lips of the wound previously brought into contact; and then tying the extremities of the thread. The other stitches are made in the same manner. They are separate or interrupted. It is the suture most commonly used. 2. The **QUILLED SUTURE**, *Sutara clavata*, (F.) *Suture enchevillée* ou *emplumée* ou *empennée*, *Compound Suture*, is merely the interrupted suture, with this difference, that the ligatures are not tied over the face of the wound, but over two quills or rolls of plaster, or bougies, which are laid along the sides of the wound. It is used by some surgeons, on account of there being less danger of the stitches tearing out. It is not much employed. The **CLAMP SUTURE**, used by Dr. Sims, of New York, in the treatment of vesico-vaginal fistulæ, is a modification of this. It is formed by two cylinders of silver or lead, perforated at several points for the passage of small pieces of fine silver wire, which are to supply the places of thread, and are prevented from slipping by perforated shot carried down upon them, pressed against the cylinders, and kept in situ by being firmly pinched with pliers. 3. The **GLOVER'S SUTURE**, *Continued* or *Uninterrupted Suture*, (F.) *Suture de Pelletier*, ou *en surget*, is executed by introducing the needle first into one lip of the wound from within outwards, then into the other in the same way; and, in this manner, sewing up the whole extent of the wound. It has been chiefly used in wounds of the intestinal canal. It is now rarely employed except for stitching up dead bodies. The common stitch or suture, *Sutura punctata*, (F.) *Suture à points passés*, has been used in similar cases. 4. The **ROYAL STITCH** or **SUTURE** is the name of an old operation for the cure of bubonocæle. It consisted in putting a ligature under the hernial sac, close to the abdominal ring, and then tying that part of the sac, so as to render it impervious by the adhesive inflammation thus excited. 5. The **TWISTED SUTURE**, (F.) *Suture entortillée*, is employed, chiefly, to unite wounds of the cheeks and of the free edges of the lips. To perform it, a pin or needle is passed through the edges of the wound, so as to keep them accurately in contact. A piece of thread is then wound accurately around the pin, from one side of the division to the other, in the form of the figure ∞. The number of pins and sutures must, of course, correspond with the extent of the

wound. This is the suture used in cases of bare-lip. The **BURTON SUTURE**, of Dr. Bozeman, of Alabama, employed in vesico-vaginal fistula, is a modification of this. 6. The **SUTURE À ANSE**, of Le Dran, has only been employed in cases of wounds of the intestines. For this purpose, the edges of the wound are brought together, and as many needles, with unwaxed threads, used as there are to be stitches. Each stitch is then made by passing a needle through the edges; and all the ligatures which belong to one side of the wound are tied together, and twisted so as to form a thread, which is fixed externally. 7. The **IMPLANTED SUTURE**, (F.) *Suture implantée*, is formed by pins arranged parallel to the edges of the wound, and *implanted* in their substance. By means of threads, the needles are approximated so as to bring the edges of the wound together. 8. The **PLASTIC SUTURE**, so called by Prof. Pancoast, of Philadelphia, its proposer, is a suture by tongue and groove. The groove is made by an incision in the part, which is to receive the flap. The tongue is made on the flap by beveling off the two surfaces, cuticular and adipose. The suture is made by passing a loop of thread, by two punctures, deep through the inner lip of the groove. The two needles are passed through the base of the tongue, and again through the outer lip of the groove. The two ends of the thread are then tied over a small roll of adhesive plaster, by which the tongue is, of necessity, forced deep into the groove. Four raw surfaces are thus firmly held in connection, making the union of parts, by this suture, a very certain process.

SUTURE, BUTTON, see Suture, (twisted) — s. **Clamp**, see Suture, (quilled) — s. **Compound**, Suture, quilled — s. **Continued**, Suture, glover's — s. *Écaillée*, Squamous suture — s. *Empennée*, Suture, quilled — s. *Emplumée*, Suture, quilled — s. *Enchevillée*, Suture, quilled — s. *Entortillée*, Suture, twisted — s. *Entrecoupée*, Suture, interrupted — s. **False**, Harmony, see Suture — s. *Implantée*, see Suture, (implanted) — s. *Occipitale*, Lambdoid suture — s. *Occipito-parietal*, Lambdoid suture — s. *de Pelletier*, Suture, glover's — s. **Perineal**, **Perinæorrhaphy** — s. **Plastic**, see Suture — s. *à Points passés*, Suture, common — s. *à Points séparés*, Suture, interrupted — s. **Sagittal**, see **Sagittal suture** — s. *Squameuse*, Squamous suture — s. *en Surget*, Suture, glover's — s. **Superficial**, Harmony — s. **Uninterrupted**, see Suture, glover's.

SWAB, from Sax. *ƿæbban*, 'to clean with a mop.' A piece of sponge or rag tied to a rod of whalebone or wood, for cleansing the mouth of the sick, or applying remedial agents to deep-seated parts. The process is termed *Scabbing*.

SWADDLING CLOTHES, Swathing clothes.

SWAGBELLY, Physconia.

SWALLOW, *Hirundo* — s. **Wort**, *Asclepias vincetoxicum* — s. **Wort**, orange, *Asclepias tuberosa* — s. **Wort**, tuberous-rooted, *Asclepias tuberosa* — s. **Wort**, white, *Asclepias vincetoxicum*.

SWALLOW'S NEST, *Nidus hirundinis*.

SWALME, Excrescence, Tumour.

SWAMP CABBAGE, *Dracontium foetidum* — s. **Dogwood**, *Petala trifoliata* — s. **Sickness**, *Milk sickness* — s. **Wood**, *Cephalanthus occidentalis*, *Dirca palustris*.

SWARFF, Stupor, Syncope.

SWATHING CLOTHES, *Swaddling Clothes*, *Incunabula*, *Fasciæ*, *Panni*, from Sax. *ƿæðan*, 'to bind' (F.) *Maillet*. The kind of clothing or bandaging formerly applied to children during the first year of life. It is now, properly, laid aside, and every freedom allowed to muscular exertion.

SWEAT, **Sudor** — s. **Bloody**, **Sudor cruentus** —

s. **Glands**, see **Perspiration** — s. **Root**, **Polemonium reptans** — s. **Scab**, *Crusta genu equina*.

SWEATING, **Ephidrosis** — s. **Bath**, **Achicolum** — s. of **Blood**, see **Diapedesis**, and **Sudor cruentus** — s. **House**, **Achicolum** — s. **Plant**, **Eupatorium perfoliatum** — s. **Room**, **Achicolum** — s. **Sickness**, **Sudor Anglicus**.

SWEATING SICKNESS, **MALWAH**. A disease which appears to be allied to the worst form of cholera, and to bear a close relation to malignant congestive fever. As its name imports, it occurs in Malwah in India.

SWEBBING, Syncope.

SWEE, Vertigo.

SWEEMING, Syncope.

SWEEMISH, see Syncope.

SWEET BITTER, *Triosteum* — s. **Bread**, **Pancreas**, **Thymus** — s. **Bush**, **Comptonia asplenifolia** — s. **Fern**, **Comptonia asplenifolia** — s. **Flag**, **Acorus calamus** — s. **Pod**, **Ceratonium siliqua** — s. **Root**, **Aralia nudicaulis**.

SWELLING, *Epanastema*, *Exaroma*, *Excedesis*, *Presis*, *Presma*, *Oncus*, *Extumefactio*, *Tumor*, *Tumefactio*, (Prov.) *Blowing*, *Boist*, *Coul*, (Old Eng.) *Boche*, *Bollynge*, *Bolning*, (F.) *Enflure*, *Gonflement*, from Sax. *ƿellan*, (D.) *swellen* (G.) *schwellen*, 'to swell.' Morbid increase of bulk in the whole, or a part, of the body. See **Tumour**.

SWELLING, **WHITE**, **Hydrarthrus**.

SWENSIE, **Cynanche**.

SWENYNG, **Somnium**.

SWERE, Stupor, Syncope.

SWERTIA CHIRAYITA, *Gentiana chirayita* — s. **Diformis**, see **Calumba** — s. **Fraseria**, see **Calumba** — s. **Lutea**, *Gentiana lutea*.

SWEUIN, **Somnium**.

SWEVYNG, **Somnium**.

SWEVYNYNG, **Somnium**.

SWIETE'NIA FEBRIFUGA, after Van Swieten, *S. Somida*, *Soywida* seu *Cedrella febrifuga*, *Febrifuge Swiete'nia*, (F.) *Mahogan febrifuge*. Ord. **Meliaceæ**. Ser. **Syst. Decandria Monogynia**. The bark of this tree, which is a native of the East Indies, called there *Rohena Bark*, has an aromatic odour and bitter taste. It is tonic and stomachic, and has been used in intermittents, and in diseases where bitter tonics are indicated. Dose, $\mathcal{D}\text{ij}$ to $\mathcal{D}\text{ij}$ of the powder.

SWIETE'NIA MAHOG'ANI, *Cedrus Mahogani*, *Mahogany Tree*, grows in the West Indies and tropical America, and is possessed of similar properties.

SWIETE'NIA SENEGALEN'SIS, *Khaya Senegalen'sis*. A common forest tree on the borders of the Gambia. The bark called *Cail-cedra*, and *Karson Khayi*, is bitter and antiperiodic.

SWIETENIA SOMIDA, S. **Febrifuga**.

SWIM, Air bladder.

SWIMBLADDER, Air bladder.

SWIMMING, **Natation** — s. **Bladder**, **Air bladder** — s. of the **Head**, **Vertigo**.

SWINACIE, **Cynanche tonsillaris**.

SWINE-POX, see **Varicella**.

SWINE-SAME, **Adeps**.

SWINE-THISTLE, **Sonchus**.

SWINNYING, **Vertigo**.

SWOON, Syncope.

SWOONING, Syncope.

SWOUNDING, Syncope.

SYALADENITIS, *Inflammatio glandularum salivallium*, from *σάλαιον*, 'saliva,' *αδην*, 'a gland,' and *itis*, denoting inflammation. Inflammation of the salivary glands.

SYCAMINOS, **Morus nigra**.

SYCAMINUM, see **Morus nigra**.

SYCEA, **Ficus**, **Ficus carica**.

SYCEA, **Ficus**.

SYCEPH'ALUS, from *συν*, 'with,' 'together,'

and κεφαλή, 'head.' A monster having two heads united together.

SY'CION, *συκιον*, from *συκον*, 'a fig.' A decoction of dried figs.

SY'CIOS ANGULA'TUS. *One-seeded star cucumber, Wild Bry'ony.* The roots and seeds of this indigenous plant, *Order, Cucurbitaceæ*, are bitter, purgative and diuretic. It is used in dropsy in the same cases as bryony.

SYCI'TES, from *συκον*, 'a fig.' Wine, in which figs have been infused.

SYCITES, Catarchites.

SYCOMA, Ficus.

SYCO'SIS. Same etymon. A tumour of the shape of a fig. Also, a fungous ulcer. A horny exerescence about the eyelids. Dr. Bateman defines it:—an eruption of inflamed but not very hard tubercles occurring on the bearded portion of the face and on the scalp, in adults; and usually clustering together in irregular patches; — *Phyma Sycoisis, Rose'ola fico'sa, Aene men'tagra.* Of this he has given two species: 1. *Syco'sis Menti, S. barbæ, Men'tagra. Ment'go, Varus Men'tagra, Mentagroph'yta, Chinwelk, Chimuhek, Barber's Itch, (F.) Dartre pustuleuse mentagre;* and, 2. *Syco'sis Capil'li, S. Capill'ii.* The treatment, in both cases, resembles that for porri-go favosa.

SYCO'SIS, Ficus.

SYCUM, Ficus.

SYDERATIO, Sideratio.

SYLLEPSIS, Conception.

SYLLEPSIOLOG'IA, from *συλληψις*, 'conception,' and *λογος*, 'a description.' The doctrine of conception.

SYM, SYN, *συν*, 'with, together,' like the *cum, con, col, cor, &c.*, of the Latins. A common prefix. Before *b, p, ph, ps, and m*, — *syn*, or *syn*, is changed into *sym* or *xym*, (com;) before *c, ch, g, k, and x*, into *syn* or *xyn*. *συγ, ξυγ*, (con;) before *l* into *syl* or *xyl*, (col); before *r* into *sy* or *xr* (cor); and before *s* into *sy* or *xy*, and *sys*, (co and cos.)

SYMBLEPHARON, Ankyloblepharon.

SYMBLEPHARO'SIS, *Concretio palpebra-rum cum bulbo oc'uli*, from *sym*, and *βλεφαρον*, 'an eyelid.' A preternatural adhesion between the eyelids; and especially between the upper eyelid and globe of the eye.

SYMBLEPHAROSIS, Ankyloblepharon.

SYMBOL, *Sym'bolium, Character, (F.) Caractère*, from *συμβάλλω* (*συν*, and *βάλλω*, 'I throw'), 'I compare.' A sign or representation of something else.

The following are the symbols used in prescriptions:

℞, *Recipe.* See R.

gr., *Granum*, a grain.

ʒ, *Scrupulus seu scrupulum*, a scruple.

ʒ, *Drachma*, a drachm.

ʒ, *Uncia*, an ounce.

℔, *Libra*, a pound.

℔, *Libræ*, pounds.

℥, *Minimum*, a minim.

fʒ, *Fluidrachma*, a fluidrachm.

fʒ, *Fluiduncia*, a fluidounce.

o, *Octarius*, a pint.

C, *Conjuga*, a gallon. See Abbreviation.

SYMBOL, Commisure.

SYMBOLÆUSIS, Consultation.

SYMBOLISMUS, Sympathy.

SYMBOLIZATIO, Sympathy.

SYMBOLICA, Symptomatology.

SYMBOLUM, Sympathy.

SYMÉTRIE, Symmetry.

SYMÉTRIQUE, Symmetrical.

SYM'MELES, from *sym*, and *μελος*, 'an extremity.' *Mon'opus.* A genus of monsters whose extremities are joined together: *Sirens.* — I. G. St. Hilaire.

SYMMETRIA, Symmetry.

SYMMETRICAL, *Symmet'ricus, συμμετρικός, (F.) Symétrique*, from *sym*, and *μετρεω*, 'to measure.' An epithet given to those parts of the body, which, if seated on the median line, may be divided into two equal, and perfectly like halves; or which — if situate, the one to the right, the other to the left of this line — have a similar conformation, and a perfectly analogous arrangement.

SYMMETRICAL DISEASES, see Symmetry.

SYMMETRY, *Symmet'ria, Commen'sum, Membro'rum Om'nium Competen'tia, Propor'tio, (F.) Symétrie.* The regularity in form, observed in many parts, situate on the median line; and, also, the resemblance which exists between many organs that are situate on each side of the median line; *Bilatéral Symmetry.* Bichat first noticed that this symmetry was confined to the organs of animal life; as the head, brain, spine, organs of sense, locomotion, &c.

It has been affirmed — and there is evidence in favour of the assertion — to be a law of the animal economy, that when uninfluenced by disturbing agents, all general or constitutional diseases affect equally and similarly the corresponding parts of the two sides of the body. This has been called the *Symmetry of Diseases*; and the resulting diseases are said to be *symmetrical*.

SYMMETRY OF DISEASES, see Symmetry.

SYMPARATERESIS, Observation.

SYMPASMA, Catapasma.

SYMPATHESIS, Sympathy.

SYMPATHETIC, *Sympath'icus, Sympathet'icus, (F.) Sympathique*, from *sym*, and *παθος*, 'suffering.' That which depends on sympathy. Sympathetic affections of an organ are those morbid phenomena that supervene without any morbid cause acting directly on it, and by the reaction of another organ primarily affected. Thus, itching of the nose is a *sympathetic affection*, produced by irritation in the intestinal canal.

The epithet *sympathetic* is, also, given to different nerves. See Trisplanchnic, Pneumogastric, and Facial.

SYMPATHETIC, GREAT, Trisplanchnic nerve — s. Middle, Pneumogastric — s. Nerve, Trisplanchnic nerve.

SYMPATHETIC POWDER, *Pulvis sympathet'icus* or *Powder of Sympathy* of Sir Kenelm Digby, was composed of calcined sulphate of iron, prepared in a particular manner. It was long supposed to be able to cure a wound, if applied to the weapon that inflicted it; or even to a portion of the bloody clothes. It is proper to remark, however, that the wound itself was carefully excluded from the air, and from all irritation.

SYMPATHETICUS MINOR, Facial nerve.

SYMPATHETISMUS, Sympathy.

SYMPATHIA, Consent of parts.

SYMPATHICUS, Sympathetic.

SYMPATHIQUE, Sympathetic — s. *Nerv*, Trisplanchnic nerve.

SYMPATHY, *Sympath'ia, Sympathe'sis, Compas'sio, Consensus, Sympathet'ismus, Xympath'ia, Conflux'io, Conspira'tio, Commer'cium, Consor'tium, Homoio'path'ia, Homoëth'nia, Adelphia'is, Symbolis'mus, Symboliza'tio, Syn'bolium.* Same etymon. The connexion that exists between the action of two or more organs, more or less distant from each other; so that the affection of the first is transmitted, secondarily, to the others, or to one of the others, by means unknown. A knowledge of the particular sympathies between

different organs throws light on the etiology of diseases, their seat, and the particular organs towards which our therapeutical means should be directed. See Irritation.

SYMPEPSIS, Coction.

SYMPEXIS, Concretion.

SYMPHORA, Congestion.

SYMPHOREMA, Congestion.

SYMPHORESIS, Congestion.

SYMPHORICAR'PUS RACEMOSUS, *Snow-berry*; from *συμφερω*, 'to bear together,' and *καρπος*, 'fruit,' owing to the clustered berries. An indigenous plant, *Order* Caprifoliaceæ, *Tribe* Loniceræ, whose berries are large, bright white, and remain till winter; flowering from June to September. The root is tonic and astringent, and has been used in ague; and by the Indians in syphilis.

SYMPHYIA, Symphysis.

SYMPHYOCEPH'ALUS, *Metop'ages*, *Cephalop'ages*, from *συμφυης*, (*συ*, and *φω*, 'to grow,') 'united together,' and *κεφαλη*, 'head.' A monstrosity in which twins are united by the head.

SYMPHYSEOTOMY, *Symphysotomy*, *Synchondrotomy*, *Symphyseotom'ia*, *Symphysiotom'ia*, from *symphysis*, and *τεμνω*, 'I cut.' The operation or section of the *Symphysis*, *Sigaultian operation* or *section*. This operation is performed with the view of augmenting the diameter of the pelvis, in order to facilitate delivery in certain cases of faulty conformation of that cavity, with wedging of the head of the child therein. To perform the operation, (F.) *désymphyser*, the female is placed on her back; the pubes is shaved; and, with a strong scalpel, the soft parts are divided on the median line. The articulation is then cut. As soon as the fibrous parts, which hold the bones together, are divided, they separate to a certain distance from each other; and the delivery may be accomplished. The knife, with which the operation is performed, is called, by the French, *Couteau symphysien*.

SYMPHYS'IA, from *συμφυω*, 'to grow together.' A malformation consisting in the union of parts that are usually divided. — Breschet.

SYMPHYSIOTOMIA, *Symphysiotomy*.

SYM'PHYSIS, *Symphys'ia*, *Coalescent'ia*, *Coalitus*, *Coalit'io*, (F.) *Symphysie*, from *συμφυω* (*συ*, 'with,' and *φω*, 'I grow'), 'I unite together.' A union of bones. The bond of such union. The aggregate of means used for retaining bones *in situ* in the articulations. The name *symphysis* has, however, been more particularly appropriated to certain articulations; as to the *symphysis pubis*, *sacro-iliac symphysis*, &c. See *Monster*.

SYMPHYSIS, Coalescence, Commissure, Insertion — s. *Cartilaginea*, *Synchondrosis* — s. *Ligamentosa*, *Syndesmosis* — s. *Ossium muscularis*, *Syssarcosis* — s. *Pubis*, *Pubic articulation*.

SYMPHYOTOMY, *Symphysotomy*.

SYMPHYTOS, Hereditary.

SYM'PHYTUM. Same etymon. *Symphytum officinale* seu *album* seu *Bohemicum*, *Consolida major*, *Comfrey*, *Alum*, *Alus*, (Prov.) *Knit-back*, (F.) *Grande Consoude*, *Oreilles d'âne*. *Ord.* Boraginaceæ. *Ser. Syst.* *Pentandria Monogynia*. The roots of this European plant are very mucilaginous, and are employed as emollients. They are used in decoction in hæmoptysis, dysentery, chronic diarrhœa, &c.

SYMPHYTUM, *Solidago virgaurea* — s. *Album*, *Symphytum* — s. *Bohemicum*, *Symphytum* — s. *Minimum*, *Bellis* — s. *Minus*, *Prunella* — s. *Officinale*, *Symphytum*.

SYMPHYTUM PETRÆ'UM, *Coris Monspelien'sis*, *Montpell'ier Coris*. An intensely bitter and nauseous plant, which is said to have been useful in syphilis. See, also, *Sanicula*.

SYMPLOCAR'PUS ANGUSTISPATHA, *Dracontium angustispata* — s. *Fœtida*, *Dracontium fœtidum*.

SYMPOD'IA, *Monopod'ia*, from *sym*, and *πους*, *πους*, 'a foot.' A monstrosity in which there is coalescence of the lower extremities.

SYMPTOM, *Sympto'ma*, *Ac'cidens*, *Casus*, from *sym*, and *πτωω*, 'a fall,' from *πιπρω*, 'I fall.' Any change, perceptible to the senses in any organ or function, which is connected with morbid influence. It is by the aggregate and succession of symptoms that a disease is detected. The term *symptoms of symptoms* has been used for the effects which result from the symptoms of a disease; but which effects are not essentially connected with the disease itself. Thus, the debility arising from the frequency of evacuations in dysentery is a symptom of symptoms. *Symptom*, at one time, was generally used in the same sense as *sign*; but with many, perhaps most, of the present day, the former signifies a functional or vital phenomenon of disease, whilst the latter is applied to that which is more directly physical; — and hence the expressions *functional or vital phenomena or symptoms*, in contradistinction to the *physical signs* afforded by auscultation, percussion, &c. See *Sign*.

SYMPTOMA TURPITUDINIS, *Nymphomania*.

SYMPTOMAT'IC, *Symptomat'icus*, (F.) *Symptomatique*. That which is a symptom of some other affection. Thus we speak of a symptomatic disease, in opposition to one that is idiopathic.

SYMPTOMATOGRAPHY, *Semeiography*.

SYMPTOMATOLOGY, *Symptomatology'ia*, *Symbolog'ia*, from *symptomata*, and *λογος*, 'a treatise.' The branch of pathology, the object of which is the knowledge of symptoms.

SYMPTO'SIS, from *sym*, and *πιπρω*, 'I fall.' Depression or collapse, emaciation or atrophy, either of the whole body or of a part.

SYN, *Syn*.

SYNÆREMA, *Corrugation*.

SYNÆTION, *Concausa*.

SYNANCHE, *Cynanche*, *Cynanche tonsillaris*.

SYNANCIE, *Cynanche*.

SYNAPHYMENTIS, see *Ophthalmia*.

SYNAPTASE, see *Amygdalin*.

SYNARTHRODIA, *Synarthrosis*.

SYNARTHRODIAL, *Synarthrodial'is*, from *syn*, and *αρθρωσις*, 'articulation.' That which belongs to *synarthrosis*; as *Synarthrodial articulation*.

SYNARTHRO'SIS, *Synarthro'dia*, *Abarticulatio*, *Coarticulatio*. An immovable articulation. *Synarthrosis* includes three species: *Suture*, *Harmony*, and *Gomphosis*.

SYNATHROESIS, *Congestion*.

SYNATHROISMUS, *Congestion*.

SYNCAN'THUS, from *syn*, and *καθος*, 'the corner of the eye.' A morbid adhesion between the globe of the eye and the orbit.

SYNCHONDRO'SIS, *Syn'physis* seu *Cop'ula* seu *Connex'io cartilaginea*, *Chondrosyndesmus*, from *syn*, and *χονδρος*, 'a cartilage.' Union or articulation of bones by means of cartilage: — as the articulations of the ribs with the sternum, by means of their cartilages of prolongation.

SYNCHONDROTOMY, *Symphysotomy*.

SYNCHRONIUS, *Synchronous*.

SYN'CHRONOUS, *Syn'chronus*, *Syn'chron'ius*, *Isoc'hronous*, from *syn*, and *χρονος*, 'time.' That which occurs at the same time. Thus the pulsations of an artery are said to be synchronous with those of the heart.

SYNCHRONOUS, *Synchronous*.

SYNCHYSIS, *Confusio* — s. *Sparkling*, *Confusio*.

SYNCIPUT, *Sinciput*.

SYNCLONESIS, Synclonus.

SYN'CLONUS, *Synclone'sis*, from *συγκλονω*, (*συν*, and *κλονω*, 'I shake,') 'I shake together.' Tremulous, simultaneous, and chronic agitation of various muscles, especially when excited by the will; *Clon'ici univ'ersales*, *Clonus*, (Young.) Also, general spasm, *spas'mus univ'ersalis*. See Tremor, Chorea, &c.

SYNCLONUS BALLISMUS, Paralysis agitans — s. Beriberia, Beriberi — s. Chorea, Chorea — s. Raphania, Raphania — s. Saltans, Chorea — s. Tremor, Tremor.

SYNCOMIS'TUS, from *συγκομιζω*, (*συν*, and *κομιζω*,) 'I bring together.' *Autop'gyros*, *Panis domesticus*, *secundarius*, *ciba'rius*, *confusa'neus*. Bread of the whole wheat, or of the unsifted meal. *Household bread*. Also a cataplasm made of the same.

SYN'COPAL, *Syncopa'lis*, *Syncopt'icus*, *Syncopt'us*. Same etymon as Syncope; as *Syn'copal Fever*, *Febris Syncopt'alis*. A pernicious intermittent, characterized by repeated attacks of syncope.

SYN'COPE, from *συκοπω*, (*συν*, and *κοπω*, 'to fall,') 'I fall down.' *An'imi defectio* seu *deli'quium*, *Leipropsych'ia*, *Lipopsych'ia*, *Ap'sych'ia*, *Ap'sy'ia*, *Lipsis An'imi*, *Asph'yx'ia*, *Apop'sych'ia*, *Lipothym'ia*, *Leipothym'ia*, *Lipoph'yx'ia*, *Eclips'is*, *Su'bitus animi casus*, *Anen-cephaloh'emia*, *Ap'sy'ch*, *Swoon*, *Swooning*, *Fainting*, *Fainting fit*, *Faintness*, *Evolution*, (Sc.) *Drow*, *Dualm*, *Swarff*, *Swerf*, *Swarth*, (Prov.) *Fower*, *Swebbing*, *Sweening*, *Swoounding*, *Sound*, (F.) *Évanouissement*, *Défaillance*, *Pamoi'son*. Complete and, commonly, sudden loss of sensation and motion, with considerable diminution, or entire suspension of the pulsations of the heart and the respiratory movements. Syncope is, commonly, an affection of no consequence; but, sometimes, it is an index of diseased heart. Placing the patient in the horizontal posture; sprinkling cold water over the face, and the application of volatile substances to the nose, are all that will be required during the fit. See Asphyxia, and Suffocation.

An approach to this condition is termed *faint-ness*; and the person is said to be *faint*, (Prov.) *Sweemish*.

SYNCOPE ANGENS, Angina pectoris — s. Anginosa, Angina pectoris.

SYNCOPTICUS, Syncoptal.

SYNCOPTUS, Syncoptal.

SYNCRITICA, Astringents.

SYNDACTYLUS, Aschistodactylus.

SYNDESMITIS, see Ophthalmia. Also, inflammation of articular ligaments: *Inflammatio ligamentorum*, from *syndesmos*, 'ligament,' and *itis*, denoting inflammation.

SYNDESMOG'RAPHY, *Syndesmograph'ia*, from *syndesmos*, 'a ligament,' and *γραφη*, 'a description.' A description of the ligaments. The part of anatomy which describes the ligaments.

SYNDESMOL'OGY, *Syndesmolog'ia*, from *syndesmos*, 'a ligament,' and *λογος*, 'a treatise, discourse.' A treatise on the ligaments.

SYNDESMO-PHARYNGE'US. A fasciculus of the constrictor pharyngis superior.

SYNDESMOS, Ligament.

SYNDESMO'SIS, *Synneuro'sis*, *Synyme'nesis*, *Connex'io* seu *Sym'physis ligamento'sa*, *Commis'su'ra ner'vea*, *Connera'tio*, *Colligat'io*, from *syndesmos*, 'ligament.' The articulation of two or more bones by means of ligament; — as of the radius with the ulna.

SYNDESMOT'OMY, *Syndesmotom'ia*, from *syndesmos*, 'ligament,' and *τεμνω*, 'I cut or dissect.' Dissection of the ligaments.

SYNDESMUS, Bandage, Ligament.

SYN'DROMĒ, from *συν*, and *δρομος*, 'a course.' *Concur'sus*, *Concourse*. A name given by the Empirical Sect to the union of symptoms which takes place in diseases:—*Syndromē pletho'rica*, for example, meant the union of symptoms produced by plethora.

SYNDYASMUS, Coition.

SYNECHES, see Continued fever.

SYNECHI'A, from *συν*, and *εχειν*, 'to have,' or 'to hold.' Adhesion between the iris and transparent cornea, or between the iris and crystalline lens. The former case is called *Synechia ante'rior*; the latter, *S. poste'rior*.

SYNERGIA, Synergy.

SYNERGIE, Synergy.

SYNERGY, *Synerg'ia*, *Synenergi'a*, (F.) *Synergie*; from *συν*, and *εργον*, 'work.' A correlation or concurrence of action between different organs in health; and, according to some, in disease.

SYNESIS, Intellect.

SYNEURO'SIS, Syndesmosis.

SYNEZYSIS, *Synezis'sis*, *Consident'ia*, from *συν*, and *εγγυειν*, 'to join.'

SYNEZIS PUPILL'Æ, *Parop'sis Synzesis*, *Caligo à Synzisi*, *Caligo seu Imperforat'io* seu *Phthi'sis pupillæ*, *Amyo'sis*, *Closure* or *occlus'ion* or *obliteration* of the Pupil. This disease is sometimes a faulty conformation, depending upon the continued existence of the membrana pupillarum, or the absence of the pupil. It is, in other words, *congenital*. At other times, it is owing to accident, and supervenes on violent ophthalmia, or on the operation for cataract. They who are affected with synezisis are completely blind: the iris having no central aperture. In certain cases, a remedy may be obtained by making an opening in the iris, which may supply the place of the pupil, and through which the rays of light may reach the retina. This operation is called the *operation for artificial pupil*.

SYNGENES, Hereditary.

SYNGENICUS, Congenital.

SYNHYMENESIS, Synymenesis.

SYNIMENESIS, Synymenesis.

SYNIZESIS, Considentia, Synezisis.

SYNEURO'SIS, Syndesmosis.

SYN'OCHA, from *συνεχω*, (*συν*, and *εχω*, 'I have or hold,') 'I continue.' *Inflam'matory* or *Dynam'ic Fever*, *Angiop'gra*, *Sthenop'gra*, *Febris acuta* seu *caumato'des* seu *deu'rens seu ardens* seu *contin'ua sanguin'ea* seu *contin'ua non putris* seu *acoma'stica* seu *acuta* seu *acuta sanguin'ea* seu *continens* seu *continens non putrida* seu *angiote'nica* seu *sthenica* seu *sanguin'ea* seu *inflam'matoria*, *Homot'onos*, *Syn'ochus* (Vogel), *S. impu'tris* (Galen), *Ene'cia cauma* seu *ton'ica*, *Phlogop'gyrus*, *Cauma*, *Calentura continua*, (F.) *Fie're ardente* ou *continue inflammatoire* ou *sanguine* ou *irritative* ou *angiote'nique* ou *inflam'matoire*, *Gastro-entérite intense*; *General inflammation*. A species of continued fever, characterized by increased heat; and by quick, strong, and hard pulse; urine high-coloured; disturbance of mind slight. It requires, of course, the most active treatment.

SYNOCHA RHEUMATICA, Rheumatism, acute—s. Vaccina, Vaccina.

SYN'OCHAL, *Synocha'lis*; same etymon. Relating to, or having the characters of, synocha.

SYN'OCHUS, *Ene'cia syn'ochus*, *Febris lenta*, (Linnæus,) same etymon. Continued fever, compounded of synocha and typhus:—in its commencement often resembling the former; in its progress, the latter: *Mixed fever*, *Common continued fever*, *Syn'ochoid fever*. See Continued fever, Fever, and Typhus.

SYNOCHUS, Synocha—s. Biliosa, Fever, gastric, Fever, bilious—s. Catarrhalis, Influenza—s. Icto-

rodes, Fever, yellow—s. Imputris, Synocha—s. Miliaria, Miliary fever—s. Varicella, Varicella.

SYNOLOCE, Spasm.

SYNONIA, Synovia.

SYNOSTEOGRAPHY, *Synosteographia*, from *syn*, *ostreon*, 'a bone,' and *γραφω*, 'I describe.' The part of anatomy which describes the joints.

SYNOSTEOLOGY, *Synosteolog'ia*, from *syn*, *ostreon*, 'a bone,' and *λογος*, 'a treatise.' A treatise on the joints.

SYNOSTEO'SIS, *Synosto'sis*, from *syn*, and *ostreon*, 'a bone.' Union by means of bone.

SYNOSTEO'TOMY, *Synosteotomia*, from *syn*, 'with,' *ostreon*, 'a bone,' and *τεμνειν*, 'to cut.' Dissection of the joints.

SYNOSTOSIS, Synostosis.

SYNOVIA, from *syn*, and *ων*, 'an egg.' *Mucila'go*, *Un'guen seu Unguentum seu Smeigma articula're*, *Synov'ia*, *Azun'gia articula'ris*, *Mucila'go articulo'rum seu junctura'rum*, *Humor articula'ris*, *Hydrarthrus*, *Humor seu Hu'midum nati'vum seu Gluten articulo'rum*, *Arthrohydrine*, (F.) *Synov'ie*. A fluid resembling the white of egg, which is exhaled by the synovial membranes surrounding the moveable articulations. The synovia has been found, on analysis, to consist of water, albumen, soda, chloride of sodium, phosphate of lime, and—Fourcroy fancied—uric acid. Its use is to lubricate the joints, and the sheaths in which tendons play.

SYNOVIAL, *Synovialis*. That which relates to the synovia.

SYNOVIAL GLANDS, *Havers's Glands*, *Glandulae articula'res seu Synoviales seu Haversianae*, are the secretory fringes, which float in the interior of the synovial capsules (see Capsules.) They do not seem to be glandular. They have been called *Synovial fimbriae*, (F.) *Franges synoviales*.

SYNOVITIS, from *Synovia*, and *itis*, a termination denoting inflammation. A term, badly compounded, applied at times to inflammation of the synovial membrane, *arthrophlogo'sis synovialis*. When it affects the bursæ, it is, sometimes called *Bursitis*.

SYNOVITIS RHEUMATISMALIS, Rheumatism, (acute.)

SYNTASIS, *συνασις*, from *συντενω*, (*syn*, and *τενω*, 'I stretch,') 'I strain.' Tension of parts: hence *συντακτικα* are medicines which render parts tense. *Syntex'is*, on the other hand, means *Colliquatio*, or wasting of the body; from *συντηνω*, 'I melt together.'

SYNTAXIS, Articulation, Reduction, Taxis—s. Serrata, see Suture.

SYNTECOPYRA, Hectic fever.

SYNTECTOCOPYRA, Hectic fever.

SYNTENO'SIS, from *syn*, and *τενω*, 'a tendon.' A species of articulation in which two bones are joined by means of tendon; as the sesamoid bones with the toes, the rotula with the tibia, &c.

SYNTERESIS, Prophylaxis.

SYNTERETICUS, Prophylactic.

SYNTEXIS, Colliquation, Consumption, see Syntaxis.

SYNTHENA. A term employed by Paracelsus to designate a species of epilepsy, accompanied by cardialgia and tormina.

SYNTHESIS, *Reunio*, 'composition or putting together,' from *syn*, and *τιθημι*, 'I place.' A surgical operation, which consists in uniting parts that are divided; and approximating such as are separated or distant from each other. *Reunio partium separatarum*, *Syn'thesis of continuity*, means the union of the edges of a wound, or the approximation of the extremities of a fractured bone. *Syn'thesis of contiguity* is the reduction of displaced organs; as in cases of hernia and luxations.

SYNTHESIS, Composition.

SYNTHETIS'MUS, same etymon. The aggregate of operations and means for reducing a fracture, and maintaining it reduced:—comprising extension, counter-extension, coaptation, and bandaging.

SYNTONINE, see Fibrin.

SYNTRIMMA, Contritio.

SYNTRIPSIS, Contritio.

SYNTROPHOS, Connutritus.

SYNULOSIS, Cicatrization.

SYNULOTICA, Cicatrissantia.

SYNUSIA, Coitio.

SYNYME'NESIS, *Synhyme'nesis*, *Synyme'nesis*, from *syn*, and *υμη*, 'a membrane.' Union of bones by membrane, as in the case of the bones of the head in the foetus.

SYNME'NESIS, Syndesmosis.

SYPHAR, Peritonæum.

SYPHILIDES, *Syphil'ida*, (F.) *Dermo-syphilides*, *Dermatoses véroleuses*. Same etymon as Syphilis. The cutaneous eruptions that accompany constitutional syphilis are so denominated by the French writers.

SYPHILIDIA'TER, *Syphilidia'trus*, from *Syphilis*, and *ιατρος*, 'a physician.' A pox doctor. One who occupies himself in treating syphilis.

SYPHILIDOMANIA, Syphilomania.

SYPHILIPHO'BIA, from *Syphilis* and *φοβος*, 'dread.' A morbid dread of syphilis, giving rise to fancied symptoms of the disease: a form of hypochondriasis.

SYPHILIS, *S. vene'rea seu maligna*, *Siphilis*, *Syphilis'mus*, *Cachex'ia seu Cacoehym'ia Vene'rea*, *Malum vene'reum*, *Puden'dagra*, *Me'vium*, *Lues*, *L. vene'rea seu syphilis*, *Morbus Gallicus seu Ital'icus seu Hispan'icus seu Neapolitanus seu Ind'icus seu aphrodis'ius*, *Patura*, *Basilis'cus*, *Boæ*, *Sod'oma Gallo'rum*; *Vene'ral Disease*, *Pox*, *French Pox*, *French Crust*, *French Distemper*, *Foul Disease*, old cant term, *Grincomes*, (Prov.) *Pip*, (Sc.) *Glengore*, *Glengour*, *Grandgore*, (F.) *Vérole*, *Maladie vénérienne*, *Mal de Naples*, *Mal Français*, *Maladie de Vénus*.

The etymology of syphilis is unknown. Some consider it to proceed from *svs*, 'a hog,' and *φιλω*, 'I love;' others, from *syn*, 'with,' and *φιλω*, 'I love;' and others, with more probability, from *σιφλος*,—formed, by contraction, from *σιταδος*,—'a reproach,' &c. It is an infectious disease, communicable by coition, or by the contact of parts that are only lined with a thin epidermis; as the lips, nipple, &c. It generally makes its first appearance by a chancre, followed sooner or later by a bubo. The chancre is a primary symptom or sore; but there are others which are secondary or constitutional. These are:—ulcers in the throat; copper-coloured blotches on the skin; pains in the bones, nodes, &c.: the last are sometimes termed tertiary phenomena. The origin of syphilis is not known. It is believed to have been introduced into Europe from America, at the end of the 15th century [?]. Its progress is extremely variable, as well as its duration, which is often unlimited, if left to itself. Mercury may be esteemed the best remedy, but the disease admits of cure without it. Almost every antisiphilitic composition, whose use is attended with success, probably contains mercury united with diaphoretics or other medicines. It is generally sufficient to keep the mouth sore for a fortnight for the cure of chancre: for venereal sore throat, and other recent constitutional symptoms, eight or ten weeks will be required; and, of course, a longer time, if these symptoms have persisted longer. Sometimes, after mercury has been given for a time, the symptoms continue stationary; and do not yield until the mercury has been discontinued, and

tonics and eutrophics have been administered. The preparations of iodine have been much used, of late, in the revellent treatment of this disease.

SYPHILIS INDICA, Framboesia.

SYPHILIS PSEUDO-SYPHILIS, *Lues Syphilo'ides, Pseudo-syphilis*. A term given to ulcers or other affections that resemble syphilis, but are indeterminate in their character,—the symptoms being irregular in their appearance, and usually yielding spontaneously, or under the use of tonics, change of air, &c. The condition has not been at all well defined. The *Sivvens, Radesyge, &c.*, have been referred to this head.

SYPHILISATION, Syphilization.

SYPHILISMUS, Syphilis.

SYPHILITIC, *Syphiliticus*, (F.) *Syphilitique, Vérolique, Vérolé*. Belonging, or relating to syphilis—as 'a syphilitic ulcer.'

SYPHILIZATION, *Syphilisatio*, (F.) *Syphilisation*. Saturation of the system by inoculation with the matter of syphilis. It has been used as a curative procedure in syphilis, as well as a preventive of that disease; and for the cure of other cachexia, as cancer.

SYPHILODERM'A, from *syphilis*, and *δερμα*, 'skin.' A cutaneous eruption of a syphilitic character.—E. Wilson.

SYPHOLOG'RAPHER, from *syphilis*, and *γραφω*, 'I describe.' A writer on syphilis.

SYPHILOID, *Syphilo'ides*; from *syphilis*, and *ειδος*, 'resemblance.' Resembling syphilis,—as 'a syphilitic affection.'

SYPHILOMA'NIA, *Syphilidom'nia*,—vulgarily, *Nodde Poz*. A mania, with which some persons are affected, so that they subject themselves to antiveneereal treatment, under the erroneous impression that they are affected with syphilis.

SYPHITA, Somnambulism.

SYPHO-AURICULARIS, Otenehytes.

SYPHON, see Siphon.

SYRIGMOPHON'IA, from *σyrigmos*, 'piping,' and *φωνη*, 'voice.' A piping state of the voice.

SYRIGMUS, Tinnitus aurium.

SYRINGA, Eustachian Tube, Fistula, Syringe, Trachea—s. Clysmatica, Syringe, (Clyster.)

SYRIN'GA VULGA'RIS, *Lilac vulg'aris*, *Common Lilac*. Ord. Oleaceæ. The leaves and fruit are bitter and somewhat acrid, and have been used as tonics and antiperiodics.

SYRINGE, *Syr'inx, Syrin'ga, Siphon Siphunculius, Squirt*, (F.) *Seringue*, from *σyrιγξ, σyrιγγος*, 'a pipe.' A familiar apparatus through which any liquor is injected.

Various forms of syringe are used in medicine and surgery.

SYRINGE, CLYSTER, *Syrin'ga clysmat'ica, Clystanti'um*, (F.) *Clysopompe*. A syringe for administering clysters.

SYRINGE, CUPPING, *Antlia sanguisuga*.

SYRINGES AÉRIFERI, see Bronchia.

SYRINGICUS, Fistulous.

SYRINGITIS EUSTA'CHII, Inflammation of the Eustachian tube.

SYRINGMOS, Tinnitus aurium.

SYRINGODES, Fistulous.

SYRINGOTOME, *Syringot'omus, Syringot'omum*, from *σyrιγξ, σyrιγγος*, 'a pipe,' 'a fistula,' and *τεμνειν*, 'to cut.' A surgical instrument, formerly used in the operation for *fistula in ano*. It is a bistouri, concave at its edge, and terminated by a long, flexible, probe-pointed stylet. This stylet or probe was first introduced by the external opening of the fistula into the rectum, whence it was drawn externally through the anus, carrying with it the cutting edge of the instrument, which divided the intermediate parts.

SYRINGOT'OMY, *Syringotom'ia*. Same etymology as the last. The operation for fistula in ano by incision.

SYRINX, Eustachian tube, Fistula, Syringe, Trachea—s. Hiera, Vertebral column.

SYRMAIS'MOS, from *σyrμαίω*, 'I evacuate.' A gentle evacuation by vomiting or stool.

SYROP, Syrup—s. *d'Ail, Syrupus allii*—s. *d'Armoise composé, Syrupus aromaticus*—s. *de Chicorée composé, Syrupus de cichorio compositus*—s. *des Cing racines, Syrupus e quinque radicibus*—s. *de Coquelicot, Syrupus rheados*—s. *de Cuisinier, Syrupus de sarsaparilla et senna compositus*—s. *d'Éther, Syrupus cum æthere sulphurico paratus*—s. *de Gingembre, Syrupus zingiberis*—s. *de Guimauve, Syrupus althææ*—s. *de Longue vie, Mellitum de mercurial compositum*—s. *de Mercure, Syrupus de mercurio mediante gummi*—s. *de Mou de veau, see Syrupus zingiberis*—s. *de Mûres, Syrupus mori*—s. *de Nerprun, Syrupus rhamni*—s. *de Pavots blancs, Syrupus papaveris*—s. *de Pommes composé, see Syrupus sennæ*—s. *de Quinquina avec le Vin, Syrupus de kinâ kinâ cum vino*—s. *de Roses pâles, Syrupus rosæ*—s. *de Roses rouges, Syrupus rosæ*—s. *de Vinaigre, S. acetii*.

SYRUP, *Sirup, Syr'upus, Serapi'um, Serape'um*, (F.) *Syrop, Sirop, Saccharolé liquide, Saccharhydrole*; derived, according to some, from *σyrω*, 'I draw,' and *σνος*, 'juice;' but more probably, from the Arabic *Siruph, Sirab*, or *Scharab*, which signifies 'a potion.' A saturated solution of sugar in water, either simply, or united with some vegetable or other principle. Syrups, in general, require two pounds of sugar to the pint, and they are judged to be sufficiently boiled when a portion, taken up in a spoon, flows like oil. In the Pharmacopœia of the United States, it is directed, that syrups, whose density is not precisely determined by the process, should have the s. g. 1.261 when boiling, and about 1.319 at ordinary temperatures. Syrups should be kept in small bottles in a cool place. They are chiefly used to render medicines palatable. See *Syrupus simplex*.

SYRUP OF ALMONDS, *Syrupus amygdalæ*.

SYRUP, ANTISCORBUTIC, *Syrupus antiscorbuticus*—s. *Balsamic, Syrupus lolutans*.

SYRUP OF BUCKTHORN, *Syrupus rhamni*—s. of Calf's lungs, see *Syrupus zingiberis*—s. of Capillaire, *common, Syrupus simplex*—s. of Cinchona with wine, *Syrupus de kinâ kinâ cum vino*—s. of Cinchonia, *Syrupus cinchoniæ*—s. of Citric acid, *Syrupus acidi citrici*—s. of Clove July flower, *Syrupus caryophylli rubri*—s. of Clove pinks, *Syrupus Caryophylli rubri*—s. of Cochineal, *Syrupus coccii*—s. of Emetine, *Syrupus emetine*—s. of Ether, *Syrupus cum æthere sulphurico paratus*—s. of Five roots, *Syrupus e quinque radicibus*—s. of Garlic, *Syrupus allii*—s. of Ginger, *Syrupus zingiberis*—s. of Gum Arabic, *Syrupus acaciæ*,

SYRUP, HIVE, *Syrupus scillæ compositus*.

SYRUPUS, S. simplex.

SYRUPUS ACA'CIÆ, *Syrup of Gum Arabic*, (Acacia) $\mathfrak{Z}\text{ij}$, Sacchar. $\mathfrak{Z}\text{xv}$, Aq. $\text{f}\mathfrak{z}\text{viij}$. Dissolve the gum in the water; add the sugar, and strain. Ph. U. S.) A good pectoral syrup. Dose, $\text{f}\mathfrak{z}\text{j}$ to $\text{f}\mathfrak{z}\text{ij}$.

SYRUPUS ACE'TI, *S. Ac'idi Aceto'si*, *Syrup of Vinegar*, (F.) *Syrup de Vinaigre*. (Aceti Osiis, sacch. purif. $\mathfrak{lii}\text{ss}$. Boil to form a syrup. Ph. E.) It is refrigerant and antiseptic. Dose, $\text{f}\mathfrak{z}\text{j}$ to $\text{f}\mathfrak{z}\text{ij}$.

SYRUPUS ACIDI ACETOSI, S. acetii.

SYRUPUS AC'IDI CITRICI, *Syrup of Citric Acid*. (Acid. citric. pulv. $\mathfrak{z}\text{ij}$; Ol. Limon. $\mathfrak{M}\text{iv}$; Syrup. Oij. Rub the acid and oil with an ounce of the syrup; add the rest of the syrup, and dissolve with a gentle heat. Ph. U. S.) Virtues the same as those of the Syrupus Limonis.

SYRUPUS CUM Æ'THERË SULPHURICO PARATUS, *Syrup of Ether*, (F.) *Syrup d'ether*. (Very pure sugar, 1000 p.; distilled water, 500 p.; dissolve in the cold, and strain; add sulphuric ether, 48 p. Shake for five or six days, and draw off the limpid syrup. Ph. L.) Properties like those of ether.

SYRUPUS AL'LII, *Syrup of Garlic*, (F.) *Syrup d'ail*. (Allii recent. concis. $\mathfrak{z}\text{vj}$, acet. destillat. Oj, sacchar. $\mathfrak{li}\text{ij}$. Macerate the garlic in the vinegar, in a glass vessel, for four days; then express the liquor and set it by, that the dregs may subside; lastly, add the sugar to the clear liquor, and proceed in the manner directed for syrup. Ph. U. S.) Use, same as that of garlic. Dose, $\text{f}\mathfrak{z}\text{j}$ to $\text{f}\mathfrak{z}\text{iv}$.

SYRUPUS ALTHÆÆ, *S. ex Althæâ seu de Althæâ seu Althææ officinalis*, *Syrup of Marsh-mallow*, (F.) *Syrup de Guimauve*. (Althææ rad. recent. cont. $\mathfrak{lb}\text{ss}$, sacch. pur. $\mathfrak{li}\text{ij}$, aquæ Oiv. Boil the root in the water to one-half, and press out the liquor; when cold, defecate; add the sugar, and boil. Ph. L.) Emollient and demulcent. Dose, $\text{f}\mathfrak{z}\text{j}$ to $\text{f}\mathfrak{z}\text{ij}$.

SYRUPUS ANOMI ZINGIBERIS, S. zingiberis.

SYRUPUS AMYGDALÆ, *Syrup of Almonds*, (S. of Orgeat, Orgeat. (Amygdal. dulc. $\mathfrak{li}\text{ij}$, amygdal. amar. $\mathfrak{z}\text{iv}$, aquæ, Oij, sacchar. $\mathfrak{lb}\text{vj}$. Blanch the almonds, and rub them in a mortar to a very fine paste, adding, during the trituration, three fluid-ounces of the water, and a pound of the sugar. Mix the paste thoroughly with the remainder of the water; strain with strong expression; add the remainder of the sugar to the strained liquor, and dissolve it with the aid of a gentle heat. Strain the syrup through fine linen, and having allowed it to cool, put it into bottles, which must be well stopped, and kept in a cool place. Ph. U. S.)

SYRUPUS ANTICAUSOTICUS, see Anticausodic.

SYRUPUS ANTISCORBU'TICUS, *S. de Armora'ciâ*

compositus, Antiscorbutic Syrup. (Leaves of cochlearia, buckbean, water-cresses, horse-radish root and bitter oranges, each $\mathfrak{li}\text{j}$, cinnamon, $\mathfrak{z}\text{iss}$. Cut, and pour on white wine $\mathfrak{lb}\text{iv}$. Macerate for two days; distil over Oj in a sand-bath; add to this sugar, $\mathfrak{li}\text{ij}$, and form a syrup. Again, take what remains in the cucurbit: pass it through cloth; let it rest; decant, and add sugar $\mathfrak{li}\text{ij}$; make into a syrup, and clarify with white of egg. Mix it with the first while yet warm. Ph. P.) Antiscorbutic, alterative, tonic, stomachic, &c. Dose, $\text{f}\mathfrak{z}\text{j}$ to $\text{f}\mathfrak{z}\text{ij}$.

SYRUPUS AROMATICUS, *S. de Artemisiâ compositus*, *Compound Syrup of Mugwort*, (F.) *Syrup d'arnoise composé*. (Roots of artemisia vulgaris, in flower, $\mathfrak{z}\text{vj}$, inula root, ligusticum levisticum, and fennel, each, $\mathfrak{z}\text{ss}$, pennyroyal, catmint, savine leaves, each $\mathfrak{z}\text{vj}$, marjoram, hyssop, pyrethrum, rue, basil, each $\mathfrak{z}\text{ij}$, aniseed and cinnamon, each $\mathfrak{z}\text{ix}$: bruise and macerate in hydromel $\mathfrak{lb}\text{xv}\text{ij}$; distil over Oss; add to this a pound of sugar. Again, take the liquid that remains in the cucurbit, strain it gently; and add sugar $\mathfrak{lb}\text{iv}$. Then mix the two. Ph. P.) Tonic, emmenagogue, &c.

SYRUPUS DE ARMORACIÂ COMPOSITUS, S. antiscorbuticus—s. de Artemisiâ compositus, S. antiscorbuticus—s. Asparagi, see Asparagus.

SYRUPUS AURANTII, *S. Aurantiorum seu Citri Aurantii seu Corticis Aurantii seu Aurantii Corticis* (Ph. U. S.) *seu e Corticibus Aurantiorum seu de Corticibus Aurantiorum, Syrup of Orange peel*. (Aurant. cort. cont. $\mathfrak{z}\text{ij}$, aq. ferv. Oj, sacch. $\mathfrak{lb}\text{ij}\text{ss}$. Macerate the peel in the water for twelve hours. Add the sugar. Ph. U. S.) Stomachic. Dose, $\text{f}\mathfrak{z}\text{j}$ to $\text{f}\mathfrak{z}\text{ij}$.

A Syrup of Orange Juice, Orange Sherbet, Syrupus e succo Aurantiorum, may be made by adding white sugar $\mathfrak{li}\text{j}$ to $\mathfrak{li}\text{j}$ of the juice of oranges, strained and clarified.

SYRUPUS BALSAMICUS, S. toltanus.

SYRUPUS CARYOPHYLLI RUBRI, *S. Infusio'nis florum caryophyllo'rum*, *S. Dianthi Caryophylli*, *Syrup of Clove July flower or of Clove Pink*. (Petalarum dianth., caryoph. recent., unguibus resectis, $\mathfrak{li}\text{j}$, aquæ bull. Oiv, sacch. purif. $\mathfrak{lb}\text{vij}$. Ph. E.) Aromatic.

SYRUPUS CASSIÆ SENNÆ, S. sennæ.

SYRUPUS DE CICHORIO COMPOSITUS, *S. de Rheo, Compound Syrup of Succory*, (F.) *Syrup de chicorée composé*. (Root of succory $\mathfrak{z}\text{vj}$, leaves of succory $\mathfrak{z}\text{ix}$, leaves of fumitory and scolopendrium, each $\mathfrak{z}\text{ij}$, Alkekengi berries $\mathfrak{z}\text{ij}$. Boil in water Oxiv to Oxij: pass through cloth, and dissolve in white sugar $\mathfrak{lb}\text{v}$. Boil till it has the consistency of syrup. Again, take water Ovij, rhubarb $\mathfrak{z}\text{vj}$, yellow sanders and cinnamon, each $\mathfrak{z}\text{ss}$. Infuse for twenty-four hours; pass through linen, and add the preceding syrup. Ph. P.) It is laxative and stomachic. Dose, $\text{f}\mathfrak{z}\text{j}$ to $\text{f}\mathfrak{z}\text{ss}$.

SYRUPUS CINCHONÆ CUM VINO, S. de kinâ kinâ cum vino.

SYRUPUS CINCHO'NIÆ, *Syrup of Cincho'nia*. (Simple syrup one pound; sulphate of cinchonina nine grains. Mix.) Six spoonfuls are commonly sufficient to arrest an intermittent.

SYRUPUS CITRI AURANTII, S. aurantii.

SYRUPUS COCCI, *Syrup of Cochineal*. (Cocc. cont. $\mathfrak{H}\text{iv}$. Aq. destillat. bullient. Oj (Imp. meas.), sacchar. $\mathfrak{li}\text{ij}$, vel q. s. Sp. rectificat. $\text{f}\mathfrak{z}\text{ii}\text{ss}$, vel q. s. Ph. L.) Chiefly used as a coloring agent.

SYRUPUS COL'CHICI AUTUMNA'LIS, S. Colchici, *Syrup of Meadow Saffron*. (Rad. colch. autumn. recent. $\mathfrak{z}\text{j}$, acidi acetos. $\text{f}\mathfrak{z}\text{xvi}$, sacch. pur. $\mathfrak{z}\text{xx}\text{vj}$. Macerate the root in the vinegar for two days, occasionally shaking the vessel; then strain with gentle expression. To the strained fluid add the sugar, and boil to a syrup. Ph. E.) Diuretic, antiarthritic. Dose, $\text{f}\mathfrak{z}\text{j}$ to $\text{f}\mathfrak{z}\text{ss}$, or more.

SYRUPUS CORTICIS AURANTII, *S. aurantii* — s. Citri medicæ, *S. limonum* — s. e Succo citrionum, *S. limonum*.

SYRUPUS CROCI, *Syrup of Saffron. (Crocī stigmat. ℥j, aquæ fervent. Oj, sacch. purif. ℔iiss. Ph. L.)* Cardiac. Chiefly used for colouring.

SYRUPUS DIACODION, *Diacodium* — s. Dianthi Caryophylli, *S. caryophylli rubri*.

SYRUPUS EMETINE, *Syrup of Em'etine. (Simple syrup ℔j, emetine 16 gr.)* In small doses, expectorant; and in large, emetic.

SYRUPUS EMPYREMATIUS, *Melasses* — s. Ferri iodidi, *Liquor Ferri iodidi*.

SYRUPUS HEMIDESMI, *Syrup of In'dian Sarsaparilla. (Hemidesm. cont. ℥iv (avoidrup.), Ag. distillat. bullient. Oj (Imp. meas.), sacchar. q. s. Ph. D.)* A weak preparation of hemidesmus.

SYRUPUS HYDRARGYRI, *Syrupus de mercurio mediante gummi* — s. Infusionis florum caryophyllorum, *Syrupus caryophylli rubri*.

SYRUPUS IPECACUAN'HE, *Syrup of Ipecacuanha. (Ipecac. in pulv. crass. ℥j, alcohol. dilut. Oj, sacchar. ℔iiss, aquæ q. s. Macerate the ipecacuanha in the alcohol for 14 days, and filter. Evaporate the filtered liquor to 6 fluidounces, again filter, and add sufficient water to make the liquid measure a pint; add the sugar, and evaporate by a water-bath to a proper consistence. Ph. U. S.)* It may also be prepared by displacement.

SYRUPUS DE JALAP'Â, *Syrup of Jalap. (Pulv. Jalapæ ℥x, sem. coriandr., fœnicul. dulc. āā ℥ss; aquæ f ℥xijss, sacch. ℥xxv. Ph. P.)* Cathartic. Dose, f ℥j to f ℥ss for children.

SYRUPUS DE KINÂ KINÂ CUM VINO, *S. Cinchona cum vino, Syrup of Cinchona with wine, (F.) Syrop de quinquina avec le vin. (Cort. cinchonæ officinalis ℥ij, ext. cinchonæ ℥vj, vini albi (Vin. Lucl. seu cujanis ei similis.) Oj, alcohol (s. g. '985 to '915.) f ℥j, sacchar. alb. ℔iiss. Bruise the cinchona; gradually add the alcohol, so as to form a soft mass; pour on the wine; macerate for two days, and strain. Dissolve the extract, add the sugar, and make a syrup. Ph. P.)* Dose, f ℥ss to f ℥j.

SYRUPUS KRANE'RLE, *Syrup of Rhat'any. (Ext. Kramer. ℥ij, aquæ Oj, sacchar. ℔ijss. Dissolve the extract in the water, and filter; then add the sugar, and form into syrup. Ph. U. S.)* It may also be made by displacement from *kramer*. in pulv. crass. ℔j, sacchar. ℔iiss; aq. q. s.) An adjunct to astringent mixtures; or given in diarrhoea, a teaspoonful to a child.

SYRUPUS LIMONIS, *S. Limonum* — s. Succī limonis, *S. limonum*.

SYRUPUS LIMO'NUM, *S. limonis* (Ph. U. S.) seu citri medicæ seu e succo citro'num seu e succo limo'num seu succi limo'nis, *Syrup of Lemon. Lemon Syrup. (Limon. succ. colat. Oj, sacchar. ℔ij.)* Cooling, antiseptic.

SYRUPUS E MECONIO, *S. papaveris* — s. de Melle, *Mellitum simplex*.

SYRUPUS DE MERCURIO MEDIAN'TE GUMMI, *S. Hydrargyri, Mercurius gummo'sus Plenk'ii, (F.) Syrop de mercure, Mercure gommeux de Plenk. (Hydrargyri pur. ℥j, p. gum. acaciæ, ℥ij, syrup diacod. ℥ss. Rub together till the mercury is distinguished. Ph. P.)* Possesses the properties of blue pill. Dose, gr. ij to viij, or more.

SYRUPUS MORI, *S. e succo moro'rum seu succi mori, Syrup of Mul'berries, (F.) Syrop de mâres. (Mori succ. colat. Oj, sacchar. purif. ℔ij. Ph. L.)* Gratefully refrigerant.

SYRUPUS E SUCCO MORORUM, *S. mori*.

SYRUPUS MORPH'LE ACETA'TIS, *Syrup of acetate of morphia. (Liq. morphiæ acet. f ℥j, syrup f ℥xv. Ph. D.)* Dose, f ℥ss to f ℥j, as an opiate.

SYRUPUS MORPH'LE MURIA'TIS, *Syrup of muriate of morphia. (Liq. morph. muriat. f ℥j;*

syrup f ℥xvij. M. Ph. D.) Dose, f ℥ss to f ℥j, as an opiate.

SYRUPUS MORPHLE SULPHA'TIS may be made in the same way.

SYRUPUS NIGER, *Melasses*.

SYRUPUS PAPAVERIS, *S. papaveris somniferi seu papaveris albi seu emeco'nio seu de meconio, Diacodium, Syrup of poppies, (F.) Syrop de pavots blancs ou Diacode. (Papav. capsul. exsiccet. et contus. exemptis seminibus, ℥xiv, sacch. pur. ℔ij, aq. fervent. cong. ijss. Macerate the capsules in water for 12 hours; boil to a gallon, and express strongly. Boil the liquor to Oj; and strain while hot. Defecate by rest, and boil to Oj, adding the sugar so as to form a syrup. Ph. L.)* One ounce contains about one grain of opium. Anodyne and demulcent.

The Dublin college has a SYRUPUS OPII, called *Common Syrup of Poppies*, which is made by dissolving 18 grains of the *Watery Extract of Opium* in 18 ounces of boiling water. Properties, those of opium and syrup.

SYRUPUS DE PAPAVERE ERRATICO, *S. rheoados* — s. de Pomis compositus, see *S. sennæ*.

SYRUPUS PROTEÆ, see *Protea mellifera*.

SYRUPUS PRUNI VIRGINIANÆ, *Syrup of Wild cherry bark. (Pruni Virginian. in pulv. crass. ℥v, sacchar. ℔ij, Aquæ, q. s. Moisten the bark with water; let it stand for 24 hours; transfer it to a percolator; pour water gradually upon it, until a pint of filtered liquor has passed. Add the sugar in a bottle, and dissolve by agitation. Ph. U. S., 1851.)* Dose, as a demulcent expectorant, f ℥j to f ℥ij.

SYRUPUS E PULMONIBUS VITULINIS, see *Syrupus Zingiberis*.

SYRUPUS QUINÆ, *Syrup of Quinia. (Simple syrup, 2 pints, sulphate of quinia, 64 grains.)* Six spoonfuls are commonly sufficient to arrest an intermittent.

SYRUPUS E QUINQUE RADICIBUS, *Syrup of five roots, (F.) Syrop des cinq racines. (Rad. apii, fœniculi, apii petroselini, āā ℥v. Infuse for 24 hours in boiling water Oiss, and strain. Rad. asparag., rusci aculeati, āā ℥v, aquæ, Ovj. Boil and reduce to half; adding, towards the end, the residue of the preceding infusion. Boil again for some minutes; strain, and add white sugar, ℔vj. Ph. P.)* Aperient and diuretic. Used in obstructions of the liver, spleen, and mesentery; and in dropsy, &c. Dose, f ℥ss to f ℥j, or more.

SYRUPUS RHAMNI, *S. Rhamni cathartici seu de Spinâ cervinâ seu spinæ cervinæ, Syrup of Buckthorn, (F.) Syrop de nerprun. (Rhamn. baccar. succ. recent. Oiv, zingib. rad. concis., pimenta bacc. contrit., āā ℥ss, sacch. purif. ℔iiss. Defecate the juice for 3 days, and strain. To a pint of this, add the ginger and pimento; macerate for 4 hours, and strain; boil what remains to Oiss. Mix the liquors and add sugar, so as to form a syrup. Ph. L.)* Cathartic, but apt to gripe. Dose, f ℥iv to f ℥j.

SYRUPUS RHEI, *Syrup of Rhubarb. (Rhei, in pulv. crass., ℥ij; Alcohol, Oss; Aquæ, Oiss; sacchar. ℔ij. Mix the alcohol and water; pour f ℥iv on the rhubarb, mixed with an equal bulk of sand, and allow the whole to stand four hours; put the mass into a percolator, and gradually pour on the alcohol and water. By means of a water-bath, evaporate to f ℥xij; add the sugar, and make a syrup. Ph. U. S.)* Dose to a child, as a laxative, one or two teaspoonfuls.

SYRUPUS RHEI AROMAT'ICUS, *Aromatic or Spiced Syrup of Rhubarb. (Rhei cont. ℥iiss; Caryophyll. cont., Cinnam. cont. āā ℥ss; Myrist. cont. ℥ij; Alcohol. dilut. Oij; Syrup Ovj. Macerate the rhubarb and aromatics in the diluted alcohol for 14 days, and strain; then, by means of a water-bath, evaporate the liquor to a pint,*

and while still hot, mix with the syrup previously heated. Ph. U. S.) It may also be made by the process of displacement.

The aromatic syrup of rhubarb is a gentle carminative cathartic. Dose to a child, fʒj; to an adult, fʒj.

SYRUPUS DE RHEO, Syrupus de Cichorio compositus.

SYRUPUS RHEADOS, *S. de papaveris erratici seu papaveris erratici*, Syrup of Red Poppy, (F.) Syrup de coquelicot. (Rhead. petal. recent. lbj, aq. fervent. fʒxvij, sacch. purif. lbiss. To the water, heated in a water-bath, add the petals. Remove the vessel; macerate for 12 hours; express; defecate, and add sugar to form a syrup. Ph. L.) Chiefly used to give colour.

A factitious syrup is often made of aloes, dissolved in simple syrup.

SYRUPUS ROSÆ, *S. rosa'rum soluti'vus seu e rosæ siccis seu rosæ centrifolia' seu rosa'ceus soluti'vus*, Syrup of Roses, (F.) Syrup de roses pâles. (Rosæ centif. petal. exsic. ʒvij, sacch. purif. lbvj, aq. fervent. Oiv. Macerate the petals for 12 hours. Evaporate the strained liquor to lbiss. Add the sugar. Ph. L.) Gently laxative. Dose, fʒij to fʒiiss, or more.

SYRUPUS ROSÆ GAL'LICÆ, Syrup of Red Roses, (F.) Syrup de roses rouges. (Rosæ Gallic. petal. exsic. ʒvij, aquæ bull. Oj, sacch. purif. lbvj; prepared like the last. Ph. E.) Mildly astringent. Added to stomachic infusions.

SYRUPUS SACCHARI, S. Simplex.

SYRUPUS SARSAPARIL'Æ, *S. Sarsæ*, *S. Sarzæ*, Syrup of Sarsaparilla. (Rad. Sarsap. cont. lbj, aquæ bullient. cong., sacch. purif. lbj. Macerate the root for 24 hours; boil to Oiv. Strain while hot; add the sugar, and boil. Ph. L.) Used in the same cases as the root. Dose, fʒj to fʒiv, and more.

SYRUPUS DE SARSAPARIL'LÂ ET SENNÂ COMPOSITUS, Compound Syrup of Sarsaparilla and Senna, (F.) Syrup de Cuisinier. (Rad. Sarsap. concis. lbij. Infuse for 24 hours in warm water Oxij; boil for a quarter of an hour; pass with expression, and boil again the residuum in Ox of water. Reduce this to Ovj, and repeat the operation 2 or 3 times. Mix all the liquors and boil them together with flowers of borage, white roses, senna leaves and anised, each ʒij; reduce to half; pass, and add honey lbij. Boil to a syrup. Ph. P.) It is considered to be alterant, depurative, and sudorific. Dose, fʒss to fʒij.

A similar syrup, under the name **SYRUPUS SARSAPARIL'Æ COMPOSITUS**, Compound Syrup of Sarsaparilla, is directed in the Pharmacopœia of the United States. (Sarsaparill. cont. lbj; Lign. guaiac. rasur. ʒij; Rosæ centifol., Sennæ, Glycyrrhiz. cont. āā ʒij; Ol. Sassafras, Ol. Anisi. āā ℥v.; Ol. Gaultheriæ m. iij; Alcohol. dilut. Ox.: Sacchar. lbvij. Macerate the sarsaparilla, guaiacum wood, roses, senna, and liquorice root in the diluted alcohol for 14 days; express and filter. Evaporate the tincture in a warm bath to four pints; filter, add the sugar, and form into syrup. Lastly, having rubbed the oils with a small quantity of the syrup, mix them thoroughly with the remainder. Ph. U. S.)

It may also be made by the process of displacement.

SYRUPUS SARSÆ, *S. Sarsaparillæ* — s. Sarzæ, *S. Sarsaparillæ*.

SYRUPUS DE SCAMMO'NIO, Syrup of Scammony. (Pulv. Scammon. ʒss, sacch. alb. ʒiv, alcohol. (s. g. '985 to '915) fʒvij. Heat the mixture moderately; then set fire to the alcohol with a lighted taper; agitate constantly, until the flame is extinguished. Suffer it to cool; pass through cloth, and add Syrup of Violets, fʒiv. Ph. P.)

ʒj contains 18 grains of scammony. Dose, fʒj to fʒss.

SYRUPUS SCILLÆ, *S. scillit'icus seu scillæ marit'imaæ*, Syrup of Squills. (Aet. scillæ. Oj, sacch. lbij. Ph. U. S.) Diuretic, expectorant, and emetic. Used in the same cases as the oxymel.

SYRUPUS SCILLÆ COMPOSITUS, *Mel Scillæ Compositum*, Compound Honey of Squill, Compound Syrup of Squill, Hive Syrup. (Scillæ cont.; Senegæ cont. āā ʒiv; Antim. et Potassæ Tart. gr. xlviij; Aquæ Oiv; Sacchar. lbiiiss. Pour the water upon the squills and seneka, and, having boiled to one-half, strain and add the sugar. Then evaporate to three pints, and while the syrup is still hot, dissolve in it the tartrate of antimony and potassa. It may also be made by the process of displacement. Ph. U. S.)

It is often given as an emetic in cases of croup, and in catarrh, especially in children. Dose, to infants, 10 drops to a drachm, repeated every 15 minutes, if vomiting be desirable.

SYRUPUS SEN'EGÆ, Syrup of Seneka. (Senegæ cont. ʒiv; Aquæ Oj; Sacchar. lbj. Boil the water with the seneka to one half, and strain; then add the sugar, and form into syrup. Ph. U. S.)

It may also be formed by the process of displacement.

This is a favourite stimulant expectorant [?] with many practitioners. Dose, fʒj or fʒij.

SYRUPUS SENNÆ, *S. cassiæ sennæ*, Syrup of Senna. (Sennæ ʒij, sem. fenicul. cont. ʒj, sacch. pur. ʒxx, aquæ bullient. Oj. Macerate the senna leaves and fennel-seeds with a gentle heat for an hour. Strain; add the sugar, and make into a syrup. Ph. U. S.) Cathartic. Dose, fʒij to fʒiiss, or more.

The Parisian Codex has a *Syrupus de Sennâ* of a compound character, called *Syrupus de pomis compositus*, (F.) Syrup de pommes composé. It contains, also, borage, bugloss, &c. Dose, fʒss to fʒij.

SYRUPUS SIMPLEX, *Syrupus* (Ph. U. S.), *S. Sacchari*, *Saccharum clarificatum*, *Liquidum*, Simple Syrup, Syrup, Common syrup of capillaire. (Sacch. purif. lbiiiss, aquæ Oj. Dissolve the sugar; set aside for 24 hours; remove the scum, and pour off the clear liquid.) Used to cover nauseous tastes, &c.

SYRUPUS DE SPINÂ CERVINÂ, Syrupus rhamnii — s. de Stœchade communis, see Lavendula.

SYRUPUS TOLUTANUS, *S. Toluta'ni seu tolu't'era balsami seu balsam'icus*, Balsamic syrup, Syrup of tolu. (Tinct. Tolut. fʒiiss; Aquæ Oj; Sacchar. lbiiiss. Mix the tincture with the sugar in coarse powder; expose it on a shallow dish to a gentle heat, until the alcohol has evaporated; pour the water upon it; heat gradually until the sugar is dissolved, and strain. Ph. U. S.) Used to give flavour.

SYRUPUS VI'OLÆ, *S. violæ odorat'æ*, *S. violæ'rum*, *S. e succo violæ'rum*, Syrup of Violets. (Flor. recent. viol. odorat. lbij, aq. bull. Oviij, sacch. pur. lbx. Macerate in a covered vessel, for 24 hours; pass, without expression, through linen; add the sugar so as to form a syrup. Ph. E.) Very gently laxative. Dose, fʒj to fʒij.

SYRUPUS E SUCCO VIOLARUM, *S. violæ*.

SYRUPUS ZINGIB'ERIS, *S. amo'ni zingiberis*, Syrup of Ginger, (F.) Syrup de gingembre. (Tinct. Zingib. fʒiv; Aquæ Oiv; Sacchar. lbx. Mix the tincture with four pounds of the sugar in coarse powder; and expose it in a shallow dish to a gentle heat until the alcohol has evaporated. Add the rest of the sugar, and then the water in a covered vessel; heat gradually until the sugar is dissolved, and strain. Ph. U. S.) To the strained liquor add the sugar, and form a syrup.

N. B. The Parisian Codex contained a few other compound syrups besides those enume-

rated; amongst these is a *Syrup of calf's lungs*, *Syrupus e pulmon'ibus vituli'nis*, (F.) *Syrop de mou de veau*, as an expectorant.

These syrups are made according to the usual rule, and possess the virtues of the substances after which they are named.

SYS, Sym.

SYSPA'SIA, from *συσπαιω*, (*συν*, and *σπαιω*, 'I draw,') 'I contract.' Clonic spasm, with diminished sensibility and inability of utterance. A genus in Good's Nosology, which includes convulsion, epilepsy, and hysteria.

SYSPASIA CONVULSIO, Convulsion—s. Epilepsia, Epilepsy—s. Hysteria, Hysteria.

SYSSARCO'SIS, from *συν*, 'with,' and *σαρξ*, *σαρκος*, 'flesh.' *Commissu'ra ossium car'nea*, *Symph'ysis ossium muscula'ris*, *Connex'io ossium carno'sa*, *Χρνα'τιο*, *Concarna'τιο*. Union of bones by means of muscles; such as the union of the os hyoides with the lower jaw, of the scapula with the ribs, &c.

SYSTALCIS, Systole.

SYSTAL'TIC, *Systal'ticus*, *Peristaltic*; from *συστελλω*, (*συν*, and *στελλω*,) 'I contract.' A *systaltic motion* in a part is one in which there is alternate contraction and dilatation. See Systole.

SYSTATICA, from *συνιστημι*, (*συν*, and *ιστημι*, 'I place,') 'I associate.' Diseases affecting several or all of the sensorial powers simultaneously; irritation or inertness of mind, extending to the muscles, or external senses; or of the muscles, or external senses, extending to the mind;—the 4th order, class *Neurotica*, of Good.

SYSTEM, *Syste'ma*, from *συν*, 'together,' and *ιστημι*, 'I place.' This word, taken in a good sense, means the collection and arrangement of different matters having an analogy to each other, or working towards the same end. In natural

history, it means a methodical arrangement of objects for the purpose of facilitating their study. System is, however, sometimes used in an unfavourable sense in physical science, and often means,—a purely gratuitous supposition, by which the march of nature is attempted to be universally explained, and to which every thing is made to bend. In anatomy, system is an assemblage of organs, composed of the same tissues, and intended for similar functions; for instance, the *nervous system*, *muscular system*, &c.

SYSTEMA, System—s. Vasorum, Vascular system.

SYS'TEMATISM. A method, according to which every fact of a science is collected around an opinion, true or false. One who reduces things to such a method is called a *Sys'tematist*.

SYSTEMATIST, see Systematism.

SYSTEMATOLOGY, *Systematolog'ia*, from *συστημα*, 'system,' and *λογος*, 'a discourse.' The doctrine or a treatise of systems.

SYSTÈME VASCULAIRE À SANG NOIR, see Vascular—s. *Vasculaire à sang rouge*, see Vascular.

SYS'TEMIC. Belonging to the general system—as '*systemic circulation*' in contradistinction to the '*pulmonic*.'

SYS'TOLE. Same etymon as Systaltic. *Systal'sis*, *Constrict'io*, *Contract'io* seu *Angusta'tio* seu *Submissio* seu *Mica'tio cordis*. The movement of constriction or contraction of the heart, to give impulse to the blood, or to cause its progression. It is opposed to the *Diastole* of the organ.

SYS'TOLIC, *Systal'licus*, (F.) *Systolique*; same etymon. Relating to the systole of the heart,—as '*systolic murmur*.'

SYZYGIIUM NERVORUM, Par nervedum.

T.

T BANDAGE, *T fas'cia*, *Fas'cia T formis* seu *Heliodo'ri*, *Cru'cial Bandage*. A bandage shaped like the letter T. It consists of a strip of linen, of variable length and breadth, the middle of which is attached, at right angles, to the extremity of another strip, also of variable length and breadth. When two such strips are attached, at a distance from each other, the bandage is called a *double T*. This bandage is used, principally, for supporting the dressings after the operation for fistula in ano, in diseases of the perinæum, groin, anus, &c.

T FASCIA, T Bandage.

TABAC, *Nicotiana tabacum*—*t. des Savoyards*, *Arnica montana*—*t. des Montagnes*, *Arnica montana*—*t. des Vosges*, *Arnica montana*.

TABACUM, *Nicotiana tabacum*.

TAB'ANUS, called, by the *voyageurs*, *Bulldog*. A troublesome fly in the Hudson's Bay territory, which makes a perforation like a leechbite, from which it sucks the blood.

TABARZET, *Saccharum album*.

TAB'ASHEER, *Tabaschir*, *Tabazir*. A substance found in the knots of the bamboo, in the East Indies, as a consequence of a morbid condition of the part. It is distinguished for its great proportion of silicic acid, in combination with a small quantity of mineral and vegetable matters; as well as for its slight refractive property. It has been used in obstruction of the bowels. The

sweet juice of the bamboo stalks has also been called *Tabasheer*.

TABEFACIION, Emaciation.

TABEFY, Emaciate.

TABEL'LA, *Tab'ula*, *Tabula'tum*, *Lozan'ga*, *Lozan'gia*, *Morsulus*, *Morsellus*, *Lozenge*, *Tessell'a*, (F.) *Tablette*, 'a small table.' A solid medicine, composed of a powder, sugar, and mucilage, *Electuar'ium sol'idum*; and generally shaped like a disk. See Pastil, and Troch. The three comprise the *Saccharolés solides*.

TABELLA, Table.

TABELLÆ ABSORBENTES, T. de Magnesiâ.

TABELLÆ AC'IDI OXAL'ICI, *T. ad sitem*, *Lozenges of Oxalic Acid*. (*Acid. oxalic. ʒi*, *sacch. alb. ʒss*, *ol. limonis*, *gtt. xvij* seu *gtt. xij*). Make into lozenges with mucilage of gum tragacanth. (*Ph. P.*) Lozenges are made in the same way with the citric and tartaric acids. They are refrigerant.

TABELLÆ DE ALTHÆ'Â, *Lozenges of Marsh-mallows*. (*Rad. althææ pulv.*, *ʒi* *ss*, *sacchar. alb. pulv. ʒivss*; *f. massa. Ph. P.*) Demulcent; expectorant.

TABELLÆ ANTIMONIA'LES KUNCKE'LII, *T. de stib'i sulphure'to*, *Lozenges of Sulphuret of Antimony*, *Morsuli antimonial'es seu stibii seu stib'i-ati*, *Trochis'ci stibiani*. (*Amygdal. dulc. ʒj*, *sacch. lbs*, *sem. cardam.*, *cinnam. pulv.*, *sulph.*

antim. præpar., āā ʒij; flant tabellæ. *Ph. P.* Each to weigh 10 grains.) Recommended in cutaneous diseases, blennorrhagia, arthritic pains, &c. Dose, 4 or more.

TABELLÆ AD ARDOREM VENTRICULI, Trochisci carbonatis calcis — t. Cardialgiæ, Trochisci carbonatis calcis.

TABELLÆ DE CAT'ECU ET MAGNE'SIÅ, *Lozenges of Catechu and Magnesia*, (F.) *Tablettes de cachou et de magnésie*. (P. catech. ʒvj, p. magnes. ʒiv, p. cinnam. ʒiij, sacch. alb. lbss, g. tragac. gr. xij, aq. cinnam. q. s. ut f. massa. *Ph. P.* Each to weigh 12 gr.) Antacid, absorbent, and stomachic. Dose, 5 to 10 lozenges.

TABELLÆ CINCHO'NÆ, *T. de kinâ kinâ, Bark Lozenges*. (Ext. cinchon. sicc. ʒss, sacch. ʒiv, cinnam. ʒss, mucilag. g. trag. q. s. ut f. massa. *Ph. P.*) Tonic.

TABELLÆ DE CITRO ET DIACARTHAMO, T. de Scammonio et Sennâ.

TABELLÆ DE FERRO, *Steel lozenges, Tabulæ martiales seu restaurantes seu antichlorotice*. (Ferri limat. porphyriz. ʒss, p. cinnam. ʒj, p. sacch. ʒv, g. trag. et aq. cinnam. q. s., ut fiat massa. Each lozenge to weigh 12 gr. *Ph. P.*) Tonic, stomachic. Dose, v to x.

Aromatic lozenges of steel. These consist of sulphate of iron, with a small proportion of the Tincture of Cantharides.

TABELLÆ DE KINÅ KINÅ, T. cinchonæ.

TABELLÆ DE MAGNESIÅ, *T. absorbentes, Magnesia lozenges*. (Magnes. ʒj, sacchar. alb. ʒiv, mucil. g. tragac. q. s. *Ph. P.*) Absorbent and antacid.

TABELLÆ DE RHEO, *Rhubarb lozenges*. (P. rhej. ʒss, sacch. ʒv, mucilag. gum. tragac. q. s.; f. massa. Each to contain 12 grains. *Ph. P.*) Stomachic and laxative.

TABELLÆ DE SCAMMONIO ET SENNÅ COMPOSITÆ, *T. de citro et diacarthamo, Compound lozenges of scammony and senna*. (Scammon. ʒiij, Sennæ ʒivss, rhej. ʒiss, caryoph. ʒj, corticis limon. confect. ʒj, sacch. ʒvj; f. massa. *Ph. P.*) Purgative. Dose, ʒij to ʒvj, or more.

TABELLÆ AD SITEM, T. acidi oxalici — t. ad Sodam, Trochisci carbonatis calcis — t. de Stibii sulphureto, T. antimonialis Kunckelii.

TABELLÆ DE SULPHURE SIMPLICIS, *Simple sulphur lozenges*. (Sulphur lot. ʒss, sacch. ʒiv, muc. g. tragac. cum aquâ rosâ præpar. q. s. *Ph. P.*) Expectorant, demulcent, &c. Used in diseases of the chest, and in cutaneous affections. Dose, a lozenge.

TABELLÆ DE SULPHURË COMPOSITÆ, *Compound sulphur lozenges*. (Sulph. lot. ʒij, acid. benzoic. gr. xij, rad. irid. p. ʒss, ol. anisi, gtt. viij, sacch. ʒvss, g. trag. q. s. *Ph. P.*) Aperient, expectorant, and stimulant [?]. Dose, 4 a day.

TABERNA MEDICA. Pharmacopolium.

TABERNÆMONTANA U'TILIS, (after Tabernæmontanus, a German botanist.) A tree of British Guiana, of the family Apocynaceæ, called, by the natives, *Hya-Hya*, the bark and pith of which yield a milk, which is used by the savages as a refreshing drink.

TABES, *Marasmus Tabes, Tabum*, from *tabere*, 'to decay;' *Te'kedon, Atroph'ia, Tab'idness, Decline, Wasting*. Emaciation of the whole body, with general languor, hectic fever, and, for the most part, depressed spirits.

TABES, Atrophy, Phthisis — t. Coxaria, Ischiophthisis — t. Diabetica, Diabetes mellitus — t. Diuretica, Diabetes mellitus.

TABES DORSALIS, T. *Dorsalis*, *Marasmus tabes dorsalis, Phthisis no'tias seu dorsalis seu sicca, Myelophthisis, Myelatroph'ia, Myelomalosis, Tabes ossis sacri*. A wasting of the body, attended at first with a pain in the back or loins, and afterwards in the neck or head, — caused, it

has been conceived, by too early or too frequent addition to venery.

TABES GLANDULARIS, T. mesenterica, Scrofula — t. Ischiadica, Ischiophthisis — t. Lactea, Atrophia lactantium, see Galactia.

TABES MESENTERICA, T. *glandularis seu scrofulosa, Atroph'ia mesenterica seu infantum seu glandularis seu infantilis seu dorsi, Parabys'ma mesentericum, Macies Infantum, Pædotroph'ia, Scrof'ula seu Rachial'gia seu Physco'nia mesenterica, Myelophthisis sicca, Febris hec'tica infantum, Phthisis mesar'ica, Mesenterophthisis, Mesenteric Disease*, (F.) *Carreau, Chartre, Scrofules ou Écrouelles mémentériques, Étisie ou Rachialgie ou Atrophie ou Physconie mémentérique, Entéro-mésentérique, Tubercules des ganglions mémentériques, Phthisie mémentérique*. An engorgement and tubercular degeneration of the mesenteric glands, followed by emaciation and general disorder of the nutritive functions. The disease is often owing to inflammation or irritation of the lining membrane of the intestines, giving occasion to enlargement of the glands of the mesentery, — as injury to the upper or lower extremities causes inflammation, and enlargement of the lymphatic glands of the axilla and groin. It occurs, particularly, in children of a serofulous diathesis; and in those who are weaned too early, or fed on indigestible substances. Diarrhoea, emaciation, anorexia, or immoderate appetite; hardness and swelling of the abdomen; and, towards the end, hectic fever, are the chief symptoms of this affection; the prognosis of which is unfavourable. On opening the bodies of those who die of the disease, the mesenteric glands are found disorganized, tubercular, or in a more or less advanced state of supuration. The treatment is the same as in scrophulosis. Frictions may be added over the abdomen and spine; and mercury, in small doses, so as to excite a new action in the system. The food must be easy of digestion, and the bowels be kept soluble.

TABES NUTRICUM, Atrophia lactantium, see Galactia — t. Ossis sacri, Tabes dorsalis — t. Pectorea, Rachitis — t. Pulmonalis, Phthisis pulmonalis — t. Scrofulosa, T. mesenterica — t. Senum, Marasmus senilis.

TABESCIERE, Emaciate.

TABID, *Tab'idus*, (F.) *Tabide*. Same etymon as *Tabes*. Relating or appertaining to *tabes*. Wasted by disease.

TABIDNESS, *Tabes*.

TABIFIC, *Tabificus*, (F.) *Tabifique*, from *tabes*, 'consumption,' and *facere*, 'to make.' That which causes consumption or phthisis.

TABLE, *Tab'ula, Tabell'a, Tabula'tum, Lam'ina, Paries, Squama*. A name given to the plates of compact tissue, which form the bones of the cranium. Of these, one is external; the other *internal*, and called *Tab'ula vitrea*, on account of its brittleness.

TABLES DE MORTALITÉ, Mortality, bills of.

TABLET, Trochiscus — t. Votive, Tabula votiva.

TABLETTE, Tabella.

TABLETTES DE CACHOU ET DE MAGNÉSIE, Tabellæ de catechu et magnesiâ.

TABLIER, Ventrale cutaneum.

TABOURET, Thlaspis bursa.

TABULA, Tabella, Table.

TAB'ULA VOTI'VA, *Votive tablet*. A tablet, hung up as an offering — *anathema* — in the ancient temples by the sick, descriptive of their diseases, and mode of cure; or by those who had been preserved from some calamity.

TABULÆ ANTICHLOROTICÆ, Tabellæ de ferro —

t. *Instaurantes*, Tabellæ de ferro — t. *Martiales*, Tabellæ de ferro.

TABULATUM, Tabella, Table.

TABUM, Ichor, Sanies, Tabes.

TAC, Influenza.

TACAMAHACA, Fagara octandra — t. Caragna, Caranna.

TACCA OCEANICA, see Arrowroot, (Tahiti.)

TACHE, Macula.

TACHE CÉRÉBRALE, Tache méningitique.

A red mark or stain, observable in a large number of hydrocephalic children, when pressure is made on the skin. — Trousseau.

TACHE EMBRYONNAIRE, 'Embryonic spot'; *Cu'mulus*, *C. germinativus* seu *prolig'erus*, *Ar'ea germinati'va*, *Nu'cleus cicatricul'æ* seu *blastoderm'utis*, *Ger'minal cu'mulus*. A name given by M. Coste to a spot seen on the blastodermata about the end of the first week, from which the development of the embryo proceeds.

According to Bischoff, the blastodermic vesicle consists here of a double layer, (F.) *Feuillet* — the upper one the *serous* or *animal*; the lower, the *mucous* or *vegetative*; and between these is afterwards formed the *vascular layer*.

TACHE GERMINATIVE, see Molecule — t. *Mélanienne*, see *Nævus* — t. *Méningitique*, *Tache cérébrale* — t. *de Naissance*, *Nævus* — t. *Sanguine*, see *Nævus*.

TACHENCAUSIS, Combustion, human.

TACHES HÉPATIQUES, Chloasma.

TACHES LAITEUSES, *Plaques laiteuses*, 'milky spots or patches.' White spots occasionally seen on the heart, and regarded by many pathologists as the results of previous pericarditis.

TACHES DE ROUSSEUR, Ephelides — t. *Rouges*, Spots, red.

TACHÉTÉ DE ROUSSEURS, see Ephelides.

TACHYIA'TER, *Tachyia'trus*. Same etymon as the next. One who cures speedily.

TACHYIATRI'A, from *ταχυς*, 'quick,' and *ιατρευ*, 'healing.' The art of curing quickly.

TACH'Y'TOMY, *Tachytom'ia*, from *ταχυς*, 'quick,' and *τομη*, 'incision.' The art of cutting or operating rapidly.

TACITUR'NITY, *Tacitur'nitas*, *Sigē*, 'silence,' from *tacere*, *tacitum*, 'to be silent.' 'State of a person who does not speak.' Morbid taciturnity sometimes exists as a symptom of the neuroses, especially of melancholy.

TACT, *Tactus*, from *tungere*, *tactum*, 'to touch.' A modification of the sense of touch. Passive judgment by the cutaneous nerves regarding bodies exterior to the skin. Tact is passive: Touch, active.

TACTILE, *Tactilis*; same etymon. Relating or pertaining to touch.

TACTION, Touch.

TACTUS, Tact, Touch — t. *Dolorificus*, *Haptodysp'horia* — t. *Eruditus*, see *Palpation*.

TAE, *Digitus pedis*.

TÆDA, *Teda*, *Dæs*, *δαις*, 'a torch.' A term used for a medicine employed under the form of fumigation, pessary, or troch.

TÆNIA, *Te'nia*, *Fas'cia*, from *ταenia*, 'a fillet, a riband.' See *Bandage*. Also a genus of intestinal worms, characterized by an elongated, flattened, and articulated body, with four suetorial oscula on the head. Of this genus, two only inhabit the human body — the *Tænia lata*, (see *Bothriocephalus latus*), and *Tænia solium*.

TÆNIA ACEPHALA, *Bothriocephalus latus* — t. à *Anneaux courts*, *Bothriocephalus latus* — t. à *Anneaux longs*, *Tænia solium* — t. *Articulos demitteus*, *Tænia solium* — t. *Cucurbitina*, *Tænia solium* — t. *Dentata*, *Bothriocephalus latus* — t. *Grisea*,

Bothriocephalus latus — t. *Hippocampi*, *Corpora ambriata* — t. *Humana armata*, *Tænia solium* — t. *Humana incrimis*, *Bothriocephalus latus* — t. *Hydatigena*, *Hydatid* — t. *Lata*, *Bothriocephalus latus* — t. à *Longues articulations*, *Tænia solium* — t. *Membranacea*, *Bothriocephalus latus* — t. *Nervosa Halleri*, *Ganglion of Gasser* — t. *Non armé*, *Bothriocephalus latus* — t. *Osculis laterilibus geminis*, *Bothriocephalus latus* — t. *Osculis laterilibus solitariis*, *Bothriocephalus latus* — t. *Osculis marginalibus solitariis*, *Tænia solium* — t. *Osculis superficialibus*, *Bothriocephalus latus* — t. *Prima*, *Bothriocephalus latus* — t. *Sans épine*, *Tænia solium* — t. *Secunda*, *Tænia solium*.

TÆNIA SEMICIRCULAR'IS, *T. striat'a*, *Gem'inum centrum semicircula'rè*, *Limbus poste'rior cor'poris striat'i*, *Stri'a cor'næ* seu *semiluna'rè seu termina'les*, *Fræ'nulum novum*, *Fascia semicircula'ris*, (F.) *Bandelette des éminences pyriformes* (Ch.), *Bandelette*, *B. demicirculaire*, *Lame cor'née*. A medullary, grayish, semitransparent layer, situated in the groove that separates the thalamus opticus from the corpus striatum in the lateral ventricle.

TÆNIA SOLIUM, *T. os'culis marginal'ibus solita'riis* seu *cucurbiti'na* seu *humana armata* seu *articulos demittens* seu *secunda*, *Hal'ysis solium*, *Vermis cucurbiti'nus*, *Lumbri'cus latus*, *Sol'ium*, *Tænia sans épine* ou à *longues articulations* ou à *anneaux longs*, *Ver solitaire* ou *cucurbitin*, *Long Tape Worm*, has an almost hemispherical, discrete head; an obtuse beak; the neck full anteriorly; all the joints slightly obtuse, the anterior very short; the next almost square, and the rest oblong; the marginal foramina vaguely alternated. The *tænia solium* is commonly a few feet long; sometimes its length is enormous. It is said to have been met with 600 feet long. It principally inhabits the small intestines, and is not common. The oil of turpentine, in some form, largely exhibited, is perhaps the best remedy.

TÆNIA STRIATA, *T. semicircularis* — t. *Tarini*, *Lamina cornea* — t. *Tenella*, *Bothriocephalus latus* — t. *Vulgaris*, *Bothriocephalus latus*.

TÆNIACIDE, *Tæniacuge*.

TÆNIE COLI, see *Colon* — t. *Valsalvæ Coli*, see *Colon*.

TÆNIAFUGE, *Tæ'nifuge*, *Tæ'niacide*, *Tæ'nicide*, *Tæni'afugum*, from *tænia*, and *fugo*, 'I drive off.' A remedy calculated to expel or destroy *tænia*.

TÆNICIDE, from *tænia*, and *cædo*, 'I kill.' A destroyer of *tænia* or tapeworm.

TÆNIFUGE, *Tæniacuge*.

TÆNIOLA, *Bandelette*; diminutive of *Tænia*. Used by Gerber for a simple, band-like, or flat fibre, *Filum tæniiform'e*, seen under the microscope.

TAFFETAS AGGLUTINATIF, *Sparadrapum adhæsivum* — t. *d'Angleterre*, see *Sparadrapum adhæsivum* — t. *Épispastique*, *Sparadrapum vesicatorium* — t. *Gommé*, see *Sparadrapum adhæsivum* — t. *Vésicant*, *Sparadrapum vesicatorium*.

TAFIA, *Rum*.

TAIE, see *Caligo*.

TAILLAGE, *Incision*, see *Entaille*.

TAILLE, *Lithotomy* — t. *Hypogastrique*, *Hypogastric operation of lithotomy*, see *Lithotomy* — t. *Postérieure*, see *Lithotomy* — t. *Recto-vésicale*, see *Lithotomy* — t. *par le Rectum*, see *Lithotomy* — t. *Sus-pubiène*, see *Lithotomy*.

TAKAMAHAKA, *Fagara octandra*.

TAKE, *Attack*.

TAKEN DOWN, see *Attack*.

TAKING, see *Contagious*.

TAL. A word formerly employed for *alkali*. It also meant the dung of the peacock.

TALC EARTH, Magnesia.

TALCUM NEPHRITICUM, Nephreticus lapis.

TALENTUM, *ταλαντον*. An ancient weight equal to 54 pounds, 2 oz., 5 dr., and 24 grains. *Poids de Marc*. See Weights and Measures.

TALEOLUS, Malleolus.

TALIAOTIAN OPERATION, Rhinoplastic.

TALINUM UMBELLATUM, see *Mistura*.

TALIPES, Kyllosis (Clubfoot) — t. Calcaneus, see Kyllosis — t. Equinus, see Kyllosis — t. Valgus, see Kyllosis — t. Varus, see Kyllosis.

TALLAHATTA SPRINGS, see Alabama, mineral waters of.

TALON, see Calcaneum.

TALPA, 'a mole.' *Topina'ria*, *Tupina'ria*, *Talpa'ria*, *Testu'do*, (F.) *Taupe*. A tumour situate on the head, which has been supposed to burrow like a mole.

TALPARIA, Talpa.

TALUS, Astragalus, Malleolus, see Calcaneum. *Pessary*.

TAMARA CONGA, Averrhoa carambola.

TAMARÆA ZECLA, Tamarindus.

TAMARIN, Tamarindus.

TAMARIN'DI PULPA, *Pulp of Tamarinds*, (*Tamarinda*, q. s. Digest them with a small quantity of water, until they become of a uniform consistence; then separate the seeds and filaments, by pressing through a hair-sieve. Ph. U. S.)

TAMARINDS, PULP OF, Tamarindi pulpa.

TAMARIN'DUS, *T. Indica*, *Thamarindus*, *Oxyphœnicon*, *Sil'iqua Arab'ica*, *Balampu'li*, *Tamaræa zecla*, *Oxyphœnicia*, *Acæ'cia Indica*, *Tamarind tree*, (F.) *Tamarin*. Ord. Leguminosæ. *Sez. Syst.* Triandria Digynia. The pulp of the tamarind with the seeds connected by numerous tough strings, *Tamarindus* (Ph. U. S.), is exported from the West Indies, preserved in syrup. It is refrigerant and laxative. *Tamarind whey* is made by boiling $\frac{3}{4}$ ij of the pulp with Biss of milk. When strained, it is used as a diluent in fever.

TAMARISCUS, Tamarix Gallica.

TAMARIX, *T. Gal'lica* seu *Pentan'dra*, *Tamariscens*. The *Tamarisk tree*. Ord. Tamariscinæ. *Sez. Syst.* Pentandria Pentagynia. The bark, wood, and leaves were formerly employed medicinally; — the former for its aperient and corroborant virtues, in obstructions of the liver; the latter in icterus, hæmoptysis, and some cutaneous affections.

TAMBOUR, *CAVITÉ DU*, Tympanum.

TAMPA BAY, see Saint Augustine.

TAMPON, see Plugging.

TAMPONNEMENT, Plugging.

TAMUS COMMUNIS, *Am'elos melæ'na* (Dioscorides), *Chiro'nia*, *Gynæcan'thê* seu *Apro'nia* (Pliny), *Bryo'nia nigra*, *Common Black Bry'ony*. The root is diuretic, and has been given as an antilithic. In the herb-shops of Europe, it is sold as a topical application for removing bruise marks, and in France is called *Herbe aux femmes battues*; 'herb for beaten or bruised women.'

TANACE'TUM, *T. vulgare*. *Tana'sia*, *Athana'sia*, *Parthénium mas*, *Hind-heel*, *Tansy*, (F.) *Tanaïsie vulgaire*, *Herbe aux vers*, *Coq des Jardins*. Ord. Compositæ. *Sez. Syst.* Syngenesia Polygamia. The leaves and flowers of tansy have a peculiar, strong odour, and warm bitter taste. They are tonic, deobstruent [?], and antihelmintic. Dose, \mathfrak{z} ss to \mathfrak{z} j. The infusion is usually drunk as tea.

TANACE'TUM BALSAMI'TA, *T. horten'se*, *Balsamita mas* seu *vulgaris* seu *suav'oleus* seu *major*, *Costus horto'rum*, *Mentha Roma'na* seu *Saracœ'lica*, *Costmary*, *Alecost*, *Cock-mint*, (F.) *Menthe cog*, *Herbe au coq*, *Grand Baume*. A fragrant-smelling herb, somewhat resembling mint, and

formerly much esteemed as a corroborant, carminative, and emmenagogue.

TANACETUM HORTENSE, *T. balsamita*.

TANACE'TUM MULTIFLO'RUM, A South African plant, which is used as a tonic, antispasmodic and anthelmintic. It is given in flatulency, gout, amenorrhœa and dropsy; but is especially prescribed in cases of ascarides lumbricoïdes and other entozoa. It is administered in the form of powder or infusion; the latter acting also as a diaphoretic and diuretic. It is used likewise as a resolvent and anodyne fomentation.

TANAISIE VULGAIRE, Tanacetum.

TANASIA, Tanacetum.

TANGE, *ταγγη*, 'rancidity.' A putrescent tumour.

TANGHINIA, *Cerbera tanghin*.

TANGLES, BIG, *Pila marina* — t. Blue, *Gaussacia dumosa*.

TANINUM, Tanninum.

TANNIC ACID, Tannin.

TANNICUM PURUM, Tannin.

TANNIN, from (F.) *tanner*, 'to tan.' *Tanninum purum*, *Tanninum*, *Taninum*, *Principium Adstringens* seu *Scytodep'sicum* seu *Byrsodep'sicum* seu *Cora'cedum*, *Scytodep'sicum*, *Mate'ria Scytodeph'ica*, *Acidum Tan'nicum* seu *Scytodeph'icum* seu *Quereitan'nicum*, *Tannic acid*, (F.) *Acide tannique*. A principle obtained from oak bark and other astringent vegetables, so called from its forming the principal agent in the process of tanning. Pure tannin, obtained from galls, by the action of ether, (see Ph. U. S.) has been employed as an excellent and powerful astringent. Dose, two grains, repeated several times a day.

TANSY, Tanacetum — t. Wild, *Potentilla anserina*.

TAPER, HIGH, *Verbasum nigrum*.

TAPE'TUM, *Tapes*, *Tapetê*, 'tapestry, a carpet.'

Tapetum choroïdeæ. A shining spot, on the outside of the optic nerve, in the eyes of certain animals, which is owing to the absence of the pigmentum nigrum, occasioning the reflection of a portion of the rays from the membrana Ruyschiana. Its use appears to be, by reflecting the rays, to cause a double impression on the retina, and thus add to the intensity of vision.

TAPE'TUM, see Corpus Callosum.

TAPE'TUM ALVE'OLI, *Membrana exter'na den'tium*. The outer membrane of the teeth. The lining membrane or periosteum of the alveoli.

TAPE'WORM, BROAD, *Bothriocephalus latus* — t. Long, *Tenia solium*.

TAPIOCA, see *Jatropha manihot* — t. Pearl, see *Jatropha manihot*.

TAPSUS BARBATUS, *Verbasum nigrum*.

TAPSARIA, *Decoctum hordei*.

TAR, see *Pinus sylvestris* — t. Barbadoes, *Petroleum*.

TAR BEER, see *Pinus sylvestris*.

TAR, MINERAL, *Pissasphaltum*.

TAR WATER, see *Pinus sylvestris* — t. Wine, see *Pinus sylvestris*.

TAR'ACHE, *Tarax'is*, *Tarag'ma*, *Tarag'mus*, 'disorder.' A disorder of sight which arises from a blow, compression of the eye, or the action of dust, smoke or other external cause. By some, it is understood to signify mild or incipient ophthalmia.

Taraxhê ths kolias, 'disturbance of the belly.' *Diarrhœa*.

TARAGMA, *Tarache*.

TARAGMUS, *Tarache*.

TARAGON, *Artemisia dracunculus*.

TARAH0, *Peltandra Virginia*.

TARANTISM'US, *Tarentis'mus*, *Tarantalism'us*, *Dinoma'nia*, *Chore'a Sancti Valenti'ni*, *Tarentulism*, *Tar'antism*, from *Tarentum*, or *Taranto*, where it was observed. A feigned or

imaginary disease in Apulia, characterized by excessive avidity for dancing at the sound of instruments, and which was ascribed, by the vulgar, to the bite of the tarantula. A sort of tarantism, considered peculiar to Africa, and believed to be spontaneous, has been called *Tarentismus Tangitannus*, *Javon-tarentisme*.

TARANTULA, Same etymon. *Tarentula*, (F.) *Tarentule*. A species of spider—the *Ara'nea Tarentula* of Linnæus, *Lycosa Tarentula* of Latreille—whose bite has been looked upon as dangerous. Music has been thought to cure it.

TARASCON, MINERAL WATERS OF. Chalybeate springs in the department of Arriège, France. They contain iron and carbonic acid.

TARAXACUM, *Leontodon taraxacum* — t. *Dens leonis*, *Leontodon taraxacum*.

TARAXIS, Tarache, see Ophthalmia.

TARCHON SYLVESTRIS, Achillea ptarmica.

TARENTISMUS, *Tarautismus* — t. *Tangitannus*, *Tarantismus*.

TARENTULA, *Tarantula*.

TARENTULISM, *Tarantismus*.

TARGAR, *Juniperus communis*.

TARI. Palm or cocoa wine, from which sugar was obtained, called *Jagre*. It was once used as a tonic.

TARINI PONS, (F.) *Pont de Tarin*. A cineritious substance, between the corpora albicantia, which unites the crura and assists in forming the bottom of the third ventricle. The fossa, at the bottom of which it is placed, is called *Locus perforatus posticus*, *Posterior perforated space*, *Substantia seu Lamina perforata posterior*.

TARO, *Arum esculentum*.

TARSAL, *Tar'seus*, from *tarsus*, (F.) *Tarsien*. That which relates to the tarsus.

TARSAL ARTICULATIONS result from the union of the bones of the tarsus with each other.

TAR'SEA LATA (LIGAMENTA). Three ligaments, described by Winslow as stretching from the edge of the orbit to that of the tarsi, with which, he thought, they formed a complete layer of the eyelids. Zinn could not trace the ligaments all the way to the tarsi; whilst Haller doubted altogether their ligamentous texture, and Zeis regards them as merely areolar substance.

TARSEUS, *Tarsal*.

TARSO, in composition, belonging or relating to the tarsus.

TARSO-METATAR'SAL, *Tarso-metatar'seus*. That which relates to tarsus and metatarsus.

TARSO-METATARSAL ARTICULATIONS are those between the bones of the second row of the tarsus and the metatarsal bones. The term *Tarso-metatarsal* is likewise applied to ligaments connected with these joints, some of which are *dorsal*, and others *plantar*.

TARSO-MÉTATARSAL-PHALANGIEN DU POUCE, *Adductor pollicis pedis* — t. *Phalangiën du pouce*, *Flexor brevis pollicis pedis* — t. *Sous-phalangiën du petit orteil*, *Flexor brevis minimi digiti pedis* — t. *Sous-phalangiëtien du premier orteil*, *Flexor brevis pollicis pedis*.

TAR SOPHY'MA, from *Tarsus*, and *φύμα*, 'a tumour.' A swelling of the tarsus.

TARSOR'RHAPHY, *Tarsorrhaph'ia*, from *tarsus*, 'the tarsal cartilage,' and *ραφή*, 'suture.' An operation for diminishing the size of the opening between the eyelids, when it is enlarged by surrounding cicatrices.

TARSOT'OMY, *Tarsotom'ia*, from *tarsus*, and *τομή*, 'incision.' The section or removal of the tarsal cartilages.

TARSUS, *ταρσος*, *Planta prima* seu *Rasse'ta* seu *Rasse'ta pedis*, *Pe'dium*, *Clavic'ula pedis nodus*. I. The posterior part of the foot. The tarsus consists of 7 bones, arranged transversely in two rows, between which amputation is sometimes

performed. The *first* or *Tibial row*, (F.) *Première rangée*, *R. jambière*, consists of the astragalus and os calcis; the *second* or *metatarsal*, (F.) *Seconde rangée*, *R. métatarsienne*, of the scaphoides, cuboides, and three ossa cuneiformia. 2. The *Tarsi*, *Tarsal cartilages*, *Tarsal fibro-cartilages*, *Orchoi*, *Crepid'ines* seu *Coro'næ* seu *Chelæ* seu *Un'gulæ Palpebrarum*, *Tharsi*, *Cil'ia*, are two small cartilaginous layers, seated in the substance of the free edge of each eyelid. The upper is larger and broader than the lower. Both commence at the bifurcated extremity of the tendon of the orbicularis palpebrarum, and pass to the opposite commissure of the eyelids. They are broader in the middle than at their extremities.

TARTAR, *Antimonium tartarizatum* (improperly), *Potassæ supertartaras impurus* — t. *Calcareous*, *Potassæ subcarbonas* — t. *Crystals of Potassæ supertartaras*.

TARTAR EMETIC, *Antimonium tartarizatum*.

TARTAR, SALT OF, see *Potash*, and *Potassæ subcarbonas* — t. *Soluble Potassæ tartaras*, see *Potash*. **TARTAR OF THE TEETH**, *Odontolithos*.

TARTA'REI MORBI. A term employed by Paracelsus to designate certain diseases which he attributed to tartar.

TARTARI CRYSTALLI, *Potassæ supertartaras*.

TARTAR'IC ACID, *Ac'idum tartar'icum* seu *tartar'osum* seu *tart'ari essentia'te*, *Acor tartar'icus*, *Sal tartari essentia'te*, *Tarta'reous acid*, (F.) *Acide tartrique*. (*Potassæ bitart. biiss*, *aq. destillat. ferv.*, *cong. iij. cretæ ppt. lbj. acidû sulph. lbj.*) Boil the bitartrate with two gallons of the water, and gradually add the prepared chalk, until no more bubbles appear; let the tartrate of lime subside; then pour off the fluid and wash the tartrate of lime with distilled water, until it is tasteless. Pour upon it the sulphuric acid, diluted with a gallon of boiling distilled water; and set the mixture aside for 24 hours, occasionally stirring it. Filter and evaporate it to crystallize. (*Ph. L.*) It is refrigerant and antiseptic, but is chiefly used for making effervescent draughts with soda.

TARTARUM, *Potassæ supertartaras impurus* — t. *Solubile Potassæ tartaras* — t. *Vitriolatum*, *Potassæ sulphas*.

TARTARUS AMMONIÆ, *Ammonia tartaras* — t. *Chalybeatus*, *Ferrum tartarizatum* — t. *Crudus*, *Potassæ supertartaras impurus* — t. *Dentium*, *Odontolithos* — t. *Emeticus*, *Antimonium tartarizatum* — t. *Kalicoferrius*, *Ferrum tartarizatum* — t. *Kalinus*, *Potassæ tartaras* — t. *Lixiviæ*, *Potassæ tartaras* — t. *Martialis*, *Ferrum tartarizatum* — t. *Potassæ ferruginosus*, *Ferrum tartarizatum* — t. *Stibiatus*, *Antimonium tartarizatum* — t. *Subpotassicus*, *Potassæ supertartaras* — t. *Superpotassicus*, *Potassæ supertartaras* — t. *Tartarizatus*, *Potassæ tartaras*.

TARTRATE D'AMMONIAQUE, *Ammonia tartaras*.

TARTRE BRUT, *Potassæ supertartaras impurus* — t. *Crû*, *Potassæ supertartaras impurus* — t. *des Dents*, *Odontolithos* — t. *Émétique*, *Antimonium tartarizatum* — t. *Stibié*, *Antimonium tartarizatum*.

TASIS, *Extension*, *Tension*.

TASTE, *Gustus*, *Geusis*, *Geuma*, *Geuthmos*, (F.) *Goût*. One of the five external senses, which instructs us of the savours of bodies, and of which the tongue is the principal organ.

Gustation, *Gustatio*, is the exercise of this faculty. In disease, the taste frequently becomes variously vitiated. The nerves of taste are probably the glosso-pharyngeal, and, perhaps also, the lingual branch of the fifth pair.

TASTE, *Savour*.

TATZ'É. The fruit of *Myrsi'na Africa'na*, a native of Abyssinia, the Cape of Good Hope, the

Azores, and Algeria, which is used as a tænia-fuge.

TATTOO'ING. A practice, with the South Sea Islanders, of puncturing the skin, and forcing coloring matters into the punctures. Sailors in all countries are in the custom of practising it by rubbing or forcing gunpowder into the punctures. The figures, thus formed, remain through life.

TAUPE, Talpa.

TAUROCOL'LA, from ταυρος, 'a bull,' and κολλα, 'glue.' Glue made of the ears and genitals of the bull. It was formerly much esteemed.

TAURUS, Penis, Perineum.

TAXIS, 'arrangement;' from τασσω, 'I order,' 'I arrange'; *Reposit'io, Reductio, Syntax'is.* A methodical pressure exerted by the hand on a hernial tumour, for the purpose of reducing it. This operation is generally easy in herniæ that are free from adhesions, of small size, and with a large opening into the sac; but it is very difficult and frequently impracticable in those that are adherent or strangulated. To perform the taxis, the patient should be put in the horizontal posture, and in one in which the parietes of the abdomen are relaxed. The manual procedure varies in each species of hernia. In all cases, too strong pressure of the parts must be avoided; as inflammation and gangrene might be induced. The displaced organs must be pushed into the abdomen, according to the direction of the axis of the hernial sac. The reduction is sometimes favoured by blood-letting *ad deliquium*; the warm bath; warm fomentations; tobacco; emollient glisters; and, at times, by cold applications, as ice, &c. In a case of strangulated hernia, should the taxis fail, an operation becomes necessary.

TAXO'DIUM DIS'TICHUM, *Cupressus disticha, Schubertia disticha, Cypress, Bald Cypress*; indigenous. *Nat. Ord. Conifera.* A balsam, obtained from it, is applied to cuts and wounds. The resin from the cones is diuretic and carminative.

TAXONOMY, Biotaxy.

TAXUS BACCA'TA, ταξος. The *Yew tree, Smilax, Smilas, Thym'alos,* (F.) *If. Family, Conifera. Ser. Syst. Dicoxia Monadelphia.* The ancients believed the yew to be poisonous; but the fruit may be eaten without inconvenience. The leaves have been often recommended in epilepsy. The resin, obtained from the bark, has been called *albir*.

TAXUS CANADEN'SIS, *American Yew, Ground Hemlock*; indigenous. The leaves are said to be sedative. [?]

TAXWAX, see Nucha.

TA'YE, Caligo.

TAYLOR'S REMEDY FOR DEAFNESS, see Allium.

TEA, Thea—t. Apple, see Apple tea—t. Bahama, Lantana camara—t. Beef, see Beef tea—t. Berried, Gaultheria.

TEA BERRY, Gaultheria.

TEA, BLANKENHEIM, see Galeopsis grandiflora—t. Brazil, Lantana pseudothea—t. Bushman's, Methoscopyllum glaucum—t. Caffre, Helichrysum nudifolium—t. Chicken, see Chicken tea—t. TEAK, Paronychia.

TEAR, Sax. τεαρ, *Lac'ryma, Lach'ryma, Lac'rima, Lac'ruma, Daery, Dac'ryma, Dac'ryon, Humor lacrymal'is, Eyedrop, Weeping-tear,* (F.) *Larme.* An excrementitious humour, secreted by the lachrymal gland, and poured between the globe of the eye, and the eyelids, to facilitate the motions of those parts. The tears are saline, inodorous, and colourless. They turn the syrup of violets green; and contain chloride of sodium, with excess of base; phosphates of lime and soda, and albumen, and a special organic matter called *Lacrymine* and *Thranine*.

TEARS, DEERS', Bezoar of the deer.

TEASEL, CULTIVATED, *Dipsacus sylvestris.*

TEASICK, Phthisis pulmonalis.

TEAT, Nipple.

TEAZEL, *Eupatorium perfoliatum.*

TECEDON, Phthisis.

TECNOCTONIA, Infanticide.

TECNOL'OGY, *Tecol'ogy, Tecnolog'ia, Tecolog'ia,* from τεκνος and τεκος, 'a child,' and λογος, 'a description.' A treatise on children.

TECOLITHOS, Judæus (lapis.)

TECO'MA RADIC'ANS, *Bignonia radicans, Trumpet flower, Trumpet creeper, Virgin'ia creeper.* Indigenous; the orange and scarlet flowers appearing in July. *Order, Bignoniaceæ.* The leaves are acrid.

TECTARIA CALAHUALA, see Calagualæ radix—t. Ferruginea, see Calagualæ radix.

TEDA, Tæda.

TEETH, see Tooth—t. Barred, *Barrées (Dents)*—t. Eye, Canine teeth—t. Jaw, Molar teeth—t. Milk, see Dentition—t. Neck of the Collum dentium—t. Shedding of the, see Dentition—t. Vitreous substance of the, Enamel of the teeth—t. Wisdom, see Dentition—t. Wit, see Dentition.

TEETHING, Dentition.

TEGIMEN, Integument.

TEGMEN, Integument.

TEGULA HIBERNICA, *Hibernicus lapis.*

TEGUMEN, Integument.

TÉGUMENT, Integument.

TEGUMENTARY, *Tegumenta'rius,* (F.) *Téguementaire.* Relating or appertaining to the integument.

TEGUMEN'TUM, Integument—t. Auris, see Tympanum—t. Ventricleorum cerebri, Centre, oval, of the brain.

TEIGNE, Pityriasis, Porrigo, Porrigo lupinosa—t. Annulaire, Porrigo scutulata—t. en Anneau, Porrigo scutulata—t. Favosa, Porrigo favosa—t. Furfuracée, Porrigo furfurans—t. Nummulaire, Porrigo scutulata.

TEINESMOS, Tenesmus.

TEINODYN'IA; from τεινειν, 'to extend,' and οδυνη, 'pain.' Pain of the sinews or tendons.

TEINOPHLOGO'SIS; from τεινειν, 'to extend,' and φλογος, 'inflammation.' Inflammation of the sinews or tendons.

TEINTURE, Tincture—t. *Éthérée,* see *Æthereal*—t. *Rubéfiante,* Tinctura cantharidis.

TEKEDON, Tabes.

TELA. Texture, Tissue—t. Accidental'is Medullaris, Encephaloid—t. Caverosa, Caverosus texture—t. Cellulosa, Cellular tissue—t. Cornea, Corneous tissue—t. Choroidea, Choroidea tela—t. Emplastica, Sparadrapum—t. Erectilis, Erectile tissue—t. Fibrosa, see Fibrous—t. Galteri, Sparadrapum Galteri—t. Hippocratis cribrosa, Cellular tissue—t. Hymenochondroides, Tissue, cartilaginous—t. Hymenochondroides, Tissue, cartilaginous—t. Ichthyocollæ glutinans, see Sparadra-

pum adhæsvivam—t. Inodularis, Tissue, inodular—t. Organica, Histos—t. Vesicatoria, Sparadrapum vesicatorium.

TELAMON, Habena.

TELAMON'NES. *τελαμώνες*, 'bandages.' Charpie, used for wounds; or linen employed for bandages.

TELANGECTASIS, Telangiectasia.

TELANGEICTA'SIA, *Telangiectasis*, *Telangiectasis*, *Angiectelecta'sia*, *Hæmatotelangi'o'sis*, *Hæmotelangi'o'sis*, *Angiecta'sia*, *Anastomo'sis aneurysmal'ica*; from *τελος*, 'far,' *αγγειον*, 'vessel,' and *εκτασις*, 'dilatation.' Dilatation of far or capillary vessels. Nævus maternus. Aneurism by anastomosis. According to some, fungus hæmatodes. See *Hæmatodes fungus*.

TELANGECTASIA OCVLI, Cirsophthalmus.

TELEPH'IUM, *Ulcus telephium*, *Achille'um*. The ancients gave this name to any ulcer of a very bad kind, and difficult to cure, because the wound, which Achilles inflicted on Telephus, degenerated into a similar ulcer.

TELEPHIUM, Sedum telephium.

TELLURISMUS, Magnetism, animal.

TELLU'R'IUM, (F.) *Tellure*; from *tellus*, *telluris*, 'the earth.' A metal first met with in the gold mines of Transylvania. It is of a bluish white colour, very volatilizable; specific gravity 6.115; and oxidizable in the air and by heat.

The salts of tellurium occasion the exhalation of so disagreeable an alliaceous odour from the body, that they have not been much experimented with as therapeutical agents.

TELUM, Penis.

TEMP'E, Temple.

TEMPERAMENT, *Temperamentum*, *Temperatura*, *Temperatio*, *Temperies*; from *temperare*, 'to moderate,' originally from *tempus*, *temporis*, 'time,' the great *temperer*; *Complex'io*, *Crasis*, *Eucras'ia*. A name given to the remarkable differences that exist between individuals, in consequence of the variety of relations and proportions between the constituent parts of the body. Thus, of old, it was supposed that, according to the predominance of any one of the four humours then generally admitted,—blood, lymph, bile, and atrabillis or black bile,—the manifestations of the functions were *tempered* or modified so as to give rise to a *sanguine*, *lymphatic*, *choleric*, or *atrabillous* or *melancholic* predominance or temperament. The idea of the existence of certain of these humours has been banished; yet the influence of some, as of the blood, lymph, and bile, is still admitted by many. Too much influence has, doubtless, been assigned to temperament in the sense in which it was formerly and still is generally understood, although there can be no question that difference of organization occasions a difference in the activity of organs.

TEMPERAMENT, BILIOUS, Choleric temperament.

TEMPERANCE, *Sophros'ynē*, *Nephal'iotēs*, *Sobri'etas*, *Sobri'etēs*. Same etymon. Moderation, opposed to gluttony and drunkenness. The advantage of temperance, in a hygienic point of view, requires no comment.

TEMPÉRANTS, Sedatives.

TEMPERATIO, Temperament.

TEMPERATURA, Temperament.

TEMPERIES, Temperament.

TEMPLE, *Tempus*, *Re'gio Temporal'is*, *Crot'ophus*, (F.) *Tempe*. A depression, on each side of the head, between the forehead and eye anteriorly, and the ear posteriorly. The *temples*, distinguished into *right* and *left*, correspond to the temporal fossa on each side. The word is said to be from the Latin *tempus*, 'time,' because in this

part the hair first begins to turn white, and to indicate age.

TEMPORAL, *Tempora'lis*. That which relates to the temples.

TEMPORAL APONEURO'SIS is a very strong aponeurosis, of a bluish, shining colour, which is attached to the whole of the curved line of the temporal bone; to the posterior edge of the malar bone; to the superior margin of the zygomatic arch; and forms an envelope for the temporal muscle.

TEMPORAL ARTERIES, *Crot'ophite Arteries*, are several:—1. The *Temporal Artery*, properly so called, arises from the outer side of the superior part of the external carotid. It ascends between the ramus of the jaw, the meatus auditorius externus, and the parotid gland, which covers it as far as the zygomatic arch. Above this it becomes subcutaneous; and, when it has attained the middle of the temporal region, it divides into two branches; the one anterior—*A. tempora'lis frontalis seu interna seu anterior*; the other posterior—the *A. temporal'is occipital'is seu externa seu superior*. The temporal artery, before its division, gives off, 1. Branches to the parotid; to the joint of the lower jaw; to the meatus auditorius, and to the masseter. 2. The *transverse artery of the face*. 3. The *middle temporal*, which arises beneath the cheek-bones, and traverses the temporal aponeurosis, immediately beneath that bone. II. The *Deep-seated Temporals*—*A. temporal'es profundae*. These are two in number. They arise from the internal maxillary, and have been distinguished, from their position, into *anterior* and *posterior*. They send their principal divisions to the temporal muscle.

TEMPORAL BONE, *Os tempora'le seu tempora'lē seu arcua'lē seu arma'lē seu parietal'is inferius seu crot'ophum seu memento mori seu mendo'sum seu crot'ophit'icum seu lapido'sum*, is seated at the lateral and inferior part of the cranium, of which it forms part; and contains, within it, the special organs of audition. It is usually divided into three portions:—1. The *squamous*, *Pars squamosa*, *Squama*, *Lepi'sma*, *Os lepidoid'es seu squamosum seu squamifor'mē*. (F.) *Portion écailleuse ou squameuse*. 2. The *mastoid process*, and, 3. The *Petrous portion*, *Petrous Proc'ess*, *Pyramis trigo'na*, *Os lapide'um seu lapido'sum seu sac'eum seu petro'sum seu lithoid'es seu durum seu præruptæ rupi ossimilat'um seu veru'alē*, *Pars petro'sa*, *P. pyramida'lis ossis temp'oris*. (F.) *Portion pierreuse, Rocher, Os pétreux, Apophyse pyramidale, A. pétée*.

It has, first, an *auricular* or *external face*, on which is a surface that makes part of the temporal fossa; the *zygomatic process*; the *glenoid cavity*; the *fissure of Glaser*; the *meatus auditorius externus*; the *mastoid process*; the *digestric groove*; the *canalis caroticus*; the *jugular fossa*; the *styloid process*; the *stylo-mastoid foramen*, &c. 2. A *cerebral* or *internal surface*, which corresponds to the cavity of the cranium, and on which is the *Pars petrosa*, the *hiatus Fallopii*, the *meatus auditorius internus*, the *fissure of the aquæductus vestibuli*, a *portion of the gutter for the lateral sinus*, &c. 3. A circumference, on which is observed the *orifice of the bony portion of the Eustachian tube*, the *aquæductus cochleæ*, &c. The temporal bone is articulated with the sphenoid, occipital, parietal, malar, and inferior maxillary bones. It is developed from five points of ossification.

TEMPORAL FOSSA, *Fossa tempora'lis*, is an excavation, observed at each side of the head. It is filled by the muscle whose name it bears, and is formed by the temporal and sphenoid, below; by the parietal and frontal bones, above; is separated, by a transverse crista, from the

zygomatic fossa; and completed, before, by the cheek-bone.

TEMPORAL MUSCLE, *Temporalis, Crotaphites*, (F.) *Arcadi-temporo maxillaire, Temporo maxillaire* (Ch.), is a broad, flattened, triangular muscle, which fills the temporal fossa. Its fibres are attached to the temporal aponeurosis and fossa; and all converge into a strong tendon, which passes under the zygomatic arch, and is inserted into the coronoid process of the lower jaw. This muscle raises the lower jaw, and applies the teeth against each other.

TEMPORAL NERVES. These are distinguished into the *superficial temporal*, furnished by the inferior maxillary branch of the fifth pair, behind the condyle of the jaw; and the *temporales profundi*, — anterior and posterior, — furnished by the same nerve at its exit from the cranium. Sömmering has given the name *temporal* to the divisions sent by the facial nerve to the temporal regions.

TEMPORAL VEINS were formerly called *Ætoi* or *Αἵτοι Phlebes, Αἰ'νιλα Venæ*.

TEMPORO-AURICULAIRE, Attollens aurem.

TEMPORO-FACIAL, *Temporo-facialis*. Belonging to the temple and face.

TEMPORO-FACIAL NERVE, *Nervus temporo-facialis*. A branch of the facial nerve distributed to the face and temple.

TEMPORO-MAXILLAIRE, Temporo-maxillary, see Temporal muscle.

TEMPORO-MAXILLARY, *Temporo-maxillaris*, (F.) *Temporo-maxillaire*. That which belongs to the temporal bone and lower jaw.

TEMPORO-MAXILLARY ARTICULATION or joint of the lower jaw, is seated between the glenoid cavity and transverse process of the temporal bone on the one hand, and the condyle of the lower jaw on the other. Two thin cartilages cover the surfaces of these bones. The one is common to the transverse process, and the portion of the glenoid cavity anterior to the fissure of Glaser; the other belongs to the condyle. This articulation is furnished with an inter-articular fibro-cartilage, two synovial capsules, and two lateral ligaments: — the one internal, and the other external.

TEMPORO-MAXILLARY NERVES of Bichat are the divisions of the facial nerve, distributed to the temporal and maxillary regions.

TEMPUS, Temple — t. Intercalare, Apyrexia, Intermission.

TEMULENCE, *Ebrietas, Ebriositas, Methysmus, Meth'ysis, Temulentia, Temulency, Inebriation, Intoxicatio, Drunk'eness*: — from wine, *Enophlyg'ia, Enophlyz'is, Vinolentia, Vinolence*, (F.) *Ivresse*; from *temetum, μεθυ*, 'wine, any intoxicating drink.' Plater gave this name to delirium; Etmuller, to an apoplectic condition, depending upon drunkenness; the *Apoplexia Temulentia* or dead drunkenness. Commonly, *Temulentia* is used synonymously with drunkenness, *Methē*; and is often employed in the description of diseases to indicate a state resembling drunkenness. *Mania e Temulentia* is the same as *Delirium Tremens*. The French use the term *Ivresse* for drunkenness, *Ivrogerie* for habitual drunkenness.

TEMULENTIA, Temulence.

TENACULA, Bone-nippers — t. Volsella, Forceps (lithotomy).

TENACULUM, (*tenax, tenacis*, 'holding fast,') from *teneo*, 'I hold.' A kind of fine hook attached to a handle which is thrust through the parietes of a blood-vessel to draw it out and enable it to be tied.

TENACULUM, ASSALINI'S. An ingenious instrument, invented by Assalini. It consists of a for-

ceps, or double tenaculum, the points of which are fine, sharp, and bifurcated, so as to be readily received into each other when the instrument is closed on the artery, which it is by a spring. It is of great use when the surgeon has no assistant at hand. The instrument is figured in S. Cooper's "First Lines."

TENAILLE INCISIVE, Bone-nippers.

TENASMUS, Tenesmus.

TENDINES CORONARIE, Coronary tendons.

TEN'DINOUS, *Tendinosus, Tendineus, Sin'eus*, (F.) *Tendineus*, from *tendo, tendinis*, 'a tendon.' Relating or appertaining to, or having the nature of tendons.

TENDO, Tendon — t. Cordis venosus, Circulus callosus Halleri.

TENDON, *Tendo, Pronervatio, Tenon*, from *τενω, tendo*, 'I stretch.' *Sineus, Thew, Leader*, (Prov.) *Guider*. A fibrous cord, more or less round, long, or flattened; of a white, pearl colour, and composed of very close parallel fibres. The tendons are attached to the bones, by one extremity; by the other, they receive the insertions of the fleshy fibres: sometimes they afford attachment to fleshy fibres at both ends; — as in the digastric muscle. The tendons must be considered as so many cords, for transmitting the motion of muscles to the bones or levers.

TENDON D'ACHILLE, Achillis tendon.

TENDON, CORDIFORM, OF THE DIAPHRAGM, Center, phrenic.

TENDONS, TWITCHING OF THE, Sub-sultus tendinum.

TENEOTOMIA, Tenotomy.

TÉNESME, Tenesmus — t. *de l'Œsophage, Œsophagismus* — t. *Vésical, Bradysuria*.

TENES'MUS, *Tenesmos, Tenas'mus*, from *τενω, 'I stretch.'* *Proctica* seu *Obstipatio Tenesmus, Proctospas'mus, Tinag'mus*, (F.) *Ténesme, Épreintes*. Frequent, vain and painful desires to go to stool; — one of the chief symptoms of inflammation of the lining membrane of the digestive tube, as of dysentery.

TENESMUS VESICÆ, Bradysuria — t. *Vesicæ mucosus, Cystirrhœa*.

TENETTES, Forceps (craniotomy).

TÉNIA, Tænia.

TENNESSEE, MINERAL WATERS OF. On the waters of the French Broad River, in this State, is a large, clear, thermal spring. The heat is so great that, on first going into the water, it is almost insupportable.

TENON, Tendon.

TENONT'AGRA, from *τενω, τενοντος*, 'tendon,' and *αγρα*, 'seizure.' A variety of gout, which affects the tendinous parts of muscles, or the tendinous ligaments which strengthen certain articulations.

TENONTOTOMIA, Tenotomy.

TENONTOTRO'TI, from *τενω, τενοντος*, 'tendon,' and *τετροσσω*, 'I wound.' They who are wounded in the tendons. — Galen.

TENOSYNI'TIS, *Tenosynovitis* [?], (F.) *Tenosynite*. An imperfectly formed term, from *τενω*, 'a tendon,' *syn*, and *itis*, denoting inflammation. Inflammation of the synovial sheath of a tendon.

TÉNOTOME, *Tenotomus*; same etymon as the next. An instrument for dividing tendons, especially by the subcutaneous method.

TENOT'OMY, *Tenotomia, Teneotomia, Tenontotomia, Sectio* seu *Dissectio tendinum*, (F.) *Ténotomie*, from *τενω*, 'a tendon,' and *τομη*, 'incision.' The operation of dividing a tendon, often practised for the removal of loxarthrus, or deviation of the joints — as in club-foot.

TENSEUR DE L'APONÉVROSE FÉMORALE, Fascia lata muscle.

TEN'SION, *Ten'sio*, *Tensu'ra*, *Tasis*, *Diat'asis*, *Enton'ia*, (*Etonia* is, also, used for over-tension,) *Conten'sio*, *Disten'sio*, from *tendere*, *tensum*, 'to stretch.' State of a part, which is stretched, when its textures are distended by the afflux of fluids, or the accumulation of gas; or when its fibres are drawn, as it were, in an opposite direction, and are, consequently, more resisting than usual.

TENSIVE, *Tensi'vus*, *Tono'des*, (F.) *Tensif*. Same etymon. Accompanied by tension or by a feeling of tension — as a 'tensive pain.'

TENSOR CHOROIDEÆ, Ciliary muscle — t. Palati, Circumflexus musculus.

TENSOR TARSII. A small muscle, belonging to the inner commissure of the eyelids, well described by Professor Horner, of Philadelphia, and hence termed *Muscle of Horner*. It is about three lines broad and six long; arises from the posterior flat surface of the os unguis, near its junction with the ethmoid bone, and passes forwards and outwards, lying on the posterior face of the lachrymal ducts. As it approaches the commissure of the lids, it splits into two nearly equal parts, each of which is appropriated to a duct, and inserted along its course, almost to the punctum lacrymale. Its chief office seems to be, to influence the position of the punctum lacrymale, and to regulate the course of the tears through the lachrymal ducts.

TENSOR TYMPANI, *Inter'nus*, *Auris*, *Internus Mallei*, (F.) *Salpingo-malleen*. A small muscle, which arises from the petrous portion of the temporal bone, and the cartilage of the Eustachian tube, and terminates by a tendon, which is reflected over the processus cochleariformis, and is inserted into the apophysis of the handle of the malleus.

TENSOR VAGINÆ FEMORIS, Fascia lata muscle.

TENSURA, Tension.

TENSUS, Penis.

TENT, *Tenta*, *Turum'da*, and its diminutive, *Turum'dula*, *Penic'ubus*, *Penic'il'us*, *Penic'il'um*, *Motos*, *Lennis'cus*, *Licin'ium*, (F.) *Tente*, *Mèche*, from *tendere*, *tensum* or *tentum*, 'to stretch.' In surgery, tents are small rolls of lint, of a cylindrical or pyramidal shape, which are introduced into wounds and deep ulcers, to prevent them from closing before they are filled up from the bottom. Tents are sometimes, also, made of prepared sponge, gentian root, &c. They are not so much used as they formerly were.

TENTACULARIA, Filaria hominis bronchialis.

TENTACULUM CEREBELLI, Tentorium.

TENTA'MEN MED'ICUM. 'A medical trial.' From *tentare*, 'to try.' An examination in medicine, in the Prussian universities, which is conducted both in writing and *vivâ voce* before the Dean of the Medical Faculty.

TENTE, Tent — t. du Cervelet, Tentorium.

TENTIGO VENEREA, Nymphomania — t. Veretri, Satyriasis.

TENTIPEL'LUM, from *tendere*, *tensum* or *tentum*, 'to stretch,' and *pellis*, 'the skin.' Ancient name of a cosmetic, with which, it was pretended, wrinkles could be effaced.

TENTORIUM, *T. cerebell'o super-exten'sum*, *T. cerebelli*, *Tentac'ulum cerebelli*, *Septum enceph'ali*, *Diaphrag'ma cer'ebr'i*, *Intersep'ta horizonta'lia Pacchio'ni*, *Processus transver'sus durae matris*, *Lateral Processes of the Dura Mater*, *Transverse septum*, (F.) *Tente du cervelet*, *Plancher du Cerveau*, *Septum transverse* (Ch.), from *tendere*, *tensum* or *tentum*, 'to stretch.' A process of the dura mater, which separates the cerebrum from the cerebellum. It extends from the internal horizontal spine of the occipital bone, directly forwards to the sella Turcica of the sphenoid.

TENTORIUM CEREBELLI, Tentorium.

TENTUM, Penis.

TENTWORT, *Asplenium ruta muraria*.

TENUIS MATER, Pia mater.

TENUITAS AQUOSA, Prædominium aquæ.

TEPHRO'SIA APOLLINE'A, *Gale'ga Apollin'e'a* of Egypt and Nubia. Order, Leguminosæ. The leaves are often found mixed with senna.

TEPHROSIA PURPU'REA, *Gale'ga purpu'rea* of Cayenne. The leaves are used for poisoning a decoction of it is prescribed by the native doctors in dyspepsia, lientery, and tympanites.

TEPHROSIA SENNA. The leaves are used for senna by the people of Popayan.

TEPHROSIA TOXICARIA, *Gale'ga toxica'ria* of Cayenne. The leaves are used for poisoning fish. It has been suggested as a substitute for digitalis.

TEPHROSIA VIRGINIANA, Galega Virginiana.

TEPIDARIUM, see Stove.

TEPLITZ, Töplitz.

TERAS, Monster.

TERATOG'ENY, *Teratogen'ia*, from *teras*, *terasos*, 'a monster,' and *γενεσις*, 'generation.' The formation of monsters.

TERATOL'OGY, *Teratolog'ia*, from *teras*, *terasos*, 'a monster,' and *λογος*, 'a discourse.' A treatise on monsters.

TERATOSIS, see Monster.

TERCERON, see Mulatto — t. Black, see Mulatto.

TEREBELLA, Trepan.

TEREBELLUM. A name given by Dugès to a perforator, *Perce crâne*, of his invention.

TÉRÉBENTHINE, Terebinthina — t. de Bordeaux, see Pinus sylvestris — t. de Chio, see Pistacia terebinthus — t. de Copahu, Copaiba — t. Commune, see Pinus sylvestris — t. d'Égypte, see Amyris opobalsamum — t. de Giléad, see Amyris opobalsamum — t. du Grand Caire, see Amyris opobalsamum — t. de Judée, see Amyris opobalsamum — t. de Mélièze, see Pinus larix.

TÉRÉBENTHINÉ, Terebinthinate.

TEREBIN'THINA, from *τερμινθος*, or *τερεβινθος*, 'the turpentine tree.' *Tur'pentine*, *Botin*, *Albotim*, *Altilibat*, *Brutino*, (F.) *Térébenthine*. A substance, of the consistence of honey, which flows from many trees of the terebinthaceæ and coniferæ families. It is viscid; shining; more or less transparent; inflammable; of a warm, pungent taste; strong smell; and is entirely composed of resin and essential oil, without benzoic acid. It is soluble in alcohol. See Turpentine, Pinus palustris and Pinus sylvestris. All the turpentine are stimulant, diuretic, and cathartic.

TEREBIN'THINA ARGENTORATENSIS, see Pinus picea — t. Balsamea, see Pinus balsamea — t. Canadensis, see Pinus balsamea — t. Chia, see Pistacia terebinthus — t. Communis, see Pinus sylvestris — t. Cypria, see Pistacia terebinthus — t. Empyreumatica, see Pinus sylvestris — t. Laricina, see Pinus larix — t. Veneta, see Pinus larix — t. Vera, see Pistacia terebinthus — t. Vulgaris, see Pinus sylvestris — t. de Vénise, see Pinus larix.

TEREBIN'THINATE, *Terebinthina'tus*, (F.) *Térébenthiné*. Having the qualities of turpentine. **TEREBINTHUS**, Terminthus — t. Gummiifera, *Bursera gummiifera* — t. Lentiscus, *Pistacia lentiscus* — t. Vulgaris, *Pistacia terebinthus*.

TEREBRA, Trepan.

TEREBRATIO, Trepanning.

TEREDO OSSIUM, Caries, Spina ventosa.

TERES, *Stron'gylus*, *Cylindroi'des* 'long and round,' from *τερο*, 'to rub,' quasi 'rubbed smooth or round.' An epithet given to many organs, the fibres of which are collected into round fasciculi.

TERES LIGAMENTUM, (F.) *Ligament rond*.

This name is given to the round ligament in the cotyloid cavity of the os innominatum, which is attached to the head of the bone, and to the bottom of the cavity. It is, also, given to a small fibrous fascia, which extends from the coronoid process of the ulna to below the bicipital tubercle of the radius.

TERES MAJOR, (F.) *Anguli-scapulo-humeral, Scapulo-humeral* (Ch.), *Grand rond*, is situate at the inferior and posterior part of the shoulder. It is attached, on the one hand, to the outer surface of the scapula; to the corresponding part of its axillary margin; and, on the other, to the posterior margin of the bicipital groove of the humerus. It carries the arm backwards and inwards, and carries it, also, inwards in rotation. When it acts with the longissimus dorsi and pectoralis major, it applies the arm against the lateral part of the chest, and keeps it forcibly there.

TERES MINOR, *Nonus humeri Placentini*, (F.) *Le plus petit sus-scapulo-trochitérien* (Ch.), *Petit rond, Margini-sus-scapulo-trochitérien*, is situate at the posterior and inferior part of the shoulder; it is narrow and flattened, from above to below, in its inner half; and, from before to behind, in the outer. It is attached, on the one part, to the outer surface of the scapula, near its inferior angle; and, on the other, to the inferior part of the great tuberosity of the humerus. It depresses the arm, and causes it to turn on its axis from within outwards. It also carries it backwards.

TERESIS, Observation.

TERETRIUM, Trepan.

TERETRON, Trepan.

TERGAL, Dorsal.

TERGEMINI, Trigemini.

TERGUM, Dorsum, Vertebral column.

TERMINALIA, see Myrobalanus.

TERMINOLOGY, Nomenclature.

TERMIN'THUS, *Terebin'thus*, from *τερρινθος*, 'the turpentine tree.' *Phyma Anthrax, Termin'thus, Berry or Fungous carbuncle*. The ancients gave this name to a tumour, surmounted by a black pustule, and resembling the fruit of the turpentine tree.

TERMIN'THUS, Pistacia terebinthus.

TERMINUS SUPERIOR ASPERÆ ARTERIÆ, Larynx.

TERMONOLOGY, Nomenclature.

TERMS, Menses.

TERRA ABSORBENS MINERALIS, Magnesiæ carbonas—t. Aluminis, Argilla pura—t. Amara aërata, Magnesiæ carbonas—t. Amara sulphurica, Magnesiæ sulphas—t. Argillacea hydrata, Argilla pura—t. Argillacea pura, Argilla pura—t. Bolaris, Argilla pura—t. Foliata, Sulphur—t. Foliata mineralis, Soda acetata—t. Foliata tartari, Potassæ acetat—t. Fornacum, see Bricks—t. Fullonica, Cimolia purpurescens—t. Japonica, Catechu, Nuclea gauris.

TERRA LEM'NIA, *Lemp'nias, Argilla bolus flava, Lem'nian Earth*. A name given by the ancients to a solid, reddish, astringent, substance, prepared with the pulp of the fruit of the Baobab, an African tree, according to Prosper Alpinus. It seems, however, to be an argillaceous earth. It has been employed as an astringent.

TERRA LIVON'ICA. A terra sigilla'ta or sealed earth from Livonia, redder than that from Silesia, and very astringent.

TERRA MERITA, Curcuma longa.

TERRA NOCERIA'NA. A whitish, soft, and astringent earth, found in the environs of Nocera, in Italy.

TERRA ORLEA'NA, *Pigmen'tum urucu, Urucu*, (F.) *Rocou, Roncou, Bichet*. A pigmental matter obtained from the seeds of *Bixa Orleana* seu *Orella'na* seu *America'na, Orella'na, Orlea'na*.

In Jamaica, it is recommended in dysentery, and is considered to possess astringent and stomachic qualities. It is called, according to its shape, *Flag, Roll, or Egg Annotto*.

Spanish Annotto, Bixa, is in small, oblong cakes. It is chiefly employed as a colouring matter.

TERRA OS'SEA, *Mate'ria ossea*. Bony matter. The earthy portion of bones.

TERRA PONDEROSA, Baryta—t. Ponderosa muriata, Baryta, muriate of—t. Ponderosa salita, Baryta, muriate of—t. Saponaria, Cimolia purpurescens.

TERRA PORTUGAL'LICA, *Barros, Bucaros*. A reddish, astringent, styptic earth, obtained from Portugal.

TERRA SIGILLA'TA, *Scaled Earth*. A bole or earthy matter, made into little cakes or flat masses, and stamped with certain impressions, as with the head of the Grand Seigneur. To these belong the *Terra Silesiaca, Terra Lemnia, T. Turcica*. See Bole and Bolus alba.

TERRA SILESIACA, see Terra sigillata—t. Talcosa oxyanthracodes, Magnesiæ carbonas—t. Turcica, see Terra sigillata.

TERRA URINÆ. The earthy deposit in the urine.

TERRA VITRIOLI DULCIS, Coleothar.

TERRÆ SIGILLATÆ, see Bole, Bolus alba, and Terra sigillata.

TERRAPIN, *Emys palustris*.

TERRE BOLAIRE, Bolus—t. *Magnésienne*, Magnesiæ carbonas—t. *Noix*, Bonium bulbocastanum—t. *Pesante*, Baryta—t. *Sigillée*, Bolus alba.

TERRETTE, *Glechoma hederacea*.

TERTIAN FEVER, *Febris tertiana, An'etus tertianus, Tritæ'us, Tertian or Third Day Ague, Third Day Fever*, (F.) *Fièvre tierce*, from *tertius*, 'the third.' An intermittent, whose paroxysms recur every third day, or every 48 hours. The mildest, and the most pernicious, intermittents belong to this head. As a general rule, it is the most manageable form of ague.

A double tertian, (F.) *Double tierce (Fièvre)*, has a paroxysm every day, — the paroxysms of alternate days being associated.

TERTIANARIA, Scutellaria galericulata.

TESSARA, Cuboid.

TESSELLA, Tabella.

TEST, DANIEL'S, see Docimasia pulmonum—t. Hydrostatic, see Docimasia pulmonum—t. Plouquet's, see Docimasia pulmonum—t. Static, see Docimasia pulmonum.

TESTA, ('a shell,') see Ostrea—t. Ovi, see Membrana putaminis.

TESTA PRÆPARATA, *Prepared Oyster-shell*. Oyster-shell, freed from extraneous matter, washed with boiling water, reduced to powder, and prepared in the same manner as *Creta præparata*.

TESTA'CEOUS, *Testa'ceus*, (F.) *Testacé*, from *testa*, 'a shell.' A powder, consisting of burnt shells. These contain carbonate of lime chiefly, and hence the term has been applied to cretaceous substances. See *Creta*.

TESTÆ FORNACÆÆ, Bricks—t. Ostreae, see Ostrea.

TESTES. The Testicles, see Testicle. Vulgarly, the *Stones*. A name, also, given to the inferior tubercles of the corpora quadrigemina, to distinguish them from the superior, called *Nates*.

TESTES CEREBRI, see Quadrigemina corpora.

TES'TICLE, *Testis, T. viri'lis, Testic'ulus, Orchis, Pomum amoris, Did'ymsus, Her'nia, Gem'ini* (pl.), *Gemelli* (pl.), *Ovum*, (F.) *Testicule*, from *testis*, 'a witness;' because the testicles are evidences of virility. The name of two glandular organs, contained in the scrotum, whose office is to secrete sperm. The substance of the testicle

consists of numerous conical, flattened lobules — *lobuli testis* — whose bases are directed towards the surface of the organ, and the apices towards the corpus Highmorianum. They are formed of a gray and softish substance, composed of tortuous canals, called *Tubuli seu Canaliculi seminiferi seu seminiales, Vasa seminalia, Vascula serpentina*, folded on each other, and of extreme fineness; the number of which, according to the estimate of Monro, is 62,500, and the total length 5,208 feet. All these canals, uniting in their course, pass through the corpus Highmorianum, concur in forming the epididymis, and give origin to the vas deferens. The testicles are covered, immediately, by a fibrous membrane, of an opaque white colour, and very tough, called *Tunica Albuginea*, or, simply, *Albuginea, Perites'tis*, (F.) *Pérididyme*, of which the corpus Highmorianum is only an enlargement. Over this, again, is the tunica vaginalis, the second envelope of the testis.

TESTICLE, SWELLED, Hernia humoralis.

TESTICONDUS, Cryptorchis.

TESTICULAR, *Testicula'ris*, (F) *Testiculaire*. Belonging or relating to the testicle.

TESTICULE, Testicle.

TESTICULUS, Testicle — t. Accessorius, Epididymis — t. Caninus, Orchis mascula.

TESTIMONIUM MATURITATIS. 'Evidence of fitness.' A certificate of complete education, required, in the Prussian universities, of a candidate, before he can be admitted to examination for the degree of Doctor of Medicine.

TESTIS FEMINEUS, Ovary — t. Irritable, Orchidalgia — t. Minor, Prostate — t. Muliebris, Ovary — t. Virilis, Testicle.

TESTUDINATIO CRANII, Camarosis.

TESTUDO, *Chelonia*, (F.) *Tortue*. A genus of reptiles, including the turtle, the flesh of which is much esteemed as an article of diet.

Also, an encysted tumour, which has been supposed to resemble the shell of a turtle; *Emphy'ema encystis ganglion*. See Talpa.

TESTUDO CEREBRI, Fornix — t. Scapulae, see Scapula.

TET, Nipple.

TETANIC, *Tetan'icum, Spas'ticum, Convulsi'vum, Convul'sive*, (F.) *Tétanique*, from *τενω*, 'I stretch.' A remedy, which acts on the nerves, and, through them, on the muscles, occasioning, in large doses, convulsions. The chief agents of this class are *Nux Vomica, Strychnia, Brucia, Arnica*, and *Toxicodendron*.

Also, an epithet for a tonic convulsion.

TETANINE, Strychnia.

TETANOMATA, Tetanothra.

TETANO'THRA, *Tetanom'ata, Erugato'ria*, from *τετανος*, 'free from wrinkles.' Medicines which remove wrinkles. — Gorræus.

TÉTANOS, Tetanus.

TET'ANUS, from *τενω*, 'I stretch.' Spasm with rigidity. *Convul'sio Indica, Holoton'ia, Holoton'icus, Holotel'anus, Tet'anus universal'is, Rigor nerv'us seu nerv'rum, Ert'en'sio seu Disten'sio, Enta'sia tetanus, Cat'ochus cervi'nus seu holoton'icus*, (F.) *Tétanos, Mal de cerf*. A disease which consists in a permanent contraction of all the muscles or merely of some, without alternations of relaxation. It is characterized by closure of the jaws; difficulty or impracticability of deglutition; rigidity and immobility of the limbs and trunk, which is sometimes curved forwards (*Emprosthot'onos*), sometimes backwards (*Opisthot'onos*), and sometimes to one side (*Pleurothot'onos*). When tetanus is confined to the muscles of the jaws, it is called *Trismus*. It is a most formidable affection. The means of treatment are: — copious and repeated blood-letting;

bathing, cold and warm; powerful doses of opium, and other narcotics. In *Traumat'ic Tetanus*, or that which supervenes on a wound, every extraneous matter must, of course, be removed from the wound, and soothing applications be made to it.

TETANUS ANTICUS, Emprosthotonos — t. Dolorificus, Cramp — t. Dorsalis, Opisthotonos — t. Lateralis, Pleurothotonos — t. Maxilla inferioris, Trismus — t. Posterganeus, Opisthotonos — t. Posticus, Opisthotonos — t. Universalis, see Tetanus.

TETARTEUS, Quartan.

TETARTOPHI'A, from *τεταρος*, 'the fourth,' and *φωω*, 'I arise.' *Quarta'nus remit'tens*. A quartan, in which the intermission is inordinately short or imperfect.

TÊTE, Caput, Head — t. de Veau, Elephantiasis of the Greeks.

TETRADRACH'MON, from *τετρας*, 'four,' and *δραχμη*, 'a drachm.' A weight of four drachms or half an ounce.

TETRAGONUS, Platysma myoides.

TETRAHIT LONGIFLORUM, Galeopsis grandiflora.

TETRAMY'RON, from *τετρας*, 'four,' and *μυρον*, 'an ointment.' An ointment of four ingredients. — Galen.

TETRANGURIA, Cucurbita citrullus.

TETRANTHERA PICHURUM, Picburim beans.

TETRA'O COTUR'NIX, *Coturnix*, the Quail, (F.) *Caille*; *Class, Aves*; *Ord. Gallinacæ*. The quail is an esteemed article of diet. The Greek name is *ορνις, ορνυος*; and the places, called *Ortygia*, are named after it. The excrements of the quail were formerly extolled in epilepsy, and the fat in specks of the eye.

TETRAPHAR'MACUM, from *τετρας*, 'four,' and *φαρμακον*, 'a medicine.' A medicine consisting of four ingredients.

TETRAS'CELUS, from *τετρα*, 'four,' and *σκελος*, 'leg.' A monster having four legs. — Gurlt.

TETROB'OLON. The weight of four oboli, or two scruples. — Gorræus.

TETROROS, Astragalus.

TETTER, Herpes — t. Crusted, Impetigo — t. Honeycomb, Porrigo favosa — t. Humid, Eczema impetigo — t. Milky, Porrigo larvalis — t. Pustular, Impetigo — t. Running, Impetigo — t. Scaly, Psoriasis.

TETTERWORT, Chelidonium majus.

TEUCRIUM ÆGYPTIACUM, T. capitatum — t. Belium, T. capitatum.

TEUCRIUM CAPITA'TUM, T. Bel'ium seu Ægypti'acum, *Po'lium Capitatum, Poley Mountain of Montpellier*, *Ord. Labiatae*, is, generally, substituted for T. chamædrys. The common *Poley Mountain* is the *Teucrium montanum*; and the *Golden Poley Mountain*, the *Teucrium Po'lium, Po'lion*.

TEUCRIUM CHAMÆ'DRYS, T. officina'le, *Chamædrys, C. minor repens seu vulg'aris, Quer'cula minor seu Calamandr'na, Triss'ago, Chamæ'drops, Trisa'go, Common, Creeping or Small Germander, English Treacle*, (F.) *Petit chène, Chénette, Germandrée officinale*. This is possessed of aromatic and bitter properties. The dose of the dried powder is from ʒss to ʒj.

TEUCRIUM CHAMÆ'PITYS, *Chamæpitys, Arthet'ica, Arthetica, Aju'ga, A. seu Bu'gula Chamæ'pitys, Abiga, Chamæmor'rus, Iva arthrit'ica, Holoc'yron, Ionia, Sideritis, Common Groundpine*, (F.) *Petite Ieette*. Properties like the last. The tops and leaves have been recommended as aperients and tonics; especially in female obstructions, and in paralytic disorders.

TEUCRIUM CRET'ICUM, T. hyssopifo'lium seu *Rosmarinifo'lium, Rosmar'nus ste'chadis facie*,

P. Cy-mountain of Candy, Potium Creticum. The tops and whole herb enter into the old compounds, *Mithridate* and *Theriaca*. It has a moderately aromatic smell; and a nauseous, bitter taste, and is placed among the aperients and corroborants.

TEUCRIUM FLAVUM has similar properties to T. chamædryis.

TEUCRIUM HYSSOPIFOLIUM, T. Creticum.

TEUCRIUM IVA, *Chamæpitys moscha'ta, Iva, I. moscha'ta Monspelien'sium, Chamæpitys anthyllus, French Groundpine, (E.) Ivette musquée.* It has similar virtues to T. Chamæpitys, but is weaker.

TEUCRIUM MARITIMUM, T. Marum.

TEUCRIUM MARUM, *T. maritimum, Marum Syriacum seu Creticum seu verum seu Cortusi, Majorana Syriaca, Chamædryis incana maritima seu marum, Origonum Syriacum, Marum germanicum, Syrian herb mastich, Cat thyme, (F.) Marum on Germandrée maritime, Herbe aux chats.* A very aromatic plant, of a camphorated smell; formerly much used in medicine as a tonic, antispasmodic, emmenagogue, &c.

TEUCRIUM OFFICINALE, T. chamædryis—t. Palustre, T. scordium—t. Pyramidale, Ajuga—t. Rosmarinifolium, T. Creticum.

TEUCRIUM SCORDIUM, *T. palustris, Scordium, Trissago palustris, Chamædryis palustris seu scordium, Allium red'olens, Water Germander, (E.) Germandrée scorodone, Sauge des bois, Germandrée aquatique.* The leaves have a garlicky smell, and bitterish, slightly pungent taste. It has the tonic properties of the other Teucra.

TEXTUM INTERLOBULARE, Interlobular tissue.

TEXTURA, Texture—t. Organica, Histos.

TEXTURAL. Same etymon as Texture. Relating or appertaining to a texture.

TEXTURE, *Textura, Textus*, from *texere, texum*, 'to weave.' *Tela, Hypha, Hyphæ.* The particular arrangement of the tissues that constitute an organ.

TEXTUS, Texture, Tissue—t. Cellulosus, Cellular tissue—t. Desmosus, Desmoid tissue—t. Erectilis, Erectile texture—t. Nervorum, Plexus nervorum—t. Organicus, Cellular tissue—t. Papillaris, Corpus papillare—t. Parenchymalis, Cellular tissue.

THËRIA, Radzyge.

THALAMUS, *Θαλαμος, (F.) Couche.* 'A room or chamber; a bed.' The place at which a nerve originates, or has been considered to originate.

THALAMI NERVORUM OPTICORUM seu OPTICI, *Eminentia magna cerebri, Ganglia cerebri postica, Crura medullæ oblongatæ* (of some), *Striatæ corpora superiora posteriora, Colliculi nervorum optico'rum, Optic thalami, Posterior cerebrol ganglion, (F.) Couches des nerfs oculaires* (Ch.), *C. des nerfs optiques, C. optiques.* Two rounded and irregular surfaces, which are seen exposed in the lateral ventricles of the brain, and in the third ventricle, the inferior surface of which presents two projections, called *Corpora geniculatæ*, that furnish several filaments to the optic nerves. The name was given from a belief that the optic nerves originate from them. They, however, arise more posteriorly, and adhere merely to the inner margin of those bodies. Gall considers, that the thalami act as ganglions to the nerves; and, hence, he calls them *Grand ganglion cérébral inférieur.* They are, also, called *Posterior ganglion of the cerebrum.* From the thalami and corpora striata fibres proceed upwards to constitute the convolutions of the brain, and the various bands that connect the different parts of the brain together. The upper and inner parts of the thalami are so closely connected as to form one continued surface, called *Commissura mollis.*

The posterior parts turn downwards and outwards; after which they are elongated to form the two white cords, termed *Tractus optici.*

THALAMUS REGALIS, Pericardium.

THALICTRON, *Θαλιτρον, Thalictrum, T. magnum seu flavum seu flavescens seu pratense seu nigricans seu rugosum seu vaginatum, Rhubarbarum pauperum, Meadow-rue, Poor Man's Rhubarb, (F.) Pigamon jaunâtre, Rue des prés, Fausse-Rhabarbe, Rhabarbe des pauvres. Ord. Ranunculaceæ. Sex. Syst. Polyandria Polygynia.* The root resembles rhubarb in its properties.

THALICTRUM ANEMONOIDES, *Meadow Rue, Rue-leaved Anem'ony*; an indigenous plant, flowering in April and May.

THAMARINDUS, Tamarindus.

THAME, Pollex.

THANASIMUS, Mortal.

THANATODES, Mortal.

THANATOÏD, *Thanatoides*; from *thavatos*, 'death,' and *aidos*, 'resemblance.' Resembling death. Apparently dead.

THANATOL'OGY, *Thanatolog'ia, Thnescolog'ia*, from *thavatos*, 'death,' and *logos*, 'a discourse.' A description, or the doctrine, of death.

THANATOS, Death.

THAP'SIA, from the island Thapsus. *The deadly carrot, thapsia asclepias. Family, Umbelliferae. Sex. Syst. Pentandria Digynia.* The root operates violently, both upwards and downwards. It is not used.

THAPSUS BARBATUS, Verbascum nigrum.

THARSI, see Tarsus.

THASPIUM ACTÆIFOLIUM, Ligusticum actæifolium.

THASPIUM ATROPURPUREUM, *Th. cordatum, Round heart. Order, Umbelliferae.* The flowers, which appear in June, are of a dark purple.

THASPIUM BARBINODE, *Meadow Parsnep.* An indigenous plant, of the Northern and Western States, which flowers in June. Flowers, yellow.

Both plants have been esteemed vulnerary, antisyphilitic, and diaphoretic; and as antidotes to the bite of a rattlesnake.

THASPIUM CORDATUM, Th. atropurpureum.

THE, Thigh.

THË, *Thea—t. des Apalaches, Ilex vomitoria—t. du Canada, Gaultheria—t. Composé, Species—t. d'Europe, Salmia veronica—t. de France, Salmia—t. de Jersey, Celastrus—t. de la Mer du Sud, Ilex vomitoria—t. du Mexique, Chenopodium ambrosioides—t. de Simon Pauli, Myrica gale—t. Suisse, Falltranck.*

THEA, *Chaa, Tea, (F.) Thé.* There are two principal species of tea-plant; the *Thea Bohe'a*, and *Thea viridis*; the *black tea*, and the *green.* Ord. Camelliæ. Sex. Syst. Polyandria Monogynia. In commerce, many kinds of tea are met with. Several of the differences between these appear to result from the age at which the leaves have been collected, and the mode of their desiccation.

Tea-drinking was introduced into Europe about the year 1666; since which time its use has become almost universal; and, in spite of the assertions of medical terrorists, it is, except in particular idiosyncracies, entirely harmless.

By an analogical transference, very common in language, the word *Tea* has been used almost synonymously with infusion, as *Beef tea, Mint tea, &c.*

THEA GERMANICA, Veronica.

THEBESIIUS, VEINS OF. A name given to supposititious branches of the coronary veins, which Christopher Adam Thebesius, a German anatomist, described as opening into the heart by small depressions observable in the right auricle; and which have been called *Foramina*

Thebesii. No such veins can be demonstrated. The valve, at the orifice of the coronary vein, in the right ventricle, is called *Valvula Thebesii*, *V. Guiffartiana*, *V. venæ magnæ*.

THECA, Case, Vagina, Sheath — t. Cerebri, Cranium — t. Cordis, Pericardium — t. Folliculi, see Folliculi Graafiani — t. Vertebralis, see Vertebral canal.

THECITIS, from *theca*, and *itis*, denoting inflammation. A term, of hybrid formation, signifying inflammation of the sheaths of tendons.

THEIN, see *Coffea Arabica*.

THEION, Sulphur.

THEIOPEGÆ, Waters, mineral (sulphureous.)

THEIOTHERMÆ, Waters, mineral, sulphureous.

THELASIS, Lactation.

THELASMUS, Lactation.

THELASTRIA, Nurse.

THELE, Nipple.

THELITIS, (F.) *Thélite*; from *θηλη*, 'the female nipple,' 'the female breast,' and *itis*, denoting inflammation. Inflammation of the nipple.

THELONCUS, Mastoneus.

THELORRHAG'IA, from *θηλη*, 'nipple,' and *ρῆγη*, 'a rupture.' Hemorrhage from the nipple.

THELOS, Mamma.

THELYGON'IA, from *θηλος*, 'pertaining to the female sex,' and *γεννη*, 'generation.' The part taken by the female in the act of generation. Also, nymphomania.

THELYGONUM, Sperm (of the female.)

THELYPTERIS, Pteris aquilina.

THENAD, Thenal.

THENAL, *Thenar*; same etymon as *thenar*. Relating or appertaining to the thenar.

THENAL ASPECT. An aspect towards the side on which the thenar is situated.—Barclay. *Thenal* is used, adverbially, by the same writer, to signify 'towards the thenal aspect.'

THENAR, *Σεναρ*, from *σεινω*, 'I strike,' 'I push.' The palm of the hand, or sole of the foot.

THENAR, Flexor brevis pollicis manus, Palm.

THENAR or THENAL EM'INENCE is the projection at the anterior and outer part of the hand, formed by the abductor brevis, opponens, and flexor brevis pollicis.

THENAR or THENAL MUSCLE. Riolan and Winslow give this name to the fleshy mass, formed of the abductor brevis, opponens pollicis, and the interior part of the flexor brevis pollicis. In the foot, Winslow gives the name *Thenal muscle* to the abductor and flexor brevis pollicis pedis.

THEOBROMA CACAO, Cacao.

THEOMANIA, Demonomania.

THEOPLÉGIA, Apoplexy.

THEOPLÉXIA, Apoplexy.

THEORETICAL, *Theoreticus*, *Theoricus*, from *θεωρεω*, 'I contemplate.' (F.) *Théorétique*, *Théorique*. That which is confined to theory, or is connected with it. An epithet also applied to a sect of physicians, who founded their doctrine chiefly on reasoning.

THEORIA, Theory.

THÉORIQUE, Theoretical.

THEORY, *Theoria*, (F.) *Théorie*. Same etymon. The speculative part of a science. The connexion established in the mind between a general fact, or the least possible number of general facts, and all the particular facts dependent thereon: for example, the motions of the heavenly bodies, and the most important natural phenomena are connected with a single fact, previously known by observation; viz. that the force of gravity acts inversely according to the square of the distance. This constitutes the theory of universal gravitation. *Theory* must not be confounded with *system*. *Theory* regards nature as it is, and is a rigid deduction from facts. *System* is too

often the creature of the imagination, to which nature is made to bend.

THEORY OF MEDICINE, *Institutes of Medicine*, *Theoretical Medicine*, is that part of the science which attempts philosophically to account for the various phenomena that present themselves during health as well as in disease. It is the philosophy of Medicine. The *Institutes of Medicine* are generally considered to comprise Physiology and its applications to Pathology, Hygiene, and Therapeutics. By some they are considered to include General Pathology and General Therapeutics.

THEIOTHERMÆ, Waters, mineral, sulphureous.

THERAPEIA, Curation, Therapeutics.

THERAPEUSIS, Therapeutics.

THERAPEUTA, Therapist.

THERAPEUTICE, Therapeutics.

THERAPEUTICS, *Therapeutice*, *Therapeutisia*, *Therapeutis*, *Iatrotechnicæ*, *Therapeia*, *Therapia*, *Curatoria* *Meth'odus*, *Methodus Medendi*, *Practice of Physic*, (F.) *Thérapeutique*, *Thérapie*, from *ἑσπαρευω*, 'I wait upon, I alleviate, I attend upon the sick.' That part of medicine, the object of which is the treatment of disease. With others, the department which comprises an explanation of the *modus operandi* of medicines.

THÉRAPEUTIQUE, Therapeutics.

THERAPEUTIST, *Therapeutta*. Same etymon. One who practices therapeutics. A practitioner of medicine. To be a good therapist, a man must be well versed in every department of medicine, and be capable of observing and reasoning well. He may be a good *observer*, and yet a bad *reasoner*. He cannot practice well unless he is both. Hence, the comparatively small number of good therapists.

THERAPIA, Therapeutics.

THÉRAPIE, Therapeutics.

THERIA, Radzyge.

THERIACA, Theriaca — t. of Antipater, Antipatri theriaca.

THE'RIACA, *Θηριακα*, *Theriac*, from *θηρ*, 'a ferocious or venomous animal.' *Treacle*, *Melasses*, (F.) *Thériaque*. Also, a medicine, believed to be capable of curing or preventing the effects of the bite of a venomous animal. In this sense it is chiefly used by writers. *Theriac* and *Theriacal* have been used adjectively for medicinal.

THERIACA ANDROM'ACHI, *Venice Treacle*, is an ancient alexipharmic electuary; consisting of a farrago of 61 different ingredients, which possessed the most opposite properties. It was invented by Andromachus of Crete, and prepared by order of Nero. It has received various modifications; and, to the discredit of the *Faculté de Médecine* of Paris, long held its place in their Codex, with even an additional number of ingredients. The *Electuarium Opia'tum polyphar'macum* of the Codex has contained acid ingredients, 5; astringent, 5; bitter, 22; indigenous aromatics, 10; umbelliferous aromatics, 7; balsams and resinous substances, 8; fetid ingredients, 6; narcotics, 1; earthy substances, 1; gummy or amy-laceous, 4; saccharine, 3; total, 72! and one of these the *flesh of the viper!* A little more than a grain of opium is contained in each drachm of the compound.

THERIACA ARTICULORUM, Colebicum — t. Celestis, Tinctura opii — t. Communis, Melasses — t. Edinensis, Confectio opii.

THERIACA GERMANO'RUM. An extract or rob, prepared from juniper berries. Used as a stomachic.

THERIACA LONDINEN'SIS, *Cataplasma Cymini*. A cataplasm of *cumin seed*, bay berries, german-

der, *snakeroot, cloves, honey, and sometimes opium, or syrup of poppies.*

THERIACA RUSTICORUM, Allium.

THERIAQUE, Theriaca.

THERIAKI. In Turkey, *opium-eaters*, or they who indulge largely in the use of opium, are so called.

THERIATRICA, Veterinary art.

THERIODES, Ferine.

THERIO'MA, Therion, from *θηρ*, 'a venomous animal.' Any extremely malignant ulcer. Sometimes confined to ulcers of the lungs.

THERION, Therioma.

THERIOTOMY, Zootomy.

THERMA, Heat—t. Emphytum, Animal heat.

THERMÆ, Σεραται, Ther'mata. Warm baths or springs. See Waters (mineral.)

THERMÆ FABARLE, Peffers, Mineral Waters of—t. Piperinæ, Peffers, Mineral Waters of—t. Plumbaria, Plombières, Mineral Waters of.

THERMAL, Therma'lis; from *θερμη*, 'heat,' *Σερατος*, 'hot.' Relating or appertaining to heat. Hot, warm. As 'a thermal mineral water.'

THERMANTICA, Calcifications.

THERMASMA, Fomentation.

THERMATA, Thermæ.

THERMOMETER, see Heat.

THERMUM EMPHYTUM, Animal heat, Biolechnium.

THESIS, thesis, from *τιθημι*, 'to put.' 'A position or proposition.' *Disputatio inauguralis, Inaugural Dissertation.* The name usually given to the essay composed by a candidate for graduation in medicine, which he is at times required to defend publicly. Often, however, it is a mere form, giving useless labour and trouble to the student, inasmuch as it is executed as a task, and never afterwards regarded by the preceptor or by others. Sandifort, Haller, Smellie, and Stoll, have published collections of these.

Also, a suffix denoting 'arrangement;' hence *Diathesis.*

THEVE'TIA A'HOUI, Ahouai. The kernels of the nut of this Brazilian tree are said to be a violent poison. At the Antilles, its nuts are called *Noix de Serpent*; and they are used against the bites of serpents.

THEW, Tendon.

THEY, Thigh.

THICK-LISTED, Pursy.

THIGH, Sax. ðeah, Femur, Femen, Crus, Merus, Me'rium, (Sc.) The, They, (F.) Cuisse. (Of old, *Femur* meant the thigh generally, and especially the outer part;—*Femen*, the inner). The part of the lower limb which extends from the pelvis to the leg. The thigh is larger at its superior than inferior part, and has the form of an inverted and truncated cone, slightly depressed from within outwards. *Above*, it is bounded, *anteriorly*, by the groin; *externally*, by the hip; *behind*, by the fold of the nates; and *within*, by the perineal region. *Below*, it is bounded, *anteriorly*, by the prominence of the knee; *posteriorly*, by the ham. It is formed of a considerable number of muscles, blood-vessels, lymphatics, nerves, &c.; and is covered by a strong aponeurosis.

THIGHBONE, Femur—t. Neck of the, Collum femoris.

THIMBLE WEED, Rudbeckia laciniata.

THION, Sulphur.

THIRST, Sax. ðýrre, (D.) Dorst, Sitis, Dipsa, Potio'nis deside'rium, (F.) Soif. A simple desire or an absolute want for liquids. Physiologists are not entirely agreed regarding the seat of thirst; some place it in the fauces; others in the stomach. Its immediate cause is not known. It has been attributed to a dry condition of the nervous papillæ of the pharynx, produced by suppression of the salivary and mucous secre-

tions. This is probably true; but, again, it is owing to the wants of the system,—a supply of fluid being required to compensate the numerous losses that are constantly taking place. Thirst is an *internal sensation*,—an *instinctive want*—arising from organization, and inexplicable. It is an urgent symptom in many diseases, particularly in those of vascular excitement.

THIRST, EXCESSIVE, Polydipsia—t. Morbid, Dipsosis.

THIRSTY, Dipsodes.

THISTLE, BLESSED, Centaurea benedicta—t. Cotton, Onopordium acanthium—t. Globe, Echinops—t. Holy, Centaurea benedicta—t. Ladies', Carduus Marianus—t. Milk, common, Carduus Marianus—t. Pine, Atractylus gummifera—t. Sow, Sonchus oleraceus—t. Star, Centaurea calcitrapa—t. Yellow, Argemone Mexicana.

THLADIAS, Eunuch.

THLASIAS, Eunuch.

THLASIS, Contusion—t. Depressio, Depression.

THLASMA, Contusion—t. Concussio, Concussion—t. Stremma, Sprain.

THLASPI, Pennycress. Ord. Cruciferæ. Ser. Syst. Tetradynamia Siliculosa. Two species of thlaspi are directed, in some pharmacopœias, for medical use:—*Thlaspi arven'se* or *Treacle mustard*, and *Thlaspi campe'strê* seu *hirsu'tum* seu *vulga'tium*, *Lepid'ium campe'strê*, *Lep'ia* seu *Ibe'ris campe'stris*, *Mith'ridate mustard*. The pharmaceutical properties of both kinds resemble those of common mustard.

THLASPI BURSA, Th. bursa'tum, Thlaspi seu *Capsell'a* seu *Ibe'ris* seu *Nasturtium* seu *Rod'schied'ia bursa pasto'ris, Bursa pasto'ris, Shepherd's purse, Cocowort, St. James's wort, Poor man's Parmacity, (F.) Fleur de St. Jacques, Bourse à berger ou à pasteur, Tabouret.* A common European plant, introduced into this country. It is slightly astringent, but is little used.

THLASPI BURSATUM, Thlaspi bursa—th. Nasturtium, Lepidium sativum—th. Sativum, Lepidium sativum.

THLBIAS, Eunuch.

THLIPSENCEPHALIA, Derencephalia.

THLIPSENCEPHALUS, from *θλιψις*, 'compression,' and *εγκεφαλος*, 'the encephalon.' A monster in whom the skull is open, not merely in the frontal and parietal, but also in the occipital regions—a distinct fontanelle not existing.

THLIP'SIS, θλιψις, Compres'sio. Compression, and especially constriction of vessels by an external cause. Oppression.

THNESCOLOGIA, Thanatology.

THOLUS, Achicolum—t. Dioleus, Scapha.

THOMPSO'NIAN. One who practises or believes in Thompsonianism.

THOMPSO'NIANISM, Thomp'sonism. A fanciful doctrine, of which a person of the name of Thompson, of New York, is the founder. One of its leading principles is, that the human body is composed of four *elements* [?], earth, air, fire and water; and one of its apothegus,—that metals and minerals are in the earth, and, being extracted from the depths of the earth, have a tendency to carry all down into the earth who use them; that the tendency of all vegetables is to spring up from the earth, and therefore to uphold mankind from the grave.

The Thompsonians are Botanical Doctors. See Herb doctor.

THORACENTESIS, Thoracoentesis.

THORACHIQUE, Thoracic.

THORAC'IC, Thorac'icus, from *thorax, thoracis*, 'the chest;' (F.) *Thoracique* ou *Thoro'chique*. That which relates or belongs to the chest; as *Thoracic vis'cera*, &c.

THORACIC INFERIOR ARTERY, Arte'ria Thorac'ica Ecter'na Infe'rior seu *Longa* seu *mam-*

ma'ria externa seu Thoracica inferior, (F.) *Deuxième des Thoraciques* (Ch.), arises from the axillary, a little below the preceding, and descends vertically over the latter part of the thorax, and the serratus major anticus. It afterwards bends inwards; becomes subcutaneous, and divides into several branches, which embrace the breast. It gives numerous ramifications to the pectoralis major, serratus anticus, intercostals, ganglions of the axilla, mamma, &c.

THORACIC SUPERIOR ARTERY, *Arte'ria Thoracica Exter'na Superior*, (F.) *Artère thoracique supérieure, Première des Thoraciques* (Ch.), arises from the axillary artery or from the acromial; and descends forwards between the Pectoralis major and P. minor, to which it distributes itself by a great number of branches. In some subjects, there are two or three *Arteriæ thoracicæ externæ superiores*.

THORACIC DUCT; *Ductus thorac'icus seu thoracicus post'erior seu vertebra'lis seu chy'li'fer seu chyli seu lacteus seu ro'rifer seu Pecqueti seu Pecqueti'anus, Vena alba thora'cis, Alveus ampulles'ens, Distributo'ria lactea thoracica, Galax'ia, Duct of Pecquet, Alimentary Duct*, (F.) *Canal ou Conduit Thoracique*, is the duct in which the lymphatics of the lower limbs, abdomen, left superior extremity, left side of the head, neck, and thorax terminate. It begins at the *receptaculum chyli*, which is formed by the union of five or six large lymphatic trunks,—themselves formed from the union of all the absorbent plexuses of the abdomen. The duct ascends into the chest through the pillars of the diaphragm, and by the side of the aorta and vena azygos. It contracts in dimension, as far as the 6th dorsal vertebra, when it inclines towards the left hand; ascends behind the arch of the aorta; passes behind the left internal jugular vein, and opens at the posterior part of the subclavian vein of the same side. Its embouchure is furnished with two valves, which prevent the blood from passing from the vein into the duct.

THORACIC LIMBS are the upper limbs; so called because they are articulated with the lateral and upper parts of the chest.

THORACIC, LONG or INFERIOR, Mammary inferior external artery.

THORACIC NERVES. The *short or anterior thoracic nerves* are two in number. They arise from the brachial plexus, and divide into an anterior and a posterior branch:—the former distributed to the pectoralis major muscle; the latter uniting with a branch of the other to form a loop, from which numerous branches are given off to the pectoralis major and p. minor.

The *long thorac'ic nerve, Post'erior thorac'ic, External res'piratory* of Sir Charles Bell, is a long branch, which arises from the fourth and fifth cervical nerves, immediately after their escape from the intervertebral foramina, and passes downwards to be distributed upon the serratus magnus muscle.

THORACIC REGIONS are the different regions of the chest. Thus we say, *anterior, lateral, and superior thoracic, &c.*

THORACICA, Pectorals.

THORACICS, FIRST OF THE, Mammary superior external artery.

THORACIQUE, Thoracic.

THORACOENTE'SIS, *Thoracente'sis, Thoraco'omy*, from *θωραξ, θωρακος*, 'the chest,' and *κέντησις*, 'puncture.' *Paracente'sis thora'cis*. Perforation of the chest to evacuate contained fluid—as in empyema.

THORACOCYSTIS, Thoracocystis.

THORACODID'YMUS, from *θωραξ, θωρακος*, 'the chest,' and *δίδυμος*, 'a twin.' A monstrosity in which twins are united by the thorax.—Gurlt.

THORACODYNE, Pleurodynia.

THORACO-FACIAL, *Platysma myoides*.

THORACO-GASTRODID'YMUS, *Did'ymus sym'phyo-thoracogast'rius, Xiphodid'ymus*: from *θωραξ, θωρακος*, 'the chest,' *γαστήρ*, 'the belly,' and *δίδυμος*, 'a twin.' A monstrosity in which twins are united by the chest and abdomen.—Gurlt.

THORACO-MAXILLO-FACIAL, *Platysma myoides*.

THORACOMETER, Stethometer.

THORACOPATHI'A, from *θωραξ, θωρακος*, 'the chest,' and *πάθος*, 'disease.' Disease or suffering in the chest.

THORACOSCOPIA, see Auscultation.

THORACOSCOPIUM, Stethoscope.

THORACOTOMY, Thoracocentesis.

THORACYST'IS, *Thoracocyst'is*, from *θωραξ, θωρακος*, 'the chest,' and *κύστις*, 'a bladder.' Encysted dropsy of the chest. Hydatids in the chest.

THORAX, *θωραξ*, 'a cuirass, a coat of mail.' *Cith'arus, Venter me'dius, Pectus, Stethus, Scutum pec'toris, Bir, Chelys, Cassa, the Breast, the Chest*, (F.) *Poitrine*. One of the splanchnic cavities, *Cavum thora'cis*, bounded, posteriorly by the vertebræ; laterally, by the ribs and scapula: anteriorly, by the sternum; above, by the clavicle; and below, by the diaphragm. It is destined to lodge and protect the chief organs of respiration and circulation—the lungs and the heart.

THORAX, Corset.

THORE, Sperm.

THORN APPLE, *Datura stramonium*—t. Red, *Datura Sanguinea*.

THOROUGHSTEM, *Eupatorium perfoliatum*.

THOROUGHWAX, *Eupatorium perfoliatum*.

THOROUGHWORT, *Eupatorium perfoliatum*.

THOROW-WAX, *Bupleurum rotundifolium*.

THORULUS STRAMINEUS, *Fanon*.

THRÆNINE, see Tears.

THREADWORM, *Dracunculus*—t. Long, *Tri-chocephalus*.

THREPSIS, Assimilation, Nutrition.

THREPSOL'OGY, *Threpsolog'ia*, from *θρεψις*, 'nutrition,' and *λογος*, 'a description.' The doctrine of, or a treatise on, the nutrition of organized bodies.

THREPTICE, Assimilation.

THRIDACE, Lactucarium.

THRIDAX, Lettuce.

THRIFT, LAVENDER, *Statice limonium*—t. American, *Statice Caroliniana*—t. Sea-side, *Statice Caroliniana*.

THRIX, Capillus, Hair.

THROAT, *στον, στονα, Jugulum, Interstit'ium Jugula'rè, Guttur, Sphagè*, (Prov.) *Chokes, Droat, Hause, Hose*, (Sc.) *Halse, Hawse, Witter*. The anterior part of the neck. (F.) *Gorge*. Also, the pharynx.

THROATROOT, *Geum Virginianum, Liatris*.

THROATWORT, *Campanula trachelium*.

THROBBING, *Pulsat'ivus, Sphyg'micus, Sphygmo'des, Pul'satory*, (F.) *Pulsatif*. A throbbing pain, (Prov.) *Stang*, (F.) *Douleur pulsative*, is a kind of pain which is, or seems to be caused or augmented by the pulsation of arteries.

THROE, Agony, Pains, labour.

THROMBI LACTEI, *Infarctus mammæ lacteus*.

THROMBOCYST'IS, from *θρομβος*, 'a clot,' and *κύστις*, 'a cyst.' The cyst occasionally surrounding a clot of blood—as in encephalic hemorrhage.

THROMBOSIS, Coagulation, Thrombus.

THROMBUS, *θρομβος*, 'a clot,' from *θρομβωω*, 'to coagulate,' *Thrombo'sis, Trunbus, Hæmatoma*. A small, hard, round, bluish tumour; formed by an effusion of blood in the vicinity of a vein which has been opened in the operation of blood-

letting. The thrombus is most commonly owing to the opening in the vein and that of the skin not corresponding; to excessive smallness of the cutaneous orifice; or to small, fatty granules, which prevent the discharge of the blood. Compresses, dipped in salt water; camphorated spirit, and slight compression, usually disperse it. See Blood.

THROMBUS NEONATORUM, Cephalæmatoma.

THROPILL, Trachea.

THROPPLE, Trachea.

THROTTLE, Trachea.

THROW, Agony, Pains, labour.

THROWORT, *Leonurus cardiaca*.

THRUSH, Aphthæ — t. Milk, Aphthæ — t. White, Aphthæ.

THRUSTY, Dipsodes.

THRYPSIS, Commintion.

THUJA OCCIDENTALIS, *Thuya occidentalis*.

THUMB, Pollex.

THUREA, *Juniperus lycia* — t. Virga, *Juniperus lycia*.

THUS, see *Pinus abies* — t. Fœmininum, see *Pinus abies* — t. Judæorum, *Croton cascarrilla*, *Styrax*, *Thymiana* — t. Libanotos, *Juniperus lycia* — t. Masculum, *Juniperus lycia* — t. Verum, *Juniperus lycia* — t. Vulgare, see *Pinus abies*.

THUYA APHYLLA, see *Sandarac*.

THUYA seu THUYA OCCIDENTALIS, *T. obtusa*, *Cupressus Arbor Vitæ*, *American Arbor Vitæ*, *Tree of Life*. Ord. Coniferæ. The leaves and wood were formerly in high repute as resolvents, sudorifics, and expectorants, and were given in phthisical affections, intermittent fevers, and dropsies. The expressed juice has been applied to condylomata. The arrangement of the medullary matter of the cerebellum, termed *Arbor Vitæ*, is also called *Thuya*.

THYLACIÏTIS, *Gutta rosea*.

THYM, *Thymus*.

THYMA, *Thymion*.

THYMALOS, *Taxus baccata*.

THYMASTHMA, *Asthma thymicum*.

THYMBRA, *Satureia hortensis* — t. Hispanica, *Thymus mastichina*.

THYME, CAT, *Teucrium Marum* — t. Common, *Thymus* — t. Lemon, see *Thymus serpyllum* — t. Mother of, *Thymus serpyllum* — t. Virginia, *Pycnanthemum linifolium* — t. Wild, *Thymus serpyllum*.

THYMELEA, *Daphne gnidium* — t. Laureola, *Daphne laureola* — t. Mezereum, *Daphne mezereum* — t. Monspelica, *Daphne gnidium*.

THYMELECO'SIS, from *Thymus*, 'thymus,' and 'ελκος,' 'an ulcer.' Ulceration of the thymus gland.

THYMIAMA, *Στυαγα*, (*Stoa*, 'I burn perfumes') 'a perfume'; *Thus Judæorum*, *Muskwood*, (F.) *Narcaphate*. A bark from Syria, Cilicia, &c., supposed to be the product of the liquid storax tree. It has an agreeable, balsamic smell; approaching that of liquid storax.

THYMIAMA, Fumigation, Suffimentum.

THYMIASIOTECHNIA, *Thymiatechny*.

THYMIASIS, Fumigation.

THYMIATECHNY, *Thymiatech'nia*, *Thymiasioatech'nia*, *Cura fumigato'ria*, from *θυμια*, 'an odour,' and *τεχνη*, 'art.' The art of employing perfumes in medicine.

THYMIC, *Thymicus*, (F.) *Thymique*. Having relation to the thymus, as "thymic asthma."

THYMION, *Thyma*, *Thymus*, *Porrum*, *Porrus*, *Verru'ca rhago'idea* *Verru'ca minor*, from *thymos*, 'thyme.' A small wart on the skin, resembling a bud of thyme.

THYMIOSIS, *Frambesia* — t. Indica, *Frambesia*.

THYMIQUE, *Thymic*.

THYMI'TES. Wine impregnated with thyme
THYMI'TIS, from *Thymos*, 'thymus,' and *itis*, denoting inflammation. Inflammation of the thymus gland.

THYMIOPATHI'A, *Psychopathi'a*, from *Thymos*, 'the mind,' and *παθος*, 'affection.' A disease of the mind.

THYMOS, Rage.

THYMOXAL'ME, from *Thymos*, 'thyme,' *οξυς*, 'acid,' and 'αλς,' 'salt.' A compound of thyme, vinegar and salt.

THYMUS, *Thymus*, *Gland'ula Thymus*, *Corpus Thymia'mum* seu *Thymicum*, *Gland'idium*, *Thymus gland*, *Corpus incomprehensibile* of Jos. Frank. *Sweetbread* of the butcher. An organ, concerned in hæmatisis, which is seated in the upper separation of the anterior mediastinum. The thymus has the appearance of a glandular body. It is oblong; bilobate; soft, and very variable in size and colour. In the foetus, it is very large, and contains in a central cavity — *reservoir of the thymus* — a milky fluid; but it gradually disappears, and in old age is scarcely discernible. The arteries, called *thymic*, are from the inferior thyroid, internal mammary, bronchial, and mediastinal. The veins have the same arrangement. It receives some nervous filaments from the pneumogastric nerves, the phrenic, and the inferior cervical ganglia.

THYMUS, *T. vulgaris* seu *tenuifolius* seu *hortensis*, *Common Thyme*, (F.) *Thym*, *T. ordinaire*, *Farigoule*. Ord. Labiatæ. *Sex. Syst.* *Didynamia Gynospemia*. This herb has an agreeable, aromatic smell; and a warm, pungent taste. It is reputed to be resolvent, emmenagogue, tonic, and stomachic. It is not much used.

THYMUS, *Satureia capitata*, *Thymion* — t. *Calaminthus*, *Melissa calamintha* — t. *Capitatus*, *Satureia capitata* — t. *Ciliatus*, *T. mastichina* — t. *Creticus*, *Satureia capitata* — t. *Hortensis*, *Thymus* — t. *Includens*, *T. serpyllum*.

THYMUS MASTICI'NA, *T. ciliatus*, *Marum vulgare*, *Samp'suchus*, *Clinopodia*, *Mastic'ina Gallo'rum*, *Thymbra Hispan'ica*, *Jaca India*, *Common herb Mastic*. A low, shrubby, Spanish plant, used as an errhine. It has a smell like mastic. Its virtues resemble those of the *Marum Syriacum*; but it is said to be less powerful.

THYMUS MULTIFLORUS, *Melissa nepeta* — t. *Nepeta*, *Melissa nepeta*.

THYMUS, RESERVOIR OF THE, see *Thymus*.

THYMUS SERPYLLUM, *T. includens*, *Her'pylos*, *Herpy'los*, *Serpyllum*, *Serpulum*, *Serpillum*, *Gilardum*, *Serpyllum vulgare minus*, *Mother of Thyme*, *Wild Thyme*, (F.) *Serpolet*. This plant has the same sensible properties as the garden thyme; but has a milder and rather more grateful flavour. *Lemon Thyme*, the *Serpyllum citratum*, is merely a variety of the *Thymus Serpyllum*. It is very pungent; and has a particularly grateful odour, approaching that of lemons.

THYMUS SYLVATICUS, *Clinopodium vulgare* — th. *Sylvestris*, *Satureia capitata* — th. *Tenuifolius*, *Thymus* — th. *Vulgaris*, *Thymus*.

THYRA, *θυρα*, 'a gate, folding-door.' In composition, *Thyreos* and *Thyro*, *Thyros*, 'a shield resembling a folding-door,' mean the thyroid cartilage.

THYREMPHRAXIS, *Bronchocele*.

THYREO, *Thyro*, in composition, relating to the thyroid cartilage or gland.

THYREOADENITIS, *Thyreoiditis*.

THYREO-ARYT'ENOID, *Thyro-arytenoides* or *Thyro-arytenoides*. That which relates to the thyroid and arytenoid cartilages.

THYREO-ARYTENOID LIG'AMENTS, *Inferior Ligaments of the Larynx*, *Lips of the Glottis*, *Vocal Cords*, are two ligaments about two lines broad, formed of elastic and parallel fibres, which are

contained in a duplicature of the mucous membrane of the larynx. They extend horizontally from the anterior projection at the base of each arytenoid cartilage to the middle of the angle of union of the thyroid cartilage. They are the essential organs of voice. See Glottis.

THYREO-ARYTENOID MUSCLES, THYREO-ARYTENOIDÆI, are thin muscles, which arise from the middle and inferior part of the posterior surface of the thyroid cartilage; whence they proceed backwards and outwards, to be inserted into the outer part of the base of the arytenoid cartilage. They give the necessary tension to the ligaments of the glottis, in the production of the voice. Santorini has given the name *Thyre-arytenoïdeus obliquus* to a portion of the *arytenoïdeus* muscle.

THYREO-EPIGLOT'TIC, Thyreo-epiglottideus, Thyrepiglotticus. Sabatier and Santorini have given this name to the outer portion of the thyro-arytenoid muscle; because it passes from the thyroid cartilage to the anterior part of the epiglottis.

THYREO-HYOID, Thyro-hyoides, Thyro-hyoides, Hyodeothyroides. That which belongs or relates to the thyroid cartilage and os hyoides.

THYREO-HYOID OR HYO-THYROID MEMBRANE is a very broad, yellowish, fibrous membrane, thicker at the middle than at the extremities, which is attached, above, to the posterior surface of the body and great cornu of the os hyoides; and, below, to the whole superior edge of the thyroid cartilage.

THYREO-HYOÏDEUS or *Hyo-thyreoides Muscle* is situate at the anterior and superior part of the neck. It is attached to the oblique line on the anterior surface of the thyroid cartilage; to the inferior edge of the body of the os hyoides, and to the anterior portion of its great cornu. It approximates the thyroid cartilage and os hyoides to each other, by raising the cartilage, and with it the whole larynx: or, it can depress the os hyoides.

THYREO-PHARYNGEUS, Thyro-Pharyngens.

THYREOID, Thyroid.

THYREOÏDIEN, Thyroideal.

THYREOIDEUS, Thyroideal.

THYREOÏTIS, Thyreoïdeni'tis, Thyreoïdi'tis, Ang'na thyreoïdea, from *Thyros*, 'a shield,' and *itis*, denoting inflammation. Inflammation of the thyroid gland.

THYREONCUS, Bronchocele.

THYREOPHRAXIA, Bronchocele.

THYREPIGLOTTICUS, Thyreoëpiglottic.

THYRO, see Thyreo.

THYRO-ARYTENOID, Thyreo-arytenoid.

THYRO-CRICO-PHARYNGEUS, see Cricopharyngeal.

THYRO-HYOIDES, Thyreo-hyoid.

THYRO-PHARYNGEUS, Thyreo-pharyngens. Valsalva, Morgagni, Santorini, and Winslow have given this name to the portion of the constrictor pharyngis inferior, which is attached to the thyroid cartilages.

THYRO-PHARYNGEUS, Constrictor pharyngis, see Cricopharyngeal.

THYRO-PHARYNGO-STAPHYLINUS, Palato-pharyngens.

THYROCELE, Bronchocele.

THYROID, Thy'reoid, Thyroï'des, from *Thyra*, 'a gate or folding-door,' or from *Thyros*, 'a shield,' and *idos*, 'form.' That which has the shape of a folding-door.

THYROID CAR'TILAGE, Cartila'go Scutiformis seu *Scuta'tis* seu *Clypea'tis, Cöpperto'rium, C. Pelta'tis* seu *pelta'tus, Scutum, Ada'mi Morsûs Os,* is the largest of the cartilages of the larynx, at

the anterior part of which it is situate. It is larger transversely than vertically; broader above than below; and seems formed by the junction of the two quadrilateral plates, which produce, by their union, an angle that projects forwards. Its two posterior margins terminate above, and on each side, by an ensiform prolongation, called the *greater cornu of the thyroid cartilage, cornu superius* seu *longum*; and, below, by a less prominent eminence, the *lesser cornu, Cornu inferius* seu *brevë*, which is articulated with the cricoid.

THYROID GLAND, Corpus Thyreoïdeum, Glan'dula Thyreoïdea, (F.) Gland ou *Corps Thyroïde*, is an organ, the uses of which are not known. It covers the anterior and inferior part of the larynx, as well as the first rings of the trachea, and seems to be composed of two lobes, flattened from before to behind, which are united by a transverse prolongation of the same nature as themselves, called the *Isthmus*. The tissue of the thyroid is soft, spongy, and of a brownish colour; but its intimate structure is unknown. It is formed of several distinct lobules; collected in lobes of greater or less size. These are composed of granulations, some of which contain a yellowish or milky fluid. The thyroid gland receives four large arteries, called *Thyroideal*, as well as corresponding veins. Its nerves proceed from the pneumogastric, and from the cervical ganglia. No excretory duct has ever been found in it. Its uses are not known.

THYROIDEAL, Thyroïdeus, Thyreoïdeus, (F.) Thyroïdien, Thyroïdien. That which concerns the thyroid gland or cartilage.

THYROIDEAL ARTERIES are two on each side.

1. The *superior Thyroideal, superior laryngeal, superior guttural*, arises from the anterior part of the external carotid, and proceeds to the upper part of the thyroid gland, after having given off a *laryngeal branch* and a *crico-thyroid*. 2. The *inferior Thyroideal, inferior guttural*, much larger than the last, arises from the upper part of the subclavian. It passes, in a serpentine manner, to the inferior part of the thyroid gland, to which it is distributed, after having given a number of branches to the neighbouring parts, among which is the *cervicalis ascendens*.

THYROIDEAL VEINS are, 1. A *superior thyroideal*, and several *middle thyroideal*, which open into the internal jugular vein. 2. An *inferior thyroideal*, much larger than the preceding, whose branches form — by anastomosing with those of the opposite side, in front of the trachea — a very remarkable venous plexus, which J. Cloquet calls the *infra-thyroideal plexus*. The inferior thyroideal veins open, — the left into the corresponding subclavian; — the right, into the vena cava superior.

THYROÏDIEN, Thyroideal.

THYROPHRAXIA, Bronchocele.

THYRSUS, Penis.

THYSSELINUM, Peucedanum palustre.

THYSSELIUM PALUSTRE, Peucedanum palustre.

TIBI-PÉRONÉO-TARSIEN, Peronæus longus.

TIB'IA. A Latin word, which signifies a flute or pipe. *Chemë, Procnë'më, Procnë'mium, Fo'cité majus, Arun'do seu Canna major, Canna major* seu *domes'tica cruris, Shinbone.* The largest bone of the leg. A long, irregular, and triangular bone, situate on the inner side of the fibula. It has, 1. A *Superior or femoral extremity*, which is very large, rounded, and has two eminences at the sides, called *Tuberosities of the Tibia, or Tibial tuberosities*. The outermost is articulated with the fibula. On its head are two articular, oval, concave surfaces, separated by a process, called

Spine of the tibia, which are articulated with the condyles of the *Os femoris*. 2. An *inferior or tarsal extremity*, having an articular surface beneath, which joins the astragalus; within, a triangular eminence, which forms the malleolus internus; and, on the outside, a triangular surface, which articulates with the fibula. 3. The body or shaft of the tibia has three faces, separated by three angles, the anterior of which is the most prominent, and is called the *spine or crista of the tibia or tibial spine*. It is the *skin*. The tibia is articulated with the femur, fibula, and astragalus. It is developed by three points of ossification, one for the body, and one for each extremity.

TIBIA MINIMA, Fibula.

TIBLÆUS, Tibial.

TIB'IAL, *Tibia'lis*, *Tibiæ'us*, (F.) *Tibial*, *Jambier*. From *tibia*. That which relates to the tibia or to the leg.

TIBIAL APONEUROSIS, (F.) *Aponévrose Jambière*, surrounds the muscles of the leg. It is continuous, above, with the femoral aponeurosis, and arises, also, from the head of the fibula, and from several fibrous expansions which detach themselves from the tendons of the triceps, sartorius, gracilis, and semitendinosus. Thence it descends around the leg, attaching itself to the whole extent of the anterior and inner edges of the tibia. It sends, below, an expansion, which passes before the tendo Achillis, and is continuous with the anterior annular ligament of the tarsus. It is attached, also, to the sheath of the peronei muscles.

TIBIAL ARTERIES are two in number. 1. *Arteria Tibia'lis Ant'ica*, which arises from the popliteal, before its bifurcation: passes immediately through the opening in the upper part of the interosseous ligament, and reaches the anterior part of the leg; when it turns downwards, and descends obliquely, between the extensor communis digitorum pedis and the tibialis anticus, anterior to the interosseous ligament; glides under the anterior annular ligament of the tarsus, and takes the name *Dorsalis tarsi*. Amongst the numerous branches, given off by the tibialis antica, may be distinguished—the *Tibialis recur'rens*, *A. malleolaris interna*, and *A. malleolaris externa*. 2. *A. Tibialis post'ica*, arises from the bifurcation of the popliteal artery; and, slightly tortuous, descends between the two planes of the posterior muscles of the leg; until it arrives under the arch of the calcaneum, where it divides into two branches—the *Plantar arteries*.

TIBIAD, see Tibial aspect.

TIBIAL ASPECT. An aspect towards the side on which the tibia is situated.—Barclay. *Tibial* is used adverbially by the same writer, to signify, 'towards the tibial aspect.'

TIBIAL NERVES are two in number. 1. The *anterior tibial nerve*, *Prétibio-susplantaire*, (Ch.) One of the two branches in which the external popliteal terminates. It accompanies the arteria tibialis antica. 2. The *posterior tibial nerve*, *Branche tibiale du nerf fémoro-poplitée* (Ch.), is the *internal popliteal*.

TIBIAL VEINS, ANTERIOR AND POSTERIOR, have the same arrangement as the arteries which they accompany.

TIBIALIS ANTI'CUS, *Cat'ena mus'culus*, (F.) *Tibio-sus-métatarsien*, *Tibio-sustarsien* (Ch.), *Jambier antérieur*. A muscle situate at the anterior part of the leg. Above, it has the shape of a triangular prism; below, it is slender and tendinous. It is attached, above, to the anterior part of the external tuberosity of the tibia; to the superior half of the outer surface of that bone; and to the anterior surface of the interosseous ligament. Below, its tendon terminates at the base of the first cuneiform bone, and at the

posterior extremity of the first metatarsal bone. This muscle bends the foot on the leg, and directs its point inwards, at the same time that it raises its inner edge. It can, also, bend the leg on the foot, and prevent it from falling backwards in standing.

TIBIALIS GRACILIS, Plantar muscle.

TIBIALIS POSTI'CUS, (F.) *Tibio-tarsien*, *Tibio-sus-tarsien* (Ch.), *Jambier postérieur*. This muscle is situate at the posterior and deep part of the leg. It is thicker above than below; and is attached, above, to the posterior surface of the fibula; to the posterior surface of the tibia, and to the interosseous ligament. Its tendon terminates, below, at the tuberosity on the inferior extremity of the os scaphoides. This muscle extends the foot on the leg; at the same time raising its inner edge. It, likewise, extends the leg on the foot.

TIBIO-CALCANIEN, Soleus—*t. Phalangetien*, Flexor longus digitorum pedis profundus perforans—*t. Sous-tarsien*, Tibialis posticus—*t. Sus-métatarsien*, Tibialis anticus—*t. Sus-tarsien*, Tibialis anticus.

TIBIO-TARSAL, *Tibio-tar'seus*, (F.) *Tibio-tarsienne*. What relates to the tibia and tarsus.

TIBIO-TARSAL ARTICULATION is the articulation of the foot with the leg. It is formed by the tibia and the astragalus; and is strengthened by lateral, and by anterior and posterior ligaments.

TIBIO-TARSIEN, Tibialis posticus.

TIC, *Twitching*, *Vellication*. A local and habitual convulsive motion of certain muscles; and, especially, of some of those of the face. It is, sometimes, called *Tic convulsif* ou *Tic non douloureux*, *Histrionic Spasm of the Face*, to distinguish it from *Tic douloureux* or *neuralgia faciei*, and has been termed a *partial chorea* or form of *chronic chorea*, *Spasmus facia'lis*, *Chorea faciei*.

TIC DOULEUREUX, Neuralgia, facial—*t. non douloureux*, see Tic.

TICKLE WEED, Veratrum viride.

TICKLING, (Sc.) *Kittling*, *Kitilling*, (F.) *Chatouillement*. This word, sometimes, means the action of tickling (*titilla'io*, *titilla'tion*;) at others, the sensation produced by this action (*prur'itus*). A vivid sensation, which commonly causes laughter, and a state of general spasm that may be dangerous if too long protracted. There are some parts of the body, where we are easier tickled than others; for example, the sole of the feet, and the hypocondriac regions.

TICKSEED SUNFLOWER, *Coreopsis trichosperma*.

TICKWEED, *Hedeoma*—*t. Sunflower*, *Coreopsis trichosperma*.

TICO'REA FEBRIF'UGA; a Brazilian plant. Order, Rutaceæ, the bark of which is intensely bitter, astringent and antiperiodic.

TICOREA JASMINIFLO'RA. A decoction of the leaves is said to be drunk by the Brazilians as a cure for frambœsia.

TIDAL AIR, see Respiration.

TIERCE, see Tertian.

TIGE PITUITAIRE, Infundibulum of the brain—*t. Sus-sphénoidale*, Infundibulum of the brain.

TIGILLUM, Crucible.

TIGLIA SEU TIGLIU GRANA, see Croton Tiglium.

TIGRETIER, see Mania, dancing.

TIGULA, Saccharum.

TIKIMMA, *Cacocua coccinea*.

TILBURY, MINERAL WATERS OF. A saline chalybeate at West Tilbury, in Essex, England. It is not much frequented.

TIL'IA, *T. Europa'a seu grandiflo'ra seu cor-*

difo'lia seu *pauciflo'ra* seu *plataphyll'a*, (akin to $\pi\lambda\epsilon\tau\alpha$, 'the elm tree'). *Phil'gra*. The *Lime* or *Linden tree*, (F.) *Tilleul*. Ord. Tiliaceæ. The flowers have been supposed to possess anodyne and antispasmodic virtues.

TILIA AMERICANA. *T. glabra* seu *Canada'nsis*, *Linden*, *Linn*, *Basswood*, *Whitewood*, *Spoonwood*. A mucilage prepared by macerating the inner bark in cold water, has been applied to burns. It may be made into a cataplasm by thickening it with bran.

TILIA GLABRA, T. Americana — t. Canadensis, T. Americana.

TILLEUL, Tilia.

TILlicherry CORTEX, *Nerium* antidi-sentericum.

TILMA, Lintum.

TILMOS, Evulsion.

TILMUS, Carphologia.

TILY, OF THE INDIANS, *Viburnum* dentatum.

TIMAC. The name of an East India root, but of what vegetable is not clear. It is said to possess diuretic properties; and hence has been given in dropsics.

TIMBRE (F.), 'the sound of a bell.' The quality of sound by which one voice, or one instrument, can be distinguished from another when producing the same note.

TIMIDUS, Rectus inferior oculi.

TIN, (D.) Ten. *Stannum*, *Cassiteros*, *Cat-tit'eros*, *Stangos*, *Ju'piter*, *Stu'pia*, *Laos*, *Plumbum album* seu *can'didum*, (F.) *Étain*. A solid metal; of a peculiar odour when rubbed; insipid; colour whitish; s. g. 7.291; giving a peculiar tinkling sound when struck. It is used, in medicine, only as a mechanical anthelmintic. Dose, \mathfrak{z} of the *Pulvis Stanni*, *Stannum granula'tum* or *Granular tin*, in molasses. This is made by melting tin in an iron vessel over the fire, and, while it is cooling, stirring until it is reduced to a powder, which is passed through a sieve.—Ph. U. S.

TIN, BUTTER OF, Tin, muriate of—t. Chloruret of, Tin, muriate of—t. Deutohydrochlorate of, T. muriate of.

TIN-FOIL, *Stannum folia'tum*, *Stanni'olum*, is used for plugging carious teeth, &c.

TIN-GLASS, Bismuth—t. Granular, see Tin—t. Muriate of, superoxygenated, T. muriate of.

TIN, MURIATE OF, *Fuming liquor of Liba'vius*, *Mu'rios Stanni* seu *Oxyd'uli Stanni*, *Butter* or *Chlor'uret* or *Deu'to-hydro-chlorate* or *Superoxy-gena'ted Muriate of Tin*. This is formed of tin, one part; concentrated muriatic acid, three parts. To be crystallized by the aid of heat. A violent cathartic. Dose, gr. ij or iij.

TIN, SULPHURET OF, Aurum musivum.

TINAGMUS, Concussion.

TINASMUS, Tenesmus.

TINCTU'RA, from *tingere*, *tinctum*, 'to dye.' *Tincture*, *Essent'ia*, (F.) *Teinture Alcoolique*, *Al-cool'e*, *Alcohol*, *Alcoolature*. The term tincture is generally restricted to spirituous solutions of vegetable, animal, and some saline substances. It corresponds, therefore, with the word *Quintes'cence*, in one of its old significations; and with the *Alcoola'tum* of the *Codex* of Paris. It is not unusual, however, to speak of *aqueous tincture*, *ethereal tincture* (*Eth'rolature*, Béal), &c. Tinctures are usually made either with pure alcohol or proof spirit. The former are precipitated by water; and, therefore, are seldom used internally; the latter are common additions to infusions, decoctions, &c. They ought not, of course, to be united with any vehicle which can decompose them, or separate any thing from them in a palpable form; unless such decomposition is desired by the prescriber. In making tinctures, the ingredients should be reduced to a coarse

powder; and the maceration be made in close vessels, exposed to a heat of about 80°, and frequently shaken. When completed, they must be filtered, and put away for use in close bottles. When the process of displacement is employed, great care must be taken, so that the substances treated may be, as far as possible, exhausted of their soluble principles, and a perfectly clear tincture be obtained. To those who are not familiar with the process, the plan of maceration is preferable.—Ph. U. S.

TINCTURA ABSIN'THII COMPOSITA, *Essent'ia absin'thii composita* seu *amara*, *Compound Tincture of wormwood*. (*Absinth*, *artem. pontic*, *caryoph*. $\mathfrak{a}\mathfrak{a}$ \mathfrak{z} ss, *sacch*. \mathfrak{z} ij, *alcohol*. Oss. Macerate for fifteen days. *Ph. P.*) Tonic, stomachic, vermifuge, and carminative. Dose, $f\mathfrak{z}$ ij to $f\mathfrak{z}$ ss.

TINCTURA ACACIÆ CATECHU, *T. catechu* — t. *Acetatis ferri cum alcoholo*, see *T. ferri acetatis* — t. *Acidi sulphurici*, *Sulphuricum acidum aromaticum*.

TINCTURA ACONITI, (Ph. U. S. 1842.) *Tinctura Aconiti folio'rum*, (Ph. U. S. 1851.) *Tincture of Aconite*, (*Aconit. folior*. \mathfrak{z} iv, *alcohol. dilut*. Oij. Macerate for 14 days, express, and filter through paper. It may also be made by displacement. Ph. U. S.) Dose, grt. xx or xxx. It is rubbed on the seat of neuralgia.

TINCTURA ACONITI RADICIS, *Tincture of Aconite root*, (*Aconit. radice's contus*. \mathfrak{b} j, *Alcohol*. Oij. Macerate for 14 days; express and filter. It may also be prepared by displacement. Ph. U. S.) Uses same as the last.

TINCTURA ÆTHÆREA CAMPHORATA, *Solutio camphoræ æth'erea*, *Liquor nervi'vus Bang'ii*, *Spiritus sulphurico-æthereus camphoratus*, *Naphtha vitrioli camphorata*. (*Camphor*. p. i. *Æther sulphuric*. p. ii.) Stimulant in atonic diseases, arthritic neuralgia, and spasm. Dose, 20 to 30 drops in white wine.

TINCTURA ÆTHÆREA FERRI, *Alcohol* (seu *Tinctura* sulphurico-æthereus ferri — t. *Alcoholica Chinæ composita*, *T. cinchonæ composita* — t. *Alcoholica corticum aurantiorum Whyttii*, *Tinctura cinchonæ amara* — t. *Alexipharmaca Huxhami*, *Tinctura cinchonæ composita*).

TINCTURA AL'OEES, *T. Aloës Socotori'næ*, *Essent'ia Aloës*, *Alcohol cum Aloë perforata'ta*, *Tincture of Aloës*. (*Aloës*, pulv. \mathfrak{z} j. ext. *glycyrrh*. \mathfrak{z} ij, *aquæ* Oiss, *alcohol*. Oss. Macerate for 14 days, and filter. Ph. U. S.) Properties, those of aloës. Dose, $f\mathfrak{z}$ ss to $f\mathfrak{z}$ ss.

TINCTURA AL'OEES ÆTHÆREA, *T. Aloës vitriolata'ta*, *Æth'ereal Tincture of Aloës*. (*Aloës Socot.*, *Myrrh.*, $\mathfrak{a}\mathfrak{a}$ \mathfrak{z} iss, *croci* \mathfrak{z} j, *sp. ætheris sulph*. Oj. Digest the myrrh in the ether for 4 days; then add the aloës and saffron. *Ph. E.*) Stimulant and cathartic. Dose, $f\mathfrak{z}$ ij to $f\mathfrak{z}$ ij.

TINCTURA AL'OEES COMPOSITA, *Elix'ir Proprietatis* seu *aperitivum* seu *Aloës*, *Tinctura Aloës cum Myrrhæ* seu *Aloës et Myrrhæ* (Ph. U. S.,) seu *Aloës et Myrrhæ crocata*, *Elix'ir of long life*, *Compound Tincture of Aloës*, (F.) *Elix'ir de longue vie*, *Baume de vie de Lelidère*, (*Aloës*, in pulv., \mathfrak{z} ij, *croci*, \mathfrak{z} j, *Tinct. Myrrhæ*, Oij.) Macerate for 14 days, and filter. Purgative and stomachic. Dose, $f\mathfrak{z}$ ij to $f\mathfrak{z}$ ij.

Boerhaave's Elix'ir consisted of aloës, myrrh, saffron, and tartrate of potassa, digested in alcohol and water.

Radcliffe's Elix'ir is formed of *Aloës socot.* \mathfrak{z} vj, *cort. cinnam.*, *rad. zedoar*, $\mathfrak{a}\mathfrak{a}$ \mathfrak{z} ss, *rad. rhei* \mathfrak{z} j, *coccinell.* \mathfrak{z} ss, *syrup. rhamni* \mathfrak{z} ij, *sp. tenuior*. Oj, *aquæ puræ* $f\mathfrak{z}$ v.

TINCTURA AL'OEES ET MYRRHÆ, *T. aloës composita* — t. *Aloës et myrrhæ crocata*, *T. A. composita* — t. *Aloës vitriolata*, *T. A. ætherea* — t. *Amara*, *T. gentianæ composita* — t. *Ammonia composita*, *Spiritus ammonia succinatus* — t.

Amomi repentis, T. cardamomi — t. Amomi zingiberis, T. zingiberis.

TINCTURA ANGIUSTURÆ, *T. Cuspariæ*, *Tincture of Angustura*. (*Cort. cuspar.* in pulv. crass. redact. \mathfrak{z} ij, *sp. vin. ten.* Oij. Digest. *Ph. D.*) Dose, f \mathfrak{z} ij to f \mathfrak{z} ij.

TINCTURA ANTIFEBRILIS WARBURGI, see Beeru.

TINCTURA ANTIODONTALGICA, *Toothach Tincture*. (*Tannin.* \mathfrak{D} ij, *Mastich.* gr. v, *æther.* \mathfrak{z} ij. M.) To be applied on cotton wool to the tooth previously dried.

TINCTURA ARISTOLOCHIE SERPENTARIÆ, *T. serpentariæ* — t. *Aromatica*, *T. cinnamomi* composita — t. *Aromatica ammoniata*, *Spiritus ammoniæ aromaticus*.

TINCTURA ASSAFÆTIDÆ, *T. Ferulæ Assafætidæ*, *T. fœtida* seu *assafætidæ*, *Tincture of Assafætida*. (*Assafætid.* \mathfrak{z} iv, *alcohol.* Oij. Macerate for 14 days and filter. *Ph. D.*) Dose, gtt. xv to f \mathfrak{z} ij.

TINCTURA ASSAFÆTIDÆ AMMONIATA, *Spiritus Ammoniæ fœtidus*.

TINCTURA AURANTII, *T. Corticis Aurantii*, *Tincture of Orange Peel*. (*Aurant. cort. recent.* \mathfrak{z} ij, *sp. rect.* Oij. Digest for 14 days.) Stomachic. Used as an adjunct to stomachic draughts. Dose, f \mathfrak{z} ss to f \mathfrak{z} ij.

TINCTURA AUREA, *Alcohol* seu *tinctura sulphurico-æthereus ferri*.

TINCTURA BELLADONNÆ, *Tincture of Belladonna*. (*Belladonnæ.* \mathfrak{z} iv, *alcohol. dilut.* Oij. Macerate for 14 days; express, and filter through paper. It may, also, be prepared by displacement. *Ph. U. S.*)

TINCTURA BENZOÏNI COMPOSITA, *T. Benzoiis composita*, *Balsamum Catholicum* seu *Per'sicum* seu *traumat'icum*, *Elixir traumaticum*, *Compound Tincture of Benzoïn*, *Friar's* or *Vervain's Balsam*, *Wade's* or *Jesuit's drops*, *Commander's* or *Wound Balsam*, *Balsam for Cuts*. (*Benzoïn.* \mathfrak{z} ij, *styrac. purif.* \mathfrak{z} ij, *Balsam. tolu.* \mathfrak{z} ij, *aloes*, in pulv. \mathfrak{z} ss, *alcohol.* Oij. Macerate for 14 days and filter. *Ph. U. S.*) Stimulant. Used chiefly to wounds and ulcers.

The basis of *Turlington's Balsam of Life*, *Turlington's Balsam*, is the Compound Tincture of Benzoïn. The following form is recommended by a committee of the Philadelphia College of Pharmacy:—*Alcohol.* Oviij, *Benzoïn.* \mathfrak{z} xij, *Styrac. liquid.* \mathfrak{z} iv, *Aloes Socotrin.* \mathfrak{z} ij, *Balsam. Peruvian.* \mathfrak{z} ij, *Myrrhæ.* \mathfrak{z} ij, *Rad. Angelic.* \mathfrak{z} ss, *Balsam. Tolu.*, *Ët. Glycerh.* \mathfrak{a} ã \mathfrak{z} iv. Digest for 10 days, and strain.

The *Essence of Coltsfoot* consists of equal parts of the *Compound Tincture of Benzoïn* and *Balsam of Tolu*, to which is added double the quantity of *Rectified Spirit of Wine*. It is sold as a pectoral.

TINCTURA BUCHU, *T. Buchu*, *Tincture of Buchu*. (*Buch.* \mathfrak{z} v, *Alcohol. dilut.* Oij (Imp. meas.) Digest for seven days and filter. It may be made, also, by percolation. *Ph. E.*) Dose, f \mathfrak{z} ij to f \mathfrak{z} iv.

TINCTURA BUCKU, *Tinctura Bnchu*.

TINCTURA CALUMBÆ, *T. Columbæ* seu *Colombæ* (*Ph. U. S.*), *Tincture of Columbo*, *Columbo Bitters*, (*Columb. rad.* cont. \mathfrak{z} iv, *alcohol. dilut.* Oij. Macerate for 14 days; express, and filter. *Ph. U. S.*) Dose, f \mathfrak{z} ss to f \mathfrak{z} iv. It may, also, be made by displacement.

TINCTURA CAMPHORÆ, *Spiritus camphoræ*.

TINCTURA CAMPHORÆ COMPOSITA, *T. Opii Camphorata* (*Ph. U. S.*), *Compound Tincture or Camphorated Tincture of Opium*, *Elixir Paregoricum*, *Paregoric Elixir*. (*Opii*, in pulv., *Acid Benzoic.* \mathfrak{a} ã \mathfrak{z} ot. *anis.* f \mathfrak{z} ij, *mellis despumat.* \mathfrak{z} ij, *Camphor.* \mathfrak{D} ij, *alcohol. dilut.* Oij. Macerate for 14 days, and filter through paper. *Ph.*

U. S.) One fluidounce contains nearly gr. ij of opium. Anodyne. Dose, f \mathfrak{z} ij to f \mathfrak{z} ijij.

Squire's Elixir, an empirical carminative preparation, is thus made, according to one formula. (*Opii.* \mathfrak{z} iv, *camphor.* \mathfrak{z} ij, *cocci.* \mathfrak{z} ij, *fœnicul. dulc.* \mathfrak{z} ij, *tinct. serpent.* Oj, *sp. anisi.* cong. ij, *agua* Oij, *auri musivi*, \mathfrak{z} vj.)

TINCTURA CAN'NABIS INDICÆ, *Tincture of Indian Hemp*. (*Ext. Cannab. purif.* \mathfrak{z} ss (avoirdupois), *sp. rectificat.* Oss (Imp. meas.) Dissolve. *Ph. D.*) Dose, about 40 drops.

TINCTURA CANTHARIDIS, *T. C. Vesicatoriæ*, *T. Lytta* seu *Melœois vesicatorii*, *Tincture of Cantharides*, *Tincture of Blistering Flies*, *T. of Spanish Flies*, (*F.*) *Teinture rubéfiante*. (*Cantharid.* cont. \mathfrak{z} ij, *alcohol. dilut.* Oij. Macerate for 14 days; express, and filter. It may, also, be prepared by displacement. *Ph. U. S.*) Stimulant and diuretic, but not often used internally. Externally, stimulant. Dose, gtt. x.

Matthew's Injection, a once celebrated nostrum for fistula in ano, consisted wholly of a dilute *Tincture of Cantharides*.

TINCTURA CAP'SICI, *Tincture of Capsicum* or *Cayenne Pepper*. (*Capsic.* \mathfrak{z} ij, *alcohol. dil.* Oij. Macerate for 14 days, and filter. It may, also, be prepared by displacement. *Ph. U. S.*) Stimulant. Dose, f \mathfrak{z} ss to f \mathfrak{z} ij.

TINCTURA CARDAMOMI, *T. amomi repentis*, *Tincture of Cardamoms*. (*Cardam.* cont. \mathfrak{z} iv, *alcohol. dilut.* Oij. Macerate for 14 days, strain, and filter. It may, also, be made by displacement. *Ph. U. S.*) Use, the same as the seeds. Dose, f \mathfrak{z} ij to f \mathfrak{z} iv.

Solomon's Balm of Gilead, an empirical preparation, seems to be an aromatic tincture, — of which *Cardamoms* form a leading ingredient, — made with brandy. Some affirm that it contains *cantharides*.

TINCTURA CARDAMOMI COMPOSITA, *Tinctura Stomachicæ*, *Compound Tincture of Cardamoms*, *Stomach Tincture*. (*Cardamom.* cont. \mathfrak{z} vj, *Carui.* cont. \mathfrak{z} ij, *cinnam.* cont. \mathfrak{z} v, *Uvæ passæ* demptis acinis, \mathfrak{z} v, *cocci.* cont. \mathfrak{z} ij, *alcohol. dilut.* Oiiiss. Macerate for 14 days; express and filter. *Ph. U. S.*) Stomachic and carminative. Dose, f \mathfrak{z} ij to f \mathfrak{z} iv.

TINCTURA CARMINATI'VA SYLVII, *Alcoolatum Carminativum Sylvii*, *Carminative Elixir of Sylvius*. (*Rad. angelic.* 4 p., *rad. imperator.*, *galang.* \mathfrak{a} ã 6 p., *fol. rosmarin.*, *majoran.*, *rute.*, *basilic.* \mathfrak{a} ã 48 p., *baccar. laur. nobil.* 12 p. *sem. angelic.*, *ligust. levist.*, *anis.* \mathfrak{a} ã 16 p., *zingib.*, *nuc. moschat.* \mathfrak{a} ã 6 p., *cinnam.* 12 p., *caryoph.*, *cort. limon.* \mathfrak{a} ã 4 p. Add *alcohol* 1500 p. Macerate and distil, 1000 p. *Ph. P.*) A warm stomachic, carminative, &c. Dose, f \mathfrak{z} ss to f \mathfrak{z} ss.

TINCTURA CASCARILLÆ, *T. Crotonis Eleutheriæ*, *Al'cohol cum Crotonæ* *Cascarillâ*, *Tincture of Cascarella*. (*Cascarill. cort.* cont. \mathfrak{z} iv, *sp. ten.* Oij. *Ph. L.*) Dose, f \mathfrak{z} ij to f \mathfrak{z} iv.

TINCTURA CASTOREI, *T. Castorei Ros'sici* seu *Castorei Canaden'sis*, *Essentia Castorei*, *Al'cohol castoriatum*, *Tincture of Castor*. (*Castor* cont. \mathfrak{z} ij, *alcohol.* Oij. Macerate for 7 days, express, and filter. *Ph. U. S.*) Tonic and antispasmodic. Dose, gtt. xx to f \mathfrak{z} ij, or more.

TINCTURA CASTOREI COMPOSITA, *T. C. ammoniata*, *Compound Tincture of Castor*. (*Cast.* \mathfrak{z} ij, *g. asafætid.* \mathfrak{z} ss, *alcohol. ammoniat.* Oj. *Ph. E.*) Antispasmodic. Dose, f \mathfrak{z} ij to f \mathfrak{z} iv. Called, also, *Elixir fœtidum*, *Tinctura castorei fœtida* seu *fœtida ammoniata*.

TINCTURA CAT'ECHU, *Tinctura Japonicæ* seu *Mimo'sæ Catechu* seu *Aca'ciæ Catechu*, *Tincture of Catechu*. (*Catech.* \mathfrak{z} ij, *cinnam. contus.* \mathfrak{z} ij, *alcohol. dilut.* Oij. Macerate for 14 days, express and filter. *Ph. U. S.*) Astringent. Dose, f \mathfrak{z} ij to f \mathfrak{z} ijij.

The *Concentrated Solution of Charcoal*, sold for cleaning the teeth, seems to be little more than the tincture of catechu.

TINCTURA CHIRETTÆ, *Tincture of Chiretta*. (Chirett. cont. $\frac{3}{v}$, (avoid.) alcohol. dilut. Oij. (Imp. meas.) Macerate for 14 days. Ph. D.) Dose, f $\frac{3}{j}$, or f $\frac{3}{ij}$, as a tonic.

TINCTURA CUCUTÆ, T. conii maculati.

TINCTURA CINCHONÆ, T. Corticis Peruvia'ni Simplex seu Cort. Peruvia'ni, *Tincture of Cinchona or of Bark*. (Cinchon. flav. in pulv. $\frac{3}{vj}$, alcohol. dilut. Oij. Macerate for 14 days, express, and filter through paper. It may, also, be made by displacement. Ph. U. S.) Dose, f $\frac{3}{j}$ to f $\frac{3}{ij}$, or more.

TINCTURA CINCHONÆ AMA'RA seu alcohol'ica corticum aurantiorum Whyttii seu Kinki'na amara, *Elixir antihypochondriacum seu rob'orans Whyttii seu Whyttii seu stomach'icum spiritu'sum, Essentia Corticis Peruvia'ni Composita*. (Cinch. p. viij, Gentian. Rad., Cort. Aurant. p. iij. Alcohol. ('900) 96 p. Digest. Dose, one or two teaspoonfuls.)

TINCTURA CINCHONÆ AMMONIATA, T. Corticis Peruvia'ni volatilis, *Ammoniated or Volatile Tincture of Bark*. (Cinchon. lancifol. cort. cont. $\frac{3}{iv}$, sp. ammon. aromat. Oij. Ph. L.) In dyspepsia, combined with acidity and languor.

TINCTURA CINCHONÆ ÆTHE'REA COMPOSITA, T. Kinæ Kinæ æthe'rea composita, *Elixir'ium Antisepticum Doct'oris Chaussier, Chaussier's Antiseptic Elixir*. (Cinchon. officin. $\frac{3}{ij}$, cascarill. $\frac{3}{ss}$, cinnam. $\frac{3}{ij}$, croci $\frac{3}{ss}$, sacch. alb. $\frac{3}{xxxvij}$. Put these bruised into a mattress, and add vin. alb. Hispanicæ. vel vin. muscat. alcohol. $\frac{aa}{Oj}$. Macerate for two days, and add sulphuric ether f $\frac{3}{ss}$. Ph. P.) Tonic, stimulant, and antiseptic. Dose, f $\frac{3}{ss}$ to f $\frac{3}{j}$.

TINCTURA CINCHONÆ COMPOSITA, T. Corticis Peruvia'ni Composita seu febrifuga Doct'oris Huxhami seu Alexipharmaca Huxhami seu Alcohol'ica China Composita, *Essentia China seu Corticis Peruvia'ni Alexipharmaca Huxhami seu antiseptica Huxhami, Compound Tincture of Cinchona or Bark, Huxham's Tincture of Bark*. (Cinchon. rubr. pulv. $\frac{3}{ij}$, aurant. cort. cont. $\frac{3}{ss}$, serpent. cont. $\frac{3}{ij}$, croci, santal. $\frac{aa}{j}$, alcohol. dilut. f $\frac{3}{xx}$. Macerate for 14 days, express, and filter. Ph. U. S.) It may, also, be made by displacement. More grateful than the simple tincture. Dose, f $\frac{3}{j}$ to f $\frac{3}{ij}$.

TINCTURA CINNAMOMI, T. Lauri Cinnamomi, *Essentia Cinnamomi, Tincture of Cinnamon*. (Cinnam. cont. $\frac{3}{ij}$, alcohol. dilut. Oij. Macerate for 14 days, express, and filter. Ph. U. S.) It may, also, be prepared by displacement. Stomachic. Dose, f $\frac{3}{j}$ to f $\frac{3}{ij}$.

TINCTURA CINNAMOMI COMPOSITA, T. seu Essentia Aromatica, *Alcoöl cum Aromat'ibus Compositus, Compound Tincture of Cinnamon*, (F. Eau de Bonferme ou d'Armagnac. (Cinnam. cont. $\frac{3}{j}$, cardam. cont. $\frac{3}{ss}$, zingib. cont. $\frac{3}{ij}$, alcohol. dilut. Oij. Macerate for 14 days, express, and filter. Ph. U. S.) It may, also, be prepared by displacement. Use, same as the last. Dose, f $\frac{3}{j}$ to f $\frac{3}{ij}$.

TINCTURA COCCI CACTI, *Tincture of Cochineal*. (Cocci pulv. $\frac{3}{ij}$ (avoid.), alcohol. dilut. Oj. (Imp. meas. Ph. D.) Chiefly a colouring ingredient. At times, given in nervous affections. Dose, gtt. xij to f $\frac{3}{j}$.

TINCTURA DE COCHLEA'RIS, *Alcoölum de Cochlea'ris seu antiscorbuticum*. (Fol. cochlear. recent. 2500 p., rad. armoraciae, 230 p., alcohol. (22° to 32° Beaumé) 3000 p., distil off 2000 p. Ph. P.) Antiscorbutic. Dose, f $\frac{3}{ij}$ to f $\frac{3}{j}$.

TINCTURA COLCHICI, T. C. Sem'inis, (Ph. U. S.), *Tincture of Colchicum Seed*. (Colchic. sem.

cont. $\frac{3}{iv}$, alcohol. dilut. Oij. Macerate for 14 days, express, and filter. Ph. U. S.) It may, also, be prepared by displacement. Dose, ten to sixty drops.

TINCTURA COLCHICI COMPOSITA, Spiritus colchici ammoniatus—t. Colchici seminis, T. colchici —t. Colombæ, T. Calumbæ.

TINCTURA CONII, T. C. Maculati, T. Cicutæ, *Tincture of Hemlock*. (Conii fol. $\frac{3}{iv}$, alcohol. dil. Oij. Macerate for 14 days, express, and filter. Ph. U. S.) It may also be made by displacement. Use;—the same as that of the leaves.

TINCTURA CONII MACULATI, T. conii —t. Convolvuli Jalapæ, T. jalapii —t. Corticis aurantii, T. aurantii —t. Corticis Peruviani composita, T. cinchonæ comp. —t. Corticis Peruviani simplex, T. cinchonæ —t. Corticis Peruviani volatilis, T. cinchonæ ammoniata.

TINCTURA CROCI SATI'VI, T. Croci, *Tincture of Saffron*. (Crocii Angl. cont. $\frac{3}{j}$, alcohol. dilut. $\frac{3}{xv}$. Ph. E.) Slightly stomachic [?]. Dose, f $\frac{3}{j}$ to f $\frac{3}{ij}$.

TINCTURA DE CROCO COMPOSITA, *Elixir'ium de Garus, Alcoölum de Croco Compositum, Compound Tincture of Saffron, Elixir of Garus*. (Aloes Socotr. 320 p., myrrh. 64 p., croci. 32 p., cinnam., nuc. moschat., caryoph. $\frac{aa}{j}$, 16 p., alcohol. 1000 p. aq. flor. aurant. 5000 p. Digest for two days; distil 4000 p. and add syrup of capillaire, 5000 p. Ph. P.) Aromatic, cordial, stomachic. It is also called *Elixir cordialè et stomach'icum*, and *E. anticol'icum erocatum*.

TINCTURA CROTONIS, *Tincture of Croton*. Under this name Mr. E. Wilson recommends 'a most valuable cutaneous stimulant,' made by adding four fluidounces of alcohol to one ounce of the bruised seeds of *Croton tiglium*.

TINCTURA CROTONIS ELEUTHERLE, T. cascariellæ.

TINCTURA CUBE'Æ, *Tincture of Cubebs*. (Cubeb. cont. $\frac{3}{iv}$, alcohol. dilut. Oij. Macerate for 14 days, express, and filter. Ph. U. S.) It may, also, be prepared by displacement. Dose, one or two fluidrachms.

TINCTURA CUSPARIÆ, *Tincture Augusturæ*.

TINCTURA DIGITALIS, T. Digitalis purpureæ, *Tincture of Digitalis*. (Digital. $\frac{3}{iv}$, alcohol. dilut. Oij. Macerate for 14 days, express, and filter.) It may, also, be prepared by displacement. Use, same as that of the leaves. Dose, gtt. x.

TINCTURA ER'GOTÆ, *Tincture of Ergot*. (Ergot. in pulv. crass. $\frac{3}{vij}$ (avoid.), Sp. tenuior. Oij. (Imp. meas.) Macerate for 14 days, express, and filter. Ph. D.) Dose, f $\frac{3}{j}$ to f $\frac{3}{ij}$.

TINCTURA ER'GOTÆ ÆTHE'REA, *Ethe'real Tincture of Ergot*. (Ergot. contus. $\frac{3}{xv}$, Æther. Oij. (Imp. meas.) Macerate for 7 days, express, and filter. Ph. L.) Dose, 60 to 90 minims.

TINCTURA FERRI'FUGA DOCTORIS HUXHAMI, T. cinchonæ composita.

TINCTURA FERRI ACETA'TIS, *Tincture of Acetate of Iron*. (Potass. acetat. $\frac{3}{ij}$, sulph. ferri. $\frac{3}{j}$, sp. rectif. Oij. Rub the acetate and sulphate into a soft mass. Dry and rub with the spirit. Digest for 7 days, and pour off. Ph. D.) Tonic and astringent. Dose, gtt. xx to f $\frac{3}{j}$. The Dublin college directs a *Tinctura Acetatis Ferri cum Alcoöl'è*, which differs from the other, in having half the quantity, only, of the Acetate of Potass.

TINCTURA FERRI AMMONIATA, T. Ferri Ammoniacalis seu Florum martialium seu Martis Myrsich'iti, *Tincture of Ammoniated Iron*. (Ferri ammon. $\frac{3}{iv}$, sp. ten. Oj. Ph. L.) Use—same as that of the ammoniated iron. Dose, f $\frac{3}{ss}$ to f $\frac{3}{j}$.

TINCTURA FERRI AMMONIO-CHLORIDI, *Tincture of Ammonio-chloride of Iron*. (Ferri ammonio-chlorid. $\frac{3}{iv}$, alcohol. dilut., aquæ destillat.

āā Oj. (Imp. meas.) Dissolve and filter. *Ph. L.*)
Dose, gtt. x to xx.

TINCTURA FERRI CHLORIDI, T. ferri muriatis.

TINCTURA FERRI MURIA'TIS, *T. Ferri chlo'ridi* (*Ph. U. S.*) seu *sesqui-chlo'ridi seu Martis in Spi-ritu Salis seu Martis cum Spiritu Salis seu Ferri Muriat'i, Liqueur Ferri Muriat'is, Tincture of Muriate of Iron, Tincture of Steel, Alcohol ferra'tus.* (*Ferri subcarb. f'iss, acid. muriat. Oj, alcohol. Oij.*) Add the acid to the subcarbonate in a glass vessel, and shake during three days. Pour off and add the spirit. *Ph. U. S.*) Tonic and styptic. It has been given, also, with advantage in erysipelas and scarlatina in the dose of ℥ x to ℥ xx, every two or three hours. Dose, gtt. x to xx.

Bestucheff's Tincture or *Klaproth's Tincture* is an ethereal tincture of chloride of iron. It is composed of dry perchloride of iron, one part; *Hoffmann's anodyne liquor*, seven parts.

The *Antivenereal Drops*, at one time so celebrated at Amsterdam, were examined by Scheele, and found to be a tincture of chloride of iron and corrosive sublimate.

TINCTURA FERRI SESQUICHLORIDI, T. Ferri muriatis—t. Fernæ Assafetidæ, T. Assafetidæ—t. Florum martialium, T. ferri ammoniata—t. Fœtida, T. assafetidæ—t. Fœtida ammoniata, T. castorei composita—t. Fuliginis, see Fuligo.

TINCTURA GAL'BANI, *Tincture of Galbanum.* (*Galb. ʒij, sp. tenuior. Oij. Ph. D.*) Stimulant and antispasmodic. Dose, fʒj to fʒijj.

TINCTURA GALLA'RUM, *T. Gallæ.* (*Ph. U. S.*) *Tincture of Galls.* (*Gall. contus. ʒiv, alcohol. dilut. Oij.*) Macerate for 14 days, express and filter. *Ph. U. S.*) It may, also, be prepared by displacement. Astringent. Dose, fʒj to fʒijj.

TINCTURA GENTIA'NÆ COMPOS'ITA, *Tinct. Ama'ra, Elixir Stomach'icum, Compound Tincture of Gentian, Spirit Bitters.* (*Gent. concis. ʒij, aurant. cort. ʒj, cardam. cont. ʒss, alcohol. dilut. Oij.*) Macerate for 14 days, express, and filter. It may, likewise, be prepared by displacement. *Ph. U. S.*) Tonic and stomachic. Dose, fʒj to fʒijj.

Brodum's Nervous Cordial consists of the *Tinctures of Gentian, Columba, Cardamom, and Bark*, with the *Compound Spirit of Lavender, and Wine of Iron.*

Stoughton's Elixir is a compound tincture of gentian. The *Elixir'ium Docto'ris Stoughton* seu *Tinctu'ra Ama'ra* of the Parisian Codex is prepared as follows:—*Absinth. summit. exsiccat., Teucri chamædrys. Rad. gentian., cort. aurant., āā ʒvj, cascarillæ ʒi. rhei ʒss, aloes socotr. ʒj, alcohol. Oij.*) Digest.

TINCTURA GUAIA'CI, *T. Guaiaci Officin'alis, Tincture of Guaiacum.* (*Guaiac. f'iss, alcohol. Oij.*) Macerate for 14 days, and filter. *Ph. U. S.*) Stimulant and sudorific. Used especially in rheumatic and arthritic cases. Nearly the same as *Hill's Essence of Bardana* or *Burdock.*

TINCTURA GUAIA'CI AMMONIATA, *T. Guaiaci'na Volat'ilis, T. Guai'aci.* (*Ph. L. 1788.*) *Elixir Guai'aci Volat'ilis, Al'cohol cum Guai'aco officina'le ammoniat'us, A. ammoniat' et Guai'aci, Ammoniated Tincture of Guai'acum, Volatile Tincture of Guai'acum.* (*Guaiac. pulv. ʒiv, sp. ammon. arom. Oiss.*) Macerate for 14 days, and filter. *Ph. U. S.*) Properties same as the last. Dose, fʒj to fʒijj.

Hatfield's Tincture—a nostrum—consists of *Guaiacum* and *Soap*, āā ʒij, rectified spirit, Oiss.

TINCTURA HELLEB'ORI, *T. Helleb'ori Nigri, T. Melampo'dii, Tincture of Black Hellebore.* (*Helleb. nigr. cont. ʒiv, alcohol. dilut. Oij.*) Macerate for 14 days, express and filter. It may also be prepared by displacement. *Ph. U. S.*) Dose, fʒss to fʒj.

TINCTURA HIERA, Vinum aloes.

TINCTURA HU'MULI, *T. Lu'puli, Tincture of Hops.* (*Hu'muli, ʒv, alcohol. dilut. Oij.*) Tonic and sedative. Dose, fʒss to fʒijj.

TINCTURA HYOSCY'AMI, *T. Hyoscyami nigri, Tincture of Henbane.* (*Hyoscyam. fol. ʒiv, alcohol. dilut. Oij.*) Macerate for 14 days, express and filter. It may also be prepared by displacement. *Ph. U. S.*) Narcotic, anodyne. Dose, gtt. xx. to fʒj.

TINCTURA IO'DINI, (*Ph. U. S., 1842.*) *T. Iodini'ii, (Ph. U. S., 1851.) Alcohol Io'dii, Tincture of Iodine.* (*Iodin. ʒj, alcohol. Oj.*) Dissolve. *Ph. U. S.*) The tincture spoils by keeping, or at least, deposits the iodine. It has been much used in goitre, &c. Dose, ten drops three times a day.

An ethereal and a chloroform tincture of iodine have been used, to affect the system with iodine by inhalation.

TINCTURA IODINI COMPOS'ITA, (*Ph. U. S., 1842.*) *T. Iodini'ii Composita, (Ph. U. S., 1851.) Compound Tincture of Iodine.* (*Iodin. ʒss, Potassii iodid. ʒj, Alcohol. Oj.*) Dissolve. *Ph. U. S.*) Dose, 10 to 30 drops.

TINCTURA JALA'PII, *T. Jala'pæ, (Ph. U. S.) seu Convolvuli Jalapæ, Val'gæ, Tincture of Jalap.* (*Jalap. pulv. ʒvi, Alcohol. dilut. Oij.*) Macerate for 14 days, express, and filter. *Ph. U. S.*) It may also be prepared by displacement. Cathartic. Dose, fʒj to fʒiv.

TINCTURA JALA'PII COMPOS'ITA, *Elixir Jalap'æ Compositum seu purgans seu anthelmin'ticum Sueco'rum, Essen'tia cathol'ica purgans Roth'ii, (E.) Eau de vie Allemande.* (*Jalap. f'iss, Scammon. ʒj, Alcohol. (22°) Ovj.*) Macerate for eight days. *Ph. P.*) Dose, 60 to 100 drops.

TINCTURA JAPONICA, *Tinctura catechu—t. Kinæ kinæ ætherea composita, Tinctura cinchonæ ætherea composita—t. Kinkinæ amara, Tinctura cinchonæ amara.*

TINCTURA KINO, *Tincture of Kino.* (*Kino, in pulv., ʒvj; Alcohol. dilut. q. s.*) Put the kino, mixed with an equal bulk of sand, into a percolator, and gradually pour on diluted alcohol until fʒviij of filtered liquor pass. The tincture should be renewed frequently, and kept in closely stopped bottles. *Ph. U. S.*) Astringent. Dose, fʒj to fʒij.

TINCTURA KRAME'RIÆ, *Tincture of Rhatany.* (*Kramer. in pulv. ʒvj, alcohol. dilut. Oij.*) Macerate for 14 days, express, and filter. *Ph. U. S.*) It may also be prepared by displacement. Dose, fʒj to fʒij.

TINCTURA LACTUCA'RIÆ, *Tincture of Lactuca'rium.* (*Lactucar. in pulv. ʒiv, Sp. tenuior. Oij.*) (Imp. meas.) Best prepared by percolation. *Ph. E.*) Dose, ʒo minims to fʒj.

TINCTURA LAURI CINNAMOMI, *Tinctura cinnamomi—t. Lavandulæ composita, Spiritus lavand. comp.*

TINCTURA LIMO'NIS, *Tincture of Lemon peel.* (*Limon. cort. ʒiiiss, Sp. tenuior. Oij.*) (Imp. meas.) Macerate for 7 days, express and filter. *Ph. D.*) Dose, fʒj to fʒij.

TINCTURA LOBE'LIÆ, *Tincture of Lobelia.* (*Lobel. ʒiv, alcohol. dilut. Oij.*) Macerate for 14 days, express, and filter. *Ph. U. S.*) It may also be prepared by displacement. Dose, fʒj to fʒij.

TINCTURA LOBE'LIÆ ÆTHE'REA, *Ethereal Tincture of Lobelia.* (*Lobel. pulv. ʒv, Sp. æther. sulph. Oij.*) (Imp. meas.) *Ph. E.* and *L.*) Dose, same as the last.

TINCTURA LUPULI, *Tinctura Humuli, T. Lu'pulinæ.*

TINCTURA LUPULI'NÆ, *T. Lu'puli.* (*Ph. E.*) *Tincture of Lu'puline.* (*Lupulin. ʒiv, alcohol.*

Oij. Macerate for 14 days, and filter. *Ph. U. S.*) Dose, fʒj to fʒij.

TINCTURA LITTLE, *Tinctura cantharidis*—t. Martis Glauberi, see *Ferrum tartarizatum*—t. Martis in spiritu salis, *Tinctura ferri muriatis*—t. Martis Mynsichti, *Tinctura ferri ammoniata*—t. Martis vinosa, *Vinum ferri*.

TINCTURA MATICO, *Tincture of Matico*. (*Matico* in pulv. crass. ʒviij, (avoid.) *Sp. tenuior*. Oij. (Imp. meas.) Macerate for 14 days, express, and filter. *Ph. D.*) Dose, fʒj to fʒijij.

TINCTURA MELAMPODII, *Tinctura hellebori nigri*—t. *Meloes vesicatorii*, *Tinctura cantharidis*—t. *Metallorum*, *Lilium Paracelsi*—t. *Mimosæ catechu*, *Tinctura catechu*.

TINCTURA MOSCHI, *Tincture or Essence of Musk*. (*Mosch.* in pulv. reduct. ʒij. *sp. vini rect.* Oij. Dose, fʒj to fʒiv.

TINCTURA MYRRHÆ, *Tincture of Myrrh*, *Simple Tincture of Myrrh*. (*Myrrhæ contusæ* ʒiv, alcohol Oij. Macerate for 14 days, and filter. *Ph. U. S.*) Tonic, deobstruent, antiseptic, and detergent. It is chiefly used in gargles, and applied to foul ulcers, spongy gums, &c.

Hudson's Preservative for the Teeth and Gums consists of *Tinct. myrrh.*, *tinct. cinch.*, *aq. cinnamon.* āā ʒiij, *eau d'arquebusade* ʒj, *pulv. gum. Arab.* ʒss. M.

TINCTURA NERVINA BESTUCHEFFII, *Tinctura seu alcohol sulphurico-æthereus ferri*—t. *Nervina Halensis*, *Tinctura seu alcohol sulphurico-æthereus ferri*—t. *Nervino-tonica*, *Lamotte's*, *Alcohol seu Tinctura sulphurico-æthereus ferri*.

TINCTURA NUCIS VOMICÆ, *Tincture of Nux Vomica*. (*Alcohol. s. g.* ʒ37, fʒj; *Dry Extract of Nux Vomica*, 3 gr.) Dose, gtt. v to xxx, in cases where the *nux vomica* is indicated.

It is directed, in the last edition of the *Ph. U. S.* (1851), to be prepared as follows:—*Nucis vomicæ rasur.*, ʒviij; *alcohol*, Oij. Macerate for 14 days, express, and filter. It may also be prepared by the process of displacement. Dose, gtt. v to xx.

TINCTURA OLEI MENTHÆ PIPERITÆ, *Tincture of Oil of Peppermint*, *Essence of Peppermint*. (*Ol. menthæ piperitæ*, fʒij, *alcohol*. Oj. Dissolve. *Ph. U. S.*) Dose, 5 drops, as a carminative.

TINCTURA OLEI MENTHÆ VIRIDIS, *Tincture of Spearmint*, *Essence of Spearmint*, is made in the same manner. *Ph. U. S.*

TINCTURA OPII, *T. Thebaïca seu Sedatïva*, *Theriaca coelestis*, *Al'cohol cum Opio*, *Tincture of Opium*, *Liquid Laudanum*. (*Opii pulv.* ʒijss, *alcohol dilut.* Oij. Macerate for 14 days, express, and filter. *Ph. U. S.*) Nineteen minims contain about one grain of opium. Properties, those of opium. Dose, gtt. xx to lx and more. By macerating the dregs remaining after making the *Tinctura Opii* in a solution of *Tartaric Acid*, a solution is obtained, which is said to be devoid of the exciting and constipating properties of the tincture of opium. Gray calls it *Haden's Liqueur Opii Sedatïvus*.

TINCTURA OPII ACETA'TA, *Ac'etated Tincture of Opium*. (*Opii* ʒij; *aceti*, fʒxij; *alcohol*. Oss. Rub the opium with the vinegar; add the alcohol, and having macerated for 14 days, express and filter. *Ph. U. S.*) Twenty drops are equivalent to a grain of opium.

TINCTURA OPII AMMONIATA, *Ammoniated Tincture of Opium*, *Edinburgh Paregoric Elix'ir*. (*Flor. benz.*, *croci*, āā ʒiij, *opii* ʒij, *ol anisi* ʒss, *alcohol ammoniat.* fʒxvj. Digest. *Ph. E.*) fʒj contains one grain of opium. Used like the *Tinctura Camphoræ Composita*.

TINCTURA OPII CAMPHORATA, *Tinctura camphoræ composita*—t. *Plumbosa*, *Liquor Plumbi subacetatis dilutus*.

TINCTURA QUAS'SIÆ, *T. Quassia excell'sæ*,

Tincture of Quassia. (*Quassia rasur.* ʒij, *alcohol dilut.* Oij. Macerate for 14 days, express, and filter. *Ph. U. S.*) It may also be prepared by displacement. Tonic. Dose, fʒj to fʒij.

TINCTURA QUAS'SIÆ COMPOSITA, *Compound Tincture of Quassia* (*Cardam. sem. contus.*, *Cocci contus.* āā ʒss; *Cinnam.*, *Quassia*, āā ʒvj; *Uvar pasar.* ʒvij; *Sp. tenuior*. Oij (Imp. meas.) Digest for 7 days; express and filter. May be prepared also by percolation. *Ph. E.*) Dose, as a tonic, fʒj or fʒij.

TINCTURA QUINÆ COMPOSITA, *Compound Tincture of Quina*. (*Quiniæ sulph.* ʒv and ʒj; *Tinct. aurantii*, Oij, (Imp. meas.) Oij. Digest for 7 days and filter. *Ph. L.*) fʒj, contains a grain of the sulphate.

TINCTURA QUINÆ SULPHATIS, *Tincture of Sulphate of Quinia*. (*Sulphate of Quinia*, gr. vj; *alcohol*, (ʒ47) fʒj. M.) Dose, fʒj to fʒiv, in the day.

Tinctura Cincho'niæ Sulphatis may be made in a similar manner.

TINCTURA RHABBARII, *Tinctura rhei*—t. *Rhabbari composita*, *Tinctura rhei composita*—t. *Rhabbari vinosa*, *Vinum rhei palmati*.

TINCTURA RHEI, *T. Rhabbar'ari seu Rhabbari spirituo'sa seu Rhei seu Rhei palma'ti*, *Tincture of Rhubarb*. (*Rhei contus.* ʒiij, *cardam.* cont. ʒss, *alcohol dilut.* Oij. Macerate for 14 days, express, and filter. It may also be prepared by displacement. *Ph. U. S.*) Stomachic or purgative, according to the dose employed: fʒj to ʒij, as a stomachic; fʒiv to ʒj, as a purgative.

TINCTURA RHEI COMPOSITA, *T. Rhabbari composita*, *Compound Tincture of Rhubarb*. (*Rhei rad. concis.* ʒij, *glycyrrhiz. rad.* cont. ʒss, *zingib. rad. concis.*, *croci stigmat.* āā ʒj, *aquæ* fʒxij, *sp. ten.* Oj. *Ph. L.*) Properties same as the last.

TINCTURA RHEI ET AL'OEIS, *Elixir sacrum*, *Tincture of Rhubarb and Aloes*. (*Rhei concis.* ʒx, *aloes pulv.* ʒvj, *cardam.* cont. ʒss, *alcohol dilut.* Oij. Macerate for 14 days, express, and filter. *Ph. U. S.*) Properties like the last.

Rymer's Car'diac Tincture consists of an infusion of *Capsicum*, *Camphor*, *Cardamom seeds*, *Rhubarb*, *Aloes* and *Castor* in *Proof Spirit*, with a very small quantity of *Sulphuric Acid*.

TINCTURA RHEI ET GENTIANÆ, *Tinctura Rhei Amara*, *Tincture of Rhubarb with Gentian*. (*Rhei* cont. ʒij, *gentian.* cont. ʒss, *alcohol dilut.* Oij. Macerate for 14 days, express and filter. *Ph. U. S.*) It may also be prepared by displacement. Properties same as the last.

TINCTURA RHEI ET SENNÆ, *Tincture of Rhubarb and Senna*, *Warner's Gout Cordial*. (*Rhei* cont. ʒj, *sennæ*, ʒij, *coriandr. cont.*, *fenicul.* cont. āā ʒj, *santal.* rasur. ʒij, *croci*, ext. *glycyrrhiz.* rad. āā ʒss, *uvar. passar.* acinis exemptis, *ibss*, *alcohol dilut.* Oijij. Macerate for 14 days; express and filter. *Ph. U. S.*) Dose, fʒss to fʒij.

TINCTURA RHEI, *Tinctura rhei*—t. *Rhei amara*, *Tinctura rhei et gentianæ*—t. *Sacra*, *Vinum aloes*.

TINCTURA SANGUINARIE, *Tincture of Blood-root*. (*Sanguinar.* cont. ʒiv, *alcohol dilut.* Oij. Macerate for 14 days, express, and filter. *Ph. U. S.*) It may also be prepared by displacement. Dose, 30 to 60 drops.

TINCTURA SAPONIS CAMPHORATA, *Linimentum saponis*—t. *Saponis et opii*, *Linimentum saponis et opii*.

TINCTURA SCILLÆ, *Tincture of Squill*. (*Scillæ* ʒij, *alcohol dilut.* Oij. Macerate for 14 days, express, and filter. It may also be made by displacement. *Ph. U. S.*) Dose, gtt. xv to lx.

TINCTURA SEDATIVA, *Tinctura opii*.

TINCTURA SENNÆ, *T. Sennæ Composita*, *Elixir Salutis*, *Daffy's Elixir*, *Tincture of Senna*. (*Senna fol.* ℥ij, *carui sem.* cont. ℥ij, *cardam. sem.* cont. ℥j, *uvarum passurum demptis acinis*, ℥iv, *sp. ten. Oij.* *Ph. L. & D.*) Stomachic, carminative and cathartic. Dose, f℥ij to f℥j.

TINCTURA SENNÆ ET JALAPÆ, *Tincture of Senna and Jalap*. (*Senna* ℥ij, *jalap. pulv.* ℥j, *coriandr. cont.*, *carui cont.*, āā ℥ss, *cardam. cont.* ℥ij, *sacch.* ℥iv, *alcohol. dilut.* Oij.) Macerate for 14 days, express, and filter. *Ph. U. S.*) It may also be prepared by displacement. Dose, f℥ij to f℥j.

TINCTURA SERPENTARIÆ, *T. Serpentariæ* seu *Virginicæ* seu *Aristolochiæ Serpentariæ*, *Tincture of Snakeroot*. (*Rad. serpent.* ℥ij, *alcohol. dilut.* Oij.) Macerate for 14 days, express, and filter. *Ph. U. S.*) It may also be prepared by displacement. Tonic. Dose, f℥ss to f℥ij.

TINCTURA STOMACHICA, *Tinctura cardamomi composita*.

TINCTURA STRAMO'NI, *Tincture of Stramonium*. (*Stramon. sem.* cont. ℥iv, *alcohol. dilut.* Oij.) Macerate for 14 days, express, and filter. *Ph. U. S.*) It may also be prepared by displacement. Dose, ten to twenty minims.

TINCTURA STRYCH'NIÆ, *Tincture of Strychnia*. (*Alcohol. s. g.* ℥87, *Oj.* *Strychniæ*, gr. ij.) Dose, 6 drops to 24. Properties, those of strychnia.

TINCTURA (seu AL'COHOL) SULPHURICO-ÆTHEREUS FERRI, *Gutta nervinæ*, *Liquor Anodynus Martialis*, *Alcohol æthereus ferriatus*, *Naphtha Vitrioli Martialis*, *Solutio Muriatis ferrici æthereæ*, *Spiritus sulphurico-æthereus martialis*, *Tinctura nervina Halensis* seu *Tonicæ-nervinæ Halensis* seu *auræa* seu *nervina Bestucheffii* seu *nervino-tonicæ* (Lamotte's) seu *æthereæ ferri*, *Æther Martialis*, *De La Motte's Golden Drops*, *Bestucheff's Nervous Tincture*, (F.) *Elixir d'Or de M. le Général De La Motte*. An ethereal solution of muriate of iron. It is much used in gout, hypochondriasis, &c.

TINCTURA SULPHURIS VOLATILIS, *Liquor fumans Boylii* — *t. Thebaica*, *Tinctura opii*, *Vinum opii*.

TINCTURA TOLUIFERÆ BAL'SAMI, *T. Balsami Tolutani*, *T. Tolutani* (*Ph. U. S.*, 1842.), *T. Tolutani* (*Ph. U. S.*, 1851), *Tincture of Balsam of Tolu*, (*Bals. Tolutan.* ℥ij, *alcohol Oij.*) Reputed to be expectorant and corroborant. Dose, f℥ss to f℥j, or more.

TINCTURA TONICA NERVINA HALENSIS, *Tinctura* (seu Alcohol) sulphurico-æthereæ ferri.

TINCTURA VALERIANÆ, *Tincture of Valerian*. (*Valerian. cont.* ℥iv, *alcohol. dilut.* Oij.) Macerate for 14 days, express, and strain. It may also be prepared by displacement. *Ph. U. S.*) Stimulant and antispasmodic. Dose, f℥ss to f℥ij.

TINCTURA VALERIANÆ AMMONIATA, *T. Valerianæ Volatilis*, *Ammoniated or Volatile Tincture of Valerian*. (*Valerianæ cont.* ℥iv, *sp. ammon. arom.* Oij.) Macerate for 14 days, express, and filter. It may also be made by displacement. *Ph. U. S.*) Like the former. Dose, f℥ss to f℥ij.

TINCTURA VERA'TRI, *T. Veratri albi*, *Tincture of White Hellebore*. (*Rad. veratri alb.* cont. ℥vij, *alcohol. dilut.* Oijss. *Ph. E.*) Emetic and cathartic; but not very manageable. Dose, gtt. v to x.

TINCTURA ZINGIBERIS, *T. Amomi Zingiberis*, *Tincture of Ginger*. (*Zingib. cont.* ℥vij, *alcohol.* Oij.) Macerate for 14 days, express, and filter. It may also be made by displacement. *Ph. U. S.*) Stimulant and carminative. Dose, f℥ss to f℥j.

TINGLING, from *tinnire*, 'to jingle.' (Sc.) *Düring*. A sharp, purring or thrilling sensation, not always painful.

TINKER'S WEED, *Triosteum*.

TINKLING, METALLIC, *Tintement métallique*.

TINNIMENTUM METALLICUM, *Tintement métallique*.

TINNITUS AURIUM, (*tinnio*, *tinnitum*, 'to tinkle,') 'ringing of the ears.' *Flectuotio* seu *Sou'itus* seu *Susur'rus* seu *Sib'ulus* seu *Strep'itus* seu *Sibilus aurium*, *Paracæsis imaginaria*, *Ote'chus*, *Syrig'mus*, *Syring'mos*, *Sibilus clangosus*, *Echos*, *Eneche'ma*, *Bombus*, *Bombitatio*, *Murmur*, (F.) *Tintement*, *T. d'Oreille*, *Tintouin*, *Bourdonnement*, *Bruissement*. An imaginary sound, like the ringing of a bell, the noise of wind, the murmur of water, &c., heard in health and in sickness. It is, often, an accompaniment of cerebral disorder.

TINTEMENT, *Tinnitus aurium*—t. *Bullaire*, *T. métallique*.

TINTEMENT MÉTALLIQUE (F.), *Cliquetis métallique*, *Tintement bullaire*, *Tinnimen'tum metallicum*, *Canor stethoscop'icus*, *Metallic Respiration*, *Metallic Voice*, *Metallic Tinkling*. A particular noise, heard by the stethoscope when applied to the chest, and which, according to Laënnec, resembles that caused by striking glass, metal, or porcelain, with a pin; but is, perhaps, more like the sound of the keys of a musical snuff-box. The *tintement métallique* or *metallic tinkling* is heard on causing the patient to speak or breathe; but is more distinct when he coughs. When the phenomenon is not so strongly marked, it produces only the *metallic resonance*. The 'metallic tinkling' is a pathognomonic symptom of a communication between the bronchia and cavity of the chest; in other words, of *Pneumothorax*.

TINTEMENT D'OREILLE, *Tinnitus aurium*.

TINTINNABULUM, *Uvula*.

TINTOUIN, *Tinnitus aurium*.

TIPFOOT, see *Kylosis*.

TIPSARIA, *Decoctum hordei*.

TIRE-BALLE, Forceps (bullet.)

TIRE-FOND (F.). A surgical instrument, formerly used to elevate the piece of bone sawed off by the trephine.

TIRE-PUS, *Pyulcon*.

TIRE-TÊTE (F.). A name given to different instruments used for extracting the head of the child when left in the uterus, and in certain cases of difficult labour. The crotchet is one of those, as well as the *Tire-tête à bascule* of Levrct, &c.

TIRES, Milk sickness.

TISANE, *Pti'sana* or *Ptis'sana*, *Ptisane*, from *πτισανη*, 'pearl barley,' itself from *πτισσω*, 'I decorticate.' (F.) *Hydrole*. A name given to aqueous medicines, containing but little, if any, medicinal agent. The ancients gave the name particularly to the decoction of barley.

TISANE COMMUNE, *Decoctum hordei*.

TISANE DE FELTZ. A celebrated antisyphilitic, formed of *sarsaparilla*, *isinglass*, *sulphuret of antimony* and *water*, boiled together. According to some, bichloride of mercury; and, to others, arsenic enters into its composition. M. Rayer, supposing that it acts by the arsenic it contains, proposes to replace it by arseniate of potassa; and Guibourt, who is of the same opinion, by arsenious acid, in order to ensure certainty of action.

TISIC, Phthisis.

TISICAL, Phthisicus.

TISSICK, see Phthisic.

TISSU, *Tissue*—t. *Accidental*, see *Accidental*, and *Tissue*, *accidental*—t. *Caverneux*, *Cavernous texture*—t. *Celluleux des os*, *Cancelli*—t. *Conjonctif*, *Cellular tissue*—t. *Inodulaire*, *Tissue*, *inodular*—t. *Jaune*, see *Fibrous*—t. *Lardacé*, see *Lardaceous*—t. *Spongöide*, *Spongoid tissue*.

TISSUE, *Textus*, *Tela*, (F.) *Tissu*. By this term, in anatomy, is meant the various parts, which, by their union, form the organs; and are, as it were, their anatomical elements. Histological anatomy is the anatomy of the tissues, which are the seat of the investigations of the pathological anatomist. The best division, indeed, of diseases would be according to the tissues mainly implicated. For the elementary tissues, see *Fibre*. The compound tissues, which, by associating or combining variously, form every organ of the body, have been variously classed: but every division is imperfect and liable to objection. The following, by Messrs. Todd and Bowman, is one of the most recent.

TABULAR VIEW OF THE TISSUES OF THE HUMAN BODY.

	<i>Examples.</i>
1. Simple membrane, homogeneous, or nearly so, employed alone, or in the formation of compound membranes.	Posterior layer of the cornea.—Capsule of the lens.—Sarcoclemma of muscle, &c.
2. Filamentous Tissues, the elements of which are real or apparent filaments.	White and yellow fibrous tissues.—Areolar tissue.
3. Compound membranes, composed of simple membrane and a layer of cells of various forms, (epithelium or epidermis,) or of areolar tissue and epithelium.	Mucous membrane.—Skin.—True or secreting glands.—Serous and synovial membranes.
4. Tissues which retain the primitive areolar structure as their permanent character.	Adipose tissue.—Cartilage.—Gray nervous matter.
5. Sclerous or hard tissue.	Bone.—Teeth.
6. Compound tissues.	
a. Composed of tubes of homogeneous membrane, containing a peculiar substance.	Muscle.—Nerve.
b. Composed of white fibrous tissues and cartilage.	Fibro-cartilage.

TISSUE, ACCIDENTAL OR ADVENTITIOUS, consists of every substance—foreign to the primitive organization of the economy, but yet organized and living—which may be developed in the anterior or at the surface of organs. Laënnec divides the accidental tissues into two sections: 1. Those

that resemble others in the animal economy, or *analogous accidental tissues*; and, 2. Those that have nothing analogous in the body, and which are always the result of a morbid process—the *heterologous or heteroolite accidental tissues*. To the first class belong, ossifications; accidental fibrous, fibro-cartilaginous, cartilaginous, areolar, and corneous tissues; hairs; the serous membranes of certain encysted tumours; the mucous membranes of fistulous canals, and accidental synovial membranes. To the second belong tubercles, scirrhi, melanosis, &c.

TISSUE, AREOLAR, Cellular tissue.

TISSUE, CARTILAGINOUS, *Hymenochondroïdes* seu *Hymenochondroïdes* (*Textura seu Tela*.)

TISSUE, CONNECTIVE, Cellular tissue—t. Cribiform, Cellular tissue—t. Fibrous, see Fibrous—t. Filamentous, Cellular tissue.

TISSUE FORMATION, Histogeny.

TISSUE, INODULAR, *Tela inodularis*, (F.) *Inodule, Tissu inodulaire*. A name given by Despêche to an accidental fibrous tissue developed in suppurating wounds, which is the principal agent in cicatrization. It has, at first, the appearance of a reddish cellulo-fibrous layer; but soon loses its vascularity; and its fibres, which pass in all directions, become of a dull white colour, and of a consistence and hardness, that may be compared to those of the strongest articular ligaments. It is well seen in the cicatrix left after burns.

TISSUE, LAMINATED, Cellular tissue—t. Ligamentous, Desmoid tissue—t. Mucous, Cellular tissue—t. Porous, Cellular tissue—t. Reticulated, Cellular tissue.

TIT, Nipple.

TITHENE, Nurse.

TITHYMALUS CYPARISSIAS, Euphorbia cyparissias—t. Lathyris, Euphorbia lathyris—t. Latifolius, Euphorbia lathyris—t. Palustris, Euphorbia palustris—t. Paralias, Euphorbia paralias.

TITILLAMENTUM, Gargarism.

TITILLATION, Tickling.

TITTHE, Nipple.

TITTHION, Nipple.

TITTHIS, Nipple.

TITTHOS, Mamma, Nipple.

TITTY, Mamma, Nipple.

TITUBANTIA, *Bredouillement*.

TITUBATIO, Fidgets, Vacillatio—t. Lingua, Balbuties.

TJETTEK, Upas tiuté.

TO-AND-FRO-SOUND, *Bruit de frottement*.

TOAD-FLAX, Antirrhinum linaria—t. f. Bastard, Comandra umbellata.

TOAST-WATER, *Aqua tostæ panis*. Toast well half a slice of a stale quartern loaf; put it into a pitcher, and pour over it a quart of water. After two hours, decant the water from the bread. It is a common drink in febrile affections.

TOBACCO, Nicotiana tabacum—t. English, Nicotiana rustica—t. Indian, Lobelia inflata—t. Poison, Hyoscyamus niger—t. Wild, Lobelia inflata, Nicotiana rustica.

TOCETOS, Parturition.

TOCODOMYCODORITIS MALIGNA VAGINALIS, Colpocæe puerperarum.

TOCOLOGY, Obstetrics.

TOCOS, Parturition.

TODDY. A name given, by the English, to sweet, delicious and refreshing liquors procured in India by wounding the *spathæ* of certain palms. The best is obtained from the *Cocos nucifera*.—Ainslie.

It is obtained in large quantities from *Saguërus saccharifer* seu *Rumphii*, *Palma Indica vinda* seu *secunda*, *Saguërus* seu *Gomutus Gomuto*,

Aren'ga saccharif'era, *Gomuto palm*. It is called, also, *Nea*, and, by boiling, yields a coarse kind of sugar, called *Jaggery*. The inhabitants of the Moluccas used, in their wars, a liquor obtained by macerating the fruit, which the Dutch called *Hell water, Aqua infernalis*.

Toddy is also the common name for a mixture of spirit and water sweetened.

TODDY TREE, Mamei.

TOE, Digitus pedis.

TOEPLITZ, see Töplitz.

TOFUS, Tophus.

TOILE D'ARAIGNÉE, Araneæ tela—t. Cho-roidienne, see Choroid—t. de Gautier, Sparadrapum Galteri.

TOKAS, Puerpera.

TOKEN, PLAGUE, Plague token.

TOKOLOGY, Obstetrics.

TOLA, Tonsil.

TOL'ERANCE, *Tolerantia*; from *tolerare*, 'to bear.' The power of bearing. A word used by the Italian school of Rasori, to signify the power of bearing large doses of certain potent remedies, as tartrate of antimony and potassa. See *Centro-stimulus*.

TOLES, Tonsil.

TOLIUM, Tonsil.

TOLLES, Tonsil.

TOLLUM, Tonsil.

TOLUIFERA BAL'SAMUM, *Myros'ylon* seu *Myrospermum Toluiferum*. Ord. Leguminosæ. *Sex. Syst.* Decandria Monogynia. The name of the tree which affords the *Balsam of Tolu, Balsamum Tolutanum* (Ph. U. S.), *Tolutanum, Toluif'eræ Balsami Balsamum, Goac'onaz, Red Balsam of Peru*, (F.) *Baume de Tolu, B. de Carthage* ou *d'Amérique* ou *de Saint Thomas*. It has a very fragrant odour, and warm, sweetish taste; is thick, and of a reddish-yellow colour. It is stimulant and expectorant [?], and is used in coughs. It is chiefly, however, employed on account of its flavour.

TOLUTANUM, see Toluifera balsamum.

TOMACINUM, Iscium.

TOMACULUM, Iscium.

TOMATA, Solanum lycopersicum.

TOMATO, Solanum lycopersicum.

TOME, *Tomus, τομῆ, τομος*, 'incision.' A common suffix, as in *Lithotomy, Bronchotomy, &c.*

TOME, Cut, Incision.

TOMEION, Knife.

TOMENTUM CER'EBRI, from *tomentum*, 'a flock of wool.' The infinite number of small vessels which pass between the pia mater and convolutions of the brain. They enter the substance of the brain at right angles.

TOMEUS, Knife.

TOMIS, Scissors.

TOMOTOCIA, Cæsarean section.

TOM-TOE, Pollex, see Digitus pedis.

TONE, *Tonus, τῶνος, τῶνος*, 'I brace or give vigour.' The state of tension or firmness proper to each organic tissue. It is the effect of tonicity.

TONE, see Elasticity.

TONGA, see *Datura sanguinea*.

TONGRES, MINERAL WATERS OF. The town of Tongres is about a league from Maestricht in the Low Countries. The springs, of which there are several, are chalybeate, containing carbonates of iron and magnesia.

TONGUE, Sax. *ῥυγ*, (D.) *Tong, Lingua, Glossa, Glotta*, (F.) *Langue*. The tongue is a muscular, symmetrical, and very mobile organ; situate in the mouth, from the os hyoides and epiglottis to the incisor teeth. Its particular use is, to procure the sensation of savours; and it aids in the acts of sucking, mastication, deglutition, pronunciation, and exspuition. It has the

shape of a pyramid, flattened above and below; rounded at its angles, and terminated, anteriorly, by a blunt point. Its *upper surface*, called the *dorsum*, is free, flat, and divided into two portions by a median furrow, *lin'ea media'na*; at the posterior extremity of which is the *foramen cœcum* or *Foramen of Morgagni*. The *inferior surface* is free, and covered by the mucous membrane on its anterior third and sides; but behind and in the middle it is attached to the lower jaw by means of the genio-glossus; and to the hyoides by the hyoglossus. Its *margins* are rounded; thick behind, thinner anteriorly. Its *tip*, or *point*, or *dental extremity* is rounded and free:—the *root*, *base*, or *hyoid extremity*, *Radix linguæ*, is continuous with the epiglottis and velum palati. It is very thick at the foramen cœcum; but thinner as it approaches the hyoid bone. The tongue is composed of muscles, and covered by a mucous membrane — *Periglott'is*, *Incolu'erum linguæ*, *Membr'na* seu *Tu'nica vagin'al'is* seu *Cutis* seu *Epider'mis* seu *Tu'nica* seu *Involu'crum mucosum* seu *Crusta villo'sa linguæ*—which forms also the frænum beneath the tongue. On this membrane are seen the different *papillæ*. The nerves of the organ proceed from the *inferior maxillary*, *glossopharyngeal* and *hypoglossal*. The first and second are connected with taste; the last with the motions of the organ. Some recent observers, however, consider the glosso-pharyngeal to be the special nerve of gustation. The arteries are the *lingual*, from the external carotid; and the *palatine* and *tonsillar*, from the labial. The veins are the *superficialis linguæ*, *ranina*, *lingualis*, and *submental'is*. They open into those of the pharynx and larynx. Its lymphatic vessels pass into ganglia, situate at the edge of the hyoglossi muscles.

TONGUE, BLACK. A fever which prevailed in the Western States in the winter of 1842-3; probably typhoid fever. According to some, an epidemic erysipelas.

TONGUE, HERNIA OF THE, Glossocœle—t. Inflammation of the, Glossitis — t. Red, fever, see Typhus.

TONGUE SCRAPER, Cure-langue—t. Tie, see Ankyloglossum.

TONIC, Ton'icus, (F.) Tonique. Same etymon as Tone. Relating to tone.

Tonic, Ton'icus, Tono'nicus, Antasthen'icus, (F.) Tonique, Fortifiant, in Therapeutics, means a medicine, which has the power of exciting slowly, and by insensible degrees, the organic actions of the different systems of the animal economy, and of augmenting their strength in a durable manner. Bitter, vegetable substances which are not associated with an acrid or narcotic principle; preparations of iron; cold water, &c., act as tonics. They are also called *Comfortan'tia, Confortati'va, Corroboran'tia, Confirman'tia, Roboran'tia, &c.*

The following are the chief Tonics:—Acidum Arseniosum, Acidum Nitricum, Acidum Sulphuricum, Argenti Nitras, Bismuthi Subnitras, Carbo Ligni, Cascarella, Cinchona, Cinchonia, Colomba, Cornus Florida, Cupri Acetas, Cupri Sulphas, Cuprum ammoniatum, Cusparia, Eupatorium perfoliatum, Ferri Præparata, Gentiana, Liriodendron, Lupulina, Piperina, Prunus Virginiana, Quassia, Quinia, Salix, Salicina, Serpentina, Zinci præparata; Aquæ minerales acidulæ et ferruginæ, Mental Tonics, (Confidence, Hope, Amusement.)

TONIC POWER, Irritability.

TONIC SPASM, Spasmus ton'icus, Convulsio tonica, Conductio, Spas'ticus, Tonos, Ento'nia, Ent'astis, Ent'asia. A rigid contraction of muscles without relaxation, as in trismus, tetanus, &c. See Tetanus and Spasm.

TONIC'ITY, Tonic'itas. Same etymon as

Tone. The faculty that determines the general tone of the solids. Excessive tonicity causes *er'ethism* or *crispness*; deficient tonicity, *atony* or *weakness*. Tonicity has been used in the same sense as irritability.

TONIQUE, Tonic.

TONKA BEAN, Dipterix odorata.

TONODES, Tensive.

TONOS, Tonic spasmi—t. Trismus, Trismus.

TONOTICUS, Tonic.

TONSIL, Tonsil'la, Amygdala, Paristh'mia, Paristh'mium, Amphibran'chium, Glan'dula colli, Tola, Tolles, Toles, To'lium, Tollum, Spongos, An'tias, Pl. Anti'ades, Almond of the ear, Almond of the throat, (F.) Amygdale, Tonsille, (Prov.) Ear-kecker. An ovoid collection of follicles, about half an inch in length, similar in shape to an almond, and situate, on each side, between the pillars of the velum palati. The inner surface, projecting into the isthmus of the throat, is covered by the mucous membrane, in which are the orifices of a dozen cells, whence a transparent, viscid mucus oozes on pressure. This mucus is destined to facilitate deglutition, by lubricating the isthmus faucium; and is forced out during the passage of the alimentary bolus.

TONSIL-GUILLOTINE, Amygdalotome.

TONSILLE PESTILENTES, Cynanche maligna.

TONSILLARUM GANGRÆNA, Cynanche maligna.

TONSILLE, Tonsil.

TONSILLITIC, Tonsillit'icus. Belonging or relating to the tonsils; as the '*tonsillitic* branches of the glosso-pharyngeal nerve.'

TONSILLITIS, Cynanche tonsillar'is.

TONSILLOTOME, Amygdalotome.

TONSORIUS CULTER, Razor.

TOODLE, Tooth.

TOOTH, Sax. tooth, Dens, Odous, (Prov.) Toode, (F.) Dent. The teeth, *Dentes, Mord'ices*, are small, hard bones, fixed in the alveoli of each jaw, and serving to lay hold of, and to cut, tear, and triturate alimentary substances. True teeth are found only in man, the mammalia, reptiles, and fish. The teeth have, in general, the shape of an irregular cone, the base of which is towards the interior of the mouth; and the apex, single or divided, towards the bottom of the alveoli. Each tooth has a part situate out of the alveolus, and covered by a vitrifrom substance. This part is called the *coron* or *coro'na*. It is bounded by a narrower portion, called the *cervix, (F.) collet*, which separates it from the portion in the alveolus—the *fang* or *root, (F.) racine*. In the adult, the teeth are 32 in number; 16 to each jaw: these consist of 4 *incisors, 2 canine, 4 bicuspidati, and 6 molares*. (See these various terms.) The teeth enclose a vascular and nervous pulp, in a central cavity, *Cav'itas Pulpa, Carum Dentis, Antrum dent'alè*. They are formed of a very hard, compact tissue; and the corona is covered by a vitreous substance called *Enam'el*. The incisor and canine teeth are developed by a single point of ossification; the lesser molares, by two; and the larger, by four or five. See Dentition. Researches by Retzius, Müller and others, have led them to believe that the *ivory* of the tooth or *Dentine, Ebur, Substan'tia os'sea* of Malpighi, *proper tooth substance, bone of the tooth, osseous substance of tooth, tooth bone*, consists of tubular fibres, which contain organic deposits of calcareous salts; and of intertubular substance, in which are observed corpuscles or osseous cells of the tooth, called, by Professor Owen, *calcif'erous cells*, which also contain earthy salts. At the part where the enamel terminates at the cervix of the tooth, the *crusta petro'sa, cemen'tum* or *cortical substance*, commences in an extremely

thin stratum, passes down and gradually increases in thickness towards the extremity of the root, where it is generally the thickest. It is said by Nasmyth to have been traced on the enamel, and Purkinje and Fränkel thought that it lined the *cavitas pulpæ*. They gave it the name *Substantia ostéolea*. It is the *matéria tartaræa* of Malpighi. It has been found, however, that the hard substance deposited on the inner surface of the dentine, at the age of twenty years or later, and which encroaches on the cavity, has a distinct structure from the cement, and resembles in part dentine, and in part bone. It is the *horny substance* of Blumenbach, the *osteodentine* of Owen, and the *secondary dentine* of Tomes. In the compound teeth of the herbivorous animal, a deposition is found on the surface of the enamel, which has been called *cementum*. Müller, however, regards it to be a deposit from the salts and the saliva, and to be essentially the same as what is called tartar in the human subject.

TOOTH-ACH, Odontalgia—t. Bone, see Tooth—t. Bush, *Xanthoxylum fraxineum*—t. Tree, *Aralia spinosa*, *Xanthoxylum clava Herculis*.

TOOTH EDGE, *Agacement des dents*, *Hæmodia*—t. Paste, *Dentifricium*—t. Powder, *Dentifrice*—t. Rash, *Strophulus*—t. Shell, dog-like, *Dentalium*.

TOPHA'CEOUS, *Tophæus*, (F.) *Tophæé*; from *tophus*. Relating or belonging to tophus, — as 'a *tophaceous* concretion.'

TOPHACEOUS CONCRETION, *Tophus*.

TOPHUS, *τοφος*, *Tofus*, 'a porous or friable stone.' *Osteo'ophus*, *Tophæceus Concretion*. A collection of hard, calcareous matter, which forms, particularly, at the surface of joints affected with gout; (see *Calculi*, *arthritic*), and occasionally, in the interior of organs, around the teeth, &c. It likewise meant gravel, and chalaza.

TOP'IC, *Top'ical*, *Top'iceus*. From *τοπος*, *locus*, 'a place.' A local application; (F.) *Topique*. See *Local*.

TOPICUS, *Local*.

TOPINARIA, *Talpa*.

TOPIQUE, *Topic*.

TÖPLITZ or TEPLITZ, MINERAL WATERS OF. Töplitz is a town of Bohemia, celebrated for its numerous thermal springs. The water contains chloride of sodium; carbonate, and sulphate of soda; and carbonates of lime and iron, &c. Temp. 114° to 122° Fahr.

TOPOGRAPHICAL ANATOMY, see *Anatomy*.

TOQUE, *Scutellaria galericulata*.

TOR'ULAR, *Tourniquet*. A press for wine, oil, or cider. From *torqueo*, 'I twist.'

TOR'ULAR HEROPH'ILL, *Press of Heroph'illus*, *Lechene'ion*, *Lenos*, *Lenum*, *Fourth Sinus*, (F.) *Confluent des Sinus*, *Pressoir d'Hérophile*. A smooth and polished cavity, of irregular shape, in which several sinuses of the dura mater meet. It is situate before the internal occipital protuberance, at the union of the three great duplicatures of the dura mater. It has six openings into it; — one above, that of the superior longitudinal sinus; two below, answering to the occipital sinuses; one anterior, belonging to the straight sinus; and two lateral, and very broad, which lead into the lateral sinuses; and convey from the cavity the blood that has been poured into it by the others.

TORCULUM, *Tourniquet*.

TORDYL'IUM, *T. Officina'le*, *Ses'eli Cret'icum* seu *Mont'num*, (F.) *Séséli de Crète*. *Family*, *Umbelliferae*. *Sex. Syst.* *Pentandria Digynia*. The seeds and roots of this Southern European plant are considered carminative and diuretic. They enter into the theriaca.

TOR'ENIA ASIAT'ICA, *Cala-dolo*. A small Malabar plant, the juice of whose leaves, sweetened with sugar, is said to cure gonorrhœa.

TORMENTIL, *Geranium maculatum*, *Tormentilla*.

TORMENTIL'LA, *T. erecta* seu *sylves'tris* seu *officina'lis* seu *tuberosa*, *Fragaria tormentil'la officina'lis*, *Potentilla tormentilla*, *Heptaphyllum*, *Consolida rubra*, *Common Tormentil*, *Upright Septfoil*, (F.) *Tormentille*. *Ord.* *Rosaceæ*. *Sex. Syst.* *Icosandria Polygynia*. The root *Tormentilla* (Ph. U. S.) has a slightly aromatic odour; and austere, styptic taste. It is astringent. Dose, of the powder, gr. x to ʒj.

TORMENTUM, *Heus*, *Intussusceptio*.

TOR'MINA, *Strophos*, *Cælia'gia*, *Encælia'gia*, *Anile'ma*, *Anile'sis*, *Gripes*, *Mulligrubs*, *Fretting*, (F.) *Tranchées*. From *torqueo*, 'I twist.' Acute colicky pains. *Dysentery*.

TORMINA CELSI, *Dysentery* — t. *Parturientium*, *Pains*, *labour*—t. *Post partum*, see *Pains*, *labour*.

TORNACULUM, *Tourniquet*.

TOROS'ITAS, *Corpulentia carno'sa*, *Hab'itus athlet'icus*. Muscular strength; from *torosus*, 'brawny,'—*torus*, 'brawn.'

TOROSUS, *Muscular*.

TORPEDO, *Narcosis*.

TORPEFACTIO UNIVERSALIS, *Holonarcosis*.

TORPID, *Tor'pidus*, (F.) *Engourdi*; from *torpeo*, 'I am benumbed.' Numb. Incapable of exertion and of feeling. Dull, stupid, inactive.

TORPIDITAS, *Torpor*.

TORPIDUS, *Narcotized*, *Torpid*.

TORPOR, *Torpid'itas*, *Noth'rotes*, *Parap'sis exars*, (F.) *Engourdissement*, from *torpeo*, 'I am benumbed.' State of a part which becomes numb, and almost incapable of motion. *Torpor*, *Torpid'ity*, *Torpid'ness*, *Tor'pitude* are also applied to a debilitated, sluggish condition of a part, or of the whole of the body; *Aër'gia*, (F.) *Accablement*.

TORPOR, *Narcosis* — t. of the *Colon*, see *Colon*, *torpor* of the—t. *Intestinorum*, *Constipation* — t. *Soporificus*, *Nocar*.

TORQUAY. A town in Devonshire, England, which, on account of the mildness of its climate, and its sheltered situation from the bleaker winds, is a frequent retreat for the phthisical invalid.

TOR'SION, *Tor'sio*. From *torquere*, *tortum*, 'to twist.' The act of twisting. Torsion of the extremities of bleeding vessels — *Angios'trophè* — until the blood ceases to flow, is sometimes used to arrest hemorrhage.

TORSK, see *Oleum jecoris aselli*.

TORTE'LLIS, *Erysimum*.

TORTICOLL'IS, *Caput seu Collum obsti'pum*, *Obsti'pa cervix*, *Obstip'itas cap'itis* seu *Colli*, *Torchell'agra*, *Enta'sia Loxia*, *Lox'ias*, *Cephalo'xia*, *Ancylode'rè*, *Ancylode'ris*, *Rheboera'nia*, *Auchenorrhœ'uma*, *Rheumatis'mus colli* seu *cervi'cis*, *Stiffneck*, *Wryneck*, (Prov.) *Slab*; from *torquere*, *tortum*, 'to twist,' and *collum*, 'the neck.' A variety of rheumatism, seated in the muscles of the neck, which prevents the motion of the head, and causes the patient to hold it inclined to the side affected. It is, commonly, of short duration; usually disappearing in a few days. Rubefacients are the best topical applications. The term is also applied to permanent contraction of the muscles of the neck, which causes the head to be held to one side. The remedy is the division of the contracted muscles.

TORTOISE, FRESHWATER, GREAT, *Hydraspis expansa*.

TORTUE, *Testudo*.

TORTURA ORIS, *Canine laugh*, *Neuralgia faciei*—t. *Oris paralytica* *Linnæi*, *Paralysis*, *Bell's*.

TOR'ULA CEREVISI'Æ, *Saccharom'yces* seu

Mycoderma cerevisiæ, *Cryptococcus fermentum* seu *cerevisiæ*, (F.) *Champignon du ferment*, *Yeast plant*. One of the simplest forms of vegetation, capable, under favourable circumstances, of vegetating rapidly, and assisting in producing the fermentation of saccharine substances. The plant has been found in vomited fluids, and in feces.

TORULUS GLANDIS, Crown of the glans.

TORUS, Muscle — *t. Manûs*, Metacarpus.

TOTA BONA, *Chenopodium bonus Henricus*.

TOTSU KASO, *Sphæria Sinensis*.

TOTTY, Vertiginosus.

TOTUM CARNOSUM, Pancreas.

TOUCH, *Tactus*, *Tac'tio*, *Haphê*, *Hapsis*, *Tac'tion*, *Palpa'tion*, (F.) *Toucher*. One of the five senses, and that which makes known to us the palpable qualities of bodies, such as their consistency, quality, &c. It is seated, particularly, in the hands; and differs from tact in being active. See *Esaphe*, and *Palpation*.

'To touch the mouth with mercury' is to produce the constitutional effects of that agent, as evinced by the falling away of the gums, &c.

TOUCH-ME-NOT, *Impatiens fulva*.

TOUCH, ROYAL. It was at one time almost universally believed, in England, that the royal touch would remove *Scrofula* or *King's Evil* (as it was thence called). This superstition is now entirely exploded. Edward, the Confessor, was the first English king who touched for the Evil.

TOUCHER, *Esaphe*, Touch — *t. Vaginal*, *Esaphe*.

TOUCHWOOD, *Boletus igniarius*.

TOUR DE MAÎTRE, *Coup de Maître*.

TOURBILLON VASCULAIRE, *Vasa vasorum*.

TOURNESOL, *Heliotropium Eoropæum*.

TOURNOLE, *Paronychia*.

TOURNIQUET, *Tor'cular*, *Tor'culum*, *Tor'aculum*, *Præ'lium*, *Præ'lum*, *Præ'lum* seu *Pre'lum arteria'le*, *Verticil'lum*, *Fas'cia tor'tilis*, from (F.) *tourner*, 'to turn.' A surgical instrument for stopping the course of blood in the limbs, by exerting a strong compression upon the principal artery. It was invented by a French surgeon, Morel, in the middle of the 17th century; and was modified subsequently, by Nuck, Verduc, Monro, Petit, and Louis. It is used to suspend, for a time, the circulation in a limb, during great operations; to arrest arterial hemorrhage in cases of wounds; to compress certain aneurismal and other tumours, &c.

TOUS-LES-MOIS, *Am'ylum canna'ceum*, *Canna Starch*. A fecula obtained from the root of *Canna edulis*. It resembles potato starch, and may be substituted for arrow-root. It is obtained from St. Kitts.

TOUT, Nates.

TOUTE BONNE, *Salvia selarea*.

TOUTE ÉPICE, see *Myrtus pimenta* — *t. Saïne*, *Sanlicula*.

TOUX, Tussis — *t. Bleue*, *Pertussis* — *t. Bronchique*, *Bronchial cough*, *Cough*, *tubal* — *t. Caverneuse*, see *Cavernous respiration* — *t. Convulsive*, *Pertussis* — *t. Quinteuse*, *Pertussis* — *t. Tubaire*, *Bronchial cough*, *Cough*, *tubal*.

TOXICÆMIA, *Toxicohæmia*.

TOXICAL, Poisonous.

TOXICATIO, Poisoning.

TOXICODENDRON, *Rhus toxicodendron*.

TOXICOHÆMIA, *Toxicæ'mia*, from *toxicum*, 'a poison,' and *hæma*, 'blood.' Poisoning of the blood. — *Piorry*.

TOXICOL'OGY, *Toxicolog'ia*, from *toxicum*, (itself from *τοξον*, 'a bow,') 'a poison,' and *λογος*, 'a description.' A treatise on poisons.

TOXICO'SES, (G.) *Toxikosen*, from *toxi-*

cum, 'a poison.' A family of diseases, according to the classification of Fuchs, caused by the reception of poisons into the system.

TOXICUM, Poison, Venom.

TOXI'QUE, Poisonous.

TRABECULA CEREBRI, *Corpus callosum* — *t. Cordis*, *Columnæ carneæ*.

TRABECULÆ CORPORUM CAVERNOSORUM, see *Cavernous bodies*.

TRABECULÆ SPLENIS, see *Spleen* — *t. Willisii*, *Chordæ Willisii*.

TRABES CORDIS, *Columnæ carneæ*.

TRABS, Penis — *t. Cerebri*, *Corpus callosum* — *t. Medullaris*, *Corpus callosum*.

TRACE, PRIMITIVE, Groove, primitive.

TRACHE'A, (generally, however, accented *Trache'a*.) *Trache'a* seu *Trachei'a arte'ria*, *Bronchus*, *As'pera arteria*, *Fistula spiritalis* seu *pulmonalis*, *Canna*, *Syrin'ga*, *Syrinx*; the *Wind-pipe*, *Wosen*, *Weasand*, *Weesel*, *Throttle*, (Sc.) *Thropill*, (Prov.) *Keckcorn*, *Kecker*, *Thropple*, (F.) *Trachée artère*; from *τραχος*, 'rough,' and *αἷηρνα*, 'artery,' composed of *αἰρ*, 'air,' and *τηρεν*, 'to keep.' The trachea is a cylindrical, fibro-cartilaginous and membranous tube, flattened behind, and situate on the median line, before the vertebral column, from the inferior part of the larynx, as far as the third dorsal vertebra. There it divides into two branches, the *bronchia*, which separate to go to each lung. The trachea, the function of which is to convey air to the lungs during respiration, is composed, 1. Of cartilaginous rings, *An'nuli cartilagin'eæ*, *Segmenta cartilagin'ea*, *Orbes cartilagin'ost*, incomplete behind; situate one above the other, and kept *in situ* by a fibrous membrane. 2. Of a mucous membrane, which lines it internally, and contains numerous mucous follicles. 3. Of transverse muscular fibres, not well-marked, which occupy its posterior surface. 4. Of vessels, which proceed from the superior and inferior thyroïdal; and, 5. Of nerves, that are given off by the pneumogastric and the cervical ganglia.

The breathing tubes of insects are termed *Tracheæ*.

TRACHEA ARTERIA, *Trachea*.

TRACHEÆ, see *Trachea*.

TRACHEAL, *Trache'al*. Appertaining to the trachea. An epithet applied to respiration as heard through the stethoscope opposite the trachea, larynx, and root of the bronchia; the air appearing as if sucked in from the cylinder during inspiration, and expelled during expiration.

TRACHEAL GLANDS. Mucous follicles on the posterior surface of the trachea. They are small, flattened ovoid bodies.

TRACHEA'LIS. The fibres of unstripped muscle, which pass from one portion of each of the tracheal cartilages to the other, at the posterior part of the trachea, have been so called by some anatomists. When they contract, they approximate the extremities of the cartilage; diminish the calibre of the trachea; and thus increase the velocity of the air forced through it, as in coughing, and facilitate the removal of any irritating substance in contact with the lining membrane.

TRACHÉE ARTÈRE, *Trachea*.

TRACHEITIS, *Cynanche trachealis*.

TRACHELAGRA, *Torticollis*. Also, *gout in the neck*.

TRACHELIAN, *Cervical*.

TRACHELISM'US, from *τραχηλον*, 'the neck.' A term proposed by Dr. Marshall Hall, for a fancied spasmodic action of the muscles of the neck, which he esteems to be the cause of many morbid phenomena, by inducing compression of the veins of the neck and an impeded return of blood from the head.

TRACHELITIS, Cynanche trachealis.

TRACHELIUM AMERICANUM, Lobelia cardinalis.

TRACHÉLO-ATLOÏDO-OCCIPITAL, Obliquus superior capitis—*t. Atloïdo-basilare*, Rectus capitis lateralis—*t. Basilaire*, Rectus capitis internus major—*t. Basilaire, petit*, Rectus capitis internus minor.

TRACHE'LO-DIAPHRAGMATIC, *Trachelodiaphragmaticus*. The fourth pair of cervical nerves, whence the phrenic nerve chiefly arises.—Chaussier.

TRACHÉLO-MASTOÏDIEN, Complexus minor—*t. Occipital*, Complexus—*t. Scapulaire*, Levator scapulae.

TRACHELOS, Collum.

TRACHE'O-BRONCHI'TIS. Inflammation of the trachea and bronchia.

TRACHEOCELE, Bronchocele.

TRACHEOPHONY, Laryngophony.

TRACHEOPHTHISIS, see Phthisis laryngea.

TRACHEOPHYMA, Bronchocele.

TRACHEORRHAG'IA, *Hæmoptoë* seu *Hæmoptysis laryngea* et *trachealis*, from *τραχεια*, 'the trachea,' and *ρηγνυμι*, 'to break forth.' Hæmorrhage from the trachea.

TRACHEOSTENOS'ISIS, from *τραχεια*, 'the trachea,' and *στενωσις*, 'contraction.' Contraction or narrowness of the trachea.

TRACHEOTOME, from *trachea*, and *τομη*, 'incision.' An instrument of the trocar kind, for opening the trachea.

TRACHEOTOMY, see Bronchotomy.

TRACHITIS, Cynanche trachealis.

TRACHO'MA, from *τραχος*, 'rough.' *Aspre'do*, *Aspritu'do*, *Pladar'otes*, *Asperitu'do*, *Seabrit'ies*, *Gran'ular conjuncti'va*, *Gran'ular eyelid*, (F.) *Aspérité des Paupières*. A roughness of the inner surface of the eyelids. A variety of ophthalmia, of which three kinds have been designated:—*T. sabulo'sum*, from sand, &c., getting between the eyelids; *T. carunculo'sum*, *Pladar'otes*, *Pladar'o'sis*, *Morum pal'pebrae interna'e*, from fleshy excrescences; and *T. herpeticum*, from hard pustules on the inner surface of the eyelids. This last is, also, called *Fico'sis*, and *Pal'pebra fico'sa*.

TRACT, OPTIC, see Optic nerves—*t. Respiratory*, see Respiratory tract.

TRACTATIO MANUARIA, Surgery.

TRACTORATION, Perkinism, see Tractors, metallic.

TRACTORS, METAL'LIC. Metallic agents, introduced by Dr. Elisha Perkins, of Connecticut, about the end of the last century, to cure diseases. The parts were rubbed with these tractors, and hundreds of thousands of cases were reported to have been cured by the *Tractoration*. The affections, in which they were chiefly used, were local inflammations, and pains in different parts. The good effects were, doubtless, owing to the influence exerted by the mind over the body. The bubble did not exist long. See Perkinism.

TRACTUS INTESTINORUM, Intestinal Tube—*t. Opticus*, see Optic nerves—*t. Respiratorius*, Respiratory tract.

TRACTUS SPIRALIS FORAMINULENTUS. Minute openings at the base of the modiolus, arranged in a spiral manner, which transmits the filaments of the cochlear nerve. The central canal of the Tractus is longer than the rest, and is called *Tubulus centralis modiolii*.

TRADESCANTIA VIRGINICA, *Spiderwort*; indigenous; *Order*, Commelynacæ; flowering from May to August. The roots are demulcent.

TRAGACAN'THA, from *τραγος*, 'a goat,' and *κανθα*, 'a thorn,' owing to its hirsute boughs.

Gummi Tragacantha seu *Astragalus Tragacantha*, *Gum Tragacanth*, *Gum Dragon*. The concrete juice of the *Astragalus Tragacantha* or *Astragalus Verus*, a native of Persia. *Ord.* Leguminosæ. *Secr. Syst.* Diadelphia Decandria. (F.) *Gomme Adragant*, *Adragant*, *Adragante*, *Adraganthe*. This gum is inodorous; nearly insipid; of a whitish colour; semi-transparent, and striated. It is in thin, vermiform pieces; and does not form a smooth, uniform mucilage with water. It is demulcent, but is rarely used alone.

TRAGEA AROMATICA, Pulvis cinnamomi compositus.

TRAG'VICUS, *Tragien* (Ch.), from *Tragus*. A small, flat, triangular muscle which almost wholly covers the outer surface of the tragus, arising from its base, and terminating at the top of the eminence.

TRAGIEN, *Tragicus*.

TRAGOMASCHA'LIA, *Tragomas'chalē*, from *τραγος*, 'a goat,' and *μασχαλη*, 'axilla.' The strong unpleasant odour of the armpits.

TRAGOPHONIA, Egophony.

TRAGOPO'GON, *Barba hirci*; from *τραγος*, 'a goat,' and *πωγων*, 'beard.' A genus of plants; *Ord.* Cichoraceæ. *Secr. Syst.* Syngenesia Polygamia Æqualis. (F.) *Barbe de Bœuf*; of which the roots of the *Tragopogon porrifolium*, *Salsif*, *Oyster plant*, *Oyster-root*, (F.) *Salsifis* ou *Cerçifis*, and the young shoots of the *T. pratensis*, *Meadow Salsif*, *Common Goat's Beard*, (F.) *Salsifis des prés*, are eaten as food. The root of the latter has been used as a diuretic.

TRAGOSELINUM, *Pimpinella saxifraga*—*t. Angelica*, *Ligusticum podagrarum*—*t. Magnum*, *Pimpinella magna*—*t. Majus*, *Pimpinella magna*—*t. Saxifraga*, *Pimpinella magna*.

TRAGUS; *τραγος*, 'a goat;' from its being furnished, in some persons, with hair, like the beard of a goat. *Hircus*, *Hircus*. A small, flattened, triangular nipple, situate before the meatus auditorius externus, which it appears to conceal. It is covered with hair in old people, whence its name. Also, the peculiar goat-like smell of the axillæ.

TRAGUS MATTHIOLI, *Salsola kali*.

TRAINASSE, *Polygonum aviculare*.

TRAITEMENT, Curatio—*t. Palliatif*, see Palliation.

TRAMS, Perinæum.

TRANCE, Catalepsy, Ecstasis.

TRANCHÉES, Tormina—*t. Uterines*, Pains, after.

TRANS, in composition, 'through, over, or beyond.'

TRANSFIGURATIO, Transformation.

TRANSFORMATIO, *Transformatio*, *Transfiguratio*, *Transmutatio*, *Metabolē*, from *trans*, and *forma*, 'form.' Change of form.

TRANSFORMATIONS DE TISSU, (F.) The French pathologists designate thus the change that occurs in an organ, the tissue of which becomes similar to that of another organ. The chief transformations are cartilaginous, osseous, and adipous. See Tissue.

TRANSFUSION, *Transfusio*, *Metach'ysis*, from *transfundere* (*trans*, and *fundere*, *fusum*, 'to pour') 'to pour from one vessel into another.'

TRANSFUSION OF BLOOD, *Transfusio Sanguinis*, *Cura Medea'na*, *Methamachym'ia*, *Hæmatometach'ysis*, *Hæmometach'ysis*, *Diach'ysis*, *Transplantatione medica nova*, *Chirurg'ia transfusoria*, *Exotichæmato'sis*. The act of passing the blood of one animal into the veins of another; an operation which was formerly used to fulfil various therapeutical intentions. It has been revived in cases of uterine hemorrhage; and, apparently, with some success.

The operation can only be performed safely

on animals having like kinds of blood. See Globule.

TRANSLATION, Metastasis.

TRANSMISSIBILITY, see Sensibility.

TRANSMUTATIO, Transformation.

TRANSPIRATIO, Prespuration—t. Unilatera, Hemidiaphoresis.

TRANSPIRATOIRE, Perspiratory.

TRANSPLANTA'TIO, (*trans*, and *planta*,) *Metaphytei'a*. A pretended method of curing diseases, devised by Paracelsus—by making them pass from one individual to another, either animal or vegetable.

TRANSPLANTATIO, Morioplastice—t. Medica nova, Transfusion.

TRANSPLANTA'TIO DENTIS, *Insit'tio dentis*. The act of transplanting a tooth from one person to another.

TRANSPORT, Delirium.

TRANSPOSITIO, Metathesis.

TRANSPOSIT'ION, *Transposit'io*, from *trans*, 'over,' and *ponere, positum*, 'to put.' *Metathesis*. Change of situation.

TRANSPPOSITION OF THE VIS'CERA, *Polype'ria promisc'ua translati'va*, *Intus inver'sus*, is a congenital vice of conformation, which consists in the viscera being found out of the situations they ordinarily occupy: the heart, for example, being on the right side; the liver on the left, &c.

TRANSUDATIO, Diapedesis.

TRANSUDA'TION, *Transuda'tio*, (F.) *Transudation*, from *trans*, 'through,' and *sudare, sudatum*, 'to sweat.' The passage of a fluid through the tissue of any organ, which may collect in small drops on the opposite surface, or evaporate from it.

TRANSUDATION, Exosmose.

TRANSVERSAIRE ÉPINEUX, *Transversalis dorsi*—t. *Épineux du cou*, *Semispinalis colli*—t. *Grêle*, see *Sacro-lumbalis*—t. *Épineux du dos*, *Semi-spinatus dorsi*.

TRANSVERSAL DE LA CONQUE, *Transversalis auris*—t. *du Nez*, *Compressor nasi*—t. *des Orteils*, *Transversus pedis*.

TRANSVERSALIS, Transverse.

TRANSVERSALIS ABDOM'INIS, (F.) *Lombo-abdominal* (Ch.), *Transverse of the Abdomen*. This muscle is seated, deeply, on the lateral parts of the abdomen. It is flat, thin, and broader before than behind. It is attached, above, to the cartilage of the last true rib, and to those of every false rib; and, below, to the inner lip of the crista of the ilium; to the two outer thirds of the crural arch, and to the upper part of the pubis. Its fibres, moreover, are inserted, behind, by means of broad aponeuroses, into the top of the transverse and spinous processes of the first four lumbar vertebræ; and, before, into the linea alba, and the ensiform cartilage. This muscle, all of whose fibres have a transverse direction, constricts the belly, and diminishes the base of the chest, by drawing inwards the ribs to which it is attached.

TRANSVERSALIS ANTICUS PRIMUS, *Rectus capitis lateralis*—t. *Collateralis colli*, see *Sacro-lumbalis*.

TRANSVERSALIS COLLI, *Transversalis Major colli*, *Portion of the Sacro-spinal* (Ch.), (F.) *Transversaire*. A muscle, seated at the posterior and lateral part of the neck and upper part of the back. It is attached to the transverse processes of the five or six lowest vertebræ of the neck; and to those of the four or five first dorsal. It extends the vertebræ of the neck, and inclines them to its side.

TRANSVERSALIS COLLI, *Semi-spinalis colli*.

TRANSVERSALIS DORSI, *Transverso-spinalis*, *Multif'idus Spinæ*, *Lumbo-cervical portion of the*

Spinal (Ch.), (*Transverso-spinalis Lumbo'rum*, *Transverso-spinalis Dorsi*, *Transverso-spinalis Colli*), *Musculus sacer*, *Spiniales et transversales lumbarum*, *Semi-spinalis internus* sive *Transverso-spinalis colli pars interna* (Winslow), *Lombodorsi-spinal*, &c., (F.) *Transversaire épineux*. This muscle, usually called, by English anatomists, *Multif'idus spinæ*, and including all the *transverso-spinales*, is situate in the vertebral gutters, extending from the posterior part of the sacrum to the second cervical vertebra. It is thicker in the neck and loins than in the back and behind the sacrum. Its use is—to straighten the vertebral column, and to impress upon it a slight rotary motion.

TRANSVERSALIS NASI, *Compressor naris*.

TRANSVERSARIUS, Transverse.

TRANSVERSE, *Transver'sus*, *Transversa'lis*, *Transversarius*, from *trans*, 'over,' and *vertebre, versum*, 'to turn.' That which runs across: also, that which relates to the transverse processes of the vertebræ.

TRANSVERSE ARTERY OF THE FACE, arises from the temporal; passes transversely across the face, in front of the condyle of the lower jaw, and gives its branches to the different muscles of the cheek.

TRANSVERSE FISSURE, see *Liver*—t. *Fossa*, see *Liver*—t. *Ligament of the Atlas*, *Annular ligament*.

TRANSVERSE PERINEAL ARTERY, *Urethro-bulbar* (Ch.), is given off from the upper branch of the internal pudic; and passes inwards and forwards above the transversus perinæi muscles, as far as the bulb of the urethra, into which it dips, subdividing into numerous branches.

TRANSVERSE PROC'ESSES OF THE VER'TEBRÆ, *Diapophyses* of Owen, (F.) *Apophyses transverses des vertèbres*, are the bony eminences that jut out transversely and posteriorly from the sides of the vertebræ.

TRANSVERSE SUTURE, *Sutu'ra transversa'lis*, runs across the face, and sinks into the orbit; joining the bones of the skull to those of the face, but with so many irregularities and interruptions, that it can scarcely be recognised as a suture.

TRANSVERSE DE L'ABDOMEN, *Transversalis abdominis*—t. *de l'Oricule*, *Transversus auris*—t. *du Périnée*, *Transversus perinæi*.

TRANSVERSO-SPINAL, *Semi-spinalis colli*, *Semi-spinalis dorsi*—t. *Spinalis*, *Transversalis dorsi*—t. *Spinalis colli*, *Semi-spinalis colli*—t. *Spinalis dorsi*, *Semi-spinalis dorsi*.

TRANSVERSUS AURIS, *Transver'sus Auriculæ*, (F.) *Transverse de l'Oricule* (Ch.), *Transversal de la Conque*, is often wanting. It is formed of some transverse fibres, situate transversely, behind the projection of the helix which divides the concha into two portions.

TRANSVERSUS PEDIS, *Scandularius*, (F.) *Transversal des Orteils*, *Métatarso-sous-phalangien transversal du premier orteil* (Chaussier). A muscle, which arises by fleshy slips from the heads of the metatarsal bones of the three outer toes. Its tendon is inserted into the base of the first phalanx of the great toe, being blended with that of the adductor pollicis.

TRANSVERSUS PERINÆI, *Levator Ani parvus*, (F.) *Ischio-périneal* (Ch.), *Transverse du Périnée*, is placed at the posterior part of the perinæum. It is thin, triangular, and situate transversely. Its external extremity is attached to the ramus and tuberosity of the ischium: its inner extremity is confounded with its fellow of the opposite side, and with the anterior part of the sphincter ani and posterior part of the bulbo-cavernosus. The use of this muscle is,—to compress the urethra, and to support the rectum and bladder. To a

fasciculus of this muscle, Santorini has given the name *Ure'thræ Elevator seu Ejacula'tor*.

TRANSVERSUS PERINÆI ALTER, Prostati'cus inferior. A small muscle which occasionally accompanies the last.

TRAPA NATANS, (F.) Macre flottante, Noix ou Châtaigne d'Eau. Ord. Onagraceæ. *See Syst. Tetrandria Monogynia.* The plant which affords the *Nuces Aquaticæ, Tribuli aquatici, Caltropis*. The nut is considered nutrient and demulcent, and is said to be useful in diarrhœa from abrasion of the bowels, and in calculus. A poultice is sometimes made of it to discuss hard and indolent tumours.

TRAPEZA, Mensa.

TRAPÈZE, Trapezium, Trapezium.

TRAPEZIUM OS, τραπεζίον, 'a trapezium.' So called from its shape. *Os multangulum majus, (F.) Os trapèze.* The first bone of the second row of the carpus. It is articulated, above, with the scaphoides; below, with the first bone of the metacarpus; within, with the trapezoides, and second metacarpal bone. Anteriorly, posteriorly, and externally, it gives attachment to ligaments.

TRAPEZIUS, Cuculla'ris, (F.) Dorso-sus-acromion (Ch.), Trapèze, Capuchon. A muscle, seated at the posterior part of the neck and shoulder, and at the upper part of the back. It has the shape of a trapezium; is attached, on the one hand, to the inner third of the upper curved line of the occipital bone; to the posterior cervical ligament; to the spinous process of the 7th cervical vertebra; and to those of all the dorsal vertebra; and, on the other hand, to the spine of the scapula; the acromion and the outer third of the posterior margin of the clavicle. Its upper fibres are situate obliquely downwards and outwards; the transverse and inferior, obliquely outwards and inwards. This muscle elevates the shoulder; carries it backwards, or depresses it, according as its upper, middle, or lower fibres contract separately. It straightens the head, also, and inclines it to one side.

TRAPÉZOID LIGAMENT, Ligamentum trapezoides. The anterior part of the coraco-clavicular ligament. It is a very strong, fibrous fasciculus, which has the shape of a trapezium, and is situate obliquely, between the acromion process and clavicle.

TRAPEZOÏDES, OS, Os multangulum minus seu pyramida'le carpi, from τραπεζίον, 'a trapezium,' and εἶδος, 'shape or resemblance.' The second bone of the second row of the carpus,—so called from its shape. It is smaller than the trapezium, on the inside of which it is situate. It is articulated, above, with the os naviculare; below, with the second metacarpal bone; on the outside, with the trapezium; and internally, with the magnum. Anteriorly and posteriorly, it affords attachment to ligaments.

TRAUBENKUR, Grape cure.

TRAILISMUS, see Balbuties and Blassitas.

TRAILOTES, see Blassitas.

TRAUMA, Wound.

TRAUMATIC, Traumat'icus, Vulnerari'us, Vul'nerary, (F.) Traumat'ique, from τραυμα, τραυματος, 'a wound.' Anything relating to a wound.

TRAUMATICA, Detergents, Vulneraries.

TRAUMATICINE; same etymon as Traumatic. A name given by Eulenberg to a solution of gutta percha in chloroform, which is applied externally in various chronic cutaneous diseases.

TRAUMATICUS, Traumatic, Vulnerary.

TRAUMATISM, Traumat'ismus. The condition of the organism occasioned by a grave wound.

TRAMATO-COMI'UM, from τραυμα, τραυματος, 'a wound,' and κομω, 'I take care of.' An hospital for the reception of the wounded.

TRAUMATOP'YRA, Febris traumati'ca; from τραυμα, τραυματος, 'a wound,' and πυρ, 'fire.' A wound fever, or fever consecutive to a wound.

TRAVAIL, Parturition.

TRAVAIL D'ENFANT, Parturition.

TRAVELLER'S JOY, Clematis vitalba.

TREACLE, Melasses, Theriaca—t. English, Teucurium chamædrys—t. Venice, Theriaca.

TREAD, Cicatricula—t. of the Cock, Molecule.

TREATMENT, Curatio.

TREATMENT, DRY. One in which the patient is almost wholly, if not wholly, restricted from the alimentary use of fluids; a valuable *modus medendi* in inflammatory and hemorrhagic conditions.

TREE, ELK, Andromeda arborea—t. of Life, Thuya occidentalis—t. Sour, Andromeda arborea.

TRÈFLE DE CASTOR, Menyanthes trifoliata—t. D'Eau, Menyanthes trifoliata—t. des Marais, Menyanthes trifoliata.

TREFOIL, Hepatica triloba—t. Bean, stinking, Anagyris—t. Marsh, Menyanthes verna—t. Sour, Oxalis acetosella—t. Shrubby, Ptelea trifoliata—t. Water, Menyanthes trifoliata.

TREMA, Foramen.

TREMLEMENT, Tremor—t. Métallique, see Tremor.

TREMBSLES, Milk-sickness.

TREMBLING, Tremor—t. Fevers, Intermittent fever.

TREMELLA AURICULA JUDEÆ, Peziza auricula.

TREMOR, Trepidat'io, Syn'clonus Tremor, Tromo-spasmus, Tromus, Trembling, (F.) Tremblement, from tremere, 'to tremble.' Involuntary agitation of the body, or of some part of it, without any obstacle to voluntary motion. It depends, generally, upon debility of the muscular, or of the nervous system; and, hence, is observed in convalescence, and in typhoid affections. It occurs, also, in old people; in hard drinkers; workers in mercury, lead, &c.: in the last case, it is called by the French, *Tremblement métallique, Tremor metallicus*. Tremor seems to resemble paralysis more than convulsion. See Paralysis agitanus and Pavitatio.

TREMOR CORDIS, Hippus, Palpitation—t. Metallicus, see Tremor—t. Potatorum, see Delirium tremens—t. Purring, Frémissement catinaire.

TREPAN, Trep'anum, Try'panon, Trip'anon, τραπεζον, Terebell'u, Pereter'ium, Pereter'ium, Serra versatilis, Chænic'ion, Chænic'ion, Ter'ebra, Ter'etron, Tere'trium, Vertib'ulum, (F.) Trépan, from τρυπανω, 'I perforate.' A surgical instrument resembling a wimble, and worked in the same manner. It is used for removing portions of bone, and particularly of the bones of the skull. The term *trep'an* is given more particularly to the part of the instrument that makes the perforation. The handle is so constructed as to receive different bits,—as the crown, the *Trépan perforatif* or *Perite'riion*, the *T. exfoliatif* or *Desquamato'rium trep'anum*, and the *T. abaptis'ta*.

In Great Britain and the United States, this instrument has been superseded by the trephine, which is more manageable.

TREPANATIO, Trepanning.

TRÉPANATION, Trepanning.

TREPAN'NING, Terebra'tio, Anatre'sis, Cephalotripe'sis, Trepan'tio, Trype'sis, Tressis, Prisis, Prismus, Fora'tio, (F.) Trépanation. Same etymon as Trepan. The methodical application of the trepan.

TREPANON, Trepan.

TREPANUM, Trepan.

TREPINE. The instrument which has replaced the trepan in some countries. It consists of a simple, cylindrical saw; with a handle placed

transversely like that of a gimlet, and from the centre of the circle, described by the teeth of the saw, a sharp little perforator projects, called the *Centre-pin*. The centre-pin is capable of being removed, at the surgeon's option, by means of a key for the purpose. It is used to fix the instrument until the teeth of the saw have made a circular groove, sufficiently deep for it to work steadily. The pin must then be removed. Sometimes the pin is made to slide up and down, and to be fixed in any position, by means of a screw.

TREPHOUSA, Nurse.

TREPIDIATIO, Tremor—t. Cordis, Cardiotromus.

TRÉPIED VITAL, Tripod, vital.

TREPON'DO. A weight of three pounds.—Scribonius.

TRE'SIS, *τρῆσις*, from *τρῆω*, 'I bore.' Properly, a perforation. A wound. A forcible solution of continuity in a soft part, commencing externally. A genus in the nosology of Good.

TRESIS, Trepanning, Wound—t. Causis, Burn—t. Punctura, Puncture—t. Vulnus, Wound—t. Vulnus laceratum, see Laceration—t. Vulnus simplex, Cut.

TRESSAILLEMENT, Shuddering.

TRESSO'RIA, low Latin *Epi'si'on*, *επισιων*. A term formerly applied to the hair covering the mons veneris, the absence of which has, by the vulgar, been esteemed a matter of reproach.

TRI, *τρε*, in composition, 'three.'

TRIACLE, Melasses.

TRIANGLE MÉDULLAIRE, Fornix.

TRIANGLE, VESICAL, see Urinary Bladder.

TRIANGULAR, *Trigo'nos*, *Triangula'ris*, from *tri*, and *angulus*, 'an angle.' That which has three angles.

TRIANGULAR or INFRA-PUBIAN LIGAMENT, *Ligamentum triangula'rē* seu *infra-pubid'num*, is a ligamentous fascia with short fibres, situated transversely beneath the symphysis pubis, which it strengthens. Also, a ligament extending from the coracoid to the acromial process of the scapula.

TRIANGULARIS, Depressor anguli oris—t. Cocygis, Cocygeus—t. Nasi, Compressor naris.

TRIANGULARIS STERNI, *Sterno-costal* (Ch.), *Pectora'lis inter'nus*. A muscle situate at the anterior and inner part of the chest, behind the cartilages of the ribs. It has the shape of a lengthened triangle, the base of which is directed downwards. It is attached to the posterior, lateral, and inferior part of the sternum, whence its fibres pass upwards and outwards, and terminate by as many distinct digitations at the cartilages of the 3d, 4th, 5th, and 6th true ribs. This muscle depresses the ribs and contributes to expiration.

TRIBAS, (F.) *Tribade*, from *τριβω*, 'I rub.' *Fricatrix*, *Fricat'rix*, *Futu'rix*, *Mas'cula*, *Subagitat'rix*, *Subagitat'rix*. A female whose clitoris is so large as to cause her to be regarded as a hermaphrodite. One who acts as a male with another female.

TRIBULI AQUATICI, see *Trapa natans*.

TRIBUTUM LUNARE, Menses—t. Menstruum, Menses.

TRICÆ, Plica—t. Incuborum, Plica—t. Scroforum, Plica.

TRICAGO, Teuerium chamædrys.

TRICAUDALIS, Retrahens auris.

TRICEPH'ALUS, from *tri*, and *κεφαλή*, 'head.' A monster with three heads.

TRICEPS, from *tri*, and *caput*, 'head.' A name given to muscles that have three fleshy bundles at one of their extremities.

TRICEPS ADDUC'TOR FEM'ORIS. Under this

appellation are comprehended three distinct muscles; *Adductor brevis*, *A. longus*, and *A. magnus*.

TRICEPS AURIS, Retrahens auris—t. Brachialis, Triceps extensor cubiti.

TRICEPS CRURIS, *Femora'lis*, (F.) *Trifemoro-rotulien* (Ch.), *Crural*, *Trifemoro-tibi-rotulien*, *Triceps crural* ou *de la cuisse*, is situate at the anterior, inner, and outer part of the thigh. It is formed of three bundles at its superior extremity, viz. 1. A middle fasciculus (the *crura'lis* of most anatomists). 2. An external fasciculus (the *vastus externus*) and 3. An inner fasciculus (the *vastus internus*). It is attached, above, to the anterior, inner, and outer surfaces of the femur, and to the two edges of the linea aspera, from the base of the trochanter to within four fingers' breadth of the knee. Below, it terminates by a large tendon, which is attached to the base and edges of the patella, as well as to the inner and outer tuberosities of the tibia. The triceps extends the leg on the thigh, and conversely.

TRICEPS DE LA CUISSE, Triceps cruris—t. *Crural*, Triceps cruris.

TRICEPS EXTEN'SOR CU'BITI, *Triceps brachia'lis*, (F.) *Scapulo-huméro-olecraniē* (Ch.), *Triceps brachial*. This muscle, which occupies all the posterior part of the os humeri, is described as two muscles by Douglas, and as three by Winslow. It arises by three heads. The first or long head,—*long head* of the *biceps externus* of Douglas, *Anconeus major* of Winslow,—arises from the anterior extremity of the inferior costa of the scapula, near its neck, and below the origin of the teres minor. The second head, or *short head* of the *biceps externus* of Douglas, *Anconeus externus* of Winslow, arises from the upper and outer part of the os humeri, at the base of the great tuberosity; and the third head,—*Brachialis externus* of Douglas, *Anconeus internus* of Winslow,—the shortest of the three, arises from the back part of the os humeri, behind the flat tendon of the latissimus dorsi. These three portions unite about the middle of the arm, so as to form one thick and powerful muscle, which is inserted at the upper part of the olecranon. It extends the forearm on the arm, and conversely.

TRICEPS MAGNUS, Adductor magnus—t. Minor, Adductor longus femoris—t. Secundus, Adductor brevis.

TRICHÆ INCUBORUM, Plica.

TRICHANGIA, Capillary vessels

TRICHANGIECTA'SIA, *Angiecta'sia*, *Trichocirsus*, from *τριξ*, *τριχος*, 'a hair,' *αγγειον*, 'a vessel,' and *εκτασις*, 'dilatation.' Morbid dilatation of the capillary vessels.

TRICHAUX'È, from *τριξ*, *τριχος*, 'hair,' and *αυξη*, 'increase.' Increase in the quantity and size of the hair, without change of texture.

TRICHERA ARVENSIS, Scabiosa.

TRICHIA, Entropion.

TRICHIASIS, *Tricho'sis*, *Tricho'sis*, from *τριξ*, *τριχος*, 'hair.' *Morbus pila'ris*. This name has been given to several affections. 1. To a disease of the kidneys or bladder, in which filamentous substances, resembling hairs, are passed in the urine. This is also called *Pilimic'tio*. It must be regarded as a variety of *Catar'rhus vesic'æ*. 2. To a painful swelling of the breasts, in child-bed women, when the milk is excreted with difficulty:—a disease attributed, by Aristotle, to a hair swallowed by accident and carried to the breasts through the circulation; and 3dly, To inversion of the eye-lashes. See Entropion.

TRICHIASIS LACTEA, Infarctus mammae lacteus.

TRICHILIA, Cathartics.

TRICHILIA ENET'ICA, *Elcaja*. A tree, Order, Meliaceæ, common on the mountains of Yemen

and in Senegal. The fruit is used, by the Arabs, as an emetic. The ripe seeds are formed with sesamum oil into an ointment for the itch.

TRICHILIA TRIFOLIATA, a bush of Curaçoa, a decoction of the roots of which is used to promote abortion.

TRICHINA SPIRALIS. Same etymon. A small species of entozoa discovered in the muscles of voluntary motion. Trichinae consist of very minute cysts, of an oblong figure, having considerable resemblance, in size and colour, to young pediculi, and are somewhat allied to the eels found in paste and vinegar. No symptoms have as yet been observed to be pathognomonic of their presence.

TRICHIOSIS, Trichiasis—t. Distrix, Distrix.

TRICHISMUS. Same etymon. *Capilla'tio*, *Fissura pila'ris*. A capillary fracture, fissure, or crack.

TRICHIURIA, Trichocephalus.

TRICHOCEPHALE DE L'HOMME, Trichocephalus.

TRICHOCEPHALUS, *Trichoceph'alus dispar*; from *τριξ*, *τριχος*, 'a hair,' and *κεφαλη*, 'head.' *Trichu'ris*, *T. vulgaris* seu *intestinalis*, *As'caris trichu'ria*, *Trichu'ria*, *Trichocephalus* seu *Mastigo'des hominis*, *Long thread-worm*, (F.) *Trichocéphale de l'homme*. A worm, from an inch and a half to two inches long; the head acute; the body spirally involuted in the male, almost straight in the female. The *trichocephalus dispar* generally inhabits the cæcum and colon, and is rarely met with in the small intestines. It gives rise to no peculiar symptoms, and requires the usual anthelmintic treatment.

TRICHOCIRSUS, Trichangiectasia.

TRICHOG'ENOUS, from *τριξ*, *τριχος*, 'a hair,' and *γεννω*, 'I generate.' Hair-forming; as a '*trichogenous* remedy,'—one that promotes the growth of hair.

TRICHOLABIS, Madisterium.

TRICHOLABIUM, Madisterium.

TRICHOLOGIA, Carphologia.

TRICHOMA, Capillamentum, Plica.

TRICHOMANES, Asplenium trichomanoides—t. Crenata, Asplenium trichomanoides.

TRICHOMAPHYTE, from *trichoma*, 'plica,' and *φυτον*, 'a vegetable.' A cryptogamous growth, found in plica, and said, by some, to be its cause.

TRICHOMAPHYTON, Mycoderma plicæ.

TRICHOMATION, Capillamentum.

TRICHOMATOSE HAIR, Plica.

TRICHOM'ONAS, *Trichom'onad*; from *τριξ*, *τριχος*, 'a hair,' and *μοναδ*. An animalcule found by M. Donné in the mucus of the vagina, where cleanliness has not been attended to, and to which he has given the name *Trichom'onas vagina'lis*. By some it is considered to be nothing more than ciliated epithelium separated from the uterus.

TRICHOMYCES TONSURANS, Porrigo decalvans.

TRICHONOSIS, Porrigo—t. Furfuracea, Porrigo decalvans—t. Plica, Plica—t. Poliosis, Poliosis.

TRICHON'OSUS, from *τριξ*, *τριχος*, 'hair,' and *νοσος*, 'disease.' A disease of the hair.

TRICHOPHY'IA, *Trichophy'tica*, from *τριξ*, *τριχος*, 'hair,' and *φύειν*, 'to grow.' Remedies that promote the growth of the hair.

TRICHOPHYTON TONSURANS, see Porrigo decalvans.

TRICHOSAN'THES, AMA'RA, (*τριξ*, *τριχος*, 'hair,' and *ανθη*, 'a flower.') *Order*, Bitterbitaceæ; a plant of India; the seeds are bitter and astringent, sometimes emetic. In Jamaica, it is considered to be a poison, and is used for killing rats.

TRICHOSANTHES CORDATA. The root is used

by the natives of India as a substitute for Calamba root.

TRICHOSANTHES CUCUMER'INA. The fruit is considered in India to be anthelmintic.

TRICHOSANTHES INCI'SA, *Gashed Trichosanthos*, of the forests of India. The fruit is esteemed to be poisonous. Pounded and intimately blended with cocoa nut oil, it is used in India as an application to offensive sores of the ears, and to ozena.

TRICHOSANTHES VILLO'SA, of Java. The fruit acts like colocynth.

TRICHOSCHISIS, Schizatrachia.

TRICHOSIS, *Pila'rè malum*; from *τριξ*, *τριχος*, 'hair.' Morbid organization or deficiency of hair. A genus in the system of Good.

TRICHOSIS, Entropion, Trichiasis—t. Arca, Porrigo decalvans—t. Athrix, Alopecia—t. Distrix, Distrix—t. Furfuracea, Porrigo furfurans—t. Hirsuties, Hirsuties—t. Plica, Plica—t. Poliosis, Poliosis—t. Setosa, Hystriaciasis.

TRICHOTON, Scalp.

TRICHURIS, Trichocephalus.

TRICLISPERMA GRANDIFLORA, Polygala paucifolia.

TRICUSPID, *Tricus'pis*, *Tricuspidalis*, *Tricuspidatus*, from *tri*, and *cuspidis*, *cuspidis*, 'a point.' That which has three points.

TRICUSPID VALVES, *Valvulæ Tricus'pides* seu *triglo'chines* seu *trisu'cæ*, are three triangular, valvular duplicatures, formed by the inner membrane of the right cavities of the heart, around the orifice by which the auricle communicates with the ventricle. The elongated and pointed top of each of these valves is continuous with the chordæ tendineæ, which set out from the columnæ carneæ of the heart. These valves are depressed to allow the blood to flow from the auricle into the ventricle; and are raised to prevent its reflux into the auricle.

TRIENS, *Un'cæ quatuor*. From *tri*, 'three.' The third part of a pound. Four ounces, Troy.—Galen.

TRIFACIAL, Trigemini.

TRIFÉMORO-ROTULIEN, Triceps cruris—t. *Tibi-rotulien*, Triceps cruris.

TRIFOLIUM ACETOSUM, Oxalis acetosella—t. Aquaticum, Menyanthes trifoliata—t. Anreum, Hepatica triloba—t. Cervinum, Eupatorium cannabinum—t. Fibrinum, Menyanthes trifoliata—t. Hepaticum, Hepatica triloba.

TRIFOLIUM MELILO'TUS OFFICINA'LIS, *T. offic'inalè* seu *odoratum* seu *caballinum*; from *tri*, and *folium*, 'a leaf.' *Melilotus*, *Melilotus citri-na*, *Lotus sylvestris*, *Sertula Compa'na*, *Coro'nu regia*, *Common melilot*, (F.) *Métilot*. *Ord.* Leguminosæ. *Sex. Syst.* Diadelphia Decandria. The infusion or distilled water of this plant has been employed in cases of ophthalmia. It has also been used in fomentations, gylsters, &c.

TRIFOLIUM OFFICINALE, *T. melilotus officinalis*—t. Paludosum. Menyanthes trifoliata—t. Palustre, Menyanthes trifoliata.

TRIGAS'TRIC, *Trigas'tricus*, *Triven'ter*; from *tri*, and *γαστηρ*, 'belly.' That which has three bellies. An epithet for muscles so circumstanced.

TRIGEM'INI, *Tergem'ini*, from *tri*, and *gen'inus*, 'double,' 'threefold,' 'triplets.' *The fifth pair of nerves*, *Nervi divi'si* seu *gustato'rii*, *Nervus quintus* seu *tremellus* seu *mixtus* seu *sympathet'icus me'dius* seu *sympath'icus medius* seu *anon'ynus* seu *innominatus*, *Par trigem'inum* seu *quintum nervorum cerebralis* seu *trium funiculo'rum*, *Trifacial*, (F.) *Nerf gustatif innominé*, *Nerf à trois cordes*, *Nerf trijumeau*. This nerve arises below the tuber annulare by one large posterior root from the corpora restiformia, and by two small anterior roots from the corpora olivaria, whence, pro-

ceeding forwards to the side of the sella Turcica, the filaments composing the large root form a ganglion—the Gasserian. Emerging from this ganglion, the filaments, of which the large root consists, form, with those constituting the small roots, and which had not passed through the ganglion, two flattened trunks, each of which is soon divided into three branches, in such a manner, however, that the *first*, or *ophthalmic branch*, and the *second* or *upper maxillary*, are composed exclusively of the filaments that arose from the corpora restiformia and passed through the Gasserian ganglion; whilst the *third* or *lower maxillary branch* is composed in part of those filaments, and in part of those that arose from the corpora olivaria, and passed on one side of the ganglion without going through it. The whole, therefore, of the first and second branches, and a part of the third are sensiferous nerves, whilst the remaining part of the third—the *manducatory* or *mas'ticatory*—is wholly motiferous, and passes to the pterygoid and other muscles concerned in mastication.

TRIGONE CÉRÉBRAL, Fornix—*t. Vésical*, see Urinary Bladder.

TRIGONELLA FŒNUM, *T. Fœnum Græcum*, diminutive of *trigona*, three sided—from the shape of its flower; *Fœnugreek*, *Fœnugreek*, *Fœnum Græcum*, *Bu'ceras*, *B. Fœnum Græcum*, *Carphos*, *Ægoc'eras*, (F.) *Fénugrec*, *Sénegrain*. *Ord. Leguminosæ. Sex. Syst. Diadelphia Decandria*. A native of the south of France. The seeds have a strong, disagreeable smell, and an unctuous, farinaceous taste; accompanied by a slight bitterness. They are chiefly used in poultices.

TRIGONIUM OLFACTORIUM, see Mammary eminence.

TRIGONOS, Triangular.

TRIGONUS VESICÆ, see Urinary bladder—*t. Lieutaudi*, see Urinary bladder.

TRIJUMEAUX, Trigemini.

TRILLIUM LATIFOLIUM, from *trilix*, 'triple,'—all the parts being in threes. *Broad-leaf Bethroot*, *Bethroot*, *Rattlesnake root*, *Wake-robin*, *Coughroot*, *Indian Balm*, *Ground Lily*, *Jews' Harp*, *Indian Shamrock*, *Pariswort*, *Trillioze*. *Ord. Trilliaceæ. Sex. Syst. Hexandria Trigynia*. A plant peculiar to North America, which blossoms in the spring. The root is astringent.

There are many species of Trillium, all of which possess the same properties.

TRIOCEPHALIA, Aprosopia.

TRIORCHIS, from *tri*, and *ορχις*, 'a testicle.' One who has three testicles.

TRIOSTEOPERMUM, *Triosteum*.

TRIOSTEUM, *T. Perfoliatum* seu *majus*, from *tri*, and *οστέον*, 'a bone,' in allusion to the three bony nuts; *Triosteopermum*, *Bastard Ipecacuan'ha*, *Fever Root*, *Feverwort*, *Tinker's weed*, *Horse ginseng* or *gentian*, *Ipecac.*, *Wild Coffee*, *White ginseng*, *Gent'ian*, *White Gentian*, *Sweet Bitter*. Indigenous; *Ord. Caprifoliaceæ*. In very large doses, the bark of the root proves emetic. It is a good cathartic, in doses of twenty or thirty grains. It sometimes operates as a diuretic.

TRIOSTEUM AUGUSTIFOLIUM, *T. minus*, has similar virtues.

TRIBE DE ROCHE. Different lichens of the species *Gyrophora*, inhabiting the Arctic regions of America, bear this name. They are eaten as food by the hunters.

TRIPHAR'MACUM, *τριφαρμακον*. From *tri*, and *φαρμακον*, 'a medicine.' A medicine composed of three ingredients.

TRIPLET, from *triplex*, 'triple.' One of three

children born at the same accouchement or gestation. Also, relating to triplets—as a '*triplet* conception.'

TRIPLET MONSTERS, *Mostra triplica* seu *trigem'ina*, are such as have parts of the body tripled. They are rare.

TRIPOD, VITAL, (F.) *Trépied vital*. The heart, lungs, and brain have been so called, as their united action is necessary for the maintenance of life.

TRIPSIS, Contusio, Trituration.

TRIPUDIATIO SPASTICA, Chorea.

TRIQUETRA OSSA, Wormiana ossa.

TRIQUETRUM, (OS), Cuneiform (bone.)

TRISIS, Brygmus.

TRISMUS, from *τριζω*, 'I gnash.' *Ento'sia* seu *Tonos Trismus*, *Copis'trum*, *Mas'ticatory spasm of the face*, *Locked Jaw*, *Spasmus* seu *Rigor* seu *Tet'anus maxill'æ inferioris*, *Gnathospas'mus*, *Stomatospas'mus*, (F.) *Mal de Macheire*. Spastic closure of the under jaw; a partial tetanus. Cullen makes two varieties—*T. nascentium* seu *neonato'rum*, *Nineday fits*, (F.) *Sarrête*, attacking infants during two weeks from birth; and *T. traumaticus*, originating from a wound.

TRISMUS CAPISTRATUS, *Brédisure*—*t. Catarrhalis maxillaris*, *Neuralgia maxillaris*—*t. Clonicus*, *Neuralgia faciei*—*t. Cynicus*, see *Canine laugh*—*t. Diastrophe Sauvagesii*, *Paralysis*, *Bell's*—*t. Dolorificus*, *Neuralgia faciei*—*t. Maxillaris*, *Neuralgia faciei*—*t. Nascentium*, see *Trismus*—*t. Neonatorum*, see *Trismus*—*t. Sardonicus*, *Risus sardonicus*.

TRISPERM'UM, from *tri*, and *σπέρμα*, 'a grain or seed.' A catapasm, consisting of three seeds, — *cumin*, *bay*, and *smallage*. *Gorræus*.

TRISPLANCHNIA, Cholera.

TRISPLANCH'NIC, *Trisplanch'nicus*, (F.) *Trisplanchnique*; from *tri*, and *σπλαγχνον*, 'viscus.' That which relates to three orders of viscera.

TRISPLANCHNIC NERVE, *Nervus trisplanchnicus* seu *sympathet'icus magnus* seu *sympath'icus* seu *ganglion'icus* seu *vaso-moto'rius*, (F.) *Nerf sympathique* ou *grand sympathique*, *Great sympathetic*, *Intercostal*, *Ganglion'ic* or *vertebral nerve*, *Nerve of organ'ic life*; — named by Bichat the *organic nervous system*, in opposition to the other nervous parts, called the *animal nervous system*. Gall terms it, the *nervous system of the automa'tic functions*. It has also been called the *ganglionic nervous system*. It is termed *Trisplanchnic*, because it distributes its branches to the organs in the three great splanchnic cavities—the head, chest and abdomen. It is composed of a series of ganglia, united by intermediate branches, and passing along the side of the spine to the lowest part of the trunk; communicating, by a branch, with each of the thirty pairs of spinal nerves and several of the cerebral nerves; and detaching nerves from its several ganglia, which accompany the arteries, and are distributed, particularly, to the organs of involuntary functions. At its upper part it is concealed in the canals caroticus and cavernous sinus, and is joined there by a branch of the 6th pair of nerves, and by a twig from the Vidian nerve of the 5th pair. In passing down by the side of the spine, it forms three ganglia in the neck:—the *superior*, *middle*, (*thyroid ganglion*.) and *inferior*, (*vertebral ganglion*); 12 in the back—the *thoracic*; 5 in the loins—the *lumbar*; and three or four *sacral*. When it reaches the coccyx it unites with its fellow from the opposite side, forming a small ganglion—the *coccyge'al*, *Gan'gion impar*, *az'ygous gan'gion*. Meckel divides it into two portions—1. The *central ganglions* or *central part*, composed of the numerous ganglionic plexuses in the abdomen; the centre of which

is the *semilunar* and *solar plexuses*. 2. The *external ganglions*, *Limitrophes* or *external part*, which comprise the series of ganglions situate at the sides of the spine, from the base of the cranium to the sacrum. The great sympathetic seems to form a distinct nervous system, destined for the organs of involuntary motion; for although communicating with both brain and spinal marrow, it does not seem to be immediately under the influence of either. Its special functions are not yet, however, well understood, and are the subject—as they have always been—of much interesting investigation.

TRISPLANCHNITIS, Cholera, (spasmodic.)

TRISSAGO, Teucrium chamædrys—t. Palustris, Teucrium scordium.

TRISTEMANIA, Melancholy.

TRISTERNAL, Béchard has given this name to the third bony portion of the sternum;—that which corresponds to the third intercostal space.

TRISTITIA, Athymia, Mæror.

TRITEOPHYA AMERICANA, Fever, yellow.

TRITEOPHYES, *Triteoph'ya*, from *τριπαιος*, 'tertian,' and *φωω*, 'I become.' A fever, whose type approaches the tertian. Sauvages gave the name *Triteophya Vratislaviensis*, to an epidemic, which broke out in the Prussian army at Breslaw, in the middle of the last century.

TRITEÛS, Tertian fever.

TRITICUM ÆSTIVUM, from *terere*, *tritum*, 'to thrash.' *T. cerealē* seu *Cevallos* seu *compactum* seu *erindæum* seu *Gaertnerianum* seu *Linnæanum* seu *pruinosum*, *Summer wheat*; and *TRITICUM HYBERNUM* seu *glaucum* seu *Muticum* seu *Sic'ulum*, *Winter wheat*, (F.) *Fruent.* *Ord.* Graminæ. *Sex. Syst.* Triandria Digynia. From these plants our wheat flour is obtained, by grinding the seeds—*Wheat*, *Pyrus*, *Fruent'um*—and to them we are indebted for our bread and pastry. The nutritive properties of wheat flour are so well known as not to need comment.

Bread, (F.) *Pain*, mixed with milk, constitutes the ordinary emollient poultice;—and the *crumbs of bread*, *Micæ panis*, are a common excipient for pills and boluses.

TRITICUM ARVENSE, *T. repens*—t. *Cereale*, *T. æstivum*—t. *Cevallos*, *T. æstivum*—t. *Compactum*, *T. æstivum*—t. *Faginum*, *Polygonum fagopyrum*—t. *Gaertnerianum*, *T. æstivum*—t. *Glaucum*, *T. hybernum*, and *T. repens*—t. *Hybernum*, see *T. æstivum*—t. *Muticum*, *T. hybernum*—t. *Linnæanum*, *T. æstivum*—t. *Pruinosum*, *T. æstivum*.

TRITICUM REPENS, *T. arvensē* seu *glaucum*, *Agropyrum lævis'simum*, *Bromus glaber*, *Gramen caninum* seu *Dioscoridis* seu *repens*, *Lolidæum radi'cē repen'tē*. *Dog-grass*, *Couch-grass*, *Quickens*, *Twitch-grass*, (Sc.) *Ronnachs*, (F.) *Chiendent*. The roots are sweet, and possess aperient properties. They are said, also, to be diuretic.

TRITICUM SICULUM, *T. hybernum*.

TRITIO, Contritio, Trituration.

TRITON PALUSTRIS, see *Ectozaa*.

TRITORIUM, Infundibulum.

TRITURA, Contritio.

TRITURATIO, *Trituratio*, *Tritura*, *Tritus*, *Tritio*, *Tripsis*, from *terere*, *tritum*, 'to bruise.' The act of reducing a substance to powder.

TRITURATIO, Contritio.

TRITUS, Contritio, Trituration.

TRIVELIN, see *Liver*.

TRIVENTER, Trigastic.

TROCAR, *Trochar*, *Acus paracent'ica* seu *paracent'ica* seu *triquetra vulg'aris*, *Paracent'ic'ion*, *Paracent'ic'ion*. Corrupted from the (F.) *Troisquarts* or *Trocart*, 'three quarters'; so called from the triangular shape of the point—*Triquetrum*. An instrument used for evacuating fluids

from cavities, particularly in ascites, hydrocele, &c. A trocar consists of a perforator or stylet and a canula, which is so adapted to the perforator, that, when the puncture is made, both enter the wound with facility; after which, the stylet being withdrawn, the canula remains in the wound and affords the fluid a ready passage outwards.

TROCARD, Trocar.

TROCH, Trochiscos.

TROCHAN'TER, *Trokanter*, *Rota'tor*, from *τροχων*, 'I turn.' Anatomists have given the names *great* and *little trochanter* to two processes at the proper extremity of the femur. The *great trochan'ter*, *glutus*, is the one on the outside; the *less* is lower down and more internally. Both afford attachment to rotator muscles of the thigh, and hence their name. Chaussier, by the word *trochanter*, means the larger process; the smaller he calls *trochantin*.

TROCHANTER'IAN, *Trochanteria'nus*, *Trokanter'ian*. That which belongs or relates to the great trochanter.—Chaussier.

TROCHANTIN'IAN, *Trochantin'ian*, *Trochantin'ianus*. That which belongs or relates to the trochantin or less trochanter.

TROCHAR, Trocar.

TROCHES OF CARBONATE OF LIME, Trochisci carbonatis calcis—t. of Chalk, Trochisci carbonatis calcis—t. Escharotic, Trochisci escharotici—t. Gum, Trochisci gummosi—t. of Gum Arabic, Trochisci acaciæ—t. of Ipecacuanha, Trochisci ipecacuanhæ—t. of Lactucarium, Trochisci lactucarii—t. Liquorice, Trochisci glycyrrhizæ—t. Liquorice, with opium, Trochisci glycyrrhizæ cum opio—t. of Magnesia, Trochisci magnesiæ—t. of Morphia, Trochisci morphiæ—t. of Morphia and ipecacuanha, Trochisci morphiæ et ipecacuanhæ—t. Nitre, Trochisci nitratis potassæ—t. of Peppermint, Trochisci menthæ piperitæ—t. of Tartaric acid, Trochisci acidi tartarici.

TROCHIA, Orbit.

TROCHILIA, Trochlea.

TROCHIN, from *τροχων*, 'to turn.' Chaussier has given this name to the smaller of the tuberosities at the upper extremity of the os humeri; because it gives attachment to one of the rotator muscles of the arm,—the subscapularis.

TROCHIN'IAN, *Trochin'ianus*. That which belongs or relates to the trochin.

TROCHIS'CUS, *Phthois*, *Artis'cus*, *Collix*, *Collix*, *Phthois'cos*, *Rot'ula*, *Cycelis'mos*, diminutive of *τροχος*, 'a wheel.' *A troch* or round table, (F.) *Trochisque*. See *Pastil*, and *Tabella*. A solid medicine, prepared of powders, incorporated by means of mucilage, crumb of bread, juices of plants, &c. In French nomenclature, the *trochisque* differs from the *tablette*,—the former containing no sugar. This form of preparation is adapted for the purpose of allowing the medicines of which the troch is composed to dissolve slowly in the mouth, and to pass gradually into the stomach.

The Parisian Codex has two formulæ for troches for external use.

TROCHISCI ACA'CLÆ, *Troches of Gum Arabic*. (Acac. \mathfrak{z} iv; Amyli \mathfrak{z} j; Sacchar. \mathfrak{b} j.) Make into a mass with rose water, and form Lozenges.—Ph. E.) To allay cough.

TROCHISCI AC'IDI TARTARICI, *Troches of Tartaric Acid*. (Acid. Tartar. \mathfrak{z} j; Sacchar. \mathfrak{z} viii; Ol. Limon. \mathfrak{m} x.) Form into troches with mucilage.—Ph. E.) Refrigerant and demulcent.

TROCHISCI BECHICI NIGRI, *T. glycyrrhizæ glabrae*.

TROCHISCI CARBONATIS CALCIS, *T. e Cretâ*, *T. Cretâ* (Ph. U. S.), *Troches of Carbonate of lime or chalk*, *Lozenges for the heartburn*, *Tablet'æ ad*

o'dorem ventriculi seu cardial'gica seu ad so-
dam. (Cret. ppt. $\mathfrak{Z}iv$; *acacia*, in pulv. $\mathfrak{Z}j$; *my-*
rist, in pulv. $\mathfrak{Z}j$; *sacch.* in pulv. $\mathfrak{Z}vj$. M. Form
into troches with water.) Antacid and absorbent.

TROCHISCI E CRETĀ, T. carbonatis calcis — t.
Cretæ, T. carbonatis calcis.

TROCHISCI SEU PASTIL'LI EMETI'NÆ PECTORA'-
LES, Pectoral Lozenges of Emetine. (Sugar, $\mathfrak{Z}iv$;
emetine, 32 grains. Form into lozenges of nine
grains each.) One is a dose.

TROCHISCI ESCHAROT'ICI, Escharot'ic Troches.
(Hydrarg. oxymer. p. 8; *amyl.*, p. 16; *mucilag.*
g. tragac. q. s. Make into troches, to which a
few drops of laudanum may be added.—Ph. P.)
Used in foul ulcers, to remove excrecences, &c.

TROCHISCI ESCHAROT'ICI DE MIN'IO. (Oxyd.
plumbi. rubr. p. 16; *hydrarg. oxymer.* p. 32; *mic.*
pavis. p. 128; *aq. rosæ.* q. s.—Ph. P.) Used
like the last.

TROCHISCI GLYCYRRHIZÆ, T. G. *Glabræ* seu
Bech'ici nigri, Liq'uorice troches, Black pectoral
lozenges. (Ext. glyc. *glabr.*, gum. *acac.* $\mathfrak{a}\mathfrak{a}$ p. j;
sacch. purif. p. ij. Dissolve in warm water;
strain; evaporate, and form into troches.—Ph. E.)
Demulcent. To allay cough.

TROCHISCI GLYCYRRHIZÆ CUM O'PIO, T. G. et
opii (Ph. U. S.) seu *Theba'ici seu sedati'vo-bal-*
sam'ici seu pectora'les regis Danorum, Liqueurice
Troches with Opium, Wistar's Lozenges. (*Opii*,
in pulv. $\mathfrak{Z}ss$; ext. *glycyrrhiz.* in pulv., *sacchar.*
in pulv., *acacia*, in pulv., $\mathfrak{a}\mathfrak{a}$ $\mathfrak{Z}x$; *ol. anisi*, f $\mathfrak{Z}j$.
Make into troches.—Ph. U. S.) Demulcent and
anodyne.

Spitta's Lozenges for coryza, hoarseness, and
sore-throat, are composed as follows:—(*Cubeb.*
recent. in pulv. $\mathfrak{Z}ij$; extract. *glycyrrhiz.* $\mathfrak{Z}j$; *myr-*
oxyl. $\mathfrak{Z}j$; *acacia*, $\mathfrak{Z}iv$; *styrup.* q. s. Make into
troches of ten grains each.

TROCHISCI GUMMO'SI, Gum Troches. (*G. acac.*
p. v; *amyl.*, p. i; *sacch. pur.* p. xij. Make up
the troches with rose-water.—Ph. E.) Demulcent.

TROCHISCI IPECACUAN'HÆ, Troches of *Ipeca-*
cuanha. (*Ipecacuanh.* in pulv. $\mathfrak{Z}ss$; *sacchar.* in
pulv. $\mathfrak{Z}xiv$; *marantæ*, in pulv. $\mathfrak{Z}iv$; *mucilag.*
tragaanth. q. s. Make into troches.—Ph. U. S.)

TROCHISCI LACTUCA'RII, Troches of *Lactuca-*
rium. (Prepared with *Lactucarium* in the same
proportion and manner as the opium lozenges.—
Ph. E.) Each lozenge contains between the fifth
and sixth of a grain of lactucarium.

TROCHISCI MAGNE'SIÆ, Troches of *Magne'sia*.
(*Magne's.* $\mathfrak{Z}iv$; *sacchar.* $\mathfrak{h}j$; *myrist. pulv.* $\mathfrak{Z}j$;
mucilag. tragaanth. q. s. Make into troches.—
Ph. U. S.) Useful in acidity of the stomach, with
constipation.

TROCHISCI MENTHÆ PIPERIT'Æ, Troches of
Peppermint. (*Ol. menth. piperit.* f $\mathfrak{Z}j$; *sacchar.*
in pulv. $\mathfrak{h}j$; *mucilag. tragaanthæ*, q. s. Make
into troches.—Ph. U. S.) Used as a carmina-
tive.

TROCHISCI MORPH'ILÆ, Troches of *Morph'ia*.
(*Morph. Muriat.* $\mathfrak{h}j$; *Tinct. Tolut.* $\mathfrak{Z}ss$; *Sacchar.*
 $\mathfrak{Z}xxv$. Make into lozenges, with mucilage,
weighing 15 grains each.—Ph. E.) Each lozenge
contains about one-fortieth of a grain of muriate
of morphia. Used to allay cough.

TROCHISCI MORPH'ILÆ ET IPECACUAN'HÆ, *Tro-*
ches of Morph'ia and Ipecacuan'ha. (*Morph.*
mur. $\mathfrak{h}j$; *Ipecac.* pulv. $\mathfrak{Z}j$; *Tinct. Tolut.* f $\mathfrak{Z}ss$;
Sacchar. $\mathfrak{Z}xxv$. Make into a mass with mucilage,
and form lozenges, 15 grains each.—Ph. E.)
Each lozenge contains about one-fortieth of a
grain of the muriate. Used to allay cough.

TROCHISCI NITRA'TIS POTAS'SÆ, Nitre Troches.
(*Potassæ nitrat.* p. j; *sacch. pur.* p. iij. Make
into troches with mucilage of *tragaanth.*—Ph.
E.) In slight inflammatory sore-throat and
fever.

TROCHISCI PECTORALES REGIS DANORUM, T.
glycyrrhizæ cum opio—t. Sedativo-balsamica,
T. *glycyrrhizæ cum opio*.

TROCHISCI SODÆ BICARBONA'TIS, *Troches of*
Bicar'bonate of Soda. (*Sodæ bicarb.* $\mathfrak{Z}iv$; *sac-*
char. in pulv. $\mathfrak{h}j$; *mucilag. tragaanth.* q. s. To
be made into a mass, and divided into troches,
each weighing ten grains.—Ph. U. S.) Antacid.

The *Pastilles de Vichy*, *Pastilles digestives*
d'Hauterive-Vichy, *Pastil'li digesti'vi Darce'tii*,
composed of bicarbonate of soda, oil of pep-
permint, and sugar, are much used in France,
like the Vichy waters, in cardialgia, gout, and
lithiasis.

TROCHISCI STIBIATI, *Tabellæ antimoniales*
Kunckelii—t. *Thebaici*, T. *glycyrrhizæ cum*
opio.

TROCHISQUE, Trochiseos.

TROCH'ITER, from *τροχαιον*, 'to turn.' The
larger of the two tuberosities at the upper extre-
mity of the os humeri; so called because it affords
insertion to rotator muscles.—Chaussier.

TROCHITER'IAN, in the language of Chaus-
sier, means any thing belonging or relating to
the trochiter.

TROCH'LEA, *Trochil'ia*, (F.) *Trochlée* ou
Troklée. A pulley; from *τροχαιον*, 'to turn,'—for
example, the articular surface at the lower extre-
mity of the os humeri; so called from its forming
a kind of pulley on which the ulna moves, in
flexion and extension of the forearm. Also, the
cartilaginous pulley over which the tendon of the
trochlearis muscle passes, at the upper and inner
part of the orbit.

TROCHLEA LABYRINTHI, Cochlea.

TROCHLEARIS, Obliquus superior oculi.

TROCHLÉATEUR, GRAND, Obliquus su-
perior oculi—t. *Petit*, Obliquus superior oculi.

TROCHLÉE, Trochlea.

TRO'CHOID, from *τροχος*, 'a wheel,' and *αξος*,
'resemblance.' *Trochoi'des*, *Ax'ea commissura*.
An articulation, in which one bone turns upon
another, like a wheel upon its axle; as the *Atlo-*
ido-axoid articulation.

TROCHOIDES, Axæ commissura.

TROËNE, *Ligustrum vulgare*.

TROISQUARTS, Trocar.

TROKANTER, Trochanter.

TROKANTERIAN, Trochanterian.

TROKANTINIAN, Trochantinian.

TROKLÉE, Trochlea.

TROLIUS LAXUS, T. *Americ'anus*, *Globe*
flower; *Order*, Ranunculaceæ; indigenous; has
the same medical properties as the Ranunculus.

TROMOMANIA, Delirium tremens.

TROMOPARANGÆA, Delirium tremens.

TROMOS, see Paralysis agitans.

TROMOSPASMUS, Tremor.

TROMPE, Tuba—t. *d'Eustache*, Eustachian
tube—t. *Fallope*, Tuba Fallopiana—t. *Utérine*,
Tuba Fallopiana.

TROMUS, Tremor.

TRONC, Trunk—t. *Brachial*, Brachial artery
—t. *Basilaire*, Basiliary artery.

TROPE'OLUM MAJUS, *Nastur'ium Ind'i-*
cum seu Peruvia'num, *Acrivi'ola*, *Flos sanguin'-*
eus monar'di, *Cardamin'dum majus*, *Car'danium*
majus, *Indian Cress*. *Ord.* Geraniaceæ. *Sex.*
Syst. Octandria Monogynia. (F.) *Cresson des*
Indes, *Cresson du Mexique*, *Capucine*. An anti-
scorbutic.

TROPE'OLUM TUBERO'SUM, *Ulluco*. A tuberous
plant, cultivated in the Sierra, Peru. It is smaller
than the potato.

TROPHALIS, Colostrum.

TROPHE, Aliment, Cibatio, Pabulum.

TROPHI. Same etymon as Trophy. In in-

sects, the parts of the mouth that are employed in receiving and preparing the food.

TROPICAL, *Trophicus*, (F.) *Trophique*. Same etymon as Trophy. Relating to nourishment or nutrition.

TROPICAL NERVES. The organic nerves, or nerves of the sympathetic system, have been so termed, from the belief that they are concerned in nutrition.

TROPHIMOS, Nutrition.

TROPHONEUROSES, from τροφή, 'nourishment,' and *neurosis*. Morbid conditions of the process of nutrition, owing to modified nervous influence. — Romberg.

TROPHONOSIS, *Trophonosis*, from τροφή, 'nourishment,' and νόσος, 'a disease.' Diseases of nutrition.

TROPHY, *Trophia*, τροφή, a suffix denoting 'nourishment or nutrition;' as in *hypertrophy*, 'excess of nourishment or nutrition.'

TROPONUSI, *Morbi tropici*, from τροπή, the solstitial or tropical point where the sun turns or alters its course, and νόσος, 'a disease.' Diseases that prevail in the tropics.

TROSTER, see Spirit.

TROU, Foramen—*t. Anonyme*, Foramen stylo-mastoïdeum—*t. Aveugle* ou *Borgne*, Cæcum foramen—*t. Borgne* of the Medulla oblongata, Foramen cæcum of the medulla oblongata—*t. de Botal*, Botal foramen. Ovale foramen—*t. Déchiré antérieur*, Lacerum anterius foramen—*t. Déchiré postérieur*, Lacerum posterius foramen—*t. Épineux*, Spinale foramen—*t. Mentonnier*, Mental foramen—*t. Optique*, Foramen opticum—*t. Orbitaire supérieur*, Foramen supra-orbitarium—*t. Orbitaire supérieur*, Orbital foramen superior—*t. Ovale*, Ovale foramen—*t. Rond*, *petit*, Spinale foramen—*t. Sous-orbitaire*, see Suborbital canal—*t. Sous-pubien*, Obturatorium foramen—*t. Sphéno-épineux*, Spinale foramen—*t. Sus-orbitaire*, Foramen supra-orbitarium.

TROUS CAROTIDIENS, Carotica foramina—*t. Condyloïdiens*, Condyloidea foramina—*t. de Conjugaison*, Conjugationis foramina, see Vertebrae—*t. Olfactifs*, Olfactory foramina—*t. Rachidiens*, Spinal foramina.

TROUSSE, Case (pocket).

TROUSSE-GALANT, Cholera morbus.

TROUSSEAU, Fasciculus.

TROUSSEAUX ARRIÈRE-MÉSENTÉRIQUES (F.). A name given by Winslow to the nervous plexus situate between the two mesenteric plexuses, of which it is a dependence, and which descends into the pelvis to concur in the formation of the hypogastric plexus.

TRUBS, Lycoperdon tuber.

TRUCK, see Medicament.

TRUCULENTUS, Homieidal.

TRUDGEBACKED, see Hump.

TRUELOVE, Paris, Trillium latifolium.

TRUFFLE, Lycoperdon tuber.

TRUFFLE, Lycoperdon tuber—*t. Hart's*, Elaphomyces granulatus.

TRULLA, Fart.

TRUMBUS, Thrombus.

TRUMPET CREPPER, Tecoma radicans—*t. Flower*, Tecoma radicans—*t. Weed*, Eupatorium purpureum.

TRUNCUS, Trunk.

TRUNK, *Truncus*, (F.) *Tronc*. The principal part of the body, to which the limbs are articulated. The trunk has been divided into three parts:—*a superior*, the *head*; *a middle*, the *thorax*, and *a inferior*, the *pelvis*. These three regions contain the great splanchnic cavities. They are united by a common *stalk*—the vertebral column. To the *middle* are articulated the

superior extremities; and, to the *inferior*, the lower extremities.

The *trunk* of an artery, vein, nerve, or lymphatic, is its largest part, which has not yet given off branches. It is, also, applied to the parent vessel, after branches have been sent off.

TRUSS, from (F.) *trousser*, 'to tie up.' *Brache'rium*, *Brachie'rium*, *Brachi'lē*, *Brachi'robium*, *Bracheri'olum*, *Amma*, *Hamma*, *Subligac'ulum*, *Subligat'ura*, (F.) *Brayer*. A hernial bandage for keeping hernia reduced. The ancient trusses were inelastic. They consisted simply of a pad and strap. At the present day, elastic bandages are alone employed. They possess the advantage of making an equable and continuous pressure on the aperture of the sac, and of yielding to the changes of form in the abdominal parietes. The most important part of these bandages is a piece of narrow steel, flat, and adapted to the shape of the body. This is the *spring*, (F.) *Lessort*. It embraces the body on the side affected; extends from beyond the spine, and terminates opposite the ruptured part, by an iron plate to which it is riveted. The posterior surface of this plate is furnished with a convex *pad*, (F.) *Pelote*, adapted in shape and size to the aperture which it has to close. The spring is covered with leather, and its inner surface is padded; a strap extends from its posterior extremity; passes round the sound side, and is attached to the plate of the pad. This strap is pierced with numerous holes, which allow the patient to tighten or slacken it at pleasure. Trusses have been variously constructed; and different patents obtained for the modifications. They all act upon the above principle. Sometimes they have a double pad.

TRYGODES, Feeculent.

TRYPANON, Trepan.

TRYPESIS, Trepanning.

TRYPESIS, Friction.

TSCHERBET, Sherbet.

TSHETTIK, Upas tieuté.

TSIANA, Costus.

TSJAMPACA, Michelia champaca.

TUBA, Tube—*t. Aristotelica*, Eustachian tube—*t. Cæca*, Tuba Fallopiana—*t. Uterina*, Tuba Fallopiana—*t. Vocalis*, Tube, vocal.

TUBAL PREGNANCY, see Pregnancy, tubal—*t. Respiration*, see Murmur, respiratory.

TUBE, *Tuba*, *Trumpet*, *Salpinx*, (F.) *Trompe*. A name given to some parts which are hollow and have the shape of a trumpet.

TUBE, ALIMENTARY, Canal, alimentary—*t. Eustachian*, Eustachian tube.

TUBE, FALLOPIAN, *Tuba Fallopi'ana* seu *Fallopii* seu *uteri'na* seu *cæca*, *Metrosalpinx*, *Hysterosalpinx*, *Oviductus mulie'bris*, *Vas deferens mulie'ris*, *Ductus varicosus* seu *Processus lateralis* seu *Meatus seminalis* seu *Meatus seminalis uteri*, *Oviduct*, *Vector canal*, (F.) *Trompe de Fallope* ou *utérine*, is a canal, floating in the abdomen, and extending on each side from the superior angles of the uterus as far as the sides of the brim of the pelvis. They are 4 or 5 inches long. Near the uterus, they are straight and very narrow; but, in their course, they widen, become tortuous, and terminate by a free, expanded, and *fin'briated extremity*; called, also, *Follic'æum ornamentum*, *Morsus diaboli*, *Infundibulum* seu *Digitatio'nes* seu *Fin'bræ* seu *Vexillæ* seu *Lacin'æ tubarum Fallopii*, (F.) *Morceau frangé*, *Pavillon de la trompe*, *Morceau du diable*. Within, the tubes are hollow and lined by a mucous membrane: the tissue exterior to which is spongy and erectile. The use of the Fallopiian tubes is to conduct the sperm to the ovarium, and the fecundated ovum back to the uterus. They establish a communication between the cavity of the peritoneum and that of the

uterus, the abdominal termination being termed *Ostium abdominale*; the uterine *Ostium uterinum*. When the tube embraces the ovary, a funnel-shaped cavity—*Corolla infundibuliformis*—is formed at its extremity, into which the ovule passes.

TUBE, INTESTINAL, Canal, alimentary.

TUBE, ŒSOPHAGEAL, *Stomach Tube*. A long elastic gum tube, capable of being passed into the œsophagus or stomach.

TUBE, POLLEN, see Pollen.

TUBE, RECTAL, *Defecation tube*. An elastic gum tube, similar to the last, which is sometimes passed into the colon, to remove air from that intestine, or to enable enemata to be thrown up into it.

TUBE, STOMACH, see Tube, œsophageal.

TUBE, VOCAL, *Tuba vocalis*. The part of the air passages above the inferior ligaments of the larynx, including the passages through the nose and mouth.

TUBER, Hump, *Lycoperdon tuber*, *Tubercle*—t. *Annulare*, *Pons varolii*—t. *Atloïdo-occipital*, *Rectus capitis posticus minor*—t. *Cervinum*, *Ela-phomyces granulatus*—t. *Cibarium*, *Lycoperdon tuber*.

TUBER CINE'REUM, *T. C. cum Infundib'ulo*. A grayish tubercle, seen at the base of the brain behind the commissure of the optic nerves, which is continuous with the infundibulum.

TUBER CORPORIS CALLOSI, see *Corpus callosum*.

TUBER FRONTALE, *Frontal protuberance*—t. *Gulosorum*, *Lycoperdon tuber*—t. *Gutturosum*, *Bronchocele*—t. *Ischio-trochantérien*, *Quadratus femoris*—t. *Ischii*, see *Ischiatic*—t. *Nigrum*, *Lycoperdon tuber*—t. *Parietalis*, see *Parietal Bones*—t. *Pellagra*, *Pellagra*—t. *Tympani*, *Promontory of the tympanum*.

TUBERA TERRÆ, *Lycoperdon tuber*.

TUBERCLE, *Tuberculum*, *Tuber*, *Strangal-ion*, *Stran'galis*, *Tuber'culous deposit*, (vulg.) a *Kernel*, a *Knot*, (F.) *Tubercule*. A tumour in the substance of organs, from the production of new matter;—sensation null; growth sluggish. In *Pathological Anatomy*, the term is generally given to a species of degeneration which consists of an opaque matter, of a pale yellow colour: this, in its crude condition, has a consistence analogous to that of concrete albumen: it subsequently becomes soft and friable, and gradually acquires a consistence and appearance analogous to those of pus. Tubercles may be developed in different parts of the body; but they are most frequently observed in the lungs and mesentery. Pulmonary tubercles, *Pneumophymata*, *Tuber'cula Pulmonum*, (F.) *Tubercules pulmonaires*, are the cause of *Tuber'cular Phthisis*. *Mesenteric tubercles* are often met with in the same affection, but particularly in *Tabes Mesenterica*. Laënnec classes tubercles among the accidental tissues, which have no resemblance to the natural tissues, and which never exist except in consequence of morbid action. Others consider them as a scrofulous degeneration. Broussais conceives that they are produced exclusively by inflammation of the white vessels, whose existence, however, is more than questionable. When tubercles in any organ are few in number, they may pass to the state of permanent induration without danger to the patient; but when they are very numerous, they usually cause serious mischief. Dr. Baron considers that they are produced by hydatids. The morbid condition which gives rise to the development of tubercles, *Tuberculization*, is termed *Tuberculo'sis*, *Morbus tuberculo'sus*, *Strumosis* seu *Phymato'sis pulmonum*, and *Dyscrasia Tuberculo'sa*. Tubercles are seen of various forms,—to wit, in fine points, (F.) *Poussière tuberculeuse*, gray and yellow granu-

lations, miliary tubercles; and gray and yellow tubercular masses, softened, and cretaceous.

TUBERCLE, BLACK, *Melanosis*—t. *Painful subcutaneous*, see *Neuroma*.

TUBERCLES OF THE AREOLA, see *Mamma*.

TUBERCLES, PEARLY, *T. sebaceous miliary*, *Follicular elevations*. Small collections of sebaceous matter in the sebaceous glands or ducts, often seen in the thin skin of the lower eyelids, where they sometimes attain an inconvenient size.

TUBERCLES, SEBACEOUS MILIARY, T. pearly.

TUBER'CUA ARANTII, *Corpora seu Cupus'cula Arantii*, *Tubercles of Arantius* or *Aranzi*. Small eminences at the middle part of the convex edge of the semilunar valves of the pulmonary artery and aorta.

TUBERCULA ARTHRITICA, *Calculi*, *arthritic*—t. *Cerebri*, *Encephalophymata*—t. *Gonorrhœica*, *Gonorrhœa impura*—t. *Hepatis*, *Hépatostromosis*—t. *Intestinorum*, *Enterophymata*—t. *Nervorum nodosa*, *Ganglions, nervous*—t. *Parva dura matris*, *Glandulæ Pacchioni*—t. *Peritonæi*, *Cœliophymata*—t. *Pulmonum*, see *Tubercles (of the lungs)*—t. *Quadrigenina*, *Quadrigenina Tubercula*.

TUBER'CLAR, *Tuber'culous*, *Tuberculo'sus*, *Tuber'culate*, *Tuber'culated*, (F.) *Tuberculeux*, *Tuberculé*. That which relates to tubercles, or which is formed by tubercles.

TUBERCULAR or TUBERCULOUS CONSTITUTION or DIATHESIS, *Phthisiosis*, is the habit of body which predisposes to tubercular phthisis; as *Tuberculous Cachexia*, *Tuberculo'sis*, *Morbus tuberculo'sus*, *Dyscrasia tuberculo'sa*, is the condition of one labouring under tuberculosis.

TUBERCULAR MATTER. A morbid production, contained in cysts, or loose in the tissue of organs. It varies, in its consistence, at the different periods of the tubercular affection: being, at first, compact, and yellowish; at times, calcareous; afterwards putaccous, semi-fluid, and curdy. See *Tubercle*.

TUBERCULAR PHTHISIS is that produced by the development of tubercles in the lungs.

TUBERCULAR SORE THROAT, *Pharyngitis follicular*.

TUBERCULATE, *Tubercular*.

TUBERCULATE SARCO'MA of AB'ERNETHY, *Emphy'ma Sarcoma tuberculo'sum*, *Tumor tuberculosus*. Tubercles, firm, round, and clustering; pea-sized or bean-sized; yellowish or brownish-red; when large, disposed to ulcerate, and produce a painful, malignant, and often fatal sore. Found chiefly in the lymphatic glands of the neck; often, simultaneously, in other glands and organs.

TUBERCULATED, *Tubercular*—t. *Liver*, *Cirrhosis*.

TUBERCULE, *Tubercle*.

TUBERCULÉ, *Tubercular*.

TUBERCULES BIJUMEAUX, *Quadrigenina tubercula*—t. *des Glandes lymphatiques*, *Scrofula*—t. *du Foie*, *Hépatostromosis*—t. *des Ganglions Mésentériques*, *Tabes mesenterica*—t. of the *Larynx* and *Fauces*, *Pharyngitis follicular*—t. *Miliary*, see *Granulation*—t. *Pisiformes*, *Mamillary tubercles*—t. *Pulmonaires*, see *Tubercle*—t. *Quadrigenaux*, *Quadrigenina corpora*.

TUBERCULEUX, *Tubercular*.

TUBERCULITIS. A word of hybrid formation; from *tuberculum*, 'a tubercle,' and *itis*, denoting inflammation. Inflammation of a tubercle or of tubercular masses.—Jos. Frank.

TUBERCULIZATION, see *Tubercle*.

TUBERCULOSIS, see Tubercle, and Tuberculo-cachexia—t. Laryngis et Tracheæ, Phthisis laryngea—t. Pulmonum, Phthisis pulmonalis—t. Vertebrarum, Vertebral disease.

TUBERCULOSUS, Tubercular.

TUBERCULOUS, Tubercular—t. Deposit, Tubercle—t. Disease of the Lungs, Phthisis pulmonalis—t. Dust, *Poussière tuberculeuse*.

TUBERCULUM, diminutive of *tuber*, Tubercle.

TUBERCULUM CINE'REUM, 'Ash coloured tubercle;' *Fusci'ola cine'rea*. A mass of cineritious substance at the top of the calamus scriptorius, which is continuous below with the posterior horn of cineritious substance in the cord, and upon the sides with the corpus testiforme.

TUBERCULUM LACHRYMALE, see Lachrymal puncta—t. Lower, Lower, tubercle of.

TUBEROSITAS, Tuberosity—t. Tympani, Promontory of the tympanum.

TUBÉROSITÉ BICIPITALE, Bicipital tubercle—t. *Sciaticque*, see Ischiatic.

TUBEROSITY, *Tuberositas*, (F.) *Tubérosité*, from *tuber*, 'a bump.' Anatomists have given this name to an eminence or process, the surface of which is unequal and rough; and which gives attachment to muscles or ligaments.

TUBES OF FERREIN, see Uriniferous Tubes.

TUBI MEMBRANACEI, see Villous membranes.

TUBULAR, *Tubularis*, *Tubulosus*, (F.) *Tubuleux*, *Tubulaire*. Same etymon as the next. Relating to or having the form of a small tube. An epithet applied to glands—*Glan'dulæ tubulo'æ*, which, like those of the stomach, have the shape of small tubes.

TUBULAR BLOWING SOUND, see Murmur, respiratory—t. Neurine, see Neurine—t. Substance of the Kidney, see Kidney.

TUBULE, *Tubulus*; diminutive of *Tuba*, 'a tube.' A small tube.

TUBULEUX, Tubular.

TUBULI BELLINI, Uriniferous tubes—t. Contorti, see Uriniferous tubes—t. Duræ matris, Sinus of the dura mater—t. Ferreini, see Uriniferous tubes—t. Nervi, Nerve fibres—t. Pelvis renum, see Calix—t. Recti, see Rete testis and Uriniferous tubes—t. Seminiferi, see Testicle—t. Seminales, see Testicle—t. Uriniferi Bellini, Uriniferous tubes.

TUBULOSUS, Tubular.

TUBULUS, Cannula—t. Centralis Modiolii, see Tractus spiralis foraminulentus.

TUBUS ACUSTICUS, Ear-trumpet—t. Alimentarius, Canal, alimentary—t. Intestinorum, Canal, alimentary—t. Nervorum, Neurilemma—t. Pollinicus, see Pollen—t. Vermicularis cæci, Appendix vermiformis cæci.

TUCKAHO, Lycoperdon tuber.

TUE-CHIEN, Colehæum autumnale.

TULBAG'HIA ALLIA'CEA. A South African plant, *Nat. Ord.* Asphodelæ, the bulbs of which, boiled in milk, are recommended in phthisis and as an anthelmintic.

Tulbaghia cepa'cea and *T. viola'cea*, serve the same purpose.

TULIP, CAPE, *Homeria collina*—t. Tree, *Liriodendron*.

TULPIER, *Liriodendron*.

TULIPIFERA LIRIODENDRON, *Liriodendron tulipifera*.

TUMEFACTIO, Swelling—t. Mollis, Puffiness. **TUMESCENCIA PITUITOSA**, Leucophlegmatia.

TUMEUR, Tumour—t. *Anomale*, see Hæmatodes fungus—t. *Blanche*, Hydrarthrus—t. *Carverneuse*, see Hæmatodes fungus—t. *Encéphaloïde*, Encephaloid—t. *Érectile*, see Hæmatodes

fungus—t. *Fongôïde*, Encephaloid—t. *Fongueuse*, Encephaloid—t. *Hémorrhagiale circonscrite*, see Aneurism—t. *Lymphatique des articulations*, Hydrarthrus—t. *Ossivore*, Encephaloid—t. *Pulpeuse*, Encephaloid—t. *Spléniforme*, Encephaloid—t. *Spongieuse*, Encephaloid—t. *Variqueuse*, see Hæmatodes fungus.

TUMOR, Swelling, Tumour—t. Albus, Hydrarthrus—t. Anomalous, Hæmatodes fungus—t. Artuum, Obdormitio—t. Capitis Sanguineus, Cephalæmatoma—t. Carneus, Sarcoma—t. Cysticus, Encystis—t. Cysticus serosus, Hygroma—t. Desmoides, Tumour, fibrous—t. Fibrosus, Tumour, fibrous—t. Ficosus, Ficus—t. Flatulentus, Emphysema—t. Fugax, see Fugacious—t. Fungosus articuli, Spina ventosa—t. Fungosus sanguineus, Hæmatodes fungus—t. Gangliiformis, Ganglion, nervous—t. Genarum, Meloncus—t. Genu albus, Genocæce—t. Glandulæ parotidæ, Parotidoneus—t. Lacteus, Galactocœle—t. Lardeus, Steatoma—t. Malarum, Meloncus—t. Ovarii, Oarioncus—t. Parotidis, Parotidoneus—t. Prostatæ, Prostatoneus—t. Renalis, Nephroncus—t. Sanguineus, Hæmatoma—t. Squamiformis carnosus, Lepidosarcoma—t. Tubereulosus, Tuberculæ sarcoma—t. Tunicatus, Encystis—t. Uteri, Hysteroneus.

TUMOUR, from *tumeo*, 'I swell;' *Tumor*, *Oncos*, *Oncus*, *Epar'na*, *Eparis*, *Emphy'ma*, *Excre'scentia* (Sauvages), *Ephy'ma*, (Se.) *Svalme*, (F.) *Tumeur*. A rising or prominence, of greater or less size, developed by a morbid cause in some part of the body. Cullen defines a tumour to be "a partial swelling without inflammation." Sauvages restricts the term to a rising formed by the congestion of a fluid; and he calls *excre'scences* those which have a fleshy or osseous consistence. Boyer defines it "any preternatural eminence developed on any part of the body." Good uses it synonymously with tubercle. Boyer's is the best general definition. Tumours differ greatly from each other; according to their seat, the organs interested, their nature, &c.

The French use the term *Tumeur blanche* synonymously with *White Swelling*;—see Hydrarthrus. The term is, however, applied by the generality of surgeons to swellings of the greater joints, without change of colour of the skin, and of a more or less firm consistence, which are dependent upon disease of the osseous or of the soft parts about the joint.

Scrofula is the most common cause of these affections.

TUMOUR, CELLULO-FIBROUS, Tumour fibro-cellular—t. Epithelial, see Epithelial.

TUMOUR, FIBRO-CELLULAR, *Cellulo-fibrous tumour*. A soft and elastic form of fibrous tumour, a variety of the *gelatinous sarcoma* of Rokitansky, of which the softer kind of polypus of the nose is an example.

TUMOUR, ERECTILE. A tumour produced by the development of a soft, vascular tissue, which is susceptible of elevation and depression. See Erectile.

TUMOUR, FIBRO-PLASTIC, Sarcoma.

TUMOUR, FIBROUS, *Fibrous growth*, *Fibro'ma*, *Fibroïd*, *Inc'ma*, *Tumor fibro'sus seu desmoides*, *Inohylo'ma*. A tumour or growth formed of fibrous tissue.

TUMOUR, LAMINATED NACREOUS FATTY, Cholesteatoma—t. Milk-like, Encephaloid—t. Phantom, see Fantom.

TUMOUR, VARICOSE, *Tumor varico'sus*. A circumscribed, bluish tumour, formed by the dilatation and turgescence of the capillary vessels of a part.

TUMOUR, VASCULAR, see Hæmorrhoids and Nævus.

TUNAS, see Cactus opuntia.

TUNBRIDGE, MINERAL WATERS OF. A celebrated acidulous chalybeate in Kent, England, a few miles distant from the village of Tunbridge, and thirty-six miles south of London, which is much frequented. It contains carbonic acid, carbonate of iron, and sulphate of magnesia.

TUNDA OCULI, Conjunctiva membrana.

TUNDUS CORDIS, Mucro cordis.

TUNIC, *Tunica, Chi'ton, a coat.* An envelope. A name given to different membranes, which envelop organs; as the tunics or coats of the eye, stomach, bladder, &c.

TUNICA ACINALIS, Uvea — t. Aciniformis, Uvea — t. Acinosa, Uvea — t. Adnata, Conjunctiva — t. Adventitia, see Artery — t. Agnata, Conjunctiva — t. Alba oculi, Sclerotic — t. Albuginea, Albuginea, see Kidney — t. Albuginea oculi, Sclerotic — t. Allantoides, Allantois — t. Arachnoides, Arachnoid membrane — t. Aranea, Arachnoid membrane — t. Caduca, Decidua — t. Candida oculi, Sclerotic — t. Carnosa, Panniculus carnosus — t. Cellularis, see Artery — t. Conjunctiva, Conjunctiva — t. Costalis, Pleura — t. Crassa, Decidua — t. Crystallina, Arachnoid membrane — t. Dartos, see Dartos — t. Dura oculi, Sclerotic — t. Durior et crassa, Sclerotic — t. Elastica, see Artery — t. Elytroides, Vaginalis tunica — t. Erythroides, Cremaster — t. Exterior ovi, Decidua — t. Externa, see Artery — t. Extima oculi, Sclerotic — t. Farcinialis, Allantois — t. Fibrosa, see Folliculi Graafiani — t. Filamentosa, Decidua — t. Glabra, see Artery.

TUNICA GRANULOSA. An investment of the ovum exterior to the zona pellucida, described by Dr. Barry, but the existence of which, as a structure, distinct and independent from the membrana granulosa, is denied.

TUNICA HORTENSIS, Dianthus caryophyllus — t. Innominata oculi, Sclerotic — t. Interna oculi, Retina — t. Intima, see Artery.

TUNICA JACOBI, *Membrana Jacobi, Jacob's coat or membrane.* A highly delicate serous membrane, interposed between the retina and the choroid coat, discovered by Dr. Jacob, of Dublin. Its structure is curious, being composed of cylindrical, transparent, highly refractive staff-shaped bodies, and hence called *Stratum bacillarum* seu *bacilla'tum, Bacillar layer of the retina,* which are arranged perpendicularly to the surface of the retina, their outer extremities being imbedded, to a greater or less depth, in a layer of the pigmentum nigrum.

TUNICA MEDIA, see Artery — t. Muscularis, Dartos — t. Nervea oculi, Retina — t. Nervorum, Neurilemma — t. Perforata, Uvea — t. Præterosa abdominis, Peritonæum — t. Propria, see Kidney — t. Reticularis, Retina — t. Retiformis, Retina — t. Rhagoïdes, Choroidea tunica, Uvea — t. Rubicunda seroti, Dartos — t. Rubra, Dianthus caryophyllus — t. Ruyschiana, see Choroid — t. Subcostalis, Pleura — t. Thoracis, Corset — t. Uvalis, Uvea — t. Uvea, Uvea — t. Uviformis, Uvea — t. Vaginalis, see Vaginal — t. Vaginalis Lingnæ, see Tongue — t. Vaginalis Propria, Vaginal coat of the Testicle — t. Vaginalis reflexa, Vaginal coat of the Testicle — t. Vaginalis testis, see Testicle — t. Vasculosa oculi, Choroid, see Eye.

TUNICA VASCULOSA TESTIS, *Pia mater testis.* An extremely delicate membrane, consisting of minute ramifications of the spermatic vessels united by areolar tissue, which separates the lobules of the testis from each other. It is situated immediately within the tunica albuginea, and encloses the substance of the gland. It sends processes inward that separate the lobules, in the same manner as the pia mater is reflected between the convolutions of the brain.

TUNICA VITREA, Hyaloid membrane.

TUNICULA, Clitoris.

TUNIQUE ALBUGINÉE, Albuginea — t. *Commune de Bichat, Endangium.*

TUN'NELLING. A term, sometimes employed for the treatment of stricture of the urethra, by making pressure upon it from within so as to promote its removal by absorption.

TUNPHLOFISH, SALTED, Omotarichos.

TUPHLO-ENTERITIS, Typhlo-enteritis.

TUPHUS, Typhus.

TUPINARIA, Talpa.

TURBA HÆMORRHOIDALIS, see Hæmorrhoids.

TURBATIONES ANIMI, Affections of the mind.

TURBATED BONES, *Ossa turbina'ta.* Bones shaped like a top; from *turbo, turbinis* or *turben*, 'a top'; *Ossa spongio'sa, O. ter'tia maxilla superioris, Cornua, Concha na'rium seu ven'eris, Tur'bines nasi seu na'rium, Conchyl'ia, Buccin'na, Lam'in'a spongio'sæ nasi, (F.) Cornets.* Very thin, bony plates, rolled up in the form of horns, and situate in the nasal fossa. 1. *Oss spongio'sum supe'rius* or *Cornet de Morgagni*; — the highest. 2. *Oss spongiosum me'dium,* the middle cornu of French anatomists, — the *ethmoid'al cornu* or *Oss spongiosum superius seu turbinatum,* of English anatomists, *Oss convolutum superius, Concha, C. na'rium superior seu Morgagni'na, (F.) Cornet moyen.* This bone projects inwards and downwards into the cavity of the nose, from the ethmoid cells at the side of the nasal lamella, and serves to enlarge the organ of smell. It is convex towards the septum, and concave outwards. 3. *Oss spongiosum seu turbinatum inferius, Concha inferior, Convolutum inferius os, Oss sous-ethmoid'al (Ch.),* projects at the under part of the side of the nose, is convex towards the septum, and concave outwards. It is connected to the os maxillare, os palati, and os unguis. 4. *Sphenoid'al cornu.*

All the turbinated bones extend the olfactory surface.

TURBINES NASI SEU NARIUM, Turbinated bones.

TURBITH BLANC, Globularia alypum — t. Mineral, Hydrargyrus vitriolatus — t. Montpellier. Globularia alypum — t. Noir, see Hydrargyri oxydum cinereum — t. Plant, Convolutus turpethum.

TURBO CEREBRI, Pineal gland.

TURGENTIA, Turgescence.

TURGES'GENCE, *Turges'cency, Turgid'ity, Tur'gidness, Turgescen'tia, Turgen'tia, Orgas'mus,* from *turgescere*, 'to begin to swell,' *turgere*, 'to swell.' Superabundance of humours in a part. The term *Turgescence of Bile* was formerly used to denote the passage of that fluid into the stomach, and its discharge by vomiting. A vital action of turgescence or expansibility — *Turgor vitalis* — has been presumed to exist in certain organs, as in the capillaries; but the generality of physiologists do not admit it.

TURGESCENTIA, Turgescence.

TURGESCENTIA VESICULÆ FELLÆ, *Ascites Hep'ato-cys'ticus, Physco'nia seu Cystocel'e bili'o'sa, Hepatal'gia Petiti'na, Hydrocholecyst'is, Hydrops vesic'æ fell'æ, (F.) Hydrophisie de la Vésicule du Fiel, Distension de la Vésicule du Fiel, Cholécystictasie.* Distension of the gall-bladder by bile.

TURGIDITY, Turgescence.

TURGIDNESS, Turgescence.

TURGOR VITALIS, see Turgescence.

TURMERIC, *Curcuma longa, Sanguinaria Canadensis.*

TURN OF LIFE, see Menses.

TURNING, *Versio,* from (F.) *turner*, 'to turn.' (F.) *Versio.*

VERSIO FÆTUS. The operation of bringing

down the feet, or some part of the lower extremity, when the presentation of the child is such that it cannot be delivered by the natural efforts.

TURNIP, *Brassica rapa*—t. Dragon, *Arum triphyllum*—t. Indian, *Arum triphyllum*—t. Pepper, *Arum triphyllum*.

TURNS, Menses.

TURPENTINE, *Terebinthina*—t. Bordeaux, see *Pinus sylvestris*—t. Briançon, see *Pinus cembra*—t. Chio, see *Pistacia terebinthus*—t. Common, see *Pinus sylvestris*—t. Common, American, see *Pinus sylvestris*—t. Cyprus, see *Pistacia terebinthus*—t. Damarra, see *Pinus damarra*—t. Dombeya, see *Dombeya excelsa*—t. Horse, see *Pinus sylvestris*—t. Strasburg, see *Pinus picea*.

TURPENTINE TREE, *Pistacia terebinthus*.

TURPENTINE, VENICE, see *Pinus larix*—t. Venice, true, see *Pistacia terebinthus*—t. White, see *Pinus sylvestris*.

TURPETHUM, *Convolvulus turpethum*—t. Minerale, *Hydrargyrum vitriolatum*—t. Nigrum, *Hydrargyri oxydum cinereum*.

TURQUETTE, *Herniaria glabra*.

TURQUOISE. This stone has been long imagined to change its colour, according as the wearer is at the time in good or bad health:—a superstitious notion.

TURTLE BLOOM, *Chelone glabra*—t. Green, *Chelonia mydas*—t. Head, *Chelone glabra*.

TURUNDA, Tent.

TURUNDÆ ITALICÆ. Pastes made of the finest and most glutinous wheat—known under the names of *Maccaroni*, *Vermicelli* and *Italian* or *Cagliari paste*.

TURUNDULA, Tent.

TUSCARORA ACID SPRING, see Canada, mineral water of.

TUSSACA RETICULATA, *Goodyera pubescens*.

TUSSEDO, Tussis.

TUSSICULA, Tussis.

TUSSICULAR, *Tussicula'ris*, *Tussiculo'sus*, from diminutive of *tussis*, 'a cough.' Relating to a cough, or to a slight cough.

TUSSICULOSUS, Tussicular.

TUSSILA'GO, *T. Far'fara seu vulga'ris*, from *tussis*, 'a cough,' which it relieves; *Be'chium*, *Be'chion*, *Cal'ceum equi'num*, *Chama'leu'cē*, *Chama'gei'ron*, *Fil'ius ante patrem*, *Farfare'la*, *Galliomarchus*, *Farfara*, *F. Be'chium*, *U'ngula caballi'na*, *Coltsfoot*, *Foal-foot*, (F.) *Pas d'âne*, *Herbe de Saint-Quirin*. Ord. Compositæ. Sex. Syst. Syngenesia Polygamia Superflua. It is demulcent and expectorant, and has been used in coughs, and pulmonary affections in general, and in some cutaneous diseases.

TUSSILAGO FARFARA, *Tussilago*—t. *Hybrida*, *T. petasites*.

TUSSILAGO PETASITES, *T. hybrida seu petasites hermaphrodita*, *Petasites*, *P. major seu rubens seu officinalis seu hybridus seu vulga'ris*, *Butterbur*, *Pestilent-wort*. The roots of this plant have been recommended as aperient and alexipharmic. They have a strong smell; and a bitterish, acrid taste, of the aromatic kind, but not agreeable.

TUSSILAGO PETASITES HERMAPHRODITA, *T. petasites*—t. *Vulgaris*, *Tussilago*.

TUSSIS—diminutive, *Tussic'ula*; *Begma*, *Bez*, *Tusse'do*, *Becis*, *Tussis nervo'sa*, *Catar'rhus*, *Pneusis Tussis*, *Cough*, *Coughing*, (Prov.) *Couf*, (Sc.) *Hoast*, *Hoist*, (F.) *Toux*. A violent, sonorous, frequent, and short expiration, by means of which the air, in passing rapidly through the bronchia and trachea, carries along with it the mucus of the parts, which forms the sputa. The cough is said to be *dry*, when unaccompanied by expectoration. It is symptomatic of many diseases. See *Bronchitis*.

TUSSIS AMPHEMERINA, *Pertussis*—t. *Asinina*, *Pertussis*—t. *Bronchica*, *Cough*, *tubal*, see *Bronchitis*—t. *Canina*, *Pertussis*—t. *Catarrhalis Simplex*, *Catarrh*—t. *Clamosa*, *Pertussis*—t. *Clangosa*, *Pertussis*—t. *Convulsiva*, *Pertussis*—t. *Delassans*, *Pertussis*—t. *Ferina*, *Pertussis*—t. *Pueros strangulans*, *Pertussis*—t. *Quinta*, *Pertussis*—t. *Senilis*, *Bronchitis (chronic)*—t. *Spasmodica*, *Pertussis*—t. *Stomachalis*, *Pertussis*—t. *Suffocans*, *Pertussis*—t. *Suffocativa*, *Pertussis*—t. *Tussiculosa*, *Pertussis*.

TUSSIVE; *Tussiv'vus*; from *tussis*, 'cough.' Belonging or relating to cough:—as *tussive* vibration; the vibration of the parietes of the chest, caused by coughing.

TUTAM'INA, pl. of *Tutamen*, 'a defence,' 'a protection,' from *tutare*, 'to defend.' Parts are so called which defend or protect each other.

TUTAMINA CEREBRI are the scalp, pericranium, bones of the skull, and the meninges.

TUTAMINA OCULI are the eyebrows, eyelids, and lachrymal apparatus.

TUTENAG, Zincum.

TUTHIA, Tutia.

TUT'IA, *Pom'pholyx*, *Cadmia*, *Alfusa*, *Mesera*, *Caput'itis*, *Tuthia*, *Oxydum zinci impurum*. The oxyd of zinc that attaches itself to the chimneys of furnaces in which ores of zinc are smelted. It is in the form of gray incrustations; and is sometimes used for making an eye-salve. It is prepared, for this purpose, by levigation.

TUTTERING, Stuttering.

TWIGG'S HAIR DYE, see Hair dye.

TWIN, Gemellus.

TWINGE, see Pain.

TWINKLING OF THE EYE, Nictation.

TWINLEAF, COMMON, *Jeffersonia Bartoni*.

TWINROOT, *Orehis*.

TWINS, SIAMESE. Two brothers, Chang and Eng, connected by means of a ligamentous band passing from the epigastrium of one to that of the other, who were exhibited in various parts of Europe and America, about the year 1830. They have lived in North Carolina, are married, and have children. See *Xiphopages*.

TWITCH-GRASS, *Triticum repens*.

TWITCHING, Tic.

TYCH'ICA, from *τυχη*, 'accident.' Fortuitous lesions or deformities. The 7th class of Good's *Nosology*.

TYLE, Callosity.

TYLOMA, Callosity.

TYLOPH'ORA ASTHMAT'ICA, *Asclepias asthmatica*, *Cyan'chum Ipecacuan'ha seu vomitorium seu viridiflorum seu tomentosum*, *Ipecacuanha of the Isle of France*, (F.) *Ipecacuanha blanc de l'Île de France*. Order, *Asclepiadaceæ*. A native of various parts of the East Indies, both of the continent and islands. The root is acrid, and is used on the coast of Coromandel as a substitute for *ipecacuanha*. In large doses, it is emetic; in smaller, often repeated, it is cathartic. It is recommended, also, as a diaphoretic, and especially in humeral asthma.

TYLOSIS, Callosity.

TYLUS, Callosity.

TYMMA, Wound.

TYM'PAN, Tympanum.

TYMPANAL, Tympanic.

TYMPANAL, *Cadre du tympan*.

TYMPANIA, Tympanites.

TYMPANIAS, Tympanites.

TYMP'PANIC, *Tympanicus*, *Tym'panal*, (F.) *Tympanique*; same etymon as *Tympanum*. Relating to the tympanum, as 'tympanic canal.'

TYMPANIC NERVE, see *Petrus ganglion*.

TYMPANIQUE, Tympanic.

TYMPANITA, Tympanites.

TYMPANITE, Tympanites.

TYMPANITES. *Empysemæ seu Pneumato-sis Abdominis, Hydrops Tympanites, Affectio tympanitica, Ectympanosis, Hydrops abdominis œreus, Aërosis, Aëro-enterectasia, Aërenterectasia, Enterærectasia, Physocœlia, Tympanosis, Physema, Physesis, Hydrops siccus et flatulentus, Tympania, Tympanias, Tympanita, Tympanitis, Empysemæ Tympanites, E. Tympaniticum, Meteorismus, Tympany, Metœorism, Wind dropsy, (F.) Tympanite, Pneumotose péritonéale, Ballonnement, from τυμπανον, 'a drum;' so called because the abdomen is distended with wind, and sounds like a drum when struck. A swelling of the abdomen, caused by accumulation of air in the intestinal tube or in the peritoneum. Tympanites may be idiopathic or symptomatic. The former depends upon exhalation of air from the inner surface of the intestine, or from the decomposition of substances contained in it; the latter is the result of some organic affection, and often depends upon obliteration of the digestive tube, which prevents the gas from escaping. Idiopathic tympanites may be more readily cured. The symptomatic is usually fatal. On dissection in such cases, the stomach and intestines are found enormously distended; with strangulation or disorganization of some part of the mucous membrane of the intestine. Carminatives may be proper when tympanites depends upon atony of the digestive organs: but, in cases of the symptomatic kind, they cannot be productive of advantage, and may do harm.*

Sometimes the air is contained in the cavity of the peritoneum—constituting *Tympanites abdominalis, Aëropéritonie*, of some:—the accumulation in the intestines being called *Tympanites intestinalis*.

TYMPANITES, UTERINE, Physometra.

TYMPANITIS, *Inflammatio tympani*; from τυμπανον, 'a drum,' and *itis*, denoting inflammation. Inflammation of the lining membrane of the middle ear. Also, tympanites.

TYMPANOSIS, Tympanites.

TYMPANUM, τυμπανον, 'a drum.' The *Drum* or *barrel of the ear*. The *narrow Cavity of the Tympanum* or of the *Drum, Cavitas seu Cœcum Tympani, Antrum seu cavitas auro'sa Auris*, (F.) *Tympan, Cavité du tympan, Cuisse du tambour* or *du Tympan*—have been given to a cavity of an irregular shape, which constitutes the middle ear, and has been compared to a drum. It is situate in the pars petrosa of the temporal bone, between the meatus auditorius externus and the labyrinth. This cavity is lined by a mucous membrane; and communicates, externally, by means of the Eustachian tube, which is situate between it and the pharynx. The tympanum has six parietes. 1. An *external*, which is almost entirely formed of the *Membrane of the Drum, Membrana tympani, Diaphragma seu Mediastinum seu Tegumentum auris, Myringa, Myrina*, (F.) *Membrane du tympan*—a species of thin, transparent, circular septum; convex within, and concave without, which closes the inner extremity of the meatus auditorius. 2. An *internal*, on which are the *Fenestra ovalis, Promontory, and Foramen rotundum*. 3. A *superior*. 4. An *inferior*, on which is the *glenoid fissure*. 5. A *posterior*, on which are the opening of the mastoid cells, and the pyramid. 6. An *anterior*, on which are the *Processus cochleariformis* and the inner orifice of the *Eustachian tube*. The cavity of the tympanum is crossed by a series of four small bones, articulated with each other by diarthrosis, moved by certain muscles, and representing a kind of bent lever extending from the membrana tympani to the fenestra ovalis. They are called

the *Bones or Ossicles of the Ear*, and are the malleus, incus, os orbiculare, and stapes.

For the nervous plexus of the tympanum, see *Petrosal Ganglion, and Otic Ganglion*.

TYMPANUM MINUS, see *Fenestra*—t. *Secundarium*, see *Fenestra*.

TYMPANY, Tympanites—t. of the *Womb, Physometra*.

TYPE, *Typus, Periodus morbi*, from τυπος, 'a stamp,' itself from τυπτω, 'I strike.' The *type* is the order in which the symptoms of a disease exhibit themselves, and succeed each other. It may be continued, intermittent, or remittent.

TYPHA ANGUSTIFOLIA has the same properties as

TYPHA AROMATICA, *Acorus calamus*, and

TYPHA LATIFOLIA, (τυπος, 'a marsh,' [?]). *Cat-tail Reed mace, Bulls-egg, (F.) Massette, Masse* ou *Quenouille d'Eau*. A plant common in marshes and ponds, in this country and Europe. *Ord. Typhacæ. Sex. Syst. Monœcia triandria*. Its roots have been used in dysentery and blenorragia. The young shoots, before they reach the surface of the water, when boiled, taste like asparagus.

The down, (F.) *Aigrette, Poils*, which accompanies the flowers, has been applied to burns like cotton.

TYPHICUS, Typhoid.

TYPHIQUE, Typhoid, Typhus.

TYPHLITIS, Typhlo-enteritis.

TYPHLO-ENTERITIS, *Typhlo-enteritis, Typhilitis, Typhloteritis, Inflammatio Cæci, Phlegmonous Tumor of the Cæcum, (F.) Inflammation du Cæcum, Cæcite (Piorry)*; from τυφλος, *cæcus*, and *enteritis*, 'inflammation of the intestines.' Inflammation of the cæcum, occasionally leading to perforative ulceration.

TYPHLOENTERUM, Cæcum.

TYPHLOPS, Cæcus.

TYPHLOSIS, Cæcitas.

TYPHLOTERITIS, Typhlo-enteritis.

TYPHLOTERON MONOCOLON, Cæcum.

TYPHLOTERUM, Cæcum.

TYPHLOTES, Cæcitas.

TYPHODES, Typhoid.

TYPHOËMIE ENTÉRIQUE, see Typhus.

TYPHOHÆMIA, see Putrefaction.

TYPHOID, *Typhoïdes, Typhoïdes*, (τυφωδης, 'stupefied,') *Typhicus, Typhosus, Lactica*, (F.) *Typhique, Typhoïde, Typhode*. From *typhus*, and *oides*, 'resemblance.' Appertaining to or resembling typhus; as *Typhoid Fever*. Also, according to some, *Typhous Fever*, typhus. Fuchs has employed the word *Typhoïde* for a family of diseases, to distinguish them from *Phlogoses*: of this family, *Stomacæe, Pharyngocæe, and Pneumocæe* are examples.

TYPHOID AFFECTION, see Typhus—t. *Fever of India, Cholera*.

TYPHOMANIA, from τυφος, 'stupor,' and *mania*, 'delirium.' *Delirium with stupor, Subdelirium*. The kind of delirium common in typhus.

TYPHOMANIA, *Coma vigil, Insomnia*.

TYPHONIA, *Coma vigil*.

TYPHOSEPSES, Typhoseptoses.

TYPHOSEPTOSES, *Typhosep'ses*, from τυφος, and *σηψις*, 'putrefaction.' Typhous affections.

TYPHOSUS, Typhoid.

TYPHOUS, *Typhosus, (F.) Typhique*. Same etymon as Typhus. Belonging or relating to typhus.

TYPHOUS DEPOSIT. A peculiar substance of new formation found in the areolar membrane, between the mucous and muscular coats of the patches of Peyer in typhoid fever.

TYPHOUS FEVER, see Typhoid.

TYPHUS, *Semipes'tis*, *Typhus*, *Febris Typho-*
des seu athen'ica seu adynam'ica, *Asthenop'gra*,
 (F.) *Fièvre adynamique ou ataxique ou adynami-*
que ataxique, *Typhus d'Europe*; from τυφος,
 'stupor.' A fever characterized by small, weak,
 and unequal, but usually frequent pulse, with
 great prostration of strength, and much cerebral
 disturbance; its duration being usually from a
 fortnight to three weeks or longer. It is con-
 tinued fever, accompanied with great cerebral
 irritation and prostration. (See Fever.) By most
 writers, this disease has been divided into two
 varieties—the *Typhus mitior* and *Typhus gravior*.
 ΤΥΦΟΣ ΜΙΤΤΙΟΡ seu *simplex seu nervosus seu*
comatosus, *Febris lenta nervosa seu putrida*
nervosa seu hec'tica maligna nervosa, *Blechrop'-*
yrus, *Neurop'gra*, *Neuropyr'etus*, *Nervous fever*,
 (F.) *Fièvre nerveuse*, is characterized by slight
 shiverings, heavy, vertiginous headach; great op-
 pression, peculiar expression of anxiety, nausea,
 sighing, despondency, and coma or quiet delirium.
 ΤΥΦΟΣ ΓΡΑΒΙΟΡ seu *car'cerum seu castren'sis*

bell'ica, *True* or *Exanthemat'ic* or *contagious*
typhus, *Nervous fever with exanthematous erup-*
tion, *Putrid*, *Jail*, *Hospital* or *Ship Fever*, (F.)
Fièvre des Camps, *F. nautique*, *F. d'hôpital*,
F. nosocomiale, *F. des Prisons*, *F. lenticulaire*,
Typhus contagieux is attended with rigors and
 heat, alternating; little or no perspiration; pulse,
 tense and hard, usually quick, but fluttering;
 pain over the forehead and vertex; a 'mulberry
 rash,' appearing on the fifth to the seventh day
 of the disease, and lasting till the end; delirium
 succeeded by stupor, signs of incipient putres-
 cency,—as true petechiæ, vibices, hemorrhages,
 &c. Typhus, under particular circumstances,
 seems to be communicable by contagion; but if
 proper attention be paid to cleanliness and venti-
 lation, there is not much danger of communica-
 tion. The general principles of treatment, laid
 down under the head of Fever, are applicable
 here. All the varieties of continued fever re-
 semble each other in the cardinal points, al-
 though they may differ in many of their char-
 acters. Ventilation and cleanliness; warm or
 cold abluion or sponging; keeping the bowels
 free; and attending to symptoms as they may
 rise, and the avoiding of all irritation of every
 kind, are the main indications. When symptoms
 of great prostration occur, the strength must be
 supported by wine; and tonics be exhibited, with
 the mineral acids. Of the tonics, the sulphate
 of quinia is perhaps as good as any, whilst it is
 free from the objection which applies to most
 others,—of being too bulky. In the whole man-
 agement of this affection, however, the physician
 has to discriminate carefully between oppression
 and prostration. The former may require euan-
 cants; the latter cannot.

Of late years, it has been maintained by many,
 that there is an essential difference between
 typhoid fever and typhus: that the former is an
 abdominal affection, and dependent upon, or con-
 nected with, an inflamed or ulcerated condition
 of the mucous follicles of the intestines; hence
 it has received the names *Fièvre mésentérique*, *F.*
typhoïde, *Maladie ou Affection typhoïde*, *F. entéro-*
mésentérique, *Eutérite typho-hémique*, *Typhoémie*

entérique, *Entéro-mésentérique typhoïde*, *Exanthéma*
intestinale, *Dothinentérique*, *Dothinentérite*, &c., *Ileo-*
diciidite, *Entérite folliculeuse*, *Gastro-entérite* with
 nervous affection of the brain, *Follicular gastro-*
enteritis, *F. enteritis*, *Enter'itis folliculo'sa*, *Ty-*
phus abdomina'lis, *T. intestina'lis*, *T. Sporad'icus*,
Enterotyphus, *T. ganglionaris abdomina'lis*, *Fe-*
bris intestina'lis ulcero'sa, *F. nervosa gas'trica*,
F. nervosa enter'ica, *F. enter'ica*, *F. nervosa me-*
senter'ica, *Euterhelio'sis nervosa*, *Typhus enter-*
icus, *Ileop'gra*, *Ileoty'phus*, *Typhoid affection*,
Enter'ic fever. Accompanying this form of fever
 there is generally a typhoid eruption, consisting
 of rose-red papulæ, (see Spots, red,) which appear
 mostly on the abdomen. They are distinct from
 true petechiæ, as they can be removed by pres-
 sure; and distinct also from sudamina, which are
 perhaps the universal accompaniments of sweat-
 ing, and are consequently a variety of miliaria.
 The common continued fever or synochus of
 Great Britain, and of this country, has been pre-
 sumed by some to be this variety: but farther
 observations are needed to establish the distinc-
 tions which have been attempted; and there is
 reason to believe, that the abdominal affection is
 a complication, existing in certain cases and epi-
 demics of adynamic fever, and not in others. The
Red Tongue Fever of Kentucky is considered by
 Professor Bartlett to be typhoid fever.

Certain modern French writers have considered
 the Typhus of the European continent, *Typhus*
of Europe, *pestilential fever*, *contagious typhus*,
Hungary fever, *Hospital fever*, *camp fever*, *jail fe-*
ver, *lenticular petechial fever*, (F.) *Peste d'Europe*,
 &c., to be identical with the typhoid affection.
 They admit but one fever on the European con-
 tinent—the typhoid. Typhus, they maintain—
 but by no means establish the position—to be
 peculiar to England.

TYP'IC, *Typical*, *Typ'icus*, (F.) *Typique*.
 Same etymon as *Type*. Characterized by peri-
 odicity,—as a 'typical fever;' or one which ob-
 serves a particular type.

- TYPOSES, see Periodicity.
- TYPOS, *Type*.
- TYRANNUS, see Critical days.
- TYRBASIA, Agitation.
- TYRBE, Agitation.
- TYREM'ESIS, *Tyrotrem'esis*, from τυρος,
 'cheese,' and εμεσις, 'vomiting;' *Tyro'sis*, *Ty-*
reu'sis. Vomiting of curdy matter, in infants
 especially.
- TYREUSIS, Tyremesis, Tyrosis.
- TYRIA, Porrigo decalvans.

TYRIASIS, Elephantiasis Arabica.
 TYRINE, Casein.
 TYRODES, Cheesy.
 TYROMA, Porrigo decalvans.

TYROS, Cheese.
 TYROSIS, Tyremesis. Also, the curdling of milk in the stomach; *Tyreusis*.
 TYROTEMESIS, Tyremesis.

U.

UBERIS APEX, Nipple, Papilla.
 ULA, Gingivæ.
 ULATROPHIA, from *ουλον*, 'the gum,' and *atrophia*, atrophy. Shrinking of the gums; falling away of the gums.

ULCER, *Ulcus*, genitive *Ulcus*, diminutive *Ulcusculum*; *Hulcus*, 'ελκος, *Helcos*, *Elco'sis*, *Elco'ma*, *Helcos*, *Helco'ma*, a Sore, (Sc.) *Sair*, (Prov.) *Kile*, (F.) *Uledre*. A solution of continuity in the soft parts, of longer or shorter standing, and kept up by some local disease or constitutional cause. Richerand makes four great distinctions between a wound and an ulcer. 1. A wound arises from the action of an extraneous body:—the cause of an ulcer is inherent in the economy. 2. A wound is always idiopathic:—an ulcer is always symptomatic. 3. A wound has essentially a tendency to heal, because the action of its cause has been momentary:—an ulcer, on the contrary, has a tendency to enlarge, because its cause persists. 4. The treatment of a wound is purely surgical; that of an ulcer is medical as well. The immediate cause of an ulcer is perverted nutrition; the formative cells losing their plastic properties. Ulcers have been variously divided, according to their nature;—into *simple*, *sinuous*, *fistulous*, *fungous*, *gangrenous*, *scorbutic*, *syphilitic*, *cancerous*, *invertebrate*, *serofulous*, *phagedenic*, *virulent*, *cacoëthic*, *sordid*, *carious*, *varicose*, &c. The treatment consists in removing, by appropriate means, the internal and the local causes which keep up the ulceration, and in exciting the vessels of the part, where necessary, by appropriate bandaging, &c.

ULCER, JACOB'S, Lupus—u. Malignant, Hospital gangrene—u. Putrid, Hospital gangrene—u. Warty of Marjolin, see Warty Tumour of Cicatrices.

ULCERA INTESTINALIA, Gastrelco'sis—u. Laryngis, Phthisis laryngea—u. Serpentina oris, Aphthæ—u. Uteri, see Metrophthisis—u. Ventriculi, Gastrelco'sis—u. Vesicæ, Cystophthisis.

ULCERATED, *Ulcera'tus*, *Exulcera'tus*, *Helco'des*, (F.) *Ulcéré*; from *ulcus*, *ulceris*, 'an ulcer.' In the state of an ulcer. Affected with ulcers.

ULCERATIO INTESTINALIS, Enterelco'sis—u. Ventriculi, Gastrelco'sis.

ULCERATION, *Ulcera'tio*, *Exulceratio*, *Pyogen'ia corrosi'va*. Same etymon. A superficial ulcer. The formation of an ulcer—*Exelco'sis*, *Elco'sis*, and *Helco'sis*.

ULCERATIVE, *Ulcera'tivus*, (F.) *Ulcératif*. Relating to ulceration,—as an 'ulcerative process.'
 ULCÈRE, Ulcer—u. *du Larynx*, Phthisis laryngea.

ULCÈREUX, Ulcerous.

ULCEROUS, *Ulcero'sus*, *Helco'des*, *Helcoïdes*, (F.) *Ulcéreux*. Same etymon. Having the character of an ulcer. Affected with ulcers.

ULCERS, EGYPTIAN, Ægyptia ulcera.

ULCUS, Ulcer—u. Atonicum, Rupia—u. Cacoëthes, see Cacoëthes—u. Cancrosum, Cancer, Chancre—u. Dacryodes, see Dacryodes—u. Depascens, Phagedenic ulcer—u. Ferinum, Phage-

denic ulcer—u. Fistulosum, Hypophora—u. Hypulum, see Hypulus—u. Narium foetens, Ozæna—u. Obambulans, Phagedenic ulcer—u. Pulmonum, Phthisis pulmonalis—u. Sinuosum, Hypophora—u. Syriacum, Cynanche maligna—u. Telephium, Telephium—u. Tuberculosum, Lupus—u. Uteri, Hysterelco'sis, Leucorrhœa.

ULCUSCULA PRÆPUTII, Herpes præputii.
 ULCUSCULUM, Ulcer—u. Cancrosum, Chancre.

ULE, Cicatrix.

ULETICUS, Gingivalis.

ULICUS, Gingivalis.

ULI'TIS, from *ουλος*, 'solid,' (*σφραζ ουλη*, 'solid flesh:') hence, *ουλον*, 'the gum,' and *itis*, denoting inflammation. *Ouli'tis*, *Inflamma'tio gingivæ*, *Periodont'itis gingivæ*, (F.) *Gengivite*, *Inflammation des gencives*, from *ουλον*, 'the gum,' and *itis*, denoting inflammation. Inflammation of the gums.

ULITIS SEPTICA, Cancer aquaticus.

ULLUCO, Tropæolum tuberosum.

ULMAIRE, Spiræa ulmaria.

ULMARIA, Spiræa ulmaria—u. Palustris, Spiræa ulmaria.

ULMUS, *U. campestris* seu *glabra* seu *montana* seu *nuda* seu *sativæ* seu *scabra*, *Ptelea*, *Common Elm*, (F.) *Orme*, *Ormeau*, *Orme pyramidale* ou *champêtre*. *Ord. Ulmacæ. Sez. Syst. Pentandria Digynia*. The inner, rough bark—*Ulmus*, (Ph. L.)—of this tree is inodorous; and has a bitter, austere, and mucilaginous taste. It is considered tonic, alterative, and diuretic; and has been used, chiefly, in lepra and other cutaneous affections.

ULMUS ALATA, *Lynn Wahoo*. The bark of the root has been used successfully as a cataplasm in phlegmonous inflammation.

ULMUS AMERICANA, *U. fulva* seu *rubra*, *Rough-leaved*, *Red*, or *Slippery Elm*. The inner bark—*Ulmus*, (Ph. U. S.)—is highly mucilaginous, and is used in coughs, diarrhoeas, and dysenteries; also, as a poultice for tumours, lacerated and contused wounds, &c.

ULMUS CAMPESTRIS, Ulmus—u. Fulva, U. Americana, U. rubræ—u. Glabra, Ulmus—u. Montana, Ulmus—u. Nuda, Ulmus—u. Sativa, Ulmus—u. Scabra, Ulmus.

ULNA, *O'lenz*, *Foc'ilè inferius* seu *majus*, *Os Bra'chii*, *Os cubitii inferius*, *Os procutibale*, *Cu'bitus*, *A un'do bra'chii major*, *Cubit*. Anatomists have given this name to the bone of the forearm which forms the prominence of the elbow, during the flexion of that joint. It is the longer and larger of the two bones, and is inserted at the inner side. Its upper and larger extremity has, behind, a considerable process, called *olecranon*; and, before, a smaller one, called *coronoid*. These two eminences are separated from each other by the greater sigmoid or *semilunar fossa* or *olecranon cavity*, which receives the articular trochlea of the humerus. The tubercle of the ulna is a small, rough spot, under the root of the coronoid process, for the

insertion of the *Brachialis internus*. On the outside of this extremity of the bone is the *lesser sigmoid cavity*. It is articulated with the head of the radius. The inferior extremity of the cubitus, which is much smaller than the superior, and articulated with the radius, has a surface that corresponds to the fibro-cartilage which separates it from the os cuneiforme; and a pointed process, called *styloid*. The body of the ulna is manifestly triangular. It is articulated with the os humeri and radius, and, mediately, with the os cuneiforme. It is developed by three points of ossification.

Also, the elbow.

ULNAD, see Ulnar aspect.

ULNAR, Cubital.

ULNAR ASPECT. An aspect towards the side on which the ulna is situated.—Barclay. Ulnad is used adverbially by the same writer, to signify 'towards the ulnar aspect.'

ULNARIS, Cubital—*u*. Externus, see Cubital muscles—*u*. Gracilis, Palmaris longus—*u*. Internus, see Cubital muscles.

ULOCACE, Cancer aquaticus, Stomaceae.

ULON'CUS, from *ουλον*, 'the gum,' and *ογκος*, 'tumour.' Swelling of the gums; epulis.

ULORRHAG'IA, *Oulorrhag'ia*, *Stomatorrhag'ia*, *Hæmorrhag'ia gingivæ*, *Ulorrhæa*, from *ουλον*, 'the gum,' and *ρηγνμι*, 'I break forth.' Bleeding from the gums.

ULORRHŒA, Ulorrhagia.

ULOTICA, Cicatrisantia.

UL'TIMI-STERNAL. Professor Bérclard gave this appellation to the sixth or last bony portion of the sternum. He calls it also *Ensi-sternal*.

UL'TIMUM MO'RIENS, 'last dying.' A term given to the part of the economy which dies last.

ULVA CRISPA, *Fucus crispus*.

ULVA LAVIS'SIMA, *Broad Green Laver*, *Green Sloke*, *Oyster green*; *Order*, *Algæ*; is used at table cooked in the same way as the next, to which it is greatly inferior.

ULVA UMBILICA'LIS, *Por'phyra lacinia'ta* seu *umbilica'lis*, *Lacin'iated Purple Laver*, abundant on the shores of Great Britain, is pickled with salt and sold in London as *Laver*. It is eaten at table, stewed with pepper, butter or oil and lemon-juice or vinegar. It has been suggested, also, as an antiscorbutic.

UMBL, YELLOW, *Cypripedium luteum*.

UMBILIC, Umbilical, Umbilicus.

UMBILICAL, *Umbilic*, *Umbilica'lis*, *Umbilica'tus*, (F.) *Ombilical*, from *umbiliens*, 'the navel.' That which belongs or relates to the navel.

UMBILICAL ARTERIES, which exist only in the fœtus, seem, as it were, continuations of the primitive iliacs. They clear the umbilical ring, and proceed to the placenta, to which they carry the residuum of the blood sent to the fœtus by the umbilical vein. As soon as respiration is established, the blood ceases to pass by the umbilical arteries, which become obliterated, as well as the vein, and are transformed into two very strong ligamentous cords,—the vein forming the *Ligamentum rotundum* of the liver.

UMBILICAL CORD, *Funiculus umbilicalis*.

UMBILICAL REGION, *Re'gio umbilica'lis* seu *gas'trica* seu *Mesogastrica*, *Mesogastrium*, (F.) *Région ombilicale*, is the middle region of the abdomen, in which the umbilicus is placed. The sides of this are called the *flanks* or *lumbar regions*. In the umbilical region are the omentum majus; the inferior extremity of the duodenum; the jejunum; and the greater part of the mesentery; the aorta; vena cava; the trunks of the renal arteries and veins; the origin of the spermatic arteries, &c.

UMBILICAL RING, *An'nulus umbilica'lis*, (F.) *Anneau ombilical*, is a fibrous ring which surrounds the aperture of the umbilicus, and through which umbilical hernia occurs in children.

UMBILICAL VESICLE, *Vesicula umbilicalis*.

UMBILICAL VESSELS, (F.) *Vaisseaux ombilicaux*, include the two arteries, and umbilical vein. The umbilical vein arises from the placenta, and terminates at the fissure on the inferior surface of the liver of the fœtus, to which it conveys the blood necessary for its nutrition.

UMBILICALIS, Umbilical.

UMBILICATUS, Umbilical.

UMBILIC'US, *Umbili'cum*, *Umbo*, *Om'phalos*, *Radix* seu *Me'dium ventris*, *Mesompha'lium*, *Mesom'phalum*, *Protme'sis* (*navel of a new-born child*); the *umbilic*, *navel*, (Prov.) *Spoon*; from *umbo*, 'the button or prominence in the midst of a buckler,' or from *υμφαλος*, or rather *ομφαλος*, which signifies the same, as well as the navel; (F.) *Ombilic*, *Nombriil*. A round cicatrix, about the median line of the abdomen. It is in the situation of an aperture, which, in the fœtus, affords passage to the vessels of the umbilical cord.

UMBILICUS MARI'NUS, *Cotyle'don marina*, *Andro'sacæ*, *Acetab'ulum marinum*, *Andro'sacæ Matthi'oli*, *Fungus petra'us marinus*. A submarine production, found on the rocks and the shells of fishes, in the south of France. It is reputed to be anthelmintic and diuretic.

UMBO, Elbow, Umbilicus.

UMBRELLA TREE, *Magnolia tripetala*.

UMSCHLAG, see Compress.

UNBOWELING, Exenterismus.

UNCARIA GAMBIR, *Nauclæa Gambir*.

UNCAS, INDIAN, *Veratrum viride*.

UNCIA, Ounce.

UNCIFORM, *Unciform'is*, *Uncina'tus*, from *uncus*, 'a hook,' and *forma*, 'shape.' That which has the shape of a hook.

UNCIFORM BONE, *Os unciform'e* seu *hamat'um* seu *uncina'tum*, (F.) *Os crochu*. The fourth bone of the second row of the carpus. Its shape is very irregular. Inwards and forwards, it has a considerable eminence, which is curved upon itself, and gives attachment to the annular ligament of the carpus. It is articulated with the os semilunare, os magnum, os cuneiforme, and the fourth and fifth metacarpal bones. It is developed from a single point of ossification.

UNCIFORM EMINENCE, *Hippocampus minor*.

UNCIFORM PROCESS, *Processus unci'natus* seu *Blumenbach'ii*, *Great Process of the Ethmoid*. The most considerable of the thin irregularly twisted laminae on the inferior surface of the ethmoid bone, which narrow the opening of the maxillary sinuses.

UNCINATUS, *Unciform*.

UNCINUS, Hook.

UNCTION, *Inunction*, *Unguentum*, *Unguentum hydrargyri*.

UNCUS, Hook.

UNDERCLIFF, ISLE OF WIGHT, ENG. LAND, (CLIMATE OF.) The Undercliff comprehends a tract of country from Dunnose to St. Catherine's Hill, on the southeast coast, about six miles in length, and from a quarter to half a mile in breadth. It is well protected from the colder winds; and the climate is remarkably equable, as well as mild and dry, so that there are not many days during the winter in which the invalid cannot take exercise in the open air. It is an excellent climate for the pulmonary valetudinarian.

UNDIM'IA. A name given, by Paracelsus, to a tumour, filled with a gelatinous matter, like the white of an egg.

UNDOSUS, *Cymatodes*.

UNDULATIO, Fluctuation.

UNEDO, *Arbutus unedo* — u. Papyracea, *Arbutus unedo*.

UN'GEAL, *Ungea'lis*, from *unguis*, 'a nail.' Belonging, or relating, to the nails of the hands or feet.

UNQUEAL MATRIX, see Nail.

UNGUEN, Unguentum — u. Articulare, *Synovia*.

UNGUENT, ARMATORY, *Hoplochrysa*.

UNGUENTARIA, see *Myristica moschata*.

UNGUENTARIUS, *Myropœus*, *Myrep'sus*, *Myropo'les*, *Myropo'lus*, *Pigmentarius*; from *unguentum*, 'an ointment.' One who makes and sells ointments. A perfumer.

UNGUENTUM, *Unguen*, *Myron*, *Uction*, (F.) *Onguent*, from *ungere*, *unctum*, 'to anoint.' Ointment. Ointments are topical applications, of a consistence more or less analogous to that of lard. They are used, chiefly, as local applications to ulcers and wounds; but are sometimes rubbed upon a part in cutaneous affections; and, especially, where it is desired that the constituents of the ointment should be absorbed. Ointments are of less consistence than cerates, although the terms are often used indiscriminately.

UNGUENTUM AC'IDI NITRO'SI, *Ointment of Nitrous Acid*, *Poma'tum seu Unguentum Ni'tricum seu Oxygena'tum*, (F.) *Pommade oxygénée*, *Graisse oxygénée*, *Pommade d'Algon*. (*Adip. suilli*, ℥j; *acid. nitros.* ℥vj. Melt the fat, and rub in the acid gradually, till cold. *Ph. E.*) Stimulant. Used in itch and other cutaneous eruptions, and in foul ulcers.

UNGUENTUM ADIPOCERÆ CETORUM, *Ceratum cetacei* — u. *Ægyptiacum*, *Linimentum ærguinis* — u. *Ægyptium album*, *Crinomyron* — u. *Ærguinis*, U. *subacetatis cupri* — u. *Album*, *Unguentum cetacei* — u. *Album Resolvens*, *Linimentum ammoniæ fortius*.

UNGUENTUM DE ALTHÆÆ, *U. de Terebinthinâ et cerâ seu citrinum seu resinæ pini sylvestris compositum seu resumptivum seu lenitivum*, *Ceratum de Althæâ*, *Emplas'trum mucilaginosum seu emolliens seu citrinum seu flavum seu de Althæâ*, *Unguentum flavum*, *Marsh mal'low Ointment*, (F.) *Onguent de guimauve*, *O. d'althæa*. (*Olei de mucilagibus*, 1000 p., *cerâ flavâ*, 250 p., *resinæ terebinthin.*, āā 125 p. Liquefy; strain and stir till cold. *Ph. U. S.*) *Common Olive Oil* might be substituted for the *Oil of Mucilages*.

UNGUENTUM AMYGDALINUM, *Ceratum Galeni*.

UNGUENTUM ANTIMONI, *U. Antimonia'te*, *U. A. Tartarizati*, *U. A. Potassio-tar'tratis*, *U. tartari emetici*, *Ointment of tartarized antimony*, *Antimo'nial Ointment*, *Tartar emetic ointment*. (*Antimon. et potass. tartrat. in pulv. subtiliss.* ℥ij, *adipis.* ℥j. *Ph. U. S.*) If a drachm of this ointment be rubbed upon any part, night and morning, it will excite, in a few days, a painful pustular eruption. Hence, it is employed as a counter-irritant. This preparation is also called *Ung. Tartari stibiati seu emetici*, *Ung. e Tartaro stibiato*, *Adeps Tartaræ stibii medicatus*, *Ung. Tar'tratis Potassæ stibiati*, (F.) *Pommade d'Auterrieth*, *Pommade stibiée*. This method of employing the tartrate of antimony and potassa, as a revellent, is, at times, called *stibio-dermic*, (F.) *La méthode stibio-dermique*.

UNGUENTUM ANTIMONII POTASSIO-TARTRATIS, *Unguentum antimonii* — u. *Antimonii tartarizati*, U. *antimonii* — u. *Antipernium*, see *Antipernius*.

UNGUENTUM AQUÆ ROSÆ, *Ointment of Rose water*, *Cold Cream*. (*Aq. Rosæ*, f℥j; *ol. amygdal.* f℥ij; *cetacei*, ℥ss; *cerâ albâ*, ℥j. Melt together, in a water-bath, the oil, spermaceti, and wax; then add the rose-water, and stir until it is cold. *Ph. U. S.*) Cooling to irritated surfaces.

UNGUENTUM ARMARIUM, *Hoplochrysa* — u. *Arthanitæ*, see *Arthanita* — u. *Articulare*, *Synovia* — u. *Basilicon flavum*, *Ceratum resinæ* — u. *Basilicon nigrum*, *Unguentum resinæ nigræ* — u. *Basilicon viride*, *Unguentum subacetatis cupri*.

UNGUENTUM BELLADON'NÆ, *Ointment of Belladonna*. (*Ext. belladonnæ* ℥j; *adipis* ℥j; *M. Ph. U. S.*) An anodyne application to irritable ulcers, &c.

UNGUENTUM CANTHARIDIS, *Unguentum lyttæ*.

UNGUENTUM CERÆ (*albæ seu flavæ*), *Unguentum simplex* (*Ph. U. S.*), *Linimentum simplex*, *Wax Ointment*, *Oil and Bees' Wax*, (F.) *Onguent de cire*. (*Cerâ* ℥ij, *adipis* ℥iiv (*Ph. U. S.*), or—*cerâ* ℥ij, *ol. oliv.* ℥v.) Emollient. A mild dressing. Also, the basis of most of the compound ointments.

UNGUENTUM CERATUM, *Ceratum Galeni* — u. *Cerussæ*, *Unguentum oxidi plumbi albi*, *Unguentum plumbi subcarbonatis* — u. *Cerussæ acetatæ*, *Ceratum plumbi superacetatis*, U. *plumbi superacetatis* — u. *Citrinum*, U. *de althæâ*, U. *hydrargyri nitratis*.

UNGUENTUM CETA'CEI, *U. Sper'matis Ceti seu album*, *Linimentum album*, *Spermaceti ointment*, (F.) *Onguent de blanc de baleine*. (*Cetacei* ℥vj, *cerâ albâ* ℥iiv, *ol. oliv.* f℥ij. *Ph. L.*) The ordinary dressing for blisters and excoriations. See *Ceratum cetacei*.

UNGUENTUM COCC'ULLI, *Ointment of Cocculus Indicus*. (Take any quantity of *Cocculus Indicus*; separate and preserve the kernels; beat them well in a mortar, first alone, and then with a little lard; then add lard till it amounts altogether to five times the weight of the kernels. *Ph. E.*) Used to destroy vermin, and to cure scabies and ringworm of the scalp.

UNGUENTUM CONI'I, *Ointment of Hemlock*. (*Conii fol. recent.*; *adipis* āā ℥j. Boil the hemlock in the lard till it becomes crisp, and express through linen. *Ph. L.*) Used to irritable tumours and ulcers.

UNGUENTUM CREASO'TI, *Ointment of Creasote*. (*Creasot.* f℥ss; *adipis*, ℥j. Add the creasote to the lard previously melted with a moderate heat, and stir constantly till cold. *Ph. U. S.*) Used in chronic cutaneous affections.

UNGUENTUM CUPRI SUBACETATIS, *Unguentum subacetatis cupri* — u. *Diapompholygos*, *Unguentum oxidi zinci impuri*.

UNGUENTUM DIGESTIVUM SIMPLEX, *U. Terebinthinæ et ovo'rum vitell'i*, *Simple digestive ointment*, (F.) *Onguent digestif simple*. (*Terebinthin. pur.* 64 p. *Vitell. ovor.* No. 2, vel 32 p. Mix, for a long time, in a glass mortar, and add gradually, enough of the *Oil of Hypericum* (*Millepertuis*) to make a soft ointment. *Ph. P.*) Detergent. It may be rendered more so by adding a little of the *Acetate of copper*.

UNGUENTUM ELEM, *Balsam of Arcæus*, *Unguentum elemi compositum*.

UNGUENTUM EL'EMI COMPOSITUM, *Unguentum e gummi elemi seu de terebinthinâ et adipibus seu elemi*, *Linimentum Arcæ'i*, *Ointment of Elemi*, (F.) *Baume d'Arcéus*. (*Elemi* ℥j, *terebinthinæ vulgaris* ℥x, *sevi preparati* ℥ij, *olivæ olei* f℥ij. Melt the elemi with the suet; remove it from the fire; and mix in the turpentine and oil. Strain the mixture through a linen cloth. *Ph. L.*) Stimulant and digestive. To keep open issues, &c.

UNGUENTUM EPISPAS'TICUM DE DAPHNÆ GNIDIO, *Adeps Corticæ daphnes gnidii medicatus*, (F.) *Pommade de Garou*. (*Adip. præpar.* 320 p., *cerâ*, 32 p., *cort. daphn. gnid.* 128 p. Melt the fat and wax; and add the bark softened in water. Boil until the water is evaporated: then pass through cloth. *Ph. P.*) To keep open blisters, issues, &c. See *Unguentum Mezerci*.

UNGUENTUM EPISPASTICUM FORTIUS, Cerate of cantharides—u. Epispasticum mitius, Unguentum lyttæ—u. Epispasticum viride, Unguentum lyttæ medicatum—u. Flavum, Unguentum de althæa—u. e Gummi elemi, Unguentum compositum—u. Hellebori albi, Unguentum veratri.

UNGUENTUM GALLÆ, Ointment of Galls, (Gallæ in pulv. ʒj; adipis, ʒviij. M. Ph. U. S.) As an astringent in piles, indolent ulcers, &c.

UNGUENTUM GALLÆ COMPOSITUM, U. Gallæ et Opii, Compound Ointment of Galls. (Gall. in pulv. subtil. ʒvj, adipis ʒviij, opii pulv. ʒiss. M. Ph. L.) Used in painful hemorrhoids. ʒss or ʒj, of camphor is sometimes added.

UNGUENTUM HYDRARGYRI, U. cæru'leum seu Neapolitanum, Cera'tum mercuria'le, Adeps Hydrargyri medicatus, Mercurial Ointment, Blue ointment, Unctio, (F.) Onguent mercuriel ou Neapolitain.

The Strong Mercurial Ointment, Unguentum Hydrargyri fortius of the London Pharmacopœia, U. Hydrargyri (Ph. U. S.), is thus made—Hydrarg. lbij, adipis ʒxxij, sevi ʒj. Rub till the globules entirely disappear.

The Milder Mercurial Ointment,—U. Hydrargyri Mitius,—is made by adding, to one pound of the strong, two pounds of lard.

Mercurial ointment is antisyphilitic and discutient. It is rubbed on the inside of the thigh, in venereal affections; especially in those cases where mercury, given internally, runs off by the bowels. The stronger ointment is used for this purpose. The weaker is employed as a dressing, or as an application to cutaneous eruptions.

UNGUENTUM HYDRARGYRI PRÆCIPITATI ALBI, Unguentum hydrargyri præcipitati albi—u. Hydrargyri calcis albæ, Unguentum hydrargyri præcipitati albi—u. Hydrargyri compositum, Unguentum hydrargyri nitratis—u. Hydrargyri deutoxydi nitrati, Unguentum hydrargyri nitrico-oxydi.

UNGUENTUM HYDRARGYRI IOD'IDI, Ointment of Iodide of Mercury. (Hydrarg. Iodid. ʒj, ceræ alb. ʒij, adipis ʒviij. Ph. L.)

UNGUENTUM HYDRARGYRI IOD'IDI RUBRI, Ointment of Red Iodide of Mercury. (Hydrarg. Iodid. Rubr. ʒj, Ung. ceræ albæ ʒviij. Ph. D.) Both these ointments may be applied to scrofulous and indolent ulcers.

UNGUENTUM EX HYDRARGYRO MITIUS DICTUM CINEREUM, Unguentum oxydi hydrargyri cinereum.

UNGUENTUM HYDRARGYRI NITRATIS, U. hydrargyri nitrati seu supernitratis hydrargyri seu hydrargyri compositum seu mercuriale citrinum seu citrinum ad scabiem, Balsamum mercuria'le, Adeps nitratis hydrargyri medicatus, Ointment of Nitrate of Mercury, Citrine Ointment, (F.) Onguent de nitrate de mercure, O. citrin contre la gale. (Hydrarg. ʒj, acid. nitric. f ʒxiv. olei bubuli f ʒix, adipis ʒiij. Dissolve the mercury in the acid; and, while hot, add the oil and melted lard. Ph. U. S.)

A milder ointment,—Ung. nitratis Hydrargyri mitius,—is made with triple the quantity of oil and lard. It is stimulant and detergent, and is much used as an application to herpes, porrigo, and cutaneous eruptions. The weaker ointment is sometimes used in ophthalmia tarsi, &c.

UNGUENTUM HYDRARGYRI NITRICO-OXYDI, U. subnitratis hydrargyri seu Oxydi Hydrargyri rubri, U. H. oxydi rubri (Ph. U. S.), U. deutoxydi hydrarg. nitrati seu Hydrargyri rubri seu ex Hydrargyro oxydato rubro seu mercurii rubrum seu ophthalmicum rubrum seu subnitratis hydrargyri, Balsamum ophthalmicum rubrum, Ointment of Nitric Oxyd of Mercury, Red Precipitate Ointment, Golden Ointment, Singleton's Eye Salve. (Hydrarg. oxid. rubr. in pulv. subtiliss. ʒj; Ung. simpl. ʒj. Add the oxyd, re-

duced to a fine powder, to the melted ointment. Ph. U. S.) Stimulant and escharotic. Applied to foul ulcers, to inflammation of the tarsi, &c. &c.

Belleville's Cerate, which has been long used in cases of scalled head, and of chronic cutaneous diseases in general, is made as follows:—Plumbi acet. ʒj; hydrarg. oxid. rubr. ʒss; hyd. chlorid. mit. ʒij; ceræ albæ ʒiv; ol. oliv. ʒviij. Melt the last two, and add the others in fine powder.

UNGUENTUM HYDRARGYRI OXYDI RUBRI, Unguentum hydrargyri nitrico-oxydi—u. ex Hydrargyro oxydato rubro, Unguentum hydrargyri nitrico-oxydi—u. Hydrargyri oxydi rubri, Unguentum hydrargyri nitrico-oxydi.

UNGUENTUM HYDRARGYRI PRÆCIPITATI ALBI, U. Hydrargyri ammoniati, (Ph. U. S.) seu submuratis hydrargyri ammoniati seu ad scabiem Zelleri seu mercuria'le album seu mundificans Zelleri seu e mercurio præcipitato seu calcis hydrargyri albæ, Ointment of white precipitate. (Hyd. ammon. ʒj, ung. simpl. ʒiss. Melt the fat, and add the precipitate.) Detergent. Used in cutaneous eruptions, to destroy vermin, &c.

UNGUENTUM HYDRARGYRI RUBRI, U. Hydrargyri nitrico-oxydi—u. Hydrargyri submuratis ammoniati, U. Hydrargyri præcipitati albi—u. Hydrargyrici subnitratis, U. hydrargyri nitrico-oxydi—u. Hydrargyri subnitratis, U. hydrargyri nitrico-oxydi—u. Hydrargyri supernitratis, U. hydrargyri nitratis—u. Infusi meloes vesicatorii, U. lyttæ—u. Irritans, U. lyttæ.

UNGUENTUM IOD'INI, U. Iodini, Ointment of Iodine. (Iodin. ʒj; Potass. iodid. gr. iv; Aquæ Mvi; Adipis. ʒj. Rub the iodine and iodide first with the water until liquefied, and then with the lard until mixed. Ph. U. S.) Used as a local application to goitrous and other swellings.

UNGUENTUM IOD'INI COMPOSITUM, U. Iodini compositum, Compound Ointment of Iodine. (Iodin ʒss; Potassii iodid. ʒj; Alcohol, f ʒj; adipis ʒij Rub the iodine and iodide first with the alcohol and then with the lard until they are well mixed. Ph. U. S.)

UNGUENTUM LAURINUM, O'leum laurinum, Adeps lauro-medica'tus, Bay Ointment, (F.) Onguent ou Huile de laurier. (Fol. lauri, 500 p., adip. suillæ, 1000 p. Bruise in a marble mortar; evaporate all humidity by boiling; and add Bay berries, in powder, 500 p. Digest and pass through linen. Ph. P.) Reputed to be corroborant and nerve. It is simply emollient.

UNGUENTUM LENTIVUM, U. de althæa—u. Liliaceum, Crinomyron.

UNGUENTUM LYTTÆ, Ung. cantharidis seu vesicatorium seu irritans seu ad vesicata seu infusi meloes vesicatorii seu epispasticum mitius, Blistering Salve, Ointment of Spanish Flies, Ointment of Infusion of Spanish Flies, Milder blistering Ointment. (Cantharid. in pulv. ʒij; aquæ destillat. Oss; cerat. resin. ʒviij. Boil down the water with the Spanish flies to one-half, and strain; then mix the cerate with the strained liquor, and evaporate to the proper consistence. Ph. U. S.) It is stimulant and epispastic; and is chiefly used for keeping up the discharge from a blistered surface.

UNGUENTUM LYTTÆ MEDICATUM, Adeps cantharidibus medicatus, Pomatum seu Unguentum epispasticum viride stimulans acerbis, Green blistering Ointment, (F.) Pomade épispastique verte. (Pomati seu unguenti cantharid. 64 p., unguent. populei 168 p., ceræ albæ 256 p., cupri acetat., ect. opii, aâ 24 p. Melt the unguentum populeum, and wax, and add, as they cool, the oxyd of copper, cantharides, and opium. Ph. P.) Use, same as the last.

UNGUENTUM LYTTÆ MEDICATUM ALIUD, Adeps cantharidibus medicatus alius, Pomatum epispasticum flavum et mitius, Yellow Blister-

ing Ointment, (F.) Pomme épispastique jaune. (Pulv. cantharid. 120 p., adip. præp. 1680 p., aquæ 250 p. Melt the lard; mix the cantharides, and add the water at the same time; place the whole on a gentle fire; stir continually for two hours, and add a little water to replace that which has been evaporated. Pass through linen and strain. Keep it in a water-bath, and add powdered *turmeric*, 8 p. Let it cool till the superfluous liquid separates; pour off and add *yellow wax*, 250 p., *Oil of Lemon*, 8 p. *Ph. P.*) A complex preparation. Use, same as the last.

An ointment, not very philosophically combined, was used by Dr. Physick, which is known by the name of "*Dr. Physick's Issue Ointment.*" It is made by boiling half an ounce of powdered *cantharides* in two ounces of *rose-water*, and evaporating until one-half of the fluid is driven off, having previously added 15 grains of *tartar emetic*. The decoction is to be strained, and three ounces of *olive oil*, an ounce and a half of *white wax*, and one ounce of *spermaceti* added to it, and the mixture then boiled till all the water is evaporated.

UNGUENTUM MELANICUM CAUSTICUM, Causticum Æthiopicum.

UNGUENTUM MERCURIALE ALBUM, Unguentum hydrargyri præcipitati albi—u. Mercuriale citrinum, Unguentum hydrargyri nitratis—u. e Mercurio præcipitato, Unguentum hydrargyri præcipitati albi—u. Mercurii rubrum, Unguentum hydrargyri nitrico-oxydi—u. Mundificans Zelleri, Unguentum hydrargyri præcipitati albi.

UNGUENTUM MEZE'REL, *Ointment of Mezereon. (Mezer. inois. transversim, ʒiv; adipis, ʒxiv; ceræ albæ, ʒij; moisten the mezereon with a little alcohol, and beat in an iron mortar, until reduced to a fibrous mass; then digest it with the lard, in a salt-water bath, for 12 hours; strain forcibly, and allow the strained liquor to cool slowly, so that any undissolved matters may subside; from these separate the medicated lard; melt it with the wax at a moderate heat, and stir constantly till they are cold. Ph. U. S.)* To keep open blisters, issues, &c.

UNGUENTUM MURIA'TIS HYDRARGYRI OXYGENATO MEDICATUM, *Adeps muria'te hydrargyri oxygenato medicatus, Cyrillo's Ointment, (F.) Pomme de Cyrillo. (Hydrar. oxygum. 4 p.; adipis sulli præp. 32 p.—Ph. P.)* Antivenereal and alterative. Used in friction, ʒss at a time.

UNGUENTUM NARDINUM, see Nardus Indica—u. Neapolitanum, Unguentum hydrargyri—u. Nervinum, Unguentum Sambuci—u. Nitricum seu oxygenatum, Unguentum acidi nitrosi.

UNGUENTUM OPHTHALMICUM, *Adeps ox'ido hydrargyri rubro et plumbi aceta'te medico'tus, Reagent's Pomme ophthalmique, (F.) Pomme ophthalmique. (Butyr. recent., aq. rosar. lavat. aâ 4½ p.; camphor., oxyd. hydrarg. rubr., acetatis plumbi, aâ 0.25 p.* Mix intimately.—*Ph. P.*) In chronic inflammation of the conjunctiva or tarsi.

UNGUENTUM OPHTHALMICUM, Unguentum oxidi zinci impuri—u. Ophthalmicum rubrum, Unguentum hydrargyri nitrico-oxydi.

UNGUENTUM O'PII, *Ointment of Opium. (Opii pulv. ʒj; adipis ʒj; M.—Ph. L.)* To be used where the local application of opium by inunction is needed.

UNGUENTUM OX'IDI HYDRARGYRI CINE'REL, *Adeps seu Unguentum ex hydrargyro mit'us dictum cinereum, Ointment of gray oxide of mercury, (F.) Onguent gris. (Oxyd. hydrarg. ciner. p. j; adipis sulli, p. iij.—Ph. E.)* Properties like the mercurial ointment. It is not much used.

UNGUENTUM OX'IDI PLUMBI ALBI, *U. cerus'sæ seu album seu subaceta'tis plumbi, Ointment of white oxide of lead, White ointment. (Ung. simplis, p. v; oxyd. plumb. alb. p. j.—Ph. E. and*

P.) Cooling and desiccative. Applied to excoriated and burnt surfaces.

UNGUENTUM OXIDI PLUMBI CARBONATI, U. Plumbi subcarbonatis—u. Oxidi zinci, Unguentum zinci.

UNGUENTUM OX'IDI ZINCI IMPURI, *U. tu'tiæ seu ophthalmicum seu diapompholygus, Adeps ox'idi zinci medica'tus, Eye-salve, Tutty ointment, Ointment of impure oxide of zinc. (Linim. simpl. p. v; oxyd. zinc. imp. præp. p. j.—Ph. E.)* Generally used in ophthalmia tarsi and atonic ophthalmia.

UNGUENTUM PICIS LIQ'UIDÆ, *U. Picis seu e Picæ, Tar Ointment. (Picis liquid., sevi, sing. ʒj. Melt, and stir till cold.—Ph. U. S.)* Stimulant and detergent. Used in tinca capitis, and other cutaneous eruptions.

UNGUENTUM PICIS NIGRÆ, Unguentum resinæ nigræ—u. Plumbi acetatis, Ceratum plumbi superacetatis—u. Plumbi carbonatis, Unguentum plumbi subcarbonatis.

UNGUENTUM PLUMBI COMPOSITUM, *Compound Ointment of Lead. (Emp. Plumbi, ʒij; ol. oliv. fʒxviij; cret. præpar. ʒvj; acid. acet. dil. fʒvj.* Dissolve the plaster in the oil with a slow fire; then add the chalk, and afterwards the acid, constantly stirring until they become cold.—*Ph. L.)* Used as a dressing to flabby, indulent ulcers.

UNGUENTUM PLUMBI IOD'IDI, *Ointment of Iodide of Lead. (Plumb. iodid. ʒj; adipis, ʒviij; M.—Ph. L.)* Used as a eutrophic in chronic, glandular, and other swellings.

UNGUENTUM PLUMBI OXYDI CARBONATI, Unguentum plumbi subcarbonatis—u. Plumbi subacetatis, Unguentum oxidi plumbi albi—u. Plumbici carbonatis, Unguentum plumbi subcarbonatis.

UNGUENTUM PLUMBI SUBCARBONATIS, *U. plumbi carbona'tis (Ph. U. S.) seu album seu album simplex seu carbona'tis plumbicæ seu cerus'sæ seu oxidi plumbi carbona'ti, Ceratum de cerus'sâ, (F.) Onguent blanc de Rhazes, O. de céruse, O. de Tornamira. (Plumbi carbonat. in pulv. subtiliss. ʒij; Unguent. simpl. ʒj. Add the carbonate of lead to the ointment previously softened over a gentle fire, and mix.—Ph. U. S.)* Chiefly used as a dressing for burns.

UNGUENTUM PLUMBI SUPERACETA'TIS, *U. aceta'tis plumbi seu saturni'num seu cerus'sæ aceta'tæ, Balsamum universa'te, Ointment of sugar of lead. (Olive oil, ʒss; white wax, ʒiss; superacetate of lead, ʒij.)* Cooling, desiccative. Called, also, *Balsamum saturni'num, Butyrum saturni, Limentum plumba'tum, Pomatum saturni, Ung. triphar'macum.*

UNGUENTUM POPULEUM, *Adeps popav'eræ, hyoscyamo, et belladonnâ medica'tus.* Fresh buds of the *populus nigra*, 500 p., macerated in *adeps sullus* præp. melted, 1500 p., for 24 hours. Preserve this. Take *black poppy leaves, belladonna, hyoscyamus, black nightshade*, aâ 128 p.; bruise in a mortar with the former preparation; boil until all the humidity is evaporated, and strain.—*Ph. P.)* Anodyne. Applied to local inflammations, hemorrhoids, sore nipples, cancer, &c. Green elder ointment is often sold for this.

UNGUENTUM POPULEUM, see Populus.

UNGUENTUM POTASS'Æ HYDRIODATIS, *U. potass'ii iod'idi (Ph. U. S.), Ointment of hydr'iodate of potass. (Potass. iodid. in pulv. subtil. ʒj; aq. bullient. fʒj; adipis, ʒj. Dissolve the iodide in the water, and mix the solution with the lard.—Ph. U. S.)* Half a drachm of this ointment is rubbed on scrofulous glands, goître, &c.

UNGUENTUM POTASS'Æ IODIDI, Unguentum Potassæ Hydriodatis—u. Pulveris meloes vesicatorii, Cerate of cantharides—u. Resinæ flavæ, Ceratum resinæ flavæ.

UNGUENTUM RESINÆ NIGRÆ, *U. resinæ nigrum seu basil'icou nigrum seu Picis nig-ræ seu Picis*

tetrapharm'acum, Black basilicon, Black resin ointment, Ointment of pitch, Ointment of black pitch. (Resin nigr., cerâ flavâ, resinâ flav. ãã ʒij; olei olivæ, Oj.—Ph. L.) Uses, the same as the Ceratum resinæ or Yellow basilicon.

UNGUENTUM RESINÆ PINI SYLVESTRIS COMPOSITUM, Unguentum de Althæâ—u. Resinosum, Ceratum resinæ flavæ—u. Resumptivum, Unguentum de althæâ.

UNGUENTUM SABINÆ, Ceratum Sabinæ.

UNGUENTUM SAMBU'CI, *U. sambu'cinum* seu *nerveinum, Green ointment, Elder ointment, (F.) Ointment de sureau. (Sambuci flor. ʒij; adipis præp. ʒij. Boil.—Ph. L.) Emollient.*

UNGUENTUM SATURNINUM, Unguentum plumbi superacetatis—u. ad Scabiem Zelleri, Unguentum hydrargyri præcipitati albi—u. Simplex, Ceratum Galeni, Unguentum ceræ—u. Solidum de cicutâ, Emplastrum cicutæ—u. Spermatis ceti, Unguentum cetacei.

UNGUENTUM STRAMO'NIJ, *Ointment of Stramonium. (Ext. stramon. fol. ʒj; adipis, ʒj. Rub the extract with a little water until uniformly soft, and then with the lard.—Ph. U. S.) An anodyne ointment to irritable ulcers, hemorrhoids, &c.*

UNGUENTUM SUBACETATIS CUPRI, *U. cupri subacetatis* (Ph. U. S.) seu *deter'gens* seu *basilicum viride* seu *ærd'ginis, Balsamum viridè, Ointment of subacetate of copper, Verd'igris ointment.* (Cupri subacet. in pulv. subtiliss. ʒj; ungu. simpl. ʒxv. Add the subacetate to the ointment previously melted with a moderate heat, and stir till cold.—Ph. U. S.) Detergent and escharotic.

UNGUENTUM SULPHURATUM AD SCA'BIEM, *Adeps sulphurè et ammo'niæ muriatè medicatus. (Adipis, 120 p.; sulph. lot. 60 p.; ammoniæ muriat., alumina sulphat. ãã 4 p.; fiat unguentum:—Ph. P.) Antipruric.*

Bailey's Itch Ointment is composed of olive oil, lard, nitre, alum, sulphate of zinc, and cinnabar; scented with oil of aniseed, oil of origanum, and oil of spike, and coloured with alkanet-root.

UNGUENTUM SULPHURATUM ALCALI'NUM AD SCA'BIEM, *Adeps sulphurè et carbonatè potassæ medicatus, Hel'merick's Alcaline Sulphurated Itch Ointment. (Adip. præp. 800 p.; sulphur. lot. 200 p.; carbonat. potass. pur. 100 p.; fiat ungu.—Ph. P.) Use, same as the last.*

Bateman's Itch Ointment resembles this. It is coloured with cinnabar, and scented with essence of bergamot.

UNGUENTUM SULPHURIS, *U. e sulphurè, Sulphur ointment. (Sulph. ʒij; adip. ʒij.—Ph. U. S.) Used chiefly in itch, and some herpetic affections.*

UNGUENTUM SULPHURIS COMPOSITUM, *U. Antiprur'icum, Compound Sulphur Ointment, Itch Ointment, Jackson's Itch Ointment, Pommade Antiprur'ique de Jasser. (Sulph. sublim. ʒss; veratri rad. contus. ʒij; potassæ nitrat. ʒj; saponis mollis, ʒss; adipis, ʒiiss; ol. bergamot. ʒxxx.—Ph. L.) The UNGUENTUM SULPHURIS COMPOSITUM of the Pharm. U. S. is made as follows:—Sulphur. ʒj; hydrargyri ammoniat., acid. benzoic. ãã ʒj; ol. bergamot., acid. sulphuric. ãã ʒj; potassæ nitrat. ʒij; adipis, ʒss. To the melted lard add the other ingredients, and stir till cold. Use, the same as the last; but it is more stimulating.*

UNGUENTUM SULPHURIS IOD'IDI, *Ointment of Iodide of Sulphur. (Sulphur. iodid. ʒss; adipis, ʒj. Rub the iodide with a little of the lard; add the remainder, and mix.—Ph. U. S.) An excellent application in chronic cutaneous affections.*

UNGUENTUM SUSINUM, Crinomyron.

UNGUENTUM TAB'ACI, *Tobacco Ointment. (Tabac. recent. concis. ʒj; adipis, ʒij. Boil the to-*

bacco in the lard, over a gentle fire, till it becomes friable; then strain through linen.—Ph. U. S.) Applied to irritable ulcers, tinea capitis, &c.

UNGUENTUM TARTARI EMETICI, *U. antimonii tartarizati—u. Tartari stibiati, U. antimonii tartarizati—u. e Tartaro potassæ stibiati, U. antimonii tartarizati—u. Tartratis potassæ stibiati, U. antimonii tartarizati—u. de Terebinthinâ et adipibus, U. elemi compositum—u. de Terebinthinâ et cerâ, U. de althæâ—u. Terebinthinæ et ovorum vitelli, U. digestivum simplex—u. Tetrapharmacum, Basilicon, U. resinæ nigræ—u. Tripharmacum, U. plumbi superacetatis—u. Tutie, U. oxidi zinci impuri.*

UNGUENTUM VERATRI, *U. Veratri albi* (Ph. U. S.) seu *helleb'ori albi, White hellebore ointment. (Veratr. pulv. ʒij; adipis, ʒvij; olei limon. ʒxx.) Used in cases of itch, where sulphur is objected to. It is not equally efficacious.*

The principal ingredients in the EDINBURGH OINTMENT are white hellebore and muriate of ammonia.

UNGUENTUM AD VESICATA, *U. lyttæ—u. ad Vesicatoria, Cerate of cantharides—u. Vesicatorium, Unguentum lyttæ.*

UNGUENTUM ZINCI, *U. ox'idi zinci seu zinci oxidi* (Ph. U. S.), *Zinc ointment. (Zinci oxid. ʒj; adipis, ʒvj.) Use, the same as that of the Unguentum tutiæ.*

UNGUENTUM ZINCI OXIDI, *U. zinci.*

UNGUIS, Hippocampus minor, Nail, Onyx, Pterygion—u. Avis, Hippocampus minor—u. Halleri, Hippocampus minor—u. Odoratus, Blatta Byzantia.

UNGUIS OS, *Os lacrymalè.* A small, quadrilateral, very thin, and semi-transparent bone, which has been compared to a human nail, and is situate at the anterior and inner part of the orbit. It aids in the formation of the lacrymal gutter and the nasal duct. It is articulated with the frontal, superior maxillary, ethmoid, and inferior spongy bones, and is developed by a single punctum ossificationis.

UNGULA CABALLINA, Tussilago.

UNGULE PALPEBRARUM, see Tarsus.

UNHEALTHY, Sickly.

UNICORN ROOT, Chamælerium luteum.

UNIOLOC'ULAR, *Unilocularis*, from *unus*, 'one,' and *loculus*, (diminutive of *locus*), 'a cell.' Having one cell or cavity, as *biloc'ular* means having two cells or cavities; *multiloc'ular*, having many.

UNIO, Pearl.

UNIOCLUS, Cyclops, Monoculus.

UNION BY THE FIRST AND SECOND

INTENTIONS, see Intention.

UNIPARIENS, Uniparous.

UNIPARIENT, Uniparous.

UNIP'AROUS, *Unipariens, Unipariens*, from *unus*, 'one,' and *pario*, 'I bring forth.' Producing one at a birth.

UNISE'MA DELTIFO'LIA, *Pontederia cordata, Shovel Pickerelweed, Pond Shovel, Shovel-leaf, Water Plantain.* An indigenous plant, Ord. Pontederiaceæ, *See. Syst. Hexandria Monogynia*, which grows in water, and flowers from June to August. The root is emollient and astringent.

UNITAIRES (MONSTRES) (F.), from *unitas*, 'oneness.' A class of monsters in which are found only the complete or incomplete elements of a single individual. In contradistinction to *Compound monsters*, (F.) *Monstres composés*, in which there are the complete or incomplete elements of more than one.

UNITING BANDAGE, (F.) *Bandage unissant.* A bandage for bringing the edges of a wound into approximation. The arrangement

of such a bandage differs according as the wound is transverse or longitudinal.

UNIVOCAL GENERATION, see Generation.

UNOCULUS, *Borgne*. Cyclops, Monoculus.

UNORGANIZED, Inorganic.

UNSTRIPED MUSCULAR FIBRE, see Muscular fibre.

UNWELL, see Menstruation.

UPAS. A word used in the Archipelagos of Molucca and Sunda, and signifying *Vegetable Poison*, *Ipo*, *Bohon*, *Pohon*, or *Boa* or *Boon Upas*, *Upas*, *Pohon Antiar*, *Antsjar*. A substance used by the natives of those places for poisoning their arrows. The smallest quantity is capable of destroying the largest animal. The tree which produces it is said to be the *Antiaris Toxicaria*. Another species of upas, *U. Tienté*, *Tshettik* or *Tjettek*, is the produce of a *Strychnos*, *S. Tienté*. Many idle stories are told regarding the upas, most of which are fabulous.

URACHUS, *Uraeus*, *Urinaculum*, from *ovpov*, 'urine,' and *εχω*, 'I contain.' (F.) *Ouraque*. The urachus, in certain animals, is a long membranous canal, which arises from the bladder, makes its exit from the abdomen by the umbilicus, and terminates in the pouch called *allantois*. According to Sabatier, this is the arrangement of the urachus in the human foetus; but Bichat and other anatomists consider, that when the canal exists in it, it is a malformation. They regard it as a kind of suspensory ligament of the bladder, extending from the top of that organ to the umbilicus; and, at the umbilicus, confounded with the abdominal aponeurosis.

URACRATA, Enuresis.

URACUS, Urachus.

URÆMIA, *Urhaemia*, (F.) *Urémie*, from *ovpov*, 'urine,' and *αιμα*, 'blood.' A condition of the blood in which it contains urine or urea.

URALI, Curare.

URANA, Ureter.

URANE, Urinal.

URANISCONITIS, from *ουρανισκος*, 'the palate,' and *itis*, denoting inflammation. *Palatitidis*. Inflammation of the palate.

URANISCOPLASTY, *Uraniscoplasticæ*, from *ουρανισκος*, 'the palate,' and *πλαστικός*, 'forming.' The operation of engrafting in case of deficiency of the soft palate.

URANISCORRHAPHIA, Staphylorrhaphy.

URANISCOS, Palate.

URANORRHAPHIA, Staphylorrhaphy.

URAPOSTEMA, *Abcessus urino'sus*, *Urædema*, from *ovpov*, 'urine,' and *αποστημα*, 'an abscess.' A tumefaction produced by the escape of urine. An abscess containing urine.

URARI, Curare.

URAS, Urate.

URATE, *Uras*, *Lithate*, *Lithas*; from *ovpov*, 'urine.' A generic name for salts, formed by the combination of uric or lithic acid with different bases. *Urate* or *Lithate of Soda*, for example, is found in arthritic and certain urinary concretions:—*Urate* or *Lithate of Ammonia* in certain urinary deposits.

URÆA, *Uren*, *Urenium*, *Uricum*, *Materia urino'sa*, *Principium* seu *Sal urino'sum*, *Nephrium*, (F.) *Urée*. Same etymon. A white, pearly, brilliant substance, in transparent plates, inodorous, and of a cool taste; very soluble in water; deliquescent, and soluble in alcohol. It exists, in great quantity, in the urine; and is an essential part of it. It has been used as a diuretic. Dose, gr. xv to ℥j.

URÆCHYSIS, *Uræchysis*, from *ovpov*, 'urine,' and *εκχυσις*, 'effusion.' Effusion of urine into the cellular membrane.

UREDIO, Urticaria.

URÉE, Urea.

UREMA, Urine.

URÉMIE, Uræmia.

UREN, Urea.

URENIUM, Urea.

URENS, Caustic.

UREORRHŒA, Diabetes.

URESIÆSTHESIS, Diuresiæsthesis.

URESIS, Micturition.

URETER, *ουρητηρ*. Same etymon as Urate. *U'raua*, *Vena alba renum*, *Cana'lis ner'veus fistulo'sus renum*, *Ductus seu Ductor Uri'næ*, *Vas urina'rium*, (F.) *Uretère*. A long, excretory canal—membranous and cylindrical—which conveys the urine from the kidney to the bladder. It extends, obliquely, between the pelvis of the kidney, with which it is continuous, and the *bas fond* of the bladder, into which it opens. It enters at the posterior and inferior part, for some distance between the coats, and opens into the cavity of the bladder, at the posterior angle of the *Trigone vesical*. The ureter is formed of an exterior, white, opaque, and fibrous membrane; and of an inner, which is mucous.

URETERAL'GIA, from *ουρητηρ*, 'the ureter,' and *αλγος*, 'pain.' Pain in the course of the ureter,—as from calculus, *Ureteral'gia calculo'sa*.

URETERALGIA CALCULOSA, see Ureteralgia—u. Inflammatoria, Ureteritis.

URETÈRE, Ureter.

URETER'ICUS. An epithet for ischury, &c., arising from an affection of the ureter.

URETERITIS, *Ureteral'gia inflammato'ria*, *Ureterophlegmasia*, from *ureter*, and *itis*, denoting inflammation. Inflammation of the ureter; generally caused by calculus.

URETERO-LITH'ICUS, from *ureter*, and *λιθος*, 'a stone.' An epithet applied to ischury or other affection caused by a stone in the ureter.

URETEROLITHUS. Same etymon. Calculus in the ureter.

URETEROPHLEGMASIA, Ureteritis.

URETERO-PHLEGMAT'ICUS, from *ureter*, and *φλεγμα*, 'phlegm or mucus.' Any affection caused by mucus accumulated in the ureter.

URETERO-PY'ICUS, from *ureter*, and *πυον*, 'pus.' An epithet applied to affections caused by the presence of pus in the ureter.

URETERORRHAG'IA, from *ureter*, and *ραγη*, 'rupture.' Hemorrhage from the ureter.

URETERO-STOMAT'ICUS, from *ureter*, and *στομα*, 'orifice.' That which is dependent upon obstruction of the orifice of the ureter.

URETERO-THROMBOÏ'DES, from *ureter*, *θρομβος*, 'grumous blood,' and *ειδος*, 'resemblance.' Ischury from grumous blood in the ureter.

URE'THRA, *ουρηθρα*, *Cana'lis seu Meatus seu Ductus urina'rius*, *Urias*, *Ure'tra*, *Fistula urina'ria*, *Iter urina'rium* seu *Uri'næ*; (F.) *Urèthre*, *Urètre*, from *ovpov*, 'urine.' The excretory ducts for the urine in both sexes; and for the sperm in man. In the latter, it is 8 or 10 inches long; and extends from the neck of the bladder to the extremity of the penis, in which its external aperture is situate. In the male urethra, three portions are distinguished:—1. A *Prostatic portion*, near the bladder, about an inch and a quarter in length, which traverses the prostate gland:—2. A *membranous portion*, *Isthmus ure'thræ*, *Pars ure'thræ membrana'cea*, from 8 to 10 lines long, which is separated from the rectum by the areolar tissue only:—3. A *spongy portion*, which expands, anteriorly, to form the glans, and which commences at the *bulb of the urethra*. Before opening externally, the canal has a dilatation, called the *Fossa* or *Fossic'ula navicularis*. On the interior of the urethra two white lines are perceptible—the one above, the other below. The latter commences at the *verumontanum*; and

at the surface of this, the *ejaculatory ducts*, and *prostatic ducts* open. The urethra is lined, in its whole extent, by a mucous membrane; on which are seen, particularly at the bulb, the orifices of a number of follicular ducts, *Lacunæ* or *Sinuses of Morgagni*. At about an inch and a half from the opening of the meatus, one of these lacunæ is generally found, much larger than the rest, and is named *Lacuna Magna*. The arteries of the urethra are numerous, and proceed from the internal pudic,—the largest branches entering the bulb. The veins follow the course of the arteries. The lymphatics pass into the inguinal and hypogastric plexuses. The nerves come from the pudic and gluteal. In the *female*, the urethra is only about an inch long. It is wider than in man, and susceptible of great dilatation. It is very wide at its commencement; and descends obliquely forwards, to terminate at the top of the external aperture of the vagina by the *meatus urinarius*. In its course, it is slightly curved, the concavity being forwards.

URETHRA, BLIND DUCTS OF THE, see *Cæcus*—u. Mucous lacunæ of the, see *Cæcus*.

URE'THRAL, *Urethralis*, *Urethricus*. Relating to the urethra.

URETHRAL'GIA, from *urethra*, and *αλγος*, 'pain.' Pain in the urethra. Gonorrhœa.

URÉTHRE, Urethra.

URETHREMPHRAXIS, Urethrophraxis.

URETHRITIS, Gonorrhœa.

URETHROBLENNORRHŒA, from *urethra*, *βλεννα*, 'mucus,' and *ρρω*, 'I flow.' Gonorrhœa; gleet.

URETHROCYSTAUCHENOTOMIA, see Lithotomy.

URETHROCYSTEOANEURYSMATOTOMIA, see Lithotomy.

URETHROCYSTEOTRACHELOTOMIA, see Lithotomy.

URETHROHÆMORRHAGIA, Urethrorrhagia.

URETHROPHRAXIS, *Urethremphrax'is*, from *urethra*, and *φρασσα*, 'I obstruct.' Obstruction of the urethra.

URETHROPLAS'TIC, *Urethroplas'ticus*; from *urethra*, and *πλασσα*, 'I form.' An epithet given to the operation, *U'rethroplasty*, which supplies defects in the canal of the urethra through which the urine escapes.

URETHRORRHA'GIA, *Urethrohæmorrhæ'gia*, *Caulorrhæ'gia* seu *Hæmat'uria stillatit'ia*, from *urethra*, and *ρηγνυμι*, 'I break out.' Hemorrhage from the urethra.—Frank.

URETHRORRHŒA, from *urethra*, and *ρρω*, 'I flow.' A discharge of any kind from the urethra.

URETHROSTENO'SIS, *Strictu'ra ure'thræ*, *Urostenosis*, *Urethros'tenia*, (F.) *Rétrécissement de l'Urèthre*, from *urethra*, and *στενωσις*, 'narrowness.' Stricture of the urethra.

URETHROTOME, *Urethrot'omus*, (F.) *Urèthrotome*, from *urethra*, and *τεμνω*, 'I cut.' An instrument so called by Le Cat, with which he divided the skin, and laid open the urethra, in the operation for lithotomy. Also, an instrument for dividing strictures of the urethra.

URETHROTOMY, *Urethrotom'ia*; same etymon. An operation, which consists in opening the urethra with the *Urethrotome*, for the removal of stricture. See *Boutonnière*.

URETHRYMENO'DES, from *urethra*, and *μυνη*, 'a membrane.' That which is caused by a membrane formed in the urethra.

URETICUS, Diuretic, Urinary.

URETRA, Urethra.

URÉTRE, Urethra.

URETRIS, Urinal.

URGINEA SCILLA, Scilla.

URHÆMIA, Uræmia.

URIAS. Fistula (urinary), Urethra.

URIASIS, Lithia, Uresis.

URIC ACID, *Ac'idum uricum* seu *urotillicium* seu *lithicum*, *Lith'ic*, *Ury'ic*, *Cal'culous*, *Bezoär'dic*, *Lithia'sic* or *Lithen'ic Acid*, (F.) *Acide urique*. An acid which exists in human urine, chiefly, if not wholly, in the form of urate of soda or urate of ammonia, and which in combination constitutes the greater part of urinary calculi. It is often deposited from the urine in health. See *Calculi*, urinary.

URIC OXIDE, *Ox'idum uricum*, *Xanthic oxide*, *Xanthine*, *Urous acid*. A substance not discovered in healthy urine, although probably bearing some relation to the yellow colouring matter. It is a very rare ingredient of calculous concretions, and little is known either of its chemical or pathological history.

URICUM, Urea.

URIGUS, Urinary.

URIDRO'SIS, from *ουρον*, 'urine,' and *ἰδρωσις*, 'sweat.' Urinous sweating. (F.) *Sueur urineuse*.

URINA CEREBELLA, see *Cerebella*—u. Chyli, see *Urine*—u. Cibi, see *Urine*—u. Diabetica, *urine*, diabetic—u. Febrilis, *Urine*, febrile—u. Furfuracea, see *Furfuraceous*—u. Galactodes, see *Galactodes*—u. Genitalis, *Sperm*—u. Jumentosa seu *Jumentaria*, *Urine*, jumentous—u. Mucosa, *Cystirrhœa*—u. Nephelodes, see *Nepheloid*—u. Oroboides seu *Orobodes*, see *Oroboides*—u. Pericardii, see *Pericardium*—u. Potûs, see *Urine*—u. Sanguinis, see *Urine*—u. Vaccæ, *Urine*, cows'.

URINACULUM, Urachus, Urinal.

URINE PROFLUVIUM, *Diabetes*—u. Suppressio, *Ischuria*—u. *Stillicidium*, *Strangury*—u. *Substillum*, *Strangury*.

URINAIRE, Urinary.

URINAL, *Urinato'rium*, *Chernib'ium*, *U'ranê*, *Ure'tris*, *Urinac'ulum*, *Urodochi'um*, *Urod'ochê*, *Urodoche'um*, *Uratra'cium*, *Matra'cium*, *Mat'ula*, *Mat'ella*; from *urina*, 'urine.' A name given, 1. To certain vessels, used to pass the urine into. 2. To reservoirs, of different shapes and character, which are adapted to the penis, in cases of incontinence of urine, and which are intended to receive the urine as it flows off.

URNALIS, Diuretic, Urinary.

URNARIA, *Antirrhinum linaria*, *Leontodon taraxacum*.

URINARY, *Urina'rius*, *Urina'lis*, *Urino'sus*, *Uricus*, *Uret'icus*, (F.) *Urinaire*. Same etymon. That which relates to the urine.

URINARY BLADDER, *Bladder*, *Ves'ica Urina'ria*, *Cystis*, *Urocyst'is*, (F.) *Vessie*. A musculo-membranous reservoir, intended for the reception of the urine, until the accumulation of a certain quantity solicits its excretion. The bladder is situate in the hypogastric region, between the rectum and pubis in man; and between the pubis and vagina in the female. Its upper region is not covered, except by the peritoneum, posteriorly. From its centre arises the *urachus*. Its lower region is bounded, anteriorly, by the prostate, in man; and rests on the vesiculæ seminales and rectum. In the female, it corresponds to the vagina. The lowest portion of this region bears the name *Bas-fond*. The anterior surface of the organ is not covered by peritoneum. It is attached to the symphysis pubis by a fibro-cellular expansion called the *anterior ligament*. The *posterior ligaments* or *recto-vesical folds*—*plicæ semilunares*—are duplicatures of the peritoneum on its posterior surface, which extend from this surface to the rectum in the male, and to the uterus in the female. The bladder is composed of a serous membrane, formed by the peri-

toneum;—of a muscular membrane; of a somewhat thick layer of areolar tissue; and is lined on its inner surface by a mucous membrane, which is sometimes raised up, here and there, in long prominences or *columns* by the muscular fibres beneath. To this condition, the French anatomists give the term—*vessie à colonnes*. In the *bas-fond* the two ureters open, and the urethra commences; and the triangular space, which the apertures of these three canals leave between them, is called, by the French, the *Trigone vésical* or *Vesical Triangle*, *Trigonus* seu *Trigonus vesicæ* seu *Lientan'di*, *Corpus trigonum*. In the orifice of the urethra, which is also called the neck of the bladder, there is, at its lower part, a more or less prominent tubercle, which is formed by the anterior angle of the *Trigone vésical*, and is called the *Vesical uvula*, *Uvula vesicæ*, (F.) *Luette vésicale*.

The arteries of the bladder proceed from the hypogastric, umbilical, sciatic, middle hemorrhoidal, and internal pudic. Its veins, which are more numerous than the arteries, open into the hypogastric venous plexus. Its nerves emanate from the sciatic and hypogastric plexuses; and its lymphatic vessels pass into the hypogastric ganglia.

URINARY CALCULI. The calculi which form in the urinary passages. See Calculi, urinary.

URINARY PASSAGES, (F.) Voies urinaires. The aggregate of canals and cavities intended to contain the urine and convey it externally. These *ways* are composed of excretory ducts, which form the tubular portion of the kidney; of calices; pelvis; ureters; bladder; and urethra.

URINATION, Micturition. M. Béraud elaborately defines it—a function, the result of which is the expulsion of matters principally solid, but held in solution, which have become improper for nutrition.

URINATORIUM, Urinal.

URINE, Urīna, οὐρῶν, Uron, Ure'na, Lot'ium, Lot, Lapis aureus, Omich'ma, Recrementa seu Retrimen'ta vesicæ, Aqua pedum, Aqua, (Old Eng.) Stale, Lee, (Prov.) Herrin, Netting, Saag. An excremental fluid; secreted by the cortical part of the kidney; filtered through the tubular portion; poured *guttatim* from the apices of the tubular papillæ into the pelvis of the kidney; and transmitted by it to the ureters; which convey it slowly, but in a continuous manner, into the bladder, where it remains deposited, until its accumulation excites a desire to void it. The excretion of the fluid takes place through the urethra; and is caused by the action of the abdominal muscles and diaphragm and the contraction of the fibrous coat of the bladder. Urine is transparent; of a citron-yellow colour; of a peculiar odour, and of an acid, saline, and slightly bitter taste. That which is passed some time after taking fluid, is less coloured, and less odorous and dense than that which is voided 7 or 8 hours after eating. The first is the *Urīna potūs*, (F.) *Urine de la Boisson, Urine of drink*:—the latter *Urīna san'guinis*, (F.) *Urine de la digestion, Urine de la coction, Urine cuite, Cocted urine, Urine of digestion*. Three distinct varieties of urine may, according to Dr. Golding Bird, be recognised: *First*. That passed some little time after drinking freely of fluids, which is generally pale, and of low specific gravity—1.003 to 1.009—*Urīna potūs*. *Secondly*. That secreted after the digestion of a full meal; s. g. 1.020 to 1.028, or even 1.030—*Urīna chyli seu cibi*. *Thirdly*. That secreted independently of the immediate stimulus of food and drink, as after a night's rest, which is usually of average density—1.015 to 1.025, and presents the essential characters of urine—*Urīna anguinis*.

The following are the ordinary constituents of healthy human urine:—urea, uric acid, [hippuric acid;] extractive matters, embracing alcohol extract, spirit extract, and water extract, with their respective constituents; mucus; brown colouring matter of the urine, (hæmaphæin; red colouring matter of the urine, (uroerythrin; carbonic, lactic, hydrochloric, sulphuric, phosphoric, silicic, and hydrofluoric acids; soda; potassa; ammonia; lime; magnesia; and peroxide of iron. The proportion of solid matters in 1000 parts of urine may vary from 20 to 70. The following table expresses the relative amounts of the different components in every 100 parts of the solid matter, according to the analysis of different observers:

	Berzelius.	Lehmann.	Simon.	Marchand.
Urea,	45.10	49.68	33.80	48.91
Uric Acid,	1.50	1.61	1.40	1.59
Extractive matter, Ammonia, Salts, and Chloride of Sodium.	36.20	23.95	42.60	32.49
Alkaline Sulphates,	10.30	11.58	8.14	10.18
Alkaline Phosphates,	6.53	5.96	6.50	4.57
Phosphates of lime and magnesia,	1.50	1.97	1.59	1.81

Its average specific gravity is about 1.015. The quantity passed by the adult in the 24 hours varies. On the average it may amount to two pounds and a half. Sometimes, the urine, in health and disease, exhibits appearances that have received special names. Thus, that which is characterized by a deficiency of solid matters generally, has been called *Hydruria*, ('*vδwp*, 'water;') by a deficiency of urea, *Anazoturia*, (av, privative, and *azote*;) by a superabundance of urea, *Azoturia*. Urine in which the deposit consists of lithic acid, and the lithates, has been termed *Lithuria*; and that in which the deposit consists of the earthy and earthy-alkaline phosphates, *Phosphuria Ceramuria*, (*κεραμος*, 'potters' earth,') &c. &c. At times, a *pellicle* forms on the surface (*Cremor urinæ*) which consists of mucus and some salts: at others, there is a *cloud*, (*Nubecula, nubes*;) towards its upper part, which is called *Enæorema* when it is suspended, as it were, about the middle of the liquid. Occasionally, there is a sediment, to which the names *Hypostasis, Sedimentum*, &c., have been given. (See these various words.) The urine is often deserving of attention in disease; but it has been considered a matter of more importance than it merits. Some empirics have presumed to pronounce on the nature of disease by simply inspecting it. See Uroscopy.

Human urine was, at one time, considered aperient; and was given in jaundice, in the dose of one or two ounces. Cows' urine, *Urīna Vaccæ, Allflower water*, was once used, warm from the cow, as a purge, in the dose of Oss.

Urine has been variously designated by pathologists, according to its appearance, &c., for example:—

URINE, ANÆMIC, Urīna anæ'mica. A term used, but not felicitously, for the form of urine that occurs in anæmia, chlorosis, &c.—Bequerel.

URINE ARDENTE, Ardent urine—u. Bloody, Hæmaturia—u. de la Boisson, Urine, hysterical, see Urine—u. Briqueté, see Lateritious—u. de la Coction, see Urine.

URINE, CRUDE, (F.) Urine crue. Urine that is thin, transparent, and but little coloured, affording neither cloud nor deposit.

URINE CRUE, Urine, crude—u. *Cuite*, see Urine.

URINE, CYSTIN'IC, Cystinuria. Urine containing cystine or cystic oxide in solution, or as a deposit.

URINE, DIABETIC, *Urina diabética*. Urine passed in *Diabetes mellitus, Melitu'ria*. It contains a large quantity of sugar analogous to that of the grape, which may be separated in the form of crystals. In other respects, the urine is very abundant and very limpid in that affection.

URINE DE LA DIGESTION, see Urine.

URINE, DROP'SICAL, is an ammoniacal urine, often containing much albumen and scarcely any urea.

URINE, DYSPEP'TIC, has been found to precipitate tannin abundantly, and to soon putrefy.

URINE ÉPAISSE, Urine, mucilaginous.

URINE, FEBRILE, *Urina febrilis*. Urine discharged in inflammation and inflammatory fever.

URINE, FILAMENTOUS, see Filamentous.

URINE, FLOCCULENT, (F.) *Urine floconneuse*, is when the fluid is troubled by flocculi, suspended in it.

URINE, FURFURA'CEOUS, see Furfuraceous—*u. Floconneuse*, Urine, flocculent—*u. des Goutteux*, Urine, gouty.

URINE, GOUTY, (F.) *Urine des goutteux*, contains much phosphate of lime, and, after severe attacks of gout, precipitates a mixture of the uric and rosacic acids.

URINE HUILEUSE, Urine, oily.

URINE, HYSTER'ICAL, is clear, colourless, and similar to the *Urine de la Boisson*.

URINE, ICTER'ICAL, contains bile.

URINE, INCONTINENCE OF, Enuresis.

URINE OF INFLAMMATORY DISEASES. This is, generally, small in quantity, and very high-coloured.

URINE, INVOLUNTARY DISCHARGE OF, Enuresis.

URINE, JUMENTOUS, *Urina jumentosa* seu *jumenta'ria*, (F.) *Urine Jumentouse*. A term used, by the French, for ammoniacal urine, rendered turbid by a substance similar to small grains of dust, which causes it to resemble the urine of herbivorous animals.

URINE LACTESCENTE, U. milky—*u. Laitense*. Urine, milky.

URINE, MILKY, (F.) *Urine lactescente ou laiteuse*. White and troubled urine.

URINE, MUCILAG'INOUS, (F.) *Urine épaisse*. Urine containing much mucus.

URINE, NERVOUS. Thin and very liquid urine; such as is passed shortly after the attack of nervous diseases.

URINE OF NERVOUS FEVERS is generally very thin; and often deposits a mixture of uric and rosacic acids.

URINE, OILY, (F.) *Urine huileuse*, is that which pours like oil, or which has an oily pellicle at its surface.

URINE, OXAL'IC, *Oxalu'ria*. Urine containing a salt of the oxalic acid.

URINE, PHOSPHORES'CENT, *Phosphoru'ria, Phosphu'ria*. Urine which is luminous or phosphorescent.

URINE, PURPURIC, see Porphyria.

URINE, RICK'ETY, contains much phosphate of lime.

URINE, SANDY, *Arenosa urina—u. Stoppage of, Ischuria—u. Ténue*, Urine, thin.

URINE, THIN, (F.) *Urine ténue*. Urine that is transparent, slightly coloured, and but little dense.

URINEUX, Urinous.

URINIF'EROUS, *Urinifer*, (F.) *Urinifère*, from *ουρον*, 'urine,' and *fero*, 'I carry.' That which carries urine.

URINIFEROUS SUBSTANCE OF THE KIDNEY, see Kidney.

URINIF'EROUS TUBES OR DUCTS OF BELLINI, *Tubuli seu ductus uriniferi Bellini, Tubuli Bellini seu recti, Bellinia'ni Ductus, Bellinia'næ*

Fistulæ. The collection of small tubes, converging from the cortical part of the kidney to the apices of the papillæ. The tortuous uriniferous ducts are called *Tubes of Ferrein, Tubuli contour'ii seu Ferre'ni*.

URINIP'AROUS, (F.) *Urinipare*, from *urina*, 'urine,' and *parere*, 'to produce.' An epithet for tubes in the cortical portion of the kidney, which prepare the urine.

URINODES, Urinous.

URINOM'ETER, from *ουρον*, 'urine,' and *μετρον*, 'measure.' A small hydrometer for taking the specific gravity of urine. The urinometer suggested by Dr. Prout is divided into 60 degrees, the zero being the point at which it floats in distilled water. The numbers on the scale added to 1000, the specific gravity of water, give the particular specific gravity: thus, supposing the number cut by the surface of the liquid to be 30, it would indicate a s. g. of 1.030. The letters H. S. on the back of the scale mean "healthy standard," which ranges from 10° to 20°.

URINOUS, *Urinosa, Urino'des*, (F.) *Urineux*. Having the character of urine. Similar to urine.

UROCE'LE, *Œdema scroti urinosum, Uroschece'le, Oscheoce'le urinal'is*, from *ουρον*, and *κληη*, 'a rupture.' A tumour of the scrotum, owing to the effusion of urine into the same, and into the areolar tissue.

UROCHES'IA, *Uroches'ia*, from *ουρον*, and *χεζαν*, 'to go to stool.' A discharge of urine by the bowels.

UROCRASIA, Enuresis.

UROCRIS'IA, from *ουρον*, and *κρινω*, 'I judge.' *Urocrition*. A judgment formed either of the urine, or of disease after inspecting the urine.

UROCRITERION, Urocrisia.

UROCYSTITIS, Urinary bladder.

UROCYSTITIS, "Cystitis.

UROCYSTOCATARRHUS, Cystorrhœa.

URODIAL'YSIS, from *ουρον*, and *διαλυσις*, 'dissolution, loss of strength.' A partial and temporary suspension of the function of the kidney, such as occurs in the course of most acute diseases. A condition of the function of the kidney and of the urine, similar to that observed in acute diseases, but without local mischief or preceding inflammatory fever, has been termed, when occurring in children, *Urodial'ysis Neonatorum*; in the aged, *Urodialysis Senum*.—Schönlein.

URODOCH'IIUM, Urinal.

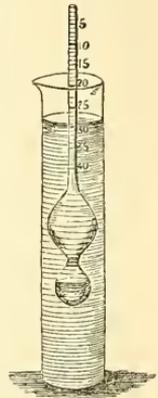

URODYN'IA, from *ουρον*, and *δύνη*, 'pain.' Pain during the excretion of the urine.

URŒDEMA, Urapostema.

UROËRYTHRIN, see Porphyria.

UROGEN'ITAL, *Urogenita'lis, Gen'ito-urinary, Gen'ito-urina'rius*. Relating or appertaining to the urinary and genital apparatus—as the 'urogenital organs'—*Organa urogenita'lia*.

UROGENITAL SINUS, *Sinus uro-genita'lis*. A cavity or canal in the embryo of the mammalia opening externally, in which the excretory ducts of the Wolffian bodies, the ureters and the effluent parts of the generative apparatus, terminate internally. It is prolonged into the urachus. Subsequently it becomes separated by a process of division into a *pars urina'ria* and a *pars genita'lis*. The former, extending towards the urachus, is converted into the urinary bladder;

whilst from the latter are formed the *vesiculae seminales* in the male, and the middle portion of the uterus in the female.—J. Müller.

UROLITHI, Calculi, urinary.

UROLITHIASIS, Lithia.

UROLITHOLOG'IA, from *ουρον*, λιθος, 'a stone,' and λογος, 'a description.' A description of urinary calculi.

UROLITHOTOMIA, Lithotomy.

UROLOGY, Urology.

UROMANT'IA, from *ουρον*, and *μαντεια*, 'divination.' The art of divining diseases by simple inspection of the urine; *Urosco'pia*. One professing to be able to do this is called *Uromant'ies*. Vulgarly, a *water-doctor*, *water-caster*.

URON'ELES, (F.) *Uromèle*, from *ουρα*, 'a tail,' and *μελος*, 'a limb.' A genus of monsters in which the two lower limbs are united, very incomplete, and terminated by a single foot, which is almost always imperfect, and the sole of which is turned forwards.—I. G. St. Hilaire.

UROMPH'ALUS, *Her'nia U'rachi*. A monstrosity, which consists in the protrusion of the urachus at the umbilicus.

URON, Urine.

URON'CUS, from *ουρον*, and *ογχο*, 'a swelling.' A urinary swelling.

URONOL'OGY, *Uronolog'ia*, *Urol'ogy*, *Urolog'ia*, from *ουρον*, and λογος, 'a description.' The part of medicine which treats of the urine.

UROPTHISIS, Diabetes mellitus.

UROPLA'NIA, from *ουρον*, and *πλανη*, 'wandering.' The presence of urine in other parts than the urinary organs.

UROPOE'SIS, *Uropoë'sis*, from *ουρον*, and *ποιω*, 'I make.' *Secre'tio uri'næ* seu *l'itii*. The secretion of urine by the kidney.

UROPOIESIS, Uropoiesis.

UROPYGION, Coccyx.

UROPYGIUM, *Croypion*.

URORHODINE, see Porphyruria.

URORRHAGIA, Diabetes.

URORRHŒA, Enuresis, Diabetes.

UROSCHEOCLE, Urocele.

UROSCOPIA, see Uromantia.

URO'SES, from *ουρον*, 'urine.' Diseases of the urinary organs.—Alibert.

UROS'TEALITHI, *Urosted'ithos*, from *ουρον*, *στυρα*, 'suet,' and λιθος, 'stone.' A peculiar fatty ingredient of urinary calculi, discovered by Heller.

UROSTENOSIS, Urethrostenosis.

UROUS ACID, Uric oxide.

UROZEMIA, Diabetes — u. Albuminosa, Kidney, Bright's disease of the—u. Mellita, Diabetes mellitus.

URRHODINE, see Porphyruria.

URROSCACINE, see Porphyruria.

URTICA, *U. Dioi'ca* seu *major* seu *his'pida*, *Pyr'ethrum*, *Ad'icē*, *Common stinging nettle*, (Prov.) *Nettle*, (F.) *Ortie*. *Ord.* Urticacæ. *Sex. Syst.* Monœcia Tetrandria. This plant has been long used for medical and culinary purposes. The young shoots, in the spring, are considered to possess diuretic and antiscorbatic properties. The pain produced by its sting is well known, but it is not to be compared to the torture occasioned by *Urtica stim'ulans*, and *U. crenula'ta* of India; and, still less, to *Urtica wentiss'ima* of Timor, which is called by the natives *Daoun Setan*, 'Devil's leaf,' on account of the persistence and severity of the pain.

URTICA BALEARICA, *U. pilulifera*—u. *Crenulata*, see *Urtica*—u. *Dioica*. *Urtica*—u. *Hispida*, *Urtica*—u. *Iners magna foetidissima*, *Galeopsis*—u. *Major*. *U. dioica*—u. *Minor*, *U. urens*—u. *Mortua*, *Lanium album*.

URTICA PILULIF'ERA, *U. Pilul'isa* seu *Roma'na* seu *Balea'rica*, *Pill-bearing Nettle*, (F.) *Ortie*

Romaine. The seed was formerly given in diseases of the chest.

URTICA PILULOSA, *U. pilulifera*—u. *Romana*, *U. pilulifera*—u. *Stimulans*, see *Urtica*.

URTICA URENS, *U. minor*, *Dwarf nettle*, (F.) *Ortie brulante*. A lesser variety of the nettle, possessing similar virtues.

URTICA URENTISSIMA, see *Urtica*.

Nettles have been used as stimulants to paralytic limbs.

URTICAIRE, Urticaria.

URTICA'RIA, from *urtica*, 'a nettle,' (*uro*, 'I burn;') *Enanthe'sis urtica'ria*, *Ure'do*, *Scarlati'na* seu *Febris* seu *Pur'pura urtica'ta*, *Cnido'sis*, *Urtica'ria porcel'iana*, *Evanthe'ma urtica'tum*, *Epinyctis prurigin'osa*, *Febris rubra prurigin'osa*, *Saltans rosa*, (F.) *Urticaire*, *Fièvre Ortie*, *Porcelaine*, *Nettle-rash*, *Nettle-springs*; vulgarly *Hives*, *Bold Hives*; from *urtica*, 'a nettle,' because the eruption resembles that produced by the stings of a nettle. A disease distinguished by those elevations of the cuticle called *wheals*. They have a white top, and are often surrounded by a diffuse redness. They excite intolerable itching, especially when the person is warm in bed. The eruption frequently goes and comes once or more in the 24 hours, and is generally dependent upon gastric derangement. In some people, nettle-rash is induced by shell-fish, eggs, nuts, &c. It is not usually a disease of any consequence, and its treatment is limited to the use of absorbent laxatives, and simple general means. Willan has described six varieties of the complaint:—*Urtica'ria febrilis*, *U. evan'ida*, *U. perstans*, *U. confes'ta*, *U. subcuta'nea*, and *U. tubero'sa*.

URTICARIA PORCELLANA, *Essera*, Urticaria.

URTICA'TIO, *Cnido'sis*, *Urtica'tion*, from *urtica*, 'a nettle.' A sort of flagellation, with nettles;—used with the intention of exciting the skin.

URUCU, Terra Orleana.

URYLIC ACID, Uric acid.

USNEA, Lichen saxatilis—u. Florida hirta, Lichen plicatus—u. Hirta, Lichen plicatus—u. Plicata, Lichen plicatus.

USSACU, Hura Bartsliensis.

USTILAGO, Ergot.

USTIO, Burn, Ustion.

USTION, *Ust'io*, *Causis*, from *urere*, *ustum*, 'to burn.' The act of burning or of applying the actual cautery. Also, the effect of cauterization; a burn.

USTULA'TIO, *Ustulo'tion*. Same etymon. A pharmaceutical operation by which a substance is dried by heat. It is often restricted to the roasting of ores to drive off the volatile matters, as in the case of arsenic.

USUALIA, Officinals.

USUS, Habit.

UTER, Uterus.

UTERI ADSCENSUS, Hysteria—u. Antever-sio, Hysteroloxia anterior—u. Carcinoma, Metrocarcinoma—u. Convulsivus morbus, Lorind matricis—u. Coryza, Leucorrhœa—u. Exulceratio, Hysterelecosis—u. Flexio, Hysteroloxia—u. Inclination, Hysteroloxia—u. Obliquitas, Hysteroloxia—u. Pronatio, Hysteroloxia anterior—u. Pruritus, Nymphomania—u. Reflexio completa, Hysteroloxia posterior—u. Retroversio, Hysteroloxia posterior—u. Rheuma, Leucorrhœa—u. Ulcus, Hysterelecosis—u. Versio incompleta, Hysteroloxia.

UTERINE, *Uteri'nus*, from *uterus*, 'the womb.' That which belongs or relates to the womb.

UTERINE ARTERY, *Arte'ria uteri'na hypoga's'trica*. Its size is always in a ratio with the greater or less state of development of the uterus. It arises from the hypogastric, either separately

or with the umbilical, or from the internal pudic; passes upon the lateral parts of the vagina, to which it gives branches; and afterwards ascends on the sides of the uterus, and divides into a considerable number of very tortuous branches, which enter the tissue of the organ.

UTERINE BOUGIE, Sound, uterine.

UTERINE BROTHER. One born of the same mother, but of a different father.

UTERINE GLANDS, Utricular glands.

UTERINE MUSCLE OF RUYSCHE consists of some fleshy fibres at the fundus of the uterus, which he regarded as forming a particular muscle.

UTERINE SOUND, Sound, uterine.

UTERINUS FRATER. In law, a brother by the mother's side.

UTERO-ABDOMINAL SUPPORTER, see Belt, Russian.

UTERO-GESTATION, Pregnancy.

UTEROMANIA, Nymphomania.

UTERUS, *ουτρη*, *Uter*, *Utric'ulus*, *Vulva*, *Loci*, *L. mulie'bres*, *Vulva*, *Venter*, *Conceptac'ulum*, *Matrix*, *Arum* seu *Ager nat'ra*, *Hys'tera*, *Metra*, *Stera*, *Angus*, *Delphys*, *Alvus*, *Epomphallion*, *Gaster*, *Mater*, *Nedys*, *Postrema*, the *Womb*, (Sc.) *Wom*, (Prov.) *Wem*, (F.) *Matrice*, *Sein*. The uterus, destined to lodge the fetus from the commencement of conception till birth, is a hollow symmetrical organ, having the shape of a truncated conoid: it is situate in the pelvis, between the bladder and the rectum, above the vagina, and below the convolutions of the small intestine. The uterus is flattened from before to behind, and is nearly an inch in thickness. It is two inches broad at its highest part, and becomes narrower towards the vagina; terminating in a contracted portion, called the *cervix* or *neck*, to distinguish it from the rest of the organ, called the *body*. From its *fundus* or upper portion, the Fallopian tubes pass off. The mouth is called *Os Uteri*, *Os Tincæ*, *Os uteri externum*, *Orific'ium vagina'le*. At the point where the body of the uterus is continuous, below, with the neck, the cavity is slightly constricted, forming what is sometimes named the *internal orifice*, *Os uteri internum*, *Os internum*, *Isthmus* seu *ostium uteri*, *Orific'ium uterinum*. Between these is the *Canalis cervicis*.

The cavity of the uterus is very small, and its parietes are thick. The portion of the cavity corresponding with the body is triangular and flattened. Its superior angles present the extremely fine orifices of the Fallopian tubes. The cavity of the neck is slightly dilated before opening into the vagina. The uterus is composed, 1. Of a *serous membrane*. This is external, and furnished by the peritoneum; which is reflected upon the uterus from the posterior surface of the bladder and the anterior surface of the rectum. These folds of the peritoneum are sometimes called, respectively, the *anterior* and the *posterior* ligaments. The former are also named the *vesico-uterine* and the latter the *recto-uterine* folds or *plicæ semilunares*. It forms, also, the *broad ligaments of the uterus*, *Ligamenta lata*, *Alæ vesperilio'nis*, *Re'tia Uteri*. These contain, above, the Fallopian tube; beneath and anteriorly, the round ligaments; and, behind, the ovary. They are two membranous productions or duplicatures of the peritoneum, sent from the edges of the uterus and posterior extremity of the vagina, in a transverse direction, to be fixed to, and line, the side of the pelvis. 2. Of a *mucous membrane*, which is a prolongation of that of the vagina, and extends into the tubes. 3. Of a *proper tissue*, whose thickness is considerable. It is of a close texture; is grayish and elastic; and resists the instrument that divides it. Its intimate nature is but little known. During gestation it is truly muscular. The arteries of the uterus proceed

from the spermatic and hypogastric. Its veins follow the same course, and bear the same name as the arteries. They are very tortuous, and form large sinuses in the parietes of the organ, called *Uterine Sinuses*. Its nerves proceed from the sciatic and hypogastric plexuses. Its lymphatic vessels are very multiplied; and during pregnancy acquire enormous dimensions. The changes experienced by the uterus during gestation, and after delivery, are very numerous and important to be known. They regard its situation, direction, size, shape, texture, connexions, vital properties, &c.

UTERUS, Abdomen—u. Anteversion of the, *Hysteroloxia anterior*.

UTERUS BIFIDUS. A double uterus. One separated into two cavities.

UTERUS DUPLEX, *Dihysteria*—u. Hour-glass contraction of the, *Chaton*—u. *Inclinata*, *Hysteroloxia*.

UTERUS, IR'RITABLE, *Neural'gia of the Uterus*. A disease characterized by deep-seated pain in the lower part of the abdomen, and in the back and loins; generally diminished by lying down, and increased by exercise, and more severe for a few days preceding and during menstruation. On examination *per vaginam*, the uterus is found to be tender on pressure, *Metryperæsthesis*; and the cervix and body slightly swollen, but not usually indurated. It is an obstinate affection, but frequently ends of itself after years of suffering. The treatment must be,—the horizontal posture; local blood-letting to the uterus; emollients; soothing injections; narcotics, warm bath, &c. See *Hysteralgia*.

UTERUS, INVERSION OF THE, *Inver'sio Uteri*, *Metranastrophè*, *Ædopto'sis Uteri inver'sa*, (F.) *Inversion* or *Renversement de la Matrice*. The uterus, displaced and turned inside out. This can only happen through want of caution on the part of the medical practitioner. It is a fatal accident, unless speedily reduced. This must be done by gradually returning the superior part, by grasping it with the hand, and making the rest follow.

UTERUS MASCULINUS, see Ejaculatory ducts—u. *Obliquus*, *Hysteroloxia*—u. *Retroversion* of the, *Hysteroloxia posterior*.

UTERUS, RUPTURE OF THE, *Metrorrhæ'is*, *Hysterorhæ'is*, *Rupt'ra* seu *Perfora'tio Uteri*, *Laceration of the Womb*, (F.) *Rupture* or *Déchirure de la Matrice*. This dreadful accident occurs during labour, and is known to have taken place, when the child's head suddenly recedes during a pain, with vomiting, sinking of the pulse, cold sweats, &c. When it is evident that this has occurred, the hand must be passed into the uterus, and the feet of the child be brought down.

Cases are on record, in which partial lacerations of the uterus have healed, and the patient has done well. This is a rare event, and not to be anticipated.

UTRICLE, see Semicircular canals.

UTRICLE, PRIMOR'DIAL, *Utric'ulus primordia'lis*. A delicate membrane, of protein composition, which lines the cell wall of vegetable structures, and from the exterior of which the layer of cellulose is secreted.

UTRIC'ULAR, *Utricula'ris*; from *utriculus*, (diminutive of *uter*, *utris*), 'a small bag or bottle.' Relating to or resembling a small bag or bottle.

UTRICULAR GLANDS, *Glandula utricula'ris* seu *uteri'næ*. The glands or follicles in the interior of the uterus, which are concerned in the formation of the decidua.

UTRICULUS, see Ejaculatory ducts, Uterus—u. *Communis*, see Semicircular canals—u. *Lacteus*, *Receptaculum chyli*—u. *Primordialis*, *Utri-*

cle, primordial—u. Prostaticus, see Ejaculatory ducts.

UVA, Uvula, see *Vitis vinifera*—u. Inversa, Paris—u. Lupina, Paris—u. Passa, see *Vitis vinifera*—u. Ursi, see *Arbutus uva ursi*—u. Vulpina, Paris.

UVÆ CORINTHIACÆ, see *Vitis Corinthiaca*.

UVÆ PASSÆ, *Rhages*, *Dried Grapes*, *Raisins*, see *Vitis vinifera*.

UVÆ PASSÆ MAJORES, see *Vitis vinifera*—u. Passæ minores, see *Vitis Corinthiaca*—u. Passæ sole siccatae, see *Vitis vinifera*.

UVARIA TRILOBA, see *Carica papaya*.

UVATIO, Ceratocolea, *Staphyloma*.

U'VEA, from *uva*, 'an unripe grape.' *Tu'nica acino'sa* seu *acinifor'mis* seu *uva'lis* seu *acina'lis* seu *uvifor'mis* seu *rhagoïdes* seu *uvea* seu *perforata*, *Membrana uvea*, *Rhagoïdes*, *Rhoz*, (F.) *Uvée*. Some anatomists have given this name to the choroid coat of the eye; others, to the posterior layer of the iris, on account of the black and very thick varnish that covers it. See Iris.

UVEA, COMMISSURE OF THE, Ciliary ligament.

UVÉE, Uvea.

UVELI'TIS, a word of hybrid formation; from *uvea*, 'the uvea,' and *itis*, denoting inflammation; properly, *Rhagoïd'itis*. Inflammation of the uvea. See Iritis.

UVIGENA, Uvula.

UVIGERA, Uvula.

UVULA, diminutive of *uva*, 'a grape.' *Pinnaculum fornicis guttura'lis*, *Uva*, *Staph'yle*, *Tintinnabulum*, *Columel'la*, *Cion*, *Cionis*, *Gargareon*, *Colum'na oris*, *Gurgu'lio*, *Interseptum*, *Processus seu Cartilago Uvifer*, *Uvig'ena*, *Uvig'era*, *Pap of the Throat*, *Himas*, *Plectrum*, *Sublingua*, *Sublinguim*, (Sc.) *Pap of the Hass*, (F.)

Luette. A fleshy appendix or prolongation, which hangs from the middle or free edge of the *velum palati*. The uvula has a conical shape, and is of a greater or less size in individuals. It is formed, especially, by the mucous membrane of the *velum palati*; and contains, within it, the *azygos uvulae* muscle. Its use is not clear.

Also, a small prominence or lobule in the portion of the cerebellum that forms the posterior boundary of the fourth ventricle, *Uvula cerebelli*. It is on the median line, and behind the nodulus.

UVULA, see Vermiform process inferior—u. Cerebelli, see *Uvula*—u. Decidua, *Staphylodema*—u. Relaxata, *Staphylodema*—u. Vesicæ, see Urinary bladder—u. Vesical, see Urinary bladder.

UVULAR, *Uvula'ris*, from *uvula*. That which belongs to the uvula.

UVULAR GLANDS are small follicles, belonging to the mucous membrane covering the uvula.

UVULARIA, so called from the flowers hanging like the uvula [?], *Ruscus hypoglossum*.

UVULARIA PERFOLIATA, *Smaller Bellwort*; indigenous; Order, *Melanthaceæ*; flowering in May and June. The root, when fresh, is subacrid and mucilaginous. A decoction of the plant is used in sore mouth. It is said to cure the bites of rattlesnakes.

UVULARIA GRANDIFLORA and *U. Sessilifolia* have similar properties.

UVULI'TIS, a word of hybrid formation, from *uvula*, and *itis*, denoting inflammation. *Angi'na uvula'ris*, *Staphyli'tis*, *Cioni'tis*, *Inflammatio u'vulae*, (F.) *Inflammation de la Luette*, *Falling down of the Palate*. Inflammation of the uvula. When to a slight degree, *Hypostaphyli'tis*.

V.

VACCIN, see *Vaccina*.

VACCINA, *V. primig'ena* seu *vaccinato'ria* seu *antivariolo'sa*, *Vaccin'ia*, *Vari'ola vaccina*, *V. vaccin'ica* seu *tuto'ria* seu *tutrix*, *Ezanthema vaccina* seu *antivariolo'sum*, *Syn'ocha vaccina*, *Em'phlysis vaccina inserta*, *Vacc'ola*, *V. scutellata*, *V. vera*, *Vari'olæ tuto'ria*, *Cow-pox*, *Kine Poek*, *Inoculated Cow-pox*, from *vacca*, 'a cow;' (F.) *Vaccine*. The cow-pox is a disease of the cow, arising spontaneously, which, if transmitted to man by means of inoculation, may preserve him from small-pox contagion. The promulgation of this valuable property of the vaccine virus is due to Dr. Jenner. When inoculating for small-pox in Gloucestershire, in 1775, he was surprised to meet with a number of persons in the same district, on whom the insertion of the virus produced no effect, although they had never passed through small-pox. On investigation, he found that all these persons had previously been affected by a pustular eruption of the cow, which they had taken by milking the animal; and which eruption they called *Cow-pox*. This discovery induced him to institute experiments, and he found that such preservative effect actually existed. The *Vaccine Virus*, *Virus Vaccinum*, (F.) *Vaccin* or the fluid of the eruption, is not now usually taken immediately from the cow; experience having demonstrated that it is nearly as efficacious when obtained from the human vesicle. The characteristic of cow-pox eruption is:—a semi-transparent, pearl-coloured vesicle,

with a circular or somewhat oval base; its upper surface, until the end of the 8th day, being more elevated at the margin than in the centre; and the margin itself being turgid, shining, and rounded, so as often to extend a little over the line of the base. This vesicle is filled with clear lymph, contained in numerous little cells, that communicate with each other. After the 8th or 9th day from the insertion of the virus, it is surrounded by a bright red, circumscribed areola, which varies in its diameter, in different cases, from a quarter of an inch to two inches; and is usually attended with a considerable tumour, and hardness of the adjoining areolar membrane. This areola declines on the 11th or 12th day; the surface of the vesicle then becomes brown in the centre; and the fluid in the cells gradually concretes into a hard, rounded scab or crust, of a reddish-brown colour, which at length becomes darker, contracted, and dry, but is not detached till three weeks after vaccination. It leaves a permanent, circular cicatrix, about five lines in diameter, and a little depressed; the surface being marked with very minute pits or indentations, denoting the number of cells of which the vesicle had been composed. This is the progress of the *genuine cow-pox*. At times, fever occurs about the 9th or 11th day; but, at others, not the slightest indisposition is felt. Aberrations from this progress occur, which must be attended to; as the same preservative influence is not exerted by *irregular* or *spurious cow-pox*. If the erup-

tion runs speedily to a height, has an areola too early, is irregular at its edges, and contains pus instead of a limpid fluid,—it cannot at all be depended upon.

Small-pox occurs, occasionally, as an epidemic after vaccination. For a while, the enthusiastic advocates of vaccination would not admit the affection to be small-pox; and, accordingly, they gave it the name Varioloid. It is unquestionably small-pox, but modified, and greatly divested of its terrors by previous vaccination; and it is said to happen less frequently after vaccination than after *small-pox inoculation*. Vaccination is now practised everywhere, except among those in whom ignorance and prejudice exclude the lights of reason and philanthropy. There is ground, however, for the belief, that for full protection *revaccination* may be occasionally necessary.

VACCINA ANTIVARIOLOSA, Vaccina—v. Primi-gena, Vaccina—v. Tutoria, Vaccina—v. Tutrix, Vaccina—v. Vaccinatoria, Vaccina.

VACCINAL, Vaccine.

VACCINATION, *Vaccina'tio*, from *vacca*, 'a cow;' *Cow-pox inoculation*, *Jenne'rian inoculation*. An operation which consists in inserting the vaccine virus under the cuticle, so that it may come in contact with the absorbents. It is extremely simple, and requires merely that the point of the lancet should be held under the cuticle for a short time. The best time for taking the matter from the *Cow-pox vesicle*, for vaccination, is about the 7th or 8th day, before the appearance of the areola, when it ought to be limpid and transparent. The most certain method is, to pass it from arm to arm; but this is not always convenient; and, hence it is taken upon *points* or pieces of quill, or between glasses. It must, of course, be softened for use. This is done by means of a little water, which does not destroy its efficiency. The scab, too, which falls off about the end of three weeks—sooner or later—is capable of communicating the affection, if dissolved in water; and this is the most common method of transmitting the vaccine virus in some countries.

VACCINATOR, *Vac'cinist*. One who inoculates for the cow-pox.

VACCINE, Vaccine.

VACCINE, *Vacci'nus*, *Vaccina'lis*, (F.) *Vaccinal*; same etymon. Relating or appertaining to vaccination, as the 'vaccine vesicle,' 'a vaccine physician.'

VACCINELLA. A term employed by some to designate spurious cow-pox. *Vaccin'o'is*, *Vac-ci'ola spu'ria* seu *lepro'sa*, (F.) *Vaccinelle*, *Vaccin'oïde*.

VACCINIA, Vaccina—v. *Palustris*, *Vaccinium oxycoccos*.

VACCINIST, Vaccinator.

VACCINIUM MACROCARPON, see *V. oxycoccos*.

VACCINIUM MYRTILLUS, either corrupted from *hyacinthus*, or, and more probably, *baccinium*; from *baccæ*, 'berries,' in allusion to its fruit. *Vitis idæ'a myrtill'us*, *Vaccin'ia myrtill'us*, *Vaccin'ium nigrum*, *Myrtle Berry*, *Bilberry*, *Bleaberry*, *Whortle-berry*, *Black Whorts*, (Sc.) *Blueberry*, (Prov.) *Huribleberry*, *Whimberry*, (F.) *Airelle Anguleuse*, *Raisin de Bois*. Ord. Vaccinieæ. *Ser. Syst.* Octandria Monogynia. The berries—*Baccæ Myrtillo'rum*—are esteemed to be antiscorbutic, when prepared with vinegar. They are also said to possess antiseptic and sub-astringent properties when dried. They are not used in medicine; but are frequently eaten with milk and sugar.

VACCINIUM NIGRUM, *V. myrtillus*.

VACCINIUM OXYCOCOS, *Oxycoc'cos*, *O. palus'*-

tris, *Schollera oxycoccos*, *Vaccinia palus'tris*, *Vitis Idæ'a palus'tris*, *Moorberry*, *Cranberry*, *Mossberry*, *Swamp Redberry*, *Sourberry*, (F.) *Canneberge*. The berries are pleasantly acid and cooling. They make an agreeable preserve. The common American Cranberry is from *Vaccinium macrocarpon*.

VACCINIUM PENNSYLVANICUM, *Low Blueberry*. The leaves and bark of the root are astringent.

VACCINIUM PUNCTATUM, *V. vitis idæa*—v. *Resinosum*, *Gaylussacia resinosa*.

VACCINIUM STAMINEUM, *Buckberry*, *Squaw Huckleberry*, *Deeberry*. The leaves of these plants are astringent.

VACCINIUM VITIS IDÆ'A, *V. punctatum*, *Vitis Idæ'a punctata*, *Am'pelos Idæ'a*, *Red Bilberry*, (Sc.) *Brawlin*, *Alpine Cranberry*, *Whortleberry*, *Cowberry*, (F.) *Airelle ou Canneberge ponctuée*. A decoction of the leaves has been used in calculous affections. They are astringent. The ripe berries are pleasantly acid, and refrigerant. *Whortleberries* are furnished by different species of *Vaccinium*.

VACCINOÏDE, Vaccinella.

VACCINOIS, Vaccinella.

VACCINUS, Vaccine.

VACCIOIA, Vaccina—v. *Leprosa*, Vaccinella—v. *Scutellata*, Vaccina—v. *Spuria*, Vaccinella—v. *Vera*, Vaccine.

VACILLA'TIO, *Tituba'tio*, from *vacillare*, 'to waver.' Staggering; waddling—*claudica'tio anat'ica*.

VACILLATIO DENTIUM, Odontoscisis.

VAGIN, Vagina.

VAGINA, 'a sheath,' *V. mulie'bris* seu *uteri'na* seu *U'teri* seu *Penis*, *Sinus mulie'bris* seu *Pudo'ris* seu *Puden'di*, *Col'les*, *Peris*, *Perin*, *Colpos*, *Vulvo-uterine canal*, (F.) *Vagin*, *Conduit de la pudeur*. A cylindrical canal, five or six inches long; situate within the pelvis, between the bladder and rectum. It communicates by one extremity, *Aulos*, with the vulva; by the other, *Fornix* seu *Fundus*, with the womb, *Pars* seu *Portio vagina'lis u'teri*, the neck of which it embraces. The vagina is lined, internally, by a mucous membrane; and is partly closed, in young females, by the hymen, and carunculae myrtiformes. Around the mucous membrane is a layer of spongy, erectile tissue; and a celluloso-vascular membrane. A constrictor muscle; numerous vessels furnished by the vaginal artery, particularly; veins and nerves, proceeding from the sciatic plexus, also, enter into the composition of the organ.

The term *Vagina* or *sheath*, *Theca*, is extended to many parts, which serve as envelopes to others.

Sheath, (F.) *Gaine*, is sometimes applied to the fascia enveloping the limbs; to areolar membrane, enveloping the muscles, and entering between their fibres; to that which surrounds the blood-vessels; to the synovial membranes surrounding tendons, and lining the gutters of bones, &c.

VAGINA CORDIS, Pericardium—v. *Femoris*, *Fascia lata aponeurosis*—v. *Funiculi Umbilicalis*, see *Funiculus umbilicalis*—v. *Glissonii*, Capsule of *Glisson*—v. *Malleolaris externa*, *Retinaculum tendinum perineorum*—v. *Muliebris*, *Vagina*—v. *Muscularis*, *Perimysium*—v. *Nervorum*, *Neurilemma*—v. *Penis*, *Vagina*—v. *Pili*, see *Hair*—v. *Portæ*, *Capsule of Glisson*—v. *Uterina*, *Vagina*.

VAGINA OF THE VENA PORTA, *Sheath of the Vena Porta*, (F.) *Gaine de la Veine-porte*, is the areolar membrane that accompanies the divisions of the vena porta into the substance of the liver.

VAGINÆ SYNOVIALES, *Bursæ mucosæ*.

VAG'INAL, *Vagina'lis*, from *vagina*, 'a sheath.' Relating or pertaining to a sheath.

VAGINAL ARTERY. This exists, as a matter of

course, only in the female. It arises from the hypogastric or from the uterine, vesical, internal pudic, umbilical, &c., and sends its branches, first to the lateral parts of the vagina, and afterwards to the anterior and posterior surfaces.

VAGINAL BILINARY PLEXUS. A plexus of ramifications of the hepatic duct through the capsule of Glisson.

VAGINAL BRANCHES OF THE VENA PORTA are those which have to pass through the sheath of the capsule of Glisson, previous to entering the interlobular spaces. In this course, they form the *vaginal plexus*. There are, also, *vaginal branches*, and a *vaginal plexus* formed by the hepatic artery.

VAGINAL COAT OF THE EYE, see Eye.

VAGINAL COAT OF THE TESTICLE, *Tunica Vaginalis* seu *Elytroides* seu *Elytrodes*, is the serous membrane which envelops the testicle. Before the descent of the testicle, the tunica vaginalis does not exist. It is formed by a prolongation, furnished by the peritoneum to the testicle when it issues from the abdomen. The tunica vaginalis forms a close sac, investing the testicle and epididymis, without containing them in its cavity, and reflected so as to form a bag around the circumference of the testis; hence it is divided into *Tunica vaginalis propria* and *Tunica vaginalis reflexa*. Between the two layers, the inner surface is smooth, and lubricated by a serous fluid.

VAGINAL GANGLIA, see Spermatic ganglion.

VAGINAL PLEXUS, see Vaginal branches of the vena porta.

VAGINAL PROCESS OF THE TEMPORAL BONE, (*F.*) *Apophyse vaginale* ou *engainante*, *Gaine de l'apophyse styloïde*, *Chaton*, is a bony crista, which embraces the base of the styloid process.

VAGINAL PULSE, Pulse, vaginal.

VAGINITIS, Leucorrhœa (vaginal.)

VAGINO-VESICAL, Vesico-vaginal.

VAGISSEMENT, Cry, Vagitus.

VAGITUS, (*F.*) *Vagissement*. The cry of the new-born child. *Squalling*.

VAGITUS UTERINUS. The cry of the child in utero.

VAGUS NERVUS, Pneumogastric.

VAIRON (*F.*), *Dispar œculus*. One who has eyes of different colours. It also means a *wall-eyed* animal, or one whose iris is surrounded by a whitish circle.

VAISSEAU, Vessel—*v. Sanguin*, Blood-vessel.

VAISSEAUX CAPILLAIRES, Capillary vessels—*v. Chylifères*, Chyliferous vessels—*v. Lactés*, Chyliferous vessels—*v. Lactifères*, Lactiferous vessels—*v. Ombilicæux*, Umbilical vessels—*v. Tourbillonnés*, Vasa vorticosa.

VALANIDA, Fagus sylvatica.

VALANTIA APARINE, Galium aparine.

VALERIAN, AMERICAN, *Cypripedium luteum*, *Valeriana pauciflora*—*v. Garden*, *Valeriana phu*—*v. Greek*, *Polemonium reptans*—*v. Official*, *Valeriana*—*v. Wild*, *Senecio aureus*, *Valeriana*, *V. pauciflora*.

VALERIANA, *V. officinalis* seu *minor*, *Leucolachnanum*, *Wild* or *Officinal Valerian*. *Ord. Valerianaceæ. Sez. Syst. Triandria Monogynia*. The root, *Valeriana* (*Ph. U. S.*), has been long extolled as an efficacious remedy in epilepsy, and in a variety of nervous complaints. It has been also advised as a tonic, antispasmodic, and emmenagogue. It has a strong, fetid odour; bitterish, subacid, and warm taste; and its virtues are extracted by water and alcohol. The distilled oil is official in the Pharmacopœia of the United States.

VALERIANA CAPENSIS, a South African species, has similar virtues.

VALERIANA CELTICA, *V. Saxatilis*, *Spica Celtica* seu *Celtica Dioscoridis* seu *Alpina*, *Nardus Celtica*, *Saltuica*, *Nardum Gallicum*, *Celtic Nard*, (*F.*) *Nard Celtique*. The roots of this Alpine plant have been recommended as a stomachic, carminative and diuretic. It has a moderately strong smell, and a warm, bitterish, sub-acrid taste.

VALERIANA DENTA'TA, *V. locus'ta*, *Corn Salad*. A wholesome, succulent plant, cultivated in Europe as a salad. It is antiscorbutic and gently aperient.

VALERIANA MAJOR, *V. phu*—*v. Locusta*, *V. dentata*—*v. Minor*, *Valeriana*—*v. Officialis*, *Valeriana*.

VALERIANA PAUCIFLORA, *American* or *Wild Valerian*, and *V. sylvatica*, have the properties of the other Valerians.

VALERIANA PHU, *V. major*, *Garden Valerian*, (*F.*) *Grande Valériane*. The root has been recommended in rheumatism; especially in sciatica, and in epilepsy.

VALERIANA SAXATILIS, *V. celtica*—*v. Spica*, *Nardus Indica*—*v. Sylvatica*, see *V. pauciflora*.

VALÉRIANE, GRANDE, *Valeriana phu*.

VALET À PATIN (*F.*), *Volse's Patini*. The common ligature forceps is a modification of this instrument invented by one Patin. It consists of two branches, united at the middle by a hinge, which may be separated or approximated by means of a screw or running ring. It is used for seizing hold of vessels that are to be tied.

VALÉTUDINAIRE, Valetudinary.

VALETUDINARIUM, Hospital.

VALETUDINARIUS, Sickly, Valetudinary.

VALETUDINARIY, *Valétudinaire*, *Valetudinaris*, *Inval'idus*, (*F.*) *Valétudinaire*, from *valetudo*, 'health,' *valeo*, 'to be well.' One of delicate health. One subject to frequent diseases. An *Inval'id*.

VALETUDO, *Sanitas*—*v. Adversa*, Disease—*v. Bona*, *Sanitas*—*v. Commoda*, *Sanitas*—*v. Secunda*, *Sanitas*.

VALGUS, see *Cnemosciosis* and *Kyllosis*.

VALIGA, Tinctura jalapii.

VALITUDO, *Sanitas*.

VALLECUA, Valley—*v. Unguis*, see *Nail*.

VALLEY, *Vallecula*, *V. Reilii*, (diminutive of *vallis*, 'a valley'.) (*F.*) *Grand Scissure Médiane du Cervelet*. The deep fissure on the inferior part of the cerebellum, which divides it into two symmetrical portions.

VALLUM. The eyebrow or supercilium. Also, a species of bandage.—*Galen*.

VALS, MINERAL WATERS OF. A French acidulous chalybeate at Vals, six leagues from Viviers, in the department of Ardèche. There are five springs, containing carbonic acid, sulphate of iron, and alum. They are employed in passive hemorrhages, leucorrhœa, &c.

VALVE, *Valvula*, *Dielsi*, (*F.*) *Valvule*, from *valvæ*, 'folding-doors,' itself from *volvo*, 'I fold up.' A small door. Any membrane or duplication of a membrane, which prevents a reflux of humours or other matters in the vessels and canals of the animal body. There are some valves, whose functions appear to be,—to retard or to modify the course of substances along canals, &c. See *mitral*, *sigmoid*, *tricuspid*, *ileo-cæcal valve*, &c.

VALVE OF FALLOPIUS, *Bauhin*, valve of—*v. Ileo-cæcal*, *Bauhin*, valve of—*v. Ileo-colic*, *Bauhin*, valve of—*v. of Tulpius*, *Bauhin*, valve of—*v. of Varolius*, *Bauhin*, valve of.

VALVES, KERKRINGIAN, *Valvula conniventes*—*v. Semilunar*, *Sigmoid valves*.

VALVULA, Valve—*v. Cæci*, *Bauhin*, valve of—*v. Cerebelli*, *Valvula Vieussenii*—*v. Coli*, *Bau-*

hin, valve of—v. Foraminis ovalis, Ovalis fossa—v. Guiffartiana, see Thebesius, veins of—v. Plei, Bauhin, valve of—v. Magna Cerebri, V. Viussenii.

VALVULA SEMILUNARIS, *Plica Semilunaris seu lunata, Membranula semilunaris conjunctiva*. A small doubling of the tunica conjunctiva, which lies between the caruncula lacrymalis and the ball of the eye. In birds, this is large, and called *Membrana nictitans seu Palpebra tertia*.

VALVULA TARINI, Velum medullare posterius—v. Thebesii, see Thebesius, veins of—v. Vaginae, Hymen—v. Venæ magnæ, see Thebesius, valve of.

VALVULA VIUSSE'NIL, *V. cerebelli seu Willisiana seu magna cerebri, Velum Viussenii seu interjectum cerebelli, V. apophysi vermiformi obtentum, V. medullarē seu medullarē anticum seu anterieus, Laconar ventriculi quarti superior, (F.) Valvule de Viussens, Voile médullaire supérieure*. A thin, medullary lamina, over the under end of the Aquæductus Sylvii and upper part of the fourth ventricle. At the sides of the valves are two medullary tracts, called *Processus ad Testes, Columnæ Valvulæ Viussenii* or *Oblique intersebral Com'missure*.

VALVULA WILLISIANA, Valvula Viussenii.

VALVULÆ BICUSPIDALES, Mitral valves.

VALVULÆ CONVIVENTES, *V. C. Kerkringii, Plicæ conviventes, Kerkringian valves*. Numerous circular folds in the intestinal canal for the pyloric orifice through the greater part of the small intestine. They are folds of the mucous membrane; and their chief use appears to be, to retard the course of the alimentary mass, and to afford a larger surface for the origin of chyloferous vessels.

VALVULÆ CORDIS, Ostiola cordis—v. Cordis mitrales, Mitral valves—v. Triglochines, Tricuspid valves—v. Trisulcæ, Tricuspid valves.

VALVULÆ, Valve—v. *d'Eustache, Eustachian valve*—v. *de Pyloro, see Pylorus*—v. *de Viussens, Valvula Viussenii*.

VALVULÆ ÉPISCOPALES, Mitral valves—v. *Sigmoides* on *Semilunaires*, Sigmoid valves.

VANDEL'LIA DIFFUSA. A native of Brazil, Guiana and Isle of France; *Order, Scrophulariaceæ*; is used there as an antihilious emetic and antiperiodic; and is regarded as an efficacious remedy in malignant fever and dysentery, especially in cases connected with a disordered state of the liver.

VANELLOE, Vanilla.

VANIL'LA, *Banilla, Banilas, Banilloës, Banilla, Benzo'ënil, Aracus aromaticus, (F.) Vanille, Baume de Vanille*. The *Vanelloe—Sil'igua vanillæ* seu *Banillæ* seu *Vaniglia* seu *vanillæ* seu *Araci aromatici*—is a long, flattish pod; containing, under a wrinkled, brittle shell, a reddish-brown pulp, with small, shining, black seeds. The parasitic plant which affords this pod is the *Epidendrum Vanilla, Vanilla aromatica* seu *Mexicana*, and other species. *Family, Orchidaceæ. Sex. Syst. Gynandria Monandria*. Vanelloes have an unctuous, aromatic taste, and a fragrant smell, like that of some of the finer balsams, heightened with musk. Although chiefly used as perfumes, they are reputed to possess aphrodisiac virtues.

VANILLA AROMATICA, see Vanilla.

VAPEURS, Hypochondriasis, Hysteria.

VAPOR SANGUINIS, Gaz sanguinis.

VAPORARIUM, *Atmist'ion, Lacon'icum, Pyria, Pyriate'rium, Vapour bath, from vapor, 'steam'*. A useful remedy in rheumatic and cutaneous affections; and wherever it is important to relax the cutaneous capillaries. In the *Russian Vapour Bath*, the vapour is produced by

throwing water over hot stones. Its temperature is from 122° to 145°.

VAPORARIUM, Hypocaustum, see Stove.

VAPORATIO, Evaporation.

VAPORES UTERINI, Hysteria.

VAPOUR, Flatulence—v. Bath, Vaporarium.

VAPOURISH, Hypochondriac, Hysterical.

VAPUROUS, Windy.

VAPOURS, Hypochondriasis, Hysteria.

VAPOURY, Hypochondriacal, Hysterical.

VARA, Barre.

VAREC, Kelp—v. *Vésiculeux, Fucus vesiculosus*.

VARENI, Ambulo-flatulentus, Gout (wandering.)

VARICE, Varix.

VARICEL'LA, (diminutive of *Variola*, Small-pox,) *Em'phlysis* seu *Exanthe'ma* seu *Syn'ochus varicella, Variola lymphatica* seu *spuria* seu *sylvestris, Variola notha* seu *illegitima* seu *voluticæ* seu *puellæ, Pseudo-variolæ, Æollion, Æollium, Chicken pox, (F.) Varicelle, Petite vérole volante, Vérolette, Fausse variole*. A disease characterized by vesicles scattered over the body, which are glabrous, transparent, and about the size of peas. They appear in successive crops, are covered by a thin pellicle, and, about the third, fourth, or fifth day from their appearance, burst at the top, and congregate into small, puckered scabs, which rarely leave a pit in the skin. Three varieties have, sometimes, been designated. 1. The *V. lentiformes*, or *lenticular chicken pox*, which are irregularly circular, and flattened on the top; the fluid being at first whitish, and afterwards straw-coloured. This is the *common chicken pox*. 2. The *Varicella coniformis, Pemphigus variolodes, Variola lymphatica, Hydrachnis, Conoidal Chicken pox, Swine pox, Water Pox, Water Jags*, in which the vesicles are generally acuminated, and the fluid pellucid throughout; and, 3dly, the *Varicella globularis* or *Hives*, in which the vesicles are globular and larger; the fluid being, at first, whey-coloured, and afterwards yellowish. These divisions are, however, very arbitrary, for they are generally confounded.

Hornpox is a popular variety of varicella.

Variola has been, sometimes, mistaken for this disease, and conversely. A little attention to the history of the eruption in the two affections will prevent error. *Varicella* is not contagious. At times, it prevails epidemically. It cannot be propagated by inoculation. The treatment is extremely simple; rest, abstinence, and the antiphlogistic regimen, being all that is generally required. See *Varioloid*.

VARICELLA VARIOLOIDEA, Varioloid.

VARICELLAR FEVER, see Varioloid.

VARICIFOR'MES PARAS'TATÆ. A name given, by some authors, to the ducts of the epididymis, because they seem knotty and varicose.

VARICOBLEPH'ARON, from *varix, varicis*, and *βλεφάρων*, 'eyelid.' A varicose tumour of the eyelid.

VARICOCEL'LE, from *varix, varicis*, and *κηλη*, 'a tumour;' *Oschecocel'le varico'sa, Her'nia varico'sa, Ramez varico'sus, Spermatocele, Cirsucele*. A varicose dilatation of the veins of the scrotum and spermatic cord. This latter variety of the disease is more common on the left side than the right. It appears under the form of a soft, doughy, unequal, knotty, compressible, and indolent tumour, situate in the course of the cord, and increasing from below upwards. It is less when the individual is in the recumbent posture, and increases when he is erect. It is, ordinarily, an affection of no moment, and is very common, requiring merely the use of a proper suspensory bandage. It has been advised, in bad cases, to

tie the enlarged vein, but the operation is not free from danger induced by phlebitis. Sir A. Cooper has proposed the removal of a portion of the scrotum, so as to render the remainder of the scrotum a natural bandage. This plan has been found effectual.

VARICOMPHALUS, from *varix*, *varicis*, and *ομφαλος*, 'the umbilicus.' Varicose tumour of the umbilicus; *circumphalus*.

VAR'ICOSE, *Varicosus*, (F.) *Variqueux*. From *varix*, *varicis*. Affected with varix; or belonging to, or connected with, varix;—as a *varicose vein*, a *varicose ulcer*, that is, one kept up by *varices*.

VARICOSITAS, see *Varix*—v. *Conjunctivæ*, *Circsophthalmia*.

VARICOSITY, see *Varix*.

VARIC'ULA, *Varix parva*. Diminutive of *varix*. Also, a varicose swelling of the veins of the tunica conjunctiva.—M. A. Severinus.

VAR'IOLA, *Variola*, *V. vera*, *Variolæ*, *Empy-esis Variola*, *Euphlog'ia*, *Chaspé*, *Pestis* seu *Febris variolosa*, *Æolec'thyma*, *Small-Pox*, *Pox* (N. of England); from *varius*, 'spotted,' or from *vari*, 'pimples'; (F.) *Variolæ*, *Petit Vérole*, *Picote*. A disease, now of somewhat less interest than before the discovery of vaccination. It is of a very contagious nature, and is supposed to have been introduced into Europe from Asia, at an early period of the middle ages. It is characterized by fever, with pustules appearing from the third to the fifth day, and suppurating from the eighth to the tenth, and it possesses all the distinctive properties of the major exanthemata. It is capable of being produced by inoculation, but this *inoculated small-pox*—*Variola inser'ta*—communicates the disease as readily through the air as the *natural small-pox*, or that received without inoculation.

Small-pox is distinguished into two classes, according to the character of the eruption, the *discrete* or *distinct*, and the *confluent*. 1. In **VARIOLA DISCRE'TA**, *Empyesis variola discreta*, *Variola discreta benigna*, *Variolæ regulares seu discretae*, *Distinct Small-pox*, the pustules are usually of the size of peas; distinct, distended, and circular; the intervening spaces being red; the fever inflammatory throughout, and ceasing when the eruption is complete. 2. In **VARIOLA CON'FLUENS**, *Empyesis variola confluens*, *Variolæ regulares confluentes*, *Vesic'ulæ Divæ Bar'baræ*, *Vésicules de Sainte-Barbe*, *Confluent Small-pox*, the pustules are confluent, or run together; flaccid and irregularly circumscribed; the intervening spaces being pale, and the accompanying fever typhoid. In children, diarrhoea, and, in adults, pytalism, with swelling of the hands and feet, generally appear, towards the period of the *secondary fever*, which occurs from the tenth to the thirteenth day. The fever that precedes and accompanies the eruption is called the *Eruptive fever*. The prognosis is favourable in the distinct kind, if properly managed. The confluent is always dangerous,—the unfavourable symptoms being—flattening of the pustules, or subsidence of the eruption; the breathing becoming much obstructed or oppressed; or marks of inflammatory and congestive affections occurring in the different viscera. The treatment of the distinct kind is very simple: the antiphlogistic regimen being all that is necessary. The confluent kind requires the same management as typhus fever.

When the pimples are confluent in patches, the patches, being, however, separated by intervals of unaffected skin: it constitutes the clustered, coherent, or corymbose variety—*Variola corymbo'sa*.

VARIOLA AMBOINENSIS, *Francia*—v. *Corym-bosa*, see *Variola*—v. *Inserta*, *Variola* (by inoculation)—v. *Lymphatica*, *Varicella*—v. *Mitigata*, *Varioloid*.

VAR'IOLA sine VAR'IO'IS, *Variolous Fever*. These terms are applied to cases occasionally observed during the prevalence of variola, in which the constitutional phenomena are present without the cutaneous eruption.

VARIOLA SPURIA, *Varicella*—v. *Vaccina*, *Vaccina*—v. *Vaccinatorum*, *Varioloid*.

VARIOLÆ, *Variola*—v. *Equinae*, see *Grease*—v. *Illegitima*, *Varicella*—v. *Modificata*, *Varioloid*—v. *Nothæ*, *Varicella*—v. *Pncellæ*, *Varicella*—v. *Sylvestris*, *Varicella*—v. *Tutoriæ*, *Vaccina*—v. *Vera*, *Variola*—v. *Volaticæ*, *Varicella*.

VARIO'LIATION, *Inoculation* (*Small-pox*.)

VARIOLE, *Variola*.

VARIOLE, *Variola*.

VARIO'LIQUE, *Variolous*.

VAR'IOLOID, *Variolois*, *Varioloï'des*, *Vari'ola modific'ata seu mitiga'ta seu vaccinato'rum*, *Varicel'la* (of some), *Varicel'la Varioloï'dea*, from *variola*, *small-pox*, and *ειδος*, 'form,'—resembling *small-pox*. This is, really, *small-pox*, modified by previous inoculation or vaccination; and hence it has been properly called *modified small-pox*. That it is *small-pox* is proved by the fact, that matter, taken from a varioloid pustule, will communicate *small-pox* to one who has never been vaccinated. It is, almost always, a milder disease than *small-pox*; and this circumstance, with its shorter duration, exhibits the salutary effects of previous vaccination or inoculation. It has appeared epidemically.

Occasionally, when varioloid is epidemic, *varioloid* or *varicellar fever* occurs without the eruption. This is the *varicellæ sine varicellis* of Mr. Erasmus Wilson, who calls varioloid, *varicella*.

VARIOLOID FEVER, see *Varioloid*.

VARIOLOIS, *Varioloid*.

VAR'IOLOUS, *Variolosus*, (F.) *Variolique*. Relating or belonging to variola.

VARIQUEUX, *Varicose*.

VARIX, *genitive varicis*, *Phlebeurys'ma*, *Phlebec'tasis*, *Her'nia* seu *Ectas'ia venarum*, *Angiectas'ia venosa*, *La'ta*, *Cirsus*, *Cedma*, *Varicose Vein*, (F.) *Varice*, is considered, by some, to come from the verb *variare*, 'to turn,' 'to twist,'—on account of the sinuosities of varicose veins. Dilatation of a vein; *Varicos'itas*, *Varicosity*. Varices are owing to local retardation of the venous circulation; and, in some cases, to relaxation of the parietes of the veins. They are very common in the superficial veins of the lower limbs, especially of pregnant females. The tumour or tumours, formed by varices, are soft, knotty, unequal, indolent, and livid; without pulsation, and yielding readily to the impression of the finger; but returning as soon as the compression is discontinued. Sometimes, the vein bursts and gives rise to hemorrhage. The treatment is usually palliative, and consists in exerting a uniform and constant pressure upon the part, by means of an appropriate bandage. The radical cure has, also, been obtained by extirpation, division of the vein, or ligature. The second course is apt to be followed by phlebitis.

VAROLI, *BRIDGE OF*, *Pons Varolii*.

VARUS, *Aene*, *Ionthus*, see *Entogonyancon* and *Kyllosis*—v. *Mentagra*, *Sycosis*.

VAS, *Vessel*, *Penis*—v. *Deferens mulieris*, *Tuba Fallopiana*—v. *Urinarium*, *Ureter*.

VASA ABERRANT'IA. Peculiar ramifications of the biliary duct in the liver are so called by E. H. Weber.—Kölliker.

VASA ABSORBENTIA, Absorbent vessels—v. Afferentia, see Afferent and Efferent—v. Capillaria, Capillary vessels—v. Chylifera seu Chylofera, Chyliferous vessels.

VASA CHYLOPOËTICA URINIFERA. Blood-vessels, which, according to Lippi, convey drink from the chyliferous vessels to the renal veins.

VASA EFFERENTIA, see Efferent—v. Exhalantia, Exhalant vessels—v. Hydragoga, Lymphatic vessels—v. Inferentia, see Afferent and Efferent—v. Lactea, Chyliferous vessels, Lactiferous vessels—v. Meningea, Meningeal vessels—v. Sedalia, Hæmorrhoidal vessels—v. Lymphatica, Lymphatic vessels—v. Nutrientia, Vasa vasorum—v. Nutritia, Vasa vasorum—v. Recta, see Rete testis—v. Resorbentia, Absorbent vessels, Lymphatic vessels—v. Serosa, see Capillary vessels.

VASA VASORUM, *V nutritiva* seu *nutrientia*. Small vessels that supply larger. However minutely a vessel is traced, its parietes will be found supplied with blood for its nutrition by a smaller vessel.

VASA VORTICOSA, (F.) *Vaisseaux tourbillonnés*, *Tourbillon vasculaire*. The contorted vessels which creep on the choroid coat of the eye; ciliary veins.

VASCOA AMPLEXICAULIS. A South African shrub, *Nat. Ord.* Leguminosæ, the roots of which taste like liquorice. They are used, in decoction, in catarrh and phthisis, and are a good substitute for liquorice.

VASCULA SERPENTINA, see Testicle.

VASCULAR, *Vascularis*, *Vasculo'sus*, *Angé'al*, (F.) *Vasculaire*, from *vās*, *vasis*, 'a vessel,' *vasculum*, 'a little vessel.' That which belongs or relates to vessels;—arterial, venous, or lymphatic; but generally restricted to blood-vessels only. Full of vessels. Bichat gave the name *Vascular system*, *Système vasorum*, *Hæmatologica*, to the blood-vessels, and of this he made two divisions. 1. The *Arterial system*, or *System of red blood*, (F.) *Système vasculaire à sang rouge*, which commences with the radicles of the pulmonary veins; and includes the pulmonary veins, the left cavities of the heart, and the aorta with all its ramifications. The blood, in this system, is distributed to the general capillary system, where it loses its arterial quality and becomes venous. 2. The *Venous system* or *Vascular system of black blood*, (F.) *Système vasculaire à sang noir*, carries the blood from every part of the system to the lungs. It takes its origin in the general capillary system; continues in the veins, right auricle, and ventricle of the heart and the pulmonary artery and its branches, and is finally lost in the capillary system of the lungs. See Circulation.

VASCULAR LAYER, see *Tache embryonnaire*—v. Radicals, Radical vessels—v. Substance of the Kidney, see Kidney—v. System, see Vascular—v. System, intermediate, Capillary system—v. System, peripheral, Capillary system—v. Tumour, see Hæmorrhoids.

VASCULARITY, *Vascularitas*, (F.) *Vascularité*. The state of being vascular, or largely supplied with vessels.

VASCULUM, Penis, Vessel.

VASCULUM ABERRANS, *Appendix to the Epididymis*. A small convoluted duct, of variable length, generally connected with the duct of the epididymis, immediately before the commencement of the vas deferens.

VASE À SAIGNER, Cup.

VASTUS. That which is *vast* or has a great extent.

VASTUS EXTERNUS and **VASTUS INTERNUS** are

two considerable, fleshy masses, which form part of the *Triceps cruris*.

VASUM, Vessel.

VATER, AMPULLA OF, (F.) *Ampoule de Vater*. An ampulla formed by the orifice of the pancreatic duct in the duodenum.

VATER, CORPUSCLES OF, Corpuscles, Pacinian.

VATERIA INDICA, see Copal.

VATICINIUM CHIROMANTICUM, Chiromancy.

VAULT, (old F. *Voulte*), 'a round or turn;' from *volvere*, *volutum*, 'to turn;' *Fornix*, *Cam'era*, (F.) *Voûte*. A name given by anatomists to several parts which are rounded superiorly; concave and arched inferiorly,—as the *Vault of the cranium* or the upper part of the skull,—the *Palatine vault* or *roof of the mouth*, &c., &c.

VAUQUELINE, Strychnia.

VEAL TEA. This may be made in the same manner as beef tea, by using a pound of fillet of *veal*, free from fat and sliced, and a pint and a half of *boiling water*; and boiling for half an hour. It may also be made with the same quantity of the fleshy part of a knuckle of veal.

VECORDIA, Idiotism.

VECTIS, Lever—v. Elevatorius, Elevator—v. Triploides, Elevator, triploid.

VECTOR CANAL, Tube, Fallopian.

VEGETALITY, *Vegetalitas*, (F.) *Végétalité*. The aggregate of physiological phenomena, which exist alone in the vegetable, but are common to both plants and animals. See Animality.

VEGETARIAN, see Vegetarianism.

VEGETARIANISM. Same etymon as Vegetation. A modern term, employed to designate the view, that man, for his full mental and corporeal development, ought to subsist on the direct productions of the vegetable kingdom, and totally abstain from flesh and blood. An embracer and practiser of this doctrine is called a *vegetarian*.

VÉGÉTATIF, Vegetative.

VEGETATION, *Vegetatio*, 'growing like a plant,' from *vegeo* or *vigeo*, 'I flourish.' A morbid production, which rises as an excrescence on the valves of the heart, in syphilis, &c.—as the *Cauliflower excrescence*, &c. The term is also applied to the fleshy granulations or *Hypersarcoses*, which sometimes arise at the surfaces of wounds or ulcers.

VEGETATIVE, *Vegetativus*, (F.) *Végétatif*, same etymon as the last. Having relation to growth or nutrition; hence, the *vegetative* or nutritive functions.

VEGETATIVE LAYER, see *Tache embryonnaire*.

VEGETATIVUS, Vegetative.

VEHICLE, *Vehiculum*, *Oche'na*, *Constituens*, (F.) *Véhicule*, from *vehere*, 'to carry.' Anything which serves to carry; thus air is the *vehicle* of sound; the arteries are the *vehicles* of the blood, &c. In *Pharmacy*, the name *vehicle* is given to any excipient; or to substances which serve as the media of administration for any medicine.

VÉHICULE, Vehicle.

VEILED PUFF, see *Cavernous respiration*.

VEIN, *Vena*, diminutive *ven'ula*, *Phlebs*, *Phleps*, (F.) *Véine*. The veins are vessels for the conveyance of black blood from every part of the body to the heart. They are found wherever there are arteries, and, altogether, form the *venous system*, which may be subdivided into two distinct secondary systems. 1. The *General venous system*, which commences in all the organs, by very minute radicles; and terminates in the heart by the cava and the coronary vein. 2. The *Abdominal*

venous system, which is limited to the abdominal cavity; commences, also, by a great number of branches, and terminates in the liver by a single trunk, which subdivides in that organ. It is called, also, the *System of the Vena Porta* or the *Portal System*. See *Porta*. The veins form two sets, one *deep-seated*, *Venæ satel'ites*, *V. concom'ites*, which accompany the arteries; the other *superficial* or *subcutaneous*. Their parietes, which are thinner than those of the arteries, are composed of two coats; the one, external, loose, extensible, and with parallel, longitudinal fibres — the *proper membrane*; the other, the *common* or *inner membrane*, which is thin, polished, and has numerous duplicatures or folds forming parabolic valves. These valves are most numerous in the veins of the lower extremities. The coats of the veins are supplied with small arteries or *vasa vasorum*, veins, and lymphatics. They have not as many nervous filaments as the arteries. These filaments are from the great sympathetic.

TABLE OF THE VEINS.

1. VEINS WHICH FORM THE SUPERIOR VENA CAVA.

- | | | | | | | |
|---|----------------------------------|-------------------------------------|---|------------------------|--|---------------------|
| 1. Subclavians. | Receive the | 1. Axillary which | Receives the | 1. Posterior ulnar. | | |
| | | | 1. Basilic, formed of the | 2. Anterior ulnar. | | |
| | | | 2. Cephalic, forming the | 3. Median basilic. | | |
| | | | 3. Circumflex veins. | 1. Superficial radial. | | |
| | | | 4. Inferior scapular. | 2. Median cephalic. | | |
| | | | 5. Long thoracic. | | | |
| | | | 6. Superior thoracic. | | | |
| | | | 7. Acromial veins. | | | |
| | | | 2. External Jugular. | Receive the | 1. Internal maxillary, composed of the | 1. Pterygoid. |
| | | | | | | 2. Spheno-palatine. |
| | | | | | | 3. Alveolar. |
| | | | | | | 4. Infra-orbital. |
| 5. Mental. | | | | | | |
| 6. Inferior dental. | | | | | | |
| 7. Deep temporal. | | | | | | |
| 8. Superficial Temporal, composed of the | 1. Middle temporal. | | | | | |
| 2. Anterior auriculars. | | | | | | |
| 3. Transverse of the face. | | | | | | |
| 3. Posterior Auricular. The trunk then takes the name of <i>External Jugular</i> , and in its course along the neck, receives — | | | | | | |
| 4. Cervical cutaneous. | | | | | | |
| 5. Trachelo-scapular, &c. | | | | | | |
| 3. Internal Jugular. | Receive the | 1. Ophthalmic Vein, composed of the | 1. Superior Cerebral Veins. | | | |
| | | | 2. Veins of the Corpus Striatum. | | | |
| | | | 3. Veins of the Choroid plexus. | | | |
| | | | 4. Superior Cerebellar Veins. | | | |
| | | | 5. Inferior Cerebellar Veins. | | | |
| | | | 6. Lateral and inferior Cerebral Veins. | | | |
| | | | 7. Ophthalmic Vein, composed of the | 1. Lachrymal. | | |
| | | | 2. Central of the retina. | | | |
| | | | 3. Infra-orbital. | | | |
| | | | 4. Ciliary. | | | |
| | | | 5. Ethmoidal. | | | |
| | | | 6. Palpebral, and | | | |
| 7. Nasal Veins. | | | | | | |
| 8. Facial vein, called <i>angular</i> , near the eye, receiving the | 1. Palpebral, and | | | | | |
| | 2. Superillary Veins. | | | | | |
| | 3. Dorsals of the nose. | | | | | |
| | 4. Superior Coronaries | | | | | |
| | 5. Inferior of the lip. | | | | | |
| | 6. Several Buccal and | | | | | |
| | 7. Masseteric Veins. | | | | | |
| | 8. Ranine. | | | | | |
| | 9. Submental, and | | | | | |
| | 10. Inferior Palatine. | | | | | |
| | 9. Lingual and Pharyngeal Veins. | | | | | |
| | 10. Superior thyroid. | | | | | |
| | 11. Occipital, and | | | | | |
| | 12. Veins of the Diploë. | | | | | |

2. Right Internal Mammary Vein.
3. Inferior Thyroid Vein, opening into the Vena Cava, between the two Subclavians.
4. Vena Azygos, which receives
- 1. Right Bronchial.
 - 2. Intercostal Veins.
 - 3. Semi-azygos.

2. VEINS WHICH FORM THE INFERIOR VENA CAVA.

- | | | | | | | | | | | | | |
|--|-------------|------------------------------------|---|-------------------------|-------------------------------------|-----------------------------|--------------------------|--------------------------|---------------------------------------|---|--|---|
| 1. Common Iliacs. | Receive the | 1. External Iliacs, formed by the— | 1. Femoral or Crural, which is a continuation of the | 1. External Saphena and | 2. Internal Saphena, which receive— | 1. Several abdominal veins. | 2. Circumflex Iliac, and | 3. External pudic veins. | | | | |
| | | | 2. Popliteal, commencing by 3. veins which accompany the fibular arteries, and receiving the— | | | | | | | | | |
| | | | 2. Internal Iliacs which receive the— | | | | | | 1. Vesical Veins, commencing with the | 1. Dorsal veins of the penis of the male. | 2. Veins of the clitoris, in the female. | |
| | | | 2. Sacro-lateral Veins. | | | | | | | | | |
| | | | 3. Middle Sacral Vein. | | | | | | | | | |
| | | | 4. Lumbar Veins—four in number on each side, commencing by an— | | | | | | 1. Abdominal branch. | | | 2. Dorsal branch. |
| | | | 5. Spermatic Veins, commencing with the | | | | | | 1. Spermatic plexus in the male. | | | 2. Those of the Ovarium, Fallopian tube, &c. in the female. |
| | | | 6. Renal Veins. | | | | | | | | | |
| | | | 7. Capsular and Adipose Veins. | | | | | | | | | |
| | | | 8. Hepatic Veins. | | | | | | | | | |
| | | | 9. Middle, | | | | | | | | | |
| | | | 10. Left, and | | | | | | Hepatic Veins. | | | |
| 11. Right | | | | | | | | | | | | |
| 12. Inferior Diaphragmatic Veins, two in number. | | | | | | | | | | | | |

3. VEINS OF THE HEART.

1. Great right Coronary.
2. Small right Coronary.
3. Left Coronary Veins.

4. VEINS WHICH FORM THE VENA PORTA.

- | | | | | |
|------------------|-------------|---|--------------------------------------|--|
| 1. Splenic Vein. | Receive the | 1. Veins which correspond to the vasa brevia. | 2. Right and left gastro-epiploic. | |
| | | | 3. Duodenal, and | |
| | | | 4. Pancreatic veins. | |
| | | | 5. Coronary Vein of the Stomach, and | |
| | | | 6. Small mesenteric vein. | |
| | | | 2. Superior Mesenteric Vein. | |

VEIN, BRONCHIAL, LEFT, see Azygos—v. Demi-azygos, see Azygos—v. Frontal, see Facial vein—v. Semi-azygos, see Azygos (vena)—v. Superior intercostal, left, see Azygos—v. Tibio-malleolar, Saphena, great—v. Palato-labial, Facial vein—v. Peroneo-malleolar, Saphena minor—v. Varicose, Varix.

VEINE, Vein—v. Cave, Cava vena—v. Céphalique, Jugular vein, internal—v. Céphalique du pouce, Cephalic vein of the thumb—v. Cubitale cutanée, Basilic vein—v. Fessière, Gluteal vein—v. de Médine, Draunculus—v. Porte, Porta vena—v. Prélombo-thoracique, Azygos, (vena)—v. Préparate, Facial vein—v. Radiale cutanée, Cephalic vein—v. Sans paire, Azygos, vein—v. Trachélo-sous-cutanée, Jugular vein, external.

VEINES ARTÉRIELLES, Arterial veins—v. Ciliaires, Ciliary veins—v. Sous-clavières, Subclavian veins—v. Sus-hépatiques, Hepatic veins.

VEINEUX, Venous.

VEINS, CORONARY, Cardiac veins—v. Intra-lobular, Hepatic veins—v. Supra-hepatic, Hepatic veins.

VEINSTONE, Phebolite.

VEINULE, Venula.

VEJUCO DE MAVACURE, see Curare.

VELAMEN NATIVUM, Integument.

VELAMENTA BOMBYCINA, Villous membranes—v. Cerebralia, Meninges—v. Infantis, Membranes of the foetus.

VELAMENTUM ABDOMINALE, Peritonæum—v. Corporis commune, Integument—v. Linguae, Glosso-epiglottic ligament—v. Nativum, Integument.

VÉLAR, Erysimum.

VELLICATIO, Tic.

VELOSYNTHESIS, Staphylorrhaphy.

VELUM, 'a veil, a cover,' Velum pendulum palati — v. Apophys vermiformi obtentum, Valvula Viuessenii — v. Interjectum cerebelli, Valvula Viuessenii — v. Medullare anticum, Valvula Viuessenii.

VELUM MEDULLA'RÉ INFERIUS, (F.) *Voile médullaire inférieur*. A name given, by Reil, to the medullary band or strip, by which the cerebellum communicates with the medulla.

VELUM MEDULLA'RÉ POSTERIORIS seu POSTICUS seu SEMILUNA'RÉ, *Valvula Tari'ni*. The small posterior valve of the cerebellum; a thin medullary plate, situate between the medulla oblongata and vermis inferior, in front of the nodulus.

VELUM PALATI, Velum pendulum palati — v. Palatinum, Velum pendulum palati.

VELUM PENDULUM PALATI, 'Pendulous veil of the palate.' *Velum, V. Palati'num* seu *Palati seu Pendulum* seu *staphyli'num, Pala'tum pendulum* seu *mollè* seu *mob'ile, Pen'dulum* seu *Clavstrum Palati, Palatum Mollè, Soft Palate*, (F.) *Septum Staphylin* (Ch.), *Voile du Palais*. A movable, soft, and broad septum, attached to the posterior extremity of the palatine arch, and separating the mouth from the pharynx. Its form is nearly quadrilateral. Its anterior surface corresponds to the month; the posterior to the pharynx. Its superior edge is fixed to the palatine arch; the inferior is free, floating, and has an appendix at its middle — the *uvula*. The lateral margins of the velum are held down by two folds, separated from each other by a triangular space; these are called the *pillars*; the anterior passes to the base of the tongue, the posterior to the sides of the pharynx. The velum palati is formed of a mucous coat, which contains numerous follicles, and of a muscular stratum, in which are the peristaphylini interni and p. externi muscles, the glosso-staphylini, the pharyngo-staphylini and the palato-staphylinus. The arteries of the velum palati are furnished by the internal maxillary, the labial and the superior pharyngeal. Its veins open into the internal jugular. Its nerves are sent off from the ganglion of Meckel, and come from the palatine branches. The glosso-pharyngeal nerve, likewise, sends it some filaments.

VELUM STAPHYLINUM, Velum pendulum palati — v. Viuessenii, Valvula Viuessenii.

VELVET LEAF, Abutilon Avicennæ, Pareira.

VENA, Vein, Penis — v. Alba renum, Ureter — v. Alba thoracis, Thoracic duct — v. Apoplectica, Jugular vein, internal — v. Arteriosa, Porta vena, Pulmonary artery — v. Capitis, Cephalic vein — v. Cava, Cava vena — v. Cubiti interior, Basilic vein — v. Demiazgyos, see Azygos — v. Falcis cerebri, Sinus longitudinalis inferior — v. Hemiazgya, see Azygos — v. Lactea, Porta vena — v. Lienalis, Splenic vein — v. Magna, Porta vena — v. Medina Arabum, Dracunculus — v. Medinensis, Dracunculus — v. Ostiaria, Porta vena — v. Pari carens, Azygos, (vena) — v. Portalis, Porta vena — v. Portarum, Porta vena — v. ad Portas, Porta vena — v. quæ ad Portas est, Porta vena — v. Ranaalis, Porta vena — v. sine Pari, Azygos, (vena) — v. Splenica, Splenic vein — v. Stelechæa, Porta vena — v. Subalaris, Vena axillaris — v. Terminalis, Circulus venosus.

VENÆ APOPLECTICÆ, Jugular veins — v. Cavæ hepatis, Hepatic veins — v. Centrales, Intralobular veins — v. Concomites, see Vein — v. Galeni, Choroid, (veins) — v. Innominate, see Innominate — v. Intralobulares, Intralobular veins — v. Lactææ, Chyliferous vessels — v. Lymphaticæ, Lymphatic vessels — v. Micantes, (arteries,) see Artery — v. Pulsatiles, (arteries,) see Artery —

v. Satellites, see Vein — v. Soporales, Jugular veins — v. Sphagittides, Jugular veins.

VENÆSECTIO, see Blood-letting — v. Revulsoria, see Blood-letting.

VENÆ VORTICO'SÆ. The veins which principally form the external or venous layer of the choroid coat of the eye; so called from their peculiar arrangement; from *vertex* seu *vortex*, 'a whirlpool.'

VENAL, Venous.

VENEFICIUM, Poisoning.

VENENATION, Poison, Poisoning, Venom.

VENENATUS, Venomous.

VÉNÉNEUX, Poisonous.

VENÉNOSE, Venomous.

VENENUM, Poison, Venom.

VENÉREAL, *Vene'reus, Aphrodisiacus, Vene'rean*, (F.) *Vénérien*, from *Venus, veneris*, 'the goddess of pleasure.' That which relates to the pleasures of love. In a more restricted sense, the word *veneréal* — as well as *aphroditic* — is synonymous with *syphilitic*, and also with *syphilis*. Some authors have proposed that those diseases should be called *veneréal* which are produced by excess in venery; and that *syphilitic* should be limited to those which are the result of impure connexion. It is, also, used in the same sense as *aphrodisiac*, — adapted to excite venereal desire.

VENEREAL DESIRE, Libido — v. Disease, Syphilis.

VÉNÉRIEN, Venereal. This term, also, means one labouring under syphilis; as *Hôpital des vénériens*.

VENERIVAGUS, Libidinous.

VENERY. Same etymon. The pleasures of love. Sexual communication. Coition.

VENESECTIO, see Blood-letting.

VENIMEUX, Venomous.

VENIN, Venom.

VENOM, *Vene'num, Tox'icum, Venena'tion*, (F.) *Venin*. A poisonous fluid secreted by certain animals, as the viper, in a state of health, and which they preserve in a particular reservoir, to use as a means of attack or defence. It differs, according to some, from *virus*, as the latter is always the result of a morbid process, which may be produced by the individuals who receive it, in their turn, and be transmitted to others.

VENOM, QUICKENING, Sperm — v. Vital, Sperm.

VEN'OMOUS, *Venena'tus, Ven'ense*, (F.) *Venimeux*. An epithet applied to animals which have a secretion of venom, as the viper, rattlesnake, &c., as well as to the venom itself; and, by some, to liquids in the animal body, which have been so perverted by previous disease, that their contact occasions serious mischief in sound individuals; as happens in hydrophobia. *Virus* is more commonly used in this case.

VENOSITAS, Venosity — v. Sanguinis, Prædominium sanguinis venosi.

VENOS'ITY, *Venos'itas, Ve'nousness, Venous state* or *cachez'ia, Melana'mia, Melano'sis universa'lis*, from *vena*, 'a vein.' A condition in which, it has been supposed, the blood is moved slowly; is more venous; and the venous blood itself in greater quantity. This state is said to be chiefly observed in hemorrhoids, gout, hypochondriasis, melancholia, &c. — Puchelt.

VENOUS, *Venal, Veno'sus*, (F.) *Veineux*. Same etymon. Appertaining to a vein, or to the blood of the veins; as *venous cachexia, venous pulse*.

VENOUS CACHEXIA, Venosity — v. Hum, *Bruit de Diable* — v. State, Venosity — v. System, see Vascular — v. System, abdominal, Porta vena.

VENOUS SYSTEM OF JACOBSON. A system of vessels in the three classes of vertebrated animals other than the mammalia, which forms a

communication between the vena porta and the vena cava.

VENOUSNESS, Venosity.

VENT, Wind.

VENTER, Abdomen, Belly, Uterus. In law, venter designates the maternal parentage of children. Thus, if A were B's child by his first wife, he would be described in law as "by the first venter." "A died seized, leaving two infant daughters by different venters."

VENTER IMUS, Abdomen, Hypogastrum, Neigera — v. Inferius, Abdomen — v. Infimus, Abdomen — v. Magnus, Inguvies — v. Medius, Thorax — v. Parvus, Hypogastrum — v. Propendens, Hysteroloxia anterior — v. Renum, Pelvis of the kidney — v. Supremus, Cavum cranii.

VENTEUX, Windy.

VENTILATION, *Ventilatio*, from *ventus*, 'wind,' *ventulus*, 'a little wind.' The act of renewing the air of vessels, hospitals, and apartments, or of situations where many people are collected together. The utility of such renewal must be evident, when it is considered that atmospheric air loses its oxygen during respiration, and that carbonic acid supplies its place. Stagnant air, also, becomes loaded with numerous impurities; and hence one of the greatest hygienic improvements, of modern times, has been a proper attention to circulation of air. It is, moreover, one of the most valuable additions to our stock of therapeutical agencies in many diseases.

Instruments used for the purpose of renewing the air, in ships, apartments, &c., have been called *ventilators*.

VENTOSITÉ, Flatulence.

VENTOSITY, Flatulence.

VENTOUSES SCARIFIÉES, Cupping with the scarificator.

VENTOUSES SÈCHES, Cupping, dry.

VENTRAL, from *venter*, 'the belly.' Abdominal.

VENTRAL HER'NIA, *Her'nia ventralis*. Direct hernia occurring in any part of the abdomen. It is most frequently found between the recti muscles.

VENTRALE, 'an apron,' Belt (Russian.)

VENTRALE CUTA'NEUM, 'Cutaneous apron.' (F.) *Tablier*. An elongation of the nymphæ in the Bosjesman female, which hangs down before the vulva like an apron.

VENTRE, Abdomen — v. *Inferieur*, Abdomen — v. *Resserré*, Constipation.

VENTRE INSPICIENDO DE, see *De ventre inspiciendo*.

VENTRICLE, *Ventriculus*, diminutive of *venter*, 'belly.' (F.) *Ventricale*. Literally, a little belly. A name given, in anatomy, to various parts.

VENTRICLE OF ARAN'TIUS. A small cavity, lined with gray substance, at the point of the calamus scriptorius.

VENTRICLES OF THE BRAIN, *Ventriculi seu Cavitates seu Sinus Cerebri*, (F.) *Ventricules du cerveau*, are five cavities in the interior of that organ, which are distinguished into the *lateral ventricles*, *middle ventricle*, *fourth ventricle* or *ventricle of the cerebellum*, and *fifth ventricle*. The *middle ventricle* or *third ventricle*, (F.) *Ventricule moyen du cerveau*, is situated in front of the pineal gland. It is bounded, *above*, by the tela choroidea and the fornix; *below*, by a portion of cerebral substance, which separates it from the base of the cranium; *laterally*, by the thalami nervorum opticorum; *anteriorly*, by a medullary cord, called the *anterior commissure*; and, *posteriorly*, by another medullary cord, called the *posterior commissure*. It communicates with the

lateral ventricles by two openings, situate behind the anterior pillar or crus of the fornix. The *Lateral ventricles*, *Ventriculi laterales seu magni seu majores seu priores seu superiores seu tricornues*, (F.) *Ventricules lateraux*, are two in number. They are large, and, owing to their considerable curvature, occupy a great part of the cerebral centre. They are bounded, *above*, by the inferior surface of the corpus callosum; *anteriorly*, by the curved portion of the same body; *posteriorly*, by a considerable mass of cerebral substance; and, *internally*, they are separated from each other by the septum of the ventricles, — a medullary plate, which is given off from the lower part of the corpus callosum. The lateral ventricles have, in their upper and anterior portion, the *Corpora striata*, *Thalami optici*, and *Tenia semicircularis*: — their inferior portion contains the *corpus fimbriatum*, *cornu Ammonii*, &c. Each of the ventricles has a *body* or *centre* — *cella media* — and *horns*, *cornua*. The *Fourth ventricle*, *Ventriculus cerebelli seu quartus seu Aran'tii*, *Sinus rhomboïdeus*, (F.) *Quatrième ventricule*, is situate beneath the *aqueduct of Sylvius*, by which it communicates with the third ventricle. It extends from this aqueduct to the upper part of the medulla; and is seated in the substance of the tuber annulare. The *Fifth ventricle*, *Ventriculus septi pellucidii*, *Incisura septi*, (F.) *Cinquième ventricule*, is the small serous cavity between the laminae of the septum lucidum; called, also, *Sinus of the septum lucidum*, *S. of the median septum* (Ch.).

VENTRICLES OF THE HEART, *Ventriculi cordis*, *Specus cordis*, (F.) *Ventricules du cœur*, are two in number. The *Right ventricle*, *Pulmonary ventricle*, *Ventriculus anterior seu primus seu pulmonalis*, (F.) *Ventricule droit ou pulmonaire*, is situate at the fore-part of the heart, the base and apex corresponding to those of the heart. In it are seen the *Columnæ carneæ* and *Cordæ tendineæ*. The right ventricle communicates with the right auricle by the *Ostium venosum*, and from it the *Pulmonary artery* arises. Around the auricular orifices is a tendinous margin or ring, from which the tricuspid valve is given off. The use of the ventricle is to send the blood, by its contraction, along the pulmonary artery to the lungs. The *Left ventricle*, *Ventriculus aorticus seu posterior seu secundus*, (F.) *Ventricule gauche ou aortique*, is situate at the posterior and left part of the heart. Its parietes are much thicker and stronger than those of the right, owing to its having to send the blood over the whole system. The inner surface has the same general appearance as that of the right. The *Columnæ carneæ* and *Cordæ tendineæ* are, however, much stronger. It communicates with the left auricle by means of the *Mitral valve*; and from it proceeds the largest blood-vessel of the body — the aorta.

VENTRICLES OF THE LARYNX, *Ventriculi seu Sacculi laryngis*, *Ventriculi Morgagni*, *Sinuses of the larynx*, (F.) *Ventricules ou Sinus du larynx*, are two depressions in the larynx, comprised between the superior and inferior ligaments.

VENTRICLE, PULMONARY, V. right.

VENTRICULAR, *Ventricularis*, (F.) *Ventriculaire*. Same etymon as *Ventricle*. Relating to a ventricle.

VENTRICULE, Ventricle.

VENTRICULE AORTIQUE, Ventricle, left — v. *Cinquième*, Ventricle, fifth — v. *Droit*, Ventricle, right — v. *Gauche*, Ventricle, left — v. *Moyen du Cerveau*, Ventricle, middle, of the brain — v. *Pulmonaire*, Ventricle, right — v. *Quatrième*, Ventricle, fourth.

VENTRICULES DU CERVEAU, Ventricles of the brain — v. *du Cœur*, Ventricles of the heart — v. *Latéraux*, Ventricles, lateral.

VENTRICULI CORDIS, Ventricles of the heart—v. Dilatatio, Gastrectasis—v. Dissolutio, Gastro-malacia—v. Duræ matris, Sinuses of the dura mater—v. Emollitio, Gastro-malacia—v. Exulceratio, Gastroecosis—v. Fluxus, Gastrorrhœa—v. Inflammatio, Gastritis—v. Laryngei, Ventricles of the larynx—v. Laterales, see Ventricles, lateral, of the brain—v. Magni, Ventricles, lateral, of the brain—v. Majores, Ventricles, lateral—v. Metamorphosis gelatiniformis, Gastro-malacia—v. Morgagnii, Ventricles of the larynx—v. Perforatio, Gastro-brosis—v. Priores, Ventricles, lateral—v. Pseudophlogosis resolutiva et colliquativa, Gastro-malacia—v. Superiores, Ventricles, lateral—v. Tricornes, Ventricles, lateral—v. Ulceratio, Gastroecosis.

VENTRICULUS, Stomach, Ventricle—v. Anterior, Ventricle, right—v. Aorticus, Ventricle, left—v. Arantii, see Ventricles of the brain.

VENTRICULUS CALLOSUS, 'Callous stomach.' The gizzard or third stomach of the gallinaceous bird. (F.) *Gésier*. It consists of a double-bellied or *digestive* muscle; is lined by a firm cuticle, and forms a kind of pouch, depending from the alimentary tube, in which the second stomach terminates, and from which the duodenum or *Ventriculus succenturiatus* issues. In the interior of the gizzard there are numerous pebbles, which seem to be destined to aid in the trituration of the food. The gizzard is an organ of mastication, and is possessed of great muscular power.

VENTRICULUS CEREBELLI, see Ventricles of the brain—v. Intestinalis, Abomachus—v. Posterior, Ventricle, left—v. Primus, Ventricle, right—v. Pulmonalis, Ventricle, right—v. Quartus, see Ventricles of the brain—v. Secundus, Ventricle, left—v. Septi Pellucidii, see Ventricles of the brain—v. Succenturiatus, Duodenum.

VENTRILOQUE, Engastrimythos.

VENTRILOQUISM, see Engastrimythos.

VENTRILOQUIST, Engastrimythos.

VENTRILOQUY, see Engastrimythos.

VENTRIOSUS, Abdominous.

VENTRIPOTENT, Abdominous.

VENTROSITAS, Physconia.

VENTROSUS, Abdominous.

VENTS, Flatulence.

VENTUS, Wind.

VENULA, *Phlebon*, diminutive of *Vena*. See Vein. (F.) *Veinule*. A small vein. Hippocrates seems to use it in the same sense as *Arteria*.

VENULÆ CENTRALES, Intralobular veins—v. Intralobulares, Intralobular veins.

VENUS, Clitoris, Coition, Cuprum—v. Crystals of, Cupri subacetis—v. *Crystaux de*, Cupri subacetis.

VER CUCURBITIN, *Tænia solium*—v. *Cutané*, *Dracunculus*—v. *Filaire*, *Dracunculus*—v. *de Guinée*, *Dracunculus*—v. *Luisant*, *Cicindela*—v. *de Médecine*, *Dracunculus*—v. *Solitaire*, *Bothrioccephalus latus*, *Tænia solium*.

VERATRIA, *Veratrina*.

VERATRINA, *Veratrina*, *Veratrine*; from *veratrum*. A vegetable alkali, found in the seeds of *Veratrum sabadilla*, *V. officinale*, *Helonias officinale*, and *Asagrafe officinale*, which are known in commerce under the names *Cebadilla*, *Cevadilla*, and *Sabadilla*, and are imported from Mexico. They usually occur, in commerce, mixed with the fruit of the plant, are two or three lines long, of a black colour, and are shining, flat, shrivelled, winged, and elastic seeds. *Veratrine* is solid, white, pulverulent, and inodorous; of a very acrid taste; decomposable by heat; very soluble in water, and soluble in alcohol. When prepared in the usual manner, it still contains other substances,—*Sabadillin*, *Veratrin*, gum resin of the *sabadilla*, and black greasy matter.

It is extremely poisonous, and but little used internally in medicine. Magendie gave it as an emetic and drastic in very small doses. It has been recommended to be applied in the way of friction, or endermically, (from gr. v to xx to ʒj of lard or cerate,) in various neuralgic affections. The following is the formula for its preparation in the Pharmacopœia of the United States:—Take of *cevadilla*, ℞ij; alcohol, 2 gallons; sulphuric acid, solution of ammonia, purified animal charcoal, and magnesia, each a sufficient quantity. Boil the *cevadilla* in a gallon of the alcohol, in a retort with a receiver attached, for an hour, and pour off the liquor. To the residue add another gallon of the alcohol, together with the portion recently distilled; again boil for an hour, and pour off the liquor. Repeat the boiling a third time with the remaining alcohol, and with that distilled in the previous operation. Press the *cevadilla*, mix and strain the liquors, and, by means of a water-bath, distil off the alcohol. Boil the residue three or four times in water acidulated with sulphuric acid, mix and strain the liquors, and evaporate to the consistence of syrup. Add magnesia in slight excess, shake the mixture frequently, then express and wash what remains. Repeat the expression and washing two or three times, and having dried the residue, digest it with a gentle heat several times in alcohol, and strain after each digestion. Distil off the alcohol from the mixed liquor, boil the residue for fifteen minutes in water with a little sulphuric acid and purified animal charcoal, and strain. Having thoroughly washed what remains, mix the washings with the strained liquor, evaporate with a moderate heat to the consistence of syrup, and then drop in as much solution of ammonia as may be necessary to precipitate the *veratria*. Lastly, separate and dry the precipitate. See *Colchicum autumnale*.

VERATRINE, *Veratrina*.

VERATRINE, SULPHATE OF, *Veratrina sulphas*, (F.) *Sulfate de Veratrine*, possesses the same virtues as *veratrine*. A solution of one grain in two ounces of distilled water has been suggested as a substitute for the *Eau médicinale d'Husson*—a celebrated gout remedy—in the dose of ʒj to ʒij.

VERATRUM ALBUM, (*verē atrum*, 'truly black,' from the colour of the roots [?]). *Helleb'orus albus*, *Elleb'orum album*, *Elleborus albus*, *Cherbachem*, *White hellebore*, *Langwort*, (F.) *Hellebore blanc*. *Sex. Syst.* Polygamia Monœcia. *Nat. Ord.* Melanthaceæ (Lindley). The root or rhizoma of this common European plant is indebted to the *veratrine* for its properties. It is inodorous; has a bitterish, acrid, nauseous taste, and is violently emetic and purgative, even when applied to an ulcerated surface. It is, also, possessed of errhine properties, and acts, externally, as a stimulant. It is rarely exhibited internally. Sometimes it is given as a *sneezing powder*; but it operates with great violence. It forms, also, an itch ointment. See *Ung. Veratri*.

VERATRUM LUTEUM, *Chamælium luteum*.

VERATRUM SABADILLA, *Sabadilla*, *Sabatilla*, *Cavis Interfect'or*, *Cous'ticum Americanum*, *Cevadilla Hispanorum*, *Sevadilla*, *Hor'deum causticum*, (F.) *Cévadille*. The seeds of this plant, *Sabadilla*, *Cevadilla* (Ph. U. S.), have been used, mostly as anthelmintics. Dose, gr. ij to a child four years old. It possesses the same general properties as the *veratrum album*.

VERATRUM VIRIDĒ, *American Hellebore*, *Swamp hellebore*, *Indian poke*, *Indian Uncas*, *Poke weed*, *Bear weed*, *Itch weed*, *Tickle weed*, *Earth gall*, *Devilbit*, *Wolfbane*, *Puppet root*, is indigenous in the swampy districts of almost every part of the United States. Its properties are like those of

the genus. It has been brought forward, however, in recent times, in the Southern States, as a powerful sedative in inflammatory diseases. Dose, eight drops of a saturated tincture.

VERBASCULUM, *Primula veris*.

VERBASCUM ALBUM, *V. thapsus*—*v. Alatum*, *V. thapsus*—*v. Collinum*, *V. thapsus*—*v. Crassifolium*, *V. thapsus*—*v. Elongatum*, *V. thapsus*—*v. Lychnitis*, *V. thapsus*—*v. Montanum*, *V. thapsus*.

VERBASCUM NIGRUM, (supposed to be a corruption from *Barbascum*, owing to its hairy coat; *barba*, 'a beard.') *Candela regia*, *Thapsus barbatus*, *Thapsus barbatus*, *Candela'ria*, *Lana'ria*, *Black Mullein*; and VERBASCUM THAPSUS, *V. thapsoides* seu *alatum* seu *collinum* seu *album* seu *crassifolium* seu *elongatum* seu *lychnitis* seu *montanum* seu *simplex*, *Phlogmus*, *Phlomis*, *Phlox*, great broad-leaved or yellow *Mullein*, *High Taper*, *Cow's Lungwort*, (*F.*) *Molène*, *Bouillon blanc*, *Bonhomme*, *Cierge de notre dame*, *Herbe Saint-Fiacre*. *Ord.* Scrophulariaceæ, *Sex. Syst.* Pentandria Monogynia,—especially the latter,—have been used as emollients, applied externally in the form of fomentation. The large leaves have been chosen for this purpose. Occasionally, the mucilage which they contain has been extracted by decoction or infusion, and administered in pectoral affections.

VERBASCUM SIMPLEX, *V. thapsus*—*v. Thapsoides*, *V. thapsus*—*v. Thapsus*, see *V. nigrum*.

VERBENA HAS'TATA, *V. paniculata*, *Blue vervain*, *Simpler's Joy*, an American species, is more bitter than the European, and said to be emetic.

VERBENA OFFICINALIS, *Verbena*, *Dichromos*, *Verbena'ca*, *Peristevium*, *Hierobot'aniè*, *Herba sacra*, *Vervain*, *Purvain*, (*Prov.*) *Berbine*, *Juno's Tears*, (*F.*) *Verveine*, *Herbe à tous les maux*; *Ord.* Verbenaceæ. *Sex. Syst.* Diandria Monogynia. A plant formerly held sacred; used in sacrifices, and suspended round the neck as an amulet. In the form of cataplasm, it is said to have relieved obstinate headaches, and to have been of service in serofula. It is not used.

VERBENA PANICULATA, *V. hastata*.

VERBENA URTICIFOLIA, an indigenous species, has been used in poisoning from *Rhus Toxicodendron*.

VERBENACA, *Verbena officinalis*.

VERBESINA ACMELLA, *Spilanthus Ac-mella*.

VERBESINA VIRGINICA, *Crown Beard*. Indigenous. *Order*, Compositæ. A decoction of the roots is used by the Indians as diaphoretic and depurative.

VERBUS, *Penis*.

VERCOQUIN, *Phrenitis vermino'sa*. A form of phrenitis, attributed to the presence of a worm in the brain!

VERDET, *Cupri subacetat.*

VERDIGRIS, *Cupri subacetat.*

VERENDA, Genital organs.

VERETRUM, *Penis*.

VERGE, *Penis*—*v. d'Or*, *Solidago virgaurea*.

VERGERETTE DE PHILADELPHIE, *Erigeron Philadelphicum*.

VERGETURES, *Vibices*.

VERJUICE, *Onpha'cium*, (*F.*) *Verjus*, *Verjus*, (*verd*, 'green,' and *jus*, 'juice.') "The juice of green fruits." A sour kind of grape. Also, an acid liquor, prepared from very sour grapes or crab-apples. It is principally used in culinary preparations; although, occasionally, an ingredient in medicinal compounds. See *Vitis vinifera*.

VERJUS, *Verjuice*.

VERMES, Worms—*v. Cerebri*, *Choroid plexus*.

VERMICELLI, see *Turundæ Italicæ*.

VERMICULAIRE BRÛLANTE, *Sedum*.

VERMICULAR, *Vermiform*.

VERMICULARIS, *Lumbricalis*, *Sedum*.

VERMICULI SPERMATICI, *Spermatozoa*.

VERMICULUM, *Vermyc'itum*. An elixir; a tincture.—*Ruland* and *Johnson*.

VERMICULUS CAPILLARIS, *Dracunculus*.

VERMIFORM, *Vermic'ular*, *Vermicula'ris*, *Vermifor'mis*, (*F.*) *Vermiculaire*, *Vermiforme*, from *vermis*, 'a worm,' and *forma*, 'form.' That which resembles a worm.

VERMIFORM PROC'ESSES, *Processus* seu *Protuberant'ia* seu *appen'dices vermiformes*, *Vermes*, *Monticuli cerebelli*, *Worms*, (*F.*) *Éminences vermiformes du cervelet*, are two medullary projections, at the surface of the cerebellum. The superior vermiform process, *Vermis superior cerebelli*, is an elongated projection, at the anterior and middle part of the superior surface of the cerebellum;—and the inferior vermiform process, *Vermis inferior cerebelli*, *Pyramid of Malacarne*, is a somewhat larger projection, situate in the depression at the inferior surface of the same organ. The inferior vermiform process is usually described as consisting of three portions—the *pyramid*, the *wula*, and the *nodulus*. The anterior portion of the superior vermiform process is elevated, and termed *Monticulus*.

VERMIFUGE, *Anthelmintic*.

VERMIFUGE, *MATHIEU'S*. This consisted of two distinct electuaries; the one for killing, the other for expelling tape-worm. The former is made of an ounce of *tin filings*, and six drachms of *fers root*.

VERMIFUGUS, *Anthelmintic*.

VERMILION, *Hydrargyri sulphuretum rubrum*.

VERMILLON DE PROVENCE, *Antimonii sulphuretum rubrum*.

VERMINATIO, *Helminthiasis*.

VERMINATION, CUTANEOUS, *Malis*.

VERMINEUX, *Vermineous*.

VERMINOUS, *Vermino'sus*, (*F.*) *Vermineux*. From *vermis*, 'a worm.' That which is caused by worms; as 'a *verminous affection*.'

VERMIS, see *Vermiform processes*—*v. Bombycinus*, *Cornu ammonis*—*v. Cerebelli*, *Vermiform process*—*v. Cerebri*, *Fever*, *Hungary*—*v. Cucurbitinus*, *Tenia solium*—*v. Digni*, *Paronychia*.

VERMITIO, *Helminthiasis*.

VERNIX CASEOSA, 'cheesy varnish.' The fatty varnish, or deposit, often found on the foetus, which is secreted by the sebaceous follicles of the skin.

VERNIX SICCA, *Sandarac*.

VERNONIA ANTHELMINTICA, *Ascaric'ida anthelmin'tica*, *Calagirah*, *Calageri*. A plant which is indigenous in India. *Ord.* Compositæ. *Sex. Syst.* Syngenesia Polygamia superflua. It has great celebrity in the East Indies, and is a bitter tonic; but the seeds are chiefly used as an anthelmintic, in cases of *ascarides* and *lumbrici* in children.

VERNONIA NOVEBORACENSIS, *Iron weed*, *Flat top*; an indigenous plant; whose purple flowers appear in August and September, is reported to possess cathartic properties.

VÉROLE, *Syphilis*—*v. Petite*, *Variola*—*v. Petite volante*, *Varicella*.

VÉROLÉ, *Syphilitic*.

VÉROLETTE, *Varicella*.

VÉROLIQUE, *Syphilitic*.

VERONICA, *V. officinalis* seu *Tournefort'ii* seu *mas*, *Thea German'ica*, *Beton'ica Pauli*, *Chama'drys*, *Male Veronica*, *Fluellin*, *Officinal*, *Speedwell*, *Eyebright*, *Paul's Betony*, (*F.*) *Véronique*, *The d'Europe*, *Herbe aux ladres*. *Ord.* Siro-

phulariaceæ. *Ser. Syst.* Diandria Monogynia. This plant was once used as a pectoral.

VERONICA AQUATICA, V. beccabunga.

VERONICA BECCABUNGA, *Beccabunga, Anagallis seu veronica aquatica, Laver Germanicum, Cepæa, Water Pin'pernel, Brooklime, Brooklime Speedwell, Water Speedwell, Neckweed, Water Purslain, (Sc.) Water-purpie, (F.) Véronique cressonée.* This plant was formerly used in a variety of diseases. It is, however, almost insipid and inodorous; and has been long banished from practice.

VERONICA MAS, Veronica — v. *Officialis, Veronica.*

VERONICA PEREGRINA, *Neckweed, Purslain, Speedwell;* indigenous; flowering from April to June, is given internally in scrofulosis, and is applied as a wash to scrofulous tumours.

VERONICA PURPUREA, *Betonica officinalis*—v. *Tournefortii, Veronica* — v. *Virginica, Leptandra Virginica.*

VÉRONIQUE, Veronica—v. *Cressonée, Veronica beccabunga.*

VERPA, Penis.

VERRE, Vitrum — v. *d'Antimoine, Antimonii vitrum.*

VERRU'CA, diminutive *Verrucula, Ephy'ma verruca, Phymato'sis verrucosa, a Wart, (Prov.) Wret, (F.) Verrue, Poivreau.* A small, hard, mammillary tumour, which forms at the surface of the skin, and particularly on that of the hands and face. Warts are generally rugous at the surface, and broad at the base; their roots being implanted in the derma by whitish filaments, which are dense, semifibrous, and very numerous.

Warts may be destroyed by caustic, or removed by excision. Their vitality is, generally, not great.

VERRUCA CARNOSA, *Condyloma* — v. *Formicaria, Formica* — v. *Minor, Thymion*—v. *Palpebrarum, see Hydatid* — v. *Pensilis, Acrochordon*—v. *Rhagoidea, Thymion.*

VERRUCARIA, *Calendula officinalis, Heliotropium Europæum.*

VERRUCOSE, Warty.

VERRUCOUS, Warty.

VERRUCULA, *Verruca.*

VERRUE, *Verruca.*

VERS, Worms.

VERSE-CHARMS, see Charm.

VERSIØ, Turning — v. *Fœtus, Turning* — v. *Spontanea, Evolution, spontaneous* — v. *Uteri, Hysteroloxia.*

VERSION, Turning.

VERT-DE-GRIS, *Cupri subacetes.*

VERTEBRA DENTATA, *Axis* — v. *Dorsi Prima, Lophia* — v. *Lumborum Prima, Asphaltites* — v. *Magna, Sacrum.*

VERTEBRÆ, *Spondyli, Spondyles, Whetlebones, (F.) Vertèbres;* from *vertere, 'to turn.'* This name has been given to the bones, which by their union form the vertebral or spinal column. The vertebrae are short, thick, very angular bones; twenty-four in number, and situate one above another. The *body—centrum,* of Owen—of the vertebra is the middle and anterior portion. Above and below it is articulated, by means of a fibro-cartilage, with the contiguous vertebrae. The *Processes, (F.) Masses apophysaires,* of each vertebra are:—1. *The spinous process,* situate behind, and in the median line. 2. *The two transverse processes,* standing off from each side. 3. *The four articular, or oblique processes—zygapophyses,* of Owen—two superior, and two inferior—which serve to unite the vertebrae with each other. These transverse and articulating processes are made continuous with the lateral and posterior parts of the body of the vertebra by narrow bony portions or pedicles, on

each of which are notches. These, by their union with similar notches in the contiguous vertebra, form the lateral foramina, (F.) *Trous de conjugaison,* through which the spinal nerves leave the vertebral canal. The different processes are united with each other, so as to form a kind of ring of the lateral and posterior parts of the vertebra; and the foramen, within this,—that is, between the body and processes, *foramen vertebrale, rachidium,*—concurs in forming the vertebral canal. The *arch or lamina* of a vertebra, *neurapophysis,* is the part from which the several processes project. The vertebrae have particular characters, according to the regions they occupy. They are divided into seven cervical, twelve dorsal, and five lumbar. The first cervical is called *atlas;* the second, *axis* or *vertebra dentata;* and the seventh, *vertebra prominens.* The vertebrae are articulated with each other. Those of the back are joined, moreover, to the ribs by their articulating surfaces—*parapophyses.* The first or atlas is articulated with the occipital bone; and the last lumbar vertebra with the sacrum. The cervical vertebrae are developed by nine points of ossification; the dorsal and lumbar by eight.

VERTEBRAL, *Vertebra'lis.* That which relates or belongs to the vertebrae.

VERTEBRAL ARTERY, *Posterior cerebral artery, (Ch.),* is the largest of the branches of the subclavian. It arises from the posterior part of that vessel; is lodged in a canal, (F.) *Petit canal vertèbral,* formed by the foramina in the transverse processes; enters the cranium, and proceeds to anastomose with its fellow of the opposite side, and to form the *Basiliary artery.* Besides the branches sent to the neck, the vertebral artery gives off the *anterior and posterior spinal arteries,* and the *inferior cerebellous,* in the cavity of the cranium.

VERTEBRAL COLUMN, *Rachis, Rhachis, Notos, Aenes'tis, Carina, C. hominis, Spina, S. dorsi seu vertebra'lis, Colum'na spinalis seu vertebra'lis seu dorsi, Dorsum, Tergum, Compagnes Vertebra'rum, Acan'tha, Sacra fistula, Hiera Syrinx, Spine, Back bone, (Sc.) Backsprent, (F.) Colonne vertèbrale, Épine du dos, Échine.* A kind of bony column, situate at the posterior and central part of the trunk; extending from the head to the sacrum; flexible in every direction, yet very solid and hollowed by a canal called *vertebral,* which gives it lightness without diminishing its strength, and runs through its whole length. The vertebral column is formed by the superposition of the vertebrae. It represents a pyramid, whose base is below. Anteriorly, it is convex in the neck; concave in the back, and convex, again, in the loins. Behind, the curvatures are of course the reverse of these. There is also, in the dorsal region, a lateral curvature, the concavity of which is towards the left side. Considered as a whole, the vertebral column has an *anterior or prespinal surface;* a *posterior or spinal;* two *lateral;* a *base;* and an *apex* or top. In the nomenclature of Chaussier, the anterior surface, in the neck, is called *trachelian;* in the back, *predorsal;* and in the loins, *prelumbur.* The dorsal surface has, at its middle, the spinous processes; and, at its sides, the *vertebral gutters, (F.) Gouttières vertèbrales,* formed by the succession of the *vertebral plates, (F.) Lames vertèbrales,* which, by their junction, constitute the spinous processes. These are filled by the sacro-spinalis muscle. The sides or lateral surfaces present the foramina resulting from the union of the *vertebral notches, (F.) Échancures vertèbrales.* These are called *vertebral foramina, (F.) Trous de conjugaison,* and give passage to the *vertebral nerves.* The base

of the vertebral column is oblique, to unite with the sacrum; and forms with it an angle, called *sacro-vertebral angle* or *promontory*. The apex or top of the vertebral column is articulated with the occipital bone. Sometimes, the term *vertebral column* includes the whole of the column from the occipital bone to the extremity of the coccyx. The *Vertebral* or *Spinal* or *Rachid'ian Canal*, *Solen*, *Canalis medullæ Spinalis*, *Specus pro medulla Spinali* seu *vertebralis*, exists through the whole of the vertebral column, whose curvatures it follows. It is continuous, above, with the cranium; below, with the sacral canal, if we consider the vertebræ to terminate at the sacrum. It is lined by a prolongation of the meninges, forming the *Theca vertebralis*, and lodges the spinal marrow.

The vertebral column, which unites lightness with solidity, serves to support the head and chest. It is the seat of all the movements of the trunk, the weight of which it transmits to the pelvis. It lodges and protects the spinal marrow, and gives passage to the vertebral nerves, and to numerous vessels.

VERTEBRAL DISEASE, *Rachial'gia* (of some,) *Caries of the Vert'ebær*, *Spondylarthroc'acè*, *Spondyloc'acè*, *Kypho'sis inflammato'ria* seu *paralytica*, *Gibbos'itas cario'sa*, *Ca'ries vertebrarum*, *Spondylal'gia*, *Spondylopyo'sis*, *Taberculo'sis Vertebrarum*. The spinal column is liable to distortion, (see *Hump*.) at times, without the vertebræ being much, if at all, diseased. At other times, a more formidable affection is induced; the vertebræ becoming carious, and the intervertebral cartilages ulcerated; followed by a more or less complete loss of power over the lower extremities. In such case, on examining the spine, one or more of the spinous processes is found to project beyond the rest. The disease was first well described by Mr. Percival Pott; and, hence, it has been called, by the French, *Maladie de Pott*, *Malum* seu *Gibbus Pot'tii*, *Pott's disease* or *curvature*. It usually occurs in scrofulous subjects, and the treatment consists in establishing a counter-irritation by blisters, issues, or the moxa, opposite the transverse processes of the diseased vertebræ. The sore must be suffered to remain open and the patient kept in the horizontal posture until the use of the limbs is recovered; employing tonics, the free admission of fresh air, &c., at the same time.

VERTEBRAL LIG'AMENTS, (F.) *Ligaments vertébraux*, *Surtouts ligamenteux de la colonne vertébrale*, are distinguished into *anterior* and *posterior*. They consist of long, ligamentous coverings; the *anterior* occupying the anterior part of the vertebral column; and the *posterior* seeming to arise from the occipito-axoid ligament, and seated behind the bodies of the vertebræ, from the axis to the sacrum.

VERTEBRAL NERVE, *Trisplanchnic*.

VERTEBRAL NERVES, *Spinal Nerves*, (F.) *Nerfs rachidiens*, spring successively from the spinal marrow; from its origin to its termination. These nerves—30 pairs in all—arise by two roots; one *anterior*, from the *anterior* or *an'tero-lat'eral* column of the spinal marrow, and the other *posterior*, from the *posterior* or *pos'tero-lat'eral* column, and afterwards issue by the vertebral and sacral foramina. Each of these roots seems to have a distinct function; the *posterior* being destined to convey sensation to parts; the *anterior*, motion. On the posterior root, before its junction with the anterior, there is a ganglion. Of the 30 pairs, 7 are *cervical nerves*, 12 *dorsal*, 5 *lumbar*, and 6 *sacral*. See *Nerves*.

VERTEBRATED, *Vertebra'tus*, (F.) *Vertébré*. Provided with vertebræ.

VERTÈBRES, *Vertebræ*.

VERTEBRODYMIA, see *Somatodymia*.

VERTEBRO-ILIAIC LIGAMENT, *Ileo-lumbar* ligament.

VERTEX, *Cor'ypphè*, *Aceror'i'a*, *Spon'dyltus*. The top or highest part or *crown* of the head (Sc.) *Castel*, *Now*, *Pallat*, *Palad*. See *Sineiput*.

VERTEX **CORDIS**, *Mucro Cordis*—v. *Cubiti*, *Olecranon*—v. *Palpitans*, *Fontanella*.

VERTIBULUM, *Trépan*.

VERTICULA, *Articulation*.

VERTICULUM, *Articulation*.

VERTICULUS, *Articulation*.

VERTIGE, *Vertigo*.

VERTIGINOUS, *Vertigino'sus*, (Old Eng. and Prov.) *Totty*, (F.) *Vertigineux*. Relating or pertaining to vertigo; *Giddy*, *Dizzy*.

VERTIGO, from *vertere*, 'to turn;' *Dinos*, *Hin'gos*, *Dinus* seu *Hallucina'tio* seu *Auta'gia vertigo*, *Circumgyrat'io*, *Gid'diness*, *Diz'ziness*, *Swimming of the head*, (Prov.) *Svee*, *Swamyng*, (F.) *Vertige*, *Étourdissement*. A state in which it seems that all objects are turning round; or that the individual himself is performing a movement of gyration. Two varieties have been designated;—*simple vertigo*, where the objects are seen; and *scotodynia*, in which the sight is obscured, and the individual often falls. Vertigo is dependent upon the condition of the brain; and often announces an attack of apoplexy or epilepsy.

VERTIGO TENEBRICOZA, *Scotodynia*.

VERUGAS (S.), from *verruca*. A peculiar disease affecting certain localities of Peru, which manifests itself by sore-throat, pains in the bones, and other febrile symptoms. In the course of a few days, an eruption of red pimples or boils appears. These sometimes increase in magnitude till they become nearly as large as an egg, and discharge blood copiously. It is ascribed to the water of certain springs in the valleys, and especially in that of *Surea*: called *Agua de Veruga*.—Tschudi.

VERU MONTANUM, *Gallinaginis caput*.

VERVAIN, *Verbena officinalis*—v. *Blue*, *Verbena hastata*.

VERVEINE, *Verbena officinalis*.

VESANIA, *Vesania*, 'madness.' Derangement of the intellectual and moral faculties, without coma or fever. Many nosologists have used this as a generic term; under which they have included the different species of mental alienation, hypochondriasis, somnambulism, and even hydrophobia. See *Nosology*.

VESANIA MANIA, *Mania*.

VESANÆ, *Insanity*.

VESICA BILIARIA, *Gall-bladder*—v. *Cordis*, see *Pericardium*—v. *Fellea*, *Gall-bladder*—v. *Intestinalis*, *Vesicula umbilicalis*—v. *Prostatica*, see *Ejaculatory ducts*—v. *Saccata*, *Cystostenocho'ria*—v. *Urinaria*, *Urinary bladder*.

VESICÆ IRRITABILITAS, *Cysterethismus*—v. *Unguinosæ tendinum*, *Bursæ mucosæ*.

VESICAL, *Vesical'is*, from *vesica*, 'the bladder.' That which belongs or relates to the bladder.

VESICAL ARTERIES vary in number and origin. The umbilical artery always sends off two or three: the middle hemorrhoidal, internal pudic, and obturator furnish others, which ramify and anastomose in the parietes of the bladder; the hypogastric furnishes one which is somewhat larger, the *Vesico-prostatic* (Ch.), and proceeds to the *bas-fond* of the bladder, sending numerous ramifications to it as well as to the surrounding parts.

VESICAL GANGLIA, see *Spermatic Ganglion*—

v. Ligaments, see Urinary bladder—v. Oxyd, Oxyd, cystic—v. Triangle, see Urinary bladder.

VESICAL VEINS, much more numerous than the arteries, open into the hypogastric plexus.

VESICANT, Blister, Epispastic.

VESICARIUM, Ovarium.

VESICA'TION, *Vesicatio*; from *vesica*, 'a bladder.' The action of a vesicant. The formation of blisters.

VÉSICATOIRE, Blister—v. *Magistral*, Magistral.

VESICATORIUM, Blister.

VESICLE, Vesicula—v. Allantoid, Allantoidis—v. Blastodermic, see Molecule—v. Cowpox, see Vaccination.

VESICLE OF DEVELOPMENT, *V. of Evolution*. A vesicle or cyst concerned in histogeny.

VESICLE OF EVOLUTION, *V. of Development*—v. Germinal, see Molecule—v. Purkinjean, see Molecule—v. Umbilical, Vesicula umbilicalis.

VESICLES, ASCHERSO'NIAN. When fluid fat and fluid albumen are shaken together, the resulting fat globules become surrounded by an albuminous layer. The vesicles, thus formed, are called after Ascherson, their discoverer.

VESICLES OF DE GRAAF, Folliculi Graafiani—v. Seminal, Vesiculæ seminales.

VESICOCE'LE. Badly compounded for Cystocele.

VESICO-UTERINE, *Vesico-uterinus*, from *vesica*, 'the bladder,' and 'uterus.' Appertaining, or relating to, the bladder and uterus.

VESICO-UTERINE FOLDS, see Uterus.

VES'ICO-VAG'INAL, *Vesico-vaginalis*. *Vag'ino-ves'ical*. Relating to the bladder and the vagina; as *vesico-vaginal fistula*.

VESIC'ULA, *Cystinx*, *Ves'icle*, *Blister*, (F.) *Vésicule*; diminutive of *vesica*, 'a bladder.' A small bladder or cyst.

VESICULA, *Ves'icle*, *Ecp'hly'sis*, *Cystinx*, in pathology, means a small orbicular elevation of the cuticle containing lymph, which is sometimes clear and colourless, but often opaque and whitish or pearl-coloured. It is succeeded, either by a scurf, or by a laminated scab.

VESICULA ÆNIGMATOSA, Vesicula umbilicalis—v. Alba, Vesicula umbilicalis—v. Bilis, Gall-bladder—v. Blastodermatica, see Molecule—v. Blastodermica, see Molecule—v. Chyli, Receptaculum chyli—v. Erythroidea, Erythroid vesicle—v. Fellis, Gall-bladder—v. Gangrenescens, see Anthrax—v. Germinativa, see Molecule—v. Omphalo-mesenterica, Vesicula umbilicalis—v. Ovaris, Vesicula umbilicalis—v. Prolifera, see Molecule—v. Prostatica, see Ejaculatory ducts.

VESIC'ULA UMBILICA'LIS, *V. alba* seu *omphalo-mesenter'ica* seu *ænigmatosa* seu *ora'lis*, *Ves'ica intestinalis*, *Vitell'iculus*, *Umbil'icæ* or *Intestinal Vesicle*, *Vitelline Pouch*, *Vitell'icle*. A small, pyriform, round, or spheroidal sac, which, about the fifteenth or twentieth day after fecundation, is of the size of a common pea, and probably acquires its greatest dimensions in the course of the third or fourth week. After the seventh week, it becomes shrivelled and disappears insensibly. It seems to be situate between the chorion and amnion, and is commonly adherent either to the outer surface of the chorion, but at times is loose between them. The *vitelline ped'icle*, which attaches the vesicle to the embryo, is continuous with the intestinal canal; and, up to twenty or thirty days of embryonic life, is hollow.—*Ductus omphalo-mesenter'icus* seu *vitello-intestina'lis* seu *vitella'rius*, *vitelline Duct*. Its arteries are the omphalo-mesenteric. The *vitelline fluid*, contained in the vesicle—in the *Vitelline* or *Yolk membrane*—has been compared, from analogy, to the *vitellus* or

yolk of birds; and, like it, is an oleaginous substance, and presumed to be inservient to the nutrition of the embryo.

VESICULÆ constitute the 6th order of Bate-man's classification of *Cutaneous Diseases*.

VESICULÆ, see Villous membranes—v. Divæ Barbaræ, Variola confluens—v. Gingivarum, Aphthæ—v. Pulmonales, see Cellule—v. Rotundæ cervicis uteri, Nabothi glandulæ—v. Sanguinis, Globules of the blood—v. Seminales mulierum, Nabothi glandulæ—v. Spermaticæ, Vesiculæ seminales.

VESICULÆ SEMINA'LES, *V. Semina'ria* seu *spermat'icæ*, *Cap'sulæ semina'les*, *Conceptac'ula semina'ria*, *Gonocyst'tides*, *Sem'inal ves'icles*, (F.) *Vesic'ules séminales*, *Gardouches*, *Greniers*, are two small membranous sacs, which serve as reservoirs for the sperm, and probably secrete a fluid to be mixed with the sperm. They are situate beneath the bladder, and above the rectum, behind the prostate and to the outer side of the vasa deferentia. They are of an irregular conoidal shape; flattened from above to below; embossed on their surface, and of a grayish tint. Their *posterior extremity* or *fundus* terminates by a round cul-de-sac. Their *anterior extremity* or *neck* is narrow and elongated, and is continuous with the excretory duct of the vesicula. This duct joins the vas deferens, and forms with it the ejaculatory duct. The interior of the vesiculæ exhibits several cells, which communicate with each other, and are lined by a very thin, mucous membrane.

VESIC'ULAR, *Vesicula'ris*, (F.) *Vésiculaire*. Of or belonging to a vesicle:—full of or containing small vesicles or cells. The cortical or gray matter of the brain is sometimes termed *vesicular*. See Cortex cerebri and Neurine.

VÉSICULE, Vesicula—v. *Biliaire*, Gall-bladder—v. *du Fiel*, Gall-bladder—v. *Germinative*, see Molecule—v. *Oculifère*, see Folliculi Graafiani.

VÉSICULES DE GRAAF, Folliculi Graafiani—v. *de Sainte Barbe*, Variola confluens—v. *Séminales*, Vesiculæ seminales.

VESIC'ULO-TYMPANIT'IC, *Vesic'ulo-tympanit'icus*. An epithet for a sound or resonance heard on percussion, which consists of the vesicular and tympanic sounds combined. It occurs when the parenchyma of the lungs is incompletely solidified.—Flint.

VESPA, Wasp.

VESSEL, *Vas*, *Vasum*, diminutive *Vasculum*, *Arteri'ol*, *Angos*, *Conceptac'ulum*, from (L.) *vas*, *vasculum*, (F.) *Vaisseau*. A canal, more or less elastic, formed by the superposition of membranes, and distinguished, according to its uses and general arrangement, into *Artery*, *Vein*, and *Lymphatic*. See, also, *Vascular*.

VESSELOUP, Lycoperdon.

VESSIE, Urinary bladder—v. *à Colonne*, see Urinary bladder—v. *Col de la*, Collum vesicæ.

VESSIE NATATOIRE, Air-bladder.

VESTIBULAR NERVE, see Auditory nerve.

VESTIBULE, *Vestib'ulum*, from *vestio*, 'to cover.' The porch or entrance to a house.

VESTIBULE, *Vestib'ulum*, *V. Vagi'næ*, *Prona'us*, *Atrium Vagi'næ*, *Amb'itus genit'alis mulie'bris*, is a smooth cavity between the perinæum and nymphæ in the female, which leads to two passages—to the urethra above, and to the vagina below.

VESTIBULE OF THE EAR, *Vestib'ulum*, *V. labyrin'thi*, (F.) *Vestibule*. A cavity of an irregular shape, which forms part of the labyrinth or internal ear. The vestibule is situate on the inner side of the tympanum; on the outer side of the meatus auditorius internus; before the semicircular canals, and behind the cochlea. It is lined

by a particular membrane, and contains the liquor of Cotunnus and branches of the auditory nerve. There is also another membrane, constituting the *membranous vestibule*, but it is not an exact imitation of the osseous cavity. It is composed of two distinct sacs, which open into each other—the *sacculus vestibuli*, and the *sacculus*. There are three contiguous cavities in the vestibule; one of which, the *semi-oval*, is situate above; another, the *hemispherical*, below; and the third, or *sulciform*, which is the orifice of the aquæductus vestibuli, behind.

VESTIBULUM LABYRINTHI, Vestibule of the ear—v. Vaginæ, Vestibule.

VESTIGE (F.) *Vestig'ium*, 'a vestige,' 'a trace.' A kind of fracture of flat bones, consisting of a simple incision having the mark of the instrument that caused it. The term is also applied to a part of the body, which may have no evident use in man, and yet may be greatly employed in animals. For example, the muscles of the external ear in man are almost devoid of use, or are *vestigies* of what they are in certain animals.

VESTIGIUM, Sole, *Vestige*—v. Foraminis ovalis, Ovalis fossa—v. Pedis, Metatarsus.

VESTITUS, *Esthe'ma, Esthe'sis, Res vestitaria, Clothing, Dress, Vesture*, (F.) *Vêtement*, from *vestire, vestitum*, 'to clothe.' Any substance used for the purpose of covering nakedness, or preserving from atmospheric temperature by being worn on the body. The best clothing in winter is composed of articles that are bad conductors of caloric, and do not admit of ready evaporation of the matter of perspiration. In this respect, woollen vestments deserve the first place, and cotton the second. Colour has likewise to be regarded—the darkest hues transmitting the heat most readily through them. It has been found that the same rule applies to odours—the darker colours retaining a greater amount of odorous particles than the lighter. Hence the necessity of white walls, white bed-clothes, &c., in the wards of hospitals; for it is probable that the like law applies to contagious miasms.

VESTURE, Vestitus.

VETA, Puna.

VÊTEMENT, Vestitus.

VETERANA, Rubæola.

VETERINARIUS, see Hippiaiter and Veterinary.

VETERINARY, *Veterina'rius*, (F.) *Vétérinaire*, from *veterinus*, 'that which bears burdens;' itself, perhaps, from *vehiterinus*, from *vehere*, 'to carry.' That which appertains to beasts of burden; hence, *veterinary surgeon*, (see Farrier,) *veterinary college*, and *veterinary medicine*.

VETERINARY ANATOMY, see Anatomy.

VETERINARY ART, *Ars seu Medic'na veterina'ria, Zoö'v'asis, Zoiatr'ia, Theriat'rica, Mulomedic'na, Zoötherapi'a, Zoötherapeut'icæ, Ars zoiat'rica, Farriery*. The art of treating the diseases, &c., of cattle.

VETERNOSITAS, Coma vigil.

VETERNUS, Coma vigil.

VETIVERIA ODORATA. *Andropogon muricatus*.

VETTONICA, *Betonica officinalis*.

VETULA, Sacrum.

VEXILLA TUBARUM FALLOPII, see Tube, Fallopiian.

VEXILLUM, *Drapeau*.

VIA, Way—v. Curandi, Ratio medendi—v. Stomachi et ventris, Œsophagus.

VIABILITY, see Viable.

VIA'BLE, *Viab'ilis*, from *via*, 'way;' or from (F.) *vie*, 'life,' (Orfila.) A word, which may be introduced with great advantage from the French into our language. It is an epithet applied to a fœtus whose organs are properly formed, and so

developed as to permit its continued existence. Every fœtus is not *viable*. Anencephali have lived ten or twelve days, yet they are not viable. The older the fœtus, the more viable is it. It is an idle prejudice that a child, born at the end of eight months, is less likely to live than one born at the end of seven. The signs of *viability* are drawn from the weight, length, external conformation, &c., of the fœtus. It may be laid down as a general rule, that no fœtus born before the end of the seventh month is viable.

VIAE CHYLIFERÆ, Chyliferous vessels.

VIAE CLANDESTINÆ, *Clandestine Passages*. Supposititious secret ways or passages or 'royal roads,' to account for the rapid transmission of substances taken into the stomach to the kidneys or bladder.

VIAE EXTRAORDINARIÆ LACTIS, Galactoplasia—v. Lacrymales, Lacrymal passages—v. Primæ, Ways, digestive—v. Secundæ, Ways, second.

VIAL, Phiala.

VIANDES FAISANDÉES, see Hyposaprus.

VIBICES, *Mol'opes, Striæ*, (F.) *Vergetures*, 'Stripes.' Large purple spots, like the marks produced by the strokes of a whip, which appear under the skin in certain malignant fevers. They are unfavourable indications, as they denote great prostration.

VIBRAMEN, Oscillation.

VIBRANS, Vibratory.

VIBRATILE, Vibratory.

VIBRATILITY, *Vibrat'il'itas*, (F.) *Vibratilité*, from *vibrare, vibratum*, 'to quiver.' Capability of being thrown into vibration.

VIBRATIO, Oscillation—v. Cardiacæ, Palpitation—v. Cordis, Palpitation.

VIBRATION, PECTORAL, see Fremitus—v. Tactile, see Fremitus—v. Tussive, see Tussive.

VIBRATIONS OF SOUND, see Sound.

VIBRATOR, Deferens vas.

VIBRATORY, *Vibrans, Vibrative*, (F.) *Vibratile, Vibratoire*. An epithet applied to the pain that accompanies some neuralgia, which seems to the patient to vibrate among the nerves.

VIBRATORY MOTION, see Cilia.

VIBRATUS, Oscillation.

VIBRIO: from *vibrare*, 'to quiver.' A genus of infusory animalcules, of which different species are met with,—for example, *Vibrio prolifera* in almost all putrescent fluids containing protein, and in the pus of chancre; in which last the *V. lineola* has likewise been found.

VIBRIS'SÆ. Same etymon. The hairs which grow at the entrance of the nostrils and of other outlets. In the feline tribe, the whiskers.

VIBURNUM CASSINOIDES, *Ilex Paraguensis*.

VIBURNUM DENTA'TUM, *Arrow Wood, Mealy Tree, Tily* of the Indians. *Ord. Caprifoliaceæ*. A high indigenous shrub, of the same family as *V. lentago*; the bark of which has been used by the Indians as a diuretic.

VIBURNUM EDU'LE flourishes in the Hudson's Bay territory. The fruit has an orange colour, and is less acid, more fleshy, and more agreeable to the taste than the cranberry.

VIBURNUM LEVIGATUM, *Ilex Paraguensis*.

VIBURNUM LENTA'GO, *Sweet Viburnum, Nanny-berry*. A handsome indigenous tree, of the honeysuckle family—*Caprifoliaceæ*—which flowers in May and June. It has been used as an antiperiodic.

VIBURNUM PRUNIFO'LIUM, *Black Haw, Sloe-leaved Viburnum, Sloe*. Indigenous; flowering in May. The leaves have been used as tea.

VIBURNUM, SLOW-LEAVED, *V. prunifolium*—v. Sweet, *V. lentago*.

VIC-LE-COMPTÉ, MINERAL WATERS OF. Vic-le-Compte is a small village in the de-

partment of Puy de Dôme, three leagues from Issoire; where there is an acidulous chalybeate, which is aperient.

VICARIOUS, *Vicarius*, from *viciis*, 'change, place.' Taking the place of another:—as 'vicarious secretion,' *Secretio vicaria*; a secretion which takes place in one part instead of another.

VICAR'S BRAY, MINERAL WATERS OF. This spring is situate in Perthshire, Scotland, about two miles from Dollor, and near to Blarngone. The water is one of the strongest chalybeates known.

VICE, Cachosis.

VICE DE CONFORMATION. Faulty formation of a part of the body.

VICHY, MINERAL WATERS OF. Carbonated alkaline chalybeates, the sources of which are at Vichy, six leagues from Moulins, in the department of Allier. The springs are seven in number. Almost all are thermal; give off bubbles of carbonic acid gas, and have a slightly sulphureous odour. They deposit carbonates of lime and magnesia, and a little oxide of iron; and afford, on analysis, carbonates of lime, soda, iron, and magnesia, carbonic acid, sulphate of soda, and chloride of sodium. They are employed as tonics, particularly in chronic affections of the abdominal viscera, in old catarrhs, diseases of the joints, &c.

VICHY WATER, FACTITIOUS, Aqua Vicien'sis, (F.) *Eau de Vichy*, is made of simple acidulous water, impregnated with twice its bulk of carbonic acid, $\frac{5}{8}$ xxss; subcarbonate of soda, gr. xxxij; sulphate of soda, gr. xvj; chloride of sodium, gr. iv; subcarbonate of magnesia, gr. ss; chloride of iron, gr. $\frac{1}{2}$. Mix. Ph. P.)

VICIA ERVILIA, Ervum.

VICIA FABA, *Faba*, *F. major seu vulgaris*, *Orobus faba*, *Common Garden Bean*, (F.) *Fève* ou *Fève des marais*. Ord. Leguminosæ. *Sex. Syst.* Diadelphia Decandria. A native of Egypt, of which there are many varieties. Beans are not easy of digestion. They are proverbially flatulent, especially when old. When young, they are more digestible and wholesome. Bean meal was one of the four resolvent meals of the ancients.

VICINTRACTUS, Erysipelas.

VICINTRAHA, Erysipelas.

VICTORIALIS FEMINEA, *Gladiolus vulgaris*—v. *Longa*, *Allium victorale*—v. *Rotunda*, *Gladiolus vulgaris*.

VICTÛS RATIO, Diet.

VIDANGES, Lochia.

VIDIAN CANAL, Pterygoid canal—v. *Nerve*, Pterygoid nerve.

VIE, Life—v. *Durée de la*, see *Longevity*—v. *Moyenne*, see *Longevity*.

VIELLESSE, Senectus.

VIELLOTTE, *Colchicum autumnale*.

VERGE, Virgin.

VIF ARGENT, Hydrargyrum.

VIGILANCE, Insomnia.

VIGILANTIA, Egregorsis.

VIGILATIO, Egregorsis.

VIGILIA, Egregorsis.

VIGILIE, Egregorsis—v. *Nimise*, *Coma vigil*.

VIGILIUM, Egregorsis.

VIGNE, *Vitis vinifera*—v. *Blanche*, *Bryonia alba*—v. *de Judée*, *Solanum dulcamara*—v. *du Nord*, *Humulus lupulus*—v. *Vierge*, *Bryonia alba*.

VIGNETTE, *Spiraea ulmaria*.

VIGNOLE, *Mercurialis*.

VIGOR, *Aeme*.

VILLA FRANCA, (CLIMATE OF.) This little town is situate immediately to the eastward of Montalbano, which separates the bay of Villa Franca from that of Nice. It is on the southern declivity of a steep and lofty range of mountains;

and is more effectually sheltered from the north and north-west winds than Nice, with the climate of which that of Villa Franca closely corresponds.

VILLI, see *Villosus membranes*.

VILLOUS, *Villo'sus*, (F.) *Villeux*, from *villus*, 'a hair.'

VILLOUS MEMBRANES OR COATS, *Velamenta Bombyc'ina*, (F.) *Membranes villosæ*, *Membranes veloutés*, are such as are covered with soft papillæ or *Villi*, *Floculi*, *Floc'culi*, *Vesic'ulæ*, *Cylin'dri*, *Tubi Membrana'cei*, constituted of blood-vessels, nerves, and absorbents; or such as are covered with fine down, so as to cause them to feel soft and velvety. The term is, however, chiefly restricted to the former. Chaussier gives the name *simple villous membranes* to the serous membranes; and that of *complicated or follicular villos membranes* to the mucous membranes.

VIN, Wine—v. *de Bordeaux*, *Claret*—v. *de Poulet*, see *Poulet*—v. *de Quinquina composé*, *Vinum de kinâ kinâ compositum*—v. *Rouge d'Oporto*, *Vinum Portugallicum*—v. See, *Sack*.

VINAIGRE, *Acetum*, see *Aceticum acidum*—v. *Scillitique*, *Acetum scillæ*—v. *de Botis*, *Pyroligneus acid*.

VINAIGRES MÉDICINAUX, *Acetica*.

VINCA MINOR, *V. pervin'ca*, from *vincio*, 'I bind,' because of its usefulness in making bands. *Clen'atis daphnoï'des major*, *Lesser periwinkle*, (F.) *Pervenche*, *Violette des Sorciers*. It has bitter and astringent properties, and has been used in gargles and diseases of the chest.

VINCETOXICUM, *Asclepias vincetoxicum*.

VINCTURA, *Fascia*.

VINCULA, *Fascia*.

VINCULUM, *Bandage*, *Lien*—v. *Caninum*, *Frænum penis*—v. *Lingæ*, *Frænum lingæ*—v. *Præputii*, *Frænum penis*—v. *Umbilicale*, *Funiculus umbilicalis*.

VINE, *Vitis vinifera*—v. *Grape*, *Vitis vinifera*.

VINE POISON, *Rhus radicans*.

VINE, WILD, *Pareira*.

VINEGAR, AROMATIC SPIRIT OF, see *Aceticum acidum*.

VINEGAR OF CANTHARIDES, *Acetum cantharidis*.

VINEGAR, COMMON, *Acetum*—v. *Distilled*, see *Aceticum acidum*—v. *Estragon*, *Artemisia dracunculus*—v. *Marseilles*, *Acetum aromaticum*.

VINEGAR OF MEADOW SAFFRON, *Acetum colchici*—v. of *Opium*, *Guttæ nigre*.

VINEGAR, RADICAL, *Aceticum acidum*.

VINEGAR OF SQUILLS, *Acetum scillæ*—v. of the *Four Thieves*, *Acetum aromaticum*.

VINEGAR, THIEVES', *Acetum aromaticum*—v. *Whey*, see *Acetum*.

VINEGAR OF WOOD, see *Aceticum acidum*.

VINETTE, *Rumex acetosa*.

VINETTIER, *Oxyacantha Galeni*.

VINEUX, *Vinosus*.

VINOLENTA, see *Temulentia*.

VINOLENTIA, *Temulentia*.

VINOSUS, *Vinosus*.

VINOUS, *Vino'sus*, *Eno'des*, *Enoï'des*, (F.) *Vineux*, from *vinum*, 'wine.' Relating to wine. Having the character of, or resembling, wine. Made of wine.

VINUM, *Wine*, *Sherry wine* (Ph. U. S. 1842). See *Wine*. A medicinal wine, (F.) *Vin médicinal*, *Onolé*, *Onolature*.

VINUM ABSINTHITES, *Wine of Wormwood*. (Fol. *absinth. essic.*, *absinth. Pontic.*, $\bar{a}\bar{a}$ $\bar{\nu}$ vj, *vinî albi* Oiv. Macerate for 24 hours, and strain. Ph. P.) Stimulant, tonic, febrifuge, vermifuge.

VINUM ADUSTUM, *Brandy*—v. *Album*, *Sherry wine* (Ph. U. S. 1851), see *Wine*—v. *Album Hispanicum*, see *Wine*—v. *Album Montanum*, see *Wine*.

VINUM AL'OEËS, *V. aloë's Sœctori'næ seu aloët'icum seu aro'mo-aboët'icum*, *Tinctu'ra hi'era*, *Tinet-*

u'ra sacra, Wine of Aloes. (Aloës in pulv. \mathfrak{Zj} , cardam. cont., Zingib. cont., ãã \mathfrak{Zj} ; vini alb. Oj.) Macerate for 14 days, and filter. *Ph. U. S.*) Purgative and stomachic, according to the dose. Dose, $f\mathfrak{Zj}$ to $f\mathfrak{Zij}$.

VINUM AMARUM, V. Gentianæ comp.—v. Amarum scilliticum, &c., V. diureticum amarum—v. Amarum cum spiritu vini, V. gentianæ compositum—v. Antimoniale, V. antimonii tartarizati—v. Antimoniatum Huxhami, V. antimonii tartarizati—v. Antimonii potassio-tartratis, V. antimonii tartarizati.

VINUM ANTIMO'NIUM, V. antimo'nii tartariza'ti seu tartra'tis antimonii seu antimo'nii potas'sio-tartratis seu benedic'tum seu antimoniat'um Huxhami seu antimoniale seu emet'icum, Liquor tar'tari emet'ici, Essentia antimonii seu stib'i'i, Aqua benedic'ta Ruland'i, Solution of tartarized antimony, Antimonial wine. (Ant. et Potass. tart. \mathfrak{Dj} , vini albi $f\mathfrak{Zx}$. Dissolve the tartarized antimony in the wine. *Ph. U. S.*) Each fluidounce contains two grains of the tartrate.

The ordinary Antimonial wine is made with glass of antimony \mathfrak{Zj} , sherry Oiss.

Ward's Red Drop consists of a strong vinous solution of tartarized antimony.

VINUM ANTISCORBU'TICUM, Antiscorbutic wine. (Rad. armo'riacæ recent. \mathfrak{Zj} , fol. cochleariæ recent., nasturtii aquatic., trifol. aquatic., semin. sinap., ãã \mathfrak{Zss} , ammoniæ muriat. \mathfrak{Zij} , vini albi Oij. Macerate for 36 hours; filter, and add tincturæ cochlear. \mathfrak{Zss} . *Ph. P.*) Stimulant and tonic. Dose, $f\mathfrak{Zss}$ to $f\mathfrak{Zij}$.

VINUM AROMAT'ICUM, Aromatic wine. (Species aromatic. \mathfrak{Ziv} , vini rubr. Oij. Macerate for 6 days and filter. *Ph. P.*) Stimulant and tonic. Used, externally, in fomentations, embrocations, &c.

VINUM AROMA-ALOETICUM, V. aloes—v. Benedictum, V. antimonii tartarizati.

VINUM CÂMPA'NUM, V. Campana'ceum. Champagne wine. A well-known sparkling wine of France. See Wine.

VINUM CANARINUM, see Wine—v. Chalybeatum, V. ferri—v. Cinchonæ compositum, V. de kinâ kinâ comp.

VINUM COL'CHICI, V. Colchici Radic'is, Wine of Colchicum, Want's Eau d'Husson. (Colchic. rad. bene contus. \mathfrak{Ij} , vini alb. Oij. Macerate for 14 days, with occasional agitation, and then express strongly, and filter. *Ph. U. S.*) It may also be prepared by displacement. Diuretic, sedative, and purgative. Chiefly used in gout. Dose, gtt. 40 to $f\mathfrak{Zj}$.

Reynolds's Specific for gout and rheumatism consisted of the fresh bulb of Colchicum \mathfrak{Zvij} , Sherry wine, $f\mathfrak{Zxv}$. The colchicum was macerated for eight or ten days in the wine, at a gentle heat; coloured with syrup of poppies and flavoured with rum. Reynolds is said to have killed himself by taking an over-dose of it.

VINUM COLCHICI RADICIS, V. colchici.

VINUM COLCHICI SEM'INIS, Wine of Colchicum seed. (Colchic. sem. cont. \mathfrak{Ziv} ; vini alb. Oij. Macerate for 14 days, with occasional agitation, then express and filter. *Ph. U. S.*) Dose, $f\mathfrak{Zj}$ to $f\mathfrak{Zij}$.

VINUM CREMATUM, Brandy.

VINUM DIURET'ICUM AMARUM, V. amarum scillit'icum compositum in Charita'tis Nosocomi'o usarpa'tum, Bitter diuretic wine. (Cort. cinchon., Winteran., limon., ãã \mathfrak{Zij} , rhus toxicodendr., scilicet, cacumin. angelicæ, ãã \mathfrak{Zss} , fol. absinth., melissæ, ãã \mathfrak{Zj} , baccar. junip., macis, ãã \mathfrak{Zss} , vini alb. Oviij. Macerate and filter. *Ph. P.*) Stimulant, tonic, and diuretic. Dose, $f\mathfrak{Zss}$ to $f\mathfrak{Zij}$.

VINUM EMETICUM, V. antimonii tartarizati.

VINUM ER'GOTÆ, Wine of Ergot. (Ergotæ, cont., \mathfrak{Zij} ; vini alb. Oj. Macerate for 14 days,

with occasional agitation; then express and filter. *Ph. U. S.*) Dose, \mathfrak{Mxx} to $f\mathfrak{Zj}$ to produce the peculiar effects of ergot.

VINUM FERRATUM, V. Ferri.

VINUM FERRI, V. Chalybeatum seu ferra'tum seu Martia'tum seu Martis, Tinctura Martis vino'sa seu Martis cum vino, Steel wine, Wine of Iron. (Iron wire, \mathfrak{Zj} ; Sherry wine, Oij (Imp. meas.). Digest for thirty days and filter. *Ph. L.*) Tonic. Dose, $f\mathfrak{Zj}$ to $f\mathfrak{Ziv}$.

It is sometimes made by adding two pints of wine to two ounces of iron filings; macerating and filtering.

VINUM GENTIA'NÆ, V. G. Compositum seu Ama'runt seu Amarum cum spiritu Vini, Infusum ama'runt vino'sum, Compound wine of gentian, Wine bitters. (Rad. gentian. luteæ \mathfrak{Zss} , cort. cinchon. offic. \mathfrak{Zj} , cort. aurant. \mathfrak{Zij} , canellæ alb. \mathfrak{Zj} , alcohol. dilut. $f\mathfrak{Ziv}$, vini alb. Hispanic. Oijss. *Ph. E.*) Dose, $f\mathfrak{Zj}$ to $f\mathfrak{Zvj}$.

VINUM HIPPOCRATICUM, Claret—v. Hispanicum, Vinum, see Wine—v. Hordeaceum, Cerevisia—v. Hydrotides, see Hydrotide.

VINUM IPECACUAN'HÆ, Ipecacuan'ha wine. (Ipecacuan. cont. \mathfrak{Zij} , vini alb. Oij.) Macerate for 14 days, express, and filter. Emetic and diaphoretic. Dose, as an emetic, $f\mathfrak{Ziv}$ to $f\mathfrak{Zx}$.

VINUM DE KINÂ KINÂ COMPOSITUM, V. cincho'næ compositum, Compound bark wine, (F.) Vin de quinquina composé. (Cort. cinchon. pulv. \mathfrak{Ibss} , quassiæ, cort. Winteran., cort. aurant. sic., ãã \mathfrak{Zss} , alcohol. (12° to 22° Beaumé) Oj. Macerate for 24 hours; and add vini albi Ovj. Macerate for four days, and filter. *Ph. P.*) Tonic, febrifuge, and stomachic. Dose, $f\mathfrak{Zss}$ to $f\mathfrak{Zij}$.

VINUM MARTIATUM, V. ferri—v. Martis, V. ferri—v. Medicatum, see Claret.

VINUM MEDICINA'LE, Medicated Wine. Wine, holding in solution one or more medicines. Medicinal wines are obtained by macerating or digesting medicinal substances in wine. They differ, of course, according to the nature of the medicine employed, the strength of the wine, &c. In a late Pharmacopœia of the London College, all the wines were changed into weak tinctures; but the old names were left unaltered. Sherry is the wine usually employed. The following are medicated wines.

VINUM MERUM, Acratum—v. Nicotianæ tabaci, V. tabaci—v. Opiatum fermentatione paratum, Landanum abbatiss Rousseau.

VINUM O'PII, V. de opio compositum, Laud'anum liquoridum Sydenhami seu Hoffman'ni, Tinctura Theba'ica, Wine of Opium, Sydenham's Laud'anum, Ford's laudanum. (Opii in pulv. \mathfrak{Zij} ; cinnam. cont., caryophyll. cont. ãã \mathfrak{Zj} , vini albi Oj. Macerate for 14 days; express and filter.—*Ph. U. S.*) Narcotic. Dose, gtt. xv to $f\mathfrak{Zj}$.

VINUM DE OPIO COMPOSITUM, V. opii—v. Picatum, Pissites.

VINUM PORTUGAL'LICUM, V. rubrum, (Ph. U. S. 1851.) (F.) Vin rouge d'Oporto. Wine of Portugal or of Oporto. Port wine. A strong astringent wine, not much drunk in the United States; but greatly used in England.

VINUM QUI'NIÆ, Wine of Quin'ia. (Wine \mathfrak{Iij} , sulphate of quinia gr. x. Mix.) Dose, $f\mathfrak{Zij}$ or more; according as it is used as a stomachic, or to arrest ague. A Vinum Cincho'næ may be made in the same way.

VINUM RHEI, V. R. palma'ti, V. Rhabarbari, Tinctura Rhabar'bari Vini'sa, Elixir Rhei dulce, E. R. Compositum, Rhabarb Wine. (Rhei cont. \mathfrak{Zij} , canellæ cont. \mathfrak{Zj} , alcohol. dilut. $f\mathfrak{Zij}$, vini albi, Oj. Macerate for 14 days; express and filter.—*Ph. U. S.*) Laxative and stimulant. Dose, $f\mathfrak{Ziv}$ to $f\mathfrak{Zij}$.

VINUM RHEI PALMATI, V. Rhei—v. Rheranum,

see Wine — v. Rhabarbari, *V. rhei palmati* — v. Rubrum, *V. Portugallicum* — v. Rubrum Portugallicum, see Wine.

VINUM TAB'ACI, *Vinum Nicotiana Tabaci*, Tobacco Wine. (*Tabac. incisi*, ʒj, *vini albi*, Oj. Macerate for 14 days; express and strain. *Ph. U. S.*) Narcotic, diuretic, and antispasmodic. In dropsical cases, colica pictonum, and ileus. Not used. Dose, gtt. xx to xxxvj.

VINUM VERA'TRI, *V. V. albi*, Wine of White Hel'lebore. (*Veratri cont.* ʒiv; *Vini albi*, Oj. Macerate for 14 days, express and filter.—*Ph. U. S.*) In cutaneous affections, and in gout. Dose, ten minims.

VINUM VERATRI ALEI, *V. Veratri*—v. Xericum, see Vinum.

VIOL, Stuprum.

VI'OLA, *Viola odorata seu mar'tia*, Ion, *Matronalis*, *Viola'ria*, Sweet Violet, (F.) *Violette à bouquets*, *V. odorante*. Ord. Violacæ. The flowers of the sweet violet, have a pleasant, peculiar odour, and scarcely any taste. They are slightly laxative.

VIOLA CANI'NA, *V. sylvest'ris*, Dog Violet. The root of this plant is emetic and cathartic. Dose, ʒj.

VIOLA IPECACUANHA, see Ipecacuanha — v. Lutea, *Cheiranthus cheiri*—v. Martia, *Viola* — v. Odorata, *Viola*—v. Palustris, *Pinguicula vulgaris*.

VIOLA PEDA'TA, *Viola*, (*Ph. U. S.*) This indigenous violet, which grows from New England to Carolina, is regarded by some as a useful demulcent in pectoral affections.

VIOLA SYLVESTRIS, *V. Canina*.

VIOLA TRI'COLOR, *Jacea tricolor*, *Herba seu Flos Trinitatis*, *Heart's ease*, *Pansy*, *Pensy*, *Pansies*, (*Prov.*) *Beedy's eyes*, *Biddy's eyes*, (F.) *Pensée*, *P. sauvage*. The decoction of this beautiful little plant has been recommended in diseases of the skin, &c. Its roots are, also, emetic and cathartic.

VIOLARIA, *Viola*.

VIOLET, DOG, *Viola canina*—v. Dog's Tooth, *Erythronium Americanum*.

VIOLET BLOOM, *Solanum dulcamara*.

VIOLET, SWEET, *Viola*.

VIOLETTE À BOUQUETS, *Viola*—v. *Odorata*. *Viola*—v. *des Sorciers*, *Vinea minor*.

VIOLIER JAUNE, *Cheiranthus cheiri*.

VIORNA, *Clematis vitalba*.

VIPER, EGYPTIAN, *Aspis* — v. Ten-inch long, *Echidna ocellata*.

VIPER GRASS, *Scorzonera*.

VIPERA, Coluber berus.

VIPERARIA, *Aristolochia serpentaria*, *Scorzonera*.

VIPERINA VIRGINIANA, *Aristolochia serpentaria*.

VIPÉRINE DE VIRGINIE, *Aristolochia serpentaria*.

VIPER'S DANCE, Chorea.

VIR, Aner, Penis—v. *Efficinatus*, *Gynæceaner*.

VIRAGO, see *Pogonias*.

VIREUX, Virulent.

VIRGA, Penis—v. *Cerca*, *Bougie*—v. *Cerebri*, Pineal gland.

VIRGILLA, *Cladrastis tinctoria*.

VIRGIN, *Virgo*, genitive *virginis*, *Par'thenus*, *Expers nuptiarum*, (F.) *Vierge*, *Pucelle*. A female who has never had sexual intercourse. Applied, also, occasionally to the male so circumstanced.

VIRGIN-MARY THISTLE, *Centaurea benedicta*.

VIRGINAL, *Virginal'le*, from *virgo*, *virginis*, 'a virgin.' The external genital organs of the virgin.

VIRGINAL MEMBRANE, Hymen.

VIRGIN'IA, MINERAL WATERS OF. There are several celebrated mineral springs in Virginia,

on the western side of the Blue Ridge. Two Thermal springs exist in Bath county. The Warm Spring, as it is called, issues with a bold stream, sufficient to turn a mill, and to keep the water of its basin at the temperature of 97°. The Hot Spring is a few miles from the warm. Its temperature is 107°. They are both slightly sulphureous. The Sweet Springs are at the eastern foot of the Allegheny, in Botetourt county; 42 miles from the Warm Springs. The water has a temperature of 70°, and is highly impregnated with carbonic acid. The White Sulphur, as well as the Red Sulphur, and Salt Sulphur Springs, are also much celebrated. The Red Spring is affirmed to exert a sedative influence on the pulse, diminishing the number of its beats. Prof. W. B. Rogers analyzed the water of the White Sulphur, and found it to be composed as follows:—Gaseous contents in a wine gallon. Sulphuretted hydrogen, 2.5 cubic inches, carbonic acid, 2; oxygen, 1.448; nitrogen, 3.552.—Total, 9.5. Solid contents in a pint; sulphate of magnesia, 5.588 grains; sulphate of lime, 7.744; carbonate of lime, 1.150; chloride of calcium, 0.204; chloride of sodium, 0.180; oxide of iron, a trace; loss, 0.410. Total, 15.276 grains.

The Rockbridge Alum Springs are situated 17 miles west of Lexington, and are in much favour. Their solid constituents are said to be,—sulphate of potassa, 1.765 gr.; sulphate of lime, 3.263; sulphate of magnesia, 1.763; protoxide of iron, 4.863; alumina, 17.905; cretate of ammonia, 0.700; chloride of sodium, 1.008; silicic acid, 2.840; free sulphuric acid, 15.224; free carbonic acid, 7.536 — water 58315.133. They are used in dyspepsia, scrofula, chronic diarrhœa, and cutaneous affections. The Both Alum Springs are about 17 miles west of the Rockbridge Springs, in Bath county. They consist of free sulphuric acid, 7.878 grs; carbonic acid, 3.846; sulphate of potassa, 0.258; magnesia, 1.282; lime, 2.539; protoxide of iron, 21.776; alumina, 12.293; cretate of ammonia, 1.776; silicate of soda, 3.150; water, 58317.202. They are more chalybeate than the last.

About 15 miles from Staunton are *Stribling's Springs*—a sulphuretted water; and near *Warrenton*, in *Fauquier county*, there is a sulphureous water, called *Lee's Springs*, which is much frequented. *Berkley or Bath*, and *Capon Springs* are likewise celebrated.

VIRGINIA, Hymen.

VIRGINIS VITIATIO, Defloration.

VIRGIN'ITY, *Virgin'itas*, *Parthenei'a*, *Integritas*, *Maid'enhood*, *Maid'enhed*, (F.) *Virginité*, *Pucelage*; from *virgo*, *virginis*, 'a virgin.' The state of one who has never had carnal commerce.

VIRGIN'S BOWER, COMMON, *Clematis vitalba*, *Clematis Virginica* — v. Bower, upright, *Clematis recta*—v. Sweet-scented, *Clematis flammula*.

VIRGIN'S MILK, *Lac Vir'ginis* seu *Virginal'le*, (F.) *Lait virginal*. A tincture of benjamin or of any other balsam, precipitated by the addition of water, which gives it a milky appearance. Also, sub-acetate of lead precipitated by water. It has been used as a cosmetic to remove freckles, &c.

VIRGINITAS DEFLOKATA, Defloration.

VIRGO, Virgin—v. Aurea, *Solidago virgaurea*.

VIRGULA, Penis.

VIRIDE ÆRIS, *Cupri subacetat* — v. *Montanum*, *Caprum*.

VIRILE, Penis.

VIRILES'CENCE; from *virilis*, (*vir*, 'a man,') 'manly.' The state of the aged female in which she assumes certain of the characteristics of the male. — *Mehliis*.

VIRILIA, Pudibilia.

VIRILITY, Adult age.

VIROSUS, Virulent.

VIRTUE, Faculty.

VIRTUS FORMATRIX, Plastic force — v. *Plastica*, Plastic force.

VIRULENT, *Virulentus*, *Virosus*, (F.) *Virulentus*, from *virus*. That which is of the nature of a virus or which is caused by a virus. Highly noxious.

VIRUS, from *vis*, 'force,' plural *vires* [?]. A Latin word, which signifies poison; but which, in medicine, has a somewhat different acceptation. By it is understood a principle, unknown in its nature and inappreciable by the senses, which is the agent for the transmission of infectious diseases. Thus we speak of the *variolic*, *caccine*, and *sphilitic viruses*. *Virus* differs from *venom* in the latter being a secretion natural to certain animals, whilst the former is always the result of a morbid process, — a *morbid poison*.

VIRUS, Ichor, Poison, Sanies — v. *Vaccine*, see *Vaccina* — v. *Vitale*, Sperm.

VIS, Force — v. *Adhæisionis*, Cohesion (force of) — v. *Attractionis*, Cohesion (force of) — v. *Aucta*, *Sthenia* — v. *Cohæisionis*, Cohesion (force of) — v. *Conservatrix*, *V. medicatrix naturæ* — v. *Elastica*, Elasticity — v. *Essentialis*, Plastic force.

VIS EXPULTRIX. The organic force by which, it was supposed, the useless was removed from the body.

VIS FORMATIVA, Plastic force — v. *Generatrix*, *Potentia generandi* — v. *Imminuta*, *Asthenia* — v. *Instita*, *Irritability* — v. *Irritabilitatis*, *Irritability*.

VIS MEDICATRIX NATURE, *V. conservatrix*, *Autoerati'a*, *Autonom'ia*, *Autocrati'ria*, *Authy-gian'sis*, *Autotherapei'a*, *Physiat'ricæ*, *Physio-autocrati'a*, *Physioautoerati'a*, (F.) *Force medicatrice*. A term, employed by some, to express that instinctive healing power, in an animal or vegetable, by virtue of which it can repair injuries inflicted upon it, or remove disease.

VIS METABOLICA, Metabolic force.

VIS MORTUA, Under this name Haller included the mechanical properties of membrane, — flexibility, extensibility, elasticity, &c. — which are totally independent of the vital properties. They remain some time after the complete extinction of life in all its functions; seem to be connected with the mechanical arrangement of particles and the chymical composition of the substance in which they reside, and not to be affected until the progress of decomposition has become sensible.

VIS MUSCULARIS, *Myodynamia* — v. *Nervorum*, *Nervous power* — v. *Nervosa*, *Nervous power* — v. *Plastica*, *Plastic force* — v. *Reproductiva*, *Plastic force* — v. *Vitæ*, *Irritability*.

VIS VITALIS, *Vis seu Facultas Zoitica*, (F.) *Force vitale*. The *vital force* — *Biod* of Baron Von Reichenbach — which distinguishes living matter from the dead. Also, *Irritability*.

VIS ZOTICA, *Vis vitalis*.

VISAGE, Countenance.

VISCAGO BEHEN, *Cucubalus behen*.

VISCERA, Entrails.

VISCERAL, Splanchnic.

VISCERALIS, Stomachal.

VISCERATION, *Exenterismus*.

VISCÈRES, Entrails.

VISCONIA, *Physconia*.

VISCUM ALBUM, *Ixos*, *Ix'ia*, *Dabach*, *Mis'tletoe*, (F.) *Gui*, *Gui de Chêne*, *Gillon*. A parasitic plant, which grows on a number of trees. *Order*, *Loranthaceæ*. *Sex. Syst.* *Diœcia Tetrandria*. That of the oak — *Viscum quercinum* — has been most celebrated, but it does not differ from the others. It was, at one time, much used in epilepsy and other neuroses; the wood or leaves

being given in powder, in the dose of ʒss or ʒj. The berries, also called *Pommes hémorrhoidales*, from their supposed virtues, are drastic; and, when applied externally, are maturative.

VISCUM CAPEN'SÈ. A South African parasitic shrub, which grows on the stems of several species of *Rhus* and *Euclea*.

VISCUM FLAVESCENS, *V. verticillatum*, *Yellow* or *Yellowish Mistletoe*, indigenous, has been given in similar cases as the *Viscum album*.

VISCUM VERTICILLATUM, *V. flavescens*.

VISIO, Pupil, Vision.

VIS'ION, *Sight*, *Vis'io*, *Vision*, from *videre*, *visum*, 'to see;' *Opsis*, *Omma*, (F.) *Vue*. The action of seeing. The sight is one of the five senses, and the eye is its organ. By it we distinguish colours, and appreciate most of the physical qualities of external-objects. The eye is composed of different transparent media, whose curvatures and refractive powers are so combined as to render insensible the aberrations of sphericity and refrangibility, and to concentrate the numerous rays proceeding from more or less distant objects. These rays traverse, successively, the transparent cornea, the aqueous humour, the crystalline, the vitreous humour, and strike upon the retina, on which they impress the figure of the object whence they have proceeded; and, in order that no obscurity may arise from the reflections that might otherwise occur, the anterior of the eye is lined by a membrane — the choroid — which is itself covered internally by a dark pigment. This absorbs the light, like the dark pigment in the interior of telescopes, and thus obviates confusion. As the rays proceeding from an object must cross each other in their course to the retina, it follows that those proceeding from the upper part of an object must fall upon the lower part of the retina, and conversely; so that the object must be impressed upon the retina in an inverted position; yet experience teaches us to appreciate the position accurately.

VISION, BINOCULAR, see *Binocular* — v. *Coloured*, *Chromopsia* — v. *Double*, *Diplopia* — v. *Iridescent*, *Chromopsia* — v. *Manifold*, *Polyopsia* — v. *Multiple*, *Polyopsia* — v. *Phantasmatum*, *Metamorphopsia* — v. *Single*, see *Binocular*.

VISIONOMY, *Physiognomy*.

VISORIUM ORGANUM, *Eye*.

VISORIAL, *Visual*.

VISUAL, *Visualis*, *Viso'rius*, (F.) *Visual*. Same etymon as *Vision*. That which concerns the sight or belongs to vision.

VISUAL ANGLE is the angle formed by the crossing of two rays, proceeding from opposite points of any body, in their passage through the pupil. It is by the size of this angle that we judge, to a certain extent, of the dimensions of objects.

VISUEL, *Visual*.

VISUS, *Vision* — v. *Acris*, *Oxydercia* — v. *Acrior*, *Nyctalopia* — v. *Coloratus*, *Chromopsia* — v. *Debilitas*, *Asthenopia* — v. *Decolor*, *Achromatopsia* — v. *Defiguratus*, *Metamorphopsia* — v. *Dimidiatus*, *Hemiopia* — v. *Diurnus*, *Hemeralopia* — v. *Duplicatus*, *Diplopia* — v. *Hebetudo*, *Amblyopia* — v. *Juvenum*, *Myopia* — v. *Lucidus*, *Photopsia* — v. *Muscarum*, see *Metamorphopsia* — v. *Nebulosus*, *Nebula* — v. *Nocturnus*, *Nyctalopia* — v. *Senilis*, *Presbytia*.

VITA, *Life* — v. *Propria*, *Irritability*.

VITAL, *Vitalis*, *Biol'ic*, *Biol'icus*, (F.) *Vital*, from *vita*, 'life.' Relating or appertaining to life.

VITAL CAPAC'ITY, *Pulmon'ic* or *Lung capacity*. A term employed by Dr. Hutchinson to designate the number of cubic inches of air, which a person can forcibly expire after a full inspiration.

VITAL DYNAMICS, see Dynamic—v. Force, Vis vitalis.

VITAL PRINCIPLE, *Flam'mula seu Aura vitalis*, *Microcosmetor*, (F.) *Flamme vitale*, *Vital Flame*. The principle which, in association with matter, as in organized bodies, controls its manifestations and properties, and distinguishes organized matter from the inorganic. We know nothing of this principle, except in its connexion with organization.

VITAL PROPERTIES, see Properties, vital—v. Statistics, Statistics, medical.

VITALBA, Clematis vitalba.

VITALISM, *Vitalismus*. The doctrine of the *vitalist*—*vitalista*—who ascribes every function of the organism to the direct agency of the vital principle.

VITALIST, see Vitalism.

VITALITY, *Vitalitas*, (F.) *Vitalité*, from *vita*, 'life.' The vital principle: also, used in the sense of vital action or movement.

VITALIZE. To endow with life.

VITALS, *Vitalia*. Parts that are necessary for life—the heart, lungs, and nervous centres more especially.

VITARO'BORANT, PALMER'S. A farinaceous preparation, which appears to consist of a mixture of the red or Arabian lentil and wheat flour, the latter in considerable amount, sweetened with sugar. It bears considerable resemblance to Revarenta.

VITELLARY, Vitelline—v. Membrane, Zona pellucida.

VITELLINE, Zona pellucida.

VIT'ELLINE, *Vitel'linus*, *Vit'ellary*, *Lecitholies*, from *vitellus*, 'the yolk of an egg.' Appertaining to or resembling the vitellus or yolk. Also, the yolk membrane. See Vesicula umbilicalis.

VITELLINE DISC, Proligerous Disc—v. Fluid, see Vesicula umbilicalis.

VITELLINE PEDICLE or APOPH'YSIS is the pedicle which attaches the umbilical vesicle to the embryo. See Vesicula umbilicalis.

VITELLINE POUCH, Vesicula umbilicalis—v. Vessels, Omphalo-mesenteric.

VITELLO-MESENTERIC, Omphalo-mesenteric.

VITELLUM OVI, see Ovum.

VITELLUS OVI, see Ovum.

VITEX, from *vicio*, 'I bind' [?]; *V. Agnus Castus seu verticillata*, (F.) *Gattilier*, *Petit Poivre*, *Poivre de moine* ou *savage*. *Ord.* Verbenaceæ. *Sex. Syst.* Didynamia Angiospermia. The *Chaste Tree*. The seeds, when fresh, have a fragrant smell, and an acrid, aromatic taste. Formerly, they were celebrated as antaphrodisiacs.

VITI SALTUS, Chorea.

VITIA PRIMÆ CONFORMATIONIS, see Monster.

VITIATIO, Stuprum.

VITILIGINES, Ephelides.

VITILIGO, Lepra—v. Alphas, Lepra alphasides—v. Melas, Lepra nigricans—v. Nigra, Lepra nigricans.

VITILIGOÏ'DEA, from *vitiligo*, and *ειδος*, 'resemblance.' A disease of the skin, so called from its resembling the vitiligo of Willan. It appears under two forms; either as tubercles—*V. tuberosa*—varying from the size of a pin's head to that of a large pea, isolated or confluent; or as yellow patches of irregular outline, slightly elevated, and with but little hardness—*V. plana*.

VITIS ALBA SYLVESTRIS, Bryonia alba—v. Apyrena, see V. Corinthiaca.

VITIS CORINTHIACA. *Ord.* Vitaceæ. *Sex. Syst.* Pentandria Monogynia. This plant affords the *Uvæ Corinthiaccæ passæ minoris*, *Passæ Corinthiaccæ*, *Pas'sulæ minoris*, *Corinthiaccæ*, *Currants*,

(F.) *Raisins de Corinthe*; which are the dried fruit of the *Vitis Corinthiaca* or *Vitis apyrena*; and are similar, in their properties, to the raisin.

VITIS IDEEA MYRTILLUS, *Vaccinium myrtillus*—v. *Idæa Palustris*, *Vaccinium oxycoccos*—v. *Idæa punctata*, *Vaccinium vitis idæa*—v. *Sativa*, *V. vinifera*.

VITIS VINIF'ERA, *V. sativa*, *Am'pelos*, *A. Enoph'oros*, *Grape vine*, *Vine*, (F.) *Vigne*. Vine leaves and the tendrils have an astringent taste, and were formerly used in diarrhœa, hemorrhage, &c. The juice or sap, called *Lacryna*, has been recommended in calculous disorders and in cases of chronic ophthalmia. The juice of the unripe fruit is called *Verjuice*. The *Grape*, *Uva*, *Botrys*, *Staphylê*, *Rhax*, (F.) *Raisin*, when ripe, is a wholesome delicious fruit; and, when dried, forms the *Uvæ passæ majoris*, *Pass'ulæ majoris*, *Uvæ passæ solè siccat'æ*, *Uva passa* (Ph. U. S.), *Zibebæ*, *Raisins*. These are inodorous; and to the taste, sub-acidulous, sweet, and mucilaginous. They are demulcent and nutritive.

VITTIUM, Disease—v. Caducum, Epilepsy.

VITIUM CONFORMA'TIONIS. A disease or fault of conformation.

VITIUM DIVINUM, Epilepsy—v. Herculeum, Epilepsy—v. Scrophulosum, Scrofula.

VITRARIA, Parietaria.

VITRË. Hyaline.

VITREO-CAPSULITIS, Hyalitis.

VITREOUS, Hyaline—v. Humour, Corpus vitreum—v. Humour of the ear, *Vitrine auditive*.

VITREUS, Hyaline.

VITREUX, Hyaline.

VITREINA OCULARIS, Corpus vitreum.

VITRINE AUDITIVE (F.), from *vitrum*, 'glass'; *A'quila vit'rea auditiv'æ*, *End'olymph*, *Liquor* or *Fluid of Scarpa*, *Vitreous Humour of the Ear*. The fluid contained in the membranous labyrinth of the ear, so called from its resemblance to the vitreous humour of the eye.

VITRIOL, Ferri sulphas—v. Blue, Cupri sulphas—v. Green, Ferri sulphas—v. Roman, Cupri sulphas—v. White, Zinci sulphas.

VITRIOLUM ALBUM, Zinci sulphas—v. Ammoniacale, Ammoniac sulphas—v. Cæruleum, Cupri sulphas—v. Cupri, Cupri sulphas—v. Cyprum, Cupri sulphas—v. Ferri, Ferri sulphas—v. Goslariense, Zinci sulphas—v. Martis, Ferri sulphas—v. Romanum, Cupri sulphas—v. Veneris, Cupri sulphas—v. Viride, Ferri sulphas—v. Zinci, Zinci sulphas.

VITRUM, *Hy'alos*, *Glass*, *Brancia*, (F.) *Verre*. Glass, coarsely powdered, has been sometimes used to remove specks of the cornea.

Powdered glass has been regarded, but erroneously, as a poison. It acts only mechanically.

The saline scum, which swims on glass when first made, has been used in tooth-powders. It is called *Sandiver*, *Sel de verre*, *Glass Gall*, *Fel vitri*, &c.

VITRUM ANTIMONII, see Antimonii vitrum—v. Hypoclepticum, Separatorium—v. Oculare, see Spectacles—v. Sublimatorium, Aludel.

VITTA, *Bandelette*, *Caul*.

VITTARIA CETERACH, *Asplenium ceterach*.

VITTIE VAYR, *Andropogon muricatus*.

VIVACE, from *vivax*, *vivacis*, (*vivere*, 'to live,') 'living long, tenacious of life.' An epithet given by Levret to uterine polypi, which he considers to be, commonly, vegetations of some ulcer in the interior of the uterus, and incurable.

VIVÆSECTIO, Vivisection.

VIVERRA CIVETTA, see Civetta.

VIVIPARE, Viviparus.

VIVIPARITÉ, see Viviparus.

VIVIP'AROUS, (F.) *Vivipare*, from *vivus*, 'alive,' and *pario*, 'I bring forth.' An epithet applied to animals whose young are brought forth detached, without requiring to be hatched, as in the *Oviparous*. The condition may be termed *Vivip'arousness*, (F.) *Viviparité*. See Generation.

VIVIPAROUSNESS, see *Viviparous*.

VIVISECTION, *Vivisectio*, *Vivæsectio*, *Biotom'ia*, from *vivus*, 'alive,' and *secare*, *sectum*, 'to cut.' The act of opening or dissecting living animals. One who performs vivisections is a *vivisector*.

VOCAL, Oral—v. *Cords*, see *Cords*, *vocal*—v. *Ligaments*, see *Cords*, *Vocal*—v. *Tube*, see *Tube*, *vocal*.

VOCALIS, *Vowel*.

VOCE DI PETTO, see *Voice*—v. *di Testa*, see *Voice*.

VOICE, *Vox*, *Audē*, *Phonē*, (F.) *Voix*, from *occare*, 'to name, to call.' An appreciable sound produced by the air, when driven from the lungs, throwing the inferior ligaments of the glottis into vibration. The function by which this is effected has been called *Phona'tion*. It is a function of animal life; and, in animals, is limited to the production of the *simple* or *instinctive voice*, as well as in the idiot; but, in intellectual man, becomes much more complicated and articulated,—an evidence of his intellectual superiority.

VOICE, ARTICULATED, *Speech*, *Loque'la*, *Glossa*, *Glotta*, *Lal'ia*, *Phrasis*, (F.) *Parole*, *Voix articulée*, is the voice as produced by the glottis, modified by the motions of the tongue, lip, and other parts of the vocal tube. Most physiologists agree in regarding the glottis, or the space between the thyro-arytenoid ligaments plus the ligaments themselves, as the part where vocal sounds are formed; but the mechanism of this formation is a matter of dispute. The greater part of individuals regard the glottis and its ligaments, with the *vocal tube*, or the space which the sound has to traverse after it is produced in the glottis, as a reed instrument, like the clarinet, the inferior ligaments of the glottis constituting the reed. In speech, as ordinarily effected, the tongue, lips, teeth, &c., are concerned, but there are some authentic cases on record, where it has been accomplished after the tongue has been removed. In such cases, the articulated voice must have been produced in the glottis alone, or in it aided by an obscure action of the parts above it.

The singing voice is not limited to the larynx; the pharynx would seem to be concerned also. The notes that are produced in the latter have been termed *supra-laryngeal*, or *notes of the second register*. They constitute the *pharyngeal voice*, *falsetto* or *fauvette voice* or *voce di testa* (L.), *Voix de tête*, *Voix de fausset* (F.). The *laryngeal voice* or *voice of the first register*, *Chest voice*, is the *Voce di Petto* (L.), *Voix de Poitrine* (F.). The laryngeal voice, which is always more elevated, by an octave, in the female than in the male, furnishes the types called *Soprano*, *Alto* or *Contralto*, *Tenor* and *Bass*. The first two belong to the female voice; the last two to the male. The *Baritone* is between the bass and tenor.

VOICE, BLEATING, *Egophony*—v. *Cavernous*, *Pectoriloquy*—v. *Chest*, see *Voice*, articulated.

VOICE, CHOL'ERIC, *Vox Choleric'a*. The peculiar husky voice of those affected with cholera.

VOICE, CONVULSIVE, *Vox convulsiva*, (F.) *Voix convulsive*. A neurosis of the voice, consisting in the production of discordant sounds—acute and grave—which cannot be brought to the natural tones by any effort of volition. It seems to be caused by disordered contraction of the muscles of the larynx.

VOICE, FALSETTO, see *Voice*—v. *Goat's*, *Egophony*—v. *Laryngeal*, *Laryngophony*, see *Voice*

—v. *Pharyngeal*, see *Voice*—v. *Tracheal*, *Laryngophony*.

VOIE, *Way*.

VOIES DIGESTIVES, *Ways*, digestive—v. *Lacrymales*, *Lachrymal passages*—v. *Premières*, *Ways*, digestive—v. *Secondes*, *Ways*, second—v. *Urinaires*, *Urinary passages*.

VOILE DU PALAIS, *Velum pendulum palati*—v. *Médullaire inférieure*, *Velum medullare inferius*—v. *Médullaire supérieure*, *Valvula Viuessenii*.

VOIX, *Voice*—v. *Aigre*, see *Acid*—v. *Articulée*, *Voice*, articulated, *Pectoriloquy*—v. *Bourdoinante*, see *Resonance*—v. *Bronchique*, *Resonance*—v. *Oaverneuse*, *Pectoriloquy*—v. *Chérvrotante*, *Egophony*—v. *Égophonique*, *Egophony*—v. *de Fausset*, see *Voice*, articulated—v. *de Poitrine*, see *Voice*, articulated—v. *de Polichinelle*, *Egophony*—v. *Séuile*, *Egophony*—v. *de Tête*, see *Voice*, articulated—v. *Tabaire*, see *Resonance*.

VOLA, *Palm*—v. *Manús*, *Palm*—v. *Pedis*, *Sole*.

VOLANT D'EAU, *Nymphaea alba*.

VOLATICA, *Lichen*.

VOLATILIZATION, *Volatilisa'tio*, *Volatisa'tio*, from *volare*, 'to fly.' The operation of reducing volatilizable substances into gas or vapour.

VOLATISATIO, *Volatilization*.

VOLIT'ION, *Volit'io*, from *volo*, 'to will.' The act of willing. Hence:

VOLIT'IONAL, relating to volition. Thus the muscles may be moved by a *volitional* or by an *emotional impulse*.

VOLNUS, *Wound*.

VOLONTAIRE, *Voluntary*.

VOLONTÉ, *Voluntary*.

VOLSELLA, *Acanthobolos*, *Forceps*, *Madistarium*—v. *Patini*, *Valet à Patin*.

VOLTAISM, *Galvanism*.

VOLTUS, *Countenance*, *Face*.

VOLUNTARY, *Hecul'sius*, *Voluntarius*, (F.) *Volontaire*, from *voluntas*, 'will.' Relating to the will; as '*voluntary muscles*;' muscles which act in obedience to the will.

VOLUNTAS, *Volentia*, *Arbit'rium*, *Cupid'itas*, *Boule'sis*, *Bule'sis*, *Thel'ma*, (F.) *Volonté*, from *volo*, 'I will.' Will or desire.

VOLUS'TAS seu **CUPID'ITAS** **DESEDEND'I**, *Lubi'do intesti'ni*. The desire to go to stool.

VOLVA, *Vulva*.

VOLVULUS, *Heus*—v. *Intestorum*, *Intus-susceptio*.

VOMENDI CONAMEN INANE, *Vomiturition*.

VOMER, 'a ploughshare;' *Os vo'meris*, *Os maxill'æ superioris undec'imum*, *Ara'trum*. One of the bones of the face, so called from its resemblance. It is an azygous bone, forming the posterior part of the septum narium. It is thin, flat, and quadrilateral; and is articulated, below, to the superior maxillary and palatine bones; and above, to the sphenoid, ethmoid, and cornets of Bertin. It is developed by a single point of ossification. Also, the penis.

VOM'ICA, *Pyocys'tis*, from *vomere*, 'to vomit,' 'to cast up.' (F.) *Vomique*, *Crachement de pus*. A term used by some authors for any encysted collection of purulent matter in the interior of a viscus. The acceptance is commonly, however, restricted to purulent collections in the lungs, encysted or not, which may be discharged by the mouth, by breaking into the bronchial tubes. Two kinds of vomice are distinguished; the one caused by the softening or breaking down of pulmonary tubercles; the other, of much more rare occurrence, formed by a circumscribed abscess of the lungs. Instead of opening into the bronchia, the abscess is sometimes discharged into the cavity of the pleura, causing empyema.

VOMICINE, Brucia.
 VOMIQUE, Vomica.
 VOMIQUEUR, Strychnos nux vomica.
 VOMISSEMENT, Vomiting — *v. de Sang*, Hæmatemesis.

VOMIT, Emetic — *v. Black*, Fever, yellow, Melana.

VOMIT, DRY, OF MARRIOTT. A once celebrated emetic, called 'dry,' from its having been given without solution. It consisted of equal portions of tartrate of antimony and potassa, and sulphate of copper.

VOMITIF, Emetic.

VOMITINE, Emetine.

VOMITING, *Vomit'io*, *Vomit'io*, *Vomit'ium*, *Vomit'um*, *Evomit'io*, *And'ropē*, *Em'esis*, *Palms vom'itus*, *Ægritu'do ventric'uli*, *Sprewing*, *Puking*, *Sickness of the Stomach*, (Old Eng.) *Parbreacking*, (Sc.) *Bokking*, *Bocking*, *Braking*, *Brocht*, (Prov.) *Hull'uping*, (vulg.) *Casca'ding*, *Casting*, (F.) *Vomissement*, from *vomere*, *vomitum*, 'to throw up.' The act by which solids and liquids, contained in the stomach, are ejected by the mouth. Vomiting is the effect of some special irritation of the nerves of the stomach, calling, by reflex action, on the appropriate muscles to expel the contents of the viscus. It is not accomplished solely by the contraction of the stomach, as was for a long time believed. That organ, indeed, assists in the process; but the main cause is the compression exerted upon the parietes of the viscus by the diaphragm and abdominal muscles. Vomiting is a symptom common to numerous diseases. At times, it is sympathetic, as in affections of the kidney, uterus, brain, &c. At others, it is symptomatic, as in gastritis, peritonitis, &c. When very troublesome, it may often be palliated by effervescent draughts, aromatics, sinapisms, or blisters to the epigastric region, &c.

VOMITING AT PLEASURE, Regurgitation — *v. of Blood*, Hæmatemesis — *v. Stercoraceous*, Copremesis.

VOMITIO, Vomiting — *v. Sanguinis*, Hæmatemesis.

VOMITIUM, Vomiting.

VOMITO NEGRO, Fever, yellow — *v. Prieto*, Fever, yellow.

VOMITORIUM, Emetic.

VOMITORY, Emetic.

VOMITUM, Vomiting.

VOMITURIT'ION, *Vomiturit'io*, *Emes'ia*, *Dysemes'ia*, *Subver'sio stom'achi*. Same etymon as Vomiting. Ineffectual efforts to vomit; *Vomen'di cona'men ina'nē*, *Retching*, *Reaching*, *Heav'ing*, (Old Eng.) *Bolke*, (Sc.) *Bok*, *Bock*, *Braking*. Some authors mean, by this term, a vomiting of but little matter, or that which is effected almost without effort. The first acceptation is the most general.

VOMITUS, Vomiting — *v. Cruentus*, Hæmatemesis — *v. Fæculentus*, Copremesis — *v. Marinus*, Nausea marina — *v. Navigantium*, Nausea marina — *v. Niger*, Fever, yellow — *v. Pituosus*, Blennemesis — *v. Profusus*, Hyperemesis — *v. Purulentus*, Pyemesis — *v. Sanguinis*, Hæmatemesis — *v. Stercoris*, Copremesis.

VOORARA, Curara.

* VOTIVE TABLET, Tabula votiva.

VOUACAPUA AMERICANA, *Geoffræa inermis*.

VOUSSURE PRÉCORDIALE, 'Præcordial arching or prominence.' The elevation or arching of the parietes of the thorax, witnessed in certain thoracic affections, as in hypertrophy of the heart.

VOÛTE, Vault — *v. Médullaire*, Corpus callosum — *v. à Trois Piliers*, Fornix.

VOWEL, *Vocal'is*, from Latin *vox*, *voeis*, 'the

voice,' and *voco*, 'to call.' (F.) *Voyelle*. Physiologically, a continuous breath or sound, produced in the glottis; but more or less modified by the form of the vocal tube, through which it has to pass. In the English language, *a*, *e*, *i*, *o*, *u*, *v*, and *y*, are vowels.

VOX, Voice — *v. Cholericæ*, Voice, choleric — *v. Clangosa*, Oxyphonia — *v. Convulsiva*, *Voix Convulsive* — *v. Nasalis*, Rhinophonia — *v. Rauca*, Raucedo, Raucous voice — *v. Rucisona*, Raucous voice.

VOYELLE, Vowel.

VUE, Vision — *v. Basse*, Myopia — *v. Courte*, Myopia — *v. Diurne*, Hemeralopia — *v. Faible*, Amblyopia — *v. Longue*, Presbytia — *v. Louche*, Strabismus — *v. Nocturne*, Nyctalopia.

VULGA, Vulva.

VULNERA SCLOPETARIA, see Wound — *v. à Sclopetis*, see Wound.

VULNÉRAIRE, Vulnery — *v. Suisse*, see Falltranck.

VULNERARIUS, Traumatic.

VULNERARY, *Vulnerarius*, *Traumaticus*. *Traumat'ic*, from *vulnus*, *vulneris*, 'a wound.' (F.) *Vulnéraire*. A name applied by the ancients to medicines, which they considered capable of favouring the consolidation of wounds. The property has been ascribed to various plants.

VULNERATIO NERVI, Neurotrosis.

VULNERUM VINCTURA, Deligation.

VULNUS, Wound — *v. Laceratum*, see Laceration — *v. Sclopetarium*, Wound, gun-shot — *v. Simplex*, Cut.

VULNUSCULUM, Wound.

VULPIS MORBUS, Alopecia.

VULTUEUX (F.), *Vultuo'sus*. Corvisart has used the expression, *Face vultueuse*, *Facies vultuo'sa*, for the face when it is more florid and swollen than in the natural state. This appearance, which is observed in active aneurism of the heart, according to Corvisart, is owing to the afflux of blood into the arterial capillaries, and hence differs from the livid and swollen appearance caused by the accumulation of blood in the venous capillaries, constituting the *Face injectée*.

VULTUS, Countenance, Face — *v. Tetricus et Mæstus*, Scythrospasmus.

VULVA, Uterus, see Vulva.

VULVA, *volva* (formerly, the uterus, especially of animals). *Hortus*, *Cumms*, *Puden'dum mulie'brē*, *Sinus pud'oris*, *Ictar*, *Choirōs*, *Aræum*, *Bucca*, *Bulga*, *Cadur'cus*, *Custos*, *Femen*, *An'nulus*, *Femur summum*, *Follic'ulus*, *Fundus*, *Græ'nium*, *Hia'tus*, *Lam'vium*, *Navis*, *Oppid'ulum*, *Specus*, *Vulga*, *Cymba*, *Cysthus*, *Saltus*, *Clitor'ium*, *Os'tium*, *Sulcus*, *Amphicæ'stis*, *Concha*, *Porcus*, *Porta*, *Interfemin'ium*, *Mulie'bria*, *Fossa magna mulie'bris*, *Epise'ion*, *Es'chara*, *Hor'tulus cupid'inis*, *Bombalios*, *Byssos*, *Cava*, *Caver'na*, *Delphys*, *Delta*, *Fov'ea*, *Gynæce'um*, *Loc'i mulie'bres*, *Female pudend'um*, *Female organs of generation*, *Female parts*, (F.) *Vulve*. A longitudinal opening between the projecting parts of the external organs of generation in the female, extending from the mons veneris to the perineum, and which is called, also, *Fossa magna*. Some anatomists mean, by this term, the whole of the external genital organs of the female: — mons veneris; labia majora, and the cleft or vestibule separating them; the clitoris; nymphæ; meatus urinarius; entrance of the vagina; with the hymen or the caruncula myrtiformes, fossa navicularis and fourchette.

VULVA, *Fora'men commu'nē antērius*, *Iter seu Ad'itus ad infundib'ulum*, *I. seu Ad'itus ad ter'tium ventric'ulum*, *Rima ad infundib'ulum*, *Aper'tura antērior ventric'uli ter'tii cei'ebri*. An

opening situate at the junction of the optic thalami, in the third ventricle of the brain, and immediately beneath the anterior crus of the fornix.

VULVAIRE, *Chenopodium vulvaria*.

VULVAR, *Vulva'ris*, from *vulva*. That which relates to the vulva. Chaussier gives this name

to the external pudic arteries, because they are distributed to the vulva.

VULVARIA, *Chenopodium vulvaria*.

VULVE, Vulva.

VULVITIS, a hybrid word, from *vulva*, and *itis*, denoting inflammation. Inflammation of the vulva.

VULVO-UTERINE CANAL, Vagina.

W.

WABRAN LEAVES, *Plantago*.

WAD, Graphites.

WAHOO, see *Euonymus*.

WAIR, see *Pila marina*.

WAISTCOAT, STRAIT, *Indu'cula*, (F.) *Camisole*, *Gilet de force*. A dress, used for restraining maniacs, or those labouring under violent delirium. It has long sleeves, which are tied behind the body, so that the arms cannot be extricated from them. It ought, of course, to be made of very resisting materials.

WAKE-ROBIN, *Arum maculatum*, *Trillium latifolium*.

WALE, *Wheat*.

WALKING, *Gressus*, *Inces'sus*, *Deambula'tio*, *Ambula'tio*, *Bad'isis*, (F.) *La Marche*, *Progression*. Sax. *pealcan*, 'to walk.' The action by which we change place, by means of a succession of steps in the same direction. In walking forwards, the centre of gravity is constantly altered; and a series of small, parabolic curves is described on the heads of the thigh-bones, the extent of which is regulated by volition, under the guidance of vision.

WALLA'CHIA, MINERAL WATERS OF. There are many excellent sulphureous springs in this country, especially those at Bobotsch, Fineschti, Sibitschiudi Suz, Bräsa, Otschin, Serboeschte, Kimpalungi, Kosia, and Oloneschti, Chalybeate and saline springs have, also, been found at Sibitschiudi Suz.—Siller.

WALLFLOWER, *Cheiranthus cheiri*.

WALLRUE, *Asplenium ruta muraria*.

WALL-TEETH, Molar teeth.

WALNUT, *Juglans regia* — w. Black, *Juglans regia* — w. White, *Juglans cinerea*.

WALTHE'RIA DOURADINHA. A plant of Brazil, *Order*, *Sterculiaceæ*, which is used there in diseases of the chest, and in venereal affections. It is a demulcent.

WALTON, MINERAL WATERS OF. A mineral spring near Tewkesbury, in Gloucestershire, England. It is an acidulous chalybeate.

WAMPEE, *Peltandra Virginica*.

WANGTEETH, Molar teeth.

WANT, from past participle of Sax. *panian*, 'to wane,' 'to fall away.' 'Need of that which is necessary.' (F.) *Besoin*. This word is sometimes used to express the imperious necessity which impels us to take food, drink, &c. (See *Hunger* and *Thirst*.) In a more general sense, it means the impressions transmitted by the organs to the brain, when it is necessary that they should act: these wants are called *instinctive desires* and *internal sensations* or *stimuli*. Such are the desires or wants to eat, drink, void the urine, breathe (*besoin de respirer*), &c.

WANT, in the sense of indigence, (L.) *Egestas*, *Indigentia*, is the cause of a number of diseases.

WARBURG'S FEVER-DROPS, see *Bebeeru*.

WARD'S ESSENCE FOR THE HEADACH, *Linimentum camphoræ compositum* — w. White Drops, see *Hydrargyri nitras*.

WARE, see *Pila marina*.

WARISON, Stomach.

WARK, Pain.

WARMBRUNN, MINERAL WATERS OF. Much frequented springs in Silesia, about a league from Hirschberg. They are thermal, 95° to 100° Fah., and are chiefly used as baths. The impregnating materials are carbonate of soda, sulphate of soda, sulphate of lime, chloride of sodium, carbonate of magnesia, and sulphohydric acid gas.

WARM SPRINGS, see *Georgia*, *Mineral waters* of, and *Virginia*, *Mineral waters* of.

WARNERA CANADENSIS, *Hydrastis Canadensis*.

WARRENTON SPRINGS, see *Virginia*, *mineral waters* of.

WART, *Verruca* — w. *Corneus*, *Cornu* — w. *Moist*, *Acrothymion*.

WARTY, *Ver'rucose*, *Ver'rucous*, *Verruco'sus*, from Sax. *pearc*. Full of warts. Resembling, relating, or belonging to warts.

WARTY TUMOUR OF CICATRICES. A name given by Mr. Howship to the tumour, which sometimes appears on an old scar, many years, perhaps, after the injury that caused it. The ulcer, formed under such circumstances, has been called the *warty ulcer* of *Marjolin* — having been well described by that surgeon.

WASH, BLACK, see *Hydrargyri submurias* — w. *Phagedenic*, see *Hydrargyri submurias* — w. *Preventive*, *Lotion*, *Hannay's* — w. *Red*, *Lotio rubra*, and *Lotion*, *camphorated*, of *Bates* — w. *White*, *Liquor plumbi subacetatis dilutus* — w. *Yellow*, see *Hydrargyri oxymurias*.

WASHER WOMAN'S SCALL, *Psoriasis diffusa*.

WASHITAW SPRINGS, see *Arkansas*, *mineral waters* of.

WASP, *Vespa*, *Sphex*, (F.) *Guêpe*. A genus of gregarious insects, like the bee and the ant. They are armed with a sting, which pours a poisonous fluid into the puncture made by it. (See *Poisons*, *Table* of.) The best application is the sp. *ammoniac aromaticus*, or some preparation of ammonia.

WASSERBURG, MINERAL WATERS OF. Wasserburg is a town of Bavaria, seated on the Inn, 28 miles east of Munich. The water, called, also, *Aqua Aga'tii*, contains carbonic acid; carbonates of lime and magnesia; sulphates of lime and magnesia; chloride of sodium, carbonate of soda and oxide of iron.

WASSERKUR, *Hydrosudotherapeia*.

WASTING, *Consumption*, *Tabes*.

WATER, Sax. *wæter*, (G.) *Wasser*, *Aqua*, *Hydor*, *ὕδωρ*, *Alma*, (F.) *Eau*, *Protoxide of hydrogen*. Water was at one time regarded as a simple element. It is now known to consist of eight parts by weight of oxygen, and one of hydrogen. It freezes at 32°, and boils at 212° Fahrenheit; and is taken as the unit in all tables of specific gravity of solid and liquid sub-

stances. Water, as we meet with it, is very different in its state of purity; generally, it contains small quantities of saline matter; at other times, as in sea-water and mineral waters, it is largely impregnated. The characters of water, as met with under ordinary circumstances, are well compared by Celsus, "*Aqua levisima pluvialis est; deinde fontana; tum ex flumine; tum ex puteo; post hæc ex nive, aut glacie; gravior his ex lacu; gravissima ex palude.*" Pure water is one of the best diluents that can be used. When cold, and especially when iced, it is one of the most useful refrigerants; and, in the form of the cold, tepid, and warm bath, it is serviceable in numerous diseases.

WATER OF AIX-LA-CHAPELLE, see Aix-la-Chapelle — w. Allflower, Urine, cows' — w. Alum, Bates's, Liquor aluminis compositus — w. of carbonate of Ammonia, Liquor ammoniæ subcarbonatis — w. Anise, see Pimpinella anisum — w. Apple, Apple-tree — w. Barley, Decoctum hordei.

WATER BED, *Hydrostatic bed*. A bed, contrived by Dr. Arnott, which, in consequence of its being placed on water, is well adapted for the bedridden.

WATER, BINELLI, Aqua Binellii.

WATER OF BITTER ALMONDS, Aqua Amygdalorum concentrata.

WATER BLEBS, Pemphigus — w. Brash, Pyrosis.

WATER, BROCCHERI, Aqua Brocccherii — w. Camphor, Mistura Camphoræ.

WATER CANKER, Cancer aquaticus.

WATER, CARAWAY, see Carum carui — w. Caraway, strong, Spiritus carui — w. of Cassia, see Laurus Cassia.

WATER CASTER, see Uromantia.

WATER, CHERRY LAUREL, see Prunus lauro-cerasus — w. Chicken, Chicken-tea — w. Chlorine, see Chlorine — w. Cinnamon, Aqua cinnamomi — w. Cinnamon, strong, Spiritus cinnamomi — w. Cologne, *Eau de Cologne*.

WATER CURE, Hydrosudotherapeia.

WATER, DILL, see Anethum graveolens.

WATER, DISTILLED, *Aqua destillata*, (F.) *Eau distillée*, *Hydrolat*, *Holy Water*, is generally ordered in extemporaneous prescriptions, but is rarely used. In some cases, however, it is absolutely necessary; — the water, containing any saline impregnation — hard water, for example — decomposes certain substances. Distilled water has been recommended as a diet-drink in cancerous affections; and it is used in the religious ceremonies of the Catholic church. In the Pharmacopœia of the United States, it is directed to be made as follows: — Take of water, ten gallons. First distil two pints, and throw them away; then distil eight gallons. Keep the distilled water in glass bottles.

Distilled waters, (F.) *Hydrolats*, consist of common water, charged by distillation with the volatile principles of medicinal agents. See *Aquæ destillatæ*.

WATER-DOCTOR, see Uromantia.

WATER-DRESSING. The treatment of wounds and ulcers by the application of water. It generally consists in dipping folds of lint in water, and placing them on the part: — the whole being covered with oiled silk, elastic gum, or spongopiline. *Water strapping* or *wet strapping* means the treatment of ulcers, and certain cutaneous affections of the extremities, &c., with strips of linen or cotton saturated with water.

WATER, ELDER, see Sambucus — w. Epileptic, of Langius, Langii aqua epileptica — w. Fennel, Aqua fœniculi.

WATER FLAG, YELLOW, Iris pseudacorus.

WATER, FLORIDA, — a celebrated perfume, — may be made of *Ol. Bergami* fʒiv; *Tinct. benzoin. c.* fʒij; *Alcohol.* cong.

WATERFRIGHT, Hydrophobia.

WATER, GOULARD, Liquor plumbi subacetatis dilutus.

WATER, HARD. Common water, which decomposes and curdles soap; in contradistinction to *soft water*, which is readily miscible with soap. The hardness of water depends upon the presence in it of earthy salts, the most common of which is sulphate of lime.

WATER, HELL, see Tody.

WATER, HOLY, Water, distilled — w. Honey, see Mel.

WATER IN THE HEAD, Hydrocephalus.

WATER, HUNGARY, Spiritus rosmarini.

WATER JAGS, see Varicella.

WATER, LAKE, *Aqua ex lacu*, (F.) *Eau de lac*, is apt to be impure, from decayed animal and vegetable matters. A great deal will, however, depend upon the magnitude of the collection, and the degree of stagnation.

WATER, LAUREL, see Prunus lauro-cerasus — w. Lavender, Spiritus lavandulæ — w. Lead, Liquor plumbi subacetatis dilutus — w. Lemonpeel, see Lemonpeel Tea — w. Lime, Liquor calcis — w. Lime, compound, Liquor calcis compositus — w. Magnesia, aerated, Magnesia, fluid — w. Magnesia, carbonated, Magnesia, fluid.

WATER, MARSH, *Aqua paludosa*, (F.) *Eau de Marais*, is the most impure of all. It is generally more stagnant, and of course more loaded with decomposing animal and vegetable matters.

WATER, MEDICATED, see *Aquæ medicatæ*.

WATER, MINERAL, *Aqua mineralis* seu *salubris* seu *medicata* seu *Sotéria*, *Fons salutaris* seu *medicatus* seu *soterius*, (F.) *Eau minérale* ou *médicinale naturelle*. Water, holding in solution different saline and gaseous substances in sufficient quantity to be possessed of medicinal properties, or of a temperature different from that of the ordinary springs of the country.

The following Table by Dr. Perçira exhibits the composition of some of the principal mineral waters.

FIXED CONSTITUENTS
ENTERING INTO THE COMPOSITION OF SOME OF THE MORE CELEBRATED
MINERAL SPRINGS.

PROPORTIONS IN 10,000 PARTS OF WATER.

Note. — In reducing the analyses contained in this Table to a uniform measure, in order to render them susceptible of direct comparison with each other, the old English gallon is assumed to be as = 58,338 grains; the wine pint = 7305 grains; the imperial gallon = 70,000 grains; and the German 16-ounce measure = 7368 grains.

The different salts have been reduced to their elementary constituents by Wollaston's scale of chemical equivalents.

THERMAL.

Mineral waters may be divided into four classes: — 1. *Gaseous* or *Acidulous*. 2. *Chalybeate*. 3. *Saline*. 4. *Sulphureous*. These may be *thermal*, or *cold*, — *natural*, or *artificial*. Many of these divisions, however, run into each other; some of the substances, which they hold dissolved, belonging to one class as well as to another.

1. *Gaseous, Acidulous* or *Carbonated Mineral Waters, Soda* or *Beer Springs, Aquæ minérales acidulæ*, (F.) *Eaux minérales gazeuses* ou *acidules*. The waters referred to this class are those that contain carbonic acid gas in such quantity as to communicate to it certain sensible qualities. Waters impregnated with free carbonic acid, sparkle when drawn from the spring, or when poured into a glass. They have a sharp, acidulous taste; but become vapid from exposure to the air. Along with the carbonic acid, there are generally present portions of saline, earthy or metallic matter, chiefly carbonates of lime, magnesia, and iron. Waters, highly impregnated with carbonic acid gas, are grateful to the stomach; increase the appetite, and are diuretic; hence, their utility in dyspepsia, hypochondriasis, and gout. Their properties are, of course, modified by the saline matter that may be also contained in them. The most celebrated amongst the acidulous waters are those of Bar, Chateldon, St. Myon, Mont d'Or, Langeac, Seltzer, Schlangenbad, Sultzmatt, Pyrmont, Spa, Carlsbad, Cheltenham, Scarborough, Saratoga, Ballston, and the Sweet Springs of Virginia.

2. *Chalybeate* or *Ferruginous Mineral Waters, Aquæ minérales ferruginosæ* seu *Chalybeatæ* seu *Martiales* seu *Ferro-sæ, Chalybopæ* — *Chalybokræ'næ, Sideropæ'gæ, Siderokræ'næ*, (F.) *Eaux minérales ferrugineuses*, contain iron — sulphate, chloride or carbonate, generally the latter — held in solution by an excess of acid. Chalybeate waters have a peculiar styptic taste. They are transparent when taken from the spring; but, when exposed for some time to the air, a pellicle forms on the surface, and a deposit of the iron takes place. Chalybeate waters are used as tonics in debility of all kinds; in all cases, in fact, where iron is considered to be indicated. They are the most numerous of all the classes of mineral waters. In this dictionary, those only are specified which have some celebrity; yet there are about one hundred; more than sixty of these being saline, and forty sulphureous. The most celebrated chalybeates are those of Tunbridge, Scarborough, Spa, Bussang, Forges, Vichy, Pyrmont, Passy, Provins, and Vals.

3. *Saline Mineral Waters, Aquæ minérales salinæ, Amna alcalizata* (Paracelsus.) *Hydralmæ*, (F.) *Eaux minérales salines*. Waters, holding in solution different saline substances in greater quantity than the acidulous waters. They differ in properties, according to the salts contained in them. The salts usually present are sulphates, chlorides, and carbonates; and the bases, with which the acids forming these are combined, are soda, magnesia, and lime. Saline mineral waters are usually aperient; and the most noted are those of Seltzer, Sedlitz, Balaruc, Bourbonne-les-Bains, Baden, Epsom, Cheltenham, &c.

To this class may also be added *Sea water*.

4. *Sulphureous Mineral Waters, Aquæ minérales sulphuræ*; when warm, termed *Theiothermæ, Theiopæ'gæ, Theother'mæ, Fontes sulphurei calidi*, (F.) *Eaux minérales sulfureuses* ou *sulfurées* ou *sulfureuses* ou *hépatiques*, &c. These waters owe their distinguishing character to an impregnation of sulphuretted hydrogen, and are at once recognised by their peculiar fetid smell, resembling that of rotten eggs. They usually contain saline substances, which modify their

powers. From the action of the sulphuretted hydrogen, they are useful in cutaneous affections; and, from the combined action of this and the saline matter, they are valuable agents in diseases of the digestive organs. They are also employed in cutaneous eruptions; and the warm sulphur baths have been especially celebrated in such cases, as well as in rheumatic affections. The most renowned sulphureous waters are those of Baréges, Bagnères-de-Luchon, Cauterets, Bonnes, Aix in Savoy, Aix-la-Chapelle, Enghien, Harrogate, Moffat, Virginia Springs, &c.

Some springs, as those of Bath, Buxton, Dax, Matlock, Warm and Hot Springs of Virginia, &c., are almost pure *Thermal Mineral Waters*. They are valuable agents in rheumatic affections; the warmth being equable during the whole period the individual is immersed in them; which cannot be the case in the artificial thermal bath.

WATER, MINERAL, Acidulous water, simple.

WATERS, MINERAL, ARTIFICIAL, (F.) *Eaux minérales artificielles* ou *factices*. These are imitations of the natural; and some of them — as the factitious Cheltenham water, and Sedlitz water — answer the purpose of the natural water tolerably well. The acidulous and chalybeate waters are, however, most easily imitated.

WATER, NUTMEG, Spiritus myristice.

WATER PANG, Pyrosis — w. Parsnep, creeping, Sium — w. Pennyroyal, spirituous, Spiritus pulegii — w. Peppermint, Aqua menthæ piperitæ — w. Pimento, see Myrtus pimento.

WATER POX, see Varicella.

WATER, PROTOXIDE OF NITROGEN, Aqua nitrogenii protoxydi.

WATER PURPUE, Veronica beccabunga — w. Qualm, Pyrosis.

WATER, RAIN, *Aqua pulvialis* seu *pluvia* seu *imbrium*, (F.) *Eau de pluie*, when collected at a distance from houses or other elevated objects, is the purest natural water, and has the least specific gravity. The only bodies which it usually holds in solution, are carbonic acid, and minute traces of carbonate of lime and chloride of calcium.

WATER, RICE, see Oryza.

WATER, RIVER, *Aqua fluvialis*, is derived from the conflux of numerous springs and rain water. It is, generally, pretty pure.

WATER, ROSE, Aqua rosæ.

WATER, SEA, *Aqua Mari'næ, Humor Dor'idis*, (F.) *Eau de Mer, Eau salée*. This contains chlorides of sodium, magnesium, and calcium, and sulphate of magnesia. It is cathartic, and forms the usual glyster at sea. It makes an excellent tonic bath; superior in most cases — especially in scrofula — to the fresh-water bath.

WATER, SEARLE'S PATENT OXYGENOUS AERATED, Aqua Nitrogenii protoxydi — w. Seydshütz, Sedlitz water.

WATER SHIELD, Brasenia hypopeltis.

WATER, SNOW, *Aqua nivæ'ta*, (F.) *Eau de neige*, has usually been deemed unwholesome. It exactly resembles rain water in composition, and is equally salubrious.

WATER, SODA, Acidulous water, simple — w. Soft, see Water, hard — w. Spearmint, Aqua menthæ viridis.

WATER, SPRING, *Aqua fontanæ, Hydropæ'gæ*, (F.) *Eau de fontaine*, contains, in addition to the substances detected in rain water, more or less sulphate of lime. When this is to such an extent as to curdle soap, the water is said to be *hard*; if not, *soft*. Hard water is, of course, inferior to soft, for domestic and medicinal purposes.

WATER STRAPPING, see Water dressing.

WATER, STYPTIC, SYDENHAM'S, Solutio sul-

phatis cupri composita—w. Tar, see Pinus sylvestris—w. Toast, see Toast-water.

WATER TARGET, *Brasenia hypopeltis*.

WATER, WELL, *Aqua putealis seu puteana seu ex puteo*, (F.) *Eau de puit ou de source*, is the same as spring water, but liable to impregnation, owing to the land springs filtering into the wells, and conveying impurities into them.

WATERS, THE, *Liquor Amnii*—w. Bag of, see *Liquor Amnii*—w. Discharged or broken, *Profusio aquæ*—w. Distilled, *Aqua destillata*—w. First, *Primitiæ*—w. D. Green, see *Lochia*.

WATTWEILER, MINERAL WATERS OF. *Wattweiler* is a small town in the department of Haut-Rhin, at the foot of the Vosges. The waters are acidulous chalybeates, and contain carbonates of iron, lime, and soda, chloride of sodium, and free carbonic acid.

WAX, CERA—w. Ear, *Cerumen*.

WAX, MYRTLE. A wax obtained from the fruit of *Myrica cerifera*. It has been prescribed in dysentery.

WAX, YELLOW AND WHITE, *Cera flava et alba*.

WAXING KERNELS, *Waxen-kernels, Crescentiæ*, (F.) *Croissances, Croissants, Glandes de croissance*. A popular term for small tumours, formed by an enlargement of the lymphatic glands—in the groins of children particularly. They have been looked upon as connected with the growth of the body,—hence their name.

WAY, Saxon *pæz*, *Via, Passage, Odos*, (F.) *Voie*. A name given to different canals.

WAYBREAD, *Plantago major*.

WAYS, DIGESTIVE, *Digestive Passages, Primæ Viæ*, (F.) *Voies digestives, Premières voies*, are the series of hollow organs of digestion, composed of mouth, œsophagus, stomach, and small and large intestines. The term is often restricted to the first three of these.

WAYS, SECOND, *Second Passages, Secundæ viæ*, (F.) *Secondes voies*, comprise the chyloferous, lymphatic and blood vessels.

WEAKSIGHTEDNESS, *Asthenopia*.

WEAL, *Wheal*.

WEAM, *Abdomen, Uterus*.

WEAM-ILL, *Colic*.

WEANING, from Saxon *penan*, 'to wean'; *Ablactatio, Apogalactismus*, (Prov.) *Spaning*, (F.) *Sévrage*. The act of depriving the infant, permanently, of the breast, in order to feed it on other and more solid nourishment.

WEANING BRASH, see *Brash, weaning*.

WEARING, *Consumption*.

WEATHERCOCKS, *Impatiens*.

WEB, *Caligo, Pterygium*—w. Muscular, *Panniculus carnosus*.

WEB-EYE, *Caligo*.

WEBBED FINGERS, *Daetylion*.

WEBERIAN CORPUSCLE, see *Ejaculatory Ducts*—w. Organ, see *Ejaculatory Ducts*.

WEDGED, (D.) *weggh e, Inclusus, Inhærens*, (F.) *Enclavé*. The head of the fœtus is said to be *wedged, locked or impacted* in the pelvis, when it remains fixed, notwithstanding the uterine efforts.

The condition is called *Incuneatio seu Inclavatio fetûs, Sphenosis*, (F.) *Enclavement*. See *Paragomphosis*.

WEEBO, *Senecio Jacobææ*.

WEED, see *Mastitis*—w. Arrow, *Sagittaria variabilis*—w. Beetle, *Galax aphylla*—w. Breast, *Saururus cernuus*—w. in the Breast, see *Mastitis*—w. Butter, *Erigeron Canadense*—w. Cancer, *Goodyera pubescens*—w. Dyer's, *Reseda luteola*—w. Field, *Anthemis cotula*—w. Horse,

Erigeron Canadense—w. Horsefly, *Sophora tinctoria*—w. Milk, *Apocynum androsæmifolium*—w. Phthisis, *Ludwigia palustris*—w. Pride, *Erigeron Canadense*—w. Silver, *Potentilla anserina*—w. Soldiers', *Matico*—w. Thimble, *Rudbeckia laciniata*—w. Wind, *Asclepias tuberosa*.

WEeping, *Fletus*—w. Tear, *Tear*.

WEESSEL, *Trachea*.

WEID, see *Mastitis*.

WEIGHT, from Saxon, *pægan*, 'to weigh;' (F.) *Pesanteur*. A sensation of heaviness or pressure over the whole body, or over a part—the stomach or head, for example.

WEIGHTS AND MEASURES, *Pondera et Mensuræ*, (F.) *Poids et Mesures*. The importance of possessing a uniform system of weights and measures has impressed the scientific of all countries, and numerous endeavours have been made to accomplish the object. It is, however, a matter of considerable difficulty, and one not likely to be attained. The new French measures are upon decidedly the best footing, but they are not adopted out of France. The greatest diversity prevails over Europe in the measures, both of weight and capacity. Some of the following tables will show, that every subdivision of the pound, as well as the pound itself, differs in England and in France.

WEIGHTS.

Troy Weight, as used by the British Apothecaries.
—*Pondus pharmaceuticum seu medicinale.*

The pound	lb	} contains	{	12 ounces.
The ounce	ʒ			8 drachms.
The drachm	ʒ			3 scruples.
The scruple	ʒ			20 grains.
The grain	gr.			

These, and the signs by which they are denoted, are the same in all the British Pharmacopœias, as well as in the American.

lb.	Oz.	Drachms.	Scrup.	Gr.
1 =	12 =	96 =	288 =	5760 =
	1 =	8 =	24 =	480 =
		1 =	3 =	60 =
			1 =	20 =

Poids de Marc.

The pound	} contains	{	16 ounces.
The ounce			8 drachms.
The drachm			3 scruples.
The scruple			24 grains.
The grain			

Avoirdupois.

Pound.	Ounces.	Drachms.	Troy grains.
lb. 1. =	16 =	256 =	7000 =
	1 =	16 =	437.5 =
		1 =	27.34375 =

The *avoirdupois* drachm is sometimes divided into three scruples, and the scruple into ten grains. The pound of 7680 grains *avoirdupois* = 7000 grains *troy*, and hence 1 grain *troy* = .97 grain *avoirdupois*.

The *Poids de Marc* is that employed by the French Pharmacians, when the new weights are not. The *Avoirdupois* is now used by the Dublin College.

The following tables exhibit the relative value of the old French and English weights:

<i>Poids de Marc.</i>	<i>Troy Wt.</i>	<i>Avoird.</i>	<i>Troy grs.</i>
1 pd. (<i>livre</i>) =	1.31268lb =	1.080143lb =	7561

The Greeks divided their obolus into *chalci* and *lepta*; some divided it into 6 *chalci*, and each *chalcus* into 7 *lepta*; others into 8 *chalci*, and every *chalcus* into 8 *lepta* or *minuta*.

Dr. Milligan, in his edition of Celsus, gives the following table, exhibiting the Troy weight of measures of capacity and of weight in use amongst the Romans.

	Urna.	Libra.	Uncia.	Denarius.	Scrupulus.	Sextans.	Chalcus.	Grana.
Amphora.....	2 = 80 = 960 = 6720 = 20160 = 40320 = 403200 = 420450							
Urna.....	1 = 40 = 480 = 3360 = 10080 = 20160 = 210600 = 210240							
Congius.....	1/4 = 10 = 120 = 840 = 2540 = 5040 = 50400 = 52920							
Sextarius.....	1 2/3 = 20 = 140 = 420 = 840 = 8400 = 8760							
Libra.....	1 = 12 = 84 = 252 = 504 = 5040 = 5256							
Hemina.....	8 4/7 = 60 = 420 = 180 = 360 = 3600 = 3759							
Acetabulum.....	2 1/7 = 15 = 45 = 90 = 900 = 939							
Sesqui-cyathus.....	2 1/7 = 15 = 45 = 90 = 900 = 939							
Cyathus.....	1 3/7 = 10 = 30 = 60 = 600 = 626							
Sescuncia.....	1 1/2 = 10 1/2 = 31 1/2 = 63 = 630 = 657							
Uncia.....	1 = 7 = 21 = 42 = 420 = 438							
Cochleare.....	2 1/2 = 7 1/2 = 15 = 150 = 156							
Drachma.....	1 = 3 = 6 = 60 = 62 4/7							
Denarius.....	1 = 3 = 6 = 60 = 62 4/7							
Scrupulus.....	1 = 2 = 20 = 20 2/3							
Scrupulus dimidiatus.....	1/2 = 1 = 10 = 10 1/3							
Obolus.....	1 = 10 = 10 1/3							
Sextans.....	1 = 10 = 10 2/3							
Chalcus.....	1 = 11 1/3							

He gives also the following 'Carmen Mnemonicum,' which exhibits the analogies of the Roman and British imperial weights.

To the congius and gallon, each, ten pounds allow,

On the bushel and amphora eighty bestow;
Rome's pound, as in Troy weight, twelve ounces obtain,

But her ounce is Abordupois, strictly, in grains:

Denarii drams, scruples scrupli define,

Sextarius answers to our bottle of wine,

And the mina's a short pint—fourteen ounces in fine.

A good section on weights and measures is contained in the edition of "The Seven Books of Paulus Ægineta," by Mr. Francis Adams, published by the Sydenham Society of London, vol. iii. p. 609, London, 1847.

Besides the weights and measures above mentioned, employed by the moderns, there are modes of estimating the quantities of substances by approximation. For example:—

A *glassful* or *cupful*, ((F.) *Verre*), is reckoned to contain 4 or 5 fluidounces.

A *wine-glassful*, $1\frac{1}{2}$ ounce or two ounces.

A *table-spoonful*, ((F.) *Cuiller à bouche*), about half an ounce.

A *coffee* or *dessert-spoonful*, about 3 drachms.

A *tea-spoonful*, a fluidrachm.

A *handful*, *manipulus*, ((F.) *Poignée*), as much as can be held in the hand.

The *Pugillus* ((F.) *Pincée*) is as much as can be held by the three fingers.

These last quantities are occasionally prescribed by the French practitioners. Their weights must, of course, vary, according to the article. The authors of the Parisian codex have valued them, as regards certain substances.

	French.	oz.	dr.
A <i>Manipulus</i> of barley weighs.....		3	2½
" linseed.....		1	4
" linseed meal.....		3	3
" dried mallow leaves.....		1	3
" dried cichory leaves.....		1	0
" flowers of the tilia.....		1	2½
	dr. scr. gr.		
A <i>Pugillus</i> of chamomile flowers weighs 2		1	2
" arnica.....		1	1
" marsh-mallow.....			60
" mallow.....		1	60
" fennel seeds.....		1	½
" aniseed.....		1	½

A *hen's egg*, newly laid, weighs about 2 ounces and 2 drachms: when deprived of its shell, 2 ounces. The *white* weighs 1 ounce, 2 drachms, and 57 grains: the *yolk*, 5 drachms and 15 grains.

WEILBACH, MINERAL WATERS OF. The village of Weilbach is in the plain between the Maine and the southern extremity of the Taurus hills. It has in its neighbourhood a cold sulphureous alkaline spring, the water of which is bottled and exported, although not of great efficacy. Its use is at times combined with that of the saline springs in Nassau, and of Baden-Baden, in various chronic abdominal and thoracic affections.

WEINTRAUBENKUR, Grape cure.

WELCOME TO OUR HOUSE, Euphorbia cyparissias.

WELD, *Reseda luteola*.

WELK, *Welk*. An inequality; a protuberance; a cutaneous eruption of this character. Aene.

WELTER'S BITTER, Acid, carbazotic.

WEM, Abdomen, Uterus.

WEMDING, MINERAL WATERS OF. These waters are situate about four leagues from Donauwörth in Bavaria. They contain sulphuretted hydrogen; carbonates of lime, magnesia, and soda; sulphates of lime and magnesia; a little chloride of calcium, and oxide of iron; and are much used in asthenic diseases.

WEN, Sax. *pen*, *Lupia*, *Tumour*, (F.) *Loup*. A name given to circumscribed, indolent tumours, without inflammation or change of colour of the skin. They may be met with in almost every part of the body. Their magnitude, as well as nature, is very variable. The term is sometimes given to an encysted tumour, and to bronchocele.

WESTERN ISLANDS, Azores.

WEST INDIES, (CLIMATE OF.) The climate of the West Indies has long been regarded as favourable to the consumptive. In confirmed consumption, it appears, however, to be positively injurious. As a prophylactic for those predisposed to consumption, it is generally favourable. The nature of the patient's constitution, in regard to the effects of elevated temperature, has always to be taken into account. In diseases that are benefited by warm climates, the West Indies afford an appropriate residence. The islands in which the invalid can best obtain all the advantages of the climate, are Jamaica, Barbadoes, St. Vincents, Antigua, St. Kitts, and Santa Cruz.

WEST'S SPRING, see South Carolina, mineral waters of.

WET STRAPPING, see Water dressing.

WHAAHO, see Eponymus.

WHEAL, Weal, Wale, Pomphus. A ridge, or elevation of the skin, produced by a rod or whip; or as if produced in that manner. Such elevations are seen in urticaria.

WHEAT, Triticum—w. Indian, *Zea mays*—w. Turkey, *Zea mays*.

WHEEZE, (Prov.) *Rezzle*, Sax. *hæoron*, formed probably, like *whiz* and *whisper*, from the sound it expresses. To breathe with difficulty and noise, as in asthma.

WHELK, Aene, Welk—w. Chin, *Sycos*—w. Rosy, *Gutta rosea*.

WHETLEBONES, *Vertebrae*.

WHEY, *Serum lactis*.

WHEY-CURE, (G.) *Molkenkur*. In the Kur-saal of many of the German watering places, a space is set apart for whey drinkers. The whey is a pleasant diluent, and the saccharine matter it contains may act as a eutrophic; but the main effect on the valetudinarian is probably produced by the new impressions made upon him by his visit to the watering place.

WHEY, MUSTARD, see Sinapis—w. Rennet, see *Serum lactis*—w. Sack, *Wine-whey*—w. Tamarind, see *Tamarindus*—w. Vinegar, see *Acetum*—w. Wine, *Wine-whey*.

WHIFFING MURMUR, see *Murmur*, respiratory.

WHIG, *Buttermilk*, *Serum lactis*.

WHIMBERRY, *Vaccinium myrtillus*.

WHISKY, see Spirit. A spirituous liquor obtained from oats, potatoes, &c., by distillation.

WHISKY LIVER, Liver, nutmeg.

WHISPER, CAVERNOUS, see Cavernous.

WHISPERING; evidently an example of *onomatopœia* (*hoop'ering*), *Susurra'tio*, *Susurra'tion*. Articulation of the air sent through the vocal tube without any action of the glottis.

WHISPERING SOUFFLE, see *Souffle*.

WHISTLING, Sifflement, see *Râle sibilant*.

WHITE BALL, *Cephalanthus occidentalis*—w. Blisters, *Rupia escharotica*.

WHITE, FLAKE, *Plumbi subcarbonas*.

WHITE LEAF, *Pyrola maiculata*, *Spiraea tomentosa*—w. Leg, *Pneumatia dolens*—w. Matter of the brain, see *Cerebrum*—w. Root, *Angelica lucida*, *Asclepias tuberosa*, *Ligusticum actæoifolium*.

WHITE, SPANISH, Bismuth, subnitrate of.

WHITE SUBSTANCE OF SCHWANN, see Nerve fibre—w. Sulphur, see Virginia, mineral waters of—w. Swelling, *Hydrarthrus*—w. Swelling of lying-in women, *Pneumatia dolens*—w. Weed, *Chrysanthemum leucanthemum*—w. Wood, *Liriodendron*, *Thuja Americana*.

WHITENESS OF COMPLEXION, *Paleness*.

WHITES, THE, *Leucorrhœa*.

WHITLEYA STRAMONIFOLIA, *Anisodus luridus*.

WHITLOW, *Paronychia*.

The only wine recommended in some pharmacopœias is *Sherry*, *Vinum, V. album Hispanicum, V. Xer'icum, Leuce'anus*. It is a *dry wine*; the least variable in its properties, and agrees best with the dyspeptic. Other wines used officinally are—*Canary* or *Sack wine, Vinum Canari'um*; *Mountain wine, Vinum album montanum*; *Tent wine*; *Rhenish wine, Vinum Rhenanum*; and *Port wine, Vinum rubrum Portugallicum*.

The wines habitually drunk are almost innumerable. Those that are sweet, or contain a large portion of free, saccharine matter, are decidedly the least wholesome to the dyspeptic.

When wine is good, and of a proper age, it is tonic and nutritive; when new, flatulent and cathartic, disagreeing with the stomach and bowels. In medicine, it is a valuable tonic in the last stage of typhus, when the skin is not too hot and dry. Its use, however, requires great caution; and when once commenced under proper circumstances, it cannot be suddenly dropped without mischief. It is, perhaps, the best permanent stimulus in the catalogue of the materia medica.

Mulled Wine is made as follows:—Take of bruised *cinnamon* $\frac{3}{4}$; half a *nutmeg* grated; and ten bruised *cloves*. Infuse in boiling *water* Oss for an hour; strain and add *sugar* $\frac{3}{4}$. Pour the whole into a pint of hot *Port* or *Sherry*. Useful in adynamic conditions.

WINE, AMINÆAN, *Aminæum vinum*.

WINE OF ALOES, *Vinum aloes*.

WINE, ANTIMONIAL, *Vinum antimonii*—w. Antiscorbatic, *Vinum antiscorbaticum*—w. Aromatic, *Vinum aromaticum*—w. Bark, compound, *Vinum de kinâ kinâ compositum*—w. Barley, *Cerevisia*—w. Bitter, diuretic, *Vinum diureticum amarum*.

WINE BITTERS, *Vinum gentiænæ compositum*.

The formulæ for these may be various. The following is as good and as agreeable as any. (*Rad. gentian. lbj, cort. aurant. $\frac{3}{4}$ x, sem. cardam. cont. $\frac{3}{4}$ iv, cinna. cort. $\frac{3}{4}$ iv, wine, foreign or domestic, three gallons and a half.*) Tonic and stomachic.

WINE, CEDAR, *Cedrinum vinum*—w. Champagne, *Vinum campanum*—w. Chian, *Chium vinum*.

WINE OF COLCHICUM, *Vinum colchici*—w. of Colchicum seed, *Vinum colchici seminis*—w. of Ergot, *Vinum ergotæ*—w. of Gentian, compound, *Vinum gentiænæ compositum*—w. of Hellebore, white, *Vinum veratri*.

WINE, IPECACUANHA, *Vinum Ipecacuanhæ*.

WINE OF IRON, *Vinum ferri*.

WINE, MEDICATED, *Vinum medicinale*—w. Mulled, see Wine.

WINE OF OPIUM, *Vinum opii*.

WINE, PORT, *Vinum Portugallicum*—w. Pullet, *Poulet, vin de*.

WINE OF QUINIA, *Vinum quiniæ*.

WINE, RHUBARB, *Vinum rhei*—w. Sherry, *Vinum*—w. Steel, *Vinum ferri*—w. Tobacco, *Vinum tabaci*—w. Tar, see *Pinus sylvestris*.

WINE WHEY, *White Wine Whey*, (Prov.) *Sack-whey*. Take of good *milk* two-thirds of a pint, and add *water* to make a pint. Take of *sherry*, or any other good *white wine*, two glasses, and of *sugar* a dessert-spoonful. Place the milk and water in a deep pan on the fire; and the moment it boils, pour into it the wine and sugar. Stir assiduously for 12 or 15 minutes, whilst it boils. Lastly, strain through a sieve.

It is a good mode of giving wine in adynamic states.

WINE, WHITE, see Wine.

WINE OF WORMWOOD, *Vinum absinthites*.

WING-SEED, *Ptelea trifoliata*.

WINKERS, *Cilia*.

WINKING, *Scardamygmus*.

WINTER'S BARK TREE, *Wintera aromatica*.

WINTER BERRY, SMOOTH, *Prinos lævigatus*—w. Berry, *Virginia, Prinos*—w. Berry, whorled, *Prinos*.

WINTER BLOOM, *Hamamelis Virginiana*—w. Cough, *Bronchitis, chronic*—w. Green, *Gaultheria*—w. Green, round-leaved, *Pyrola*—w. Green, spotted, *Pyrola maculata*.

WINTERA, see *Wintera aromatica*.

WINTERA AROMATICA, *Drimys Winteri, Wintera aromatica, Winter's bark Tree*; *Ord. Magnoliaceæ*. The bark, *Wintera* (Ph. U. S.), *Cortex Winteranus* seu *Winteranus Magellan'icus, C. Magellan'icus, Cinnamomum Magellan'icum*, (E.) *Écorce de Winter, Cannelle pivoirée*, is very much allied in its properties to *Canella alba*.

WINTERANA AROMATICA, *Wintera aromatica*.

WIRTSPRINGS, Hangnails.

WISBADEN, MINERAL WATERS OF. Wisbaden is a town of Germany, about 6 miles

north of Mainz, and 22 west of Frankfort. It has been long celebrated for its hot springs; and is much frequented. There are numerous cold and thermal springs,—the former containing sulphohydric acid; the latter being saline and acidulous. The temperature of the hot springs varies from 117° to 160° Fahr.

WISMUTHUM, Bismuth.

WITCHEN, Sorbus acuparia.

WITCHHAZEL, Hamamelis Virginiana, Sorbus acuparia.

WITCHMEAL, Lycopodium.

WITCHWOOD, Sorbus acuparia.

WIT TEETH, see Dentition.

WITTER, Throat.

WIZEN, Œsophagus.

WOAD, Isatis tinctoria.

WOD, Insane.

WODNES, Insanity, Mania.

WOLFBANE, Veratrum viride.

WOLFSBANE, Aconitum — w. Wholesome, Aconitum anthora.

WOLFSCLAW, Lycopodium.

WOLFSJAW, see Harelip.

WOMAN, pl. *women*, *Gynē*, (F.) *Femme*, Sax. *pirman*, 'wifeman,' 'woofinan.' The adult female of the human race.

WOMANHOOD, Mulieritas.

WOMB, Uterus—w. Falling down of the, Pro-lapsus uteri.

WOMB GRAIN, Ergot.

WOMB, LACERATION OF THE, Uterus, rupture of the—w. Tympany of the, Physometra.

WONGE, Cheek.

WOOD, BRAZIL, Cæsalpinia echinata — w. Elk, Andromeda arborea — w. Pernambuco, Cæsalpinia echinata.

WOOD-LICE, Onisci aselli.

WOOD-MARCH, Sanicle.

WOOD, NICARAGUA, see Cæsalpinia—w. Peach, see Cæsalpinia — w. Pernambuco, Cæsalpinia echinata — w. Sampfen, Cæsalpinia sappan — w. Sappan, Cæsalpinia sappan.

WOOD SORREL, Oxalis acetosella.

WOOD, SOUR, Andromeda arborea—w. Waxen, Genista tinctoria.

WOODWEX, Genista tinctoria.

WOODBINE, COMMON, Lonicera periclymenum.

WOODROOF, SWEET-SCENTED, Asperula odorata.

WOODS, SUDORIFIC, (F.) *Bois sudorifiques*. This term is applied, collectively, to guaiacum, sassafras, china, and sarsaparilla, which are often used together to form the sudorific decoction.

WOORALL, Curare.

WOORARA, Curare.

WORM, see Alembic, Vermiform process — w. Bark tree, Geoffræa inermis—w. Cakes, Story's, see Cakes, worm, Story's — w. Disease, Helminthiasis — w. Goosefoot, Chenopodium anthelminticum — w. Grass, perennial, Spigelia Marilandica.

WORM, GUINEA, Dracunculus.

WORM LOZENGES, CHING'S. Empirical preparations, which consist of yellow and brown lozenges. The former are directed to be taken in the evening; the latter on the following morning. The *Yellow Lozenges*. (*Saffron*, $\frac{3}{4}$ ss, water, Oj; boil, and strain; and add of *white panacea of mercury*, (calomel washed in spirit of wine,) ℥j, *white sugar*, 28 lbs, *mucilage of gum tragacanth* q. s. to make a mass. Divide, so that each lo-

zenge may contain a grain of the panacea.) The *Brown Lozenges*. (*Panacea* $\frac{3}{4}$ vij, *resin of jalap* ℥iijss, *white sugar* ℥ix, *mucilage of gum tragac.* q. s. Each lozenge to contain gr. ss of the panacea.)

WORM LOZENGES, SHERMAN'S, are said to be composed of *calomel*, *gamboge*, and *sugar*.

Peters's Worm Lozenges are said to be composed in a similar manner.

WORM ROOT, Spigelia Marilandica — w. Seed, Artemisia santonica, Chenopodium anthelminticum — w. Seed, goosefoot, Chenopodium anthelminticum — w. Weed, Corsican, Corallina Corsicana, Polanisia graveolens—w. Weed, white, Corallina — w. Wood, biennial, Artemisia biennis — w. Wood, Canada, Artemisia canadensis — w. Wood, common, Artemisia absinthium—w. Wood, creeping, Artemisia rupestris — w. Wood, lesser, Artemisia Pontica—w. Wood, Roman, Artemisia Pontica—w. Wood, sea, Artemisia maritima—w. Wood, silky, Artemisia glacialis.

WORMI'NA OSSA seu OSSIC'ULA, *O. epact'lia* seu *raphogeminan'tia* seu *triq'uetra* seu *triangula'ria Bla'sii* seu *sutura'rum*, *Claves cal-varia*, *Wormian bones*, (F.) *Os Wormiens* ou *épaux ou surnuméraires* (Ch.), ou *intercalés ou triangulaires* ou *Clefs du crâne*. Small bones, which are sometimes observable in the sutures of the bones of the cranium, of which they form a part. They were called *Wormiana*, from Olaus Wormius, who is said to have first described them. They had been previously, however, mentioned by G. Andernach, a physician at Strasburg. The Ossa Wormiana exist more commonly in the sutures of the vault of the skull; especially in the lambdoidal, sagittal, and squamous. They are uncommon at the base of the skull. Their size is very variable, and shape irregular. Their structure and development are similar to those of the other bones of the cranium; and, like them, they are bounded by sutures.

WORMIT, Artemisia absinthium.

WORMS, originally from (L.) *Vermes*; (F.) *Vers*; *Entozo'a*, *Entozoa'ria*, *Enterozo'a*, *Endozo'a*, *Entelminth'a*, *Enthelmin'thes*, *Helmin'thi*, *Entoparasites*, (F.) *Entozoaires*. Animals whose common character is that of existing only in other animals; hence their name *entozoa*, from *εντος*, 'within,' and *ζωον*, 'animal.' They are met with, not only in the natural cavities, but even in the tissue of the organs, but chiefly in the intestines — *Vermes intesti'ni*, *Helmin'thia alvi* seu *pod'icis*, *Splanchnelminth'ia*, *Intes'tinal worms*, (F.) *Vers intestinalaux*, *Angibronelminthie*. Piorry, Cuvier, Rudolphi, Brera, Bremser, Laënnec, and others, have endeavoured to classify them,—some according to their shape; others, according to their anatomical characters.

The following table exhibits most of the entozoa which have been met with in the human body, and their usual habitats:—

<i>Entozoa.</i>	<i>Where found.</i>
Trichoceph'alus dispar, Oxyuris vermicularis, As'caris ala'ta, As'caris lumbricoi'des, Ancylostoma duodenale, Bothrioceph'alus latus, Tæ'nia so'lium, Pentastoma constrictum, Tæ'nia nana,	} Intestines.
Distoma hæmato'bium, Ditrachy'eras radis, (?) Diplo'sma crena'ta, Spirop'tera hom'inis, Dactyl'ius aculeat'us,	
	} Urinary bladder.

Dis'toma hepat'icum,	Gall bladder.
Dis'toma lanceola'tum,	Hepatic duct.
Strom'gylus gigas,	} Kidney.
Tetras'toma rena'lē,	
Fila'ria oc'uli,	Eye.
Monos'toma lentis,	Crystalline.
Distoma oc'uli huma'ni,	} Capsule of crystal- line.
Acephalocyst'is endog'ena,	
Echinococ'cus hom'inis,	} Liver, Spleen, and Omentum.
Polys'toma pinguic'ola,	
Hexathyrid'ium pinguic'ola	} Ovary.
Polys'toma vena'rum seu sanguic'ola,	
Hexathyrid'ium vena'rum,	} Veins.
Fila'ria bronchia'lis,	
Trichi'na spira'lis,	} Bronchial glands.
Cysticer'cus cellulose,	
Acephalocyst'is multif'ida,	} Muscles.
Fila'ria medinen'sis,	
	Brain.
	Areolar texture.

The most common of these are:—the *Oxyuris vermicularis*, *Ascaris lumbricoïdes*, and *Tænia*, which are found in the intestines. The origin of these worms is extremely singular, and more favourable than any other fact to the hypothesis of spontaneous generation in the lowest tribes of animated nature. They are certainly not identical with any worms out of the body. They are most commonly met with in children improperly fed; but their presence cannot be positively detected by any symptoms, except that of the discharge of the worms themselves in the evacuations. They may, of course, give rise to every kind of irritation in the intestinal tube, and to sympathetic disturbance in most of the functions; but all these signs may be produced by intestinal irritation resulting from other causes.

Anthelmintics or *vermifuges*, employed, as the name imports, for their removal, may be of two kinds—*mechanical* and *true*. To the first class—the *mechanical*—belong *Emetics*, *Purgatives*, *Mucuna*, *powdered Tin*, &c. To the latter—the *true anthelmintics*,—*Turpentine*, *Chenopodium anthelminticum*, *Pink-root*, *Semina Santonici*, &c. Of these, the best is turpentine. See *Oleum terebinthinæ*. The great object, however, is to prevent their generation. This must be done by generous diet, fresh air, and tonics, where necessary.

Worms, *Aene punctata*.

WORSUM, Pus.

WORT, Sax. *wort*, *Mustum*, *Infusum Bynes* seu *Bra'sii* seu *Malti*, (F.) *Mout de la Bière*. An infusion of salt. This has been recommended in scurvy. One measure of ground malt is added to three equal measures of boiling water. The mixture must be well stirred, and left to stand covered three or four hours. Dose, one to four pints, daily. It has, also, been recommended in other cases, where a strong putrescent disposition

appeared to prevail in the fluids, as in cancerous and phagedenic ulcers. It is not now employed.

WORTWALE, Hangnail.

WOSEN, Trachea.

WOUND, Sax. *wund*, *Vulnus*, *Volnus*, (*diminutive Vulnusculum*), *Plaga*, *Trauma*, *Troma*, *Tresis*, *Tresis Vulnus*, *Blabē*, *Tymma*, (F.) *Plaie*, *Blesure*. A solution of continuity in the soft parts, produced by some mechanical agent. Wounds present innumerable differences, as regards their situation; the parts interested; their direction; size; shape; the nature of the instrument or agent by which they are produced; their more or less simple or complex character, duration, &c. A wound is called *incised*, (F.) *Coupure*, *Incision*, when made by a cutting instrument;—*punctured*, *Nygma*, (F.) *Piqure*, when made by a pointed instrument;—*lacerated*, (F.) *Déchirure*, *Plaie par arrachement*, when the parts are lacerated or torn by the wounded body; *poisoned*, *Cellulitis venenata*, *Necrosia*, (F.) *Plaie euenimée*, when some virulent or venomous substance has been introduced;—and *contused*, (F.) *Plaie contuse*, when produced by a blunt body. *Gunshot wounds*, *Scelopetoplagæ*, *Vulnura sclopetoria* seu *à scope'tis*, (F.) *Plaie d'armes à feu* ou *d'arquebuse* ou *d'arquebuse*, *Coup de feu*, belong to the last division.

WOURALI, Curare.

WOURARI, Curare.

WOURARU, Curare.

WOURSUM, Pus.

WRACK, SEA, *Fucus vesiculosus*—w. Bladder, yellow, *Fucus vesiculosus*.

WRAMP, Sprain.

WRAPPING UP, (of the hydropathists,) *Emallottage*.

WRATAK, Nanus.

WRENCH, Sprain.

WRET, Verruca.

WRETWEED, *Euphorbia palustris*.

WRIGHTIA ANTIDYSENTERICA, *Nerium antidysentericum*.

WRINKLE, Sax. *wrinkle*, *Ruga*, *Rytis*, *Rhacnus*, *Rhachns*, *Rhagns*, *Rhyssse'ma*, *Corrugatio cutis*, *Ruelles*, (Sc.) *Runkle*, *Runkill*, (Prov.) *Crinkle-crankle*, (F.) *Ride*. A furrow or fold in the skin of the face, forehead, vagina, &c. See *Corrugation*.

WRINKLED, *Rugo'sus*, *Rugous*, *Rugose*, (F.) *Ridé*. Full of wrinkles.

WRIST, Carpus.

WRIST-DROP. Paralysis of the muscles of the forearm, induced by the poison of lead.

WRITERS' SPASM, see *Spasm*, *writers'*.

WURALI, Curare.

WURSTGIPT, *Allantotoxium*.

WRONG HEIR, *Cancellus*.

WRYNECK, *Torticollis*.

X.

X LEG, Entogonyancon.

XALAPPA, Convolvulus jalapa.

XANTHIC OXIDE, Uric oxide.

XANTHINE, Uric oxide.

XANTHIUM, *X. Strumarium* seu *Orientalis* seu *Valgu'rè*, *Barda'na minor*, *Lappa minor*, *Lesser Burdock*, *Burweed*, *Burthistle*, *Clobur*, *Cockle-hur*, (F.) *Lampourde*, *Petit Glousteron*, *Petite Bardane*, from *ξανθος*, 'yellow,' because of the colour the plant is said to yield. This herb, as one of its names imports, was once esteemed for the cure of scrofula. The seeds have been administered in cutaneous affections.

XANTHIURIA, Xanthuria.

XANTHOP'SIA, from *ξανθος*, 'yellow,' and *ψις*, 'vision.' Yellow vision, — as sometimes occurs in jaundice.

XANTHORRHIZA, (*ξανθος*, 'yellow,' and *ρίζα*, 'root.')

XANTHORRHIZA APIFOLIA, *Xanthorrhiza*, *X. simplicissima* seu *Marbo'ica*, *Zanthorrhiza tinctoria*, *Yellow Root*, *Parsley-leaved Yellow Root*, *Yellow wort*, *Shrub yellow root*. The root of this American plant — *Xanthorrhiza*, (Ph. U. S.) — is a strong and pleasant bitter; and, in the dose of two scruples, sits easy upon the stomach.

XANTHORRHŒA, *Grass Tree*. A genus of trees in Australia, *Nat. Order*, Liliacæ, of which there are several species. Two resins are obtained from them; — one the *yellow resin of Xanthorrhæa* or of *New Holland*, *Resi'na lu'tea Novi Belgii*, *Botany Bay resin*, *Ac'aroid resin* or *gum*, *resi'na* vel *gummi acaroid'es*, which probably resembles tolu and storax in medicinal properties; — the other the *red resin of Xanthorrhæa*, *black-boy gum*.

XANTHOS, Yellow.

XANTHOSIS. A term applied to the yellow discolouration often observed in cancerous tumours — especially in encephaloid of the testicle. — Lebert.

XANTHOXYLUM FRAXIN'EUM, (*ξανθος*, 'yellow,' and *ξύλον*, 'wood.')

X. americana, *X. fraxinifolium*, *X. ramiflorum*, *X. tricar'pum*, *Prickly ash*, *Shrubby prickly ash*, *Toothache bush*, *Toothache tree*, *Pell'itory*, *Yellow wood*, *Suterberry*. *Ord.* Xanthoxylicæ. A spirituous infusion of the bark — *Xanthoxylyum* — Ph. U. S. — has been highly recommended in cases of violent colic. The fresh juice, expressed from the root of xanthoxylum, is said to afford relief in the dry bellyache of the West Indies. A decoction of the bark is sometimes used as a wash to foul ulcers.

XANTHOXYLUM CAROLIA'NUM has similar properties; but is more acrid.

XANTHOXYLUM CLAVA HERCULIS of the West Indies, (F.) *Clavalièr à feuilles de frêne*, *Frêne épineux* is a very strong stimulant, and powerful sialogogue; and has been given internally in rheumatism.

XANTHOXYLUM OCTANDRA, *Fagara octandra*.

XANTHURIA, *Xanthuria*, from *ξανθος*, 'yellow,' and *ουρον*, 'urine.' A condition of the system and of the urine, in which xanthic oxide is deposited from the urine.

XANTICA, Carminatives.

XANTOLINA, *Artemisia santonica*.

XENODOCEUM, Hospital.

XENODOCHEUM, Hospital.

XERANSIS, Arefaction, Drying.

XERANTIA, Siccantia.

XERA'SIA. Same etymon; from *ξηρος*, 'dry.' A disease of the hairs, which become dry, cease to grow, and resemble down covered with dust. — Galen.

XERION, Catapasma.

XEROCOLLYR'IUM, from *ξηρος*, 'dry,' and *κόλλυριον*, 'a collyrium;' *Collyrium siccum*. A dry collyrium.

XERODER'MA, from *ξηρος*, 'dry,' and *δερμα*, 'skin.' Diminution of secretion of the sebaceous glands.

XEROMA, Xerophthalmia — x. Conjunctival, Xerophthalmia — x. Lachrymal, Xerophthalmia.

XEROMA, LACHRYMAL. Suppression of the lachrymal secretion. See Xerophthalmia.

XEROMYCTER, Xeromycteria.

XEROMYCTERIA, *Xeromycter*, from *ξηρος*, 'dry,' and *μύκτηρ*, 'the nose.' Dryness of the nose.

XEROMY'RON, *Unguentum siccum*; from *ξηρος*, 'dry,' and *μυρον*, 'an ointment.' A dry ointment. — Gorræus.

XEROPH'GIA, from *ξηρος*, 'dry,' and *φαγω*, 'I eat.' Excessive use of dry aliment. A kind of regimen to which the ancient athleteæ subjected themselves, with the view of increasing their strength.

XEROPHTHAL'MIA, *Ophthalmia sicca*, *Ophthalmoxerosis*, *Xero'ma*, from *ξηρος*, 'dry,' and *ὀφθαλμα*, 'inflammation of the eye.' An inflammation of the eye, without discharge. The term — as well as *Conjunctival* and *Lachrymal Xero'ma*, and *Cuticular Conjunctiva* — has been given to cases in which the conjunctiva is so changed, that it presents more of the characters of skin than of mucous membrane. It is incapable of radical cure. Also, lippitudo.

XEROTRIBIA, see Friction.

XEROTRIPSIS, Friction, dry.

XIPHISTERNUM, Xiphoid.

XIPHODES, Xiphoid.

XIPHODYMUS, Thoraco-gastrodidymus.

XIPHOID, *Xiphoides*, *Xiphoides Ensiformis*, from *ξίφος*, 'a sword,' and *εἶδος*, 'shape;' *Cartilago Xiphoides* seu *Xiphoides* seu *Scutalis* seu *Ensiformis* seu *Pelta'tis* seu *Pelta'tus*, *Furcella inferior*, *Mucronatum os*, *Mucronata Cartilago*, *Chondros*, *Processus xiphosternalis* seu *xiphoides* seu *sterni xiphoides*, *Xiphisternum*, *Ensiformis cartilago*, (F.) *Appendix on cartilage xiphoides*, *C. Mucroné*, *Appendix sous-sternale*, *Palette*. The name of the appendix which terminates the sternum beneath; and which is so called from some resemblance to a sword.

XIPHOID LIG'AMENT, *Costo-xiphoid L.* (F.) *Ligament xiphoidien* ou *costo-xiphoidien*, is a small, very thin, ligamentous fasciculus, which passes from the cartilage of prolongation of the 7th rib to the anterior surface of the xiphoid cartilage, into which it is inserted by its fibres decussating with those of the opposite ligament.

XIPHOPAGES, *Didymus Symphyo-epigastrius*; from *ξίφος*, 'a sword,' and *πηγνυμι*, 'I fix.' A monstrosity, in which twins are united by the epigastrium, as in the case of the Siamese twins.

XYLO-ALOES, Agallochum — x. Balsamum, see Amyris opobalsamum — x. Cassia, Laurus cassia — x. Cinnamomum, Laurus cinnamomum. XYLUM, Gossipium. XYMPATHIA, Sympathy. XYRIS, Iris foetidissima. XYRIS BULBO'SA, X. *Indica* seu *Caroliniana*, *Yellow-eyed Grass*; indigenous; Order, Xyridaceæ; flowering from July to September. The roots and leaves are said to be used by the Hin-

doos in lepra, and chronic cutaneous diseases in general.

XYRUM, Novacula.
XYRUS, Novacula.
XYSMA, Linteam, Rasura, Scobs.
XYSMOS, Rasura.
XYSTER, Raspatorium.
XYSTOS, Linteam.
XYSTRUM, Raspatorium — x. Ophthalmicum, Ophthalmoxyster.

Y.

YAM. This esculent root is principally obtained from three species of *Dioscorea*, — *alata bulbifera*, and *sativa*. They grow spontaneously in both the Indies, and their roots are eaten promiscuously, as the potato is with us. Their taste is somewhat like that of the potato.

YAM ROOT, WILD, *Dioscorea villosa*.

YARD, Penis.

YARROW, COMMON, *Achillea millefolium*.

YAUPON, *Ilex vomitoria*.

YAVA SKIN, *Elephantiasis Arabum*.

YAWNING, from Sax. *geonan*, *Chasmē*, *Chasmus*, *Hiat'us*, *Oscēdo*, *Oscitatio*, *Clonus pandiculatio maxillarum*, *Gaping*, (F.) *Baillement*. Yawning consists of a deep inspiration, with considerable separation of the jaws, executed slowly and in an involuntary manner, and followed by a prolonged and more or less sonorous expiration. This respiratory movement is preceded by a feeling of oppression in the epigastric region, and in the muscles of respiration and mastication. Yawning has been conceived to be owing to torpor in the pulmonary circulation; the causes producing it being commonly *ennuī*, fatigue, sleepiness, monotonous sounds, hunger, sympathy, &c. Yawning often precedes the invasion of certain intermittents, attacks of hysteria, &c., and it may, by its frequency, and obstinacy, become a true disease.

YAW ROOT, *Stillingia*.

YAWS, *Framboesia*.

YEAST, Yest — y. Plant, *Torula cerevisiæ*.

YÈBLE, *Sambucus ebulus*.

YELK, see Ovum.

YELLOW, *Flavus*, *Luteus*, *Xanthus*, from past participle of Sax. *æalan*, 'to burn.' One of the seven primitive colours.

YELLOW ASH, *Cladrastis tinctoria* — y. Berry, *Podophyllum montanum* — y. Fever, see Fever, yellow — y. Fever, mild, see Relapse — y. Jack, Fever, yellow.

YELLOW LIG'AMENTS, (F.) *Ligaments jaunes*, occupy the spaces between the *vertebral plates*, from the interval, which separates the second vertebra from the third, to that which separates the last vertebra from the sacrum. They are so called in consequence of their colour.

YELLOW PAINT, *Hydrastis Canadensis* — y. Root, *Jeffersonia Bartoni* — y. Root, parsley-leaved, *Xanthorrhiza apiifolia* — y. Root, shrub, *Xanthorrhiza apiifolia*.

YELLOW SPRING, see Ohio, Mineral waters of.

YELLOW SPRINGS. These are in Chester county, Pennsylvania. The temperature of the chief spring is 53° Fahr. The water contains no impregnation.

YELLOW STAR, *Helenium autumnale* — y. Weed, *Ranunculus acris* — y. Wood, *Xanthoxylum fraxineum* — y. Wort, Parsley-leaved, *Xanthorrhiza apiifolia*.

YELLOW S, *Cypripedium luteum*, *Icterus*, *Ranunculus acris*.

YERBA DEL SOLDADA, *Matico* — y. de *Huaca*, *Datura sanguinea*.

YEST, *Yeast*, Sax. *ȝert*, from *ȝrt*, 'a storm,' *ȝrtis*, 'stormy;' *Cerevisiæ Fermentum*, *Spuma*, *Cerevisiæ*, *Barm*, (F.) *Levure*, *Levure de la Bière*. The scum which collects on the surface of beer whilst fermenting. Yest is antiseptic and tonic. It has been much extolled in putrid fevers, — a table-spoonful being given as a dose, in porter, wine, &c. It is, also, applied in the form of cataplasm, to foul ulcers. In all these cases, it acts by virtue of the generation of carbonic acid gas.

YEUX ARDENS, Ardent eyes — y. d'Écervisse, *Cancrorum chelæ*.

YEW TREE, *Taxus baccata* — y. American, *Taxus Canadensis*.

YLECH, *Ilech*.

YLIATER, *Ilech*.

YOKE, *Singultus*.

YOLK, see Ovum, and *Vesicula umbilicalis* — y. Membrane, see *Vesicula umbilicalis*.

YORK SPRINGS. These are in Adams county, Pennsylvania. One of them is a saline, containing sulphates of magnesia and lime, and chloride of sodium, and is a mild cathartic and diuretic; — the other is a strong chalybeate.

YOOK, *Itching*, *Psora*.

YOUTH, *Adolescence*.

YOPON, *Ilex vomitoria*.

YPSELOGLOSSUS, *Basioglossus*.

YRIDES, *Orpiment*.

YSAM'BRA, *Pedigan'bra*. An ancient Spanish poison, of which hellebore formed the greatest part.

YUCCA, *Jatropha manihot*.

YUCCA FILAMENTO'SA, *Bear's grass*, *Silk grass*; indigenous. A tincture of the root has been used in gonorrhœa.

YUKE, *Itching*, *Psora*.

Y-WER-A, see Spirit.

Z.

ZACCHARUM, Saccharum.

ZAEL, Borosail.

ZAFFRAN, Crocus.

ZAFFRE, Smalt.

ZAMBO, see Mulatto.

ZAMIA INTEGRIFOLIA, see Arrowroot—z. Pumila, see Arrowroot.

ZANNA. A kind of Armenian bole, used by the ancients as a desiccative. It was also called *Zarnacha*.

ZANTHORRHIZA APIIFOLIA, *Xanthorhiza apiifolia*.

ZANTHOXYLUM, *Xanthoxylum*.

ZAPANIA NODIFLORA, *Anacaulappa*.

ZARNACHA, Zanna.

ZARSA, *Smilax sarsaparilla*.

ZARZAPARILLA, *Smilax sarsaparilla*.

ZEA MAYS, *Z. vulgare*, *Mays*, *M. zea* seu *Americana*, *Ador*, *Indian Corn*, *Corn*, *Turkey* or *Indian Wheat*, *Maize*, *Mayz*, (F.) *Mais*, *Graine de Turquie*, *Blé d'Inde* ou *d'Espagne* ou *d'Italie* ou *de Turquie*. Ord. Graminæ. A native of America, and much used over the whole of the continent as an article of diet. It is ground for the same purposes as wheat, and forms an excellent bread.

ζεα or ζεια, was the ancient name of a sort of corn.

ZÉDOAIRE ROND, *Kæmpferia rotunda*.

ZEDOARIA, *Kæmpferia rotunda* — z. Longa, see *Kæmpferia* — z. Rotunda, see *Kæmpferia*.

ZEDOARY, *Kæmpferia rotunda*.

ZELOSIS, *Zelotypia*.

ZELOTYP'IA, from ζηλος, 'love,' and τυπος, 'form,' 'model,' *Zelosis*. It has been proposed to apply this name to the violent mental affection produced by the acknowledged or presumed infidelity of a beloved object; and to the consequences of such affection; — melancholy, mania, &c.

ZEMA, Decoction.

ZEN'ICON, ζενικον. Ancient name of a Keltic poison, used for poisoning arrows.

ZEOCRITON DISTICHUM, *Hordeum distichon*.

ZEPHACH, *Peritonæum*.

ZERMA, Zerna.

ZERNA, *Zerma*. Amongst the barbarous Latin writers it signified ulcerated impetigo, *Impetigo ulcera'ta*.

ZERUMBET, *Cassumuniar*.

ZESIS, Effervescence, Decoction.

ZEST, see *Citrus medica*.

ZESTOLUSIA, Bath, hot.

ZIBEBÆ, see *Vitis vinifera*.

ZIBETHUM, *Civetta*.

ZIGNITES, *Zingrites*.

ZINC, *Zincum*, *Zinkum*, *Speltrum*, *Speuter*, *Tutenag*, *Zinchum*, *Zint*, *Stannum Indicum*. Perhaps formed etymologically from (G.) *Zin*, 'Tin.' A metal obtained from calamine and blende. Its colour is bluish-white; lustre of the fresh surface considerable, but soon dulled, from the facility with which it oxidates; hard; texture striated. S. g. 7.190. Melts at 700° Fahr., burns with a bright flame in a higher temperature, and is vo-

latilized in the form of a white, flocculent oxyd. Its use, in medicine, is in the formation of the following preparations.

ZINC, ACÉTATE DE, *Zinci acetas*—z. But-ter of, *Zinci chloridum* — z. Chloride of, *Zinci chloridum* — z. *Chlorure de*, *Zinci chloridum* — z. *Cyanure de*, *Zinci cyanuretum* — z. *Ferrohydro-cyanate* of, *Zinci cyanuretum* — z. Flowers of, *Zinci oxydum* — z. *Hydrocyanate* of, *Zinci cyanuretum* — z. Iodide of, *Zinci Iodidum* — z. Iodure of, *Zinci Iodidum*.

ZINC AND MORPH'IA, DOUBLE I'ODIDE OF, (F.) *Iodure double de Zinc et de Morphine*. This salt is prepared by boiling iodide of iodhydrate of morphia with water and zinc, after they have acted on each other for some days; filtering and crystallizing. It is considered to combine the properties of morphia and the salts of zinc, and has been prescribed as an anodyne and antispasmodic. Dose, a quarter of a grain.

ZINC, OXIDE DE, *Zinci oxydum* — z. Oxyd of, *Zinci oxydum*.

ZINC AND STRYCH'NIA, DOUBLE I'ODIDE OF. This salt is prepared by digesting for several days in hot water, iodide of iodhydrate of strychnia and zinc; filtering and crystallizing. It has been proposed in the same cases as strychnia.

ZINC, SULFATE DE, *Zinci sulphas*—z. Sulphate of, *Zinci sulphas* — z. Valerianate of, *Zinci Valerianas*.

ZINCHUM, *Zincum*.

ZINCI ACETAS, *Ac'etate of Zinc*, (F.) *Acétate de Zinc*. (*Plumbi acet. ℞j, zinc. granul. ℥iix, aquæ destillat. Oijj*). Dissolve the acetate of lead in the water, and filter. Add the zinc to the solution, and agitate them occasionally together, in a stopped bottle, for five or six hours, or until the liquor yields no precipitate with a solution of iodide of potassium. Filter the liquor, evaporate it with a moderate heat to one-fifth, and set it aside to crystallize. Pour off the liquid, and dry the crystals on bibulous paper.

Should the crystals be coloured, dissolve them in distilled water, and having heated the solution, drop into it, while hot, a filtered solution of chlorinated lime, until it ceases to let fall sesquioxide of iron; filter the liquor, acidulate it with a few drops of acetic acid, evaporate, and crystallize.—*Ph. U. S.*)

Frequently used to form a gently astringent wash in ophthalmia and other local inflammations; and as an injection in gonorrhœa.

ZINCI CARBONAS IMPURUS, *Calamina*.

ZINCI CARBONAS PRÆCIPITATUS, *Precipitated carbonate of Zinc*. (*Zinci sulphat., sodæ carbonat. āā ℞j; aq. bullient. cong.*). Dissolve the sulphate of zinc and carbonate of soda respectively in Oiv of water. Mix the solutions; stir, and set the mixture by, that the powder may subside. Having poured off the liquid, wash the precipitated carbonate of zinc with hot water, until the fluid of the washings is nearly tasteless, and dry with a gentle heat.—*Ph. U. S.*) Used to prepare the *Zinci oxidum*.

ZINCI CARBONAS PRÆPARATUS, *Calamina præparata* — z. Chloridi liquor, see *Burnett's Disinfecting Liquid*.

ZINCI CHLORIDUM, *Z. chlorure'tum*, *Zincum chlora'tum* seu *muria'ticum (oxydatum)*, *Chloride*

or *Chloruret of Zinc*, (F.) *Chlorure de Zinc*. (*Zinc*) in frustulis, ℥ijss; *acid. nitricæ*, cretæ præparat. āā ℥j; *acid. muriat.* q. s. To the zinc, in the porcelain vessel, add gradually sufficient muriatic acid to dissolve it; strain, add the nitric acid, and evaporate to dryness. Dissolve the dry mass in water, add the chalk, allow the mixture to stand for 24 hours, filter, and again evaporate to dryness.—*Ph. U. S.*) It is very deliquescent in the air, forming the *Butter of Zinc*, *Butyrum Zinci*.

Chloride of Zinc is a powerful escharotic, and has been lately employed as an effective anti-septic.

ZINCI CHLORURETUM, Z. chloridum.

ZINCI CYANURETUM, *Z. cyanidum* seu *Hydrocyanas* seu *Prussias*, *Zincum Cyanogenatum* seu *Borus'sicum* seu *Zoët'icum*, *Hydrocyanate of Zinc*, (F.) *Cyanure de Zinc*. This salt is formed by adding sulphate of zinc to hydrocyanate of potassa so long as any precipitate is thrown down. When dried and calcined at a low heat, the product is a mixture of cyanuret of zinc and of potassium. It has been recommended in nervous caldalgia. Dose, from one-sixteenth to one-twelfth of a grain.

It is chiefly used as a caustic; one part of the chloride being mixed with four, three, or two parts of flour, according to the desired strength, and a few drops of water being added to form a paste.

ZINCI FERROHYDROCYANAS, *Zinci ferrocyanuretum*, *Cyanuretum Ferrozincicum*, *Zincum Ferrohydrocyanicum*, *Ferrocyanate of Zinc*. Made by the mutual decomposition of boiling-hot solutions of sulphate of zinc and ferrocyanate of potassa. It has been recommended in the same cases as the last preparation.

ZINCI HYDROCYANAS, *Zinci cyanuretum*.

ZINCI IODIDUM, *Z. Ioduretum*, *Zincum Iodatum*, *Iodetum Zinci* seu *Zincicum*, *Protoioduretum Zinci*, *Iodide* or *Ioduret of Zinc*, (F.) *Iodure de Zinc*. This salt is made by boiling together iodine and zinc to dryness, and subliming. An ointment, composed of a drachm to an ounce of lard, has been used in cases where the external use of iodide of potassium is indicated.

ZINCI IODURETUM, Z. iodidum — z. Nix, *Zinci oxydum*.

ZINCI OXYDUM, *Zincum calcinatum*, *Nihil Album*, *Lana Philosophorum* seu *Philosophica*, *Nix Zinci*, *Nihil Grisæum*, *Pompholyx*, *Oxyd of Zinc*, *Flowers of Zinc*, (F.) *Oxide ou Blanc de Zinc*. (Procured by burning zinc in a long, deep crucible, placed so as to collect the sublimate. Also, by exposing the precipitate thrown down from a solution of sulphate of zinc by carbonate of ammonia to a strong heat, so as to drive off the carbonic acid.—*Ph. U. S.*) It is tonic and antispasmodic; externally, detergent and desiccative. Employed in epilepsy, chorea, &c. For its external use, see Ung. Zinci.

ZINCI OXYDUM IMPURUM, *Tutia* — z. *Prussias*, *Zinci cyanuretum*.

ZINCI SULPHAS, *Sulphate of Zinc*, *Zincum Vitriolatum*, *Vitriolum Album* seu *Gostariensē* seu *Zinci*, *Sulphas Zincicum*, *Gilla Vitrioli* seu *Theophrasti*, *Sal Vitrioli* seu *Vomitorium Vitrioli*, *Chalcantimum Album*, *White Vitriol*, *White Coppras*, (F.) *Sulfate de Zinc*. (*Zinc*) in frustul. ℥iv; *acid. sulphuricæ*. ℥vj; *aqvæ destillat.* Oiv. To the zinc and water, previously introduced into a glass vessel, add by degrees the sulphuric acid, and when the effervescence shall have ceased, filter the solution through paper; then boil it down till a pellicle begins to form, and set aside to crystallize.—*Ph. U. S.*) The sulphate of zinc is inodorous; taste, styptic. It is in white, semi-

transparent, efflorescent crystals; soluble in three parts of water at 60°. It is emetic, tonic, antispasmodic, and, externally, astringent. A nostrum, sold under the name *Antipertussis*, and, as its title imports, given in whooping-cough, contains this salt as its chief ingredient. It is emetic. Dose, as an emetic, gr. x to ℥ss; as a tonic, gr. j to water f℥j.

ZINCI VALERIA'NAS, *Zincum valerianicum*, *Valerianate of Zinc*. A salt formed by saturating valerianic acid with freshly prepared carbonate of zinc. It is in pure white, pearly scales, and has been recommended as a tonic in neuralgic diseases, epilepsy, &c. The dose is one or two grains several times a day. It is official in the Dublin Pharmacopœia.

ZINCUM, Zinc — z. *Borussicum*, *Zinci cyanuretum* — z. *Calcinatum*, *Zinci oxydum* — z. *Chloratum*, *Zinci chloridum* — z. *Cyanogenatum*, *Zinci cyanuretum* — z. *Ferrocyanogenicum*, *Zinci ferrohydrocyanas* — z. *Iodatum*, *Zinci iodidum* — z. *Muriaticum*, *Zinci chloridum* — z. *Valerianicum*, *Zinci valerianas* — z. *Vitriolatum*, *Zinci sulphas* — z. *Zooticum*, *Zinci cyanuretum*.

ZINGIBER, *Amomum zingiber* — z. *Cassumuniar*, see *Cassumuniar* — z. *Cliffordia*, see *Cassumuniar* — z. *Germanicum*, *Arum maculatum* — z. *Officinale*, *Amomum zingiber* — z. *Purpureum*, see *Cassumuniar* — z. *Spurium*, see *Cassumuniar* — z. *Zerumbet*, see *Cassumuniar*.

ZINGIBERIN, *Piperoid*.

ZINGRITES, *Zigni'tes*. A stone, resembling glass; to which the ancients attributed marvelous properties.

ZINKUM, *Zincum*.

ZINT, *Zincum*.

ZINZIBER, *Amomum zingiber*.

ZIPHAC, *Peritonæum*.

ZIRBUS, *Epiploon* — z. *Adipinus*, *Epiploon*, *gastro-colic*.

ZIZA'NIA AQUATICA, *Wild Rice*; *Ord.* *Graminæ*; called by the Indians, *Menomene*, grows abundantly on the marshy margins of the northern lakes and waters of the upper branches of the Mississippi. The grain resembles oats. It furnishes the northern savages and the Canadian traders and hunters with their annual supplies of grain. Ζίζανιον was the ancient name of some wild grain.

ZIZYPHUM, *Jujube*.

ZIZYPHUS JUJUBA, see *Jujube* — z. *Nitida*, see *Jujube*.

ZIZYPHUS ENOP'LIA, *Z. Napeca*; *Ord.* *Rhamnaceæ*; common all over India. The fruit is eaten by the natives. It is of a pleasant acid taste. A decoction of the bark of the fresh root is used to promote the healing of fresh wounds.

ZIZYPHUS SATIVA, see *Jujube* — z. *Sylvestris*, see *Jujube*.

ZOA'GRIA, from ζωη, 'life,' and ἀγρευ, 'I catch up.' The saving and preservation of life. *Zōōsis*. A reward for preserving life; *Sostrum*. A votive offering hung up in the temples for a life saved.

ZOANTHRO'PIA, *Melancholia zoanthropia*, from ζων, 'an animal,' and ανθρωπος, 'a man.' A species of monomania, in which the patient believes himself transformed into an animal. Lycanthropia and Cynanthropia belong to this species of monomania.

ZOARA, *Insomnia*.

ZOE, *Life*.

ZOGRAPHIA, *Zoographia*.

ZOIATRIA, *Veterinary art*.

ZOIATRUS, Hippiaeter.
 ZOMIDIUM, Jus.
 ZOMOS, *Consommé*, Jus.
 ZONA, Herpes zoster — z. Castitatis, Hymen — z. Ciliaris, Ciliary zone — z. Ignea, Herpes zoster.
 ZONA PELLUCIDA, *Oolem'ma pellucidum*, *Vitellary membrane*, *Chorion* (of some), (F.) *Vitelline*, *Membrane vitelline*. The membrane that surrounds the yolk in the mammalia is so called on account of its thickness and peculiar transparency.
 ZONA SERPIGINOSA, Herpes zoster.
 ZONA TENDINOSA. The whitish circle around the auriculo-ventricular orifice of the right side of the heart.
 ZONA VIRGINITATIS, Hymen.
 ZONE, Cingulum.
 ZONULA CILIARIS, see Ciliary, and Ciliary zone — z. Cochleæ, see *Lamina spiralis* — z. Hildani, *Cingulum Hildani* — z. Zinnii, see Ciliary zone.
 ZOOBIOLOGIA, see Physiology.
 ZOÏCHEMIA, Chymistry, animal.
 ZOÏCHEMICAL, *Zoëchym'ical*, *Zoëchem'icus*, *Zoëchym'icus*. Appertaining or having relation to animal chymistry.
 ZOÏCHEMY, Chymistry, animal.
 ZOÏCHYMY, Chymistry, animal.
 ZOÏGENIUM, Azote.
 ZOÏG'ENY, *Zoëgen'ia*, *Zoëgen'esie*, from ζων, 'animal,' and γενεαις, 'generation.' The doctrine of animal formation.
 ZOOG'RAPHY, *Zoëgra'phia*, *Zogra'phia*, from ζων, and γραφη, 'a description.' A description of animals. The natural history of animals.
 ZOÏHEMATINE, Hæmatine.
 ZOÏHY'LAS, from ζων, and 'αλη, 'matter.' Animal matter.
 ZOÏHY'LICA CONCREMENTA. Concretions formed of animal matter.
 ZOÏIASIS, Veterinary art.
 ZOÏOID, *Zoëides*, *Zoëides*; from ζων, 'animal,' and εidos, 'resemblance.' Resembling or belonging to an animal. Every living cell may be regarded as a Zooid.
 ZOÏOLOGIST, *Zoëlogis'ta*, *Zoëlogus*, from ζων, and λογος, 'description.' One skilled in the natural history of animals.
 ZOÏLOGY, *Zoëlog'ia*. Same etymon. The natural history of animals.
 ZOÏMAGNETISMUS, Magnetism, animal.
 ZOÏMYCUS, Mucus.
 ZOÏMYXA, Mucus.
 ZOÏN, Animal.
 ZOÏNOM'IA, *Organozoënom'ia*, *Zoënom'ia*, from ζων, and νομος, 'law.' The laws which govern the organic actions of animals in general:—*Animal Physiol'ogy*, *Zoophysiol'ogy'ia*.
 ZOONOSOLOG'IA, from ζων, νοσος, 'a disease,' and λογος, 'a description.' The nosology of animals.
 ZOÏPATHOLOG'IA, from ζων, παθος, 'a disease,' and λογος, 'a description.' The pathology of animals.
 ZOÏPH'AGOUS, *Zoëph'agus*, (F.) *Zoëphage*, from ζων, and φαγω, 'I eat.' Feeding on animals. Carnivorous.
 ZOÏPHTHALMUS, Hydrophthalmia.
 ZOÏPHYSIOLOGIA, Physiology, animal, Zoonomia.
 ZOÏOPHYTE, *Zoëph'ytum*, *Phytozo'ön*, *Animal plant*, from ζων, and φυτόν, 'a plant.' A name

given to the lowest class of animals, which seem to form the transition between the animal and the vegetable kingdoms.
 ZOÏSIS, Animation, Zoagria.
 ZOÏSPERMATA, Spermatozoa.
 ZOÏSPERMES, Spermatozoa.
 ZOÏTHAP'SIS, from ζωη, 'life,' and θάπτω, 'I inter.' Burial alive. Premature interment.
 ZOÏTOMIST, *Zoëtom'icus*. Same etymon as the next. One who dissects animals.
 ZOÏTOMY, *Zoëtom'ia*, from ζων, and τέμνω. 'I cut.' *Anatom'ia animalis seu comparati'ca seu compara'ta*, *Theriot'omy*, *Compar'ative Anatomy*. The anatomy of animals. Animal anatomy.
 ZOPISSA, see *Pinus sylvestris*.
 ZOPYRON, Fomites.
 ZOSTER, Herpes zoster.
 ZOSTERA MARINA, *Pila marina* — z. *Martima*, *Pila marina*.
 ZOSTÈRE, *Pila marina*.
 ZOZINETTE, *Narcissus pseudonarcissus*.
 ZOZAR, Saccharum.
 ZUCARO, Saccharum.
 ZUCARUM, Saccharum.
 ZUCHAR, Saccharum.
 ZUCHARUM, Saccharum.
 ZUCHRA, Saccharum.
 ZULAPIUM, Julep.
 ZYGAPOPHYSES, see Vertebræ.
 ZYGOMA, Malæ os.
 ZYGOMATIC, *Zygomat'icus*, *Juga'lis*, *Jugal*, (F.) *Zygomatique*. That which relates to the zygoma or cheek-bone.
 ZYGOMATIC ARCH, see Zygomatic process — z. Bone, Malæ os.
 ZYGOMATIC FOSSA is the space included between the posterior margin of the outer ala of the pterygoid process, and the crista which descends from the malar tuberosity to the superior alveolar margin.
 ZYGOMATIC MUSCLES are two in number. 1. *Zygomat'icus major*, *Distort'or Oris*, (F.) *Zygomato-labial* (Ch.), *Muscle grand zygomatique*, which is situate obliquely at the fore-part and sides of the face. It is a small, rounded muscle; arises from the outer surface of the os malæ, and is inserted at the commissure of the lips, which it raises and draws outwards. It acts principally in laughing. 2. *Zygomat'icus minor*, (F.) *Petit Zygomato-labial*, (Ch.), *Petit Zygomatique*, does not always exist. It is situate on the inner side of the last; arises from the outer surface of the os malæ, and is inserted at the corner of the mouth, or rather into the upper lip, which it raises and draws outwards.
 ZYGOMATIC PROCESS, *Proces'sus zygomat'icus*, *Apoph'ysis Zygomat'ica*, *Malar* or *Jugal process*, (F.) *Apophyse Zygomatique*, arises from the outer surface of the temporal bone by two roots, one of which is transverse, (*Condyle du temporal*, Ch..) and the other longitudinal: between them is the glenoid cavity. The process passes forwards, and is articulated with the posterior angle of the os malæ, with which it forms a bony bridge, called the *Zygomat'ic arch*, *Arcus* seu *Pons Zygomat'icus*, (F.) *Arcade Zygomatique*. The cavity, beneath this bridge, is sometimes called *Zygo'ma*.
 ZYGOMATIC SUTURE is placed between the zygomatic parts of the temporal and cheek bones; and slants obliquely downwards and backwards.
 ZYGOMATIQUE, Zygomatic — z. *Grand*, *Zygomat'icus major* — z. *Petit*, *Zygomat'icus minor*.

ZYGOMATO-LABIAL, *Zygomatiscus major*—*z. Labial, petit, Zygomatiscus major*—*z. Maxillaire, Masseter*—*z. Oriculaire, Anterior auris.*

ZYGOPHYLLUM FABAGO, (F.) *Fabagelle.*
Ord. Zygophyllacæ. A Syrian and Mauritanic plant, possessed of an acrid and bitter taste. It has vermifuge properties. The Arabs believe that the recently expressed juice of *Zygophyllum simplex*, is capable of removing specks from the cornea.

ZYMA, Ferment.

ZYMOMA, Ferment

ZYMOSIS, Fermentation, see *Zymotic.*

ZYMOTIC, *Zymot'icus*, (F.) *Zymotique*, from ζυμων, 'to ferment.' Relating or appertaining to fermentation. A *zymotic disease* is any epidemic, endemic, contagious or sporadic affection, which is produced by some morbid principle acting on the organism similar to a ferment—as the major exanthemata, psychæmia, &c. *Zymoses* has been used by some to signify such affections.

ZYTHOGALA, Posset.

ZYTHUM, Cerevisia.

ZYTHUS, Cerevisia.

THE END.

BLANCHARD & LEA'S MEDICAL AND SURGICAL PUBLICATIONS.

TO THE MEDICAL PROFESSION.

In the present catalogue we have affixed prices to our publications, in obedience to the repeated requests of numerous members of the profession. While books, like all other articles, must necessarily vary somewhat in cost throughout the extended territories of this country, yet our publications will generally be furnished at these rates by booksellers throughout the Union, who can readily and speedily procure any which they may not have on hand.

To accommodate those physicians who have not convenient access to bookstores, or who cannot order through merchants visiting the larger cities, we will forward our works by mail, *free of postage*, on receipt of the printed prices in current funds or postage stamps. As our business is wholesale, and we open accounts with booksellers only, the amount must in every case, without exception, accompany the order, and we can assume no risks of the mail, either on the money or the books; and as we sell only our own publications, we can supply no others. Physicians will, therefore, see the convenience and advantage of making their purchases, whenever practicable, from the nearest bookseller.

We can only add that no exertions are spared to merit a continuance of the gratifying confidence hitherto manifested by the profession in all works bearing our imprint.

BLANCHARD & LEA.

PHILADELPHIA, April, 1859.

* * We have just ready a new ILLUSTRATED CATALOGUE of our Medical and Scientific Publications, forming an octavo pamphlet of 80 large pages, containing specimens of illustrations, notices of the medical press, &c. &c. It has been prepared without regard to expense, and will be found one of the handsomest specimens of typographical execution as yet presented in this country. Copies will be sent to any address, by mail, free of postage, on receipt of nine cents in stamps.

Catalogues of our numerous publications in miscellaneous and educational literature forwarded on application.

TWO MEDICAL PERIODICALS, FREE OF POSTAGE, FOR FIVE DOLLARS PER ANNUM.

THE AMERICAN JOURNAL OF THE MEDICAL SCIENCES, subject to postage, when not paid for in advance, - - - - - \$5 00
THE MEDICAL NEWS AND LIBRARY, invariably in advance, - - - 1 00
OR, BOTH PERIODICALS furnished, FREE OF POSTAGE, for Five Dollars remitted in advance.

THE AMERICAN JOURNAL OF THE MEDICAL SCIENCES, EDITED BY ISAAC HAYS, M. D.,

is published Quarterly, on the first of January, April, July, and October. Each number contains at least two hundred and eighty large octavo pages, handsomely and appropriately illustrated, wherever necessary. It has now been issued regularly for more than THIRTY-FIVE years, and it has been under the control of the present editor for more than a quarter of a century. Throughout this long period, it has maintained its position in the highest rank of medical periodicals both at home and abroad, and has received the cordial support of the entire profession in this country. Its list of Collaborators will be found to contain a large number of the most distinguished names of the profession in every section of the United States, rendering the department devoted to

ORIGINAL COMMUNICATIONS

full of varied and important matter, of great interest to all practitioners.

As the aim of the Journal, however, is to combine the advantages presented by all the different varieties of periodicals, in its

REVIEW DEPARTMENT

will be found extended and impartial reviews of all important new works, presenting subjects of novelty and interest, together with very numerous

BIBLIOGRAPHICAL NOTICES,

including nearly all the medical publications of the day, both in this country and Great Britain, with a choice selection of the more important continental works. This is followed by the

QUARTERLY SUMMARY,

being a very full and complete abstract, methodically arranged, of the

IMPROVEMENTS AND DISCOVERIES IN THE MEDICAL SCIENCES.

This department of the Journal, so important to the practising physician, is the object of especial care on the part of the editor. It is classified and arranged under different heads, thus facilitating the researches of the reader in pursuit of particular subjects, and will be found to present a very full and accurate digest of all observations, discoveries, and inventions recorded in every branch of medical science. The very extensive arrangements of the publishers are such as to afford to the editor complete materials for this purpose, as he not only regularly receives

ALL THE AMERICAN MEDICAL AND SCIENTIFIC PERIODICALS,

but also twenty or thirty of the more important Journals issued in Great Britain and on the Continent, thus enabling him to present in a convenient compass a thorough and complete abstract of everything interesting or important to the physician occurring in any part of the civilized world.

To their old subscribers, many of whom have been on their list for twenty or thirty years, the publishers feel that no promises for the future are necessary; but those who may desire for the first time to subscribe, can rest assured that no exertion will be spared to maintain the Journal in the high position which it has occupied for so long a period.

By reference to the terms it will be seen that, in addition to this large amount of valuable and practical information on every branch of medical science, the subscriber, by paying in advance, becomes entitled, without further charge, to

THE MEDICAL NEWS AND LIBRARY,

a monthly periodical of thirty-two large octavo pages. Its "NEWS DEPARTMENT" presents the current information of the day, while the "LIBRARY DEPARTMENT" is devoted to presenting standard works on various branches of medicine. Within a few years, subscribers have thus received, without expense, the following works which have passed through its columns:—

WATSON'S LECTURES ON THE PRACTICE OF PHYSIC.

BRODIE'S CLINICAL LECTURES ON SURGERY.

TODD and BOWMAN'S PHYSIOLOGICAL ANATOMY AND PHYSIOLOGY OF MAN.

WEST'S LECTURES ON THE DISEASES OF INFANCY AND CHILDHOOD.

MALGAIGNE'S OPERATIVE SURGERY, with wood-cuts.

SIMON'S LECTURES ON GENERAL PATHOLOGY.

BENNETT ON PULMONARY TUBERCULOSIS, with wood-cuts,

WEST ON ULCERATION OF THE OS UTERI,

BROWN ON THE SURGICAL DISEASES OF FEMALES, with wood-cuts, and

WEST ON DISEASES OF WOMEN, Part I. (See p. 32.)

While in the number for January, 1858, is commenced a new and highly important work,

HABERSHON ON DISEASES OF THE ALIMENTARY CANAL.

It will be seen that this treatise covers the whole ground of affections of the Digestive Organs, which furnish so very large a portion of the daily practice of the physician. The author's position in Guy's Hospital, and the fact that the work has only just appeared in London, are sufficient guarantee that it is up to the hour, and presents the most advanced condition of this department of medical science, while its thorough practical character is manifested by the great number of cases on which it is founded, no less than one hundred and sixty-three being carefully analyzed in all their details, throughout its pages. It is therefore hoped that it will be found to fully maintain the valuable practical character of the works heretofore presented to subscribers through this medium.

It will thus be seen that for the small sum of FIVE DOLLARS, paid in advance, the subscriber will obtain a Quarterly and a Monthly periodical,

EMBRACING NEARLY SIXTEEN HUNDRED LARGE OCTAVO PAGES,

mailed to any part of the United States, free of postage.

These very favorable terms are now presented by the publishers with the view of removing all difficulties and objections to a full and extended circulation of the Medical Journal to the office of every member of the profession throughout the United States. The rapid extension of mail facilities will now place the numbers before subscribers with a certainty and dispatch not heretofore attainable; while by the system now proposed, every subscriber throughout the Union is placed upon an equal footing, at the very reasonable price of Five Dollars for two periodicals, without further expense.

Those subscribers who do not pay in advance will bear in mind that their subscription of Five Dollars will entitle them to the Journal only, without the News, and that they will be at the expense of their own postage on the receipt of each number. The advantage of a remittance when ordering the Journal will thus be apparent.

As the Medical News and Library is in no case sent without advance payment, its subscribers will always receive it free of postage.

Remittances of subscriptions can be mailed at our risk, when a certificate is taken from the Postmaster that the money is duly inclosed and forwarded.

Address BLANCHARD & LEA, PHILADELPHIA.

ALLEN (J. M.), M. D.,

Professor of Anatomy in the Pennsylvania Medical College, &c.

THE PRACTICAL ANATOMIST; or, *The Student's Guide in the Dissecting-Room.* With 266 illustrations. In one handsome royal 12mo. volume, of over 600 pages, leather. \$2 25.

In the arrangement of this work, the author has endeavored to present a complete and thorough course of dissections in a clearer and more available form for practical use, than has as yet been accomplished. The chapters follow each other in the order in which dissections are usually conducted in this country, and as each region is taken up, every detail regarding it is fully described and illustrated, so that the student is not interrupted in his labors, by the necessity of referring from one portion of the volume to another.

However valuable may be the "Dissector's Guides" which we, of late, have had occasion to notice, we feel confident that the work of Dr. Allen is superior to any of them. We believe with the author, that none is so fully illustrated as this, and the arrangement of the work is such as to facilitate the labors of the student in acquiring a thorough practical knowledge of Anatomy. We most cordially recommend it to their attention.—*Western Lancet*, Dec. 1856.

We believe it to be one of the most useful works upon the subject ever written. It is handsomely illustrated, well printed, and will be found of convenient size for use in the dissecting-room.—*Med. Examiner*, Dec. 1856.

From Prof. J. S. Davis, University of Va.

I am not acquainted with any work that attains so fully the object which it proposes.

From C. P. Fanner, M. D., Demonstrator, University of Michigan.

I have examined the work briefly, but even this examination has convinced me that it is an excellent guide for the Dissector. Its illustrations are beautiful, and more than I have seen in a work of this kind. I shall take great pleasure in recommending it to my classes as the text-book of the dissecting-room.

ANALYTICAL COMPENDIUM

OF MEDICAL SCIENCE, containing Anatomy, Physiology, Surgery, Midwifery, Chemistry, Materia Medica, Therapeutics, and Practice of Medicine. By JOHN NEILL, M. D., and F. G. SMITH, M. D. New and enlarged edition, one thick volume royal 12mo. of over 1000 pages, with 374 illustrations. \$3 00. See NEILL, p. 24.

ABEL (F. A.), F. C. S. AND C. L. BLOXAM.

HANDBOOK OF CHEMISTRY, Theoretical, Practical, and Technical; with a Recommendatory Preface by Dr. HOFMANN. In one large octavo volume, extra cloth, of 662 pages, with illustrations. \$3 25.

ASHWELL (SAMUEL), M. D.,

Obstetric Physician and Lecturer to Guy's Hospital, London.

A PRACTICAL TREATISE ON THE DISEASES PECULIAR TO WOMEN.

Illustrated by Cases derived from Hospital and Private Practice. Third American, from the Third and revised London edition. In one octavo volume, extra cloth, of 528 pages. \$3 00.

The most useful practical work on the subject in the English language.—*Boston Med. and Surg. Journal*.

The most able, and certainly the most standard and practical, work on female diseases that we have yet seen.—*Medico-Chirurgical Review*.

ARNOTT (NEILL), M. D.

ELEMENTS OF PHYSICS; or *Natural Philosophy, General and Medical.*

Written for universal use, in plain or non-technical language. A new edition, by ISAAC HAYS, M. D. Complete in one octavo volume, leather, of 484 pages, with about two hundred illustrations. \$2 50.

BUDD (GEORGE), M. D., F. R. S.,

Professor of Medicine in King's College, London.

ON DISEASES OF THE LIVER. Third American, from the third and

enlarged London edition. In one very handsome octavo volume, extra cloth, with four beautifully colored plates, and numerous wood-cuts. pp. 500. \$3 00. (*Just Issued.*)

Has fairly established for itself a place among the classical medical literature of England.—*British and Foreign Medico-Chir. Review*, July, 1857.

Dr. Budd's Treatise on Diseases of the Liver is now a standard work in Medical literature, and during the intervals which have elapsed between the successive editions, the author has incorporated into the text the most striking novelties which have characterized the recent progress of hepatic physiology and pathology; so that although the size of the book

is not perceptibly changed, the history of liver diseases is made more complete, and is kept upon a level with the progress of modern science. It is the best work on Diseases of the Liver in any language.—*London Med. Times and Gazette*, June 27, 1857.

This work, now the standard book of reference on the diseases of which it treats, has been carefully revised, and many new illustrations of the views of the learned author added in the present edition.—*Dublin Quarterly Journal*, Aug. 1857.

BY THE SAME AUTHOR.

ON THE ORGANIC DISEASES AND FUNCTIONAL DISORDERS OF THE STOMACH. In one neat octavo volume, extra cloth. \$1 50.

From the high position occupied by Dr. Budd as a teacher, a writer, and a practitioner, it is almost needless to state that the present book may be consulted with great advantage. It is written in an easy

style, the subjects are well arranged, and the practical precepts, both of diagnosis and treatment, denote the character of a thoughtful and experienced physician.—*London Med. Times and Gazette*.

BUCKNILL (J. C.), M. D.,

Medical Superintendent of the Devon County Lunatic Asylum; and

DANIEL H. TUKE, M. D.,

Visiting Medical Officer to the York Retreat.

A MANUAL OF PSYCHOLOGICAL MEDICINE; containing the History, Nosology, Description, Statistics, Diagnosis, Pathology, and Treatment of INSANITY. With a Plate. In one handsome octavo volume, of 536 pages. \$3 00. (*Now Ready*, July, 1858.)

The increase of mental disease in its various forms, and the difficult questions to which it is constantly giving rise, render the subject one of daily enhanced interest, requiring on the part of the physician a constantly greater familiarity with this, the most perplexing branch of his profession. At the same time there has been for some years no work accessible in this country, presenting the results of recent investigations in the Diagnosis and Prognosis of Insanity, and the greatly improved methods of treatment which have done so much in alleviating the condition or restoring the health of the insane. To fill this vacancy the publishers present this volume, assured that the distinguished reputation and experience of the authors will entitle it at once to the confidence of both student and practitioner. Its scope may be gathered from the declaration of the authors that "their aim has been to supply a text book which may serve as a guide in the acquisition of such knowledge, sufficiently elementary to be adapted to the wants of the student, and sufficiently modern in its views and explicit in its teaching to suffice for the demands of the practitioner."

BENNETT (J. HUGHES), M. D., F. R. S. E.,

Professor of Clinical Medicine in the University of Edinburgh, &c.

THE PATHOLOGY AND TREATMENT OF PULMONARY TUBERCULOSIS, and on the Local Medication of Pharyngeal and Laryngeal Diseases frequently mistaken for or associated with, Phthisis. One vol. 8vo., extra cloth, with wood-cuts. pp. 130. \$1 25.

BENNETT (HENRY), M. D.

A PRACTICAL TREATISE ON INFLAMMATION OF THE UTERUS, ITS CERVIX AND APPENDAGES, and on its connection with Uterine Disease. New and much enlarged edition, preparing by the author for publication in 1859.

We are firmly of opinion that in proportion as a knowledge of uterine diseases becomes more appreciated, this work will be proportionably established as a text-book in the profession.—*The Lancet*.

When, a few years back, the first edition of the present work was published, the subject was almost entirely unknown to the obstetrical celebrities

of the day; and even now we have reason to know that the bulk of the profession are not fully alive to the importance and frequency of the disease of which it takes cognizance. The present edition is so much enlarged, altered, and improved, that it can scarcely be considered the same work.—*Dr. Ranking's Abstract*.

BY THE SAME AUTHOR.

A REVIEW OF THE PRESENT STATE OF UTERINE PATHOLOGY. 8vo., 75 pages, flexible cloth, 50 cents.

BIRD (GOLDING), A. M., M. D., &c.

URINARY DEPOSITS: THEIR DIAGNOSIS, PATHOLOGY, AND THERAPEUTICAL INDICATIONS. A new and enlarged American, from a late improved London edition. With over sixty illustrations. In one royal 12mo. vol, extra cloth. pp. 372. \$1 30.

It can scarcely be necessary for us to say anything of the merits of this well-known Treatise, which so admirably brings into practical application the results of those microscopical and chemical researches regarding the physiology and pathology of the urinary secretion, which have contributed so much to the increase of our diagnostic powers, and to the

extension and satisfactory employment of our therapeutic resources. In the preparation of this new edition of his work, it is obvious that Dr. Golding Bird has spared no pains to render it a faithful representation of the present state of scientific knowledge on the subject it embraces.—*The British and Foreign Medico-Chirurgical Review*.

BOWMAN (JOHN E.), M. D.

PRACTICAL HANDBOOK OF MEDICAL CHEMISTRY. Second American, from the third and revised English Edition. In one neat volume, royal 12mo., extra cloth, with numerous illustrations. pp. 288. \$1 25.

BY THE SAME AUTHOR.

INTRODUCTION TO PRACTICAL CHEMISTRY, INCLUDING ANALYSIS. Second American, from the second and revised London edition. With numerous illustrations. In one neat vol., royal 12mo., extra cloth. pp. 350. \$1 25.

BEALE ON THE LAWS OF HEALTH IN RELATION TO MIND AND BODY. A Series of Letters from an old Practitioner to a Patient. In one volume, royal 12mo., extra cloth. pp. 296. 80 cents.

BUSHNAN'S PHYSIOLOGY OF ANIMAL AND VEGETABLE LIFE; a Popular Treatise on the Functions and Phenomena of Organic Life. In one handsome royal 12mo. volume, extra cloth, with over 100 illustrations. pp. 234. 80 cents.

BUCKLER ON THE ETIOLOGY, PATHOLOGY, AND TREATMENT OF FIBRO-BRONCHITIS AND RHEUMATIC PNEUMONIA. In one 8vo. volume, extra cloth. pp. 150. \$1 25.

BLOOD AND URINE (MANUALS ON). BY JOHN WILLIAM GRIFFITH, G. OWEN REESE, AND ALFRED MARKWICK. One thick volume, royal 12mo., extra cloth, with plates. pp. 460. \$1 25.

BRODIE'S CLINICAL LECTURES ON SURGERY. 1 vol. 8vo. cloth. 350 pp. \$1 25.

BARCLAY (A. W.) M. D.,

Assistant Physician to St. George's Hospital, &c.

A MANUAL OF MEDICAL DIAGNOSIS; being an Analysis of the Signs and Symptoms of Disease. In one neat octavo volume, extra cloth, of 424 pages. \$2 00. (*A new work, now ready.*)

Of works exclusively devoted to this important branch, our profession has at command, comparatively, but few, and, therefore, in the publication of the present work, Messrs. Blanchard & Lea have conferred a great favor upon us. Dr. Barclay, from having occupied, for a long period, the position of Medical Registrar at St. George's Hospital, possessed advantages for correct observation and reliable conclusions, as to the significance of symptoms, which have fallen to the lot of but few, either in his own or any other country. He has carefully systematized the results of his observation of over twelve thousand patients, and by his diligence and judicious classification, the profession has been presented with the most convenient and reliable work on the subject of Diagnosis that it has been our good fortune ever to examine; we can, therefore, say of Dr. Barclay's work, that, from his systematic manner of arrangement, his work is one of the best works "for reference" in the daily emergencies of the practitioner, with which we are acquainted; but, at the same time, we would recommend our readers, especially the younger ones, to read thoroughly and study diligently the *whole* work, and the "emergencies" will not occur so often.—*Southern Med. and Surg. Journ.*, March, 1858.

To give this information, to supply this admitted

deficiency, is the object of Dr. Barclay's Manual. The task of composing such a work is neither an easy nor a light one; but Dr. Barclay has performed it in a manner which meets our most unqualified approbation. He is no mere theorist; he knows his work thoroughly, and in attempting to perform it, has not exceeded his powers.—*British Med. Journal*, Dec. 5, 1857.

We venture to predict that the work will be deservedly popular, and soon become, like Watson's Practice, an indispensable necessity to the practitioner.—*N. A. Med. Journal*, April, 1858.

An inestimable work of reference for the young practitioner and student.—*Nashville Med. Journal*, May, 1858.

We hope the volume will have an extensive circulation, not among students of medicine only, but practitioners also. They will never regret a faithful study of its pages.—*Cincinnati Lancet*, Mar. '58.

This Manual of Medical Diagnosis is one of the most scientific, useful, and instructive works of its kind that we have ever read, and Dr. Barclay has done good service to medical science in collecting, arranging, and analyzing the signs and symptoms of so many diseases.—*N. J. Med. and Surg. Reporter*, March, 1858.

BARLOW (GEORGE H.), M. D.

Physician to Guy's Hospital, London, &c.

A MANUAL OF THE PRACTICE OF MEDICINE. With Additions by D.

F. CONDIE, M. D., author of "A Practical Treatise on Diseases of Children," &c. In one handsome octavo volume, leather, of over 600 pages. \$2 75.

We recommend Dr. Barlow's Manual in the warmest manner as a most valuable vade-mecum. We have had frequent occasion to consult it, and have found it clear, concise, practical, and sound. It is eminently a practical work, containing all that is essential, and avoiding useless theoretical discussion. The work supplies what has been for some time wanting, a manual of practice based upon modern discoveries in pathology and rational views of treatment of disease. It is especially intended for the use of students and junior practitioners, but it

will be found hardly less useful to the experienced physician. The American editor has added to the work three chapters—on Cholera Infantum, Yellow Fever, and Cerebro-spinal Meningitis. These additions, the two first of which are indispensable to a work on practice destined for the profession in this country, are executed with great judgment and fidelity, by Dr. Condie, who has also succeeded happily in imitating the conciseness and clearness of style which are such agreeable characteristics of the original book.—*Boston Med. and Surg. Journal*.

BARTLETT (ELISHA), M. D.

THE HISTORY, DIAGNOSIS, AND TREATMENT OF THE FEVERS

OF THE UNITED STATES. A new and revised edition. By ALONZO CLARK, M. D., Prof. of Pathology and Practical Medicine in the N. Y. College of Physicians and Surgeons, &c. In one octavo volume, of six hundred pages, extra cloth. Price \$3 00.

It is the best work on fevers which has emanated from the American press, and the present editor has carefully availed himself of all information existing upon the subject in the Old and New World, so that the doctrines advanced are brought down to the latest date in the progress of this department of Medical Science.—*London Med. Times and Gazette*, May 2, 1857.

This excellent monograph on febrile disease, has stood deservedly high since its first publication. It will be seen that it has now reached its fourth edition under the supervision of Prof. A. Clark, a gentleman who, from the nature of his studies and pursuits, is well calculated to appreciate and discuss the many intricate and difficult questions in patho-

logy. His annotations add much to the interest of the work, and have brought it well up to the condition of the science as it exists at the present day in regard to this class of diseases.—*Southern Med. and Surg. Journal*, Mar. 1857.

It is a work of great practical value and interest, containing much that is new relative to the several diseases of which it treats, and, with the additions of the editor, is fully up to the times. The distinctive features of the different forms of fever are plainly and forcibly portrayed, and the lines of demarcation carefully and accurately drawn, and to the American practitioner is a more valuable and safe guide than any work on fever extant.—*Ohio Med. and Surg. Journal*, May, 1857.

BROWN (ISAAC BAKER),

Surgeon-Accoucheur to St. Mary's Hospital, &c.

ON SOME DISEASES OF WOMEN ADMITTING OF SURGICAL TREAT-

MENT. With handsome illustrations. One vol. 8vo., extra cloth, pp. 276. \$1 60.

Mr. Brown has earned for himself a high reputation in the operative treatment of sundry diseases and injuries to which females are peculiarly subject. We can truly say of his work that it is an important addition to obstetrical literature. The operative suggestions and contrivances which Mr. Brown describes, exhibit much practical sagacity and skill,

and merit the careful attention of every surgeon-accoucheur.—*Association Journal*.

We have no hesitation in recommending this book to the careful attention of all surgeons who make female complaints a part of their study and practice.—*Dublin Quarterly Journal*.

CARPENTER (WILLIAM B.), M. D., F. R. S., &c.,

Examiner in Physiology and Comparative Anatomy in the University of London.

PRINCIPLES OF HUMAN PHYSIOLOGY; with their chief applications to

Psychology, Pathology, Therapeutics, Hygiene, and Forensic Medicine. A new American, from the last and revised London edition. With nearly three hundred illustrations. Edited, with additions, by FRANCIS GURNEY SMITH, M. D., Professor of the Institutes of Medicine in the Pennsylvania Medical College, &c. In one very large and beautiful octavo volume, of about nine hundred large pages, handsomely printed and strongly bound in leather, with raised bands. \$4 25.

In the preparation of this new edition, the author has spared no labor to render it, as heretofore, a complete and lucid exposition of the most advanced condition of its important subject. The amount of the additions required to effect this object thoroughly, joined to the former large size of the volume, presenting objections arising from the unwieldy bulk of the work, he has omitted all those portions not bearing directly upon HUMAN PHYSIOLOGY, designing to incorporate them in his forthcoming Treatise on GENERAL PHYSIOLOGY. As a full and accurate text-book on the Physiology of Man, the work in its present condition therefore presents even greater claims upon the student and physician than those which have heretofore won for it the very wide and distinguished favor which it has so long enjoyed. The additions of Prof. Smith will be found to supply whatever may have been wanting to the American student, while the introduction of many new illustrations, and the most careful mechanical execution, render the volume one of the most attractive as yet issued.

For upwards of thirteen years Dr. Carpenter's work has been considered by the profession generally, both in this country and England, as the most valuable compendium on the subject of physiology in our language. This distinction it owes to the high attainments and unwearied industry of its accomplished author. The present edition (which, like the last American one, was prepared by the author himself), is the result of such extensive revision, that it may almost be considered a new work. We need hardly say, in concluding this brief notice, that while the work is indispensable to every student of medicine in this country, it will amply repay the practitioner for its perusal by the interest and value of its contents.—*Boston Med. and Surg. Journal*.

This is a standard work—the text-book used by all medical students who read the English language. It has passed through several editions in order to keep pace with the rapidly growing science of Physiology. Nothing need be said in its praise, for its merits are universally known; we have nothing to say of its defects, for they only appear where the science of which it treats is incomplete.—*Western Lancet*.

The most complete exposition of physiology which any language can at present give.—*Brit. and For. Med.-Chirurg. Review*.

The greatest, the most reliable, and the best book on the subject which we know of in the English language.—*Stethoscope*.

To eulogize this great work would be superfluous. We should observe, however, that in this edition the author has remodelled a large portion of the former, and the editor has added much matter of interest, especially in the form of illustrations. We may confidently recommend it as the most complete work on Human Physiology in our language.—*Southern Med. and Surg. Journal*, December, 1855.

The most complete work on the science in our language.—*Am. Med. Journal*.

The most complete work now extant in our language.—*N. O. Med. Register*.

The best text-book in the language on this extensive subject.—*London Med. Times*.

A complete cyclopædia of this branch of science.—*N. Y. Med. Times*.

The profession of this country, and perhaps also of Europe, have anxiously and for some time awaited the announcement of this new edition of Carpenter's Human Physiology. His former editions have for many years been almost the only text-book on Physiology in all our medical schools, and its circulation among the profession has been unsurpassed by any work in any department of medical science.

It is quite unnecessary for us to speak of this work as its merits would justify. The mere announcement of its appearance will afford the highest pleasure to every student of Physiology, while its perusal will be of infinite service in advancing physiological science.—*Ohio Med. and Surg. Journ.*

BY THE SAME AUTHOR. (Lately Issued.)

PRINCIPLES OF COMPARATIVE PHYSIOLOGY. New American, from

the Fourth and Revised London edition. In one large and handsome octavo volume, with over three hundred beautiful illustrations. pp. 752. Extra cloth, \$4 80; leather, raised bands, \$5 25.

The delay which has existed in the appearance of this work has been caused by the very thorough revision and remodelling which it has undergone at the hands of the author, and the large number of new illustrations which have been prepared for it. It will, therefore, be found almost a new work, and fully up to the day in every department of the subject, rendering it a reliable text-book for all students engaged in this branch of science. Every effort has been made to render its typographical finish and mechanical execution worthy of its exalted reputation, and creditable to the mechanical arts of this country.

This book should not only be read but thoroughly studied by every member of the profession. None are too wise or old, to be benefited thereby. But especially to the younger class would we cordially commend it as best fitted of any work in the English language to qualify them for the reception and comprehension of those truths which are daily being developed in physiology.—*Medical Counsellor*.

Without pretending to it, it is an encyclopedia of the subject, accurate and complete in all respects—a truthful reflection of the advanced state at which the science has now arrived.—*Dublin Quarterly Journal of Medical Science*.

A truly magnificent work—in itself a perfect physiological study.—*Ranking's Abstract*.

This work stands without its fellow. It is one few men in Europe could have undertaken; it is one

no man, we believe, could have brought to so successful an issue as Dr. Carpenter. It required for its production a physiologist at once deeply read in the labors of others, capable of taking a general, critical, and unprejudiced view of those labors, and of combining the varied, heterogeneous materials at his disposal, so as to form an harmonious whole.

We feel that this abstract can give the reader a very imperfect idea of the fulness of this work, and no idea of its unity, of the admirable manner in which material has been brought, from the most various sources, to conduce to its completeness, of the lucidity of the reasoning it contains, or of the clearness of language in which the whole is clothed. Not the profession only, but the scientific world at large, must feel deeply indebted to Dr. Carpenter for this great work. It must, indeed, add largely even to his high reputation.—*Medical Times*.

CARPENTER (WILLIAM B.), M. D., F. R. S.,

Examiner in Physiology and Comparative Anatomy in the University of London.

THE MICROSCOPE AND ITS REVELATIONS. With an Appendix containing the Applications of the Microscope to Clinical Medicine, &c. By F. G. SMITH, M. D. Illustrated by four hundred and thirty-four beautiful engravings on wood. In one large and very handsome octavo volume, of 724 pages, extra cloth, \$4 00; leather, \$4 50.

Dr. Carpenter's position as a microscopist and physiologist, and his great experience as a teacher eminently qualify him to produce what has long been wanted—a good text-book on the practical use of the microscope. In the present volume his object has been, as stated in his Preface, “to combine, within a moderate compass, that information with regard to the use of his ‘tools,’ which is most essential to the working microscopist, with such an account of the objects best fitted for his study, as might qualify him to comprehend what he observes, and might thus prepare him to benefit science, whilst expanding and refreshing his own mind.” That he has succeeded in accomplishing this, no one acquainted with his previous labors can doubt.

The great importance of the microscope as a means of diagnosis, and the number of microscopists who are also physicians, have induced the American publishers, with the author's approval, to add an Appendix, carefully prepared by Professor Smith, on the applications of the instrument to clinical medicine, together with an account of American Microscopes, their modifications and accessories. This portion of the work is illustrated with nearly one hundred wood-cuts, and, it is hoped, will adapt the volume more particularly to the use of the American student.

Every care has been taken in the mechanical execution of the work, which is confidently presented as in no respect inferior to the choicest productions of the London press.

The mode in which the author has executed his intentions may be gathered from the following condensed synopsis of the

CONTENTS.

INTRODUCTION—History of the Microscope. CHAP. I. Optical Principles of the Microscope. CHAP. II. Construction of the Microscope. CHAP. III. Accessory Apparatus. CHAP. IV. Management of the Microscope. CHAP. V. Preparation, Mounting, and Collection of Objects. CHAP. VI. Microscopic Forms of Vegetable Life—Protophytes. CHAP. VII. Higher Cryptogamia. CHAP. VIII. Phanerogamic Plants. CHAP. IX. Microscopic Forms of Animal Life—Protozoa—Animalcules. CHAP. X. Foraminifera, Polycystina, and Sponges. CHAP. XI. Zoophytes. CHAP. XII. Echinodermata. CHAP. XIII. Polyzoa and Compound Tunicata. CHAP. XIV. Molluscous Animals Generally. CHAP. XV. Annulosa. CHAP. XVI. Crustacea. CHAP. XVII. Insects and Arachnida. CHAP. XVIII. Vertebrated Animals. CHAP. XIX. Applications of the Microscope to Geology. CHAP. XX. Inorganic or Mineral Kingdom—Polarization. APPENDIX. Microscope as a means of Diagnosis—Injections—Microscopes of American Manufacture.

Those who are acquainted with Dr. Carpenter's previous writings on Animal and Vegetable Physiology, will fully understand how vast a store of knowledge he is able to bring to bear upon so comprehensive a subject as the revelations of the microscope; and even those who have no previous acquaintance with the construction or uses of this instrument, will find abundance of information conveyed in clear and simple language.—*Med. Times and Gazette.*

Although originally not intended as a strictly

medical work, the additions by Prof. Smith give it a positive claim upon the profession, for which we doubt not he will receive their sincere thanks. Indeed, we know not where the student of medicine will find such a complete and satisfactory collection of microscopic facts bearing upon physiology and practical medicine as is contained in Prof. Smith's appendix; and this of itself, it seems to us, is fully worth the cost of the volume.—*Louisville Medical Review*, Nov. 1856.

BY THE SAME AUTHOR.

ELEMENTS (OR MANUAL) OF PHYSIOLOGY, INCLUDING PHYSIOLOGICAL ANATOMY. Second American, from a new and revised London edition. With one hundred and ninety illustrations. In one very handsome octavo volume, leather. pp. 566. \$3 00.

In publishing the first edition of this work, its title was altered from that of the London volume, by the substitution of the word “Elements” for that of “Manual,” and with the author's sanction the title of “Elements” is still retained as being more expressive of the scope of the treatise.

To say that it is the best manual of Physiology now before the public, would not do sufficient justice to the author.—*Buffalo Medical Journal.*

In his former works it would seem that he had exhausted the subject of Physiology. In the present, he gives the essence, as it were, of the whole.—*N. Y. Journal of Medicine.*

Those who have occasion for an elementary treatise on Physiology, cannot do better than to possess themselves of the manual of Dr. Carpenter.—*Medical Examiner.*

The best and most complete exposé of modern Physiology, in one volume, extant in the English language.—*St. Louis Medical Journal.*

BY THE SAME AUTHOR. (Preparing.)

PRINCIPLES OF GENERAL PHYSIOLOGY, INCLUDING ORGANIC CHEMISTRY AND HISTOLOGY. With a General Sketch of the Vegetable and Animal Kingdom. In one large and very handsome octavo volume, with several hundred illustrations.

The subject of general physiology having been omitted in the last editions of the author's “Comparative Physiology” and “Human Physiology,” he has undertaken to prepare a volume which shall present it more thoroughly and fully than has yet been attempted, and which may be regarded as an introduction to his other works.

BY THE SAME AUTHOR.

A PRIZE ESSAY ON THE USE OF ALCOHOLIC LIQUORS IN HEALTH AND DISEASE. New edition, with a Preface by D. F. CONDIE, M. D., and explanations of scientific words. In one neat 12mo. volume, extra cloth. pp. 178. 50 cents.

CONDIE (D. F.), M. D., &c.

A PRACTICAL TREATISE ON THE DISEASES OF CHILDREN. Fifth edition, revised and augmented. In one large volume, 8vo., leather, of over 750 pages. \$3 25. (*Now Ready*, December, 1855.)

In presenting a new and revised edition of this favorite work, the publishers have only to state that the author has endeavored to render it in every respect "a complete and faithful exposition of the pathology and therapeutics of the maladies incident to the earlier stages of existence—a full and exact account of the diseases of infancy and childhood." To accomplish this he has subjected the whole work to a careful and thorough revision, rewriting a considerable portion, and adding several new chapters. In this manner it is hoped that any deficiencies which may have previously existed have been supplied, that the recent labors of practitioners and observers have been thoroughly incorporated, and that in every point the work will be found to maintain the high reputation it has enjoyed as a complete and thoroughly practical book of reference in infantile affections.

A few notices of previous editions are subjoined.

Dr. Condie's scholarship, acumen, industry, and practical sense are manifested in this, as in all his numerous contributions to science.—*Dr. Holmes's Report to the American Medical Association.*

Taken as a whole, in our judgment, Dr. Condie's Treatise is the one from the perusal of which the practitioner in this country will rise with the greatest satisfaction.—*Western Journal of Medicine and Surgery.*

One of the best works upon the Diseases of Children in the English language.—*Western Lancet.*

We feel assured from actual experience that no physician's library can be complete without a copy of this work.—*N. Y. Journal of Medicine.*

A veritable pædiatric encyclopædia, and an honor to American medical literature.—*Ohio Medical and Surgical Journal.*

We feel persuaded that the American medical profession will soon regard it not only as a very good, but as the VERY BEST "Practical Treatise on the Diseases of Children."—*American Medical Journal.*

In the department of infantile therapeutics, the work of Dr. Condie is considered one of the best which has been published in the English language.—*The Stethoscope.*

We pronounced the first edition to be the best work on the diseases of children in the English language, and, notwithstanding all that has been published, we still regard it in that light.—*Medical Examiner.*

The value of works by native authors on the diseases which the physician is called upon to combat, will be appreciated by all; and the work of Dr. Condie has gained for itself the character of a safe guide for students, and a useful work for consultation by those engaged in practice.—*N. Y. Med. Times.*

This is the fourth edition of this deservedly popular treatise. During the interval since the last edition, it has been subjected to a thorough revision by the author; and all new observations in the pathology and therapeutics of children have been included in the present volume. As we said before, we do not know of a better book on diseases of children, and to a large part of its recommendations we yield an unhesitating concurrence.—*Buffalo Med. Journal.*

Perhaps the most full and complete work now before the profession of the United States; indeed, we may say in the English language. It is vastly superior to most of its predecessors.—*Transylvania Med. Journal.*

CHRISTISON (ROBERT), M. D., V. P. R. S. E., &c.

A DISPENSATORY; or, Commentary on the Pharmacopœias of Great Britain and the United States; comprising the Natural History, Description, Chemistry, Pharmacy, Actions, Uses, and Doses of the Articles of the *Materia Medica*. Second edition, revised and improved, with a Supplement containing the most important New Remedies. With copious Additions, and two hundred and thirteen large wood-engravings. By R. EGLESFELD GRIFFITH, M. D. In one very large and handsome octavo volume, leather, raised bands, of over 1000 pages. \$3 50.

COOPER (BRANSBY B.), F. R. S.

LECTURES ON THE PRINCIPLES AND PRACTICE OF SURGERY. In one very large octavo volume, extra cloth, of 750 pages. \$3 00.

COOPER ON DISLOCATIONS AND FRACTURES OF THE JOINTS.—Edited by BRANSBY B. COOPER, F. R. S., &c. With additional Observations by Prof. J. C. WARREN. A new American edition. In one handsome octavo volume, extra cloth, of about 500 pages, with numerous illustrations on wood. \$3 25.

COOPER ON THE ANATOMY AND DISEASES OF THE BREAST, with twenty-five Miscellaneous and Surgical Papers. One large volume, imperial 8vo., extra cloth, with 252 figures, on 36 plates. \$2 50.

COOPER ON THE STRUCTURE AND DISEASES OF THE TESTIS, AND ON THE THYMUS GLAND. One vol. imperial 8vo., extra cloth, with 177 figures on 29 plates. \$2 00.

COPLAND ON THE CAUSES, NATURE, AND TREATMENT OF PALSY AND APOPLEXY. In one volume, royal 12mo., extra cloth. pp. 326. 80 cents.

CLYMER ON FEVERS; THEIR DIAGNOSIS, PATHOLOGY, AND TREATMENT In one octavo volume, leather, of 600 pages. \$1 50.

COLOMBAT DE L'ISERE ON THE DISEASES OF FEMALES, and on the special Hygiene of their Sex. Translated, with many Notes and Additions, by C. D. MEIGS, M. D. Second edition, revised and improved. In one large volume, octavo, leather, with numerous wood-cuts. pp. 720. \$3 50.

CARSON (JOSEPH), M. D.,

Professor of *Materia Medica* and Pharmacy in the University of Pennsylvania.

SYNOPSIS OF THE COURSE OF LECTURES ON MATERIA MEDICA AND PHARMACY, delivered in the University of Pennsylvania. Second and revised edition. In one very neat octavo volume, extra cloth, of 208 pages. \$1 50.

CURLING (T. B.), F. R. S.,

Surgeon to the London Hospital, President of the Hunterian Society, &c.

A PRACTICAL TREATISE ON DISEASES OF THE TESTIS, SPERMATIC CORD, AND SCROTUM. Second American, from the second and enlarged English edition. In one handsome octavo volume, extra cloth, with numerous illustrations. pp. 420. \$2 00.

CHURCHILL (FLEETWOOD), M. D., M. R. I. A.

ON THE THEORY AND PRACTICE OF MIDWIFERY. Edited, with Notes and Additions, by D. FRANCIS CONDIE, M. D., author of a "Practical Treatise on the Diseases of Children," &c. With 139 illustrations. In one very handsome octavo volume, leather. pp. 510. \$3 00.

To bestow praise on a book that has received such marked approbation would be superfluous. We need only say, therefore, that if the first edition was thought worthy of a favorable reception by the medical public, we can confidently affirm that this will be found much more so. The lecturer, the practitioner, and the student, may all have recourse to its pages, and derive from their perusal much interest and instruction in everything relating to theoretical and practical midwifery.—*Dublin Quarterly Journal of Medical Science.*

A work of very great merit, and such as we can confidently recommend to the study of every obstetric practitioner.—*London Medical Gazette.*

This is certainly the most perfect system extant. It is the best adapted for the purposes of a text-book, and that which he whose necessities confine him to one book, should select in preference to all others.—*Southern Medical and Surgical Journal.*

The most popular work on midwifery ever issued from the American press.—*Charleston Med. Journal.*

Were we reduced to the necessity of having but one work on midwifery, and permitted to choose, we would unhesitatingly take Churchill.—*Western Med. and Surg. Journal.*

It is impossible to conceive a more useful and elegant manual than Dr. Churchill's Practice of Midwifery.—*Provincial Medical Journal.*

Certainly, in our opinion, the very best work on the subject which exists.—*N. Y. Analyst.*

BY THE SAME AUTHOR. (*Just Issued.*)

ON THE DISEASES OF INFANTS AND CHILDREN. Second American Edition, revised and enlarged by the author. Edited, with Notes, by W. V. KEATING, M. D. In one large and handsome volume, extra cloth, of over 700 pages. \$3 00, or in leather, \$3 25.

In preparing this work a second time for the American profession, the author has spared no labor in giving it a very thorough revision, introducing several new chapters, and rewriting others, while every portion of the volume has been subjected to a severe scrutiny. The efforts of the American editor have been directed to supplying such information relative to matters peculiar to this country as might have escaped the attention of the author, and the whole may, therefore, be safely pronounced one of the most complete works on the subject accessible to the American Profession. By an alteration in the size of the page, these very extensive additions have been accommodated without unduly increasing the size of the work.

This work contains a vast amount of interesting matter, which is so well arranged and so curiously worded that the book may be regarded as an encyclopædia of information upon the subject of which it treats. It is certainly also a monument of Dr. Churchill's untiring industry, inasmuch as there is not a single work upon the diseases of children with which we are acquainted that is not fully referred to and quoted from in its pages, and scarcely a contribution of the least importance to any British or Foreign Medical Journal, for some years past, which is not duly noticed.—*London Lancet*, Feb. 20, 1858.

Availing himself of every fresh source of information, Dr. Churchill endeavored, with his accustomed industry and perseverance, to bring his work up to the present state of medical knowledge in all the subjects of which it treats; and in this endeavor he has, we feel bound to say, been eminently successful. Besides the addition of more than one hundred and thirty pages of matter, we observe that some entirely new and important chapters are introduced, viz: on paralysis, syphilis, phthisis, sclerema, &c. &c. As the work now stands, it is, we believe, the most comprehensive in the English language upon the diseases incident to early life.—*Dublin Quarterly Journal*, Feb. 1858.

It brings before the reader an amount of information not comprised in any similar production in the language. The amount of labor consumed upon its production can only be conceived by those who have been similarly occupied, every work of note published within the last twenty-five years in the different languages of Europe having been laid under

No work holds a higher position, or is more deserving of being placed in the hands of the tyro, the advanced student, or the practitioner.—*Medical Examiner.*

Previous editions, under the editorial supervision of Prof. R. M. Huston, have been received with marked favor, and they deserved it; but this, reprinted from a very late Dublin edition, carefully revised and brought up by the author to the present time, does present an unusually accurate and able exposition of every important particular embraced in the department of midwifery. * * The clearness, directness, and precision of its teachings, together with the great amount of statistical research which its text exhibits, have served to place it already in the foremost rank of works in this department of remedial science.—*N. O. Med. and Surg. Journal.*

In our opinion, it forms one of the best if not the very best text-book and epitome of obstetric science which we at present possess in the English language.—*Monthly Journal of Medical Science.*

The clearness and precision of style in which it is written, and the great amount of statistical research which it contains, have served to place it in the first rank of works in this department of medical science.—*N. Y. Journal of Medicine.*

Few treatises will be found better adapted as a text-book for the student, or as a manual for the frequent consultation of the young practitioner.—*American Medical Journal.*

contribution for the illustration of its topics. The material thus derived has been used with consummate skill, and the result has been a work creditable alike to the author and his country.—*N. A. Medico-Chir. Review*, May, 1858.

After this meagre, and we know, very imperfect notice of Dr. Churchill's work, we shall conclude by saying, that it is one that cannot fail from its copiousness, extensive research, and general accuracy, to exalt still higher the reputation of the author in this country. The American reader will be particularly pleased to find that Dr. Churchill has done full justice throughout his work to the various American authors on this subject. The names of Dewees, Eberle, Condie, and Stewart, occur on nearly every page, and these authors are constantly referred to by the author in terms of the highest praise, and with the most liberal courtesy.—*The Medical Examiner.*

We recommend the work of Dr. Churchill most cordially, both to students and practitioners, as a valuable and reliable guide in the treatment of the diseases of children.—*Am. Journ. of the Med. Sciences.*

We know of no work on this department of Practical Medicine which presents so candid and unprejudiced a statement or posing up of our actual knowledge as this.—*N. Y. Journal of Medicine.*

Its claims to merit both as a scientific and practical work, are of the highest order. Whilst we would not elevate it above every other treatise on the same subject, we certainly believe that very few are equal to it, and none superior.—*Southern Med. and Surgical Journal.*

BY THE SAME AUTHOR.

ESSAYS ON THE PUERPERAL FEVER, AND OTHER DISEASES PECULIAR TO WOMEN. Selected from the writings of British Authors previous to the close of the Eighteenth Century. In one neat octavo volume, extra cloth, of about 450 pages. \$2 50.

CHURCHILL (FLEETWOOD), M. D., M. R. I. A., &c.

ON THE DISEASES OF WOMEN; including those of Pregnancy and Child-bed. A new American edition, revised by the Author. With Notes and Additions, by D. FRANCIS CONDIE, M. D., author of "A Practical Treatise on the Diseases of Children." With numerous illustrations. In one large and handsome octavo volume, leather, of 768 pages. (*Just Issued*, 1857.) \$3 00.

This edition of Dr. Churchill's very popular treatise may almost be termed a new work, so thoroughly has he revised it in every portion. It will be found greatly enlarged, and thoroughly brought up to the most recent condition of the subject, while the very handsome series of illustrations introduced, representing such pathological conditions as can be accurately portrayed, present a novel feature, and afford valuable assistance to the young practitioner. Such additions as appeared desirable for the American student have marked improvement in the mechanical execution which the volume has undergone, while the price has been kept at the former very moderate rate.

It comprises, unquestionably, one of the most exact and comprehensive expositions of the present state of medical knowledge in respect to the diseases of women that has yet been published.—*Am. Journ. Med. Sciences*, July, 1857.

We hail with much pleasure the volume before us, thoroughly revised, corrected, and brought up to the latest date, by Dr. Churchill himself, and rendered still more valuable by notes, from the experienced and able pen of Dr. D. F. Condie, of Philadelphia.—*Southern Med. and Surg. Journal*, Oct. 1857.

This work is the most reliable which we possess on this subject; and is deservedly popular with the profession.—*Charleston Med. Journal*, July, 1857.

Dr. Churchill's treatise on the *Diseases of Women* is, perhaps, the most popular of his works with the profession in this country. It has been very generally received both as a text-book and manual of practice. The present edition has undergone the most elaborate revision, and additions of an important character have been made, to render it a complete exponent of the present state of our knowledge of these diseases.—*N. Y. Journ. of Med.*, Sept. 1857.

We now regretfully take leave of Dr. Churchill's book. Had our typographical limits permitted, we should gladly have borrowed more from its richly stored pages. In conclusion, we heartily recommend it to the profession, and would at the same time express our firm conviction that it will not only add to the reputation of its author, but will prove a work of great and extensive utility to obstetric practitioners.—*Dublin Medical Press*.

We know of no author who deserves that approbation, on "the diseases of females," to the same

extent that Dr. Churchill does. His, indeed, is the only thorough treatise we know of on the subject; and it may be commended to practitioners and students as a masterpiece in its particular department. The former editions of this work have been commended strongly in this journal, and they have won their way to an extended, and a well-deserved popularity. This fifth edition, before us, is well calculated to maintain Dr. Churchill's high reputation. It was revised and enlarged by the author, for his American publishers, and it seems to us that there is scarcely any species of desirable information on its subjects that may not be found in this work.—*The Western Journal of Medicine and Surgery*.

We are gratified to announce a new and revised edition of Dr. Churchill's valuable work on the diseases of females. We have ever regarded it as one of the very best works on the subjects embraced within its scope, in the English language; and the present edition, enlarged and revised by the author, renders it still more entitled to the confidence of the profession. The valuable notes of Prof. Huston have been retained, and contribute, in no small degree, to enhance the value of the work. It is a source of congratulation that the publishers have permitted the author to be, in this instance, his own editor, thus securing all the revision which an author alone is capable of making.—*The Western Lancet*.

As a comprehensive manual for students, or a work of reference for practitioners, we only speak with common justice when we say that it surpasses any other that has ever issued on the same subject from the British press.—*The Dublin Quarterly Journal*.

DICKSON (S. H.), M. D.,

Professor of Practice of Medicine in the Jefferson Medical College, Philadelphia.

ELEMENTS OF MEDICINE; a Compendious View of Pathology and Therapeutics, or the History and Treatment of Diseases. In one large and handsome octavo volume, of 750 pages, leather. \$3 75.

As an American text-book on the Practice of Medicine for the student, and as a condensed work of reference for the practitioner, this volume will have strong claims on the attention of the profession. Few physicians have had wider opportunities than the author for observation and experience, and few perhaps have used them better. As the result of a life of study and practice, therefore, the present volume will doubtless be received with the welcome it deserves.

This book is eminently what it professes to be; a distinguished merit in these days. Designed for "Teachers and Students of Medicine," and admirably suited to their wants, we think it will be received, on its own merits, with a hearty welcome.—*Boston Med. and Surg. Journal*.

Indited by one of the most accomplished writers of our country, as well as by one who has long held a high position among teachers and practitioners of medicine, this work is entitled to patronage and careful study. The learned author has endeavored to condense in this volume most of the practical matter contained in his former productions, so as to adapt it to the use of those who have not time to devote to more extensive works.—*Southern Med. and Surg. Journal*.

Prof. Dickson's work supplies, to a great extent, a desideratum long felt in American medicine.—*N. O. Med. and Surg. Journal*.

Estimating this work according to the purpose for which it is designed, we must think highly of its

merits, and we have no hesitation in predicting for it a favorable reception by both students and teachers.

Not professing to be a complete and comprehensive treatise, it will not be found full in detail, nor filled with discussions of theories and opinions, but embracing all that is essential in theory and practice, it is admirably adapted to the wants of the American student. Avoiding all that is uncertain, it presents more clearly to the mind of the reader that which is established and verified by experience. The varied and extensive reading of the author is conspicuously apparent, and all the recent improvements and discoveries in therapeutics and pathology are chronicled in its pages.—*Charleston Med. Journal*.

In the first part of the work the subject of general pathology is presented in outline, giving a beautiful picture of its distinguishing features, and throughout the succeeding chapters we find that he has kept scrupulously within the bounds of sound reasoning and legitimate deduction. Upon the whole, we do not hesitate to pronounce it a superior work in its class, and that Dr. Dickson merits a place in the first rank of American writers.—*Western Lancet*.

DRUITT (ROBERT), M. R. C. S., &c.

THE PRINCIPLES AND PRACTICE OF MODERN SURGERY. Edited by F. W. SARGENT, M. D., author of "Minor Surgery," &c. Illustrated with one hundred and ninety-three wood-engravings. In one very handsomely printed octavo volume, leather, of 576 large pages. \$3 00.

Dr. Drutt's researches into the literature of his subject have been not only extensive, but well directed; the most discordant authors are fairly and impartially quoted, and, while due credit is given to each, their respective merits are weighed with an unprejudiced hand. The grain of wheat is preserved, and the chaff is unmercifully stripped off. The arrangement is simple and philosophical, and the style, though clear and interesting, is so precise, that the book contains more information condensed into a few words than any other surgical work with which we are acquainted.—*London Medical Times and Gazette.*

Drutt's Surgery is too well known to the American medical profession to require its announcement anywhere. Probably no work of the kind has ever been more cordially received and extensively circulated than this. The fact that it comprehends in a comparatively small compass, all the essential ele-

ments of theoretical and practical Surgery—that it is found to contain reliable and authentic information on the nature and treatment of nearly all surgical affections—is a sufficient reason for the liberal patronage it has obtained. The editor, Dr. F. W. Sargent, has contributed much to enhance the value of the work, by such American improvements as are calculated more perfectly to adapt it to our own views and practice in this country. It abounds everywhere with spirited and life-like illustrations, which to the young surgeon, especially, are of no minor consideration. Every medical man frequently needs just such a work as this, for immediate reference in moments of sudden emergency, when he has not time to consult more elaborate treatises.—*The Ohio Medical and Surgical Journal.*

No work, in our opinion, equals it in presenting so much valuable surgical matter in so small a compass.—*St. Louis Med. and Surgical Journal.*

DALTON, JR. (J. C.), M. D.

Professor of Physiology in the College of Physicians, New York.

A TREATISE ON HUMAN PHYSIOLOGY, designed for the use of Students and Practitioners of Medicine. With two hundred and fifty-four illustrations on wood. In one very beautiful octavo volume, of over 600 pages, extra cloth, \$4 00; leather, raised bands, \$4 25. (Now ready, Jan. 1859.)

The object of the author has been to present a condensed view of the present condition of his subject, divested of mere theoretical views and hypothetical reasonings, but comprehending all important details which may be received as definitely settled. His long experience as an investigator and as a teacher has given him peculiar advantages in this, and he has endeavored wherever practicable to show the means by which results have been reached, so as to afford the student the means of pursuing original research, as well as a complete text-book of the science in its most advanced condition. Of the numerous illustrations, all are original with the exception of eleven, so that the whole possesses a completeness and authority not otherwise attainable, and in the mechanical execution every care has been taken to present one of the handsomest volumes as yet produced by the American press.

To our mind, fulfils in a most admirable manner the objects contemplated by the author. The broad field of physiology has been traversed with discrimination, and its most valuable acquisitions com-

pressed into a reasonable compass, embracing likewise the results of recent laborers in this department of our science.—*Med. and Surg. Reporter*, Jan. 29, 1859.

DUNGLISON, FORBES, TWEEDIE, AND CONOLLY.

THE CYCLOPÆDIA OF PRACTICAL MEDICINE: comprising Treatises on the Nature and Treatment of Diseases, Materia Medica, and Therapeutics, Diseases of Women and Children, Medical Jurisprudence, &c. &c. In four large super-royal octavo volumes; of 3254 double-columned pages, strongly and handsomely bound, with raised bands. \$12 00.

. This work contains no less than four hundred and eighteen distinct treatises, contributed by sixty-eight distinguished physicians, rendering it a complete library of reference for the country practitioner.

The most complete work on Practical Medicine extant; or, at least, in our language.—*Buffalo Medical and Surgical Journal.*

For reference, it is above all price to every practitioner.—*Western Lancet.*

One of the most valuable medical publications of the day—as a work of reference it is invaluable.—*Western Journal of Medicine and Surgery.*

It has been to us, both as learner and teacher, a work for ready and frequent reference, one in which modern English medicine is exhibited in the most advantageous light.—*Medical Examiner.*

We rejoice that this work is to be placed within the reach of the profession in this country, it being unquestionably one of very great value to the prac-

itioner. This estimate of it has not been formed from a hasty examination, but after an intimate acquaintance derived from frequent consultation of it during the past nine or ten years. The editors are practitioners of established reputation, and the list of contributors embraces many of the most eminent professors and teachers of London, Edinburgh, Dublin, and Glasgow. It is, indeed, the great merit of this work that the principal articles have been furnished by practitioners who have not only devoted especial attention to the diseases about which they have written, but have also enjoyed opportunities for an extensive practical acquaintance with them, and whose reputation carries the assurance of their competency justly to appreciate the opinions of others, while it stamps their own doctrines with high and just authority.—*American Medical Journ.*

DEWEES'S COMPREHENSIVE SYSTEM OF MIDWIFERY. Illustrated by occasional cases and many engravings. Twelfth edition, with the author's last improvements and corrections. In one octavo volume, extra cloth, of 600 pages. \$3 20.

DEWEES'S TREATISE ON THE PHYSICAL AND MEDICAL TREATMENT OF CHILDREN. The last edition. In one volume, octavo, extra cloth, 548 pages. \$2 80.

DEWEES'S TREATISE ON THE DISEASES OF FEMALES. Tenth edition. In one volume, octavo extra cloth, 532 pages, with plates. \$3 00.

DANA ON ZOOPHYTES AND CORALS. In one volume, imperial quarto, extra cloth, with woodcuts. \$15 00. Also, AN ATLAS, in one volume, imperial folio, with sixty-one magnificent colored plates. Bound in half morocco. \$30 00.

DE LA BECHE'S GEOLOGICAL OBSERVER. In one very large and handsome octavo volume, extra cloth, of 700 pages, with 300 woodcuts. \$4 00.

FRICK ON RENAL AFFECTIONS; their Diagnosis and Pathology. With illustrations. One volume, royal 12mo., extra cloth. 75 cents.

DUNGLISON (ROBLEY), M. D.,

Professor of Institutes of Medicine in the Jefferson Medical College, Philadelphia.

NEW AND ENLARGED EDITION, Now Ready, 1858.

MEDICAL LEXICON; a Dictionary of Medical Science, containing a concise

Explanation of the various Subjects and Terms of Anatomy, Physiology, Pathology, Hygiene, Therapeutics, Pharmacology, Pharmacy, Surgery, Obstetrics, Medical Jurisprudence, Dentistry, &c. Notices of Climate and of Mineral Waters; Formulæ for Official, Empirical, and Dietetic Preparations, &c. With French and other Synonyms. FIFTEENTH EDITION, revised and very greatly enlarged. In one very large and handsome octavo volume, of 992 double-columned pages, in small type; strongly bound in leather, with raised bands. Price \$4 00.

Especial care has been devoted in the preparation of this edition to render it in every respect worthy a continuance of the very remarkable favor which it has hitherto enjoyed. The rapid sale of FIFTEEN large editions, and the constantly increasing demand, show that it is regarded by the profession as the standard authority. Stimulated by this fact, the author has endeavored in the present revision to introduce whatever might be necessary "to make it a satisfactory and desirable—if not indispensable—lexicon, in which the student may search without disappointment for every term that has been legitimated in the nomenclature of the science." To accomplish this, large additions have been found requisite, and the extent of the author's labors may be estimated from the fact that about SIX THOUSAND subjects and terms have been introduced throughout, rendering the whole number of definitions about SIXTY THOUSAND, to accommodate which, the number of pages has been increased by nearly a hundred, notwithstanding an enlargement in the size of the page. The medical press, both in this country and in England, has pronounced the work indispensable to all medical students and practitioners, and the present improved edition will not lose that enviable reputation.

The publishers have endeavored to render the mechanical execution worthy of a volume of such universal use in daily reference. The greatest care has been exercised to obtain the typographical accuracy so necessary in a work of the kind. By the small but exceedingly clear type employed, an immense amount of matter condensed in its thousand ample pages, while the binding will be found strong and durable. With all these improvements and enlargements, the price has been kept at the former very moderate rate, placing it within the reach of all.

This work, the appearance of the fifteenth edition of which, it has become our duty and pleasure to announce, is perhaps the most stupendous monument of labor and erudition in medical literature. One would hardly suppose after constant use of the preceding editions, where we have never failed to find a sufficiently full explanation of every medical term, that in this edition "about six thousand subjects and terms have been added," with a careful revision and correction of the entire work. It is only necessary to announce the advent of this edition to make it occupy the place of the preceding one on the table of every medical man, as it is without doubt the best and most comprehensive work of the kind which has ever appeared.—*Buffalo Med. Journ.*, Jan. 1858.

The work is a monument of patient research, skilful judgment, and vast physical labor, that will perpetuate the name of the author more effectually than any possible device of stone or metal. Dr. Dunglison deserves the thanks not only of the American profession, but of the whole medical world.—*North Am. Medico-Chir. Review*, Jan. 1858.

A Medical Dictionary better adapted for the wants of the profession than any other with which we are acquainted, and of a character which places it far above comparison and competition.—*Am. Journ. Med. Sciences*, Jan. 1858.

We need only say, that the addition of 6,000 new terms, with their accompanying definitions, may be said to constitute a new work, by itself. We have examined the Dictionary attentively, and are most happy to pronounce it unrivalled of its kind. The erudition displayed, and the extraordinary industry which must have been demanded, in its preparation and perfection, redound to the lasting credit of its author, and have furnished us with a volume *indispensable* at the present day, to all who would find themselves *au niveau* with the highest standards of medical information.—*Boston Medical and Surgical Journal*, Dec. 31, 1857.

Good lexicons and encyclopedic works generally, are the most labor-saving contrivances which literary men enjoy; and the labor which is required to produce them in the perfect manner of this example is something appalling to contemplate. The author

tells us in his preface that he has added about six thousand terms and subjects to this edition, which, before, was considered universally as the best work of the kind in any language.—*Silliman's Journal*, March, 1858.

He has razed his gigantic structure to the foundations, and remodelled and reconstructed the entire pile. No less than six thousand additional subjects and terms are illustrated and analyzed in this new edition, swelling the grand aggregate to beyond sixty thousand! Thus is placed before the profession a complete and thorough exponent of medical terminology, without rival or possibility of rivalry.—*Nashville Journ. of Med. and Surg.*, Jan. 1858.

It is universally acknowledged, we believe, that this work is incomparably the best and most complete Medical Lexicon in the English language. The amount of labor which the distinguished author has bestowed upon it is truly wonderful, and the learning and research displayed in its preparation are equally remarkable. Comment and commendation are unnecessary, as no one at the present day thinks of purchasing any other Medical Dictionary than this.—*St. Louis Med. and Surg. Journ.*, Jan. 1858.

It is the foundation stone of a good medical library, and should always be included in the first list of books purchased by the medical student.—*Am. Med. Monthly*, Jan. 1858.

A very perfect work of the kind, undoubtedly the most perfect in the English language.—*Med. and Surg. Reporter*, Jan. 1858.

It is now emphatically the Medical Dictionary of the English language, and for it there is no substitute.—*N. H. Med. Journ.*, Jan. 1858.

It is scarcely necessary to remark that any medical library wanting a copy of Dunglison's Lexicon must be imperfect.—*Cin. Lancet*, Jan. 1858.

We have ever considered it the best authority published, and the present edition we may safely say has no equal in the world.—*Peninsular Med. Journal*, Jan. 1858.

The most complete authority on the subject to be found in any language.—*Va. Med. Journal*, Feb. '58.

BY THE SAME AUTHOR.

THE PRACTICE OF MEDICINE. A Treatise on Special Pathology and Therapeutics. Third Edition. In two large octavo volumes, leather, of 1,500 pages. \$6 25.

DUNGLISON (ROBLEY), M. D.,

Professor of Institutes of Medicine in the Jefferson Medical College, Philadelphia.

HUMAN PHYSIOLOGY. Eighth edition. Thoroughly revised and extensively modified and enlarged, with five hundred and thirty-two illustrations. In two large and handsomely printed octavo volumes, leather, of about 1500 pages. \$7 00.

In revising this work for its eighth appearance, the author has spared no labor to render it worthy a continuance of the very great favor which has been extended to it by the profession. The whole contents have been rearranged, and to a great extent remodelled; the investigations which of late years have been so numerous and so important, have been carefully examined and incorporated, and the work in every respect has been brought up to a level with the present state of the subject. The object of the author has been to render it a concise but comprehensive treatise, containing the whole body of physiological science, to which the student and man of science can at all times refer with the certainty of finding whatever they are in search of, fully presented in all its aspects; and on no former edition has the author bestowed more labor to secure this result.

We believe that it can truly be said, no more complete repertory of facts upon the subject treated, can anywhere be found. The author has, moreover, that enviable tact at description and that facility and ease of expression which render him peculiarly acceptable to the casual, or the studious reader. This faculty, so requisite in setting forth many graver and less attractive subjects, lends additional charms to one always fascinating.—*Boston Med. and Surg. Journal*, Sept. 1856.

The most complete and satisfactory system of Physiology in the English language.—*Amer. Med. Journal*.

The best work of the kind in the English language.—*Silliman's Journal*.

The present edition the author has made a perfect mirror of the science as it is at the present hour. As a work upon physiology proper, the science of the functions performed by the body, the student will find it all he wishes.—*Nashville Journ. of Med.* Sept. 1856.

That he has succeeded, most admirably succeeded in his purpose, is apparent from the appearance of an eighth edition. It is now the great encyclopædia on the subject, and worthy of a place in every physician's library.—*Western Lancet*, Sept. 1856.

BY THE SAME AUTHOR. (*Now Ready.*)

GENERAL THERAPEUTICS AND MATERIA MEDICA; adapted for a Medical Text-book. With Indexes of Remedies and of Diseases and their Remedies. **SIXTH EDITION**, revised and improved. With one hundred and ninety-three illustrations. In two large and handsomely printed octavo vols., leather, of about 1100 pages. \$6 00.

From the Author's Preface.

"Another edition of this work being called for, the author has subjected it to a thorough and careful revision. It has been gratifying to him that it has been found so extensively useful by those for whom it was especially intended, as to require that a *sixth* edition should be issued in so short a time after the publication of a fifth. Grateful for the favorable reception of the work by the profession, he has bestowed on the preparation of the present edition all those cares which were demanded by the former editions, and has spared no pains to render it a faithful epitome of General Therapeutics and Materia Medica. The copious Indexes of Remedies and of Diseases and their Remedies cannot fail, the author conceives, to add materially to the value of the work."

This work is too widely and too favorably known to require more than the assurance that the author has revised it with his customary industry, introducing whatever has been found necessary to bring it on a level with the most advanced condition of the subject. The number of illustrations has been somewhat enlarged, and the mechanical execution of the volumes will be found to have undergone a decided improvement.

In announcing a new edition of Dr. Dunglison's *General Therapeutics and Materia Medica*, we have no words of commendation to bestow upon a work whose merits have been heretofore so often and so justly extolled. It must not be supposed, however, that the present is a mere reprint of the previous edition; the character of the author for laborious research, judicious analysis, and clearness of expression, is fully sustained by the numerous additions he has made to the work, and the careful revision to which he has subjected the whole.—*N. A. Medico-Chir. Review*, Jan. 1858.

The work will, we have little doubt, be bought and read by the majority of medical students; its size, arrangement, and reliability recommend it to all; no one, we venture to predict, will study it without profit, and there are few to whom it will not be in some measure useful as a work of reference. The young practitioner, more especially, will find the copious indexes appended to this edition of great assistance in the selection and preparation of suitable formulæ.—*Charleston Med. Journ. and Review*, Jan. 1858.

BY THE SAME AUTHOR. (*A new Edition.*)

NEW REMEDIES, WITH FORMULÆ FOR THEIR PREPARATION AND ADMINISTRATION. Seventh edition, with extensive Additions. In one very large octavo volume, leather, of 770 pages. \$3 75.

Another edition of the "New Remedies" having been called for, the author has endeavored to add everything of moment that has appeared since the publication of the last edition.

The articles treated of in the former editions will be found to have undergone considerable expansion in this, in order that the author might be enabled to introduce, as far as practicable, the results of the subsequent experience of others, as well as of his own observation and reflection; and to make the work still more deserving of the extended circulation with which the preceding editions have been favored by the profession. By an enlargement of the page, the numerous additions have been incorporated without greatly increasing the bulk of the volume.—*Preface*.

One of the most useful of the author's works.—*Southern Medical and Surgical Journal*.

This elaborate and useful volume should be found in every medical library, for as a book of reference, for physicians, it is unsurpassed by any other work in existence, and the double index for diseases and for remedies, will be found greatly to enhance its value.—*New York Med. Gazette*.

The great learning of the author, and his remarkable industry in pushing his researches into every source whence information is derivable, have enabled him to throw together an extensive mass of facts and statements, accompanied by full reference to authorities; which last feature renders the work practically valuable to investigators who desire to examine the original papers.—*The American Journal of Pharmacy*.

ERICHSEN (JOHN),

Professor of Surgery in University College, London, &c.

THE SCIENCE AND ART OF SURGERY; BEING A TREATISE ON SURGICAL INJURIES, DISEASES, AND OPERATIONS. New and improved American, from the second enlarged and carefully revised London edition. Illustrated with over four hundred engravings on wood. In one large and handsome octavo volume, of one thousand closely printed pages, leather, raised bands. \$4 50. (*Now Ready*, January, 1859.)

The very distinguished favor with which this work has been received on both sides of the Atlantic has stimulated the author to render it even more worthy of the position which it has so rapidly attained as a standard authority. Every portion has been carefully revised, numerous additions have been made, and the most watchful care has been exercised to render it a complete exponent of the most advanced condition of surgical science. In this manner the work has been enlarged by about a hundred pages, while the series of engravings has been increased by more than a hundred, rendering it one of the most thoroughly illustrated volumes before the profession. The additions of the author having rendered unnecessary most of the notes of the former American editor, but little has been added in this country; some few notes and occasional illustrations have, however, been introduced to elucidate American modes of practice.

It is, in our humble judgment, decidedly the best book of the kind in the English language. Strange that just such books are not often produced by public teachers of surgery in this country and Great Britain. Indeed, it is a matter of great astonishment, but no less true than astonishing, that of the many works on surgery republished in this country within the last fifteen or twenty years as text-books for medical students, this is the only one that even approximates to the fulfilment of the peculiar wants of young men just entering upon the study of this branch of the profession.—*Western Jour. of Med. and Surgery.*

Its value is greatly enhanced by a very copious well-arranged index. We regard this as one of the most valuable contributions to modern surgery. To one entering his novitiate of practice, we regard it the most serviceable guide which he can consult. He will find a fulness of detail leading him through every step of the operation, and not deserting him until the final issue of the case is decided. For the same reason we recommend it to those whose routine of practice lies in such parts of the country that they must

rarely encounter cases requiring surgical management.—*Stethoscope.*

Embracing, as will be perceived, the whole surgical domain, and each division of itself almost complete and perfect, each chapter full and explicit, each subject faithfully exhibited, we can only express our estimate of it in the aggregate. We consider it an excellent contribution to surgery, as probably the best single volume now extant on the subject, and with great pleasure we add it to our text-books.—*Nashville Journal of Medicine and Surgery.*

Prof. Erichsen's work, for its size, has not been surpassed; his nine hundred and eight pages, profusely illustrated, are rich in physiological, pathological, and operative suggestions, doctrines, details, and processes; and will prove a reliable resource for information, both to physician and surgeon, in the hour of peril.—*N. O. Med. and Surg. Journal.*

We are acquainted with no other work wherein so much good sense, sound principle, and practical inferences, stamp every page.—*American Lancet.*

ELLIS (BENJAMIN), M. D.

THE MEDICAL FORMULARY: being a Collection of Prescriptions, derived from the writings and practice of many of the most eminent physicians of America and Europe. Together with the usual Dietetic Preparations and Antidotes for Poisons. To which is added an Appendix, on the Endermic use of Medicines, and on the use of Ether and Chloroform. The whole accompanied with a few brief Pharmaceutic and Medical Observations. Tenth edition, revised and much extended by ROBERT P. THOMAS, M. D., Professor of Materia Medica in the Philadelphia College of Pharmacy. In one neat octavo volume, extra cloth, of 296 pages. \$1 75.

FOWNES (GEORGE), PH. D., &c.

ELEMENTARY CHEMISTRY; Theoretical and Practical. With numerous illustrations. Edited, with Additions, by ROBERT BRIDGES, M. D. In one large royal 12mo. volume, of over 550 pages, with 181 wood-cuts. In leather, \$1 50; extra cloth, \$1 35.

We know of no better text-book, especially in the difficult department of organic chemistry, upon which it is particularly full and satisfactory. We would recommend it to preceptors as a capital "office book" for their students who are beginners in Chemistry. It is copiously illustrated with excellent wood-cuts, and altogether admirably "got up."—*N. J. Medical Reporter.*

A standard manual, which has long enjoyed the reputation of embodying much knowledge in a small space. The author has achieved the difficult task of condensation with masterly tact. His book is concise without being dry, and brief without being too dogmatical or general.—*Virginia Med. and Surgical Journal.*

The work of Dr. Fownes has long been before the public, and its merits have been fully appreciated as the best text-book on chemistry now in existence. We do not, of course, place it in a rank superior to the works of Brande, Graham, Turner, Gregory, or Gmelin, but we say that, as a work for students, it is preferable to any of them.—*London Journal of Medicine.*

A work well adapted to the wants of the student. It is an excellent exposition of the chief doctrines and facts of modern chemistry. The size of the work, and still more the condensed yet perspicuous style in which it is written, absolve it from the charges very properly urged against most manuals termed popular.—*Edinburgh Journal of Medical Science.*

FISKE FUND PRIZE ESSAYS.

THE EFFECTS OF CLIMATE ON TUBERCULOUS DISEASE. By EDWIN LEE, M. R. C. S., London, and **THE INFLUENCE OF PREGNANCY ON THE DEVELOPMENT OF TUBERCLES.** By EDWARD WARREN, M. D., of Edenton, N. C. Together in one neat octavo volume, extra cloth. \$1 00. (*Just Ready.*)

FERGUSON (WILLIAM), F. R. S.,

Professor of Surgery in King's College, London, &c.

A SYSTEM OF PRACTICAL SURGERY. Fourth American, from the third and enlarged London edition. In one large and beautifully printed octavo volume, of about 700 pages, with 393 handsome illustrations, leather. \$3 00.

No work was ever written which more nearly comprehended the necessities of the student and practitioner, and was more carefully arranged to that single purpose than this.—*N. Y. Med. Journal.*

The addition of many new pages makes this work more than ever indispensable to the student and practitioner.—*Ranking's Abstract.*

FLINT (AUSTIN), M. D.,

Professor of the Theory and Practice of Medicine in the University of Louisville, &c.

*(An Important New Work.)***PHYSICAL EXPLORATION AND DIAGNOSIS OF DISEASES AFFECTING THE RESPIRATORY ORGANS.** In one large and handsome octavo volume, extra cloth, 636 pages. \$3 00.

We can only state our general impression of the high value of this work, and cordially recommend it to all. We regard it, in point both of arrangement and of the marked ability of its treatment of the subjects, as destined to take the first rank in works of this class. So far as our information extends, it has at present no equal. To the practitioner, as well as the student, it will be invaluable in clearing up the diagnosis of doubtful cases, and in shedding light upon difficult phenomena.—*Buffalo Med. Journal.*

This is the most elaborate work devoted exclusively to the physical exploration of diseases of the

lungs, with which we are acquainted in the English language.—*Boston Med. and Surg. Journal.*

A work of original observation of the highest merit. We recommend the treatise to every one who wishes to become a correct auscultator. Based to a very large extent upon cases numerically examined, it carries the evidence of careful study, and discrimination upon every page. It does credit to the author, and, through him, to the profession in this country. It is, what we cannot call every book upon auscultation, a readable book.—*Am. Jour. Med. Sciences.*

NOW COMPLETE,**GRAHAM (THOMAS), F. R. S.,****THE ELEMENTS OF INORGANIC CHEMISTRY,** including the Applications of the Science in the Arts. New and much enlarged edition, by HENRY WATTS and ROBERT BRIDGES, M. D. Complete in one large and handsome octavo volume, of over 800 very large pages, with two hundred and thirty-two wood-cuts, extra cloth. \$4 00.

* * Part II., completing the work from p. 431 to end, with Index, Title Matter, &c., may be had separate, cloth backs and paper sides. Price \$2 50.

The long delay which has intervened since the appearance of the first portion of this work, has rendered necessary an Appendix, embodying the numerous and important investigations and discoveries of the last few years in the subjects contained in Part I. This occupies a large portion of Part II., and will be found to present a complete abstract of the most recent researches in the general principles of the science, as well as all details necessary to bring the whole work thoroughly up to the present time in all departments of Inorganic Chemistry.

Gentlemen desirous of completing their copies of the work are requested to apply for Part II. without delay. It will be sent by mail, prepaid, on receipt of the amount, \$2 50.

It is a very acceptable addition to the library of standard books of every chemical student. No reader of English works on this science can afford to be without this edition of Prof. Graham's Elements.—*Silliman's Journal*, March, 1858.

From Prof. J. L. Crauconr, *New Orleans School of Medicine*, May 9, 1858.

It is beyond all question the best systematic work on Chemistry in the English language, and I am gratified to find that an American edition at a moderate price has been issued, so as to place it within the means of students. It will be the only text-book I shall now recommend to my class.

From Prof. Wolcott Gibbs, *N. Y. Free Academy*, May 25, 1858.

The work is an admirable one in all respects, and its republication here cannot fail to exert a positive influence upon the progress of science in this country.

From Prof. E. N. Horsford, *Harvard College*, April 27, 1858.

It has, in its earlier and less perfect editions, been familiar to me, and the excellence of its plan and the clearness and completeness of its discussions, have long been my admiration.

GRIFFITH (ROBERT E.), M. D., &c.**A UNIVERSAL FORMULARY,** containing the methods of Preparing and Administering Official and other Medicines. The whole adapted to Physicians and Pharmacologists. SECOND EDITION, thoroughly revised, with numerous additions, by ROBERT P. THOMAS, M. D., Professor of *Materia Medica* in the Philadelphia College of Pharmacy. In one large and handsome octavo volume, extra cloth, of 650 pages, double columns. \$3 00; or bound in sheep, \$3 25.

It was a work requiring much perseverance, and when published was looked upon as by far the best work of its kind that had issued from the American press. Prof. Thomas has certainly "improved," as well as added to this Formulary, and has rendered it additionally deserving of the confidence of pharmacologists and physicians.—*Am. Journal of Pharmacy.*

We are happy to announce a new and improved edition of this, one of the most valuable and useful works that have emanated from an American pen. It would do credit to any country, and will be found of daily usefulness to practitioners of medicine; it is better adapted to their purposes than the dispensatories.—*Southern Med. and Surg. Journal.*

It is one of the most useful books a country practitioner can possibly have in his possession.—*Medical Chronicle.*

This is a work of six hundred and fifty one pages embracing all on the subject of preparing and administering

medicines that can be desired by the physician and pharmacist.—*Western Lancet.*

The amount of useful, every-day matter, for a practicing physician, is really immense.—*Boston Med. and Surg. Journal.*

We predict a great sale for this work, and we especially recommend it to all medical teachers.—*Richmond Stethoscope.*

This edition of Dr. Griffith's work has been greatly improved by the revision and ample additions of Dr. Thomas, and is now, we believe, one of the most complete works of its kind in any language. The additions amount to about seventy pages, and no effort has been spared to include in them all the recent improvements which have been published in medical journals, and systematic treatises. A work of this kind appears to us indispensable to the physician, and there is none we can more cordially recommend.—*N. Y. Journal of Medicine.*

GLUGE (GOTTLIEB), M. D.,

Professor of Physiology and Pathological Anatomy in the University of Brussels, &c.

AN ATLAS OF PATHOLOGICAL HISTOLOGY. Translated, with Notes and Additions, by JOSEPH LEIDY, M. D., Professor of Anatomy in the University of Pennsylvania. In one volume, very large imperial quarto, extra cloth, with 320 figures, plain and colored, on twelve copperplates. \$5 00.

GROSS (SAMUEL D.), M. D.,

Professor of Surgery in the Jefferson Medical College of Philadelphia, &c.

New Edition (Now Ready.)

ELEMENTS OF PATHOLOGICAL ANATOMY. Third edition, thoroughly revised and greatly improved. In one large and very handsome octavo volume, with about three hundred and fifty beautiful illustrations, of which a large number are from original drawings. Price in extra cloth, \$4 75; leather, raised bands, \$5 25.

The very rapid advances in the Science of Pathological Anatomy during the last few years have rendered essential a thorough modification of this work, with a view of making it a correct exponent of the present state of the subject. The very careful manner in which this task has been executed, and the amount of alteration which it has undergone, have enabled the author to say that "with the many changes and improvements now introduced, the work may be regarded almost as a new treatise," while the efforts of the author have been seconded as regards the mechanical execution of the volume, rendering it one of the handsomest productions of the American press. A very large number of new and beautiful original illustrations have been introduced, and the work, it is hoped, will fully maintain the reputation hitherto enjoyed by it of a complete and practical exposition of its difficult and important subject.

We most sincerely congratulate the author on the successful manner in which he has accomplished his proposed object. His book is most admirably calculated to fill up a blank which has long been felt to exist in this department of medical literature, and as such must become very widely circulated amongst all classes of the profession.—*Dublin Quarterly Journ. of Med. Science*, Nov. 1857.

We have been favorably impressed with the general manner in which Dr. Gross has executed his task of affording a comprehensive digest of the present state of the literature of Pathological Anatomy, and have much pleasure in recommending his work to our readers, as we believe one well deserving of diligent perusal and careful study.—*Montreal Med. Chron.*, Sept. 1857.

BY THE SAME AUTHOR.

A PRACTICAL TREATISE ON THE DISEASES, INJURIES, AND MALFORMATIONS OF THE URINARY BLADDER, THE PROSTATE GLAND, AND THE URETHRA. Second Edition, revised and much enlarged, with one hundred and eighty-four illustrations. In one large and very handsome octavo volume, of over nine hundred pages. In leather, raised bands, \$5 25; extra cloth, \$4 75.

A volume replete with truths and principles of the utmost value in the investigation of these diseases.—*American Medical Journal*.

On the appearance of the first edition of this work, the leading English medical review predicted that it would have a "permanent place in the literature of surgery worthy to rank with the best works of the present age." This prediction has been amply fulfilled. Dr. Gross's treatise has been found to supply completely the want which has been felt ever since the elevation of surgery to the rank of a science, of a good practical treatise on the diseases of the bladder and its accessory organs. Philosophical in its design, methodical in its arrangement, ample and

sound in its practical details, it may in truth be said to leave scarcely anything to be desired on so important a subject, and with the additions and modifications resulting from future discoveries and improvements, it will probably remain one of the most valuable works on this subject so long as the science of medicine shall exist.—*Boston Med. and Surg. Journal*.

Whoever will peruse the vast amount of valuable practical information it contains, and which we have been unable even to notice, will, we think, agree with us, that there is no work in the English language which can make any just pretensions to be its equal.—*N. Y. Journal of Medicine*.

BY THE SAME AUTHOR.

A PRACTICAL TREATISE ON FOREIGN BODIES IN THE AIR-PASSAGES. In one handsome octavo volume, extra cloth, with illustrations. pp. 468. \$2 75.

BY THE SAME AUTHOR. (*In press.*)

A SYSTEM OF SURGERY; Diagnostic, Pathological, Therapeutic, and Operative. With very numerous engravings on wood. In two large octavo volumes.

GIBSON (WILLIAM), M. D.,

Late Professor of Surgery in the University of Pennsylvania, &c.

INSTITUTES AND PRACTICE OF SURGERY; being Outlines of a Course of Lectures. Eighth edition, improved and altered. With thirty-four plates. In two handsome octavo volumes, containing about 1000 pages, leather, raised bands. \$6 50.

GRAY (HENRY), F. R. S.,

Lecturer on Anatomy at St. George's Hospital, London, &c.

ANATOMY, DESCRIPTIVE AND SURGICAL. The Drawings by H. V. CARTER, M. D., late Demonstrator on Anatomy at St. George's Hospital; the Dissections jointly by the AUTHOR and Dr. CARTER. In one magnificent imperial octavo volume, with 363 large and elaborate engravings on wood. (*At press.*)

The author has endeavored in this work to cover a more extended range of subjects than is customary in the ordinary text-books, by giving not only the details necessary for the student, but also the application of those details in the practice of medicine and surgery, thus rendering it not only a guide for the learner, but an admirable work of reference for the active practitioner. The engravings form a special feature in the work, many of them being the size of nature, nearly all original, and having the names of the various parts printed on the body of the cut, in place of figures of reference with descriptions at the foot. They thus form a complete and splendid series, which will greatly assist the student in obtaining a clear idea of Anatomy, and will also serve to refresh the memory of those who may find in the exigencies of practice the necessity of recalling the details of the dissecting room.

GARDNER'S MEDICAL CHEMISTRY, for the use of Students and the Profession. In one royal 12mo. vol., ex. cloth, pp. 306, with illustrations. \$1 00.

HUGHES' CLINICAL INTRODUCTION TO

THE PRACTICE OF AUSCULTATION AND OTHER MODES OF PHYSICAL DIAGNOSIS, IN DISEASES OF THE LUNGS AND HEART. Second American, from the second London edition. 1 vol. royal 12mo., ex. cloth, pp. 304. \$1 00.

HOBLYN (RICHARD D.), M. D.

A DICTIONARY OF THE TERMS USED IN MEDICINE AND THE COLLATERAL SCIENCES. A new American edition. Revised, with numerous Additions, by ISAAC HAYS, M. D., editor of the "American Journal of the Medical Sciences." In one large royal 12mo. volume, leather, of over 500 double columned pages. \$1 50.

If the frequency with which we have referred to this volume since its reception from the publisher, two or three weeks ago, be any criterion for the future, the binding will soon have to be renewed, even with careful handling. We find that Dr. Hays has done the profession great service by his careful and industrious labors. The Dictionary has thus become eminently suited to our medical brethren in this country. The additions by Dr. Hays are in brackets, and we believe there is not a single page but bears these insignia; in every instance which we have thus far noticed, the additions are really needed and exceedingly valuable. We heartily commend the work to all who wish to be *au courant* in medical terminology.—*Boston Med. and Surg. Journal*.

To both practitioner and student, we recommend this dictionary as being convenient in size, accurate in definition, and sufficiently full and complete for ordinary consultation.—*Charleston Med. Journ. and Review*.

Hoblyn has always been a favorite dictionary, and in its present enlarged and improved form will give greater satisfaction than ever. The American editor, Dr. Hays, has made many very valuable additions.—*N. J. Med. Reporter*.

To supply the want of the medical reader arising from this cause, we know of no dictionary better arranged and adapted than the one bearing the above title. It is not encumbered with the obsolete terms of a bygone age, but it contains all that are now in use; embracing every department of medical science down to the very latest date. The volume is of a convenient size to be used by the medical student, and yet large enough to make a respectable appearance in the library of a physician.—*Western Lancet*.

Hoblyn's Dictionary has long been a favorite with us. It is the best book of definitions we have, and ought always to be upon the student's table.—*Southern Med. and Surg. Journal*.

HUNTER (JOHN).

JONES (T. WHARTON), F. R. S.,

Professor of Ophthalmic Medicine and Surgery in University College, London, &c.

THE PRINCIPLES AND PRACTICE OF OPHTHALMIC MEDICINE AND SURGERY. With one hundred and ten illustrations. Second American from the second and revised London edition, with additions by EDWARD HARTSHORNE, M. D., Surgeon to Wills' Hospital, &c. In one large, handsome royal 12mo. volume, extra cloth, of 500 pages. \$1 50.

We are confident that the reader will find, on perusal, that the execution of the work amply fulfils the promise of the preface, and sustains, in every point, the already high reputation of the author as an ophthalmic surgeon as well as a physiologist and pathologist. The book is evidently the result of much labor and research, and has been written with the greatest care and attention; it possesses that best quality which a general work, like a system or manual can show, viz: the quality of having all the materials whencesoever derived, so thorough-

ly wrought up, and digested in the author's mind, as to come forth with the freshness and impressiveness of an original production. We entertain little doubt that this book will become what its author hoped it might become, a manual for daily reference and consultation by the student and the general practitioner. The work is marked by that correctness, clearness, and precision of style which distinguish all the productions of the learned author.—*British and For. Med. Review*.

JONES (C. HANDFIELD), F. R. S., & EDWARD H. SIEVEKING, M. D.,
Assistant Physicians and Lecturers in St. Mary's Hospital, London.

A MANUAL OF PATHOLOGICAL ANATOMY. First American Edition, Revised. With three hundred and ninety-seven handsome wood engravings. In one large and beautiful octavo volume of nearly 750 pages, leather. \$3 75.

As a concise text-book, containing, in a condensed form, a complete outline of what is known in the domain of Pathological Anatomy, it is perhaps the best work in the English language. Its great merit consists in its completeness and brevity, and in this respect it supplies a great desideratum in our literature. Heretofore the student of pathology was obliged to glean from a great number of monographs, and the field was so extensive that but few cultivated it with any degree of success. As a simple work of reference, therefore, it is of great value to the student of pathological anatomy, and should be in every physician's library.—*Western Lancet*.

In offering the above titled work to the public, the authors have not attempted to intrude new views on their professional brethren, but simply to lay before them, what has long been wanted, an outline of the

present condition of pathological anatomy. In this they have been completely successful. The work is one of the best compilations which we have ever perused.—*Charleston Medical Journal and Review*.

We urge upon our readers and the profession generally the importance of informing themselves in regard to modern views of pathology, and recommend to them to procure the work before us as the best means of obtaining this information.—*Stethoscope*.

From the casual examination we have given we are inclined to regard it as a text-book, plain, rational, and intelligible, such a book as the practical man needs for daily reference. For this reason it will be likely to be largely useful, as it suits itself to those busy men who have little time for minute investigation, and prefer a summary to an elaborate treatise.—*Buffalo Medical Journal*.

KIRKES (WILLIAM SENHOUSE), M. D.,

Demonstrator of Morbid Anatomy at St. Bartholomew's Hospital, &c.

A MANUAL OF PHYSIOLOGY. A new American, from the third and improved London edition. With two hundred illustrations. In one large and handsome royal 12mo. volume, leather. pp. 586. \$2 00. (*Just Issued, 1857.*)

In again passing this work through his hands, the author has endeavored to render it a correct exposition of the present condition of the science, making such alterations and additions as have been dictated by further experience, or as the progress of investigation has rendered desirable. In every point of mechanical execution the publishers have sought to make it superior to former editions, and at the very low price at which it is offered, it will be found one of the handsomest and cheapest volumes before the profession.

In making these improvements, care has been maintained its distinctive characteristic of presenting within a moderate compass a clear and connected view of its subjects, sufficient for the wants of the student.

This is a new and very much improved edition of Dr. Kirkes' well-known Handbook of Physiology. Originally constructed on the basis of the admirable treatise of Muller, it has in successive editions developed itself into an almost original work, though no change has been made in the plan or arrangement. It combines conciseness with completeness, and is, therefore, admirably adapted for consultation by the busy practitioner.—*Dublin Quarterly Journal*, Feb. 1857.

Its excellence is in its compactness, its clearness, and its carefully cited authorities. It is the most convenient of text-books. These gentlemen, Messrs Kirkes and Paget, have really an immense talent for science, which is not so common or so cheap as prating people fancy. They have the gift of telling us what we want to know, without thinking it necessary to tell us all they know.—*Boston Med. and Surg. Journal*, May 14, 1857.

One of the very best handbooks of Physiology we possess—presenting just such an outline of the science, comprising an account of its leading facts and generally admitted principles, as the student requires during his attendance upon a course of lectures, or for reference whilst preparing for examination.—*Am. Medical Journal*.

We need only say, that, without entering into discussions of unsettled questions, it contains all the recent improvements in this department of medical science. For the student beginning this study, and the practitioner who has but leisure to refresh his memory, this book is invaluable, as it contains all that is important to know, without special details, which are read with interest only by those who would make a speciality, or desire to possess a critical knowledge of the subject.—*Charleston Medical Journal*.

KNAPP'S TECHNOLOGY; or, Chemistry applied to the Arts and to Manufactures. Edited, with numerous Notes and Additions, by Dr. EDMUND RONALDS and Dr. THOMAS RICHARDSON. First

American edition, with Notes and Additions, by Prof. WALTER R. JOHNSON. In two handsome octavo volumes, extra cloth, with about 500 wood- engravings. \$6 00.

LUDLOW (J. L.), M. D.

A MANUAL OF EXAMINATIONS upon Anatomy, Physiology, Surgery, Practice of Medicine, Obstetrics, Materia Medica, Chemistry, Pharmacy, and Therapeutics. To which is added a Medical Formulary. Designed for Students of Medicine throughout the United States. Third edition, thoroughly revised and greatly extended and enlarged. With three hundred and seventy illustrations. In one large and handsome royal 12mo. volume, leather, of over 800 closely printed pages. (*Just Issued.*) \$2 50.

The great popularity of this volume, and the numerous demands for it during the two years in which it has been out of print, have induced the author in its revision to spare no pains to render it a correct and accurate digest of the most recent condition of all the branches of medical science. In many respects it may, therefore, be regarded rather as a new book than a new edition, an entire section on Physiology having been added, as also one on Organic Chemistry, and many portions having been rewritten. A very complete series of illustrations has been introduced, and every care has been taken in the mechanical execution to render it a convenient and satisfactory book for study or reference.

The arrangement of the volume in the form of question and answer renders it especially suited for the office examination of students and for those preparing for graduation.

We know of no better companion for the student during the hours spent in the lecture room, or to refresh, at a glance, his memory of the various topics

crammed into his head by the various professors to whom he is compelled to listen.—*Western Lancet*, May, 1857.

LEHMANN (C. G.)

PHYSIOLOGICAL CHEMISTRY. Translated from the second edition by GEORGE E. DAY, M. D., F. R. S., &c., edited by R. E. ROGERS, M. D., Professor of Chemistry in the Medical Department of the University of Pennsylvania, with illustrations selected from Funke's Atlas of Physiological Chemistry, and an Appendix of plates. Complete in two large and handsome octavo volumes, extra cloth, containing 1200 pages, with nearly two hundred illustrations. \$6 00.

This great work, universally acknowledged as the most complete and authoritative exposition of the principles and details of Zoochemistry, in its passage through the press, has received from Professor Rogers such care as was necessary to present it in a correct and reliable form. To such a work additions were deemed superfluous, but several years having elapsed between the appearance in Germany of the first and last volume, the latter contained a supplement, embodying numerous corrections and additions resulting from the advance of the science. These have all been incorporated in the text in their appropriate places, while the subjects have been still further elucidated by the insertion of illustrations from the Atlas of Dr. Otto Funke. With the view of supplying the student with the means of convenient comparison, a large number of wood-cuts, from works on kindred subjects, have also been added in the form of an Appendix of Plates. The work is, therefore, presented as in every way worthy the attention of all who desire to be familiar with the modern facts and doctrines of Physiological Science.

The most important contribution as yet made to Physiological Chemistry.—*Am. Journal Med. Sciences*, Jan. 1856.

The present volumes belong to the small class of medical literature which comprises elaborate works of the highest order of merit.—*Montreal Med. Chronicle*, Jan. 1856.

The work of Lehmann stands unrivalled as the most comprehensive book of reference and information extant on every branch of the subject on which

it treats.—*Edinburgh Monthly Journal of Medical Science*.

Already well known and appreciated by the scientific world, Professor Lehmann's great work requires no laudatory sentences, as, under a new garb, it is now presented to us. The little space at our command would ill suffice to set forth even a small portion of its excellences.—*Boston Med. and Surg. Journal*, Dec. 1855.

BY THE SAME AUTHOR. (*Just Issued.*)

MANUAL OF CHEMICAL PHYSIOLOGY. Translated from the German, with Notes and Additions, by J. CHESTON MORRIS, M. D., with an Introductory Essay on Vital Force, by SAMUEL JACKSON, M. D., Professor of the Institute of Medicine in the University of Pennsylvania. With illustrations on wood. In one very handsome octavo volume, extra cloth, of 336 pages. \$2 25.

From Prof. Jackson's Introductory Essay.

In adopting the handbook of Dr. Lehmann as a manual of Organic Chemistry for the use of the students of the University, and in recommending his original work of PHYSIOLOGICAL CHEMISTRY for their more mature studies, the high value of his researches, and the great weight of his authority in that important department of medical science are fully recognized.

LAWRENCE (W.), F. R. S., &c.

A TREATISE ON DISEASES OF THE EYE. A new edition, edited, with numerous additions, and 243 illustrations, by ISAAC HAYS, M. D., Surgeon to Will's Hospital, &c. In one very large and handsome octavo volume, of 950 pages, strongly bound in leather with raised bands. \$5 00.

This admirable treatise—the safest guide and most comprehensive work of reference, which is within the reach of the profession.—*Stethoscope*.

This standard text-book on the department of which it treats, has not been superseded, by any or all of the numerous publications on the subject heretofore issued. Nor with the multiplied improvements of Dr. Hays, the American editor, is it at all

likely that this great work will cease to merit the confidence and preference of students or practitioners. Its ample extent—nearly one thousand large octavo pages—has enabled both author and editor to do justice to all the details of this subject, and condense in this single volume the present state of our knowledge of the whole science in this department, whereby its practical value cannot be excelled.—*N. Y. Med. Gaz.*

LAYCOCK (THOMAS), M. D., F. R. S. E.,

Professor of Practical and Clinical Medicine in the University of Edinburgh, &c.

LECTURES ON THE PRINCIPLES AND METHODS OF MEDICAL OBSERVATION AND RESEARCH. For the Use of Advanced Students and Junior Practitioners. In one very neat royal 12mo. volume, extra cloth. Price \$1 00.

LALLEMAND AND WILSON.

A PRACTICAL TREATISE ON THE CAUSES, SYMPTOMS, AND TREATMENT OF SPERMATORRHOEA. By M. LALLEMAND. Translated and edited by HENRY J. McDOUGALL. Third American edition. To which is added — ON DISEASES OF THE VESICULÆ SEMINALES; AND THEIR ASSOCIATED ORGANS. With special reference to the Morbid Secretions of the Prostatic and Urethral Mucous Membrane. By MARRIS WILSON, M. D. In one neat octavo volume, of about 400 pp., extra cloth. \$2 00. (*Now Ready.*)

Although the views of M. Lallemand on Spermatorrhœa have unquestionably exercised a very great influence, and the treatment advocated by him has been very generally adopted, still, a number of years having elapsed since his work was given to the world, the publishers have thought that the value of the present edition would be enhanced by the addition of the little treatise of Dr. MARRIS WILSON. In it the causes of the different varieties of Spermatorrhœa are investigated with the aid of modern pathology, from which, combined with the most recent experience of the profession, the attempt is made to deduce a rational system of curative treatment. Whatever deficiencies may have been caused in the work of M. Lallemand by the progress of medical science, will, it is hoped, be in this manner supplied.

LA ROCHE (R.), M. D., &c.

YELLOW FEVER, considered in its Historical, Pathological, Etiological, and Therapeutical Relations. Including a Sketch of the Disease as it has occurred in Philadelphia from 1699 to 1854, with an examination of the connections between it and the fevers known under the same name in other parts of temperate as well as in tropical regions. In two large and handsome octavo volumes of nearly 1500 pages, extra cloth. \$7 00.

From Professor S. H. Dickson, Charleston, S. C.,
September 18, 1855.

A monument of intelligent and well applied research, almost without example. It is, indeed, in itself, a large library, and is destined to constitute the special resort as a book of reference, in the subject of which it treats, to all future time.

We have not time at present, engaged as we are, by day and by night, in the work of combating this very disease, now prevailing in our city, to do more than give this cursory notice of what we consider as undoubtedly the most able and erudite medical publication our country has yet produced. But in view of the startling fact, that this, the most malignant and unmanageable disease of modern times, has for several years been prevailing in our country to a greater extent than ever before; that it is no longer confined to either large or small cities, but penetrates country villages, plantations, and farm-houses; that it is treated with scarcely better success now than thirty or forty years ago; that there is vast mischief done by ignorant pretenders to knowledge in regard to the disease, and in view of the probability that a majority of southern physicians will be called upon to treat the disease, we trust that this able and comprehensive treatise will be very generally read in the south.—*Memphis Med. Recorder*.

This is decidedly the great American medical work of the day—a full, complete, and systematic treatise, unequalled by any other upon the all-important subject of Yellow Fever. The laborious, indefatigable, and learned author has devoted to it many years of

arduous research and careful study, and the result is such as will reflect the highest honor upon the author and our country.—*Southern Med. and Surg. Journal*.

The genius and scholarship of this great physician could not have been better employed than in the erection of this towering monument to his own fame, and to the glory of the medical literature of his own country. It is destined to remain the great authority upon the subject of Yellow Fever. The student and physician will find in these volumes a *résumé* of the sum total of the knowledge of the world upon the awful scourge which they so elaborately discuss. The style is so soft and so pure as to refresh and invigorate the mind while absorbing the thoughts of the gifted author, while the publishers have succeeded in bringing the externals into a most felicitous harmony with the inspiration that dwells within. Take it all in all, it is a book we have often dreamed of, but dreamed not that it would ever meet our waking eye as a tangible reality.—*Nashville Journal of Medicine*.

We deem it fortunate that the splendid work of Dr. La Roche should have been issued from the press at this particular time. The want of a reliable digest of all that is known in relation to this frightful malady has long been felt—a want very satisfactorily met in the work before us. We deem it but faint praise to say that Dr. La Roche has succeeded in presenting the profession with an able and complete monograph, one which will find its way into every well ordered library.—*Va. Stethoscope*.

BY THE SAME AUTHOR.

PNEUMONIA; its Supposed Connection, Pathological and Etiological, with Autumnal Fevers, including an Inquiry into the Existence and Morbid Agency of Malaria. In one handsome octavo volume, extra cloth, of 500 pages. \$3 00.

MILLER (HENRY), M. D.,

Professor of Obstetrics and Diseases of Women and Children in the University of Louisville.

PRINCIPLES AND PRACTICE OF OBSTETRICS, &c.; including the Treatment of Chronic Inflammation of the Cervix and Body of the Uterus considered as a frequent cause of Abortion. With about one hundred illustrations on wood. In one very handsome octavo volume, of over 600 pages. (*Now Ready*.) \$3 75.

The reputation of Dr. Miller as an obstetrician is too widely spread to require the attention of the profession to be specially called to a volume containing the experience of his long and extensive practice. The very favorable reception accorded to his "Treatise on Human Parturition," issued some years since, is an earnest that the present work will fulfil the author's intention of providing within a moderate compass a complete and trustworthy text-book for the student, and book of reference for the practitioner. Based to a certain extent upon the former work, but enlarged to more than double its size, and almost wholly rewritten, it presents, besides the matured experience of the author, the most recent views and investigations of modern obstetric writers, such as DUBOIS, CAZEAUX, SIMPSON, TYLER SMITH, &c., thus embodying the results not only of the American, but also of the Paris, the London, and the Edinburgh obstetric schools. The author's position for so many years as a teacher of his favorite branch, has given him a familiarity with the wants of students and a facility of conveying instruction, which cannot fail to render the volume eminently adapted to its purposes.

We congratulate the author that the task is done. We congratulate him that he has given to the medical public a work which will secure for him a high and permanent position among the standard authorities on the principles and practice of obstetrics. Congratulations are not less due to the medical profession of this country, on the acquisition of a treatise embodying the results of the studies, reflections, and experience of Prof. Miller. Few men, if any, in this country, are more competent than he to write on this department of medicine. Engaged for thirty-five years in an extended practice of obstetrics, for many years a teacher of this branch of instruction in one of the largest of our institutions, a diligent student as well as a careful observer, an original and independent thinker, wedded to no hobbies, ever ready to consider without prejudice new views, and to adopt innovations if they are really improvements, and withal a clear, agreeable writer, a practical treatise from his pen could not fail to possess great value. Returning to Prof. Miller's work we have only to add that we hope most sincerely it will be in the hands of every reading and thinking practitioner of this country.—*Buffalo Med. Journal*, Mar. 1853.

In fact, this volume must take its place among the standard systematic treatises on obstetrics; a position to which its merits justly entitle it. The style is such that the descriptions are clear, and each subject is discussed and elucidated with due regard to its practical bearings, which cannot fail to make it acceptable and valuable to both students and practitioners. We cannot, however, close this brief notice without congratulating the author and the profession on the production of such an excellent treatise. The author is a western man of whom we feel proud, and we cannot but think that his book will find many readers and warm admirers wherever obstetrics is taught and studied as a science and an art.—*The Cincinnati Lancet and Observer*, Feb. 1853.

A most respectable and valuable addition to our home medical literature, and one reflecting credit alike on the author and the institution to which he is attached. The student will find in this work a most useful guide to his studies; the country practitioner, rusty in his reading, can obtain from its pages a fair *résumé* of the modern literature of the science; and we hope to see this American production generally consulted by the profession.—*Va. Med. Journal*, Feb. 1853.

MEIGS (CHARLES D.), M. D.,

Professor of Obstetrics, &c. in the Jefferson Medical College, Philadelphia.

OBSTETRICS: THE SCIENCE AND THE ART. Third edition, revised and improved. With one hundred and twenty-nine illustrations. In one beautifully printed octavo volume, leather, of seven hundred and fifty-two large pages. \$3 75.

The rapid demand for another edition of this work is a sufficient expression of the favorable verdict of the profession. In thus preparing it a third time for the press, the author has endeavored to render it in every respect worthy of the favor which it has received. To accomplish this he has thoroughly revised it in every part. Some portions have been rewritten, others added, new illustrations have been in many instances substituted for such as were not deemed satisfactory, while, by an alteration in the typographical arrangement, the size of the work has not been increased, and the price remains unaltered. In its present improved form, it is, therefore, hoped that the work will continue to meet the wants of the American profession as a sound, practical, and extended SYSTEM OF MIDWIFERY.

Though the work has received only five pages of enlargement, its chapters throughout wear the impress of careful revision. Expunging and rewriting, remodelling its sentences, with occasional new material, all evince a lively desire that it shall deserve to be regarded as improved in manner as well as matter. In the matter, every stroke of the pen has increased the value of the book, both in expungings and additions.—*Western Lancet*, Jan. 1857.

The best American work on Midwifery that is accessible to the student and practitioner—*N. W. Med. and Surg. Journal*, Jan. 1857.

This is a standard work by a great American Obstetrician. It is the third and last edition, and, in the language of the preface, the author has "brought the subject up to the latest dates of real improvement in our art and Science."—*Nashville Journ. of Med. and Surg.*, May, 1857.

BY THE SAME AUTHOR. (*Lately Issued.*)

WOMAN: HER DISEASES AND THEIR REMEDIES. A Series of Lectures to his Class. Third and Improved edition. In one large and beautifully printed octavo volume, leather. pp. 672. \$3 60.

The gratifying appreciation of his labors, as evinced by the exhaustion of two large impressions of this work within a few years, has not been lost upon the author, who has endeavored in every way to render it worthy of the favor with which it has been received. The opportunity thus afforded for a second revision has been improved, and the work is now presented as in every way superior to its predecessors, additions and alterations having been made whenever the advance of science has rendered them desirable. The typographical execution of the work will also be found to have undergone a similar improvement, and the work is now confidently presented as in every way worthy the position it has acquired as the standard American text-book on the Diseases of Females.

It contains a vast amount of practical knowledge, by one who has accurately observed and retained the experience of many years, and who tells the result in a free, familiar, and pleasant manner.—*Dublin Quarterly Journal*.

There is an off-hand fervor, a glow, and a warm-heartedness infecting the effort of Dr. Meigs, which is entirely captivating, and which absolutely hurries the reader through from beginning to end. Besides, the book teems with solid instruction, and it shows the very highest evidence of ability, viz., the clearness with which the information is presented. We know of no better test of one's understanding a subject than the evidence of the power of lucidly explaining it. The most elementary, as well as the obscurest subjects, under the pencil of Prof. Meigs, are isolated and made to stand out in

such bold relief, as to produce distinct impressions upon the mind and memory of the reader.—*The Charleston Med. Journal*.

Professor Meigs has enlarged and amended this great work, for such it unquestionably is, having passed the ordeal of criticism at home and abroad, but been improved thereby; for in this new edition the author has introduced real improvements, and increased the value and utility of the book immeasurably. It presents so many novel, bright, and sparkling thoughts; such an exuberance of new ideas on almost every page, that we confess ourselves to have become enamored with the book and its author; and cannot withhold our congratulations from our Philadelphia conferees, that such a teacher is in their service.—*N. Y. Med. Gazette*.

BY THE SAME AUTHOR.

ON THE NATURE, SIGNS, AND TREATMENT OF CHILD BED

FEVER. In a Series of Letters addressed to the Students of his Class. In one handsome octavo volume, extra cloth, of 365 pages. \$2 50.

The instructive and interesting author of this work, whose previous labors in the department of medicine which he so sedulously cultivates, have placed his countrymen under deep and abiding obligations, again challenges their admiration in the fresh and vigorous, attractive and racy pages before us. It is a delectable book. * * * This treatise upon child-bed fevers will have an extensive sale, being destined, as it deserves, to find a place in the library of every practitioner who scorns to lag in the rear.—*Nashville Journal of Medicine and Surgery*.

This book will add more to his fame than either of those which bear his name. Indeed we doubt whether any material improvement will be made on the teachings of this volume for a century to come, since it is so eminently practical, and based on profound knowledge of the science and consummate skill in the art of healing, and ratified by an ample and extensive experience, such as few men have the industry or good fortune to acquire.—*N. Y. Med. Gazette*.

BY THE SAME AUTHOR; WITH COLORED PLATES.

A TREATISE ON ACUTE AND CHRONIC DISEASES OF THE NECK OF THE UTERUS. With numerous plates, drawn and colored from nature in the highest style of art. In one handsome octavo volume, extra cloth. \$4 50.

MAYNE'S DISPENSATORY AND THERAPEUTICAL REMEMBRANCER. Comprising the entire lists of Materia Medica, with every Practical Formula contained in the three British Pharmacopœias. Edited, with the addition of the Formulæ of the U. S. Pharmacopœia, by R. E. GRIFFITH, M. D. 112mo. vol. ex. cl., 300 pp. 75 c.

MALGAIGNE'S OPERATIVE SURGERY, based on Normal and Pathological Anatomy. Translated from the French by FREDERICK BRITTON, A. B., M. D. With numerous illustrations on wood. In one handsome octavo volume, extra cloth, of nearly six hundred pages. \$2 25.

MACLISE (JOSEPH), SURGEON.

SURGICAL ANATOMY. Forming one volume, very large imperial quarto.

With sixty-eight large and splendid Plates, drawn in the best style and beautifully colored. Containing one hundred and ninety Figures, many of them the size of life. Together with copious and explanatory letter-press. Strongly and handsomely bound in extra cloth, being one of the cheapest and best executed Surgical works as yet issued in this country. \$11 00.

* * The size of this work prevents its transmission through the post-office as a whole, but those who desire to have copies forwarded by mail, can receive them in five parts, done up in stout wrappers. Price \$9 00.

One of the greatest artistic triumphs of the age in Surgical Anatomy.—*British American Medical Journal*.

Too much cannot be said in its praise; indeed, we have no language to do it justice.—*Ohio Medical and Surgical Journal*.

The most admirable surgical atlas we have seen. To the practitioner deprived of demonstrative dissections upon the human subject, it is an invaluable companion.—*N. J. Medical Reporter*.

The most accurately engraved and beautifully colored plates we have ever seen in an American book—one of the best and cheapest surgical works ever published.—*Buffalo Medical Journal*.

It is very rare that so elegantly printed, so well illustrated, and so useful a work, is offered at so moderate a price.—*Charleston Medical Journal*.

Its plates can boast a superiority which places them almost beyond the reach of competition.—*Medical Examiner*.

Every practitioner, we think, should have a work of this kind within reach.—*Southern Medical and Surgical Journal*.

No such lithographic illustrations of surgical regions have hitherto, we think, been given.—*Boston Medical and Surgical Journal*.

As a surgical anatomist, Mr. MacLise has probably no superior.—*British and Foreign Medico-Chirurgical Review*.

☞ The very low price at which this work is furnished, and the beauty of its execution, require an extended sale to compensate the publishers for the heavy expenses incurred.

MORLAND (W. W.), M. D.

Fellow of the Massachusetts Medical Society, &c.

DISEASES OF THE URINARY ORGANS; a Compendium of their Diagnosis, Pathology, and Treatment. With illustrations. In one large and handsome octavo volume, of about 600 pages, extra cloth. (Now ready, Oct. 1858.) Price \$3 50.

This volume, it is hoped, will supply the want of a work presenting within convenient compass the whole subject of the diseases to which all the urinary organs are liable, with their treatment, both medical and surgical. The aim of the author has been throughout to condense the results of the most recent investigations in a clear and succinct manner, omitting nothing of practical importance, without, at the same time, embarrassing the student with unnecessary speculations. Various elaborate and important works have recently appeared on different departments of the subject, but none, it is believed, which thoroughly covers the whole ground in the manner which Dr. Morland has attempted.

MACKENZIE (W.), M. D.,

Surgeon Oculist in Scotland in ordinary to Her Majesty, &c. &c.

A PRACTICAL TREATISE ON DISEASES AND INJURIES OF THE

EYE. To which is prefixed an Anatomical Introduction explanatory of a Horizontal Section of the Human Eyeball, by THOMAS WHARTON JONES, F. R. S. From the Fourth Revised and Enlarged London Edition. With Notes and Additions by ADDINELL HEWSON, M. D., Surgeon to Wills Hospital, &c. &c. In one very large and handsome octavo volume, leather, raised bands, with plates and numerous wood-cuts. \$5 25.

The treatise of Dr. Mackenzie indisputably holds the first place, and forms, in respect of learning and research, an Encyclopædia unequalled in extent by any other work of the kind, either English or foreign.—*Dixon on Diseases of the Eye*.

Few modern books on any department of medicine or surgery have met with such extended circulation, or have procured for their authors a like amount of European celebrity. The immense research which it displayed, the thorough acquaintance with the subject, practically as well as theoretically, and the able manner in which the author's stores of learning and experience were rendered available for general use, at once procured for the first edition, as well on the continent as in this country, that high position as a standard work which each successive edition has more firmly established, in spite of the attractions of several rivals of no mean ability. We con-

Of great value to the student engaged in dissecting, and to the surgeon at a distance from the means of keeping up his anatomical knowledge.—*Medical Times*.

A work which has no parallel in point of accuracy and cheapness in the English language.—*N. Y. Journal of Medicine*.

To all engaged in the study or practice of their profession, such a work is almost indispensable.—*Dublin Quarterly Medical Journal*.

Country practitioners will find these plates of immense value.—*N. Y. Medical Gazette*.

We are extremely gratified to announce to the profession the completion of this truly magnificent work, which, as a whole, certainly stands unrivalled, both for accuracy of drawing, beauty of coloring, and all the requisite explanations of the subject in hand.—*The New Orleans Medical and Surgical Journal*.

This is by far the ablest work on Surgical Anatomy that has come under our observation. We know of no other work that would justify a student, in any degree, for neglect of actual dissection. In those sudden emergencies that so often arise, and which require the instantaneous command of minute anatomical knowledge, a work of this kind keeps the details of the dissecting-room perpetually fresh in the memory.—*The Western Journal of Medicine and Surgery*.

sider it the duty of every one who has the love of his profession and the welfare of his patient at heart, to make himself familiar with this the most complete work in the English language upon the diseases of the eye.—*Med. Times and Gazette*.

The fourth edition of this standard work will no doubt be as fully appreciated as the three former editions. It is unnecessary to say a word in its praise, for the verdict has already been passed upon it by the most competent judges, and "Mackenzie on the Eye" has justly obtained a reputation which it is no figure of speech to call world-wide.—*British and Foreign Medico-Chirurgical Review*.

This new edition of Dr. Mackenzie's celebrated treatise on diseases of the eye, is truly a miracle of industry and learning. We need scarcely say that he has entirely exhausted the subject of his speciality.—*Dublin Quarterly Journal*.

MILLER (JAMES), F. R. S. E.,
Professor of Surgery in the University of Edinburgh, &c.

PRINCIPLES OF SURGERY. Fourth American, from the third and revised Edinburgh edition. In one large and very beautiful volume, leather, of 700 pages, with two hundred and forty exquisite illustrations on wood. \$3 75.

The work of Mr. Miller is too well and too favorably known among us, as one of our best text-books, to render any further notice of it necessary than the announcement of a new edition, the fourth in our country, a proof of its extensive circulation among us. As a concise and reliable exposition of the science of modern surgery, it stands deservedly high—we know not its superior.—*Boston Med. and Surg. Journal.*

It presents the most satisfactory exposition of the modern doctrines of the principles of surgery to be found in any volume in any language.—*N. Y. Journal of Medicine.*

The work takes rank with Watson's Practice of Physic; it certainly does not fall behind that great work in soundness of principle or depth of reasoning and research. No physician who values his re-

putation, or seeks the interests of his clients, can acquit himself before his God and the world without making himself familiar with the sound and philosophical views developed in the foregoing book.—*New Orleans Med. and Surg. Journal.*

Without doubt the ablest exposition of the principles of that branch of the healing art in any language. This opinion, deliberately formed after a careful study of the first edition, we have had no cause to change on examining the second. This edition has undergone thorough revision by the author; many expressions have been modified, and a mass of new matter introduced. The book is got up in the finest style, and is an evidence of the progress of typography in our country.—*Charleston Medical Journal and Review.*

BY THE SAME AUTHOR. (Now Ready.)

THE PRACTICE OF SURGERY. Fourth American from the last Edinburgh edition. Revised by the American editor. Illustrated by three hundred and sixty-four engravings on wood. In one large octavo volume, leather, of nearly 700 pages. \$3 75.

No encomium of ours could add to the popularity of Miller's Surgery. Its reputation in this country is unsurpassed by that of any other work, and, when taken in connection with the author's *Principles of Surgery*, constitutes a whole, without reference to to which no conscientious surgeon would be willing practice his art.—*Southern Med. and Surg. Journal.*

It is seldom that two volumes have ever made so profound an impression in so short a time as the "Principles" and the "Practice" of Surgery by Mr. Miller—or so richly merited the reputation they have acquired. The author is an eminently sensible, practical, and well-informed man, who knows exactly what he is talking about and exactly how to talk it.—*Kentucky Medical Recorder.*

By the almost unanimous voice of the profession,

his works, both on the principles and practice of surgery have been assigned the highest rank. If we were limited to but one work on surgery, that one should be Miller's, as we regard it as superior to all others.—*St. Louis Med. and Surg. Journal.*

The author has in this and his "Principles," presented to the profession one of the most complete and reliable systems of Surgery extant. His style of writing is original, impressive, and engaging, energetic, concise, and lucid. Few have the faculty of condensing so much in small space, and at the same time so persistently holding the attention. Whether as a text-book for students or a book of reference for practitioners, it cannot be too strongly recommended.—*Southern Journal of Med. and Physical Sciences.*

MONTGOMERY (W. F.), M. D., M. R. I. A., &c.,

Professor of Midwifery in the King and Queen's College of Physicians in Ireland, &c.

AN EXPOSITION OF THE SIGNS AND SYMPTOMS OF PREGNANCY.

With some other Papers on Subjects connected with Midwifery. From the second and enlarged English edition. With two exquisite colored plates, and numerous wood-cuts. In one very handsome octavo volume, extra cloth, of nearly 600 pages. (Just Issued, 1857.) \$3 75.

The present edition of this classical volume is fairly entitled to be regarded as a new work, every sentence having been carefully rewritten, and the whole increased to more than double the original size. The title of the work scarcely does justice to the extent and importance of the topics brought under consideration, embracing, with the exception of the operative procedures of midwifery, almost everything connected with obstetrics, either directly or incidentally; and there are few physicians who will not find in its pages much that will prove of great interest and value in their daily practice. The special Essays on the Period of Human Gestation, the Signs of Delivery, and the Spontaneous Amputation and other Lesions of the Fœtus in Utero present topics of the highest interest fully treated and beautifully illustrated.

In every point of mechanical execution the work will be found one of the handsomest yet issued from the American press.

A book unusually rich in practical suggestions.—*Am. Journal Med. Sciences*, Jan. 1857.

These several subjects so interesting in themselves, and so important, every one of them, to the most delicate and precious of social relations, controlling often the honor and domestic peace of a family, the legitimacy of offspring, or the life of its parent, are all treated with an elegance of diction, fulness of illustrations, acuteness and justice of reasoning, unparalleled in obstetrics, and unsurpassed in medicine. The reader's interest can never flag, so fresh, and vigorous, and classical is our author's style; and one forgets, in the renewed charm of every page, that it, and every line, and every word

has been weighed and reweighed through years of preparation; that this is of all others the book of Obstetric Law, on each of its several topics; on all points connected with pregnancy, to be everywhere received as a manual of special jurisprudence, at once announcing fact, affording argument, establishing precedent, and governing alike the jurymen, advocate, and judge. It is not merely in its legal relations that we find this work so interesting. Hardly a page but that has its hints or facts important to the general practitioner; and not a chapter without especial matter for the anatomist, physiologist, or pathologist.—*N. A. Med.-Chir. Review*, March, 1857.

MOHR (FRANCIS), PH. D., AND REDWOOD (THEOPHILUS).

PRACTICAL PHARMACY. Comprising the Arrangements, Apparatus, and Manipulations of the Pharmaceutical Shop and Laboratory. Edited, with extensive Additions, by Prof. WILLIAM PROCTER, of the Philadelphia College of Pharmacy. In one handsomely printed octavo volume, extra cloth, of 570 pages, with over 500 engravings on wood. \$2 75.

NEILL (JOHN), M. D.,

Surgeon to the Pennsylvania Hospital, &c.; and

FRANCIS GURNEY SMITH, M. D.,

Professor of Institutes of Medicine in the Pennsylvania Medical College.

AN ANALYTICAL COMPENDIUM OF THE VARIOUS BRANCHES OF MEDICAL SCIENCE; for the Use and Examination of Students. A new edition, revised and improved. In one very large and handsomely printed royal 12mo. volume, of about one thousand pages, with 374 wood-cuts. Strongly bound in leather, with raised bands. \$3 00.

The very flattering reception which has been accorded to this work, and the high estimate placed upon it by the profession, as evinced by the constant and increasing demand which has rapidly exhausted two large editions, have stimulated the authors to render the volume in its present revision more worthy of the success which has attended it. It has accordingly been thoroughly examined, and such errors as had on former occasions escaped observation have been corrected, and whatever additions were necessary to maintain it on a level with the advance of science have been introduced. The extended series of illustrations has been still further increased and much improved, while, by a slight enlargement of the page, these various additions have been incorporated without increasing the bulk of the volume.

The work is, therefore, again presented as eminently worthy of the favor with which it has hitherto been received. As a book for daily reference by the student requiring a guide to his more elaborate text-books, as a manual for preceptors desiring to stimulate their students by frequent and accurate examination, or as a source from which the practitioners of older date may easily and cheaply acquire a knowledge of the changes and improvement in professional science, its reputation is permanently established.

The best work of the kind with which we are acquainted.—*Med. Examiner.*

Having made free use of this volume in our examinations of pupils, we can speak from experience in recommending it as an admirable compend for students, and as especially useful to preceptors who examine their pupils. It will save the teacher much labor by enabling him readily to recall all of the points upon which his pupils should be examined. A work of this sort should be in the hands of every one who takes pupils into his office with a view of examining them; and this is unquestionably the best of its class.—*Transylvania Med. Journal.*

In the rapid course of lectures, where work for

the students is heavy, and review necessary for an examination, a compend is not only valuable, but it is almost a *sine qua non*. The one before us is, in most of the divisions, the most unexceptionable of all books of the kind that we know of. The newest and soundest doctrines and the latest improvements and discoveries are explicitly, though concisely, laid before the student. There is a class to whom we very sincerely commend this cheap book as worth its weight in silver—that class is the graduates in medicine of more than ten years' standing, who have not studied medicine since. They will perhaps find out from it that the science is not exactly now what it was when they left it off.—*The Stethoscope.*

NEILL (JOHN), M. D.,

Professor of Surgery in the Pennsylvania Medical College, &c.

OUTLINES OF THE VEINS AND LYMPHATICS. With handsome colored plates. 1 vol., cloth. \$1 25.

OUTLINES OF THE NERVES. With handsome plates. 1 vol., cloth. \$1 25.

NELIGAN (J. MOORE), M. D., M. R. I. A., &c.

(A splendid work. Just Issued.)

ATLAS OF CUTANEOUS DISEASES. In one beautiful quarto volume, extra cloth, with splendid colored plates, presenting nearly one hundred elaborate representations of disease. \$4 50.

This beautiful volume is intended as a complete and accurate representation of all the varieties of Diseases of the Skin. While it can be consulted in conjunction with any work on Practice, it has especial reference to the author's "Treatise on Diseases of the Skin," so favorably received by the profession some years since. The publishers feel justified in saying that few more beautifully executed plates have ever been presented to the profession of this country.

A compend which will very much aid the practitioner in this difficult branch of diagnosis. Taken with the beautiful plates of the Atlas, which are remarkable for their accuracy and beauty of coloring, it constitutes a very valuable addition to the library of a practical man.—*Buffalo Med. Journal,* Sept. 1856.

Nothing is often more difficult than the diagnosis of disease of the skin; and hitherto, the only works containing illustrations have been at rather inconvenient prices—prices, indeed, that prevented general use. The work before us will supply a want long felt, and minister to a more perfect acquaintance with the nature and treatment of a very frequent and troublesome form of disease.—*Ohio Med. and Surg. Journal,* July, 1856.

Neligan's Atlas of Cutaneous Diseases supplies a

long existent desideratum much felt by the largest class of our profession. It presents, in quarto size, 16 plates, each containing from 3 to 6 figures, and forming in all a total of 90 distinct representations of the different species of skin affections, grouped together in genera or families. The illustrations have been taken from nature, and have been copied with such fidelity that they present a striking picture of life; in which the reduced scale aptly serves to give, at a *coup d'œil*, the remarkable peculiarities of each individual variety. And while thus the disease is rendered more definable, there is yet no loss of proportion incurred by the necessary concentration. Each figure is highly colored, and so truthful has the artist been that the most fastidious observer could not justly take exception to the correctness of the execution of the pictures under his scrutiny.—*Montreal Med. Chronicle.*

BY THE SAME AUTHOR.

A PRACTICAL TREATISE ON DISEASES OF THE SKIN. Second American edition. In one neat royal 12mo. volume, extra cloth, of 334 pages. \$1 00.

The two volumes will be sent by mail on receipt of *Five Dollars.*

OWEN ON THE DIFFERENT FORMS OF THE SKELETON, AND OF THE TEETH.

One vol. royal 12mo., extra cloth, with numerous illustrations. \$1 25.

PEASLEE (E. R.), M. D.,

Professor of Physiology and General Pathology in the New York Medical College.

HUMAN HISTOLOGY, in its relations to Anatomy, Physiology, and Pathology; for the use of Medical Students. With four hundred and thirty-four illustrations. In one handsome octavo volume, of over 600 pages. (*Now Ready, 1858.*) \$3 75.

It embraces a library upon the topics discussed within itself, and is just what the teacher and learner need. Another advantage, by no means to be overlooked, everything of real value in the wide range which it embraces, is with great skill compressed into an octavo volume of but little more than six hundred pages. We have not only the whole subject of Histology, interesting in itself, ably and fully discussed, but what is of infinitely greater interest to the student, because of greater practical value, are its relations to Anatomy, Physiology, and Pathology, which are here fully and satisfactorily set forth. These great supporting branches of practical medicine are thus linked together, and while establishing and illustrating each other, are interwoven into a harmonious whole. We commend the work to students and physicians generally.—*Nashville Journ. of Med. and Surgery*, Dec. 1857.

It far surpasses our expectation. We never conceived the possibility of compressing so much valuable information into so compact a form. We will not consume space with commendations. We re-

ceive this contribution to physiological science, "Not with vain thanks, but with acceptance bounteous." We have already paid it the practical compliment of making abundant use of it in the preparation of our lectures, and also of recommending its further perusal most cordially to our alumni; a recommendation which we now extend to our readers.—*Memphis Med. Recorder*, Jan. 1858.

We would recommend it to the medical student and practitioner, as containing a summary of all that is known of the important subjects which it treats; of all that is contained in the great works of Simon and Lehmann, and the organic chemists in general. Master this one volume, we would say to the medical student and practitioner—master this book and you know all that is known of the great fundamental principles of medicine, and we have no hesitation in saying that it is an honor to the American medical profession that one of its members should have produced it.—*St. Louis Med. and Surg. Journal*, March, 1858.

PEREIRA (JONATHAN), M. D., F. R. S., AND L. S.

THE ELEMENTS OF MATERIA MEDICA AND THERAPEUTICS.

Third American edition, enlarged and improved by the author; including Notices of most of the Medicinal Substances in use in the civilized world, and forming an Encyclopædia of Materia Medica. Edited, with Additions, by JOSEPH CARSON, M. D., Professor of Materia Medica and Pharmacy in the University of Pennsylvania. In two very large octavo volumes of 2100 pages, on small type, with about 500 illustrations on stone and wood, strongly bound in leather, with raised bands. \$9 00.

PARRISH (EDWARD),

Lecturer on Practical Pharmacy and Materia Medica in the Pennsylvania Academy of Medicine, &c.

AN INTRODUCTION TO PRACTICAL PHARMACY. Designed as a Text-Book for the Student, and as a Guide for the Physician and Pharmacist. With many Formulæ and Prescriptions. In one handsome octavo volume, extra cloth, of 550 pages, with 243 Illustrations. \$2 75.

A careful examination of this work enables us to speak of it in the highest terms, as being the best treatise on practical pharmacy with which we are acquainted, and an invaluable *vade-mecum*, not only to the apothecary and to those practitioners who are accustomed to prepare their own medicines, but to every medical man and medical student. Throughout the work are interspersed valuable tables, useful formulæ, and practical hints, and the whole is illustrated by a large number of excellent wood-engravings.—*Boston Med. and Surg. Journal*.

This is altogether one of the most useful books we have seen. It is just what we have long felt to be needed by apothecaries, students, and practitioners of medicine, most of whom in this country have to put up their own prescriptions. It bears, upon every page, the impress of practical knowledge, conveyed in a plain common sense manner, and adapted to the comprehension of all who may read it. No detail has been omitted, however trivial it may seem, although really important to the dispenser of medicine.—*Southern Med. and Surg. Journal*.

To both the country practitioner and the city apothecary this work of Mr. Parrish is a godsend. A careful study of its contents will give the young graduate a familiarity with the value and mode of administering his prescriptions, which will be of as much use to his patient as to himself.—*Va. Med. Journal*.

Mr. Parrish has rendered a very acceptable service to the practitioner and student, by furnishing this

book, which contains the leading facts and principles of the science of Pharmacy, conveniently arranged for study, and with special reference to those features of the subject which possess an especial practical interest to the physician. It furnishes the student, at the commencement of his studies, with that information which is of the greatest importance in initiating him into the domain of Chemistry and Materia Medica; it familiarizes him with the compounding of drugs, and supplies those minutiae which but few practitioners can impart. The junior practitioner will, also, find this volume replete with instruction.—*Charleston Med. Journal and Review*, Mar. 1856.

There is no useful information in the details of the apothecary's or country physician's office conducted according to science that is omitted. The young physician will find it an encyclopedia of indispensable medical knowledge, from the purchase of a spatula to the compounding of the most learned prescriptions. The work is by the ablest pharmacist in the United States, and must meet with an immense sale.—*Nashville Journal of Medicine*, April, 1856.

We are glad to receive this excellent work. It will supply a want long felt by the profession, and especially by the student of Pharmacy. A large majority of physicians are obliged to compound their own medicines, and to them a work of this kind is indispensable.—*N. O. Medical and Surgical Journal*.

PARKER (LANGSTON),

Surgeon to the Queen's Hospital, Birmingham.

THE MODERN TREATMENT OF SYPHILITIC DISEASES, BOTH PRIMARY AND SECONDARY; comprising the Treatment of Constitutional and Confirmed Syphilis, by a safe and successful method. With numerous Cases, Formulæ, and Clinical Observations. From the Third and entirely rewritten London edition. In one neat octavo volume, extra cloth, of 316 pages. \$1 75.

PIRRIE (WILLIAM), F. R. S. E.,

Professor of Surgery in the University of Aberdeen.

THE PRINCIPLES AND PRACTICE OF SURGERY. Edited by JOHN

NEILL, M. D., Professor of Surgery in the Penna. Medical College, Surgeon to the Pennsylvania Hospital, &c. In one very handsome octavo volume, leather, of 780 pages, with 316 illustrations. \$3 75.

We know of no other surgical work of a reasonable size, wherein there is so much theory and practice, or where subjects are more soundly or clearly taught.—*The Stethoscope.*

There is scarcely a disease of the bones or soft parts, fracture, or dislocation, that is not illustrated by accurate wood-engravings. Then, again, every instrument employed by the surgeon is thus represented. These engravings are not only correct, but

really beautiful, showing the astonishing degree of perfection to which the art of wood-engraving has arrived. Prof. Pirrie, in the work before us, has elaborately discussed the principles of surgery, and a safe and effectual practice predicated upon them. Perhaps no work upon this subject heretofore issued is so full upon the science of the art of surgery.—*Nashville Journal of Medicine and Surgery.*

RICORD (P.), M. D.,

A TREATISE ON THE VENEREAL DISEASE. By JOHN HUNTER, F. R. S.

With copious Additions, by PH. RICORD, M. D. Translated and Edited, with Notes, by FREEMAN J. BUMSTEAD, M. D., Lecturer on Venereal at the College of Physicians and Surgeons, New York. Second edition, revised, containing a *résumé* of RICORD'S RECENT LECTURES ON CHANCERE. In one handsome octavo volume, extra cloth, of 550 pages, with eight plates. \$3 25. (Now Ready, December, 1858.)

In revising this work, the editor has endeavored to introduce whatever matter of interest the recent investigations of syphilographers have added to our knowledge of the subject. The principal source from which this has been derived is the volume of "Lectures on Chancre," published a few months since by M. Ricord, which affords a large amount of new and instructive material on many controverted points. In the previous edition, M. Ricord's additions amounted to nearly one-third of the whole, and with the matter now introduced, the work may be considered to present his views and experience more thoroughly and completely than any other. The value of the original treatise of Mr. Hunter is too well known to require praise. Perhaps no medical work in the English language has so thoroughly stood the test of time, or has so completely assumed the position of a classic, and a volume like the present, containing the united labors of the highest authorities on so difficult and important a subject, becomes indispensable to all who desire to keep themselves on a level with the progress of medical science.

Every one will recognize the attractiveness and value which this work derives from thus presenting the opinions of these two masters side by side. But, it must be admitted, what has made the fortune of the book, is the fact that it contains the "most complete embodiment of the veritable doctrines of the Hôpital du Midi," which has ever been made public. The doctrinal ideas of M. Ricord, ideas which, if not universally adopted, are incontestably dominant, have heretofore only been interpreted by more or less skilful

secretaries, sometimes accredited and sometimes not.

In the notes to Hunter, the master substitutes himself for his interpreters, and gives his original thoughts to the world in a lucid and perfectly intelligible manner. In conclusion we can say that this is incontestably the best treatise on syphilis with which we are acquainted, and, as we do not often employ the phrase, we may be excused for expressing the hope that it may find a place in the library of every physician.—*Virginia Med. and Surg. Journal.*

BY THE SAME AUTHOR.

RICORD'S LETTERS ON SYPHILIS. Translated by W. P. LATTIMORE, M. D.

In one neat octavo volume, of 270 pages, extra cloth. \$2 00.

ROKITANSKY (CARL), M. D.,

Curator of the Imperial Pathological Museum, and Professor at the University of Vienna, &c.

A MANUAL OF PATHOLOGICAL ANATOMY. Four volumes, octavo,

bound in two, extra cloth, of about 1200 pages. Translated by W. E. SWAINE, EDWARD SIEVE-
KING, C. H. MOORE, and G. E. DAY. \$5 50

The profession is too well acquainted with the reputation of Rokitansky's work to need our assurance that this is one of the most profound, thorough, and valuable books ever issued from the medical press. It is *sui generis*, and has no standard of comparison. It is only necessary to announce that it is issued in a form as cheap as is compatible with its size and preservation, and its sale follows as a matter of course. No library can be called complete without it.—*Buffalo Med. Journal.*

An attempt to give our readers any adequate idea of the vast amount of instruction accumulated in these volumes, would be feeble and hopeless. The effort of the distinguished author to concentrate in a small space his great fund of knowledge, has

so charged his text with valuable truths, that any attempt of a reviewer to epitomize is at once paralyzed, and must end in a failure.—*Western Lancet.*

As this is the highest source of knowledge upon the important subject of which it treats, no real student can afford to be without it. The American publishers have entitled themselves to the thanks of the profession of their country, for this timely and beautiful edition.—*Nashville Journal of Medicine.*

As a book of reference, therefore, this work must prove of inestimable value, and we cannot too highly recommend it to the profession.—*Charleston Med. Journal and Review.*

This book is a necessity to every practitioner.—*Am. Med. Monthly.*

RIGBY (EDWARD), M. D.,

Senior Physician to the General Lying-in Hospital, &c.

A SYSTEM OF MIDWIFERY. With Notes and Additional Illustrations.

Second American Edition. One volume octavo, extra cloth, 422 pages. \$2 50.

BY THE SAME AUTHOR. (Now Ready, 1857.)

ON THE CONSTITUTIONAL TREATMENT OF FEMALE DISEASES.

In one neat royal 12mo. volume, extra cloth, of about 250 pages. \$1 00.

ROYLE'S MATERIA MEDICA AND THERAPEUTICS; including the

Preparations of the Pharmacopœias of London, Edinburgh, Dublin, and of the United States. With many new medicines. Edited by JOSEPH CARSON, M. D. With ninety-eight illustrations. In one large octavo volume, extra cloth, of about 700 pages. \$3 00.

RAMSBOTHAM (FRANCIS H.), M. D.

THE PRINCIPLES AND PRACTICE OF OBSTETRIC MEDICINE AND SURGERY, in reference to the Process of Parturition. A new and enlarged edition, thoroughly revised by the Author. With Additions by W. V. KEATING, M. D. In one large and handsome imperial octavo volume, of 650 pages, strongly bound in leather, with raised bands; with sixty-four beautiful Plates, and numerous Wood-cuts in the text, containing in all nearly two hundred large and beautiful figures. \$5 00.

In calling the attention of the profession to the new edition of this standard work, the publishers would remark that no efforts have been spared to secure for it a continuance and extension of the remarkable favor with which it has been received. The last London issue, which was considerably enlarged, has received a further revision from the author, especially for this country. Its passage through the press here has been supervised by Dr. Keating, who has made numerous additions with a view of presenting more fully whatever was necessary to adapt it thoroughly to American modes of practice. In its mechanical execution, a like superiority over former editions will be found.

From Prof. Hodge, of the University of Pa.

To the American public, it is most valuable, from its intrinsic undoubted excellence, and as being the best authorized exponent of British Midwifery. Its circulation will, I trust, be extensive throughout our country.

The publishers have shown their appreciation of the merits of this work and secured its success by the truly elegant style in which they have brought it out, excelling themselves in its production, especially in its plates. It is dedicated to Prof. Meigs, and has the emphatic endorsement of Prof. Hodge, as the best exponent of British Midwifery. We know of no text-book which deserves in all respects to be more highly recommended to students, and we could wish to see it in the hands of every practitioner, for they will find it invaluable for reference.—*Med. Gazette.*

But once in a long time some brilliant genius rears his head above the horizon of science, and illuminates and purifies every department that he investigates; and his works become types, by which innumerable imitators model their feeble productions. Such a genius we find in the younger Ramsbotham, and such a type we find in the work now before us. The binding, paper, type, the engravings and wood-cuts are all so excellent as to make this book one of the finest specimens of the art of printing that have given such a world-wide reputation to its enterprising and liberal publishers. We welcome Ramsbotham's Principles and Practice of Obstetric Medi-

cine and Surgery to our library, and confidently recommend it to our readers, with the assurance that it will not disappoint their most sanguine expectations.—*Western Lancet.*

It is unnecessary to say anything in regard to the utility of this work. It is already appreciated in our country for the value of the matter, the clearness of its style, and the fulness of its illustrations. To the physician's library it is indispensable, while to the student as a text-book, from which to extract the material for laying the foundation of an education on obstetrical science, it has no superior.—*Ohio Med. and Surg. Journal.*

We will only add that the student will learn from it all he need to know, and the practitioner will find it, as a book of reference, surpassed by none other.—*Stethoscope.*

The character and merits of Dr. Ramsbotham's work are so well known and thoroughly established, that comment is unnecessary and praise superfluous. The illustrations, which are numerous and accurate, are executed in the highest style of art. We cannot too highly recommend the work to our readers.—*St. Louis Med. and Surg. Journal.*

SCHOEDLER (FRIEDRICH), PH. D.,

Professor of the Natural Sciences at Worms, &c.

THE BOOK OF NATURE; an Elementary Introduction to the Sciences of Physics, Astronomy, Chemistry, Mineralogy, Geology, Botany, Zoology, and Physiology. First American edition, with a Glossary and other Additions and Improvements; from the second English edition. Translated from the sixth German edition, by HENRY MEDLOCK, F. C. S., &c. In one volume, small octavo, extra cloth, pp. 692, with 679 illustrations. \$1 80.

SMITH (HENRY H.), M. D.,

Professor of Surgery in the University of Pennsylvania, &c.

MINOR SURGERY; or, Hints on the Every-day Duties of the Surgeon. Illustrated by two hundred and forty-seven illustrations. Third and enlarged edition. In one handsome royal 12mo. volume. pp. 456. In leather, \$2 25; extra cloth, \$2 00.

BY THE SAME AUTHOR, AND

HORNER (WILLIAM E.), M. D.,

Late Professor of Anatomy in the University of Pennsylvania.

AN ANATOMICAL ATLAS, illustrative of the Structure of the Human Body. In one volume, large imperial octavo, extra cloth, with about six hundred and fifty beautiful figures. \$3 00.

These figures are well selected, and present a complete and accurate representation of that wonderful fabric, the human body. The plan of this Atlas, which renders it so peculiarly convenient for the student, and its superb artistic execution, have been already pointed out. We must congratulate

the student upon the completion of this Atlas, as it is the most convenient work of the kind that has yet appeared; and we must add, the very beautiful manner in which it is "got up" is so creditable to the country as to be flattering to our national pride.—*American Medical Journal.*

SMITH (W. TYLER), M. D.,

Physician Accoucheur to St. Mary's Hospital, &c.

ON PARTURITION, AND THE PRINCIPLES AND PRACTICE OF OBSTETRICS. In one royal 12mo. volume, extra cloth, of 400 pages. \$1 25.

BY THE SAME AUTHOR.

A PRACTICAL TREATISE ON THE PATHOLOGY AND TREATMENT OF LEUCORRHEA. With numerous illustrations. In one very handsome octavo volume, extra cloth, of about 250 pages. \$1 50.

SHARPEY (WILLIAM), M. D., JONES QUAIN, M. D., AND
RICHARD QUAIN, F. R. S., &c.

HUMAN ANATOMY. Revised, with Notes and Additions, by JOSEPH LEIDY, M. D., Professor of Anatomy in the University of Pennsylvania. Complete in two large octavo volumes, leather, of about thirteen hundred pages. Beautifully illustrated with over five hundred engravings on wood. \$6 00.

We have no hesitation in recommending this treatise on anatomy as the most complete on that subject in the English language; and the only one, perhaps, in any language, which brings the state of knowledge forward to the most recent discoveries.—*The Edinburgh Med. and Surg. Journal.*

SARGENT (F. W.), M. D.

ON BANDAGING AND OTHER OPERATIONS OF MINOR SURGERY.

Second edition, enlarged. One handsome royal 12mo. vol., of nearly 400 pages, with 182 woodcuts. Extra cloth, \$1 40; leather, \$1 50.

Sargent's Minor Surgery has always been popular, and deservedly so. It furnishes that knowledge of the most frequently requisite performances of surgical art which cannot be entirely understood by attending clinical lectures. The art of bandaging, which is regularly taught in Europe, is very frequently overlooked by teachers in this country; the student and junior practitioner, therefore, may often require that knowledge which this little volume so tersely and happily supplies.—*Charleston Med. Journ. and Review*, March, 1856.

A work that has been so long and favorably known to the profession as Dr. Sargent's Minor Surgery, needs no commendation from us. We would remark, however, in this connection, that minor surgery seldom gets that attention in our schools that its importance deserves. Our larger works are also very defective in their teaching on these small practical points. This little book will supply the void which all must feel who have not studied its pages.—*Western Lancet*, March, 1856.

SKEY'S OPERATIVE SURGERY. In one very handsome octavo volume, extra cloth, of over 650 pages, with about one hundred woodcuts. \$3 25.

STANLEY'S TREATISE ON DISEASES OF THE BONES. In one volume, octavo, extra cloth, 286 pages. \$1 50.

SOPLY ON THE HUMAN BRAIN; its Structure, Physiology, and Diseases. From the Second and

much enlarged London edition. In one octavo volume, extra cloth, of 500 pages, with 120 woodcuts. \$2 00.

SIMON'S GENERAL PATHOLOGY, as conducive to the Establishment of Rational Principles for the prevention and Cure of Disease. In one neat octavo volume, extra cloth, of 212 pages. \$1 25.

TANNER (T. H.), M. D.,

Physician to the Hospital for Women, &c.

A MANUAL OF CLINICAL MEDICINE AND PHYSICAL DIAGNOSIS.

To which is added The Code of Ethics of the American Medical Association. Second American Edition. In one neat volume, small 12mo., extra cloth, 87½ cents.

The work is an honor to its writer, and must obtain a wide circulation by its intrinsic merit alone. Suited alike to the wants of students and practi-

tioners, it has only to be seen, to win for itself a place upon the shelves of every medical library.—*Boston Med and Surg. Journal.*

Now Complete.

TODD (ROBERT BENTLEY), M. D., F. R. S.,

Professor of Physiology in King's College, London; and

WILLIAM BOWMAN, F. R. S.,

Demonstrator of Anatomy in King's College, London.

THE PHYSIOLOGICAL ANATOMY AND PHYSIOLOGY OF MAN. With

about three hundred large and beautiful illustrations on wood. Complete in one large octavo volume, of 950 pages, leather. Price \$4 50.

♣ Gentlemen who have received portions of this work, as published in the "MEDICAL NEWS AND LIBRARY," can now complete their copies, if immediate application be made. It will be furnished as follows, free by mail, in paper covers, with cloth backs.

PARTS I., II., III. (pp. 25 to 552), \$2 50.

PART IV. (pp. 553 to end, with Title, Preface, Contents, &c.), \$2 00.

Or, PART IV., SECTION II. (pp. 725 to end, with Title, Preface, Contents, &c.), \$1 25.

A magnificent contribution to British medicine, and the American physician who shall fail to peruse it, will have failed to read one of the most instructive books of the nineteenth century.—*N. O. Med. and Surg. Journal*, Sept. 1857.

It is more concise than Carpenter's Principles, and more modern than the accessible edition of Müller's Elements; its details are brief, but sufficient; its descriptions vivid; its illustrations exact and copious; and its language terse and perspicuous.—*Charleston Med. Journal*, July, 1857.

We know of no work on the subject of physiology so well adapted to the wants of the medical student. Its completion has been thus long delayed, that the authors might secure accuracy by personal observation.—*St. Louis Med. and Surg. Journal*, Sept. 1857.

One of the very best books ever issued from any medical press. We think it indispensable to every reading medical man, and it may, with all propriety, and with the utmost advantage be made a text-book by any student who would thoroughly comprehend the groundwork of medicine.—*N. O. Med. News*, June, 1857.

Our notice, though it conveys but a very feeble and imperfect idea of the magnitude and importance of the work now under consideration, already transcends our limits; and, with the indulgence of our readers, and the hope that they will peruse the book for themselves, as we feel we can with confidence recommend it, we leave it in their hands for them to judge of its merits.—*The Northwestern Med. and Surg. Journal*, Oct. 1857.

TODD (R. B.), M. D., F. R. S., &c.

CLINICAL LECTURES ON CERTAIN DISEASES OF THE URINARY ORGANS AND ON DROPSIES. In one octavo volume. (*Just Issued*, 1857.) \$1 50.

TAYLOR (ALFRED S.), M. D., F. R. S.,

Lecturer on Medical Jurisprudence and Chemistry in Guy's Hospital.

MEDICAL JURISPRUDENCE. Fourth American Edition. With Notes and References to American Decisions, by EDWARD HARTSHORNE, M. D. In one large octavo volume, leather, of over seven hundred pages. \$3 00.

This standard work has lately received a very thorough revision at the hands of the author, who has introduced whatever was necessary to render it complete and satisfactory in carrying out the objects in view. The editor has likewise used every exertion to make it equally thorough with regard to all matters relating to the practice of this country. In doing this, he has carefully examined all that has appeared on the subject since the publication of the last edition, and has incorporated all the new information thus presented. The work has thus been considerably increased in size, notwithstanding which, it has been kept at its former very moderate price, and in every respect it will be found worthy of a continuance of the remarkable favor which has carried it through so many editions on both sides of the Atlantic. A few notices of the former editions are appended.

We know of no work on Medical Jurisprudence which contains in the same space anything like the same amount of valuable matter.—*N. Y. Journal of Medicine.*

No work upon the subject can be put into the hands of students either of law or medicine which will engage them more closely or profitably; and none could be offered to the busy practitioner of either calling, for the purpose of casual or hasty reference, that would be more likely to afford the aid desired. We therefore recommend it as the best and safest manual for daily use.—*American Journal of Medical Sciences.*

This work of Dr. Taylor's is generally acknowledged to be one of the ablest extant on the subject of medical jurisprudence. It is certainly one of the most attractive books that we have met with; supplying so much both to interest and instruct, that

we do not hesitate to affirm that after having once commenced its perusal, few could be prevailed upon to desist before completing it. In the last London edition, all the newly observed and accurately recorded facts have been inserted, including much that is recent of Chemical, Microscopical, and Pathological research, besides papers on numerous subjects never before published.—*Charleston Medical Journal and Review.*

It is not excess of praise to say that the volume before us is the very best treatise extant on Medical Jurisprudence. In saying this, we do not wish to be understood as detracting from the merits of the excellent works of Beck, Ryan, Traill, Guy, and others; but in interest and value we think it must be conceded that Taylor is superior to anything that has preceded it.—*N. W. Medical and Surg. Journal.*

BY THE SAME AUTHOR. (*Nearly Ready.*)

ON POISONS, IN RELATION TO MEDICAL JURISPRUDENCE AND MEDICINE. Second American, from a second and revised London edition. In one large octavo volume.

The length of time which has elapsed since the first appearance of this work, has wrought so great a change in the subject, as to require a very thorough revision to adapt the volume to the present wants of the profession. The rapid advance of Chemistry has introduced into use many new substances which may become fatal through accident, carelessness, or design—while at the same time it has likewise designated new and more exact modes of counteracting or detecting those previously treated of. Mr. Taylor's position as the leading medical jurist of England, has during this period conferred on him extraordinary advantages in acquiring experience in all that relates to this department, nearly all cases of moment being referred to him for examination, as an expert whose testimony is generally accepted as final. The results of his labors, therefore, as gathered together in this volume, carefully weighed and sifted, and presented in the clear and intelligible style for which he is noted, may be received as an acknowledged authority, and as a guide to be followed with implicit confidence.

WILSON (MARRIS), M. D.

ON DISEASES OF THE VESICULÆ SEMINALES. See "LALLEMAND," page 19.

WILLIAMS (C. J. B.), M. D., F. R. S.,

Professor of Clinical Medicine in University College, London, &c.

PRINCIPLES OF MEDICINE. An Elementary View of the Causes, Nature, Treatment, Diagnosis, and Prognosis of Disease; with brief remarks on Hygienics, or the preservation of health. A new American, from the third and revised London edition. In one octavo volume, leather, of about 500 pages. \$2 50. (*Just Issued.*)

The very recent and thorough revision which this work has enjoyed at the hands of the author has brought it so completely up to the present state of the subject that in reproducing it no additions have been found necessary. The success which the work has heretofore met shows that its importance has been appreciated, and in its present form it will be found eminently worthy a continuance of the same favor, possessing as it does the strongest claims to the attention of the medical student and practitioner, for the admirable manner in which the various inquiries in the different branches of pathology are investigated, combined and generalized by an experienced practical physician, and directly applied to the investigation and treatment of disease.

We find that the deeply-interesting matter and style of this book have so far fascinated us, that we have unconsciously hung upon its pages, not too long, indeed, for our own profit, but longer than reviewers can be permitted to indulge. We leave the further analysis to the student and practitioner. Our judgment of the work has already been sufficiently expressed. It is a judgment of almost unqualified praise. The work is not of a controversial, but of a didactic character; and as such we hail it, and

recommend it for a text-book, guide, and constant companion to every practitioner and every student who wishes to extricate himself from the well-worn ruts of empiricism, and to base his practice of medicine upon principles.—*London Lancet.*

A text-book to which no other in our language is comparable.—*Charleston Medical Journal.*

No work has ever achieved or maintained a more deserved reputation.—*Va. Med. and Surg. Journal.*

WHITEHEAD ON THE CAUSES AND TREATMENT OF ABORTION AND STERILITY.

Second American Edition. In one volume, octavo, extra cloth, pp 308. \$1 75.

New and much enlarged edition—(Now Ready, Oct. 1858.)

WATSON (THOMAS), M. D., &c.

Late Physician to the Middlesex Hospital, &c.

LECTURES ON THE PRINCIPLES AND PRACTICE OF PHYSIC.

Delivered at King's College, London. A new American, from the last revised and enlarged English edition, with Additions, by D. FRANCIS CONDIE, M. D., author of "A Practical Treatise on the Diseases of Children," &c. With one hundred and eighty-five illustrations on wood. In one very large and handsome volume, imperial octavo, of over 1200 closely printed pages in small type; the whole strongly bound in leather, with raised bands. Price \$4 25.

The publishers feel that they are rendering a service to the American profession in presenting at so very moderate a price this vast body of sound practical information. Whether as a guide for the student entering on a course of instruction, or as a book of reference for daily consultation by the practitioner, "Watson's Practice" has long been regarded as second to none; the soundness and fulness of its teachings, the breadth and liberality of its views, and the easy and flowing style in which it is written having won for it the position of a general favorite. That this high reputation might be fully maintained, the author has subjected it to a thorough revision; every portion has been examined with the aid of the most recent researches in pathology, and the results of modern investigations in both theoretical and practical subjects have been carefully weighed and embodied throughout its pages. The watchful scrutiny of the editor has likewise introduced whatever possesses immediate importance to the American physician in relation to diseases incident to our climate which are little known in England, as well as those points in which experience here has led to different modes of practice; and he has also added largely to the series of illustrations, believing that in this manner valuable assistance may be conveyed to the student in elucidating the text. The work will, therefore, be found thoroughly on a level with the most advanced state of medical science on both sides of the Atlantic.

The additions which the work has received are shown by the fact that notwithstanding an enlargement in the size of the page, more than two hundred additional pages have been necessary to accommodate the two large volumes of the London edition (which sells at ten dollars), within the compass of a single volume, and in its present form it contains the matter of at least three ordinary octavos. Believing it to be a work which should lie on the table of every physician, and be in the hands of every student, the publishers have put it at a price within the reach of all, making it one of the cheapest books as yet presented to the American profession, while at the same time the beauty of its mechanical execution renders it an exceedingly attractive volume.

It would appear almost superfluous to adduce commendatory notices of a work which has so long been established in the position of a standard authority as "Watson's Practice." A few extracts are, however, subjoined from reviews of the new and improved edition.

The fourth edition now appears, so carefully revised, as to add considerably to the value of a book already acknowledged, wherever the English language is read, to be beyond all comparison the best systematic work on the Principles and Practice of Physic in the whole range of medical literature. Every lecture contains proof of the extreme anxiety of the author to keep pace with the advancing knowledge of the day, and to bring the results of the labors, not only of physicians, but of chemists and histologists, before his readers, wherever they can be turned to useful account. And this is done with such a cordial appreciation of the merit due to the industrious observer, such a generous desire to encourage younger and rising men, and such a candid acknowledgment of his own obligations to them, that one scarcely knows whether to admire most the pure, simple, forcible English—the vast amount of useful practical information condensed into the Lectures—or the manly, kind-hearted, unassuming character of the lecturer shining through his work.—*London Med. Times and Gazette*, Oct. 31, 1857.

Thus these admirable volumes come before the profession in their fourth edition, abounding in those distinguished attributes of moderation, judgment, erudite cultivation, clearness, and eloquence, with which they were from the first invested, but yet richer than before in the results of more prolonged observation, and in the able appreciation of the latest advances in pathology and medicine by one of the most profound medical thinkers of the day.—*London Lancet*, Nov. 14, 1857.

The lecturer's skill, his wisdom, his learning, are equalled by the ease of his graceful diction, his eloquence, and the far higher qualities of candor, of courtesy, of modesty, and of generous appreciation of merit in others. May he long remain to instruct us, and to enjoy, in the glorious sunset of his declining years, the honors, the confidence and love gained during his useful life.—*N. A. Med.-Chir. Review*, July, 1858.

Watson's unrivalled, perhaps unapproachable work on Practice—the copious additions made to which (the fourth edition) have given it all the novelty and much of the interest of a new book.—*Charleston Med. Journal*, July, 1858.

Lecturers, practitioners, and students of medicine will equally hail the reappearance of the work of Dr. Watson in the form of a new—a fourth—edition. We merely do justice to our own feelings, and, we are sure, of the whole profession, if we thank him for having, in the trouble and turmoil of a large practice, made leisure to supply the hiatus caused by the exhaustion of the publisher's stock of the third edition, which has been severely felt for the last three years. For Dr. Watson has not merely caused the lectures to be reprinted, but scattered through the whole work we find additions or alterations which prove that the author has in every way sought to bring up his teaching to the level of the most recent acquisitions in science.—*Brit. and For. Medico-Chir. Review*, Jan. 1858.

WHAT TO OBSERVE

AT THE BEDSIDE AND AFTER DEATH, IN MEDICAL CASES.

Published under the authority of the London Society for Medical Observation. A new American, from the second and revised London edition. In one very handsome volume, royal 12mo., extra cloth. \$1 00.

To the observer who prefers accuracy to blunders and precision to carelessness, this little book is invaluable.—*N. H. Journal of Medicine*.

One of the finest aids to a young practitioner we have ever seen.—*Peninsular Journal of Medicine*.

WILDE (W. R.),

Surgeon to St. Mark's Ophthalmic and Aural Hospital, Dublin.

AURAL SURGERY, AND THE NATURE AND TREATMENT OF DISEASES OF THE EAR. In one handsome octavo volume, extra cloth, of 476 pages, with illustrations. \$2 80.
